Engineering Sciences 399-TIME

Academic-Related Work for SEAS Graduate Students (208271)

2020 Fall (4 Credits)  
Schedule:  
TBD

Instructor Permissions:  
Instructor

Enrollment Cap:  
n/a

Enrollment in ES 399-TIME is open to any SEAS Ph.D., M.E., or S.M. student who holds a SEAS or FAS Teaching Fellow (TF) appointment and is engaged in teaching a course. Once hired to teach in a specific course, whether within or outside SEAS, the student must complete the online form at http://tinyurl.com/seastfform.

SEAS Ph.D. students who are required to enroll in the Bok Center’s non-credit Communicating Science seminar in order to meet the GSAS English Language Proficiency requirement may also enroll in 4 units of ES 399-TIME.

Course Notes:  
Teaching Fellows may enroll in 4 units of ES 399-TIME for a .25 FTE TF appointment, or up to 8 units of ES 399-TIME for a .5 FTE TF appointment. TFs should not enroll in the course in which they are teaching.

Any enrollment in ES 399-TIME other than as described here is disallowed by SEAS policy, with exceptions requiring prior approval of the Director of Graduate Studies. ES 399-TIME cannot be used to satisfy any degree requirements.

In Lost Children Archive, Valeria Luiselli writes: "I suppose that documenting things—through the lens of a camera, on paper, or with a sound recording device—is really only a way of contributing one more layer, something like soot, to all the things already sedimented in a collective understanding of the world." This class will focus on the art of documenting the "now" through prose and how such documentation can work to contribute another layer to the collective understanding. Together we will explore the art of writing from a space of "closeness," or rendering events/moments in time on the page as they unfold around us. How can closeness deepen intensity and insight? What value can we locate in writing from a place of ongoingness as opposed to in pursuit of resolution? What specific difficulties and questions can closeness introduce?

In support of this exploration, we will study published prose works that take the shape of diaries; self-portraits; drifts; hybrids of fiction and reportage. The reading list will include work from Ross Gay, Kate Zambreno, Valeria Luiselli, Zadie Smith, and Yuko Tsushima. Students will also undertake exercises designed to encourage experiments with form, perspective, time, observation, and genre (we’ll be reading fiction, nonfiction, and hybrid forms, and students will be invited to write in any or all of those genres). Later in the term, your own stories will serve as the primary text as the focus shifts to workshop and revision.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.
"I've often noticed that we are not able to look at what we have in front of us," the Iranian director Abbas Kiarostami said, "unless it's inside a frame." For our communities confronting invisibility and erasure, there's an urgent need for new frames. In this workshop, we'll explore a community-engaged approach to documentary filmmaking, as we seek to see our world more deeply. We'll begin with screenings, craft exercises, and discussions around authorship and social impact. Then we each will develop a short documentary over the rest of the semester, building off of intentional community engagement. Students will end the class with a written documentary treatment and recorded material for a rough cut.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. CAFR: Advanced Fiction Workshop: Writing this Present Life (160953)

*Claire Messud*

2020 Fall (4 Credits)  

**Schedule:** R 0300 PM - 0545 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

Intended for students with prior fiction-writing and workshop experience, this course will concentrate on structure, execution and revision. Exploring various strands of contemporary and recent literary fiction – writers such as Karl Ove Knausgaard, Rachel Cusk, Chimamanda Adichie, Valeria Luiselli, etc – we will consider how fiction works in our present moment, with emphasis on a craft perspective. Each student will present to the class a published fiction that has influenced them. The course is primarily focused on the discussion of original student work, with the aim of improving both writerly skills and critical analysis. Revision is an important component of this class: students will workshop two stories and a revision of one of these.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.

English   CAJR

Investigations: Journalism and Social Justice (205147)

Jill Abramson

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  12

The former executive editor of The New York Times is offering an advanced seminar on investigative journalism and social justice. Going back to the famous Muckrakers of the early 1900s, investigative journalists have exposed social injustice. Their work has inspired change in laws and public attitudes. By holding powerful people and institutions accountable, investigative journalism has been important instrument of social change.

Readings will include The New York Times’ 1619 Project, a deep investigation of slavery’s legacy and racism’s impact on American life, including economic inequality, mass incarceration, police killings, red-lining, evictions, re-segregation of school systems and wide health care disparities. The 1619 Project and its creator, Nikole Hannah-Jones, won this year's Pulitzer Prize for Public Service

Besides the Project, other works on the syllabus include, among others, Ta Nehisi Coates on reparations, Ida B. Wells on lynching, Bill Dedman's Pulitzer-winning account of red-lining in Atlanta, Andrea Elliot’s exploration of homelessness in New York City, Nikole Hannah-Jones examination of the re-segregation of schools in Tuscaloosa, Alabama, and Pro-Publica's probe into high mortality rates among Black mothers during childbirth. The class will also study the methodology, reporting and writing challenges faced by The

With the 2020 presidential campaign looming we will also focus on the role of race in the campaigns of Donald Trump and Joe Biden.

The class will be multi-platform and multi-media including assignments of documentaries, such as "13th" and podcasts such as "Still Processing." Outside speakers will include some of the journalists whose work we explore. They will Zoom into class as frequently as possible.

Students will become skilled in the basics of investigative reporting, including how to use public documents, how to build sources, and how to conduct interviews (remotely and in-person). Students will learn the basic rules of ethical journalism and apply them to their work.

There will be bi-weekly writing assignments and each student will produce a major investigative reporting project. Grades will be based on writing assignments, class engagement and analysis of readings. The final project will weigh heavily on final grades.

Prior experience in journalism or published articles are not required. Love of great writing that performs a social good is the main prerequisite.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. English     CALR

Advanced Screenwriting: Workshop (123934)

Musa Syeed

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 12

The feature-length script is an opportunity to tell a story on a larger scale, and, therefore, requires additional preparation. In this class, we will move from writing a pitch, to a synopsis, to a treatment/outline, to the first 10 pages, to the first act of a feature screenplay. We will analyze produced scripts and discuss various elements of craft, including research, writing layered dialogue, world-building, creating an engaging cast of characters. As an advanced class, we will also look at ways both mainstream and independent films attempt to subvert genre and structure.

Students will end the semester with a first act (20-30 pages) of their feature, an outline, and strategy to complete the full script.

Course Notes: Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page. Workshops do not ordinarily meet during shopping period. Instructors will notify admitted students of first meeting date.
**English CAMR**

Advanced Playwriting: Workshop (145402)

*Sam Marks*

2021 Spring (4 Credits)  
**Schedule:** TBD

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

This workshop is a continued exploration of writing for the stage. Students will be encouraged to excavate their own voice in playwriting. They will examine and attempt multiple narrative strategies and dialogue techniques. They will bolster their craft of playwriting through generating short scripts and a completed one act. Readings will include significant contributors to the theatrical form such as Ibsen and Beckett as well as contemporary dramatists such as Annie Baker, Caryl Churchill and Sam Shepard.

**Course Notes:** Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page. Workshops do not ordinarily meet during shopping period. Instructors will notify admitted students of first meeting date.

The Art of the Personal Essay: Workshop (213301)

*Darcy Frey*

2020 Fall (4 Credits)  
**Schedule:** R 0300 PM - 0545 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

What makes a successful work of personal narrative? What lifts mere experience into shapely art? In this workshop, students will study—partly through reading iconic and experimental essayists, mainly through the submission of their own writing—the art of the personal essay. We will explore elements of the craft such as the construction of a trustworthy narrator, varieties of structure and the fashioning of a satisfying conclusion. Readings include work by writers such as Annie Dillard, Joan Didion, James Baldwin and David Foster Wallace. Writing assignments include several short essays, one longer essay and an extensive revision.

**Course Notes:** Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday.
August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.

Intermediate Poetry: Workshop (146632)  
Joshua Bell  
2021 Spring (4 Credits)  
Schedule: TBD  
Enrollment Cap: 12  
Instructor Permissions: Instructor  
Initially, students can expect to read, discuss, and imitate the strategies of a wide range of poets writing in English; to investigate and reproduce prescribed forms and poetic structures; and to engage in writing exercises meant to expand the conception of what a poem is and can be. As the course progresses, reading assignments will be tailored on an individual basis, and an increasing amount of time will be spent in discussion of student work.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during
Shopping Week.

Breaking Form: Creative Writing Workshop (208934)

Teju Cole

2020 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 12

The tension between the invented and the observed has compelled many writers to break out of inherited forms. How can we productively blur the line between fiction and non-fiction? What are the possibilities for very short narrative pieces? In this prose writing workshop, our thinking will be helped along by a wide variety of authors that, in one way or the other, make it new. Readings include Lydia Davis, Michael Ondaatje, Anne Carson, and Claudia Rankine.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops,
applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.

Creative Nonfiction: Before and Beyond the (Imaginary White) Reader (216639)

*Joan Kane*

2021 Spring (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

Writers of literary, lyrical nonfiction negotiate complex power dynamics with their selves, communities, subjects, and readers. In this workshop we will conduct an intensive study of the craft techniques writing of creative nonfiction, focusing on the balance between the politicization of witness, descriptive detail, and narrative voice. Given that one of the great imaginative allures of lyric prose is that it can invent its audience as much as it can invent its speaker, how do writers of creative nonfiction contend with social context? What are the ways in which we can write and revise lyrically that can allow our work to depart from, evade and amplify the experiential in its collaborations with language, history, and place? We will do some generative exercises and workshopping (each writer will be workshopped at least twice per semester) as well as discussion, of course. Participants will generate drafts, revise new work, and investigate the fundamentals of the genre of creative nonfiction.

Advanced Fiction Writing (216215)

*Indraneel Mukherjee*

2021 Spring (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:** None  

**Enrollment Cap:** 12

The course will consist of two halves. In the first hour of each class, we will be doing close readings of an assigned text (TBA), with the aim of isolating some aspect of the craft of writing in order to take bearings for your own. In the second half of the class, divided into two equal segments of an hour each, we will be workshopping the writing of two students. Our goal is for each of you to have two turns, and approximately 5-10,000 words of your work critiqued, by the time semester ends. The final project involves significant redrafting of a story or a portion of a novel.
English     CFF
From Fact to Fiction: Finding & Shaping a Story: Workshop (216347)

Claire Messud

2020 Fall (4 Credits)  

Instructor Permissions:  

Schedule: W 0300 PM - 0545 PM

Instructor Enrollment Cap: 12

In this course, we will explore the evolution of a story from a factual anecdote or incident to a fictional creation. The aims of the semester are to learn to listen to someone else’s story in interviews, and to endeavor to find, from there, the necessary bones for a fictional narrative. What is most urgent? What is most emotionally affecting? What are the details from an interview that stay with you? And from there: what, from a broader account, is the story you are moved to relate? Once you make that choice, how do you do further research, if necessary? How do you select the point of view, the frame, the characters for your fiction? What are the ethics and responsibilities of these choices?

In these riven and challenging times, storytelling is vital: learning to listen, to engage, and responsibly to relay what we discover. Each person we encounter is a bearer of wisdom and vast experience; so many urgent stories remain untold. How might we, as fiction writers, address reality, without simply writing about ourselves?

Several published writers will visit the class to share their experiences of research, and of the relation in their work of fact to invention. We will read published examples of fact-based fiction, and discuss the authors’ choices.

The first third of the class will involve preparing and conducting interviews with a chosen subject, and sharing those interviews with the class. The second third will involve refining the story’s arc, research and formal decision-making, and writing a first draft. Finally, we will workshop the revised stories that have emerged from this process.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Introductory Fiction Workshop: Finding and Shaping the Story (160952)

*Claire Messud*

2021 Spring (4 Credits)  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

An introductory fiction workshop, in which students will explore elements of craft such as character, point of view, setting, detail, style, etc. The first weeks will be devoted to fiction readings (including Gustave Flaubert, James Joyce, Ernest Hemingway, Toni Morrison, Alice Munro, Yiyun Li, Richard Flanagan, NoViolet Bulawayo, among others) and creative exercises; most of the semester will be spent workshopping student fiction. The final project involves significant revision of a story.

**Course Notes:** Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department’s Creative Writing web page. Workshops do not ordinarily meet during shopping period. Instructors will notify admitted students of first meeting date.

2021 Spring (4 Credits)  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

The course will consist of two halves. In the first hour of each class, we will be doing close readings of an assigned text (please see 'Syllabus'), with the aim of isolating some concept or aspect of the genre under discussion in order to take bearings for your own. The assigned reading is obligatory. We will be looking at questions of genre, and at the reasons for the quotation marks bracketing the word genre in the heading. We will also look at the convergences and divergences in the various kinds and modes mentioned in the title of the course. We will be thinking of generic *topoi*, conceptual underpinnings, imagination, style, world-building, storytelling, resolution, among other things.

In the second half of the class, divided into two equal segments of 50 minutes each, we will be workshopping the writing of two students. Our goal is for each of you to have two turns, and approximately 5-10,000 words of your work critiqued, by the time semester ends. The final project involves significant redrafting of a story or a portion of a novel.

Introduction to Journalism: Workshop (156630)
Jill Abramson
2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  12

An intense seminar for those interested in understanding the changing role of journalism and in learning the art of reporting and writing narrative stories. The course is intended for those contemplating careers as journalists or because they want a better sense of how journalism really works. Coursework will include two narrative articles that are ready for publication. Readings will include some of the best examples of modern journalism, from magazine features by authors including Gay Talese to multimedia narratives such as The New York Times' "Snow Fall."

Course Notes:  Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.

**Poetry Workshop: BIPOC Context and Craft (216638)**

*Joan Kane*

2020 Fall (4 Credits)  
**Schedule:** R 1200 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

This poetry workshop centers the work of BIPOC writers through intensive study of poetry writing and the writing process, focusing on craft techniques of imagery, rhythm, and poetic structure. This workshop will initially focus on the generation of new work but will move toward revision-based instruction and discussion. Each student will have their poems workshopped at least twice per semester. Students are responsible for reading assigned texts, submitting required work for workshop, reading and writing critiques of fellow students' work, accessing (livestreamed or archived) readings, reading and (writing about) one poem closely each week, and memorizing and recording two poems.
Introduction to Playwriting: Workshop (116875)

Sam Marks

2020 Fall (4 Credits)  Schedule:  M 1200 PM - 0245 PM

Instructor Permissions: Instructor  Enrollment Cap:  12

This workshop is an introduction to writing for the stage through intensive reading and in-depth written exercises. Each student will explore the fundamentals and possibilities of playwriting by generating short scripts and completing a one act play with an eye towards both experimental and traditional narrative styles. Readings will examine various ways of creating dramatic art and include work from contemporary playwrights such as Aleshea Harris, Ayad Akhtar, Robert O'Hara, Clare Barron, Suzan Lori-Parks, and Taylor Mac, as well established work from Caryl Churchill, Edward Albee, and Harold Pinter.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Introduction to Screenwriting: Workshop (116874)

Musa Syeed

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 12

The short film, with its relatively lower costs and expanded distribution opportunities, has become one of the most disruptive, innovative modes of storytelling—and is often an emerging filmmaker's first step into the industry. This course will introduce students to the basics of short form screenwriting, including narrative theory/structure, character design, and dialogue/voice. In the first quarter of the semester, we will hone dramatic techniques through several craft exercise assignments and in-class writing. In the following weeks, students will write two short screenplays. Throughout the semester, we will be workshopping and doing table reads of student work, discussing screenplays and craft texts, and screening a wide array of short films. The emphasis will be on discovering a sense of personal voice and completing two short screenplays (under 20 pages) that the student can produce in the future, if they choose.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. The Novel Lab: Studying Long-Form Narratives in Fiction (216098)

What defines a novel? And what does it mean to read one as a writer? How does a painter consider a painting or a photographer a photo? This readings class will study novels through the point of view of a practicing writer. We will read one novel a week, with the goal of exploring the ways in which long-form narratives are constructed, from chapter to chapter, from one movement to another—that is, the architecture of it. Please note: this is not a workshop. You will not be sharing your work. Consider the class an investigation into all the tools a writer has to create fiction, with the end goal of producing 2 - 3 chapters of the beginning of a novel as your final project.

Course Notes:
Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Writing for Television: Developing the Pilot: Workshop (203266)

Sam Marks

2020 Fall (4 Credits)  Schedule:  T 1200 PM - 0245 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

This workshop introduces the television pilot with a focus on prestige drama and serialized comedy. Students will excavate their own voice and explore the structure and execution of pilot writing through a first draft of their own original script. With intensive reading and discussion of student work we will examine elements of TV writing, such as treatments and outlines as well as character, dialogue, tone, plot, and, most importantly, vision. Over the semester, we’ll turn ideas into worlds and worlds into scripts.

Course Notes:  Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Fiction Writing: Workshop (203265)

Laura van den Berg

2020 Fall (4 Credits)  

**Schedule:**  
W 1200 PM - 0245 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
12

This course will focus on the art of writing fiction. The initial weeks will focus on reading and craft discussion—exploring craft subjects such as structure, time, point-of-view, and landscape—and generating new work through experiments in craft and imagination. Later in the term, your own fiction will serve as the primary text as the focus shifts to workshop critique and, finally, to revision. The syllabus is likely to include work from Helen Oyeyemi, Claire Vaye Watkins, Nam Le, Julio Cortázar, Italo Calvino, Nana Kwame Adjei-Brenyah, and Alexander Chee—among others.

**Course Notes:**  
Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.

The Art of Writing about Science and the Environment: Workshop (207988)

Russell Rymer

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  
Schedule: TBD  
Enrollment Cap: 12

This is a seminar in creative nonfiction writing that will take science and the environment as its subject matter. Students will research and write a series of magazine-style articles about science or scientists, intended for a general readership. Along the way, they will hone their interviewing and research skills and expressive capabilities, while contending with issues of factual accuracy, creative license, authority, and responsibility, along with the basic tenets of longform nonfiction. Ultimately students will explore the ways that hard science and subjective prose are interrelated forms. No prior experience with science is required.

Course Notes: Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page. Workshops do not ordinarily meet during shopping period. Instructors will notify admitted students of first meeting date.

English    CWWR

Writing Women: Workshop (207987)

Susan Faludi

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  
Schedule: TBD  
Enrollment Cap: 12

Women have historically exerted their voice and power through writing, even as the professional writing trades of journalism and publishing have historically been unwelcoming of their presence. This seminar class will examine reporting and writing by and about women, and engage students in the practice of writing about gender, feminism, and women's lives. Students will produce and workshop their own researched and reported longform articles, while simultaneously inspecting how the media represents
women's issues and learning the history of women writers in American journalism. We will grapple with questions of interviewing, structure, creative expression, ethics, and fair representation, along with the fundamentals of narrative nonfiction.

Course Notes: Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page. Workshops do not ordinarily meet during shopping period. Instructors will notify admitted students of first meeting date.

Literature Today (132844)

*Kelly Rich*

*Teju Cole*

2020 Fall (4 Credits)  
Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None  
Enrollment Cap: n/a

All literature was contemporary at some point, but the literature that is contemporary now provides special opportunities for enjoying, questioning, and understanding the world. Literature Today focuses on works written since 2000—since most of you were born. It explores how writers from around the world speak to and from their personal and cultural situations, addressing current problems of economic inequality, technological change, structural prejudice, and divisive politics. We will encounter a range of genres, media, and histories to study contemporary literature as a living, evolving system. The course uniquely blends literary study and creative writing—students will analyze literature and make literature. The conviction that these practices are complementary will inform our approach to readings and course assignments.

**English  20**

Literary Forms (216063)

*Stephanie Burt*

2020 Fall (4 Credits)  
Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Instructor  
Enrollment Cap: 27

This foundational course for English concentrators examines literary form and genre. We explore some of
the many kinds of literature as they have changed over time, along with the shapes and forms that writers create, critics describe, and readers learn to recognize. The body of the course looks to the great literary types, or modes, such as epic, tragedy, and lyric, as well as to the workings of literary style in moments of historical change, producing the transformation, recycling, and sometimes the mocking of past forms. While each version of English 20 includes a different array of genres and texts from multiple periods, those texts will always include five major works from across literary history: Beowulf (epic), King Lear (tragedy), Persuasion (comic novel), The Souls of Black Folk (essays; expository prose), and Elizabeth Bishop’s poems (lyric). The course integrates creative writing with critical attention: assignments will take creative as well as expository and analytical forms.

Course Notes: English 20 has been offered before, but this is a new version course, and should have a new course ID

English   40

Arrivals: British Literature, 700-1700 (145787)

Daniel Donoghue

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 27

An introduction to major works in English literature from Beowulf through the seventeenth century, the course will explore various ways that new literatures are created in response to cultural forces that shape poets, genres, and group identity. We will hone close reading skills, introduce rhetorical tropes, and develop techniques of critical writing.

Course Notes: Be sure to attend first class meeting to be considered for admittance.

English   45 Section: 01

Arrivals: British Literature 700-1700 (207556)

Anna Wilson

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 27

In this course we will read some of the most significant works of literature written in the British Isles before 1700, whose influence continues to be felt in present-day writers. We will trace the early evolution of different genres - romance, epic, drama, lyric - and the emergence of English from an underdog position to a fully realized literary language. We will read some of the classics alongside some of their lesser known
interlocutors, while exploring how these texts respond to and shape issues of their time, including war, shifting political regimes, national, racial, and religious identities, and changing attitudes to gender and sexuality. Come for the grounding in the great works of early British literature, stay for the dragons, genderfluid knights, dark comedies about selling your soul, and surprisingly racy sonnets.

Course Notes: Be sure to attend first class meeting to be considered for admittance.

Poets: Keats Isn't Dead: How We Live Romanticism (214513)

_Vidyan Ravinthiran_

2020 Fall (4 Credits)  
**Schedule:** MW 1200 PM - 0115 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 27

Our thoughts and feelings about identity, self-expression, and the power of the imagination draw on the British Romantic poetry of the Long Eighteenth Century—whether we've read any or not. Focusing on John Keats (his key poems, and his key ideas, about 'negative capability', the 'camelion poet', and so on), this course makes unconventional connections into the twentieth, and twenty-first century. Tracking issues of race, class, gender and sexuality, we'll bounce from Keats into war verse; African-American poetries; world/postcolonial writing; the literature of social class; feminist experimentalism; and constructions of masculinity. Concentrators will learn how to analyze poetry in both closed and open forms.

Additional Course Attributes:
**English 63D**

Migrations: Narrating Displacement (216066)

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 27

Schedule: TBD

This seminar will examine the intersections of individual identity and national identity with a unifying course theme of immigrant displacement as a lived experience. Accordingly, we will examine American immigrant experiences through nonfiction from different periods and voices. The texts we'll read and discuss will challenge what we think we know about ourselves, about others, and about the idea of where we belong. Through our readings, class discussions, and writing requirements, we will develop a more nuanced and critical understanding of the constructed nature of displacement and what it means to belong.

Course Notes: Be sure to attend first class meeting to be considered for admittance.

Migrations: Imagined Climates: Writing in the Wake of Climate Change (216071)

2020 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 27

Schedule: MW 0300 PM - 0415 PM

How do novelists and poets and essayists represent climate change? What kinds of futures do they project for our injured and shifting world? Through mysteries, spoken word poetry, science fiction, and other genres, this course confronts the representational challenges presented by planetary environmental crisis. Our focus is on the climate refugee and the myriad migrations and displacements of anthropogenic climate change. We also theorize how—and why—particular writers' voices become central or peripheral within climate discourse. Authors may include Octavia Butler, Cherie Dimaline, Kathy Jetñil-Kijiner, Barbara Kingsolver, Nathaniel Rich, Elizabeth Rush, Juliana Spahr, and Emily St. John Mandel.

Memory in Asian American Literature (216395)

Janet Zong York

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 15

Schedule: TBD
What is the status of memory in contemporary Asian American literature? We explore how remembrance and forgetting, both individual and collective, help constitute panethnic Asian America as an imagined community. What conflicts of memory are inherited from legacies of war, exclusion, and migration? How does memory inform responses to present injustices and the ways people narrate the past and imagine the future? Other topics: form; affect; multimedia memory; memory as work or labor; mourning and history; memorialization and monuments. Novels, short stories, graphic narratives, and poetry may include works by: Cathy Park Hong, Jhumpa Lahiri, Aimee Phan, Yiyun Li, Ocean Vuong, Mira Jacob, Gene Leung, Mohsin Hamid, Viet Thanh Nguyen, among others.

Boredom (216431)

*Elizabeth Phillips*

2020 Fall (4 Credits)  

**Schedule:** TR 1030 AM - 1145 AM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 15

What is boredom? In many ways, it has likely never been more deeply felt, culturally contentious, and all-consuming than it is right now. But this feeling has a long and rich history in literature, drama, philosophy, and science. This interdisciplinary seminar will explore plays and novels by authors like Baudelaire, Beckett, Chekhov, Flaubert, Huysmans, Wallace, Warhol, and Wilson, as well as theoretical readings, psychological studies, performance art, and reality television. We will ask: how is the emotion of boredom destructive and/or generative? How might its effects and moral resonance change across lines of gender, race, and class? How does boredom transform or become magnified in spaces like schools, theaters, trench warfare, arctic winter, or solitary confinement? Assignments and projects may include papers, creative writing, music and dance, and/or social experiments.

Contemporary American Plays: Seminar (130958)

*Derek Miller*

2020 Fall (4 Credits)  

**Schedule:** R 0300 PM - 0500 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 15

This course examines recent scripted theater by American playwrights. Readings focus on work by historically underrepresented writers, including the wave of award-winning plays by Black writers such as Jackie Sibblies Drury, Michael R. Jackson, Aleshea Harris, Branden Jacobs-Jenkins, Jeremy O. Harris, and others. We will consider the shape of the American theater, its response and resistance to contemporary social and political movements, and the pandemic’s effects on the present and future of American theater.
English 90D

Literature and Disability (216196)

Marc Shell

2021 Spring (4 Credits)  

Schedule: TBD  

Instructor Permissions: Instructor  

Enrollment Cap: 15

How has literature influenced the rhetoric and philosophy of disability? This seminar considers literary and cinematic works that focus on the body (deafness, blindness, and paralysis), the mind (madness and trauma), and language (muteness, stuttering, and dyslexia). Special attention to the disabling and enabling aftermaths of pandemics and to the effects of modern prostheses. Readings include chapters from the King James Bible and works by Brecht, Hitchcock, Keller, Martineau, Milton, Morrison, Shakespeare, Shaw, and Trumbo.

A Divided Kingdom: Nation, Race, and Belonging in Postwar Britain. (216412)

Kelly Rich

2021 Spring (4 Credits)  

Schedule: TBD  

Instructor Permissions: Instructor  

Enrollment Cap: 15

When Aldwyn Roberts, famed Trinidadian calypsonian "Lord Kitchener," landed in England, he commemorated the event by singing "London Is the Place for Me," a song celebrating the beauty and hospitality of his "Mother Country." Roberts was a passenger on the ship Empire Windrush, whose 1948 arrival from the West Indies signaled a new era of migration to the UK from its colonies, many of which would gain independence over the next fifty years. But was Britain the place for them? As many discovered, making a home there was a fraught process, fueled by long-existing structures of racial prejudice that continue and evolve to this day.

This course explores the cultural politics of British identity after 1945: a period whose social and political upheavals both radically redefine and conservatively re-entrench "British" as a category of analysis. From the 1958 Notting Hill race riots to current-day Brexit, national belonging has always been a complex and contested process, one that fuels myriad forms of desire and alienation. During our time together, we will ask: how do artists and theorists engage with problems of inequality, histories of empire and migration, politics of race, sexuality, and class, and practices of community-building? How do they respond to these aspects of modern social life, as well as re-imagine what that sociality might look like? We will approach these questions by focusing on Black and Asian British literatures—including works by authors Buchi Emecheta, Bernadine Evaristo, Jackie Kay, Hanif Kureishi, Andrea Levy, Daljit Nagra, Caryl Phillips, Salman Rushdie, Sam Selvon, Kamila Shamsie, Warsan Shire, and Zadie Smith—as well as selections from the
fields of postcolonial, feminist, and cultural studies.

Elizabeth Bishop and Others (216197)

Vidyan Ravinthiran

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 15

This course introduces students to the poetry, literary prose, and artful correspondence of one of the major poets of the twentieth century, considering her innovations in all these genres. We will look at her writing in multiple genres alongside the mid-century shift from 'closed' to 'open' verse forms, and relate stylistic issues to the intellectual and social changes, and political and historical developments of the period. Bishop's critique of received ideas about nationality, race, power, gender, sexual orientation, and the overlap between culture and nature, is connected with her status as a cosmopolitan poet with links to Canada, the U.S. and Brazil. 'Others' refers both to how her writing comes to terms with the (sociopolitical) reality of other people, and to the comparisons we'll draw between her writing and that of other poets.

Five Shakespeare Plays (146586)

Marc Shell

2020 Fall (4 Credits) Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 15

We'll be reading Hamlet, King Lear, The Merchant of Venice, Henry V, and The Tempest. Special attention to dramatically motivating issues involving familial kinship, racial and linguistic difference, and national and religious conflict. Philosophical and historical issues include Shakespeare's unique use of language, the ambiguous authorship of the plays, gender issues informing stage production, the sense of place in Shakespeare Globe Theatre, and the influence of the Shakespearean canon in the various arts and media.

Course Notes: This course, when taken for letter grade, meets the Department of English Shakespeare requirement. This class will run for two hours.

Lyric Poetry from East to West (216200)

Gordon Teskey

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15

A wide-ranging close reading of poetry and song from four continents: Asia, Africa, Europe, and the Americas. Poetry not in English will be translated but students with competence in Asian and African languages, ancient languages (Greek, Latin, Hebrew), modern European languages--French, Italian, German, Spanish, et al.--are welcome to work in those languages. The course is partly a survey of lyrical poetry and partly an opportunity to work on individual projects.

English 90LS

Literacy Stories (216201)

Deirdre Lynch

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15

This course investigates literacy, literacy instruction, and literacy movements past and present--and in theory and practice. Engaging with recent fiction and memoirs (i.e. "autobiographies") by authors such
as Miriam Toews, Ocean Vuong, and Richard Wagamese, with African-American slave narratives, laboring-class autobiographies, and other texts from the 19th century, and with materials from the history of alphabet books and children's literature, "Literacy Stories" investigates the rich and ambivalent ways in which literature has depicted the literacy needed to consume it. Given under the auspices of both the English Department and Harvard’s Mindich Program for Engaged Scholarship, "Literacy Stories" also involves collaborations with, and volunteer work, for, institutes for life-long learning, public libraries, and book clubs—various community organizations devoted to literacy advocacy and instruction.

Life in quarantine has recently prompted many of us to reflect anew on our reading habits. Separation from their usual schedules and hang-outs is making people more self-conscious about when and where our reading happens. Those of us who miss our usual reading chairs or lamps have been reminded, maybe painfully, of something we generally forget—that reading is a corporeal as well a mental act. Many virtual book clubs have been founded since March 2020 (students in this class might well be getting involved in some of them), and many people have resolved to use the new emptiness of the days to (as they put it) "catch up on their reading." These developments make it a good time to reflect—something we'll do in part by learning from our community partners about the many ways of relating to texts that flourish beyond campus—on the contradictory ways in which we value reading.

To that end, this class will consider, for example, the friction between solitary and social reading—the way that the pleasures of this activity lie sometimes with how it separates us from others and sometimes with how it connects us with others. We will be thinking about literacy's long-standing association with individual self-determination and thinking about how that association is put into question whenever people's reading matter gets weaponized as an instrument of their domination—as it was in 17th-century Massachusetts, for instance, by missionary educators who, aiming to conduct North America's Indigenous populations into knowledge of the Scriptures, also sought thereby to eradicate these nations' own complex systems of record-keeping and knowledge-transmission. Literacy, the literary and theoretical texts on the syllabus will alike remind us, has a politics. Learning to be literate often involves experiences of unequal power relations and exclusion. Reading with (rather than "to" or "at") others is an ethical challenge—one that English concentrators especially ought to explore.

The writing assignments you will do for "Literacy Stories" will join together academic analysis with personal narrative and social reflection. They will likely encompass regular short responses to the assigned texts, journal entries that reflect critically on what you have been learning from your volunteer work beyond Harvard, and interviews with literacy advocates and community organizers. The capstone project for the seminar will be a memoir—your own literacy story—reflecting on your own memories of reading instruction and integrating those memories with your experiences in the community over the course of the semester.

Consciousness from Austen to Woolf (118850)

*James Wood*

2020 Fall (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 15

A look at the complex ways in which writers represent their characters' thought in texts by Austen, Flaubert, James, Tolstoy, Chekhov, Giovanni Verga, and Woolf. More broadly, traces the development of stream-of-consciousness, from Austen's incipient mastery of free indirect style, through Flaubert's more sophisticated use of it, to Woolf's full-blown inner monologues, seeing this development as not merely a
fact of English and American literature, but as a phenomenon of world literature and an element of our modernity.

English  90MR
Race and Religion in Medieval Literature (216396)

Anna Wilson

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15

This course focuses on representations of race, religion, and cross-cultural contact in literature written in western Europe between approximately 800 and 1450 CE, before colonial contact with the Americas. During this period, diplomats, pilgrims, and merchants crisscrossed Europe and Asia, generating fascination with far-away lands and a booming trade in exotic goods; Christian kingdoms of western Europe formed uneasy alliances under the banner of a shared religion to invade Muslim territories and sack Jewish communities in the Crusades; and a global pandemic spread via fleas on ship rats, killing hundreds of thousands and fomenting xenophobic violence. We will read texts from a variety of genres, including religious plays, romances about inter-faith marriage, chansons de geste (poems celebrating deeds in war, often grotesquely violent), and 'armchair travel' guides. We will trace the emergence of modern concepts of race and ethnicity in the way medieval Christian writers represented religious difference in/as bodily difference; develop a critical, historically-situated toolkit for analysing medieval concepts and terms around race, ethnicity, and nation; and analyse the role of the middle ages in current conversations about race in America.

Prison and Performance (216432)

Elizabeth Phillips

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15

This seminar will explore the history and philosophy of prison with particular reference to the role of literature and art in rehabilitation and decarceration. We will study plays, poetry, and performances that depict incarceration, as well as works written and developed by incarcerated or formerly incarcerated individuals. We will discuss the efficacy of prison arts programming and explore themes of justice, racism, and identity as they relate to incarceration across a diverse set of texts from sociology, performance studies, autobiography, and psychology. Authors include Angela Davis, Michelle Alexander, Anna Deavere Smith, Michel Foucault, Suzan-Lori Parks, Samuel Beckett, Rena Fraden, Naomi Wallace, George Jackson,
What makes "Great Criticism?" Analytic clarity? A surfeit of objectivity? Dedication to art and artists? Or is great criticism more like great art, relying on a strong point of view and deep personal investment? This course tests the latter view, by treating works of criticism as dramatic monologues to be analyzed, invested with desire, and performed. We will use techniques of script analysis to pay closer attention to how arguments are constructed, and acting techniques to listen closely for the ways that criticism is always, to quote Nietzsche, "the confession of its originator, and a species of involuntary and unconscious autobiography"

This course will range through the history of English criticism from Philip Sidney to Zadie Smith. Students will also learn basic techniques of script analysis, acting, and public speech, and apply these techniques to works of criticism, culminating in a final recorded performance of an essay-as-monologue.

How has the American judicial system dealt with racial discrimination, racial segregation, racial exclusion, and systemic or institutional racism? Has the design of the American legal system made it easier or harder to remedy cases of racial inequality and injustice? What should we expect from the courts in the future?

We study cases involving Americans of African and of Asian ancestry, beginning with Dred Scott and ending with the Harvard College admissions case. Visitors include Drew Faust, Mae Ngai, Richard Pildes, and William Lee and Felicia Ellsworth, the trial lawyers in the Harvard College case.

The primary readings are legal documents: the Constitution, judicial opinions, and the statutes judges interpret. We'll analyze the opinions in order to understand the legal logic that led to their outcomes. We will see, by doing this, how courts are constrained by the system that was designed by the Constitution's framers and by the traditions of the common law. We will also consider the historical context in which these cases were decided. Two papers and class participation required. Enrollment limited to 15.

English  90SD
Staging Shakespeare (212789)
Derek Miller

Like any other plays, those by William Shakespeare pose serious challenges for actors, directors, designers, and audiences, problems they must solve in performance. Because Shakespeare’s plays have such a long history in the theater, they offer a unique window into ever-evolving performance aesthetics. In staging Shakespeare, artists always attempt to capture what they perceive as Shakespeare's universal achievements and to amplify his work’s resonance for a contemporary audience. This seminar examines a history of Shakespeare in the English-speaking theater to illuminate how Shakespeare helps to shape theater and how the theater helps to make Shakespeare. We will read a number of Shakespeare’s works, but will attend not to literary interpretations of the texts, but rather to (a) the problems those texts create in performance and (b) how artists have solved those challenges over the past four centuries. In other words, we will explore both prior approaches to staging Shakespeare and what in Shakespeare’s plays makes them particularly difficult—and exciting—to stage.

Course Notes: This course, when taken for letter grade, meets the Department of English Shakespeare requirement.

How do fiction and technology's intersections fuel modes of speculation: the imagining of how things in
the world could be? We investigate how different imaginative works question and reinvent our relationships
to technology; inspire reflection and action; and ask what alternatives exist to practices that appear
inevitable or structures that seem entrenched. Fiction allows us to explore how the design and impact of
ubiquitous surveillance, data collection, and artificial intelligence reinforce tacit ideas about power, identity,
ethics, labor, and the nature of reality itself. We read short stories, essays, TV episodes, graphic narratives,
digital media, datasets, and journalism, in addition to perspectives from studies of design, human-
computer interaction, and society and technology. Ursula LeGuin, Ken Liu, N.K. Jemisin, Ted Chiang, Black
Mirror, Octavia Butler, Kelly Link, among others. We aim to gain insight into technical processes and
cultural narratives, developing our own critical models and projects for speculation.

Resisting Toxicity: Rachel Carson, Dolores Huerta, and Environmental Nonfiction (216199)

Sarah Dimick
2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15

Rachel Carson, the author of Silent Spring, and Dolores Huerta, co-founder of the United Farmworkers
Union, both campaigned against toxic exposures in the mid-20th-century United States and yet are rarely
considered in tandem. This course puts the writings and activism of these two women in conversation,
ranging through feminist, queer, and Latinx environmental writing to build connections between environmentalism and labor rights. Our study focuses on the craft of environmental nonfiction writing, examining contemporary practitioners working in the vein of Carson and Huerta. Students will also compose environmental nonfiction, employing the literary techniques analyzed in this course to craft a narrative addressing exposure, toxins, or the state of public health.

In this course, we explore how immigration issues are depicted on film as a way to advance political agendas. We will consider films as textual ways to read political debates surrounding the processing and treatment of immigrants in contemporary America. We'll begin by examining post-9/11 documentary films and the US government’s own cinema products. From there, we'll transition to dramas to examine imaginative representations of real-life concerns. Across the semester, we consider who owns narratives and how particular themes (i.e. detention, border crossings, and racial profiling) are imagined on film, working to become visual scholars who can dissect political and social justice conversations.

English 97
Sophomore Tutorial: Literary Methods (216074)
Derek Miller
2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 18
This course, taught in small groups and required for concentrators, introduces theories, interpretive frameworks, and central questions about literature and literary media. What do we do when we read? What is an author? What do we mean by "literature" itself? How might we compare and evaluate interpretations? How do the historical, social, cultural, and legal frameworks around a text shape its meanings and its effects? Combining major critical and theoretical writings with primary works, the course investigates how literary production and interpretation are informed by philosophical and aesthetic traditions, gender and sexuality, race and ethnicity, national and post-colonial identities, and the material forms in which literature circulates, from parchment books to the internet. Students will also practice fundamental literary research methods through close engagement with Harvard libraries.
Course Notes: English 97 has been offered before, but this is a new version of that course, and should have a new course ID

Whose English? The Diverse History of the English Language (126847)

*Daniel Donoghue*

2020 Fall (4 Credits)  

Schedule: TR 1200 PM - 0115 PM  

Instructor Permissions: None  

Enrollment Cap: n/a  

From its obscure origins, over its long history, and with today’s global reach, the English language has meant many things to the people who use it. It also prompts many questions. Why is pronunciation at odds with spelling? What happened to “thou”? What did Shakespeare sound like? How do we know? Why the love/hate relationship with grammar scolds? What about the future of English as a world language? Knowing the fascinating backstory of the language will give you more confidence as a writer; it also sharpens your skills as a reader as you see things you never noticed before. A final promise: geeking out will equip you to win countless arguments with friends, roommates, and family.

Course Notes: Formerly offered as Culture & Belief 45: History of the English
Language.

The Bible and the Arts (126284)

*Gordon Teskey*

2020 Fall (4 Credits)  

**Schedule:**  

MW 0430 PM - 0545 PM  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a  

An introduction to the Bible, which William Blake called 'the great code of art.' The course gives an overview of the biblical writings, of the religions that arose from them, and the arts they inspired: church music, architecture, painting, and poetry. Attention will be given especially to English poetry, from the Old English Genesis to Spenser, Milton, Hopkins, Eliot, Jones, and popular songs. Even for non-religious authors, the Bible is a rich source of images and spiritual energy. Students may create art projects in response to their chosen parts of the Bible.

**Course Notes:** Formerly offered as AIU 37: Introduction to the Bible in the Humanities and the Arts.

Introduction to Old English: Inside the Early Medieval English Classroom (110604)

*Joseph Shack*  

*Daniel Donoghue*

2020 Fall (4 Credits)  

**Schedule:**  

MW 0900 AM - 1015 AM  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a  

This course serves as an introduction to Old English, the language spoken and written by the inhabitants of early medieval England from the fifth century until around 1100. Although many of its linguistic features are recognizable in Modern English, Old English must be learned as a foreign language. The first half of the course focuses on learning the grammar of Old English. We begin translating short texts in the third week, before progressing to more complex prose and poetry as the semester continues. Our readings will consist of "classroom" texts used for the education of medieval clerics and monks: Æflric's Colloquy, an early dramatic text that facilitated language learning by means of a fictional dialogue; scientific texts explaining the workings of the natural world; wisdom poetry that sought to catalogue how members of society ought to act; riddles that offered playful intellectual exercises their audience. Alongside translation, some time will be devoted to discussion organized around our translations and a few select readings to familiarize students with early medieval England and its social, intellectual, and political contexts.
Course Notes: This course, when completed with an honors grade and in combination with English 103, fulfills the College language requirement and the English Department’s Foreign Literature requirement.

English 103R

Advanced Old English: Riddles (216067)

Daniel Donoghue

2021 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions:  None  Enrollment Cap:  n/a

What deepens your grasp of Old English grammar, improves your translation skills, and ends with a creative project? At times child’s play, at times deadly earnest (think of Oedipus and the Sphinx), enigmatic puzzles have fascinated us for many centuries. They were particularly prolific in the earliest literature in English, including over ninety poetic riddles in the Exeter Book. We will translate a number of such riddles, read many more in translation, and speculate on the philosophical questions they raise about language and meaning. The semester will end with a creative project. Prerequisite: one term of Old English.

Course Notes: Students who complete both English 102 and 103 with honors grades will fulfill the College language requirement and the English Department’s Foreign Literature requirement.

Epic: From Homer to Star Wars (130257)

Leah Whittington

Vidyan Ravinthiran

2021 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions:  None  Enrollment Cap:  n/a

Epic is one of the most enduring and far-reaching forms of artistic expression. From the heroic poems of the ancient Near East to modern films of quest and adventure, epic speaks to the shared values and collective aspirations of cultures, peoples, and communities. Yet though its formal conventions and thematic interests endure, epic changes over time. In this course, you will study the historical and literary evolution of epic as it moves from oral verse into new genres and media, reading texts from ancient Greece and Rome alongside works of poetry, fiction, and cinema from early modern Britain, twentieth-century America, and the modern Global South. We will look at some texts in their entirety and others in extracts, focusing on Homer’s  *Iliad*  and  *Odyssey*, Vergil’s  *Aeneid*, Milton’s  *Paradise Lost*, George Eliot’s *Middlemarch*, Derek Walcott’s  *Omeros*,  *The Mahabharata* (in prose and film versions), and George Lucas’
*Star Wars*, with detailed analysis of Gwendolyn Brooks's American epics on Black life, *Annie Allen* and *In the Mecca*. If issues of identity, belonging, and community have always been explored in epic, what is the place of epic in a pluralist multi-culture? What are our contemporary epics today?

**English 131P**

Milton's Paradise Lost (203023)

*Gordon Teskey*

2021 Spring (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course focuses on Milton's most famous work, *Paradise Lost*, the greatest long poem in English and the only successful classical epic in the modern world. Milton went totally blind in his forties and composed *Paradise Lost* by reciting verses to anyone available to take them down, like the blind prophets and poets of legend. Yet the questions he raised are surprisingly enduring and modern. We will consider how he generates the sublime and how he builds great scenes and characters, especially his most famous one, Satan.

When Novels Were New (111565)

*Deidre Lynch*

2020 Fall (4 Credits)  
**Schedule:** TR 0130 PM - 0245 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

What was it like to read and write a novel at a moment before that term named a stable category and before the genre's conventions were established? How did it feel to be a writer or reader in an era when the novel was (as some authors put it in the middle of the eighteenth century) "a new species" or "a new province" of writing?

This class is devoted to the remarkable record of literary experimentation that forms the history of the early novel. As we study works by Aphra Behn, Mme de Lafayette, Daniel Defoe, Eliza Haywood, Samuel Richardson, Henry Fielding, Frances Burney, and Jane Austen, we'll attend particularly to questions of genre and genre hierarchy, fictionality and realism. To investigate what was novel about novels, we will ponder, for instance, how novels differ from epics or histories or the news in newspapers. That pondering will give us rich new insights into the formal devices that empowered this new kind of fiction as it claimed--unlike its predecessors in the narrative line--to tell the truth: a claim that would eventually, by the time of
Jane Austen, underwrite the novel's emergence as the crucial genre of modern times. At the same time, we will also investigate what this emergence can tell us about modernity itself—about love, sex, and marriage, consumer capitalism, race, and empire. We'll cap our reading by pairing Austen's Pride and Prejudice with an extraordinary novel in letters from 1808 (only recently rediscovered, and anonymously published), The Woman of Colour: A Tale.

### English 160BG

The Bloomsbury Group (205107)

*Marjorie Garber*

2021 Spring (4 Credits)  
Instructor Permissions: None  
Schedule: TBD  
Enrollment Cap: n/a  

The Bloomsbury Group was an extraordinary creative collaboration in the early years of the 20th century. We tend to think of such collaborative work today, in think tanks, Silicon Valley incubators, literary movements and artists' colonies, as a fairly recent phenomenon, but it was in fact powerfully modeled a century ago. "Bloomsbury" included novelists Virginia Woolf and E.M. Forster, both of whom are also literary critics; biographer and essayist Lytton Strachey; economist John Maynard Keynes; socialist and publisher Leonard Woolf; philosophers G.E.Moore and Bertrand Russell; artists Vanessa Bell, Dora Carrington, and Duncan Grant; art critics Clive Bell and Roger Fry; and the English translators of Sigmund Freud, James and Alix Strachey--- each of whom had an enormous effect on the form of the genre, or genres, in which they worked. Not to mention other friends, lovers and rivals: Vita Sackville-West, David Garnett, Aldous Huxley, Katherine Mansfield, just to name a few. This course will look at the interdisciplinary effect of brilliant and talented people from across the spectrum of the arts and social sciences influencing each other's work and participating in its creation and publication. Readings to include the major novels and essays of Virginia Woolf, the biographies and essays of Lytton Strachey, and substantial selections from other theorists, artists, critics and practitioners, together with relevant films, letters, and elements of design and home décor.

### English 160JE

The Joyce Effect (203059)

*Beth Blum*

2021 Spring (4 Credits)  
Instructor Permissions: None  
Schedule: TBD  
Enrollment Cap: n/a  

Speaking of James Joyce's *Ulysses*, T.S. Eliot confessed: "I wish, for my own sake, that I had not read..."
it." How does one write literature after Joyce's revolutionary prose? This course explores different authors' responses to that challenge. You will be introduced to one of the most influential authors of the 20th century through selected readings from Joyce's key works: *Dubliners*, *A Portrait of the Artist as a Young Man*, *Ulysses*, and *Finnegans Wake* (excerpts). After immersing ourselves in Joyce's oeuvre, we will track its afterlife in literature (Virginia Woolf, Zadie Smith), graphic narrative (Chris Ware, Alison Bechdel), and popular culture.

Proust, Joyce, Woolf: Aestheticism and Modernism (212811)

*Philip Fisher*

2020 Fall (4 Credits)  
**Schedule:** MW 1200 PM - 0115 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Topics include: modernism; aesthetic experience; the life of art; the city; and novelistic form; the moment and memory within temporal experiences. Joyce, *Dubliners* and *Ulysses*; Proust, *Swann's Way*; and *Within a Budding Grove*; Woolf, *Mrs. Dalloway* and *To the Lighthouse*; Kawabata, *Snow Country*. Writings of Pater, Simmel, T.S. Eliot, and sections from *The Pillow Book* of Sei Shonagon.

Postwar American and British Fiction (118852)

*James Wood*

2021 Spring (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

In this class, we will examine novels and short stories published since 1945 in Britain and the United States. Though certain themes naturally emerge -- belonging and not belonging; immigration and emigration; estrangement, race and post-colonial politics; liberalism and the importance of "noticing" others; the role of realism and the various postmodern movements in reaction to realism -- the primary emphasis is on learning how to read slowly, and learning how to enjoy, appreciate and properly judge a living, contemporary literature.

**Course Notes:** This course, when taken for a letter grade, meets the Core area requirement for Literature and Arts A.  
**Note:** Formerly English 160w.

American Protest Literature: Paine & Wheatley to the Present (119747)

*John Stauffer*

2020 Fall (4 Credits)  

**Schedule:** MW 0130 PM - 0245 PM  
**Enrollment Cap:** n/a

Examines the rich tradition of "protest literature" in the United States. The focus is on civil rights; gender & women's rights; labor; and environmentalism. We explore how expressions of dissent have functioned as powerful "voices" of individuals and movements, and as aesthetic, political, and performative texts in specific contexts. And we examine how historical forms of dissent have shaped today's protests. Readings range from fiction, photography, and video to speeches, essays, poetry, and music.

**Course Notes:** Formerly offered as Culture & Belief 49: American Protest Literature from Tom Paine to Tupac.

Broadway, 1940–Present (130682)

*Derek Miller*
Cultural education usually occurs piecemeal: a novel from this period, a poem from that. Cultural works are not, however, truly isolated from each other, but rather appear as artifacts of cultural systems. This course uses cultural works to understand a single cultural system: Broadway since 1940. Comparative analyses of musical and non-musical plays will illuminate how Broadway has changed over the past seventy-five years. We will attend to economic, social, technological, and other transformations in how Broadway makes, markets, and measures its shows. Through our explorations of some of those shows, we will grasp the system's effects on major dramaturgical strategies including approaches to plot, characterization, and staging. The course thus simultaneously surveys major works of the commercial American theater, narrates a history of Broadway since 1940, and models how to think about the relationship between that history of the Broadway system and the works it produces.

Modern Women Writers (213541)

*Elizabeth Phillips*

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

What does it mean to be, or feel as, a woman? This course will survey major female authors from the twentieth and twenty-first centuries who ask these questions in their novels, plays, and essays. In our lectures, we will move through literary explorations of womanhood in Modernism, to Expressionism, the Feminist movements, and on to contemporary questions of trauma, reproductive rights, love, activism, sexuality and gender identity, race, sexual exploitation and abuse, camaraderie, unity, and comedy. Authors include Virginia Woolf, Margaret Atwood, Toni Morrison, Audre Lorde, Djuna Barnes, Sally Rooney, Alice Birch, Elena Ferrante, and Chimamanda Ngozi Adichie. Final assignment will be a creative project of your own design based on course themes and materials.

Voices of Environmental Justice (216068)

*Sarah Dimick*

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

This course considers the relationships between systems of human injustice and environmental issues—
including industrial disasters, ocean acidification, and resource extraction. We examine environmental justice writing and artwork with a transnational, interconnected approach. For example, we ask how the Ogoni activist Ken Saro-Wiwa's writing on oil pipelines in the Niger Delta anticipates Native American protests against the Dakota Access Pipeline. We draw connections between a poem documenting silicosis in the lungs of West Virginian coal miners and a novel portraying the aftermath of the Union Carbide gas leak in Bhopal. We compare a nonfiction account of Kenyan women resisting deforestation and an iPhone app reclaiming public access along the Malibu coast. We explore questions of voice, genre, and narrative, cataloguing the strategies writers and artists use to reach a global audience.

**English 191C**

**Constellations (212761)**

_Homi Bhabha_

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: None  Enrollment Cap: n/a

"Constellations" is an attempt at putting key literary works in conversation with significant texts from other disciplines and discourses --- philosophy, politics, history, law, and the social sciences. The conversations initiated between these texts might converge on conceptual or historical issues; on other occasions, they may conflict on matters of aesthetic form or cultural belief. What gives these "coupled" conversations a thematic or curricular coherence is their sustained interest in the life-worlds of minorities as they struggle to gain the recognition and protection of human rights. One of the key questions running through the course will be what it means to make a claim to human dignity from a position of inequality and injustice.

I have chosen landmark texts that describe a wide arc of historical experience from colonization and segregation to migration and the predicament of refugees. These conditions of life and literature will be framed by questions of national sovereignty and international cosmopolitanism. Discourses of race, gender and identity will intersect with conceptual issues of cultural representation and literary form. The conversations initiated by this course will be polyphonic and plural.

Queer/Medieval (207592)
Anna Wilson
2020 Fall (4 Credits) Schedule: W 1245 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 15

The / in this course title can suggest slippage or interchangeability, opposition and polarization, or (in fanfiction tagging conventions) erotic or romantic friction between two entities. This course functions as an introduction to queer theory as an intellectual tool with which to read texts far removed from the modern political, cultural, and social discourses from which queer theory emerged. We will ask: what can queer theory offer readers of medieval literature in its explorations of gender, sexuality, power, narrative, trauma, and time? Each week we will read a single queer theorist alongside a single medieval text to do a deep dive into both. Theorists include Judith Butler, José Esteban Muñoz, Lee Edelman, Eve Sedgwick, and Carolyn Dinshaw. Texts will be from the European Middle Ages (roughly 500-1500) that think through questions of gender and sexuality, including the plays of Hrotsvitha of Gandersheim, the *lais* of Marie de France, the poetry of Baudri of Bourgueil, *Roman de Silence*, *The Book of Margery Kempe*, and Alan of Lille's *Plaint of Nature*. Readings will be in modern translation or in glossed Middle English; some experience with the latter is recommended but not necessary.

Gender, War, Writing, Rhetoric, and Reading: Troilus and Criseyde from Late Medieval to Early Modern (216208)
James Simpson
2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15

The material of this course consists of the following exceptionally rich late medieval and early modern Trojan materials: Chaucer's House of Fame; Chaucer's Troilus and Criseyde; Lydgate's Troy Book (Book 2); Henryson's Testament of Cresseid; and Shakespeare's Troilus and Cressida. We will be guided into these materials by the inter-related topics listed in the course title. Wherever possible and appropriate, we will absorb the publication conditions and media of these texts and/or performances.

English 224SR
Shakespeare and Racial Justice (216478)
Marjorie Garber
One of the most powerful effects of Shakespeare's plays is the uncanny way they both reflect and anticipate the concerns of readers and audiences over time. The plays that address questions of racial justice and injustice seem strikingly pertinent now, just as they have at other key moments from the early modern period to the present.

Working with the play-texts, with literary criticism and theory, and with stage history and material culture, this graduate seminar will examine issues of race, justice, performance and resistance as manifested in Shakespearean drama, both historically and in our own time. Plays to be considered include Titus Andronicus, The Merchant of Venice, Othello, Antony and Cleopatra, and The Tempest. Our concerns will be with language and character and with a range of theoretical perspectives, as well as with thematic issues and facets of race, including color, religion, humoral theory, and the idea of the stranger. Participants will be invited and encouraged to address both the plays and ongoing current events, reading them together—or against one another—as theatre, criticism, and critique.

Course Notes: Graduate seminar with limited enrollment, admission by permission of instructor. Priority given to FAS Ph.D. students in English, American Studies, Comparative Literature, and African American Studies. All other FAS Ph.D. applicants should indicate their familiarity with Shakespeare. If space in the seminar permits, applications will be considered from English department senior concentrators who have already taken at least one semester of Shakespeare at Harvard.

Literature in a State of Siege (216209)

Stephen Greenblatt

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 15

What challenges and opportunities arise for artists and writers working under dire conditions—martial, political, medical, and natural states of emergency? To what extent are such exceptional conditions the rule (as Walter Benjamin proposed)? Co-taught by Stephen Greenblatt (English) and Joseph Leo Koerner (History of Art), this course considers art and literature in states of siege against the backdrop of juridical theories of such states. This class is also offered as HAA 253k.

Metaphysical Poetry: The Seventeenth-Century Lyric and Beyond (211315)
In an age of scientific and political revolution, how do poets respond when common beliefs about God, humans, cosmic and social order, consciousness, and gender have been taken away? Modern poetry starts in the seventeenth century when poets, notably women poets, sought new grounds for poetic expression.

"It Is and Is Not a Novel": Narrative Fiction before the Nineteenth Century (216344)

Deidre Lynch

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 15

When, in 1792, one Charlotte Palmer published a work of fiction entitled *It Is and Is Not a Novel*, her choice of title, both teasing and fence-sitting, suggested a long history of generic fluidity. It also suggested that by the end of the eighteenth century this history was drawing to a close, as if the moment had arrived when it could be viewed through the lens of a certain playful self-consciousness. Our work this semester will be devoted to the record of remarkable narrative experiment preceding this moment of generic consolidation: preceding the moment, which arrived later than we might think, when a disparate range of fictions— including many calling themselves "histories"--could be categorized retroactively as examples of "the" novel and treated as "imaginative literature."

Early modern writing does a remarkable job of testing our twenty-first-century expectations about literary kinds and our twenty-first-century convictions about how those kinds relate respectively to probability, knowledge, evidence, fact, and believability. We find factually-based biographies that draw unabashedly on the conventions of the heroic romance; we find travel narratives that are part allegory, part scientific discourse; and, most interestingly for our purposes, we find fictions that claim to report the truth.

These early fictions' documentary pretenses, their affinities for matters of fact and transcripts of real life, will be one recurrent concern for this seminar. The overlap between the novelist and the juror in a legal trial (both of whom, according to Ian Watt, take a "circumstantial view of life") will be another. Throughout the semester we'll probe Bakhtin's suggestion that the moment of the novel coincides with that moment when Europe is thrust out of its cultural isolation and enters into relations with the entire globe—a suggestion that helps us see why questions about empire, colonial domination, racialization and chattel slavery loom so large in this writing. And one additional question that is likely to inform our discussions goes like this: why are the secret truths of female sexuality (white and black) so often the referent of early realism?

Course Notes: Graduate students who wish to obtain 200-level credit should be auditors in English 141 rather than enrolling in it officially.

</table>
The "new birth of freedom" that Abraham Lincoln hoped to see rise out of the death and destruction of the Civil War manifested itself during the twelve years that followed it. Reconstruction (1865 - 1877) ushered in a "Second Founding" of the nation through the ratification of the 13th, 14th, and 15th amendments to the Constitution, abolishing slavery, establishing birthright citizenship, due process and equal protection of the laws, and the right to vote for black male citizens. As revolutionary as Reconstruction was, it was also short-lived, and the long, violent roll-back against it, curiously known as the "Redemption," witnessed the curtailing of these rights and the rise and institutionalization of Jim Crow segregation in what one newspaper editor coined the "New South." A key aspect of Redemption was a propaganda war designed to debase the image of African Americans, and thereby justify the deprivation of their rights. Resisting it, African Americans, starting in the mid-1890s, employed the concept of a "New Negro" to combat racist images of an "Old Negro" fabricated by apologists for Jim Crow. Thus began what we might call America's first "social media" race war. The trope of a New Negro underwent several revisions between the 1890's and 1920's, when—in the midst of the Great Migration of African Americans from the South to the North—the Harvard-trained philosopher, Alain Locke, revised and appropriated the term to describe a remarkable flowering of art and literature that he named "The New Negro Renaissance." Later commentators would label the period "The Harlem Renaissance." Locke and his contemporaries thought that "armed with culture," as W.E.B. Du Bois wrote much later, they could efficaciously wage the struggle against anti-black racism through what an historian of the period cleverly called "civil rights by copyright." This course traces the history of the metaphor of a "New Negro" from its inception at the dawn of Jim Crow to the end of The New Negro Renaissance in the Great Depression.

A reading course of works important for understanding twentieth-century literary and intellectual history. Some of the works will be drawn from the Generals list, and half will be chosen by the instructor and half by the class. The goals are 1) familiarize ourselves with 20th century works "everyone" is expected to know something about; 2) practice for a very common instructional situation: having to get up a new text and introduce class discussion about it in a week.

Course Notes: Course is open to all graduate students in FAS, and from other schools with permission. No undergraduates.

Modern and Contemporary Poets (130676)

*Stephanie Burt*

2021 Spring (4 Credits)  
Schedule: TBD

Instructor Permissions: Instructor  
Enrollment Cap: 15

Major poets and poems from T.S. Eliot and Marianne Moore almost to the present day: we may also read, among others, William Carlos Williams, Wallace Stevens, Elizabeth Bishop, Robert Lowell, Lorine Niedecker, Gwendolyn Brooks, Bernadette Mayer, J F Herrera, James Merrill, C. D. Wright, and Terrance Hayes. Appropriate both for students who know some of these poets well, and for those relatively new to the study of poems.

Public Humanities Practicum: Humanities in the High School Classroom (214358)

*Elisa New*

2021 Spring (4 Credits)  
Schedule: TBD

Instructor Permissions: Instructor  
Enrollment Cap: 15

This fall, over 500 high juniors and seniors and teachers from Title One high schools across the country (from New York City, LA, San Diego, Flint, Pontiac, Hartford and rural Louisiana and New Mexico) have enrolled in the Poetry in America and Harvard Extension School's national pilot of the online Poetry in America: The City from Whitman to Hip Hop.

The Public Humanities Practicum, co taught by course Poetry in America director Elisa New and National Education Equity Lab director, Leslie Cornfeld, will provide students in FAS, GSE, and HKS the opportunity to embed within, study and evaluate how college level humanities instruction may promote college readiness, intellectual and emotional growth and civic cohesion-- and to weigh the implications of this model for broad educational public policy. Students in the course will be allowed to focus individual final projects in 1) public policy 2) humanities instruction or 3) media and educational design.

Course Notes:  
Jointly offered with Harvard Kennedy School (as SUP-472 Education Equity Through A Solutions-Targeted Lens) and Harvard Graduate School of Education.

English 289M
Who Cares about Modernism?: Literary Studies and the Problem of Periodization (212774)
Beth Blum
2020 Fall (4 Credits) Schedule: R 0945 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 15
This graduate seminar uses modernism as a test case for debates regarding the merits and limits of literary periodization. Though our focus is modernism, we will be engaging with examples of similar debates from other periods, such as challenges to the medieval/ Renaissance divide, calls for "presentist Shakespeare," the manifesto of the Victorian v21 collective, and discussions regarding the utility of labelling contemporary literature as "post-45." We will examine the contingencies and controversies of modernism's fraught self-formation, reading detractors including Wyndham Lewis, Laura Riding, and Edith Wharton, as well as figureheads such as Woolf, Lawrence, and Joyce.
Primary texts are designed to partly overlap with the generals list and may include: Joyce's *Portrait of the Artist as a Young Man*, Woolf's *To the Lighthouse*, Wharton's *The House of Mirth*, and more. Secondary readings to include: Eric Hayot, Rita Felski, Paul Saint-Amour, Fredric Jameson, Kenneth Burke, Susan Stanford Friedman, René Wellek, Gerald Graff, Ted Underwood, David James and Urmila Seshagiri, Wai Chee Dimock.

English 290MH
Migration and the Humanities (205269)
Homi Bhabha
Mariano Siskind
2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15
By focusing on literary narratives, cultural representations, and critical theories, this course explores ways in which issues related to migration create rich and complex interdisciplinary conversations. How do humanistic disciplines address these issues—human rights, cultural translation, global justice, security, citizenship, social discrimination, biopolitics—and what contributions do they make to the "home" disciplines of migration studies such as law, political science, and sociology? How do migration narratives compel us to revise our concepts of culture, polity, neighborliness, and community? We will explore diverse aspects of migration from existential, ethical, and philosophical perspectives while engaging with specific regional and political histories.

Public Humanities Workshop (212794)

Martin Puchner

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: Instructor  Enrollment Cap: 15

Public humanities are becoming increasingly central for careers both inside and outside of academia. This workshop, which is open to beginning and advanced graduate students, introduces participants to the tools they need to address audiences other than specialists in their own field. These tools range from writing op-eds based on dissertation research to writing general interest books, and also include book reviews, podcasts, social media strategies and more. While we will discuss some historical context, the emphasis is on practice and skills. Our work will be supplemented by visits from editors and literary agents. Because the course is a workshop, enrollment is limited to 12.

Humanists of the 21st century are looking at a changed professional landscape. Major shifts in higher education, and in the college and university job market for humanists, predate the COVID-19 pandemic, but the pandemic has brought these shifts into starker relief—even as it has revealed new opportunities for humanists in the fields of digital learning and educational media production, K-12 education, higher education administration, education policy, and more.

Teaching the Humanities with New Media: A Poetry in America Practicum will enable students to experience some of these newer career opportunities by "embedding" as teaching staff (G4+) or Research and Pedagogy Associates (G1-G3) in Poetry in America: The City from Whitman to Hip Hop, a for-credit course being offered to high-school students--most of them from Title I and Title I-eligible schools--across the US and around the world. This fall's practicum will provide students an opportunity to gain exposure to, and to build skills in, the world of online education, broadly defined. Poetry of the City (POTC) is offered in partnership with the National Education Equity Lab and with Arizona State University. The course will be offered under auspices of ASU's online high school, ASU Digital Prep Digital.

Students enrolled in the practicum will have official titled roles within the ASU course that may provide them useful credentials for the future.

Visit poetryinamerica.org to learn more about Poetry in America and its programs.

Course Notes: This practicum is open to G1-G3 students in FAS seeking course credit, and to G4 students and above seeking paid teaching work. GSE students in any of the Master's or PhD programs are welcome to apply, as well as undergraduates planning to pursue teaching careers.

Environmental Sci & Public Pol 11 Section: 1
Sustainable Development (109934)

William Clark
Alicia Harley
Michaela Thompson

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 40

Explores contemporary understandings and practical implications of the idea of sustainable development. Investigates the meanings and measures that different groups have given to "sustainable development;" scientific understanding of the complex social-environmental systems we seek to develop sustainably; and lessons on how societies have avoided the "tragedy of the commons" while instituting practical action that advances sustainable development effectively and equitably. Employs case studies in development to meet needs for energy, food, water and health.

Environmental Politics (112610)

Sheila Jasanoff

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

An introduction to the history, organization, goals, and ideals of environmental protection in America. Examines the shifts in emphasis from nature protection to pollution control to sustainability over the past hundred years and develops critical tools to analyze changing conceptions of nature and the role of science in environmental policy formulation. Of central interest is the relationship between knowledge, uncertainty, and political or legal action. Theoretical approaches are combined with case studies of major episodes and controversies in environmental protection.

Class Notes: First-year students should consult instructor.

Conservation Biology (119814)

Aaron Hartmann

2021 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

The major goal of conservation biology is to preserve and recover genetic, species, and ecosystem diversity through evidence-based assessment, analysis, and management. This course will integrate evolutionary and ecological theory into resource management, economics, sociology, and political science to explore conservation strategies associated with habitat fragmentation and loss, exotic species invasions, over-harvesting and sustainable development, re-wilding, and other relevant topics across the ever-changing wildlife-human landscape relationship. State-of-the-art tools and methodologies will be introduced and showcased with real examples. Weekly classes will involve discussions of emerging conservation issues through the reading of research papers as well as hands-on learning of methodologies of conservation science through analysis of real data. Seminars and discussion forums with guest researchers and field trips with hands-on data collection will also be offered.

The Law and Policy of Climate Change: Influencing Decision Makers (208113)

Aladdine Joroff

2020 Fall (4 Credits)  Schedule:  TBD

Instructor Permissions:  Instructor  Enrollment Cap:  30

Empirical data demonstrate that the climate is changing and that these changes could produce increasingly serious consequences over the course of this century. Governments and private actors around the world are strategizing, debating, lobbying, implementing, and defending mechanisms to both mitigate and adapt to the impacts of climate change. This course will explore (i) the legal framework in which climate change action occurs in the United States, (ii) policy tools available to regulators, (iii) impacts on regulated entities and individuals and (iv) opportunities for private stakeholders to participate in and influence climate change decisions.

Addressing the Global Climate Crisis: Challenges for Both Developed and Developing Economies (123858)

Michael McElroy
Shaojie Song

2020 Fall (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

The seminar will discuss the nature of the climate challenge and the implications it poses for different communities and different parts of the world. Mitigating negative impacts of human induced climate change will require an urgent transition from the current global fossil fuel-based energy economy to one based on renewable alternatives. Possibilities include wind, solar, hydro, biomass and potentially nuclear. The seminar will review options with specific attention to differences in the challenges faced by developed economies such as the US and Europe and large developing economies such as China, India and parts of Africa. Can we chart a feasible path to net zero global carbon emissions by 2050?

The Technology, Economics, and Public Policy of Renewable Energy (127572)

George Baker

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  50

Energy is the lifeblood of economic activity, and there is little prospect of this changing. However, the planet’s stores of easily accessed fossil fuels are limited, and the climatological cost of continuing to rely on fossil fuels is high. This course examines the long run and short run prospects for renewable energy. We start by understanding the technology of various renewables, including hydro, solar, wind, biomass, etc. We then examine the economics of these technologies, and how subsidies and taxes affect their viability. Special attention will be paid to the interaction of technology, economics, and public policy.

Class Notes:  This course will be offered in a seminar format with an enrollment limit of 30.

Recommended Prep:  Economics 10a.

A final paper describing the research/reading completed during the term is due in duplicate to the Head Tutor on the first day of reading period.

Course Notes: Intended for junior and senior concentrators in Environmental Science and Public Policy; open to sophomore concentrators only under exceptional circumstances. Permission of the Head Tutor is required for enrollment. May be counted for concentration only with the special permission of the Head Tutor.

Introduction to Environmental Science and Engineering (116362)  

Elsie Sunderland  
Steven Wofsy  

2021 Spring (4 Credits)  
Schedule: TBD  
Instructor Permissions: None  
Enrollment Cap: n/a  

This course will provide students with an introduction to current topics in environmental science and engineering by providing: an overview of current environmental issues, critically evaluating their underlying science and knowledge limitations, and exploring the best-available engineering solutions to some of our most pressing environmental problems. The course will emphasize the interconnected biological, geological, and chemical cycles of the earth system (biogeochemical cycles) and how human activity affects these natural cycles within each of the major environmental compartments (atmospheric, aquatic, and terrestrial).

Recommended Prep: The course presumes basic knowledge in chemistry, physics, and mathematics at the high school level.

Global Warming Science 101 (214500)  

Eli Tziperman  

2021 Spring (4 Credits)  
Schedule: TBD  
Instructor Permissions: None  
Enrollment Cap: n/a  

An introduction to the science of global warming/ climate change, meant to assist students to process issues that often appear in the news and public debates. Topics include: the greenhouse effect, and consequences of the rise of greenhouse gasses including sea level rise, ocean acidification, heat waves, droughts, glacier melting, hurricanes and more. Throughout, an ability to critically evaluate observations, predictions and risk will be emphasized. The students will be involved in in-class quantitative analysis of climate observations, feedbacks and models via python Jupyter notebooks that will be provided.

Course Notes: ESE 101 is also offered as E-PSCI 101. Students may not take both for credit. For SB students: this course can only count as a science elective in the concentration requirements, and SB students must enroll in E-PSCI 101. AB students may enroll in either E-PSCI 101 or ESE 101 to meet their concentration requirements.
Class Notes: Programming in Python will be employed throughout the course in HW assignments and course workshops. Prior exposure to basic programming would be helpful, and students will be provided with template code to start from and be guided in this work in weekly course workshops. Students are requested to bring their laptops to the first class, and to try to install Anaconda python version 3.7 before class.

Recommended Prep: Basic calculus and ordinary differential equations, as covered for example by Math 1b, Math 19a, Math 21b.

Environ Science & Engineering  109

Earth Resources and the Environment (121463)

John Shaw

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

An overview of the Earth's energy and material resources, including conventional and unconventional hydrocarbons, nuclear fuels, alternative/renewable energy resources, metals, and other industrial materials. The course emphasizes the geologic and environmental factors that dictate the availability of these resources, the methods used to identify and exploit them, and the environmental impacts of these operations. Topics include: coal and acid rain; petroleum exploration, drilling, and production, shale gas/oil, photochemical smog, and oil spills; nuclear power and radioactive hazards; alternative energies (solar, hydroelectric, tidal, geothermal power), metals and mining.

Course Notes: Course includes three hours of laboratory work each week and two field trips. EPS 109 is also offered as ESE 109. Students may not take both for credit. Undergraduate engineering students should enroll in ESE 109. Given in alternate years.

Recommended Prep: EPS 10, ES 6, an equivalent course, or permission of instructor.

Environ Science & Engineering  129

Climate and Atmospheric Physics Laboratory (213669)

Marianna Linz

2020 Fall (4 Credits) Schedule: R 0300 PM - 0545 PM

Instructor Permissions: None Enrollment Cap: n/a
This course will take a hands-on approach to learning climate and atmospheric physics. Topics covered will include global scale atmospheric dynamics, synoptic meteorology and weather forecasting, and climate modeling. Some fundamental fluid dynamics will be covered along the way. Half of the weeks will involve experiments using water and food coloring with lab kits that will be provided to each student, and half of the weeks will involve working with observed and/or modeled climate data or running a climate model. Each week will have three components: one 1.5 hour lab session to perform laboratory experiments, run models, and analyze data over zoom; one peer-to-peer feedback/problem solving session; and one 1.5 hour class session. In this flipped-classroom environment, knowledge transfer will occur outside of class through readings, videos, and lab prep in advance of each lab session. Peer-to-peer sessions will be focused on writing up the labs and providing feedback. Class sessions will include a lab discussion, a wrap-up activity, and an introduction to the next week’s subject.

Course Notes: ESE 129 is also offered as EPS 129. Students may not take both for credit. For SB students: this course can only count as a science elective in the concentration requirements, and SB students must enroll in EPS 129. AB students may enroll in either EPS 129 or ESE 129 to meet their concentration requirements.

Recommended Prep: Physics 12a/15a/16, Math/AM 21a (b recommended) or equivalent or permission of instructor.

**Environ Science & Engineering  132**

Introduction to Meteorology and Climate (156491)

*Brian Farrell*

2020 Fall (4 Credits)  

Schedule: TR 1030 AM - 1145 AM  

Instructor Permissions: None  

Enrollment Cap: n/a

Physical concepts necessary to understand atmospheric structure and motion. Phenomena studied include the formation of clouds and precipitation, solar and terrestrial radiation, dynamical balance of the large-scale wind, and the origin of cyclones. Concepts developed for understanding today’s atmosphere are applied to understanding the record of past climate change and the prospects for climate change in the future.

Course Notes: ESE 132 is also offered as EPS 132. Students may not take both for credit. Undergraduate Engineering Students should enroll in ESE 132. Previously ENG-SCI 132.

Recommended Prep: Mathematics 21 or Applied Mathematics 21a and 21b; Physical Sciences 12; or permission of instructor.

Space Science and Engineering: Theory and Applications (160452)

Robin Wordsworth

2020 Fall (4 Credits)  Schedule:  MW 1030 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  30

This course is an introduction to the challenges involved in designing spacecraft for observation of Earth and exploration of other planets. Topics covered include basic atmospheric and planetary science, key principles of remote sensing, telemetry, orbital transfer theory, propulsion and launch system design, and thermal and power management.

Course Notes:  ESE 160 is also offered as EPS 160. Students may not take both for credit. Undergraduate engineering students should enroll in ESE 160.

Requirements:  Prerequisite: Math 21a and 21b (or equivalents); and Physical Sciences 12a and 12b (or equivalents)

The purpose of this course is to develop understanding and guide student research of human and environmental systems. In class we will explore agriculture, conflict, and transmissible disease. Study of each topic will involve introduction data, mathematical models, and analysis techniques that build toward addressing a major question at each interface: Have agricultural systems been adapted to climate change? Has drought caused conflict? And does the environment influence the spread of COVID-19? These questions are diverse, but are addressed using common analytical frameworks. Analytical approaches include simple mathematical models of feedback systems, crop development, and population disease dynamics; frequentist statistical techniques including linear, multiple linear, and panel regression models; and Bayesian methods including empirical, full, and hierarchical approaches. You will be provided with sufficient data, example code, and context to come to your own informed conclusions regarding each of these questions. Furthermore, topics covered in class will provide a template for undertaking independent research projects in small teams. Research will either extend on topics presented in class or address other human-environmental questions. Historically, such student projects have sometimes led to senior theses or publication in professional journals.

Course Notes: ESE 168 is also offered as E-PSCI 168. Students may not take both for credit. Undergraduate Engineering Students should enroll in ESE 168. Enrollment is by instructor permission.

This course provides a cross-disciplinary overview of environmental science and how research contributes to public policy and human health risk assessment through a case study of a global pollution issue: lead biogeochemistry. The scientific foundations of environmental research methods are discussed (i.e., analytical chemistry, ecology, use of environmental archives, environmental modeling). Experience conducting multidisciplinary environmental research and data analysis will be provided. Course Activities: Lectures, discussions, case studies, field/lab visits.

Recommended Prep: Two semesters of undergraduate chemistry including Physical Sciences 1 or Physical Sciences 11; Mathematics 1a & 1b. Knowledge of basic statistics is also helpful.

Requirements: Prerequisite: Physical Sciences 1 or 11; and Math 1b

Ethnicity, Migration, Rights  121

Native Americans in the 21st Century: Nation Building II (160752)

Eric Henson

2021 Spring (4 Credits)  Schedule:  T 0210 PM - 0400 PM

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

This field-based research course focuses on some of the major issues Native American Indian tribes and nations face as the 21st century begins. It provides in-depth, hands-on exposure to native development issues, including: sovereignty, economic development, constitutional reform, leadership, health and social welfare, land and water rights, culture and language, religious freedom, and education. In particular, the course emphasizes problem definition, client relationships, and designing and completing a research project. The course is devoted primarily to preparation and presentation of a comprehensive research paper based on a field investigation. In addition to interdisciplinary faculty presentations on topics such as field research methods and problem definition, students will make presentations on their work in progress and findings. Recommended course: PED-501M. Jointly offered at Harvard Kennedy School as DEV 502 and Harvard Graduate School of Education as A102.

Ethnicity, Migration, Rights  128

Critical Refugee Studies (216391)

Evan Taparata

2021 Spring (4 Credits)  Schedule:  T 0945 AM - 1145 AM

Instructor Permissions:  Instructor  Enrollment Cap:  15

This seminar offers an introduction to the emerging interdisciplinary field of Critical Refugee Studies. In her field defining 2006 article "Toward a Critical Refugee Study," Yến Lê Espiritu argued that "we need to imbue the term 'refugee' with social and political critiques—that is, to conceptualize 'the refugee' not as an object of investigation, but rather as a paradigm 'whose function [is] to establish and make intelligible a wider set of problems.'" Together, we will explore the problems and opportunities for social and political critique within refugee studies that Espiritu alludes to. We will focus, for example, on the role of nation-states in producing refugees and perpetuating their displacement(s); the concept of "refugee"; the relationship of "refugee" to other migrant categories; identity and cultural production; refugee activism; and narratives of American exceptionalism that hinge on the idea of the United States as a place of refuge. In addition to these themes, we will build on Critical Refugee Studies' engagement with the role of US empire in the (re) production of refugees by utilizing a historical perspective that acknowledges the United States as a settler state. What does it mean, in other words, for a nation that was built on the dispossession of Indigenous peoples to claim to be a place of refuge?
Our discussions will be fueled by interdisciplinary readings that span the humanities and the social sciences. In addition to exploring the major theoretical perspectives and scholarship that informs Critical Refugee Studies, then, this seminar will give us the opportunity to think together toward the future of Critical Refugee Studies as the field continues to develop and as displacement continues in record numbers around the globe.

**Ethnicity, Migration, Rights  131**

**Love's Labors Found: Uncovering Histories of Emotional Labor (207804)**

*Caroline Light*

2021 Spring (4 Credits)  
**Schedule:** R 1200 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

How do love, care, and desire influence the value of work, and why is emotional labor – which is vital to child or elder care, domestic labor, nursing, teaching, and sex work – often considered to be something other than work? How and why do the racial and gender identities of workers affect the economic, social, and emotional value of their labor? How do political and social arrangements of labor help produce and reinforce racial categories while solidifying the boundaries separating masculinity and femininity? Through a mix of primary and secondary sources, this seminar explores histories of emotional labor and the power structures that give meaning to often taken-for-granted categories of work. These sometimes hidden histories are key to untangling the gender, sexual, and racial implications of the "intimate industries" that populate today’s transnational labor economies.

**Course Notes:**

This course, when taken for a letter grade, counts as a portal course for the secondary field in Ethnicity, Migration, Rights (EMR).

Synchronous attendance required. Class meetings will not be recorded.

**Power, Knowledge, Identity: Critical Approaches to Race and Ethnicity (208114)**

*Eleanor Craig*

2021 Spring (4 Credits)  
**Schedule:** MW 0130 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 20

How might critical attention to race and ethnicity as they intersect with gender and sexuality—and also frameworks of indigeneity and class—shape how we study? How do these lenses shift the questions we
ask, the information that counts as data, and the genres of work that we recognize as ‘academic’?

For those newer to studies of race and ethnicity, this course provides intersectional frameworks for recognizing what assumptions undergird academic projects and fields of study. For those familiar with ethnic studies, it aims to serve as a ‘Theories and Methods’ course, providing tools and strategies for refining one’s own interdisciplinary inquiries.

Course Notes: Weekly lectures and a one hour section to be arranged.

Synchronous attendance is expected. The class will not be recorded.

Ethnicity, Migration, Rights 134
Race, Solidarity, and the Carceral State (216400)

Sara Awartani

2021 Spring (4 Credits) Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This specialized seminar course surveys how U.S. social and racial justice movements have encountered and interacted with the rise of the carceral state. Using case studies from African American, Arab American, Latino, and other New Left movements, we will ask: what possibilities of resistance are imagined under conditions of repression? And how have these possibilities of resistance and conditions of repression changed over time?

This course equips students to understand how imprisonment, surveillance, and political repression have shaped social movements, racial formations, and U.S. politics since the late 1960s. The course is divided into five units: (1) COINTELPRO & the Civil Rights Movement; (2) Operation Boulder and Surveillance; (3) Reagan, Terrorism, and the New Right; (4) Prison Abolition; (5) Immigration and Border Security. At the end of the course, students will present original historical research on a topic relevant to the course themes and questions.

Race, Gender, and American Empire (213393)

Hannah Waits

2020 Fall (4 Credits) Schedule: R 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This seminar explores the culture and politics of American imperialism from the late 19th century to the present, with particular attention to race and gender. This writing and discussion-intensive course
encourages students to examine how formal and informal imperial relations developed, and to analyze how American empire functioned on the ground for those who imposed it and those who resisted, appropriated, or accommodated it. The course focuses especially on American relations with Asia and Latin America, and topics include immigration, military occupation, gendered and racialized cultural engagement, international adoption, humanitarianism, and international development. Assigned readings bring together scholarship from American Studies, Women's Studies, Ethnic Studies, Anthropology, and American History.

Asian American Mobility and Transpacific Movements (213404)

Courtney Sato

2020 Fall (4 Credits) Schedule: T 0300 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This seminar draws together Asian American history (ca. 1800-present) and the emerging interdisciplinary field of mobility studies. This course will explore the formation of "Asia America" through Asian American networks and transpacific communities with particular attention to the perspectives and agency of Asian/Americans. Together we will think through and critically interrogate histories and cultures of movements in various forms (lecture and world fair circuits, gendered labor flows, cultures of travel, the figure of the sojourner, international student exchanges, and transportation infrastructure like steamship and railroad lines). Throughout, we will employ transnational and diasporic analyses to examine central themes in Asian American and transpacific studies including: immigration, labor, cultural representations, militarism, gender and sexuality, settler colonialism, and political movements and ideologies.

Coloniality, Race and Catastrophe (213559)

Mayra Rivera

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 12

This course explores the relationship between coloniality, race and ecology through the lens of "catastrophe." We will examine a variety of theoretical and literary sources that deploy or refute tropes of the "end of the world." We will study different uses of "catastrophe" to denounce the destruction of a particular world, re-imagine the past, or proclaim the impossibilities of the present. Through the readings and discussions, we will analyze the aims, effectiveness and limitations of talk of catastrophe in the contemporary context. Jointly offered as HDS 2432.
Ethnicity, Migration, Rights 140

Contemporary Immigration Policy and Educational Practice (214346)

Roberto Gonzales

2020 Fall (4 Credits)  
Schedule: T 1200 PM - 0200 PM  
Instructor Permissions: None  
Enrollment Cap: n/a

Today's immigration debates have brought to the fore conflicting visions regarding the place of immigrants in our society and educational systems. This course will examine legal and undocumented immigration from both community level and policy frames of understanding and interrogation. Students will start with the broad question of what Americans should do with the current immigration system—excluding the estimated 11.1 million people presently living in the United States in unauthorized residency status—and then take a deeper look at the ways in which U.S. laws and school experiences shape the everyday lives of immigrant children, adolescents, and young adults. Finally, students will explore the challenges educators face in working within the intersection of immigration policy and people's lives, and how this work shapes various possible roles as teachers, leaders, school policy-makers, advocates, and allies.

The primary objective of this course is to assist students in building a fundamental understanding of various issues relevant to immigration policy and educational practice. It is designed to achieve the following objectives: 1. To provide students with an understanding of the public policy context of immigration and how that context shapes immigrants' daily realities and our work with immigrant communities, families, and individuals; 2. To present students with important controversies and trends in contemporary immigration and education policy and help them to develop a critical perspective with respect to such controversies and trends; 3. To help students understand the important implications of immigration policies for the education and schooling of immigrant youth; 4. To provide students the tools to critically examine their professional work and evaluate its outcomes in ways that are self-reflective; 5. To broaden students' viewpoints so they can advocate for the policies and practices that meet the needs of immigrant students and their families.

Ethnicity, Migration, Rights 142

Introduction to Latinx Studies (216672)

Marcelo Garzo Montalvo

2021 Spring (4 Credits)  
Schedule: TR 0300 PM - 0415 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 36
Ethnicity, Migration, Rights 143

Introduction to Ethnic Studies (216463)

*Marcelo Garzo Montalvo*

2020 Fall (4 Credits)  
**Schedule:**  
MW 0130 PM - 0245 PM  
**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
36

Ethnic Studies remains the first and only academic field of study within the Westernized academy that has been created and sustained through student struggle. Ethnic Studies’ earliest foundations were articulated by the 1969 Third World Liberation Front (TWLF), who initiated strikes at San Francisco State University and UC Berkeley, winning the first Third World College and Department of Ethnic Studies. The TWLF - a multi-racial coalition of Black, Indigenous, Chicana/Latina, and Asian American student organizations - envisioned a “relevant education” that was rooted in intercommunal solidarity, self-determination and community-engaged scholarship. 50 years later, with hundreds of related programs taking root in schools and universities around the world, we will explore how Ethnic Studies can continue to serve as a matrix for higher education and as a bridge between the academy, K-12 schools, grassroots social movements, and frontline communities.

This course will introduce students to key terms and concepts in critical and comparative Ethnic Studies. We will engage questions of race, ethnicity, gender, sexuality, class, ability, and other systems of power through transdisciplinary and intersectional theories and analyses.

Ethnicity, Migration, Rights 144

Decolonial Aesthetics and Poetics (216464)

*Marcelo Garzo Montalvo*

2020 Fall (4 Credits)  
**Schedule:**  
MW 0430 PM - 0545 PM  
**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
15

In this seminar course we will trace the contours of decolonial theory and practice through the literary, visual and performing arts. We will read cultural and theoretical texts from Black, Indigenous, Latinx and people of color artists, scholars and social movements. Weaving Ethnic Studies theory and expressive arts practice, we will study the works of Audre Lorde, Gloria Anzaldúa, Frantz Fanon, Residente, Leslie Marmon Silko, Nezahualcóyotl, Ana Tijoux, Jimi Hendrix, Café Tacuba, Fred Ho, Kendrick Lamar, Guillermo Gómez-Peña and others. These hemispheric and inter-cultural cross-pollinations will help us bridge creative approaches to knowledge production, social movement activism and critical pedagogy. Students will learn Ethnic Studies methods in close reading and critical analysis of historical and contemporary cultural production through oral presentations, essay writing and creative projects. Following what decolonial
thinker Walter Mignolo has termed "shifting the geo- and body politics of knowledge and power", we will "de-link" aesthetics and poetics from their conventional Eurocentric lineages as we study the past, present and future of decolonial expressive arts and culture.

Expository Writing

Introduction to Expository Writing (118262)

Vernon Davies

2020 Fall (4 Credits)

Schedule: TR 0600 PM - 0715 PM

In Expos Studio 10, students practice analyzing sources, developing and organizing their ideas, and making arguments as they become familiar with the expectations of college writing. In small classes taking a hands-on approach, students work closely with instructors to learn strategies for drafting and revising clear, engaging essays. Students meet frequently in individual conferences with instructors to discuss their work, and the class also emphasizes collaborative work among students. In a small community of writers, students participate in workshops to discuss each other's work, thereby becoming more skillful at reading and revising their own writing. Assignments are based on sources from a range of disciplines and genres, and build in complexity so that students can master essential skills at each step. Expos Studio 10 focuses on academic essays as well as the personal statement required for fellowship or internship applications. Following Expos Studio 10, students take either Expos Studio 20 or an Expos 20 course to meet the writing requirement. All students meet with an Expos faculty member to discuss their course placement before enrolling.

Topic: Expos Studio 10: Introduction

Course Notes: After taking Expos Studio 10, a student must pass Expository Writing 20 or Expos Studio 20 to meet the College’s Expository Writing requirement.

Class Notes: In Expos Studio 10, students practice analyzing sources, developing and organizing their ideas, and making arguments as they become familiar with the expectations of college writing. Students meet frequently in individual conferences with instructors to discuss their work, and the class also emphasizes collaborative work among students. In a small community of writers, students participate in workshops to discuss each other's work, thereby becoming more skillful at reading and revising their own writing. Assignments are based on sources from a range of disciplines and genres, and build in complexity so that students can master essential skills at each step. Expos Studio 10 focuses on academic essays as well as the personal statement required for fellowship or internship applications. Following Expos Studio 10, students take either Expos Studio 20 or an Expos 20 course to meet the writing requirement. All students meet with an Expos faculty member to discuss their course placement before enrolling.

In **Expos Studio 10**, students practice analyzing sources, developing and organizing their ideas, and making arguments as they become familiar with the expectations of college writing. In small classes taking a hands-on approach, students work closely with instructors to learn strategies for drafting and revising clear, engaging essays. Students meet frequently in individual conferences with instructors to discuss their work, and the class also emphasizes collaborative work among students. An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Wizards and Wild Things

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Once upon a time, there was no Harry Potter. Once upon a time, there was no such thing as children's literature. When and if children learned to read, they read what grown-ups read. How then did writing for children as we now know it come of age? Why does the genre have such an enduring hold on our cultural imagination, even as it continues to provoke sharp debate over its greater purpose and value? Are classic children's books like The Wonderful Wizard of Oz, The Wind in the Willows, and The Cat in the Hat instructive or subversive, didactic or liberating? In this course we'll examine selections from three centuries of popular prose and verse written expressly for and about children as we investigate how this eclectic canon reflects evolving ideas about childhood, changing views about educating and enchanting young readers, and persistent disputes over what and how children should learn from books. In Unit 1 we'll survey landmark works in English for children from the Puritan through the Victorian eras, including The New England Primer, Grimms' Tales, and Alice in Wonderland, as we consider what these texts tell us about the origin and evolution of the genre. In Unit 2 we'll examine works by touchstone authors for younger readers including Mark Twain, Louisa May Alcott, Rudyard Kipling, E. B. White, C. S. Lewis, Ursula Le Guin, Roald Dahl, Maurice Sendak, and others, drawing on the critical perspectives of thinkers such as John Locke, Bruno Bettelheim, Alison Lurie, Jacqueline Rose, and Marina Warner to assess arguments about the essential function of imaginative literature from infancy through adolescence. In the final unit, students will conduct their own research to place a major children's author of their choice in a relevant cultural and historical context.

Expository Writing 20 Section: 002

Expository Writing 20 (116353)

Collier Brown

2020 Fall (4 Credits) Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: Department Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Wastelands

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

The impenetrable wilderness of The Revenant, the diseased streets of Children of Men, the trash heap cities of Wall-E—these are the wastelands that fascinate our pop culture. On the screen, they come to life as horrifying alternate universes and dead civilizations—the very fates we must avoid at all costs. And yet wastelands are not exclusively the stuff of science fiction. In this course, we will grapple with both imaginary and actual wastelands. We will begin with short stories by Jack London, Thomas King, and Octavia Butler. From the icy wilds of the Yukon to the borderlands of Native American exile, these writers question the way wastelands have been imagined, especially in North America, over the past century. Next, we will turn to real wastelands—to the garbage dumps and arid landscapes where nothing grows. We will ask what these places reveal about their inhabitants, their struggles, and their achievements. Finally, students will research a wasteland of their own choosing—anything from the mega slums of Mumbai to the sprawl of Boston's unused rooftops. Along the way, we will investigate how wastelands form and evolve, and how people adapt to them. Are wastelands actually the places we should avoid at all costs, or are they the places we can no longer afford to ignore?

**Topic:** Remembering the Civil War

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** The "Engaged Scholarship" components of this course include multiple mandatory activities outside of regular class hours.*

Over the summer, cities across America erupted in protest. As the weeks dragged on, civil unrest that began with the murder of George Floyd shifted focus. Protesters across the US, and then across the globe, began to tear down statues. And not just any statues – memorials to Civil War generals. Since the violent protests in Charlottesville four years ago to the banning of Confederate flags at NASCAR, the Civil War is at the center of American conversations. How did we get here? How is it that in 2020 symbols and flags of a war a century-and-a-half old still dominate our political landscape? One hundred-and-fifty-five years after Lee and Grant shook hands at Appomattox Court House, it was clearer than ever that the Civil War is not part of our past – it is at the very core of our present.

Together, we will examine the fine line between history and memory, and explore the history of memory. We will explore where the mythologies around the War came from, and try to understand how they affect our current understandings of politics and identity. This course will teach you to read the arguments all around you, whether they're being made by traditional sources like books and articles, or by buildings, statues, and movies. We will begin by decoding the arguments made by Memorial Hall, at the heart of Harvard's community. We'll then dive into the single biggest source of Civil War memory: Gone with the Wind. Finally, you will choose an area of your own interest to dig into for a research paper. Throughout, we'll focus on evaluating arguments and making our own, finishing up with the creation of a well-researched, accessible op-ed and media presentation.

Expository Writing 20 Section: 006

Expository Writing 20 (116353)

Matthew Cole

2020 Fall (4 Credits)  Schedule:  TR 1200 PM - 0115 PM

Instructor Permissions:  Department  Enrollment Cap:  14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:  Democracy in Action

Course Notes:  Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:  Note: The Engaged Scholarship components of the course may require participation in some activities outside of normal class hours.

It's a cliché for pundits and politicians to declare that each election is the most important in our lifetimes, maybe all of American history – at least, that is, until the next one. Even so, it's easier than usual to make the argument that the 2020 Election finds American democracy at a crossroads. President Trump's bid for re-election was bound to be contentious, given the shocking upset that brought him to the White House in 2016 and the divisive character of his policies and rhetoric. Less expected was that the 2020 Election would be held amidst a deadly pandemic that has ground normal life to a halt and raised uncertainty about how to conduct the vote safely and fairly. Or that the preceding summer would see a national reckoning with
systemic racism and police brutality. Consider that all of this occurs within a political climate of intense polarization, refracted in a media environment which frequently distorts reality to fit partisan narratives, and it is clear that the 2020 Election will test America's democracy like none before. And yet, for all that makes this election unique, we have arrived at this critical juncture as a result of forces that are deeply rooted in our nation's history, from the bitter residue of the 2016 Election, to the unfinished work of the Civil Rights Movement, to paradoxes of democratic citizenship that date back to the nation's founding.

In this course, we'll draw on works by political scientists, historians, journalists, and activists to better understand the stakes of the 2020 Election and the wider issues it raises about participation, representation, citizenship, and equality. The first unit of the course focuses on voting as a right and as a responsibility. Our readings will address barriers to the ideal of full and equal participation - such as low voter turnout, voter suppression, gerrymandering, and the Electoral College - and assess potential solutions, from the seemingly common-sense to the deeply controversial. The second unit then asks that we zoom out from the polls and take a broader view of the systemic challenges facing American democracy. As a class, we'll engage with cutting edge research on topics like polarization, authoritarianism, inequality, and the influence of money in politics. These readings will lay the groundwork for students to conduct original research and analysis on American politics in 2020 and beyond. Along the way, we'll be cataloguing our predictions and reactions as the electoral drama unfolds, curating our own archive of news items, and reflecting on our part in the process from the unique vantage point of the University, where many students will be casting their ballots for the first time. This work will provide the materials for our third unit capstone, where students will contribute to a collaborative project that blends public writing with visual media and compose a personal reflection discussing their experience of this historic moment.

Expository Writing  20  Section: 008

Expository Writing 20 (116353)

Margaret Doherty

2020 Fall (4 Credits)  Schedule:  MW 1030 AM - 1145 AM

Instructor Permissions:  Department  Enrollment Cap:  15

An intensive seminar that aims to improve each student’s ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](https://www.expos.harvard.edu). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Modern Love

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.
"Reader, I married him." As this famous line from Charlotte Brontë's *Jane Eyre* reminds us, writers have long been preoccupied with matters of the heart. Love stories are everywhere, from the novels of Jane Austen to the "rom-coms" of the 1980s and 1990s to essays in the "Styles" section of the *New York Times*. For centuries, marriage was primarily an economic relationship, and love outside of marriage ended in humiliation or even death. But what happens when society expands the options for living and loving? What happens to love stories when divorce has been normalized, taboos have been trampled, and the definition of marriage is ever-expanding? When couples are as likely to meet through Tinder as they are through mutual friends? In this course, we'll explore what love stories can tell us about changing concepts of gender, sexuality, family, and freedom. We'll start with short stories by Kathleen Collins—a playwright and filmmaker working in the aftermath of the civil rights movement and Black Power movement—and Lydia Davis, an acclaimed contemporary writer of epigrammatic short stories. In our second unit, we'll look at a couple of love stories through the lens of feminist and queer theories. Our texts for this unit will include an essay by the black feminist poet and theorist Audre Lorde, the Academy-Award-winning film *Brokeback Mountain*, and the viral *New Yorker* short story "Cat Person." Finally, in our third unit, students will pick a modern love story of their choosing—a novel, a memoir, a film—and, drawing on the work of critics and scholars, make an argument about what this story shows us about our society's romantic and sexual mores.

**Expository Writing 20** Section: 009

*Janling Fu*

2020 Fall (4 Credits) Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Department Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.
Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

"Food . . . is not art . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William Deresiewicz, in an opinion piece for the New York Times, dismisses our society’s rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories of cod, salt, and sugar, to the glut of cooking shows, many featuring contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresiewicz right to say that food won't give us insight into ourselves? Is it not possible that by examining what scholars and commentators call “foodways”—the various forces involved in how different cultures produce, buy, sell, and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, “food is good to think,” as we contemplate various foodways from a number of illuminating perspectives. In our first unit we delve into what makes food “disgusting” or “natural.” How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful cooking shows produced in different countries, for instance, Top Chef, Iron Chef, and The Great British Bake Off. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? How has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

Expository Writing 20 (116353)

Alexandra Gold
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Telling Her Story: Narrative,

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** In a powerful essay, the late writer and activist Audre Lorde suggested, "Where the words of women are crying to be heard we must each of us recognize our responsibility to seek those words out, to read them and share them and examine them in their pertinence to our lives." Lorde is not alone in asking us to pay attention to and take responsibility for women's stories; for centuries scholars and activists alike have championed the words of women, including women of color and queer women, whose stories have routinely gone untold or unheard. Yet if this issue has always been pressing, the call to heed women's stories seems especially urgent at a moment when such stories have come to dominate the cultural landscape and public consciousness – from news accounts to popular shows, literature to social media. This course responds to this moment by examining how women's stories are narrated across a variety of media and exploring what impact the sharing of them can have. Our first unit will focus on short stories by contemporary women authors Roxane Gay, Carmen Maria Machado, and Jenny Zhang that raise questions about the body, family, love, and society. Our second unit then turns to television, studying Hulu's 2017 adaptation of Margaret Atwood's dystopian novel *The Handmaid's Tale*. Informed by readings in critical feminist theory, we'll consider how the show probes the troubling connections between gender, authority, power, and image. Finally, our third unit engages visual and performance art alongside movements like #MeToo and #SayHerName, offering students an opportunity to pursue independent research projects that explore the relations between art, activism, and social media.

Expository Writing 20 Section: 012

Expository Writing 20 (116353)

Martin Greenup

2020 Fall (4 Credits)
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Humans, Nature, and the Enviro

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial society. They may be doing what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: “to imagine that which we know.” How, then, have creative minds imagined – in essays, books, and movies – the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret “Walking” (1862), the naturalist Henry David Thoreau’s seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists – Rachel Carson’s *Silent Spring* (1962), and James Lovelock’s *The Revenge of Gaia* (2006). Through shocking critiques that draw upon the power of the imagination, both writers, in different ways, have tried to inform the public of the harm being done to nature in the hope that this harm can be averted. And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals – Werner Herzog’s *Grizzly Man* (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite’s *Blackfish* (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

All sections emphasize revision.

**Topic:** Class and Culture

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** It is commonplace to note that in the United States many people identify as "middle class" even though our society is marked by deep, persistent, and increasing class inequality. Such self-identification, however, can obscure the complex and often contradictory ways in which we experience social class in our everyday lives. This course explores the cultural dimensions of social class in the U.S. from an ethnographic perspective, focusing on the everyday lives and cultures of ordinary Americans. We will consider questions such as the following. What is it like to be a working class person in a society heavily invested in ideas of individual advancement and meritocracy? How do professionals (the "upper-middle" class) define themselves and how do they view those above and below them in the class structure? What role does elite education play in the creation and reproduction of class inequality? How does social class shape people's values, political views, and tastes? In our first unit we will compare two important ethnographic studies of working class Americans — Michèle Lamont's classic *The Dignity of Working Men* and Jennifer Silva's more recent *Coming Up Short* — in order to gain some understanding of how working class people have responded to the relative decline in their living standards over the past 20 years. In the second unit we will read selections from Armstrong and Hamilton's *Paying for the Party* in order to analyze the role of higher education in shaping the class trajectories of students from working-, middle-, and upper-class backgrounds. For the third unit students will devise their own research project concerning the roles and self-conceptions of elites. For inspiration, we'll read selections of Shamus Khan's *Privilege*, which examines life at an elite New England boarding school, and Karen Ho's *Liquidated*, which analyzes the ideologies and identities of Wall Street financiers.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Society and the Witch

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated through the witch’s very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists’ depictions of witchcraft among people who come to find magic believable: how do we understand others' beliefs in the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars’ answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we closely analyze the film Harry Potter and the Chamber of Secrets and the television sitcom Bewitched, bringing these pop-cultural phenomena into conversation with Mary Douglas’s treatise on Purity and Danger, Pierre Bourdieu’s critique of Masculine Domination, and Umberto Eco’s ruminations on interpreting serials. Using these theories, we examine the aesthetic and cultural significance of imaginative representations of witches. For the research paper, each student chooses their own example of witchcraft on which to conduct independent research. Sample topics include postmodern fairy tales like Frozen and Maleficent, Broadway musicals like Into the Woods and Wicked, historical witch-hunts and contemporary occult practices. What unites our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

Expository Writing 20 Section: 017

Expository Writing 20 (116353)

Rachel Meyer

2020 Fall (4 Credits)  Schedule:  TR 1200 PM - 0115 PM

Instructor Permissions:  Department  Enrollment Cap:  15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:  Work: Culture, Power, and Cont

Course Notes:  Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:  This course explores the structure and experience of work in the contemporary political economy with an eye toward both its liberating and oppressive potential. We will take up enduring sociological questions with respect to power, control, autonomy, surveillance and self-determination on the job. How do different forms of work affect our life circumstances, personalities, and connections to each other? In the first unit we will examine corporate culture and how it affects the experience of professional work. Does a strong corporate culture enhance professional autonomy or management's power? Does it facilitate or undermine community? In unit two we explore the crucial issue of workers' control over their own labor and the concept of alienation. We examine accounts of deskilling, the separation of mental and manual labor, and the consequences of these processes for workers' experience on the job. To what extent does alienation occur in offices versus factories versus service counters? For the final unit we will critically engage in a debate about the development of "flexible" labor and the ways in which workers' connections to employers, occupations, and locations have become more fluid and transitory. We will explore what flexibility means in a variety of contexts and ask: does flexibility lead to liberation or loss of identity? Does it bring self-fulfillment or insecurity? What does flexibility mean for tech workers in Silicon Valley and bankers on Wall Street? Our texts consist of case studies and ethnographic accounts representing a variety of workplaces along with readings from prominent social theorists who in different ways seek to elucidate the conditions of work under modern capitalism.
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** The Femme Fatale

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**
The femme fatale—the attractive, seductive woman who brings about the downfall of men—has fascinated us through the ages, from Biblical figures like Eve and Delilah, to historical women such as Cleopatra and Wallis Simpson, to the media personas of modern pop stars like Cardi B and Miley Cyrus. In the classic femme fatale narrative, the woman's dangerous actions empower her, but she also must submit to the fact that her empowerment renders her a villain. Might this contradiction in the femme fatale character reflect tensions in our own evolving understanding of gender? How can the femme fatale character help us untangle the real-world gender problems that modern women and men face?

This course will begin to explore these and other related questions by studying accounts of femme fatales in literature and film. In our first unit, we'll explore 1920s and 1930s pulp fiction as a source of the modern fatale archetype, with special focus on James M. Cain's noir novella *Double Indemnity*. In our second unit, we'll move forward to the post-feminist movement 1990s and examine two films featuring teenage femme fatales, comparing Gil Junger's *Ten Things I Hate About You* to Alexander Payne's *Election*, both released in 1999.

Finally, in our third unit, students will research a modern-day femme fatale, either real or fictional, and argue why the modern version is recognizable as a femme fatale, but also represents some evolution of, or twist on, the classic archetype. Here students will be challenged not only to apply broad theories and ideas from the course, but also to reach a greater understanding of why some modern women seem so dangerous.

Expository Writing 20 (116353)
An intensive seminar that aims to improve each student’s ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: "Noncombatants": The Home Front

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: While it is perceived today as one of the greatest aberrations in human society, warfare has also been one of the most common experiences in human history. Yet popular conceptions of the history of warfare are often limited to the myth of completely separated soldiers and civilians. This has not, historically, been so: there is a reason that we call the “home front” a front. We begin by looking at the idea of “total war” within the context of several modern case studies. We will question and examine the roles of women and children, as agents and as targets, in these conflicts. We then move to thinking about the memory and meaning of war through the art and memoirs of the great German printmaker and sculptor Käthe Kollwitz and the intellectual polymath (and French Resistance member) Marguerite Duras. What do the histories and stories that we tell about war, about resistance and about patriotism, particularly stories told by those not in uniform, add to the national and cultural understanding of a conflict? In the final unit, students will choose their own historical research subject from a variety of options. They might investigate conflicts and wars ranging from the recent (the "forever wars" of Iraq and Afghanistan) to the nineteenth century (the U.S. Civil War); from the modern and industrial (the Second World War) to the guerrilla, civil, and anti-imperial (the Spanish Civil War and the Algerian War of Independence). Further research options include different types of participants in conflict (from forcibly recruited child soldiers to anti-war activism) and different ways to pressure an enemy (food policy and blockade). Students will analyze the conflict in their chosen subject through the lens of the unexpected agent in modern warfare: the woman and/or the child. Throughout the course, we will ask what it means to be a "soldier" or a "civilian" in modern conflict, pondering the nature of the distinction.

Topic:  Genetics and Bioethics
Course Notes:  Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:  When researchers at the National Institutes of Health announced in June 2000 that they had successfully sequenced the human genome, President Bill Clinton asserted that "with this profound new knowledge, mankind is on the verge of gaining immense, new power to heal." Since 2000, scientists have developed DNA-risk tests, stem-cell therapies, and precise gene-editing techniques. Yet, despite the potential benefits of these breakthroughs, some have expressed concerns about the bioethical consequences of these new technologies. Critics have voiced fears that scientists are "playing God" and have expressed apprehensions that those who can afford new gene-editing technologies may produce "designer babies" while those who cannot will continue to suffer from heritable diseases. In this course, we will explore how to balance the medical advantages of genetic technologies with their potential disadvantages. For the first essay, we will analyze "The Case Against Perfection" by Harvard political philosopher Michael Sandel, who emphasizes the dangers of genetic enhancements. For the second essay, we will explore claims that new genetic techniques could create a contemporary eugenics movement. For the third and final essay, students will examine both the positive and negative consequences of a genetic technology of their choice and decide how to establish bioethical guidelines to direct its use. Possible topics could include human germline editing, pharmacogenomics, stem-cell therapy, cosmetic enhancements, cloning, or CRISPR-CaS, a new gene-editing technique. The course will culminate with a capstone project, and students will prepare a short talk about the social and biomedical ramifications of a selected genetic technology.

Expository Writing 20 Section: 023

Emilie Raymer

2020 Fall (4 Credits)  Schedule:  TR 0300 PM - 0415 PM

Instructor Permissions:  Department  Enrollment Cap:  14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Genetics and Bioethics

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: When researchers at the National Institutes of Health announced in June 2000 that they had successfully sequenced the human genome, President Bill Clinton asserted that "with this profound new knowledge, mankind is on the verge of gaining immense, new power to heal." Since 2000, scientists have developed DNA-risk tests, stem-cell therapies, and precise gene-editing techniques. Yet, despite the potential benefits of these breakthroughs, some have expressed concerns about the bioethical consequences of these new technologies. Critics have voiced fears that scientists are "playing God" and have expressed apprehensions that those who can afford new gene-editing technologies may produce "designer babies" while those who cannot will continue to suffer from heritable diseases. In this course, we will explore how to balance the medical advantages of genetic technologies with their potential disadvantages. For the first essay, we will analyze "The Case Against Perfection" by Harvard political philosopher Michael Sandel, who emphasizes the dangers of genetic enhancements. For the second essay, we will explore claims that new genetic techniques could create a contemporary eugenics movement. For the third and final essay, students will examine both the positive and negative consequences of a genetic technology of their choice and decide how to establish bioethical guidelines to direct its use. Possible topics could include human germline editing, pharmacogenomics, stem-cell therapy, cosmetic enhancements, cloning, or CRISPR-CaS, a new gene-editing technique. The course will culminate with a capstone project, and students will prepare a short talk about the social and biomedical ramifications of a selected genetic technology.

Topic: God and Government

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "God is Back!" proclaims the title of a 2009 book by the editor-in-chief of The Economist. "Democracy is giving the world's peoples their voice," asserts a feature in Foreign Policy magazine, "and they want to talk about God." Although many have assumed that modernization would diminish the cultural and political salience of religion, the contemporary world provides little evidence to sustain that belief. Religious difference has been central to some of the most violent conflicts of the past thirty years (the Balkan Wars, the "Troubles" in Northern Ireland, Israeli-Palestinian border clashes, ethnic cleansing in Burma, the rise of ISIS), even as it is also central to many figures of political resistance (e.g., the Dalai Lama) and a wide range of reformist and humanitarian efforts worldwide. Meanwhile, even in the supposedly more secular West, religion remains a volatile flashpoint on a range of political issues, from immigration and assimilation (the Trump administration's "Muslim ban") to free speech and self-expression (the Charlie Hebdo affair in France) to the politics of gender and sexuality (the perennial fights over abortion and LGBT rights). Without a doubt, religious actors remain a potent and visible presence in the political workings of the contemporary world. To get a handle on this complex topic, this course is organized around a set of carefully selected case studies that showcase some of the most significant philosophical, legal, and sociopolitical challenges posed by the problem of state governance of religion.

To write about religion requires care and compassion, an attentiveness to analytical precision and evenhandedness. Students in the class can expect not only to think carefully about some of the trickiest and most tendentious political issues of the modern era, but also how to write effectively and persuasively about them. Learning to write about religion, then, is a great preparation for learning to write persuasively about any complex or controversial issue.

Expository Writing 20 Section: 026

Expository Writing 20 (116353)

Hannah Rosefield

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: American Money

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Money is famously difficult to talk about: too awkward, too divisive, too complicated, too abstract, too personal. In this course, we look at how contemporary American writers, philosophers and filmmakers have chosen to talk about money, and how these conversations involve questions of class, justice, work, race and gender. In the first unit of the course, students will watch the 2015 film The Big Short and read sociological writing about the culture of Wall Street, in order to explore how the film portrays the values and practices of the financial industry. Unit Two focuses on arguments made by contemporary philosophers and journalists about how individuals and governments should spend their money in order to reflect their values and create a just and healthy world: readings will include Ta-Nehisi Coates's article "The Case for Reparations", Silvia Federici's manifesto "Wages Against Housework" and Michael Sandel's work on morals and markets. We will ask questions such as: What is money? How do we decide what monetary value to place upon love, or a nation's racist history, or body parts—and is there anything that should not have a price put on it? How does money interact with race, class and gender in the United States, and how does it mediate our personal relationships? The final unit of the course presents students with a selection of recent films and television series, including Magic Mike (2012), Support the Girls (2018) and Mad Men (2007-15), that raise questions about the relationship between money, work and gender. Focusing on one of the suggested films or television shows, students will undertake their own research and, in conversation with the scholarship of other critics, write a paper about how money and value function in their chosen work.

Expository Writing 20 Section: 027

Expository Writing 20 (116353)

Ramyar Rossoukh

2020 Fall (4 Credits) Schedule: MW 0730 AM - 0845 AM

Instructor Permissions: Department Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Journey to Mars

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: In recent years, interest in outer space has galvanized around the exploration of Mars. This summer alone three nations launched missions to the red planet (UAE, USA, China). Meanwhile, this fall’s Netflix series Away is only the latest in a series of recent Hollywood portrayals of human missions to Mars that includes the blockbuster The Martian (2015). Why Mars? Why now? What is the relationship between scientific and artistic imaginaries about Mars? This course explores the meaning of our fascination with Mars and what this might tell us not only about Mars but also ultimately ourselves. Our launch begins with a close analysis of a Hollywood film about Mars to examine themes and imagery associated with the red planet in popular culture. We then chart a path through two ethnographies about the scientific study of Mars to gain a better understanding of the relationship between visualization and the production and dissemination of scientific knowledge about Mars. Drawing on ideas from these readings, students write an analytical essay that argues for a new way of seeing a Martian site of their choosing. In the final unit, we bring together speculative and scientific perspectives to form the first Ministry of Tourism of Mars and develop a research project that engages with possible futures in which humans have become a multi-planetary species. In small groups, students will imagine an activity or event on Mars that addresses the priorities of the Mars 2050 "Visit Mars" campaign and present it in the form of a webpage on the course website.

Expository Writing 20 Section: 029

Expository Writing 20 (116353)

Ben Roth

2020 Fall (4 Credits)  Schedule:  TR 0600 PM - 0715 PM
Instructor Permissions:  Department  Enrollment Cap:  15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Philosophical Films

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: How should society be organized? What should individuals do when they disagree with the reigning order? Protest? Revolt? Withdraw? Our class will approach these perennial philosophical questions through a number of recent films. At the beginning of the semester, we will watch Bong Joon-ho's Parasite, about the stratification of wealth and opportunity in contemporary South Korea; Michael Haneke's Caché, in which a man's personal history—and France's colonial one—come back to haunt him; and Queen and Slim (directed by Melina Matsoukas, screenplay by Lena Waithe), about race and policing. As students develop their interpretations of one of these films in their first paper, we will also learn the basic vocabulary of cinematography and editing. Then, in the middle of the semester, we will turn to questions of adaptation, reading two classic works of philosophical literature and watching films that import their stories into radically different settings. Tolstoy's novella The Death of Ivan Ilyich, about how awareness of our mortality affects our values, is relocated from nineteenth-century Russia to post-World War Two Japan in Akira Kurosawa's Ikiru. Aristophanes' ancient drama Lysistrata, in which the women of Greece go on a sex strike to end the Peloponnesian War, is transported by Spike Lee to Chicago's South Side in Chi-Raq. Students will compare one of these films to its source material in their second papers. Finally, at the end of the semester, we will read some short theoretical selections about the relationship between philosophy and film, attuning students to larger issues as they write a research paper about a philosophical film or filmmaker of their choice, such as Memento, Eternal Sunshine of the Spotless Mind, Stalker, Claire Denis, Jordan Peele, David Lynch, or Terrence Malick, among many other possibilities.

**Topic:** Animals and Politics

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Animals play an important role in politics and society; yet, there is not much academic, governmental, or societal attention on them or on our relationship to them. In this engaged course, you will have the opportunity to learn more about how animals, with a focus on farm animals, impact the environment, our health, pandemics, our prejudicial attitudes toward other humans (like racism and sexism), and even elections. In the first unit, we'll focus on the question of why should we care about the wellbeing of animals in society? We'll read different theories and you'll come up with your own answer. In the research unit, you'll have the chance to ask your very own research question. Given the lack of attention on animals, there are a plethora of topics that could be developed further if we "consider the role of the animal," so this unit very much encourages you to bring your interests to the table. In the capstone unit, you'll work in teams to come up with a "message to the world" about animals based on your individual research projects. The medium for this — a song? A poster? A website? A short movie? Something else? — is up to you. You'll present your projects to our community partners: Ed Winters (Earthling Ed) and the Animal Law and Policy Program over at Harvard Law School. The course finishes up by asking you to write a short blog. There will be required outside of class events. Please be sure to watch the course trailer for more information.

Expository Writing 20 Section: 032

Expository Writing 20 (116353)
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: The Underworld

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Hell is popular. In fact, it's been doing much better than heaven. It's practically a literary consensus that Dante's best book is his Inferno not Purgatorio or Paradiso, and that Milton, a Christian believer, got so carried away in describing Satan and hell that he ended up being "of the Devil's party without knowing it" (Blake). And the world today may be more secular than in past generations, but hell is doing just fine. Harvard presents its own interesting case: Currier House's annual "Heaven and Hell" party has situated "Hell" in a room that can hold about 500 people whereas "Heaven" can fit only about 50. (This past year heaven was eliminated entirely.) But what are the components of hell – what archetypes or depictions of hell and the underworld helped to cement their importance in culture? And why is hell so alive in secular culture? Why do those people who don't believe that hell is real want to keep imagining it again and again (in Supernatural, in South Park, in Buffy the Vampire Slayer, etc.)? In our first unit, we will examine famous underworld themes and archetypes as we look at short excerpts from Gilgamesh, Homer, Virgil, Dante, Milton, Jonathan Edwards, the story of Persephone, and the story of Orpheus and Eurydice. In our second unit, we'll consider how these themes and archetypes are taken up by recent secular texts such as a Stephen King short story, the film Pan's Labyrinth, and a New Yorker article by Harvard Professor Danielle Allen about her cousin's experience in the American prison system. Finally, in our third unit, students will select and research a contemporary depiction of hell, and make an argument about how that hell works as a metaphor for a real-world issue or fear (such as the sleaziness of Hollywood, or bickering families, or mental illness, or the vastness of outer space). Throughout, we will try to better understand the curious attraction of hell, and why its 4,000-year-old story shows no sign of ending.

**Topic:** Language, Identity, and Power

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**
While a variety of animal species can communicate, humans are unique in their use of language. Language enables us to talk about the future and the past, express complicated thoughts, and develop new technologies. But to what extent does the language we use also make us who we are? How do our social and cultural backgrounds...
inform our use of language, and how does our use of language influence our social relationships? In this course, we will explore the intersections of language, identity, and power from an interdisciplinary perspective. In our first unit, we will consider opposing theoretical claims regarding gender differences in communicative interactions, and we will test these theories by analyzing elements of conversations shown in reality television. In our second unit, we will collect our own data (in the form of conversation recordings, surveys, or interviews) to further examine the complex interactions between language, identity, and power dynamics. Here you will form an argument regarding the extent to which elements of our daily language use help to reinforce or subvert existing power structures or markers of identity. In our final unit, you will work to communicate your research-based argument to a wider audience by planning and producing a 10-minute podcast, in which you will distill your research findings and weave in interviews as evidence. Throughout the course, students will also be encouraged to reflect on their own experiences with language, including the ways in which their native languages, accents, and communication styles influence their identity and relationships.

Course Notes: Students must pass one term of Expository Writing 20 to meet the
While a variety of animal species can communicate, humans are unique in their use of language. Language enables us to talk about the future and the past, express complicated thoughts, and develop new technologies. But to what extent does the language we use also make us who we are? How do our social and cultural backgrounds inform our use of language, and how does our use of language influence our social relationships? In this course, we will explore the intersections of language, identity, and power from an interdisciplinary perspective. In our first unit, we will consider opposing theoretical claims regarding gender differences in communicative interactions, and we will test these theories by analyzing elements of conversations shown in reality television. In our second unit, we will collect our own data (in the form of conversation recordings, surveys, or interviews) to further examine the complex interactions between language, identity, and power dynamics. Here you will form an argument regarding the extent to which elements of our daily language use help to reinforce or subvert existing power structures or markers of identity. In our final unit, you will work to communicate your research-based argument to a wider audience by planning and producing a 10-minute podcast, in which you will distill your research findings and weave in interviews as evidence.

Throughout the course, students will also be encouraged to reflect on their own experiences with language, including the ways in which their native languages, accents, and communication styles influence their identity and relationships.

**Expository Writing 20** Section: 036

Expository Writing 20 (116353)  
*Julia Tejblum*

2020 Fall (4 Credits)  
**Schedule:** TR 0730 AM - 0845 AM

**Instructor Permissions:**  
Department: **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence.
through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Truth Claims in a Post-Truth W

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: We often describe an idea or phrase as having “the ring of truth,” but what does truth sound like? And what happens when politicians, news organizations, and advertising agencies learn to reproduce or mimic that sound? This course addresses recent claims that we are living in a “posttruth world,” and considers the fate of argument in a world in which truth is subjective, and fact divided into mainstream and alternative forms. Is it possible to draw clear lines between fact and fiction, truth and lies? And if, as Oprah Winfrey has insisted, there is value in the transformative power of "speaking your truth," what does this mean for debate and the project of seeking a truth that exists beyond our personal experience? In our first unit, we'll consider the methods we use to distinguish fact from fiction as we examine fictional and philosophical texts by Tim O’Brien, J.L. Austin, and others that seek to distinguish (or blur the lines) between truth and fiction. In the second unit, we'll focus on subjective truths (or truths that differ for each individual) and examine the challenges these truths pose for our justice system and for fields like medicine and science. Students will choose from a number of potential topics that address the intersection of truth and race, including racial bias in witness testimony and in medical treatment. Our final unit will take us where the quest for truth reaches its extremes: the conspiracy theory. We'll look at the complex anatomy of conspiracy theories from the world-wide (the moon landing "hoax" and "crisis actors," among others) to the local (Harvard-based conspiracies), and students will have an opportunity to design original research projects that fit their interests.

Expository Writing 20 Section: 037

Expository Writing 20 (116353)

Ezer Vierba

2020 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Department

Enrollment Cap: 14

An intensive seminar that aims to improve each student’s ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the
Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Buddhism, Mindfulness, and the

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: Today, mindfulness is touted as a panacea, the secret to happiness and health, superb sex and unparalleled productivity. The hype is not entirely new, however. For decades, ostensibly Buddhist ideas have been tossed around in the West as recipes for success in just about any art or craft. But what hides behind this craze? Can Buddhist teachings offer us tools with which to achieve our goals, or are we corrupting Buddhism by using it in such a way? What have artists and practitioners thought of the use of meditative tools, and how have they integrated Buddhist terms like "bare awareness" and "emptiness" into their work?

In order to answer such questions, we will start the course with a reading of the Satipatāthana Sutta, the Buddha's instructions on mindfulness meditation. A close reading of the text in our first unit will give us a glimpse of the ancient Buddhist practice, its complexity and richness. In our second unit, we will read the text that gave the West the idea that Buddhism can allow us to "hit the mark" without trying to do so, Eugen Herrigel’s bestselling Zen in the Art of Archery. Using Edward Said’s classic work, Orientalism, we will ask if Herrigel was romanticizing Zen Buddhism, and if he was, what the consequences of such a romanticization have for Japan and the West. In our last unit, we will stage a series of class debates about "mcmindfulness," joining a larger conversation with scientists and Buddhist practitioners about the compatibility of Buddhism with its modern, secular appropriations.

As we reflect on these matters intellectually, we will also practice mindfulness meditation, as well as various other forms of Buddhist meditation. In doing so, we will think about these meditations both practically and critically, at the same time as we refine our analytical understanding of Buddhist ideas.

**Expository Writing 20 Section: 039**

Expository Writing 20 (116353)

Hudson Vincent

2020 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Are Prisons Obsolete?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: With 2.3 million Americans currently locked behind bars, the United States imprisons its citizens at a higher rate than any other country in the world. But calls to reimagine our country’s carceral system are on the rise. Black Lives Matter and other movements are asking urgent questions: Why are Black Americans imprisoned five times more than white ones? Should there be for-profit prisons? What crimes merit confinement? What is the purpose of prisons? And do we even need them? In this course, we will grapple with these questions by examining a variety of scholarly perspectives on the United States prison system. We will begin by analyzing the arguments for prison abolition versus reform in Angela Davis’s Are Prisons Obsolete? (2003). To situate ourselves within a broad debate over the recent history of mass incarceration in the United States, we will then compare new scholarship on the subject by Michelle Alexander, James Forman, Jr., and Elizabeth Hinton. We will also read first-hand accounts of prisons in Reginald Dwayne Betts’s memoir and poetry, as well as Shane Bauer’s investigative journalism. Over the course of the semester, we will receive visits from prison reform advocates, prisoners’ rights attorneys, and formerly incarcerated people, who will help us understand the United States prison system and the movement for carceral reform today.

Expository Writing 20 Section: 041

Expository Writing 20 (116353)

Jeffrey Wilson

2020 Fall (4 Credits) Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: Department Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Why Shakespeare?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.
Class Notes: Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronouncement, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Why did the British government pay $2.4 million to have Shakespeare translated into Mandarin? Does Shakespeare deserve this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his methods of artistic creation and the values of the modern world. We’ll begin with the most famous artwork of the past millennium, Hamlet, about a young scholar (like you) who finds the injustice of the world overwhelming (like you?). Then we’ll turn to Much Ado About Nothing—a precursor to the modern rom coms where two people who can’t stand each other end up falling in love—in conversation with two additional texts: (1) Jeffrey Hall's The Five Flirting Styles, a sociological theory and, at times, a how-to manual, and (2) the Public Theater’s summer 2019 production of Much Ado, which featured an all-Black cast under a Stacey Abrams 2020 banner. Finally, we'll ask, "Why Shakespeare?" and entertain answers ranging from the skeptical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

**Expository Writing 20 Section: 043**

**Eve Wittenberg**

2020 Fall (4 Credits)  
**Schedule:**  
TR 1030 AM - 1145 AM  
**Instructor Permissions:**  
Department  
**Enrollment Cap:**  
15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:**  
What is Health?

**Course Notes:**  
Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**  
Health care is on everyone's minds these days: polls show it is among voters' top priorities when considering candidates, it
dominates headlines, and elected officials wrestle with options to improve our insurance system. Underlying all this talk is a fundamental goal of health—yet what in fact does this term mean? What does it mean to be healthy? What are we trying to achieve with our health system or with health insurance? How would we know if we've done a good or bad job? These are the questions that challenge practitioners of medicine, public health, and health policy. To be "healthy" may be living very long, having healthy behaviors, or being happy; it could be a combination of all of these, and it could be different for different people. Understanding what we mean when we talk about health is important to every facet of the health system and to everyone who interacts with it, so we know what we are collectively and individually aiming for and whether it is achieved.

This course will explore what health is, what it means to be healthy or not healthy, and how we can improve people's health. The emphasis will be on writing from a science and social science perspective, highlighting the distinctions with writing in the humanities. It is an "active-learning" seminar, which means we will use in-class exercises and frequent assignments to build writing skills: you will write, critique others’ writing, talk about writing, read writing aloud, draw diagrams of arguments—all sorts of varied exercises to understand, develop, and improve your own writing style. Unit 1 will focus on the definition of health to form a basis for the semester, including the World Health Organization's definition and case examples of people who we may or may not consider healthy (for instance, would Stephen Hawking have been considered healthy?). Unit 2 will look at health policies, specifically focusing on childhood obesity prevention. We will read conflicting views of obesity as a medical condition or a descriptor of body size, and grapple with a situation where science points in different directions. Unit 3 will introduce research papers, and you will write on an individually-chosen topic around improving college students' health. You will learn to use the Harvard library system and resources to write a final paper. The materials for the course will consist of scientific articles (mainly in medicine and public health), online health data sources, commentaries and editorials, videos/TED talks, and a few newspaper articles and websites. Some classes will be held at Harvard's Global Health Education and Learning Incubator to use verbal and visual exercises to clarify concepts, practice articulating ideas, and develop a focus for writing.

Expository Writing 20 Section: 044

Expository Writing 20 (116353)

Lusia Zaitseva

2020 Fall (4 Credits)  Schedule: TR 0430 PM - 0545 PM

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Representing Childhood

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Cultural attitudes toward childhood have long been complex. Novelists, poets, and philosophers alike have espoused the virtues of cultivating cherished qualities of childhood: the playfulness, authenticity, and boundless curiosity of children unburdened by the stifling responsibilities of adulthood. But, as educators and political commentators remind us at every turn, childhood is also a condition to be overcome, a state of unsophisticated lack of discipline and immaturity that our leaders should avoid. These tensions have made children—so often spoken for and about on the page and screen, but rarely speaking for themselves—into vessels of meaning for a wide variety of purposes, from rallying cries urging military involvement abroad to immigration reform at home. In this course, we'll consider what representations of childhood can tell us about the adult world and childhood itself. What is the root of adult anxieties about children? And what are the moral and practical costs of upholding certain images of childhood—for example, its innocence—to both adults and children themselves? We'll begin our exploration of these questions by attending to the imagined worlds of Brian Aldiss, Ray Bradbury, and Lesley Nneka Arimah. What deeper meanings, we will ask, can be uncovered by attending to representations of children and the child's point of view in their works? Next, we'll shift our gaze to the highly controversial photographs of Sally Mann as we question the limits of acceptable representation of childhood. In the third unit, students will have the opportunity to conduct their own original research as we explore how childhood figures in a range of recent debates from climate change to slacktivism.

Topic: The Uses of Horror

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: In a conversation with Stephen Colbert, comedian and filmmaker Jordan Peele referred to his 2017 horror film, Get Out, as a "historical biopic." His claim that "the movie is truth" invites us to reflect on the relationship between horror and history – between fictional and filmic fantasies that terrify us, and our own lived realities. In this course, we'll think about what happens when we encounter works of art that are disturbing, excessive, horrific, and about how horror, as a genre, has given us new ways of understanding and describing our experiences. In our first unit, we'll read a classic work of horror: Henry James's 1898 novella, The Turn of the Screw, which its author once described (misleadingly) as "a ghost story, plain and simple." We'll discuss what makes it much more than a simple ghost story, what we find most frightening about it and why, and what allows us to read it as a psychological and social allegory. In unit two, we'll read a selection of stories by Edgar Allan Poe, framing them in relation to larger questions about gender, race, and the history of science. Paying particular attention to patterns of transgressed boundaries between self and other, life and death, and sanity and madness within the stories, we'll assess how Poe's seemingly self-contained tales of terror express anxieties about 19th century American society. Finally, for our third unit, we'll turn our full attention to horror's most contemporary (and popular) iteration: the scary movie. Students will write a research paper about a horror film of their choice (some suggested options will include Night of the Living Dead, Rosemary's Baby, The Babadook, and Get Out), drawing on readings in philosophy, psychology, and film theory in order to tackle some of the central questions animating this course: what makes horror cohere as a genre, how do its aesthetic qualities operate on the mind of the observer, and what kinds of social and cultural commentary might it be capable of making?
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: The Uses of Horror

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: In a conversation with Stephen Colbert, comedian and filmmaker Jordan Peele referred to his 2017 horror film, Get Out, as a "historical biopic." His claim that "the movie is truth" invites us to reflect on the relationship between horror and history – between fictional and filmic fantasies that terrify us, and our own lived realities. In this course, we'll think about what happens when we encounter works of art that are disturbing, excessive, horrific, and about how horror, as a genre, has given us new ways of understanding and describing our experiences. In our first unit, we'll read a classic work of horror: Henry James's 1898 novella, The Turn of the Screw, which its author once described (misleadingly) as "a ghost story, plain and simple." We'll discuss what makes it much more than a simple ghost story, what we find most frightening about it and why, and what allows us to read it as a psychological and social allegory. In unit two, we'll read a selection of stories by Edgar Allan Poe, framing them in relation to larger questions about gender, race, and the history of science. Paying particular attention to patterns of transgressed boundaries between self and other, life and death, and sanity and madness within the stories, we'll assess how Poe's seemingly self-contained tales of terror express anxieties about 19th century American society. Finally, for our third unit, we'll turn our full attention to horror's most contemporary (and popular) iteration: the scary movie. Students will write a research paper about a horror film of their choice (some suggested options will include Night of the Living Dead, Rosemary's Baby, The Babadook, and Get Out), drawing on readings in philosophy, psychology, and film theory in order to tackle some of the central questions animating this course: what makes horror cohere as a genre, how do its aesthetic qualities operate on the mind of the observer, and what kinds of social and cultural commentary might it be capable of making?
Expository Writing  20 Section: 201

Expository Writing 20 (116353)

David Barber

2021 Spring (4 Credits)  

Schedule: TBD

Instructor Permissions: Department  

Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Wizards and Wild Things

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Once upon a time, there was no Harry Potter. Once upon a time, there was no such thing as children's literature. When and if children learned to read, they read what grown-ups read. How then did writing for children as we now know it come of age? Why does the genre have such an enduring hold on our cultural imagination, even as it continues to provoke sharp debate over its greater purpose and value? Are classic children's books like The Wizard of Oz, The Wind in the Willows, and The Cat in the Hat instructive or subversive, didactic or liberating? In this course we'll examine selections from three centuries of popular prose and verse written expressly for and about children as we investigate how this eclectic canon reflects evolving ideas about childhood, changing views about educating and enchanting young readers, and persistent disputes over what and how children should learn from books. In Unit 1 we'll survey landmark works in English for children from the Puritan through the Victorian eras, including The New England Primer, Grimms' Tales, and Alice in Wonderland, as we consider what these texts tell us about the origin and evolution of the genre. In Unit 2 we'll examine works by touchstone authors for younger readers including Mark Twain, Louisa May Alcott, Rudyard Kipling, E. B. White, C. S. Lewis, Maurice Sendak, and others, drawing on the critical perspectives of thinkers such as John Locke, Bruno Bettelheim, Alison Lurie, and Marina Warner to assess arguments about the essential function of imaginative literature from infancy through adolescence. In the final unit, students will conduct their own research to place a major children's author of their choice in a relevant cultural and historical context.

Once upon a time, there was no Harry Potter. Once upon a time, there was no such thing as children's literature. When and if children learned to read, they read what grown-ups read. How then did writing for children as we now know it come of age? Why does the genre have such an enduring hold on our cultural imagination, even as it continues to provoke sharp debate over its greater purpose and value?
Are classic children's books like *The Wizard of Oz*, *The Wind in the Willows*, and *The Cat in the Hat* instructive or subversive, didactic or liberating? In this course we'll examine selections from three centuries of popular prose and verse written expressly for and about children as we investigate how this eclectic canon reflects evolving ideas about childhood, changing views about educating and enchanting young readers, and persistent disputes over what and how children should learn from books. ### Expository Writing 20 Section: 202

**Expository Writing 20 (116353)**

*Jacob Betz*

2021 Spring (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:** Department  

**Enrollment Cap:** 15  

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Religious Pluralism  

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** The United States is arguably the most religiously diverse nation in the world. Americans possess a dizzying array of religious beliefs and behavior. And despite predictions to the contrary, levels of devout religious belief remain high, evidenced by recent controversies over a proposed Islamic community center in Lower Manhattan, as well as Supreme Court rulings on female access to contraception and same-sex marriage. How do people—including nonbelievers—experience
this religious multiplicity? How are these vast religious differences negotiated socially, culturally, politically, and legally? Moving beyond theology, this course will explore the broad concept of lived religion in the United States. Through readings in fiction, law, history, and sociology, we'll tackle these fundamental issues. In Unit One, we'll read Ayad Akhtar’s 2013 Pulitzer Prize-winning play, *Disgraced*, to explore how religion affects intimate relationships among spouses, friends, and co-workers. In the second unit, we'll wade into the constitutional quandary surrounding the First Amendment, dissecting legal scholars’ arguments over the limits of religious freedom. Through a series of case studies involving snake handling, home schooling, and drug use, we'll examine the frequent tension that emerges from a Bill of Rights that both guarantees the free exercise of religion and requires some degree of secularism. Finally, in Unit 3, students will focus on a religious topic of their choosing, design a research proposal, examine both primary and secondary sources, and write a substantial research paper.

**Expository Writing 20 Section: 204**

Expository Writing 20 (116353)

*Collier Brown*

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Wastelands

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** The impenetrable wilderness of *The Revenant*, the diseased streets of *Children of Men*, the trash heap cities of *Wall-E*—these are the wastelands that fascinate our pop culture. On the screen, they come to life as horrifying alternate universes and dead civilizations—the very fates we must avoid at all costs. And yet wastelands are not exclusively the stuff of science fiction. In this course, we will grapple with both imaginary and actual wastelands. We will begin with short stories by Jack London, Thomas King, and Octavia Butler. From the icy wilds of the Yukon to the borderlands of Native American exile, these writers question the way wastelands have been imagined, especially in North America, over the past century. Next, we will turn to real wastelands—to the garbage dumps and arid landscapes where nothing grows. We will ask what these places reveal about their
inhabitants, their struggles, and their achievements. Finally, students will research a wasteland of their own choosing—anything from the mega slums of Mumbai to the sprawl of Boston's unused rooftops. Along the way, we will investigate how wastelands form and evolve, and how people adapt to them. Are wastelands actually the places we should avoid at all costs, or are they the places we can no longer afford to ignore?

Expository Writing 20 Section: 206

Willa Brown

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Department Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Whose Boston?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The "Engaged Scholarship" components of this course include multiple mandatory activities outside of regular class hours.

Each year over three million visitors walk Boston's Freedom Trail, learning a curated story of how this country came to be. But whose story is it? This engaged scholarship course will leave the Yard in order to think about how the stories we tell shape the city we live in. In the wake of the riots in Charlottesville over the removal of a statue dedicated to Robert E. Lee, Americans are embroiled in a debate long familiar to historians: what do our monuments say about who we are? Maybe more importantly: how do those messages change the way we interact with each other? This course will explore these questions in the context of the city you have come to live in for the next four years. We will begin by critically examining the story visitors and residents learn when they walk the Freedom Trail—whose stories are told? What do those narratives say about what this city is? We will be part of the debate about what it means to be represented (or not) on the city landscape. This course will teach you to see the cityscape as a book to be read—a book whose meaning you can shape. After examining these questions, we will make our own decisions about what stories need to be told: the course will culminate in creating a digital map and our own walking tour presented to the public.

Topic: The Art of Shock

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: From Michelangelo’s fleshly angels on the ceiling of the Sistine Chapel through to Andres Serrano’s Piss Christ (1987), art has never shied away from representing difficult subject matter – or from courting controversy. In the twentieth century, some critics even argued that art is only effective when it jolts us out of our customary ways of relating to the world, or when it makes explicit the structures of violence and oppression that operate invisibly. This course will begin by exploring works of art and literature by Michelangelo, Edouard Manet, and Charles Baudelaire that were considered transgressive in their time but which have since been incorporated into the canon of art history. Is an artwork deemed shocking because of its own intrinsic qualities, or because of the norms and values of its viewing culture? How did these creations and their controversies shape or redirect the course of art history? In our second unit, we will study some contemporary artists who understand "shock" to be an integral part of their aesthetic projects. In looking at Damien Hirst's pickled animal installations, or Tracey Emin's own stained mattress set in the middle of the Tate Gallery, or Kara Walker's provocative 75-foot-long sphinx made out of sugar, why do these artists want their audience to feel such alarm and unease? We will consider these artworks alongside readings by feminist critics, philosophers, and art theorists who defend art even at its most outrageous extremes. Can shock motivate moral or ethical reasoning? Is shock a particularly political feeling? And why are images or representations of the body so central to this genre of art? The third unit will investigate how institutions – like museums, the media, and even universities like Harvard – play a role in either canonizing transgressive art or else fanning the flames of public outrage. Students will have the opportunity to visit the Harvard Art Museum as they work on their final, individual research papers.

Expository Writing 20 Section: 211

Expository Writing 20 (116353)

Matthew Cole
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: 1984: Orwell's World and Ours

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: When George Orwell wrote 1984, the year that gave the book its title and setting lay 35 years ahead. Today, it is 35 years in the past, and yet Orwell's prophecies seem more relevant than ever. In 2017, when a Trump spokesperson debuted the concept of "alternative facts" to an incredulous public, 1984 raced to the top of the best-seller charts. In 2013, the book saw a similar resurgence of popularity following revelations of a secret mass surveillance program that allowed the NSA to gather the data of American citizens. Even if you've never read the book you've probably heard – maybe even used – some of its iconic phrases: Big Brother, Thought Police, doublethink, thoughtcrime, Newspeak, or 2+2=5. Orwell invented all of this because he wanted to give his readers a handle on what was happening in the world. He feared that a new species of totalitarian governments wielding new forms of power – power over the body, the mind, and perhaps even reality itself – would come to dominate and dehumanize their citizens, and he believed that only a conscious choice to prevent this would redeem the future. Much has changed since then, including the fall of the totalitarian regimes that inspired the novel, and yet it seems we still cannot put Orwell's premonitions behind us.

In this course, we will shed light on the enduring significance of 1984 by investigating the novel from three different angles. In the first unit, we will grapple with the text itself, close-reading key passages from the novel and using them to explore the underappreciated nuances of Orwell's masterpiece. In the second unit, we will look at the text in its historical context, drawing evidence from Orwell's essays, journalism, and letters to add depth and sophistication to our analysis. In the third unit, we will consider whether and to what extent Orwell's novel still illuminates our future. Students will pursue independent research on key Orwellian themes such as authoritarianism, post-truth, and surveillance, in order to see how the arguments of contemporary scholars and thought leaders have updated Orwell's insights for the twenty-first century. During this time, the class will also collaborate on a video time capsule to transmit our own predictions, hopes, and fears to the Harvard students of the future.

In the second unit, we will look at the text in its historical context, drawing evidence from Orwell's essays, journalism, and letters to add depth and sophistication to our analysis. In the third unit, we will consider whether and to what extent Orwell's novel still illuminates our future. Students will pursue independent research on key Orwellian themes such as authoritarianism, post-truth, and surveillance, in order to see how the arguments of contemporary scholars and thought leaders have updated Orwell's insights for the twenty-first century. During this time, the class will also collaborate on a video time capsule to transmit our own predictions, hopes, and fears to the Harvard students of the future.
Expository Writing 20 Section: 213

Expository Writing 20 (116353)

Margaret Doherty

2021 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions:  Department  Enrollment Cap:  15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Modern Love

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Reader, I married him." As this famous line from Charlotte Brontë's Jane Eyre reminds us, writers have long been preoccupied with matters of the heart. Courtship plots are everywhere, from the novels of Jane Austen to the "rom-coms" of the 1980s and 1990s to essays you can find every Sunday in the "Styles" section of the New York Times. For centuries, marriage was primarily an economic relationship, and love outside of marriage ended in humiliation or even death. But what happens when society expands the options for living and loving? What happens to the courtship plot when women choose not to be wives, or when people who once couldn't marry now can? When couples are as likely to meet through Tinder as they are through mutual friends? In this course, we'll explore what courtship plots can tell us about changing concepts of gender, sexuality, family, and freedom. We'll start with fiction by Edith Wharton, one of the American literature's keenest social observers (and, incidentally, one of the inspirations for the TV show Gossip Girl). By closely reading her accounts of love and marriage in New York's high society at the turn of the twentieth century, we'll ask what stories about eligible bachelors and old maids can tell us about a society's values and beliefs. In our second unit, we'll turn to more recent courtship plots that trouble traditional conceptions of romance, marriage, and the family. Our texts will include the story "Brokeback Mountain" (and scenes from the Oscar-winning film), short fiction from Pulitzer-prize-winner Jhumpa Lahiri, and the viral New Yorker short story "Cat Person." Using feminist theory, queer theory, literary criticism, and recent sociologies of dating, we'll examine what new romantic possibilities—and problems—exist for couples today. Finally, in our third unit, students will pick a modern love story of their choosing—a novel, a memoir, a
film—and, drawing on the work of critics and scholars, make an argument about what this story shows us about our society's sexual mores.

Expository Writing  20  Section: 214

Expository Writing 20 (116353)

Janling Fu

2021 Spring (4 Credits)    Schedule:  TBD

Instructor Permissions:  Department  Enrollment Cap:  15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:  Eating Culture

Course Notes:  Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:  "Food . . . is not art. . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William Deresiewicz, in an opinion piece for the New York Times, dismisses our society's rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories of cod, salt, and sugar, to the glut of cooking shows, many featuring contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresiewicz right to say that food won't give us insight into ourselves? Is it not possible that by examining what scholars and commentators call "foodways"—the various forces involved in how different cultures produce, buy, sell, and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, “food is good to think,” as we contemplate various foodways from a number of illuminating perspectives. In our first unit we delve into what makes food "disgusting" or "natural." How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful cooking shows produced in different countries, for instance, Top Chef, Iron Chef, and The Great British Bake Off. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of
commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? How has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

Expository Writing  20  Section: 216

Expository Writing 20 (116353)

Alexandra Gold

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Telling Her Story: Narrative,

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: In a powerful essay, the late writer and activist Audre Lorde suggested, "Where the words of women are crying to be heard we must each of us recognize our responsibility to seek those words out, to read them and share them and examine them in their pertinence to our lives." Lorde is not alone in asking us to pay attention to and take responsibility for women's stories; for centuries scholars and activists alike have
championed the words of women, including women of color and queer women, whose stories have routinely gone untold or unheard. Yet if this issue has always been pressing, the call to heed women's stories seems especially urgent at a moment when such stories have come to dominate the cultural landscape and public consciousness – from news accounts to popular shows, literature to social media. This course responds to this moment by examining how women's stories are narrated across a variety of media and exploring what impact the sharing of them can have. Our first unit will focus on short stories by contemporary women authors Roxane Gay, Carmen Maria Machado, and Jenny Zhang that raise questions about the body, family, love, and society. Our second unit then turns to television, studying Hulu's 2017 adaptation of Margaret Atwood's dystopian novel *The Handmaid's Tale*. Informed by readings in critical feminist theory, we'll consider how the show probes the troubling connections between gender, authority, power, and image. Finally, our third unit engages visual and performance art alongside movements like #MeToo and #SayHerName, offering students an opportunity to pursue independent research projects that explore the relations between art, activism, and social media.

**Expository Writing 20** Section: 218

*Expository Writing 20 (116353)*

*Martin Greenup*

2021 Spring (4 Credits)  
**Schedule:** TBD

**Instructor Permissions:** Department

**Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Humans, Nature, and the Enviro

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial society. They may be doing
what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: “to imagine that which we know.” How, then, have creative minds imagined – in essays, books, and movies – the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists – Rachel Carson's *Silent Spring* (1962), and James Lovelock's *The Revenge of Gaia* (2006). Through shocking critiques that draw upon the power of the imagination, both writers, in different ways, have tried to inform the public of the harm being done to nature in the hope that this harm can be averted. And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals – Werner Herzog's *Grizzly Man* (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite's *Blackfish* (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

Expository Writing  20 Section: 220

Expository Writing 20 (116353)

James Herron

2021 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions:  Department  Enrollment Cap:  12

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:  Class and Culture
Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: It is commonplace to note that in the United States many people identify as "middle class" even though our society is marked by deep, persistent, and increasing class inequality. Such self-identification, however, can obscure the complex and often contradictory ways in which we experience social class in our everyday lives. This course explores the cultural dimensions of social class in the U.S. from an ethnographic perspective, focusing on the everyday lives and cultures of ordinary Americans. We will consider questions such as the following. What is it like to be a working class person in a society heavily invested in ideas of individual advancement and meritocracy? How do professionals (the "upper-middle" class) define themselves and how do they view those above and below them in the class structure? What role does elite education play in the creation and reproduction of class inequality? How does social class shape people's values, political views, and tastes? In our first unit we will compare two important ethnographic studies of working class Americans — Michèle Lamont's classic The Dignity of Working Men and Jennifer Silva's more recent Coming Up Short — in order to gain some understanding of how working class people have responded to the relative decline in their living standards over the past 20 years. In the second unit we will read selections from Armstrong and Hamilton's Paying for the Party in order to analyze the role of higher education in shaping the class trajectories of students from working-, middle-, and upper-class backgrounds. For the third unit students will devise their own research project concerning the roles and self-conceptions of elites. For inspiration, we'll read selections of Shamus Khan's Privilege, which examines life at an elite New England boarding school, and Karen Ho's Liquidated, which analyzes the ideologies and identities of Wall Street financiers.

**Expository Writing  20** Section: 221

Expository Writing 20 (116353)

*Richard Martin*

2021 Spring (4 Credits) Schedule: TBD

**Instructor Permissions:** Department Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.
Topic: Culture in Play

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: Common phrases such as "I was just playing" or "it’s only a game" suggest that play is less than serious. Play is often associated with childhood and distinct from the productivity of work. Yet, even for adults, such activities often entail considerable commitments, including substantial expenditures of time and money: the average gamer spends over seven hours a week on video games; baseball player Mike Trout recently signed a $430 million contract. Likewise, play has been shown to have real-world effects: studies have suggested Barbie dolls affect body image, and that the television show Sesame Street impacts educational achievement. Thus, despite common assumptions about its frivolity, play is of social, economic, political, and symbolic import. In this course, we explore what forms of play reveal about the cultures and peoples who take part in them, analyzing how everyday practices involving toys, games, and sports might illuminate broader social phenomena. First, we take inspiration from Roland Barthes's insight that toys are "meant to create users, not creators." We infer the cultural significance of objects from our own childhoods using anthropological methods of "thick description," a form of interpretation attentive to context and meaning. Next, we turn to play on Harvard's campus. Students choose an extracurricular activity and examine it using social scientific techniques; drawing on this data, they advance arguments that apply or test theories advanced by influential scholars, such as Theodor Adorno and D.W. Winnicott. Finally, students turn to independently chosen topics, selecting issues of national significance and conducting research in order to make original contributions to scholarship. Sample topics might include gender and sports, the politics of video games, the marketing of toys, recess in schools, fandom, virtual realities, and live action role play.

Expository Writing 20 Section: 222

Expository Writing 20 (116353)
Richard Martin

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.
Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated through the witch's very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we analyze the film *Harry Potter and the Chamber of Secrets* and the television sitcom *Bewitched*, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on *Purity and Danger*, Pierre Bourdieu's critique of *Masculine Domination*, and Umberto Eco's ruminations on interpreting serials. For the research paper, each student chooses an example of witchcraft on which to conduct independent research. Sample topics include postmodern fairy tales like *Frozen* and *Maleficent*, Broadway musicals like *Into the Woods* and *Wicked*, historical witch-hunts and contemporary occult practices. What unites our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

### Expository Writing 20 Section: 223

Expository Writing 20 (116353)

*Rachel Meyer*

2021 Spring (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:**  

Department  

**Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](https://expos.harvard.edu). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

### Topic:  

Work: Culture, Power, and Cont

### Course Notes:  

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

### Class Notes:  

This course explores the structure and experience of work in the...
contemporary political economy with an eye toward both its liberating and oppressive potential. We will take up enduring sociological questions with respect to power, control, autonomy, surveillance and self-determination on the job. How do different forms of work affect our life circumstances, personalities, and connections to each other? In the first unit we will examine corporate culture and how it affects the experience of professional work. Does a strong corporate culture enhance professional autonomy or management's power? Does it facilitate or undermine community? In unit two we explore the crucial issue of workers' control over their own labor and the concept of alienation. We examine accounts of deskilling, the separation of mental and manual labor, and the consequences of these processes for workers' experience on the job. To what extent does alienation occur in offices versus factories versus service counters? For the final unit we will critically engage in a debate about the development of "flexible" labor and the ways in which workers' connections to employers, occupations, and locations have become more fluid and transitory. We will explore what flexibility means in a variety of contexts and ask: does flexibility lead to liberation or loss of identity? Does it bring self-fulfillment or insecurity? What does flexibility mean for tech workers in Silicon Valley and bankers on Wall Street? Our texts consist of case studies and ethnographic accounts representing a variety of workplaces along with readings from prominent social theorists who in different ways seek to elucidate the conditions of work under modern capitalism.

Expository Writing 20 Section: 224

Expository Writing 20 (116353)

Lindsay Mitchell

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: The Femme Fatale

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The femme fatale—the attractive, seductive woman who brings about the downfall of men—has fascinated us through the ages, from Biblical
figures like Eve and Delilah, to historical women such as Cleopatra and Wallis Simpson, to the media personas of modern pop stars like Cardi B and Miley Cyrus. In the classic femme fatale narrative, the woman’s dangerous actions empower her, but she also must submit to the fact that her empowerment renders her a villain. Might this contradiction in the femme fatale’s character reflect tensions in our own evolving understanding of gender? How can the femme fatale character help us untangle the real-world gender problems that modern women and men face?

This course will begin to explore these and other related questions by studying accounts of femme fatales in literature and film. In our first unit, we’ll explore 1920s and 1930s pulp fiction as a source of the modern fatale archetype, with special focus on James M. Cain’s noir novella *Double Indemnity*. In our second unit, we’ll move forward to the post-feminist movement 1990s and examine two films featuring teenage femme fatales, comparing Gil Junger’s *Ten Things I Hate About You* to Alexander Payne’s *Election*, both released in 1999. Finally, in our third unit, students will research a modern-day femme fatale, either real or fictional, and argue why the modern version is recognizable as a femme fatale, but also represents some evolution of, or twist on, the classic archetype. Here students will be challenged not only to apply broad theories and ideas from the course, but also to reach a greater understanding of why some modern women seem so dangerous.

**Expository Writing 20 Section: 226**

*Shannon Monaghan*

2021 Spring (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** Department  
**Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](https://www.expos.harvard.edu). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** "Noncombatants": The Home Fron

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** While it is perceived today as one of the greatest aberrations in human society, warfare has also been one of the most common experiences in human history. Yet popular conceptions of the history of warfare are often limited to the myth of completely separated soldiers and
civilians. This has not, historically, been so: there is a reason that we call the "home front" a front. We begin by looking at the idea of "total war" within the context of several modern case studies. We will question and examine the roles of women and children, as agents and as targets, in these conflicts. We then move to thinking about the memory and meaning of war through the art and memoirs of the great German printmaker and sculptor Käthe Kollwitz and the intellectual polymath (and French Resistance member) Marguerite Duras. What do the histories and stories that we tell about war, about resistance and about patriotism, particularly stories told by those not in uniform, add to the national and cultural understanding of a conflict? In the final unit, students will choose their own historical research subject from a variety of options. They might investigate conflicts and wars ranging from the recent (the "forever wars" of Iraq and Afghanistan) to the nineteenth century (the U.S. Civil War); from the modern and industrial (the Second World War) to the guerrilla, civil, and anti-imperial (the Spanish Civil War and the Algerian War of Independence). Further research options include different types of participants in conflict (from forcibly recruited child soldiers to anti-war activism) and different ways to pressure an enemy (food policy and blockade). Students will analyze the conflict in their chosen subject through the lens of the unexpected agent in modern warfare: the woman and/or the child. Throughout the course, we will ask what it means to be a "soldier" or a "civilian" in modern conflict, pondering the nature of the distinction.

Expository Writing  20 Section: 228

Expository Writing 20 (116353)

Emilie Raymer

2021 Spring (4 Credits)  Schedule: TBD

Instructor Permissions: Department  Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Genetics and Bioethics

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.
When researchers at the National Institutes of Health announced in June 2000 that they had successfully sequenced the human genome, President Bill Clinton asserted that “with this profound new knowledge, mankind is on the verge of gaining immense, new power to heal.” Since 2000, scientists have developed DNA-risk tests, stem-cell therapies, and precise gene-editing techniques. Yet, despite the potential benefits of these breakthroughs, some have expressed concerns about the bioethical consequences of these new technologies. Critics have voiced fears that scientists are “playing God” and have expressed apprehensions that those who can afford new gene-editing technologies may produce “designer babies” while those who cannot will continue to suffer from heritable diseases. In this course, we will explore how to balance the medical advantages of genetic technologies with their potential disadvantages. For the first essay, we will analyze "The Case Against Perfection" by Harvard political philosopher Michael Sandel, who emphasizes the dangers of genetic enhancements. For the second essay, we will explore claims that new genetic techniques could create a contemporary eugenics movement. For the third and final essay, students will examine both the positive and negative consequences of a genetic technology of their choice and decide how to establish bioethical guidelines to direct its use. Possible topics could include human germline editing, pharmacogenomics, stem-cell therapy, cosmetic enhancements, cloning, or CRISPR-CaS, a new gene-editing technique. The course will culminate with a capstone project, and students will prepare a short talk about the social and biomedical ramifications of a selected genetic technology.

Expository Writing 20 Section: 232

Expository Writing 20 (116353)

Kip Richardson

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Laugh Riots

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.
We are living in an apparent golden age of humor. Judging solely by the number of viral comedians, late-night shows, humor books, parody websites, and meme generators, the genre is thriving. Yet critics, both liberal and conservative, have raised substantive concerns about this explosion of political and social satirical content, questioning its corrosiveness, its persuasive efficacy, even its ability to truly hold powerful interests accountable. Indeed, some have begun to doubt the potency of political satire at all, victim to the surreality and self-parody of modern political life. This course will ask students to weigh in on these questions about the value and viability of social and political humor. In Unit 1, students will consider when, if ever, do jokes go "too far"? Using the global controversy over the satirical caricatures of the Prophet Muhammad drawn by Western cartoonists, students will think critically about whether offensive humor serves or undermines the greater social good. In Unit 2, we turn to the burgeoning world of political satire television, most notably *The Daily Show* but also its many imitators. Such shows have been routinely lauded by commentators as a pillar of civics education, but there are reasons to doubt such rosy estimations. Using both theoretical and empirical sources, students will ask whether such shows really do inform and engage the public, or whether instead they oversimplify and encourage apathy toward the political sphere. Finally, in Unit 3, students will be tasked with exploring the social worlds created by various humor practices, examining either how a historical case study of humor reflects its cultural zeitgeist (e.g., anti-Chinese immigration satire from the 1880s) or surveying the social scientific research on a specific issue within contemporary humor studies (e.g., how sexist humor affects the workplace).

**Expository Writing 20** Section: 233

Expository Writing 20 (116353)

*Ramyar Rossoukh*

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Journey to Mars

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.
Evoking President Kennedy’s famous speech to put a man on the moon by the end of the 1960s, on October 11, 2016, President Obama called for the United States to launch humans to Mars by 2030 and to one day settle there. The quest to achieve this goal has dominated recent headlines from NASA’s landing of the Curiosity Rover to Hollywood’s renewed fascination with the red planet. Mars has become the next great frontier in human conquest and exploration. Why Mars? What is at stake in our efforts to reach Mars? What does it say about life here on Earth? Over the semester, we will look at a range of scholarly literature on Mars as well as films, science fiction, and virtual reality simulations to examine some possible futures in which humans have colonized outer space and become a multi-planetary species. Our launch will be a close analysis of the film The Martian to discover key themes and topics in media representations of Mars. We will next chart a path through Ray Bradbury’s The Martian Chronicles to explore connections between science, technology, and art in our imagination of human life and the experience of difference on Mars. The course will conclude with a broader inquiry of Mars as the next frontier of human entrepreneurship that critically engages with the science and ethics of proposed future Mars missions (Mars One, SpaceX, UAE’s Mars 2117, among others). Students will write a final research paper on a topic of their choice that builds on course readings, activities, and discussion.

**Expository Writing 20 Section: 235**

Expository Writing 20 (116353)

*Ben Roth*

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student’s ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Philosophical Films

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** How should society be organized? What should individuals do when they disagree with the reigning order? Protest? Revolt? Withdraw? Our class will approach these perennial philosophical questions though a number of recent films. At the beginning of the semester, we will watch Sophie Barthes’s *Cold Souls*, Boots Riley’s *Sorry to Bother You*, and Bong Joon-ho’s *Snowpiercer*, which in very different settings—affluent New York City, the gentrifying Bay area, and a frozen post-apocalyptic world—offer critiques of the stratification of wealth and opportunity between haves and have-nots. As students develop their interpretations of one of these films in their first paper, we will also
learn the basic vocabulary of cinematography and editing. Then, in the middle of the semester, we will consider the stories of two individuals who, alienated from society, decide to recede from it, examining their own lives in minute detail instead. In Tom McCarthy's cult-classic novel *Remainder* and video artist Omer Fast's adaptation of it, a man is pathologically compelled to reenact a (possibly false) memory of a time when he felt authentic; he then begins, very strangely, to reenact moments from other people’s lives. In Charlie Kaufman's film *Synecdoche, New York*, a playwright self-consciously recreates his life on stage, eventually employing hundreds of actors and filling multiple impossibly large warehouses. In order to think about the nature of adaptation—from text to screen, from life to art—students will compare two of these works, with attention to the differences between them facilitating more nuanced arguments about memory, authenticity, and how we should live. Finally, at the end of the semester, we will read some short theoretical selections about the relationship between philosophy and film, attuning students to larger issues as they write a research paper about a philosophical film or filmmaker of their choice, such as *Memento*, *Eternal Sunshine of the Spotless Mind*, *Stalker*, Claire Denis, Spike Lee, Akira Kurosawa, David Lynch, or Terrence Malick, among many other possibilities.

### Expository Writing 20 Section: 236

Expository Writing 20 (116353)

*Sparsha Saha*

2021 Spring (4 Credits)  

**Instructor Permissio**ns: Department  

**Schedule:**  

TBD  

**Enrollment Cap:**  

14  

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:**  

Sexism and Politics

**Course Notes:**  

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**  

*The "Engaged Scholarship" components of this course include multiple mandatory activities outside of regular class hours.*

Today, the United States Congress is 19.4% female. That statistic trails the world average of 23.3%, with Nordic, European, sub-Saharan African, and Asian countries achieving better gender balance in national legislatures than the U.S. Some scholars contend that when
women run, they are no more likely to win or lose compared to their male counterparts, though they are simply less likely to run in the first place. Other scholars identify a strong correlation between voting and sexist attitudes, notably in the 2016 U.S. election. But the puzzle persists: what accounts for the persistently low levels of female political representation in American politics, particularly since the United States boasts some of the highest levels of female participation in the labor market, especially in executive positions? Our course explores this question as it examines how prejudicial attitudes about women manifest themselves in American political life and society. In Unit 1, we begin by examining the popular argument that women should have more political representation because they would be better political leaders. In this unit, you will also have a chance to engage in the Harvard community by interviewing peers, neighbors, and other members of Harvard Square to get a sense of beliefs about women in politics. In Unit 2, we turn our attention to recent case studies, including Hillary Clinton, Sarah Palin, and Alexandria Ocasio-Cortez, to investigate how gender stereotypes may or may not have played a role in the outcomes of their political races. Finally, in Unit 3, you will contribute to the scholarship in this field, by researching the phenomenon that Massachusetts lags behind other states when it comes to female political representation at the state and gubernatorial level. We will partner with the Massachusetts Women's Political Caucus (www.mwpc.org) to help them address this problem at the state level by writing a policy paper with recommendations that draw on your research into this issue.

Instructor Permissions: Department  Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: The Underworld
Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Hell is popular. In fact, it's been doing much better than heaven. It's practically a literary consensus that Dante's best book is his Inferno not Purgatorio or Paradiso, and that Milton, a Christian believer, got so carried away in describing Satan and hell that he ended up being "of the Devil's party without knowing it" (Blake). And the world today may be more secular than in past generations, but hell is doing just fine. Harvard presents its own interesting case: Currier House's annual "Heaven and Hell" party has situated "Hell" in a room that can hold about 500 people whereas "Heaven" can fit only about 50. (This past year heaven was eliminated entirely.) But what are the components of hell — what archetypes or depictions of hell and the underworld helped to cement their importance in culture? And why is hell so alive in secular culture? Why do those people who don't believe that hell is real want to keep imagining it again and again (in Supernatural, in South Park, in Buffy the Vampire Slayer, etc.)? In our first unit, we will examine famous underworld themes and archetypes as we look at short excerpts from Gilgamesh, Homer, Virgil, Dante, Milton, Jonathan Edwards, the story of Persephone, and the story of Orpheus and Eurydice. In our second unit, we'll consider how these themes and archetypes are taken up by recent secular texts such as a Stephen King short story, the film Pan's Labyrinth, and a New Yorker article by Harvard Professor Danielle Allen about her cousin's experience in the American prison system. Finally, in our third unit, students will select and research a contemporary depiction of hell, and make an argument about how that hell works as a metaphor for a real-world issue or fear (such as the sleaziness of Hollywood, or bickering families, or mental illness, or the vastness of outer space). Throughout, we will try to better understand the curious attraction of hell, and why its 4,000-year-old story shows no sign of ending.

Expository Writing 20 Section: 239

Expository Writing 20 (116353)

Adam Scheffler

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Department Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.
The Underworld

Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Hell is popular. In fact, it's been doing much better than heaven. It's practically a literary consensus that Dante's best book is his *Inferno* not *Purgatorio* or *Paradiso*, and that Milton, a Christian believer, got so carried away in describing Satan and hell that he ended up being "of the Devil's party without knowing it" (Blake). And the world today may be more secular than in past generations, but hell is doing just fine. Harvard presents its own interesting case: Currier House's annual "Heaven and Hell" party has situated "Hell" in a room that can hold about 500 people whereas "Heaven" can fit only about 50. (This past year heaven was eliminated entirely.) But what are the components of hell – what archetypes or depictions of hell and the underworld helped to cement their importance in culture? And why is hell so alive in secular culture? Why do those people who don't believe that hell is real want to keep imagining it again and again (in *Supernatural*, in *South Park*, in *Buffy the Vampire Slayer*, etc.)? In our first unit, we will examine famous underworld themes and archetypes as we look at short excerpts from *Gilgamesh*, Homer, Virgil, Dante, Milton, Jonathan Edwards, the story of Persephone, and the story of Orpheus and Eurydice. In our second unit, we'll consider how these themes and archetypes are taken up by recent secular texts such as a Stephen King short story, the film *Pan’s Labyrinth*, and a *New Yorker* article by Harvard Professor Danielle Allen about her cousin's experience in the American prison system. Finally, in our third unit, students will select and research a contemporary depiction of hell, and make an argument about how that hell works as a metaphor for a real-world issue or fear (such as the sleaziness of Hollywood, or bickering families, or mental illness, or the vastness of outer space). Throughout, we will try to better understand the curious attraction of hell, and why its 4,000-year-old story shows no sign of ending.

**Expository Writing 20** Section: 240

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](http://expospecificwebsite.com). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed...
evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Privacy and Surveillance

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to some of our communications in the name of national security. It is easy to decry this state of affairs as Orwellian, or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice. In the first unit, we will explore the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally troubling in the government reading people’s emails, or in corporations having records of our internet browsing histories? In the second unit, we will consider government surveillance, specifically the National Security Agency’s power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Do these non-citizens have any privacy rights vis-à-vis the U.S. government? Are there adequate legal protections for American citizens whose communications—both dangerous and innocent—are swept up in surveillance that is targeted at foreigners? In the final unit we will turn to the issue of privacy rights against corporations. Do we have a right to be forgotten online, or should truthful information about private citizens be available via internet search engines indefinitely? Can internet users be regarded as having given meaningful consent to privacy agreements that they have not read and would in any case likely not fully understand? For this unit, students will write a research paper about the appropriate limits on the power that private entities have over our online lives.

All sections emphasize revision.

**Topic:** Truth Claims in a Post-Truth World

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** We often describe an idea or phrase as having “the ring of truth,” but what does truth sound like? And what happens when politicians, news organizations, and advertising agencies learn to reproduce or mimic that sound? This course addresses recent claims that we are living in a “post-truth world,” and considers the fate of argument in a world in which truth is subjective, and fact divided into mainstream and alternative forms. Is it possible to draw clear lines between fact and fiction, truth and lies? And if, as Oprah Winfrey has insisted, there is value in the transformative power of “speaking your truth,” what does this mean for debate and the project of seeking a truth that exists beyond our personal experience? In our first unit, we’ll consider the methods we use to distinguish fact from fiction as we examine fictional and philosophical texts by Tim O’Brien, J.L. Austin, and others that seek to distinguish (or blur the lines) between truth and fiction. In the second unit, we’ll engage with texts from both sides of heated debates that challenge the idea of “expertise”—including climate change and vaccination as we explore how social media platforms shape our relationship to the truth and to argument. Our final unit will take us where the quest for truth reaches its extremes: the conspiracy theory. We’ll look at the complex anatomy of conspiracy theories from the world-wide (the moon landing “hoax” and “crisis actors,” among others) to the local (Harvard-based conspiracies), and students will have an opportunity to interview peers and local members of the community as they conduct their research.

Expository Writing 20 Section: 246

Ezer Vierba

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Buddhism, Mindfulness, and the
Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Today, mindfulness is touted as a panacea, the secret to happiness and health, superb sex and unparalleled productivity. The hype is not entirely new, however. For decades, ostensibly Buddhist ideas have been tossed around in the West as recipes for success in just about any art or craft. But what hides behind this craze? Can Buddhist teachings offer us tools with which to achieve our goals, or are we corrupting Buddhism by applying it in such a way? What have artists and practitioners thought of the use of meditative tools, and how have they integrated Buddhist terms like "bare awareness" and "emptiness" into their work?

In order to answer such questions, we will start the course with a reading of the *Satipatṭhāna Sutta*, the Buddha's instructions on mindfulness mediation. A close reading the text in our first unit will give us a glimpse of the ancient Buddhist practice, its complexity and richness. As we move into our second unit, we will read the text that first gave the West the idea that Buddhism can allow us to "hit the mark" without trying to do so, Eugen Herrigel's bestselling 1948 book, *Zen in the Art of Archery*. Using Edward Said's classic work, *Orientalism*, we will ask if Herrigel was romanticizing Zen Buddhism, and if he was, what the consequences of such a romanticization have for Japan and the West. In our last unit, we will read the work of Chögyam Trungpa, one of the most charismatic masters to have taught in the West. His lectures in *Dharma Art* will provide us a glimpse into the way Buddhist religious-artistic practices have influenced contemporary artists in the West. By looking at Trungpa’s Tibetan "crazy wisdom," we will try to understand what Buddhist ideas of self/not-self mean, and why artists have taken such avid interest in them.

As we read these texts, we will also practice mindfulness meditation, as well as various other forms of Buddhist meditation. In doing so, we will think about these meditations both practically and critically, at the same time as we refine our analytical understanding of Buddhist ideas.

**Expository Writing  20 Section: 248**

Expository Writing 20 (116353)

Jeffrey Wilson
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Why Shakespeare?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronunciation, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Why did the British government pay $2.4 million to have Shakespeare translated into Mandarin? Does Shakespeare deserve this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare’s popularity by looking into the relationship between his methods of artistic creation and the values of the modern world. We’ll begin with the most famous artwork of the past millennium, Hamlet, about a young scholar (like you) who finds the injustice of the world overwhelming (like you?). Then we'll turn to Othello, its confrontation with race and gender especially relevant in our moment. We'll read it in conversation with Blindsight: Hidden Biases of Good People by Anthony Greenwald and Mahzarin Banaji, a social science theory we'll use to think about the identity politics of Shakespeare and his characters; and with Desdemona by Toni Morrison, whose recent passing will no doubt bring additional weight to her adaptation of Othello addressing life "beyond death when you have time, time, time to talk, to explain, to reargue, to debate, to confess, to love." Finally, we'll ask, "Why Shakespeare?" and entertain answers ranging from the skeptical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Expository Writing 20 Section: 250

Expository Writing 20 (116353)

Eve Wittenberg

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence
through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** What is Health?

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** Health care is on everyone’s minds these days: polls show it is among voters’ top priorities when considering candidates, it dominates headlines, and elected officials wrestle with options to improve our insurance system. Underlying all this talk is a fundamental goal of health—yet what in fact does this term mean? What does it mean to be healthy? What are we trying to achieve with our health system or with health insurance? How would we know if we’ve done a good or bad job? These are the questions that challenge practitioners of medicine, public health, and health policy. To be “healthy” may be living very long, having healthy behaviors, or being happy; it could be a combination of all of these, and it could be different for different people. Understanding what we mean when we talk about health is important to every facet of the health system and to everyone who interacts with it, so we know what we are collectively and individually aiming for and whether it is achieved.

This course will explore what health is, what it means to be healthy or not healthy, and how we can improve people's health. The emphasis will be on writing from a science and social science perspective, highlighting the distinctions with writing in the humanities. It is an "active-learning" seminar, which means we will use in-class exercises and frequent assignments to build writing skills: you will write, critique others' writing, talk about writing, read writing aloud, draw diagrams of arguments—all sorts of varied exercises to understand, develop, and improve your own writing style. Unit 1 will focus on the definition of health to form a basis for the semester, including the World Health Organization’s definition and case examples of people who we may or may not consider healthy (for instance, would Stephen Hawking have been considered healthy?). Unit 2 will look at health policies, specifically focusing on childhood obesity prevention. We will read conflicting views of obesity as a medical condition or a descriptor of body size, and grapple with a situation where science points in different directions. Unit 3 will introduce research papers, and you will write on an individually-chosen topic around improving college students' health. You will learn to use the Harvard library system and resources to write a final paper. The materials for the course will consist of scientific articles (mainly in medicine and public health), online health data sources, commentaries and editorials, videos/TED talks, and a few newspaper articles and websites. Some classes will be held at Harvard’s Global Health Education and Learning Incubator to use verbal and visual exercises to clarify concepts, practice articulating ideas, and develop a focus for writing.

Expository Writing  20 Section: 253

Expository Writing 20 (116353)

Lusia Zaitseva

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Department  Enrollment Cap:  15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:  Representing Childhood

Course Notes:  Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Topic: The Psychology of Success and

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Who gets ahead in America? Why do some succeed while others fail? Given knowledge of someone's background or personal characteristics, can we predict if she will become successful? How do we account for the influence of various complex factors, including personality, family, and community? In this course, we will examine questions of success, failure, achievement, and identity viewed through the lens of current theories in psychology. We will begin by examining individual-level, person-centered theories of success with readings on grit, the growth mindset, and multipotentiality. Next, we will read Malcolm Gladwell's *Outliers: The Story of Success* alongside a longitudinal, ethnographic study of 12 American children and a seminal treatise on the role of race in the American classroom. As part of our broader inquiry into the environmental factors that impact success, we will explore how race, class, and familial wealth and resources affect children's lived experiences of childhood and, later, their chances of successfully getting into college. In the final unit of the course, students will answer the question, "What does it take to be successful at Harvard?" Students will select their own pop-science book on a self-help topic like willpower, motivation, happiness, or creativity, research the relevant academic literature, and create a written proposal with an accompanying short presentation to disseminate their findings. Throughout the course, we will use psychological theory to motivate questions and answers about human behavior in a society where the demand for success can be tantalizingly high and the fear of failure devastatingly relentless.

Expository Writing  20 Section: ES01

Expository Writing 20 (116353)

Karen Heath
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Expos Studio 20: The Successful

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**
- What does the successful life consist of? Do we base our notions of success on careers and paychecks? On the impact we have on others? On where we go to college, or on the happiness we achieve? In this course, we will investigate the different definitions and assumptions we might hold about success. First, we will examine accounts of working in a variety of professions. What makes the work in that career meaningful? How do people measure success in these occupations? And what do people sacrifice for their success? Next, students will conduct original research to answer a question about success they're interested in, whether happening right here at Harvard or elsewhere. What, for example, predicts success in school, or in athletics and other extracurricular activities? What difference does a person's race, socioeconomic background, gender identity, culture, or religion make to their attaining success? What power do media images of success and failure have on people? What are potential barriers to success in a college or high school environment? When we look back at Harvard's own history, who fought to change institutional barriers to success and how, and what barriers might still remain? The course will also give students the opportunity to become more confident and skilled oral presenters; to create a final capstone project about their research; and to learn the art of writing an effective Job Cover Letter commonly required by employers for summer jobs, term-time positions, or employment after college.

What difference does a person’s race, socioeconomic background, gender identity, culture, or religion make to their attaining success? What power do media images of success and failure have on people? What are potential barriers to success in a college or high school environment? When we look back at Harvard’s own history, who fought to change institutional barriers to success and how, and what barriers might still remain? The course will also give students the opportunity to become more confident and skilled oral presenters; to create a final capstone project about their research;
and to learn the art of writing an effective Job Cover Letter commonly required by employers for summer jobs, term-time positions, or employment after college.

Expository Writing 20 Section: ES10

Expository Writing 20 (116353)

Ryan Napier

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Department Enrollment Cap: 10

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Expos Studio 20: The Successfu

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: What does the successful life consist of? Do we base our notions of success on careers and paychecks? On the impact we have on others? On where we go to college, or on the happiness we achieve? In this course, we will investigate the different definitions and assumptions we might hold about success. First, we will examine accounts of working in a variety of professions. What makes the work in that career meaningful? How do people measure success in these occupations? And what do people sacrifice for their success? Next, students will conduct original research to answer a question about success they're interested in, whether happening right here at Harvard or elsewhere. What, for example, predicts success in school, or in athletics and other extracurricular activities? What difference does a person's race, socioeconomic background, gender identity, culture, or religion make to their attaining success? What power do media images of success and failure have on people? What are potential barriers to success in a college or high school environment? When we look back at Harvard's own history, who fought to change institutional barriers to success and how, and what barriers might still remain? The course will also give students the opportunity to become more confident and skilled oral presenters; to create a final capstone project about their research; and to learn the art of writing an effective Job Cover Letter commonly required by employers for summer jobs, term-time positions, or employment after college.

The Folklore of Emergency: Change, Continuity, and Communal Creativity Amid Crisis (208259)
Lowell Brower
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15
This course tracks the maneuvers of folklore and expressive culture through crises, conflict zones, and emergency situations. By examining the creative interventions of storytellers, performers, and everyday folks in response to a wide range of profound ruptures and transformations—from political upheavals, to global pandemics, to genocidal violence, to forced migration, to social revolution, to ecological disaster, to everyday rites of passage—the course illuminates and interrogates the powers and potentials of cultural performance, communal storytelling, ritual praxis, and folkloric “tradition,” in the face of destabilizing change and unprecedented emergence. We'll ask how storytellers revive and revise old stories to confront new challenges, how preexisting expressive forms weather unprecedented socio-cultural storms, how individuals and communities attempt to re-narrate themselves after calamity. What role can storytelling play in transforming relationships, in navigating rites of passage, and in confronting existential and ethical dilemmas? How do folks turn their afflictions into art, how do they make sense of their sufferings, how do they treat their traumas, and rebuild after ruin? What roles can folklore play in reimagining communities, in reconstructing selves, in remaking worlds?

Course work will include analytic and creative assignments, online ethnography, and a semester-long research project which gives you the chance to investigate how "the folklore of emergency" is at work in our world today.

The course format will include:

1.) Synchronous discussions, mini-lectures, and group activities
2.) Asynchronous Slack discussions, film/video screenings, and listening sessions
3.) Independent reading, writing, and research

Folklore & Mythology  168

Magic and Faith in Medieval Medicine (216677)

Joseph Nagy

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

This course explores the ways in which medieval medicine operates at the nexus of science, religion, and magic. Through analyses of medieval literature (medical texts, prose narratives, and poetry) we will seek to better understand how knowledge of the body and healing was preserved and transmitted over time. We explore the role of 'learned medicine,' folk practice, and religion in the medieval concept of healing from an interdisciplinary approach—including folkloristics; economic/urban history; sociology and anthropology of science; gender studies; colonial studies; and cultural history. The major project of the semester will allow each student to develop a writing project centered on aspects of the course that most interest them. A pre-med or potential pre-med student might choose to research and write on medieval herbal medicine in dialogue with modern development of medicines by "Big pharma." A student who is more interested in cultural studies or religious studies might choose to examine the role of environment (urban v. rural), gender, or religious reform in, for example, the healing traditions of the British Isles and Ireland in the years leading up to the Early Modern period. Similarly, someone with an interest in folklore and mythology might explore the oral-traditional background to popular medical remedies of the Middle Ages, and might even
consider the wide-reaching continuity of such traditions, many of which are still relevant today.

Folklore & Mythology  172
Quilts and Quiltmaking (127859)

_Felicity Lufkin_

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15

Are quilts the great American (folk) art? From intricately stitched whole-cloth quilts, to the improvisational patchworks of Gee's Bend; from the graphic simplicity of Amish quilts to the cozy pastels of depression-era quilts; from the Aids Quilt to art quilts; quilts have taken on extraordinary significance in American culture. This class surveys the evolution of quilt-making as a social practice, considering the role of quilts in articulations of gender, ethnic, class and religious identities, and their positions within discourses of domesticity, technology, consumerism, and cultural hierarchy.

Folklore & Mythology  177
Assertive Stitches: Domestic Arts and Public Conflict (205309)

_Felicity Lufkin_

2020 Fall (4 Credits)  Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15

In January 2017, the Pussyhat Project created an effective visual unity for the Women's March on Washington, although the pink hats were also criticized as vulgar, trivial and exclusionary. This is not that first time that needlework has played a central (and controversial) role in political protest: Its associations with femininity and family life have been used to underscore contrasts between domestic morality and public policy, as well as to subvert or confirm gendered notions of decorum and citizenship. In the more recent wave of protests in the US, the role of needlework as such is less obvious, but images of police uniformed in hyper-masculine military gear confronting protesters in t-shirts and summer dresses suggest that public contests of power and morality are always at least partially mediated though (gendered) clothing. At the same time, while volunteer mask-making efforts in response to the Covid-19 crisis are not explicitly political, they were in many cases organized through the same networks that produced the Pussyhats, and mask-wearing itself has been treated as a partisan political expression. This class sets these recent cases of politicized needlework and dress into dialog with broader historical and theoretical discussions of needlework, dress, protest, art and the public performance of gender and race.

Freshman Seminars
Subject: Freshman Seminar

Freshman Seminar 21G
First Stars and Life in the Cosmos (108389)
Abraham Loeb

2021 Spring (4 Credits)  
**Schedule:** M 1200 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

Since the Universe is expanding, it must have been denser in the past. But even before we get all the way back to the Big Bang, there must have been a time when stars like our Sun did not exist because the Universe was denser than they are. Since stars are needed to keep us warm, we face the important question about our origins: how and when did the first stars form? Primitive versions of this question were considered by humans in religious and philosophical texts for thousands of years. The Seminar will summarize the fundamental principles and scientific ideas that are being used to address this question in modern cosmology. Eventually, the formation of stars like the Sun was accompanied by planets like the Earth on which life has emerged. When did life start in the cosmos and when will it all end? The Seminar will describe current plans to search for extraterrestrial life, including project "Starshot" which aims to visit the nearest stars within our lifetime and send close-up photos of their planets.

Freshman Seminar 21V
Black Holes, String Theory and the Fundamental Laws of Nature (109627)
Andrew Strominger

2020 Fall (4 Credits)  
**Schedule:** W 0600 PM - 0800 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

The quest to understand the fundamental laws of nature has been ongoing for centuries. This seminar will assess the current status of this quest. In the first five weeks we will cover the basic pillars of our understanding: Einstein’s theory of general relativity, quantum mechanics and the Standard Model of particle physics. We will then examine the inadequacies and inconsistencies in our current picture, including for example the problem of quantum gravity, the lack of a unified theory of forces, Dirac’s large numbers problem, the cosmological constant problem, Hawking’s black hole information paradox, and the absence of a theory for the origin of the universe. Attempts to address these issues and move beyond our current understanding involve a network of intertwined investigations in string theory, M theory, inflation and non-abelian gauge theories and have drawn inspiration from the study and observation of black holes, gravitational waves and developments in modern mathematics. These forays beyond the edge of our current knowledge will be reviewed and assessed.
Recommended Prep: Prerequisites: High school level calculus and physics.
Requirements: Course open to Freshman Students Only

Freshman Seminar   21W

Research at the Harvard Forest: Global Change Ecology-Forests, Ecosystem Function, the Future (112349)

David Foster
David Orwig

2020 Fall (4 Credits) Schedule: R 0900 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 12

The seminar will consist of weekly discussions led jointly by the instructors and students concerning global change impacts on the New England landscape as explored through diverse studies by Harvard Forest researchers. The readings and discussions will acquaint students with our current knowledge of forest ecosystem structure, function and dynamics, drawing upon state-of-the-art tools, measurements, and studies across New England, including the 4000-acre Harvard Forest. Through discussions, virtual field excursions, and presentations students will become versed in approaches to global change ecology and conservation, the science behind predictions for future conditions, and approaches to utilize natural solutions to mitigate and adapt to these changes. We will broadly address the critical role that forests play in a changing climate, with in-depth discussion on such topics as the history and dynamics of forests due to natural and human processes including the introduction of non-native organisms, the benefits of forests to society across rural to urban settings, and approaches to forest management and conservation. Virtual visits to long-term ecological experiments will help to introduce approaches and infrastructure employed in studying long-term changes in climate and forest ecosystems. Through comparative discussion with leading scientists of findings in the established 15-year-old synthesis volume on the Harvard Forest Long Term Ecological Research program with new research, the students will help to guide directions for a new synthetic book on New England forests and global change.

Student responsibilities will include: completing the wide-ranging background reading; participating in and leading occasional weekly discussions; writing brief perspectives on topics discussed; and preparing a final paper that will be shared with the class and Harvard Forest community through a mini-symposium on the last day of class.

Course Notes: This format is intended to immerse students into an active field research setting and allow extended small group interaction with leading global change scientists. Students will emerge with an understanding and ability to explain to a broad audience the major scientific methods and findings used in evaluating global change.

Requirements: Course open to Freshman Students Only

Freshman Seminar  22I
The Science of Sailing (123658)
Jeremy Bloxham

2020 Fall (4 Credits)  Schedule:  M 0600 PM - 0800 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

Explores the application of simple physics to various natural phenomena associated with sailing. Topics addressed range from hydrostatics (e.g. why do boats float?) to meteorology (e.g. why do sea breezes veer during the afternoon?). Explores in depth the generation of lift and drag by the flow of air over sails and the flow of water over keels and rudders, examining critically the numerous incorrect explanations in the popular literature.

Recommended Prep:  Participants in this seminar should have a good high school physics background and have some knowledge of sailing.

Freshman Seminar  22T
Why We Animals Sing (108564)
Brian Farrell

2021 Spring (4 Credits)  Schedule:  W 0300 PM - 0545 PM
Instructor Permissions:  Instructor  Enrollment Cap:  11

We do not sing alone. On land, four kinds of animals produce songs or calls: birds, frogs, mammals, and insects. Some of these (and fish) also do so underwater. The principal sounds such animal species make are signaling behaviors directly related to mating success. They are of individuals, usually males, marking territories, and wooing mates. However, in any one location, species may also compete with one another for occupation of acoustic space (that is, for bandwidth) and otherwise optimize their sound signals to features of their environment. We will explore these topics and others as we listen to and read about each of the various kinds of singers on earth, the biology of their sound production and reception, and the ways they attract mates while avoiding becoming meals for eavesdropping predators. We will listen to many different kinds of acoustic signalers across a wide array of acoustic communities in tropical and temperate settings, both terrestrial and aquatic, and we will examine sound spectra on a large screen as we listen and slow down and isolate sounds to help distinguish their parts. Finally, we will consider the biology and evolution of music in humans, considering evidence from brain studies, archaeology and anthropology, and the music of indigenous peoples. We will look at music parallels in different kinds in animals of other species. There will be field trips to listen to and record assemblages of local species. The overall objective is to awaken the students’ sense, understanding, and appreciation of the acoustic environment from which we come, and the role of this environment in shaping human biology and culture. There is a fair bit of reading required in preparation for weekly discussions. Accordingly, participation will be expected for discussion of the readings and listening experiences.
Exploring the Infinite (160198)

W. Hugh Woodin

2020 Fall (4 Credits)  Schedule: T 1200 PM - 0200 PM

Instructor Permissions: Instructor  Enrollment Cap: 12

Infinity captivates the imagination. A child stands between two mirrors and sees herself reflected over and over again, smaller and smaller, trailing off to infinity. Does it go on forever? ... Does anything go on forever? Does life go on forever? Does time go on forever? Does the universe go on forever? Is there anything that we can be certain goes on forever? ... It would seem that the counting numbers go on forever, since given any number on can always add one. But is that the extent of forever? Or are there numbers that go beyond that? Are there higher and higher levels of infinity? And, if so, does the totality of all of these levels of infinity itself constitute the highest, most ultimate, level of infinity, the absolutely infinite? In this seminar we will focus on the mathematical infinite. We will start with the so-called "paradoxes of the infinite", paradoxes that have led some to the conclusion that the concept of infinity is incoherent. We will see, however, that what these paradoxes ultimately show is that the infinite is just quite different than the finite and that by being very careful we can sharpen the concept of infinity so that these paradoxes are transformed into surprising discoveries. We will follow the historical development, starting with the work of Cantor at the end of the nineteenth century, and proceeding up to the present. The study of the infinite has blossomed into a beautiful branch of mathematics. We will get a glimpse of this subject, and the many levels of infinity, and we will see that the infinite is even more magnificent than one might ever have imagined.
society and cause great tragedies. The participants in this seminar will examine one Earth-science related science fiction movie each week and discusses features that are real and fictitious based upon our current understanding of the science of disastrous events. Simple math and science concepts are used to test how likely some effects are (e.g., is magnitude 11 earthquake possible and why?), and to understand the underlying science behind these features (e.g., what are the factors that control the size of an earthquake?). If applicable, we discuss how these scientific ideas are exaggerated to dramatize the effects.

Course Notes: Students will be required to watch the assigned movie prior to class.
Recommended Prep: Students must be comfortable with high-school level math and science.
Requirements: Course open to Freshman Students Only

Freshman Seminar  23P

Physics, Math and Puzzles (109319)

C. Vafa

2020 Fall (4 Credits)

Schedule: R 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

Physics is a highly developed branch of science with a broad range of applications. Despite the complexity of the universe the fundamental laws of physics are rather simple, if viewed properly. This seminar will focus on intuitive as well as mathematical underpinnings of some of the fundamental laws of nature. The seminars will use mathematical puzzles to introduce the basic features of physical laws. Main aspects discussed include the role of symmetries as well as the power of modern math, including abstract ideas in topology, in unraveling the mysteries of the universe. Examples are drawn from diverse areas of physics including string theory. The issue of why the universe is so big, as well as its potential explanation is also discussed.

Recommended Prep: This seminar is recommended for students with a strong background in both math and physics and with keen interest in the relation between the two subjects.
Requirements: Course open to Freshman Students Only

Freshman Seminar  23R

Asteroids and Comets (161261)
Comets have been seen regularly since before the beginning of recorded history. They have often been regarded as disturbing portents. Asteroids, on the other hand, were not discovered until the 19th century, with the advent of astronomy with telescopes. Today we know of many more asteroids than comets, but we believe that there are vastly more comets than asteroids in the solar system.

This seminar will start with the history of the study of comets and asteroids, including the "Great March Comet of 1843", observations of which led to the establishment of the Harvard College Observatory and its Great Refractor, at that time the largest telescope in the Americas. Our understanding of comets advanced dramatically in 1950 with the publication of two extraordinary papers: Whipple (then at Harvard) described the mixture of dust and ice that comprises the nuclei of comets, and Oort (Leiden University) showed that new comets enter the inner solar system from a vast, diffuse cloud surrounding the planetary system. Modern telescopes and spacecraft encounters provide us today with a wealth of information about comets and asteroids. We will examine these observations and learn what is known and what is inferred about the origin and structure of asteroids and comets. The students will observe with the Astronomy Laboratory's Clay Telescope on the roof of the Science Center. Students will take on projects, which may involve their own observing program, or which exploit existing data.

Recommended Prep: AP calculus or equivalent.

Requirements: Course open to Freshman Students Only

---

Some claim that there are 13 ideas or principles that can form the bedrock for a pretty good understanding of our physical and technological world. These are:

1) Boltzmann factor and thermal equilibrium, 2) Turbulence, 3) Reaction rates, 4) Indistinguishable particles, 5) Quantum waves, 6) Linearity, 7) Entropy and information, 8) Discharges, ionization, 9) Relativity, 10) Nuclear binding energies, 11) Photon modes, 12) Diffraction, 13) Resonance. Each week we will discuss one of these principles and see how they explain certain things about the physical world. We will discuss these and connections with other principles, as well as how the principle shows up in technology and, more broadly, in our technological society.

Course Notes: The meeting time will be determined according to enrolled students' availability.

Recommended Prep: Please note that this seminar will be geared to students likely to go on in physics or related areas, such as chem/phys or engineering. The introduction to certain principles is done with the expectation that
students will return to a more formal course on the subject in the future. This course acts as a kind of road map for further studies in physics. Topics may change.

Freshman Seminar  24Q

Biology of Symbiosis: From the Deep-Sea to the Human Microbiome (110305)

Colleen Cavanaugh

2020 Fall (4 Credits)  Schedule: W 0300 PM - 0515 PM

Instructor Permissions: Instructor  Enrollment Cap: 12

Symbioses - "living together" with microbes - are ubiquitous in nature, with powerful effects on the physiology, ecology, and evolution of all living organisms. The diversity of symbioses drives biological innovation, challenging us to think about life on earth at a different/new level. This seminar examines the role of symbiosis in ecology and evolution, human health and disease, agriculture, and biotechnology. Ranging from beneficial bacteria to pathogens, microbial symbioses with animals (including the human microbiome), plants, fungi, and protists will be explored through lectures, presentations, and critique of primary research papers. Symbioses will be complemented by firsthand observations via microscopy and field trips to local environs. Every student will have their own microscope!

Location: Online and environments on Harvard campus

Course is planned for Wednesdays, 3:00PM - 5:15PM, but may change depending on student schedules.

Requirements: Course open to Freshman Students Only

Freshman Seminar  26J

The Universe's Hidden Dimensions (121549)

Lisa Randall

2020 Fall (4 Credits)  Schedule: T 1200 PM - 0200 PM

Instructor Permissions: Instructor  Enrollment Cap: 15

This seminar will give an overview and introduction to modern physics and cosmology. As with the books, Warped Passages, Knocking on Heaven's Door, Higgs Discovery, and Dark Matter and the Dinosaurs, on which it will be loosely based, the seminar will consider important developments in physics today and in the last century. We will consider the revolutionary developments of quantum mechanics and general
relativity; and will investigate the key concepts which separated these developments from the physical theories which previously existed. We will then delve into modern particle physics and cosmology and how theory and experiment culminated in the "Standard Model of particle physics" which physicists use today as well as the current cosmological model based on the Big Bang theory and inflation. We will also move beyond the standard theories into more speculative arenas, including supersymmetry, string theory, and theories of extra dimensions of space, as well as ideas about the nature of dark matter. We will consider the motivations underlying these theories, their current status, and how we might hope to test some of the underlying ideas in the near future.

Freshman Seminar 26O

Changing Our Mind: Evolving Thoughts on Brain Regeneration (156449)

Paola Arlotta

2020 Fall (4 Credits)  
Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor  
Enrollment Cap: 12

We will discuss current theories on brain regeneration in a dynamic setting that combines brainstorming of the literature with virtual experiences in the laboratory. Students will learn experiments that have shaped the field of brain repair and consider the newest theories on ways to regenerate the nervous system. We will also virtually visit the laboratory to investigate the regenerative capabilities of different organisms. Experimental results will be used to consider, contrast and evaluate how regenerative capacities have changed during evolution and to brainstorm paths forward towards new solutions for brain regeneration in species, like humans, that have not mastered this art.

Freshman Seminar 30M

California in the 60s (109324)

Kate van Orden

2020 Fall (4 Credits)  
Schedule: T 0600 PM - 0800 PM

Instructor Permissions: Instructor  
Enrollment Cap: 13
This seminar examines American youth culture in the "long" 1960s through the lens of music in California. A range of popular and art music will be considered, from San Francisco psychedelia, L.A. rock-n-roll, surf rock, outlaw country, funk, and the ballads of singer-songwriters to the early minimalism of Steve Reich, Terry Riley, and John Adams. Much of our attention will be concentrated on a few spectacularly influential albums: *The Doors* (the group’s debut album, 1967), Jefferson Airplane’s *Surrealistic Pillow* (1967), an album definitive of the Summer of Love, Sly & the Family Stone’s *Stand!* (1969), and the self-titled *Crosby, Stills & Nash* (1969), an album that turned the tide of pop music away from blues-based rock-n-roll toward acoustic guitars, folk elements, and singing in harmony. Our musical "texts" for the class will be sound recordings, so you will not have to read scores. Come with open ears, an open mind, and a desire to learn from listening. In addition to studying musical genres, performance styles, and the effects of technology (radio, recording, electric instruments), the seminar will delve into the social movements in which music played a crucial role: the Civil Rights Movement, protests against the Vietnam War, the ecology movement, gay liberation, and feminism.

Freshman Seminar  30Q

Death and Immortality (110425)

Cheryl Chen

2020 Fall (4 Credits)  

Schedule: R 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 12

In this seminar, we will discuss philosophical questions about death and immortality. What is death? Is there a moral difference between "brain death" and the irreversible loss of consciousness? Is the classification of a person as dead a moral judgment, or is it an entirely scientific matter? Is death a misfortune to the person who dies? How can death be a misfortune if you are no longer around to experience that misfortune? Is it possible to survive after death? What does it mean for you to survive after your death? Is there such a thing as an immaterial soul distinct from your body? Is immortality something you should want in the first place? Even if you do not live forever, is it nevertheless important that humanity continues to exist after your death? By discussing these questions about death, we will hopefully gain insight about the importance and meaning of life.

What do we really see when we look at a work of art? If we have little experience, we may not get far beyond discerning the theme and ascertaining whether the work is an accurate representation of reality (in the case of representational art); confronted with abstract art, seeing the work may result primarily in confusion or frustrated musing over what the point is. If we have too much experience—the seminar will address what "too much experience" might be and how literal looking relates to it—we may see the work as a function of historical, religious, aesthetic, mythological, and other concerns, or we may get caught in the web of a work's iconography. Either way, our too little or too great experience can prevent us from seeing what is there. This seminar is an exercise in seeing what is actually there in a series of great works of art, in moving beyond too much mystification yet staying this side of too much sophistication, an exercise in evaluating composition and representation as they present themselves to the viewer directly and without context. We will spend most of our time looking and talking about what we think we see, what we actually see, and how it informs interpretation, but we will also read short texts where professionally encumbered lookers (i.e., experts) tell us what we should see, so that we can compare the two and explore the degree to which literal looking aids or is aided by contextually informed looking. Works by Raphael, Caravaggio, Bernini, Velázquez, Turner, Renoir, Sargent, Kandinsky, Bauhaus, Warhol.

Students in this practice-based seminar will experiment with a variety of animation techniques to gain new perspectives on time. Using drawing, we will break down time into frames, understanding movement as both a liquid flow and a sequence of distinct infinitesimals. Using pixilation, a technique from the beginning of cinema, we will analyze and deconstruct human movement, then reassemble it for magical effect. Using strata-cut animation, we will attempt to think of time as a solid, and to visualize the progression of time in terms of volume and shape. Using editing software, we will explore cinematic constructions of time though the use of cutting and juxtaposition. Each session will include screenings, discussion and practical work. There will be practice-based assignments each week. Each student will have the opportunity to make a film of around one minute, using an animation technique of their choice. Or they may decide to collaborate with others to make a longer piece.

Recommended Prep: No previous experience of drawing or animation is required.
Freshman Seminar  33X
Complexity in Works of Art: Ulysses and Hamlet (116807)

Philip Fisher
2020 Fall (4 Credits) Schedule: M 0300 PM - 0500 PM
Instructor Permissions: Instructor Enrollment Cap: 15

Is the complexity, the imperfection, the difficulty of interpretation, the unresolved meaning found in certain great and lasting works of literary art a result of technical experimentation? Or is the source extreme complexity—psychological, metaphysical, or spiritual? Does it result from limits within language, or from language's fit to thought and perception? Do the inherited forms found in literature permit only certain variations within experience to reach lucidity? Is there a distinction in literature between what can be said and what can be read? The members of the seminar will investigate the limits literature faces in giving an account of mind, everyday experience, thought, memory, full character, and situation in time. The seminar will make use of a classic case of difficulty, Shakespeare's Hamlet, and a modern work of unusual complexity and resistance to both interpretation and to simple comfortable reading, Joyce's Ulysses. Reading in exhaustive depth these two works will suggest the range of meanings for terms like complexity, resistance, openness of meaning, and experimentation within form.

Freshman Seminar  34X
Language and Prehistory (117406)

Jay Jasanoff
2020 Fall (4 Credits) Schedule: M 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 12

It was discovered around 1800 that the major languages of Europe, along with the ancient languages of India and Iran, were descended from an unattested parent, formerly known as “Aryan” or “Indo-Germanic,” but today usually called Proto-Indo-European. The identification of the Indo-European family raised many questions, some purely linguistic (e.g., what was Proto-Indo-European like; was it grammatically complex or "primitive"?), and some more far-reaching (e.g., who were the speakers of Proto-Indo-European; why did Indo-European languages spread so widely?). Questions of the first type eventually led to the birth of the
academic field of historical linguistics. Questions of the second type, however, led many nineteenth- and early twentieth-century intellectuals to posit a genetically and culturally superior Aryan "race." This idea is now universally rejected, but evidence from language still figures importantly in specula-tion about the remote past. Recent debates about the origins of "Western civilization," for example, center on the alleged presence of Egyptian elements in Greek, while theories about the settlement of the Americas sometimes cite supposed linguistic connections between the New World and other continents. This seminar, after surveying the basic elements of historical linguistics, will explore the use and misuse of such methods. What, if anything, does the fact that languages are related tell us about their speakers? How can we distinguish genuine cases of language contact or "influence" from the kinds of resemblances that come about through pure chance? Answers to questions like these will be sought through case studies, with readings chosen to illustrate and contrast scholarly and unscholarly approaches. The work for the course will consist of readings, four or five short problem sets, and a final project with both written and oral components.

Freshman Seminar  35E

What is Beauty? (125964)

Francesco Erspamer

2020 Fall (4 Credits)  

Instructor Permissions: Instructor  Enrollment Cap: 12

Schedule: M 1200 PM - 0245 PM

Beauty does not promise or imply the possibility of verification—there will be no comprehensive research and no day of reckoning to finally prove that Leonardo's *Mona Lisa* or Beethoven's *Ninth Symphony* are in fact beautiful. Perhaps this is precisely the reason why we need beauty, and why it is worth studying: because it teaches the contingency of values and the revocability of absolutes. Beauty is a most effective training for tolerance and innovation.

In the early part of the seminar we will analyze Kant's approach to aesthetics. We will then study the evolution of the concept of beauty throughout history, with examples mostly taken from the culture of a country, Italy, that has successfully self-fashioned itself as the land of beauty.

Freshman Seminar  37P

Reading Tolstoy's War and Peace (119150)

Julie A. Buckler

2020 Fall (4 Credits) Schedule: T 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 16

Leo Tolstoy's massive masterwork War and Peace (1865-69) is a magnificent work of art by a world-class writer tackling life's "big questions." It is also a great read! Over the course of a semester, we will give this nineteenth-century novel the time and attention it deserves. We will read War and Peace closely, while comparing two different English-language translations, exploring cultural and historical context, artistic biography, historiography, the novel as a literary form, literary language, issues in translation, interpretive paradigms, and potential new ways of reading. We will trace the changing interpretative approaches to War and Peace from the 1860s to the present. How does the pacing of the novel relate to nineteenth-century reading and publishing practices? To nineteenth-century conceptions of time, space, narrative, and genre? What are the problematic distinctions between history and literature that the novel raises? We will also consider the significance of the Napoleonic wars (1803-1815) in Russian history and the broader pan-European cultural legacy of this period, including literature, art, and architecture.

Course Notes: All readings will be in English.

Freshman Seminar  37U

Bob Dylan (119171)

Richard Thomas

2020 Fall (4 Credits) Schedule: M 0300 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 15

"'Twas a dark day in Dallas." So begins the nearly 17-minute song Bob Dylan delivered on March 27, 2020, a gift to a world in the grip of Covid-19. With its Shakespearean title "Murder Most Foul" is, in part, about the assassination of JFK, and about the music that he and many of us have been listening to across the decades since that day. This seminar will examine Dylan as a musical, literary, and general cultural phenomenon, in the context of high and popular culture of the last 60 years, but also in the context of the much more long-lived poetic, literary, artistic and musical cultures of which he has played so demonstrably a leading role. Dylan has been at the center of popular culture ever since he arrived in New York City on 24 January 1961, from Hibbing MN, by way of Minneapolis, Madison and Chicago; and the longevity of his art defies the validity of the very term popular culture. The seminar will trace the evolution of his songs and lyrics from its early folk, blues, rock and roll, gospel, and protest roots, through the transition from acoustic to electric, also through the many evolutions, reinventions, and innovations that followed—and that continue to emerge. We will also focus on Dylan's frustrations of audience expectation, from the anger evoked by his apparent abandonment of the serious protest and static urban folk traditions, to his apparent embracing of Christianity, to his change in musical arrangement in performance, to attacks focused
on Dylan's "plagiarism" which show a lack of understanding of the vital and original literary process of intertextuality. The seminar will also explore the multiple versions of many of Dylan's songs that show him to be not unlike an oral poet in his ability to re-perform and recreate through performance, in the process often transforming utterly the original lyrics and meanings of his own songs. Attention will be given to the ways in which Dylan's career builds up through periods of evolution and experimentation to productions that can only be called "classics" from a diachronic perspective, among others, *Highway 61 Revisited* (1965), *Blonde on Blonde* (1966), *Blood on the Tracks* (1975), "Love and Theft" (2001), *Modern Times* (2006), *Tempest* (2012), and the bootleg and outtakes from the 1990s to the astonishing *Telltale Signs* (2008) and the highly revealing *The Cutting Edge* (2015) and *More Blood More Tracks* (2018). The seminar will also consider Dylan's role in film, particularly the brilliant commercial failure, *Masked and Anonymous*, from 2003, a work of high allegorical import. We will also look at Todd Haynes' insightful 2007 movie, *I'm Not There*, which captures the essence of some of Dylan's persona creation, even though it initially met with bafflement from many critics. We will also read Dylan's *Chronicles* Volume 1, itself a work of genius, a sprawling Dylan prose song posing as an autobiography.

Freshman Seminar  38X

*Work: an Audio/Visual Exploration (107839)*

*Robb Moss*

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 10

A video and audio production course, the class explores the nature, contours, and experience of working people in the City of Cambridge. Film screenings, readings, and journal writing augment the central activity of the class, which is to find aural and visual ways to expressively explore a range of work-experiences.

Course Notes: The seminar will be held for 3 hours. Labs will meet occasionally for 1 hour after the regular class time. No previous production experience is necessary to take this class, and the class can be considered a gateway course for admission into the Department of Visual and Environment.

Freshman Seminar   40E
Law and Society through the Cinematic Frame (160785)

Ofrit Liviatan

2021 Spring (4 Credits) Schedule: M 0345 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 12

In this seminar, we will explore the interaction of law and society using the lens of film. The cinematic experience has become a key site through which the public understanding of law is produced, debated, and influenced. Driven first and foremost by market and audience considerations, law-related films often inject drama, contentious dimensions, and even misrepresentations into the portrayal of real events. Nonetheless, by raising awareness about legal themes that pervade the plot, these films offer valuable insights toward discovering social scientific perspectives on the manner in which law functions in everyday life. Hence, the seminar will not focus on legal doctrine or teach you the fundamentals of the legal profession. Rather, using films and socio-legal scholarship as frameworks for discussion, we will study law's working in relation to the social, political, economic, and cultural environments in which it operates. Central thematic topics to be discussed include: the relationship between law, justice, and morality; how does law intervene in social relations and whether it is over-utilized as part of these relations; the dynamics between law and social change; is access to the legal process equal to everyone; and the function of law in deeply divided societies.

Course Notes: Film viewing will occur outside class as part of your weekly preparation for the seminar.

Freshman Seminar   40J
Advice to Young Leaders (127970)

David Armitage

2020 Fall (4 Credits) Schedule: W 1245 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 12

Our current crisis has starkly exposed the strengths and weaknesses of leaders around the world and in local communities. Meanwhile, questions of leadership will be front and center as we head towards November's elections in the US. What makes a good leader has been subject to debate for at least two thousand years, especially in the many classic works of political and ethical theory in the western tradition that were written for young people about to enter public service or positions of authority. This Freshman Seminar introduces students to a selection of these texts of advice and encouragement, among them works by Plato, Aristotle, Cicero, Machiavelli, William James, Max Weber, and Virginia Woolf, that might speak to their own ambitions and interests. It will show how to treat such works historically, in their own terms and their own contexts, while also
applying them to contemporary concerns and dilemmas. The overarching aim of the class is for students to think rigorously about their own imminent responsibilities as citizens and leaders by reflecting on arguments addressed to similar rising generations in the past, from 5th-century Athens to Harvard's first online Commencement in May 2020.

America's $4 Trillion Challenge: Boosting Health Care Productivity and Broadening Access (109334)

*Alan Garber*

2021 Spring (4 Credits)  

**Schedule:**  
TBD

**Instructor Permissions:**  
Instructor  
Enrollment Cap: 12

"Why does health care cost so much?" Policymakers, employers, and the public share deep frustration at high health expenditures, which are blamed for rising federal deficits, the declining competitiveness of US businesses, and the risk of financial ruin for individuals unfortunate enough to suffer a costly illness or injury. Unless health expenditures can be controlled, universal access to care is likely to remain an unattainable goal in the United States. In this seminar, we will explore the causes and consequences of the high costs of care and the range of approaches to increasing the productivity of health care. The Affordable Care Act and alternative health reform options will be critically examined for their effects on health care productivity. Students will be exposed to techniques for measuring the effectiveness and value of health care, and will become familiar with economic and clinical studies. Students will be asked to produce a mid-term outline and final paper on solutions for improving health care productivity in the US.

**Recommended Prep:**  Background in microeconomics at the level of first-semester Economics 10 is required. Knowledge of AP-level statistics is desirable. The course is relevant to anyone with an interest in applied economics, public policy, health care, or public health.

**Requirements:**  
Course open to Freshman Students Only

Making the Grade? Middle and High School Math Education in the U.S. (109469)

*Robin Gottlieb*

2021 Spring (4 Credits)  

**Schedule:**  
W 0300 PM - 0500 PM
Instructor Permissions: Instructor  Enrollment Cap: 12

What are the goals of mathematics education at the middle and high school level, and how do these goals impact our evaluation of the success or failure of math education in America? Why does math education at these levels matter? What societal structures (historic, economic, political, cultural) impact mathematics education? How does math education in turn impact societal structures? As the world changes, how do the goals of mathematics education change, and in what ways? We will explore these issues to become more educated participants in this ongoing discussion.

Course Notes: A special invitation is extended to students not planning to concentrate in math.

Requirements: Course open to Freshman Students Only

Freshman Seminar  40X

Challenges to the International Monetary and Financial System in Historical Perspective (109472)

Kenneth Rogoff

2020 Fall (4 Credits)  Schedule: T 0900 AM - 1100 AM

Instructor Permissions: Instructor  Enrollment Cap: 12

This seminar explores contemporary debates on the future of the international monetary and financial system drawing on both historical and recent experiences. Topics will include understanding the underpinning and aftermath of sovereign defaults, financial crises and high inflation over history, with particular emphasis on the Great Depression of the 1930s, the Great Inflation of the 1970s, and the Great Recession in the twenty-first century.

Recommended Prep: The seminar does not require any background in economics.

Requirements: Course open to Freshman Students Only

Freshman Seminar  41P

American Presidential Campaigns and Elections 1960-2020 (124777)

Maxine Isaacs

2020 Fall (4 Credits)  Schedule: R 1200 PM - 0230 PM

Instructor Permissions: Instructor  Enrollment Cap: 16
For two hours each week, students will work to understand the history, forces and politics of American presidential campaigns and elections. Each student will be "responsible" for one presidential election between 1960 and 2016, and, together, members of the seminar will develop some perspective on dramatic changes as well as enduring factors that have shaped our own times, issues and society. With the help of some guests – practitioners including political leaders, public opinion analysts and journalists – students will develop a deeper understanding of contemporary politics; the impact of demographic patterns and changes; public opinion and polling; and political communication. Students will learn about the relationship among politics, news and public opinion, and who influences whom. Participants will be introduced to excellent contemporary studies about modern presidential campaigns and elections. At the end of the term, students will make oral reports to the class on lessons learned from a past election which can help all of us better understand this one.

Requirements: Course open to Freshman Students Only

Freshman Seminar  41U

Museums (156182)

James Hanken

2021 Spring (4 Credits)   Schedule: TBD
Instructor Permissions: Instructor   Enrollment Cap: 12

What are museums? Where did they come from? What exactly do they do, and why? Do they have a future? This seminar will trace the history of museums from their beginnings centuries ago as personal collections maintained by private (wealthy) individuals to the modern institutions of today. We will consider not only the objects maintained in museums and their conservation, but also the role of museums in contemporary society, financial considerations associated with their successful operation, their dual— and sometimes conflicting—functions of scholarly research and public display, the mechanics and psychology of exhibit design, legal and ethical issues of collecting and acquisition, and challenges confronting museums and how they likely will fare in the future. The seminar's focus will range from large art, archaeological, and natural history museums to smaller and more specialized institutions that focus on particular cultural, scientific, artistic, and engineering artifacts. Weekly class meetings will include both discussion sessions and field trips to museums and libraries at Harvard. During these trips we will view public exhibits and gain access to "behind-the-scenes" collections and scholar/staff work areas that the public rarely sees. One weekend-day optional field trip to a museum outside Boston may be included as well, depending on student interest.

Requirements: Course open to Freshman Students Only

Burning fossil fuels has powered 150 years of unprecedented economic growth but has also left a legacy of ever-increasing concentrations of carbon dioxide and other greenhouse gases. Those gases are changing our climate and thereby endangering human health, human welfare, and the earth's ecosystems. To avoid the worst of those consequences requires decarbonizing the energy sector, but that task is massive and will require effective and efficient climate policy. Recently, U.S. energy and climate policy has been subject to wild swings, as Obama-era regulatory and subsidy policies designed to shift from fossil fuels to renewables have been replaced under the Trump administration by policies to promote and subsidize fossil fuel use and production and, now, some Democrats have proposed a Green New Deal. This seminar examines U.S. climate policy from both economic and technological perspectives. The seminar starts with a review of the U.S. energy sector, climate science, and climate economics. The seminar then dives into current policy issues, including carbon pricing, the regulation of CO2 emissions from fossil-fuel fired power plants, the keep-it-in-the-ground movement, policies to promote new green technologies, and the Green New Deal. The seminar also examines subnational (state and local) and international climate policies.

Recommended Prep: The seminar uses a mix of economic, legal, and technological/engineering tools, and the mix of students would ideally reflect this mix of backgrounds.

Requirements: Course open to Freshman Students Only

The disparate impact of the COVID-19 pandemic has highlighted for all to see the dramatic inequities and entrenched human rights violations that continue to plague human societies. Extreme poverty, especially among communities of color, is sky rocketing, refugees and other forced migrants are blocked from seeking life-saving protection, domestic violence is soaring. Despite over half a century of international law making and domestic enactment of human rights treaties, and despite a vibrant civil society that has embraced human rights principles world-wide, class privilege, structural racism, gender and caste differences, xenophobia and skewed trading and taxation policies persist. They militate against a level playing field when it comes to access to fundamental human rights such as the rights to non-discrimination, to life and to health.
Thus, though human rights have become a global lingua franca, invoked by leaders and movements across the political, religious and cultural spectrum, their efficacy is at best partial and flawed in most countries, including throughout the Global South. Remedies for violations such as deprivation of an adequate standard of living and the extreme poverty that accompanies it, slavery and colonization and their enduring 21st century legacy, and racialized and gendered forms of structural violence have proven elusive. This seminar will focus on the Global South, including populations from the global South seeking protection elsewhere, to address key issues in contemporary human rights theory and practice. Members of the seminar will first study the philosophical and political traditions that led to codification of human rights. The seminar will then cover the legal frameworks of contemporary international human rights law and examine how their relevance to some of the most egregious human rights violations of the current period. Case studies of pivotal controversies, including the failure to address extreme poverty, the question of reparations for slavery or colonization, solutions to forced (including climate-induced) migration and gender-based violence will be explored and discussed.

Freshman Seminar  43J

The Economist's View of the World (108562)

N. Mankiw

2021 Spring (4 Credits)  Schedule: T 0900 AM - 1130 AM

Instructor Permissions: Instructor  Enrollment Cap: 12

This seminar probes how economic thinkers from the right and left view human behavior and the proper role of government in society. Each week, seminar participants read and discuss a brief, nontechnical, policy-oriented book by a prominent economist. There will also be required writing assignments. Students must have some background in economics, such as an AP economics course in high school or simultaneous enrollment in Economics 10.

Recommended Prep: Students are expected to have had some background in economics, such as an AP economics course in high school or simultaneous enrollment in Economics 10a.

Requirements: Course open to Freshman Students Only

Freshman Seminar  43W
History, Nationalism, and the World: the Case of Korea (108515)
Sun Joo Kim
2020 Fall (4 Credits)  Schedule:  M 0300 PM - 0530 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

The colonialism and postcolonial division of Korea into North and South thrust the memory of past events into current political discussions as well as scholarly debates. This seminar investigates selected events in Korean history to map the interaction between historical writing and politics and to address questions such as why historians have emphasized certain periods and aspects of Korean history while ignoring others. All readings will be in English.

Freshman Seminar  49G
The Holocaust in History, Literature, and Film (119999)
Kevin Madigan
2020 Fall (4 Credits)  Schedule:  T 0945 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  16

This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce freshmen to the use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. Here the seminar will use literary and cinematic resources as well as discursive theological ones. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. The seminar will conclude with an assessment of the role played by the Holocaust in today’s world, specifically in the United States. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.

Freshman Seminar  50H
The Biology of Movement (203243)
Andrew Biewener
2020 Fall (4 Credits) Schedule: W 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 15

Movement is a fundamental property of life that underlies many biological functions, ranging from collecting or catching food, predator escape, dispersal of offspring, mating and reproduction, to migration, social interaction, sport, and artistic expression. This seminar will explore why and how organisms move, providing an overview of the biological motors animals and microbes use to power movement, and mechanisms plant use for growth and geo-/photo-taxis. The seminar will survey historical photographic and modern filming approaches; examine how movement is depicted in art and evoked in dance; how movement shapes perception and cognitive interpretation; and how and why movement plays a central role health and disease. The broader relevance of movement to the humanities and social sciences will therefore be examined. Students will be introduced to a variety of filming methods, allowing them to explore how movement is studied, and will learn how to quantify movement patterns to inquire and gain insight into their functional significance. Students will actively participate by video-recording observed movements of interest, exploring their functional relevance to terrestrial locomotion, swimming, flying, dance, athletics, and cognition as well as plant movement. This seminar will include ‘field trips’ to Harvard Museums and Libraries, a dance studio and the Concord Field Station. Students will read general articles and share weekly video recordings throughout the term. Students will complete a course project based on a video-kinematic analysis of movement highlighting its biological, social and/or artistic significance; or by writing a final paper that examines in-depth some aspect of the biology of movement.

Freshman Seminar  51C
Science in the Age of Artificial Intelligence (207514)
Brendan Meade
2020 Fall (4 Credits) Schedule: M 0300 PM - 0500 PM
Instructor Permissions: Instructor Enrollment Cap: 12

Science is focused on discovering and explaining the world around and within us. This has been its goal for hundreds of years and has produced astonishing breakthroughs from population genetics, to general relativity, to plate tectonics. Artificial intelligence is touted as a tool for learning about a complex systems in ways that humans can't and has seen exceptional progress in natural language processing and image identification. In this class we explore the emerging linkages between scientific inquiry and artificial intelligence. The central goal of this class is to question the classical role of the scientist as a creator of
theories and consider how scientists may become interpreters of theories developed by AI. We do this by developing an understanding of how AI systems actually work (they're astonishingly simple), explain recent success cases, and then consider how we may (or may) not rebuild science in an AI-first manner. Examples with be drawn from the earth and planetary sciences as well as the life sciences.

Recommended Prep: High school calculus and/or computer programming would be extremely useful.

Freshman Seminar  51F

Understanding the Seemingly Impossible: A Revolution in Biology (207834)

Craig Hunter

2020 Fall (4 Credits)  
Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor  
Enrollment Cap: 12

Occasionally a scientific discovery is so unexpected that it is seemingly unexplainable. This seminar will revisit one such event, the discovery of RNA interference and how modern experimental molecular genetics cracked this "problem" and started a billion-dollar industry. Rare unexpected discoveries in biology, for example catalytic RNAs, instantly extend and broaden our understanding of the world, while the impact of other discoveries (split genes, hopping genes) are more gradual. However, some discoveries challenge firmly supported ideas. The initial description of RNA interference (RNAi) was seemingly magical—the introduction of a RNA molecule matching the sequence of any gene, results in the effective silencing (turning off) of the gene. Further, the silencing signal(s) were extremely potent and mobile, moving between cells, tissues, and generations. A series of seminal discoveries during an amazing four-year period revealed the previously unimagined process. We will read and talk about how these discoveries were made and how this unexpected new biology launched new therapeutic companies and is informing developing ideas about heritability, adaptation, and evolution.

Freshman Seminar  51H

Models of the World: Explaining the Past and Predicting the Future (207799)
This freshmen seminar explains the concept and practice of social and natural science modeling. The seminar will address four fundamental questions: (1) What is a model? (2) How are models related to data? (3) How are models used to explain and predict events in the world, including counterfactuals (i.e., what would happen if we conducted military campaigns differently)? (4) How do models evolve over time? The seminar answers these questions with numerous case studies from the fields of astronomy, biology, computer science, economics, mathematics, and physics. For example, we'll see that natural science models have (unintentionally) challenged fundamental social and religious beliefs, like the geocentric view of the universe and the origin of species. We'll also show how models have been used to measure social phenomena, like the pursuit of instant gratification. We'll also explore the origins and trajectory of a new class of powerful, data-driven models that are emerging in the field of machine learning.

**Recommended Prep:** High school-level algebra and geometry. No knowledge of model-building is required.

**Requirements:** Course open to Freshman Students Only

**Freshman Seminar  51M Section: 01**

Skin, Our Largest, Hottest, and Coolest Organ: From Cancer to Cosmetics (207776)

*David Fisher*

Skin provides a protective barrier that is vital to survival of all multicellular organisms. Its physical properties have been exploited for centuries, from clothing to footballs, and yet skin is a vibrant and dynamic organ that responds to environmental signals in myriad ways. Skin protects humans from toxic exposures, but can also be an intrinsic source of dangerous diseases. While its defects only rarely kill humans, its imperfections can cause misery and discomfort, ranging from subtle annoyances to depression and loss of self-esteem. It is a source of immense pleasure or excruciating pain. This seminar will provide a series of exposures at an introductory level, to distinct topics in skin biology. They will exemplify the diverse and vibrant nature of cutaneous networks and signals, through the lens of commonly recognized topics such as tanning, hair, sweat, cancer, cosmetics, cancer, and infections.

**Recommended Prep:** None. Prior AP-Biology may be helpful but not required.

**Requirements:** Course open to Freshman Students Only

Freshman Seminar   51N
The Secrets of Stradivarius or What Makes the Violin Sound Beautiful? (212694)

Philippe Cluzel

2020 Fall (4 Credits)  Schedule:  W 1200 PM - 0200 PM
Instructor Permissions:  Instructor  Enrollment Cap:  8

This is an exploratory seminar that draws concepts from many different fields ranging from music to evolution, machine learning, physics, biology, wood carving, and neuro-aesthetics. The goal of the seminar is to discuss the different concepts needed to understand the design of a violin and to propose new methods and technology to improve the quality of the sound it produces. Students will spend most of their time developing hands-on experiments whose final goal will be to transform low-cost violins into beautiful-sounding instruments using the ideas developed through the readings.

Recommended Prep:  Students are not expected to know any of the concepts and tools used in class, but in view of the highly interdisciplinary nature of the project, the ideal class would comprise individuals with a strong interest in EITHER architecture, computer science, physics, biology, music, or an affinity with hand tools and tinkering. There will be no cost to students.

Requirements:  Course open to Freshman Students Only

Freshman Seminar   51S
Natural History Museums and the Anthropocene (216084)

Charles Davis

2020 Fall (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  12

Natural history museums have inspired us for centuries and represent our best resources for understanding nature. They have been central to the development of countless scientific principles, including the theory of evolution itself. Yet the more inward facing missions of a museum are unfamiliar and the collections that sustain these efforts are vast and remain largely invisible. These institutions, however, have assumed a renewed relevance in the modern era of global change, especially as millions of artifacts are being mobilized online and facilitating a revolution in museum-based science. Here, we take a behind-the-scenes look into natural history museums over the course of the semester, including their organization, care, public outreach, and centrality to science. We will then explore the variety of ways in which new life is being breathed into museums to understand the geological era of the Anthropocene. Central to our learning will be weekly exploration and engagement with Harvard's Natural History Museums and more broadly via a host of vast, curated online collections. Students will also engage directly with this subject through self-directed field exploration of nature guided by cutting-edge resources and tools developed for this purpose. The capstone project will be a collaborative effort to devise a museum exhibit that unites major themes of the term.
Freshman Seminar  51T

The Universe: Its Origin, Evolution, and Major Puzzles (216086)

Cora Dvorkin

2021 Spring (4 Credits)  
Schedule:  
T 0945 AM - 1145 AM
Instructor Permissions:  
Enrollment Cap:  
12

This seminar will lead you on a tour of Cosmology and its open questions: how were the first structures of the universe seeded? What is dark matter? What is dark energy? We will study the universe since the very first tiny fraction of a second after the Big Bang and its subsequent evolution. We will delve into its composition at large scales, and existing theories explaining its main components: dark matter and dark energy. We will learn about a wide variety of observations that are obtained and analyzed by different experiments around the world in order to make progress in our understanding of the cosmos. We will also study how these data sets are currently analyzed and debate about possible ways of moving forward in the times of "Big Data". Finally, we will discuss how the scientific method is used in cosmology, where we only have one experiment: our universe.

Recommended Prep:  
High school level math and physics. Non-scientists are welcome.

Freshman Seminar  51U

Insurrection in a Little Kingdom—The Real Story of the Standard Model of Particle Physics (216087)

Howard Georgi

2021 Spring (4 Credits)  
Schedule:  
TBD
Instructor Permissions:  
Enrollment Cap:  
12

At the end of the 1960s, particle physics was in a very chaotic state. There were experiments producing apparently conflicting data that were as confusing to the theorists as they were to the experimenters themselves. There were dramatically different theoretical approaches, none of which were convincing or even thoroughly understood. Less than 10 years later, we could put the standard model on a t-shirt and we
had a very plausible guess for how the pieces fit together into a unified theory of particle interactions. I had the great good fortune to participate in this remarkable decade of particle physics, so I know what really went on, not just what has been recorded in the history books. My hope for this seminar is three-fold. I want to try to explain what happened and why to a diverse group of students in a way that preserves the flavor of the physics without getting lost in technical details. This is a difficult task and I hope to get help and insight from the students in the seminar. I want to look at some of the Scientific-American-level attempts by physicists to explain what they were doing as they were doing it. I believe that scientists must do a better job of this kind of outreach, and again I hope to learn a lot from the students about how to do it better. Finally, and perhaps most importantly, I want to try to expose the amazing diversity of thought that went into this mini-revolution.

One of my great joys in this period was that I got to know and often collaborate with many of the giants of late-twentieth-century physics. The people watching was almost as much fun as the physics. From this personal study, I concluded that there are many ways of being a great physicist—probably as many different ways as there are great physicists. This suggests that there are more ways of being a great physicist that we have not seen yet.

Recommended Prep: Background in physics is not required, but curiosity about physics and physicists is important! The assignments will be mostly short essays and in-class presentations on the readings with a few algebra level calculational problems.

Physics of Measurements: Experimental Science (215847)

Philip Kim

2020 Fall (4 Credits)  

Schedule:  

W 1200 PM - 0245 PM

Instructor Permissions: Instructor  

Enrollment Cap: 12

Measurement, a procedure to acquire a quantitative description of our surroundings, has been an essential part of scientific and engineering research. Often, new scientific breakthroughs rely on the development of new measurement methodology. A notable example in the recent development of quantum computing relies on the uncertainty of the measurement procedure in quantum systems. Conversely, new ideas and applications can be formulated by the precise and accurate measurement of physical quantities. In this seminar, we will discuss various aspects of physics-related measurement procedures, focusing on several key elements of measurement, such as quantification, accuracy, precision, units, estimation, and error evaluation. We will discuss key concepts behind measurement procedures, including Einstein’s relativity, quantum physics, and statistical physics. Examples are drawn from historical, scientific events, our daily life, and current topics of research.

Recommended Prep: This seminar will target to students who are interested in quantitative science or engineering. We assume a high school level of mathematics and physics knowledge

Freshman Seminar 51W

Science Not Silence: Censorship and Secrecy from Copernicus to Climate Crisis (215848)

Hannah Marcus

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 12

In April 2017, over a million people around the globe took to the streets to defend science in the face of declining public attention to scientific knowledge and increasing governmental neglect of scientific research. This seminar explores how and why religious, political, and social authorities try to control scientific knowledge. From the avian flu to 3-D printed weapons and from Galileo to the Guatemala syphilis experiments, we will wrestle with difficult questions like: Who speaks for science? Who decides what we know and how we recognize truth? How do societies create scientific ignorance? How have answers to these questions changed over time? And what does it mean to stake your life and reputation on the defense of scientific knowledge? In this seminar, we will investigate these questions using tools and tactics from the history of science. Focusing in particular on questions of censorship and secrecy from the Renaissance to the present, we will discuss groundbreaking social science scholarship, explore censored objects in the Harvard Libraries, visit local and national archives, and bring insights from the past to bear on our contemporary world. This seminar is designed to question how we know the world around us and illuminate the forces that stand between us and knowing more.

Freshman Seminar 51X

Changing Perspectives: the Science of Optics in the Visual Arts (215849)

Aravinthan Samuel

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 8

Renaissance artists developed many techniques to create stunningly realistic representations of the natural world. From a two-dimensional visual image on the retina, the human brain effortlessly comprehends its three-dimensional surroundings. But faithfully transferring three-dimensional information to a canvas—a sense of depth, the play of light on surface and shadow, proper geometrical perspective—is remarkably hard to do. Here, we will discuss how Renaissance artists including Leonardo da Vinci, Rembrandt, and Vermeer might have used ideas from optics to enhance the accuracy of their artistry. We will consider how devices like pinhole cameras, mirrors, and lenses might have helped Old Masters see more deeply and create images more faithfully. We will build and use versions of such devices to create our own drawings and paintings. We will look closely at selected masterpieces to assess whether or how tools were used. Optical science will be learned, tested, and put into practice in the studio with paint and pencil.

Course Notes: This seminar is recommended for students with interests in science and art. There will be an exhibition of the works created by the
students at the end of the term.

<th>Enrollment Cap:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Instructor</td>
<td>15</td>
</tr>
</tbody>
</table>

Schedule:  

R 0300 PM - 0500 PM  

Big changes are coming to the way we generate our electricity, with renewables like wind and solar displacing fossil fuels for both environmental and economic reasons. A future of carbon-free electricity is possible, but by no means inevitable. What will it take to get there? The transition away from carbon presents technical challenges related to generation, transmission, and storage. There are also human challenges ranging from dislocation in the workforce to political resistance. A profound reshaping of a trillion-dollar industry is daunting. In this seminar students will review how we currently generate electricity, learn about the underlying technologies, and assess the strengths and weaknesses of each. We will study grid stability and the effects of wind and solar intermittency, and evaluate the possibility of mass storage. We will look at policy, both in terms of incentive structures that encourage renewables, but also policy that protects all the stakeholders, including workers in the energy industry. The science around global climate change is not the focus of this seminar, but we will spend one session studying the views of a climate optimist (physicist Will Happer) and their shortcomings, illuminating some of the political fault lines of this complex issue. We will also consider how energy generation intersects the water crisis, which increasingly threatens prosperity and stability in some parts of the world.

Recommended Prep: Prerequisites: High-school physics and trigonometry. Non-scientists are welcome!

<td>14</td>
</tr>
</tbody>
</table>

Schedule:  

M 0300 PM - 0545 PM  

Have you hugged a tree lately? How about grown one? Photographed one? Drawn one? Written about one? Imagine a semester devoted to connecting two organisms: a person (you) and a tree (not you). Interacting with a single tree, you will explore its individual history, evolutionary history, life cycle, leaves, bark, roots, flowers, cones, and architecture.
In an age of environmental destruction and outright murder of our biological brethren, there is something deeply troubling about humanity's relationship with nature. Technology has left us with mere facsimiles of nature - pixilated abstractions of biodiversity through satellite imagery, decoded strings of DNA – and we, as a species, have become fundamentally disconnected from actual nature and the magnificent organisms with which we share the earth. In this seminar, we will work to understand and give agency to trees as individual organisms, literally rooted in the ground, and evolutionarily rooted in deep time. Topics to be covered include the evolutionary origin of arborescence, human relationships with non-sentient organisms, the case for legal rights for natural objects, reading a twig, the unseen world of roots, and finding human meaning in the longevity in trees. Each student will also work with an individual tree in the living collections of the Arnold Arboretum of Harvard University and observe (see) this organism throughout the entire semester through the creation of images (photography, drawing), journaling, and other forms of representation. The goal of this freshman seminar will be to initiate a personal and lifelong connection with the "other," the vast and variant organisms with which we share the planet.

Freshman Seminar  52D
Quantum Entanglement and the Second Quantum Revolution (216103)

Ashvin Vishwanath

2020 Fall (4 Credits)  

In his final attack on quantum physics, Albert Einstein identified a property of the theory that he found so strange that he termed it "spooky". Decades later, numerous experiments have shown that nature behaves in exactly the strange way predicted by quantum mechanics, and the essential ingredient for this astonishing behavior is mainly what we now call quantum entanglement—a powerful but highly fragile resource with important applications. This has triggered a surge of recent interest, perhaps even a "second quantum revolution", and a race to develop technologies that benefit from quantum entanglement. Proposed applications range from secure quantum communication and cryptography, to the holy grail—an all-purpose quantum computer. Evaluating the potential and timescale for these technologies has been especially hard. Few people in industry possess the necessary quantum background to make a reasoned evaluation. In this seminar we will approach fundamental concepts in quantum mechanics, using only simple mathematics and demonstrations to convey its unfamiliar logic. We will then survey the "first quantum revolution" which led to the transistor and nuclear technology as a previous example of quantum applications. Finally, we will have an open-ended conversation on modern quantum technologies, with guest speakers from both academia and industry. The seminar deliverables will be a final essay with two parts, the first part reviewing an existing application, the second part on the future of quantum technologies which you will compose combining your newly acquired scientific insight with more practical, economic and sociological considerations.

Recommended Prep:  
This seminar has some, but not a very high, background knowledge requirement—some knowledge of probability, linear algebra at the level of vectors and matrices. Target audience, apart from those interested in the physical sciences, includes prospective engineers & perhaps students interested in economics or business.
We live in a world that is shaped by science and technology. As a modern citizen who will lead the U.S. and the world in the coming generation, we should be cognizant of the rapidly changing landscape of science and technology and be ready to be active participants in the decision-making processes for deploying these life-changing developments to masses. In this Freshman Seminar, we will learn and debate contemporary topics that we encounter every day and use them as motivating examples to learn many of the underlying science, math, and engineering principles. Some of the issues that we will discuss include, but are not limited to, the prosecutor’s fallacy, coronavirus pandemic, climate change, information technology, quantum technology, genomics revolution, and brain-machine interfaces. Through these discussions, we will learn basic concepts in statistics, Bayesian logic, thermodynamics, quantum mechanics, information science, genetic engineering, and nano-bio interfaces. In this Seminar course, the students will be required to give presentations to peers and participate in discussions and debates. The Seminar is for first-year students who plan to concentrate in humanities and social sciences and is not intended for students majoring in STEM areas.

We know that genes, traditionally defined as DNA encoding protein, only account for two percent of the entire human genome. What is the purpose of the remaining 98% of the genome? Is it simply "junk DNA"? This seminar will explore the large portion of our genome that has been neglected by scientists for many years because its purpose was not known. Each week, through assigned reading material and in-class discussion, we will explore the diverse roles of the non-coding genome in fundamental biological processes, such as sex determination and aging. We will examine research findings which show that non-
coding sequences, previously assigned as "junk DNA", play crucial roles in the development and maintenance of a healthy organism. We will also discuss how non-coding sequences are promising targets for drug design and disease diagnosis. Finally, we will visit a local pharmaceutical company to engage with active scientists about their scientific research. The broader learning goals are to develop a curiosity about genetics and biology, to critically evaluate research findings that contradict the current dogma, and to appreciate that many scientific discoveries are yet to come. A thorough understanding of the human genome not only provides a foundation for any student interested in the life sciences, it enables one to engage more deeply in related political and societal debates, which is expected to become even more central as scientists further uncover the dark matter of our genomes.

Recommended Prep: This seminar is recommended for students with a basic background in biology and genetics (high school equivalent), but more importantly, with a keen interest in learning about how our genome works and the consequences of it not working correctly.

Freshman Seminar 52H

The Interaction of Light with the World (216109)

Melissa Franklin

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: Instructor  Enrollment Cap: 12

The interaction of light with matter dominates both our sensory and scientific understanding of the world. The way the sunlight scatters from atoms in the atmosphere to shine on objects so that we can see them, for instance. This interaction is deeply rooted in quantum mechanics, and requires a good understanding of the atom which we will develop with very, very few equations. We will read from essays of physicists who built the theory of quantum mechanics about the atom. These essays give a real sense of the way these scientists thought. We will include readings from more recent essays by scientists concerning the way we...
use light, for instance, to understand quantum entanglement for use in quantum computers. Although we will include current understanding of the interaction of light with matter, at least half of the seminar will focus on understanding simple phenomena. This is a seminar largely based on readings and physical demonstrations of phenomena. There will be at least 5 demonstrations per class. If online classes continue into the fall the demonstrations would be videos, or possibly with our demo expert doing the demos in real time so that the students can interact by asking him to change parameters or settings.

Recommended Prep: This seminar is open to all. No prerequisites needed. As usual, we follow the Harvard College honor code. In this class you are encouraged to work together, but it is important that you hand in your own work.

Freshman Seminar  52l

Science and Engineering for Managing COVID-19 (216661)

Michael P. Brenner

Evelyn Hu

2020 Fall (4 Credits) Schedule: M 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 14

Our lives have been disrupted by the Covid19 pandemic. Important decisions that influence public policy and constrain personal behavior depend on the accuracy of forecasting future outbreaks, our ability to reliably test for the presence of the virus, and the efficacy of mitigation measures like wearing masks as a means of controlling the spread of infection. This seminar will examine the scientific and engineering basis at the heart of the policies that have been enacted to manage COVID at the level of countries and communities. The class will be organized around three major topics:

1. Predicting the future course of the epidemic: globally and locally
2. Monitoring technologies: how can we monitor and quantify viral transmission?
3. Mitigations: Masks, handwashing, living restrictions (de-densification) and so forth.

We will study the theory and the experiments behind the decisions and mitigations that have been made, including the strengths and weaknesses of the arguments. The first half of the semester will give background and tools to expose the major issues. In the second half of the semester, students will carry out team-based, experimental projects to explore some aspect or issues themselves. Our vision is that in the projects students will study an issue or set of issues affecting our community at Harvard. Depending on how the pandemic progresses, recommendations from the projects could inform decisions makers for the Spring term.

The 14 students enrolled in this Freshman Seminar will meet collectively for two hours a week with a companion class, Engineering Sciences 20r, of 14 upperclass students. For team projects, there will be 7 teams of 4 people, with each team having two freshman and two upperclass students.

Class Notes: Course is open to Freshman Students only.
Freshman Seminar   60K

The Grail Quest of Marcel Proust (203268)

*Virginie Greene*

2020 Fall (4 Credits)  Schedule:  MW 1030 AM - 1145 AM

**Instructor Permissions:**  Instructor  **Enrollment Cap:**  12

This seminar is an introduction to literature, the visual arts, the Harvard campus, and the Boston area.

We will read entirely Chrétien de Troyes' Tale of the Grail (c. 1190), and excerpts of Marcel Proust's *In Search of Lost Time* (1913-1922). Students will be invited to reflect on young Perceval's adventures coming to Camelot, young Marcel's efforts entering elite Parisian circles, and their own experience of "coming to Harvard," whether physically or remotely. Taking advantages of Harvard and the Boston area art resources, we will focus on the visual aspects of the stories and the art works they inspired (such as the 1895 Edwin Austin Abbey wall paintings at the Boston Public Library), or describe (such as the Fogg Museum Gustave Moreau painting mentioned by Proust).

In its two previous iterations, the seminar was designed on the model of a quest, each class being held in a different location on campus and in the Boston area. The Fall 2020 seminar will remain a quest, but a remote one: synchronous in two weekly zoom live sessions with guests related to the locations (librarians, curators, etc.), and asynchronous with materials made available on the Canvas course site. Students will be encouraged (but not required) to go in small groups or individually to the location and view the building from outside. As things evolve, interior visits may become possible. Students who do not reside on campus may visit a local museum, a 19th or early 20th c. building, a neo-medieval architecture or mural, a garden, a park, a forest, etc. In all cases, students will be trusted to follow the rules of social distancing, mask wearing and other public health safety measures recommended or enforced at the time of their visit. If a quest is a solitary venture, the course will enable sharing this venture among all participants, through regular postings of personal scrapbooks, peer comments, and class discussion modeled on medieval courts and late 19th. c. salons.

No previous knowledge of the subject or French language is necessary. Texts and other materials will be available in English.

**Recommended Prep:**  No previous knowledge of the subject or French language is necessary. Texts and other materials will be available in English.

**Requirements:**  Course open to Freshman Students Only

Here's a hard truth: you are going to die. That's nothing against you, of course. I'm going to die, too, and so is everyone else—it's just the way of things for creatures like us. Yet, despite the central role that death plays in our existence, it seems to remain deeply mysterious in a number of ways. It is difficult even to say precisely what death is—is it a mere biological phenomenon? If so, is there any sense to be made of the idea that I might continue to exist after my death, perhaps as a soul? Or is death instead final, in the sense that it causes me to cease existing altogether? Beyond these kinds of questions about death's nature, there are also questions about death's significance or value: Is death bad for the person who dies? If they go out of existence, how could it be bad—things can't be good or bad for us if we don't exist, it seems! Is it better to die at a certain age or time than some other? What should I think about my future death—should I fear it? Would it be better for us if we were immortal? In this class, we'll examine important philosophical work that responds to each of these questions, and more.

The creators of cinematic (and later TV) animation have perennially turned to traditional oral and literary tales about fantastic heroes, villains, tricksters, and settings for their story material. In the world of the animated "short" and feature-length film, myths, epics, legends, and folktales could come to life in a highly stylized, kinetic, and visually arresting way. Cartooning created a pathway for traditional stories to live on in the consciousness of twentieth-century viewers, and also for these old tales to be adapted to changing times. Hence animation offers not only an influential modern commentary on the folklore and mythology of the past but also a contemporary mythology of its own, deeply meaningful to adults and children alike. In this freshman seminar, students are invited to take what might be considered mere entertainment very seriously, closely reading texts of traditional stories in tandem with critically viewing animation that draws its inspiration from those stories. For a final assignment, each student will be called upon to choose some animation (a short or a clip from a feature-length film) to share with the rest of the seminar, to provide some background for it, and to lead a discussion of the animation in light of what else we will have seen, learned, and said. While the instructor's contribution to the seminar will primarily focus on animation from 1900 to 1960, students when choosing which sample of animation to share will be welcome to present later or
contemporary examples of the cartooning art—including perhaps even their own.

Language: The Origins of Meaning (205082)

Gennaro Chierchia

2020 Fall (4 Credits)

**Schedule:** M 0300 PM - 0500 PM

**Instructor Permissions:** Instructor

Enrollment Cap: 15

How do languages work? Why are they so distinctly human in the natural world? Is language a creation of our intelligence, i.e. we speak, because we are smart, or the other way around? Birds produce sophisticated songs. Do bird songs mean anything? They do, in some way. They serve, for example, as predator warnings or mating calls. Humans too, like birds, can produce music. But for effective day to day communication (or, say, to develop a scientific theory, etc.), we need languages with words and sentences, i.e. the kind of languages which is unique to our species. Do all languages, in spite of looking so diverse, share a common structure? For example, in English words fall into categories: cat is a noun, meow is a verb. Do all languages have nouns and verbs? A fairly recent turning point in addressing these fundamental questions has been to view language as a computational device. This is enabling us to build effective models of how languages are structured so as to empower us with the ability to create meaning; which, in turn, is shedding light, more and more, on who we are. The seminar will explore how natural languages come to create meaning and invite participants to develop their own linguistic analyses through modern logical and computational tools.

Recommended Prep: An interest in language and mind, and no fear of formal methods or the desire to overcome such fear.

Requirements: Course open to Freshman Students Only

**Freshman Seminar  61U**

Reading the Novella: Form and Suspense in Short Fiction (205181)

Jonathan Bolton

2020 Fall (4 Credits)

**Schedule:** F 1200 PM - 0200 PM

**Instructor Permissions:** Instructor

Enrollment Cap: 15
Short enough to read in a single sitting, but more complex and absorbing than short stories, novellas give us some of our most intense reading experiences. Indeed, many of the enduring classics of world literature, from Melville's *Benito Cereno* to Tolstoy's *The Death of Ivan Ilich*, take advantage of the novella's compression and acceleration of plot—features that are also suited to horror, mystery, and other forms of "genre" fiction. In this seminar, we will read some of the great masters of the novella form, including Henry James, Leo Tolstoy, Thomas Mann, Alice Munro, Katherine Anne Porter, and James Joyce, as well as other examples from around the world, including Eastern Europe, China, and Japan. Readings of 50-125 pages a week (all of it in English) will allow us to work closely with some classics of modern fiction, going down to the level of word choice and sentence structure, but we'll also consider the way authors build and sustain suspense, the different forms of narrative resolution, and other questions of plotting and structure. We will also talk about how to get the most out of your weekly reading experiences—I'll ask you to set aside solitary time for your reading each week and, as far as possible, to read each novella in just one or two sittings. You'll keep a reading journal, including 2-3 pages of unstructured writing each week; a number of short papers, including creative assignments, will help you understand the choices made by authors as they shape their stories for this most demanding and exciting of fictional forms.

Requirements:

**Freshman Seminar  62P**

**War in Fiction and Film (207812)**

*Justin Weir*

2021 Spring (4 Credits)  Schedule:  TBD

**Instructor Permissions:**  Instructor  Enrollment Cap:  12

War has always been one of the most important subjects of art and literature, but in the twentieth and twenty-first centuries, public ideas about war and military service have been formed increasingly by film and other visual media. In this seminar we will consider the different ways war has been depicted in literature and in films. We will spend some time identifying the conventions and clichés of the genre, and we will have occasion to discuss depictions of war in news coverage, documentaries, and video games. But we will mainly be reading and viewing several masterpieces—including novels and stories by Leo Tolstoy, Isaac Babel, Ernest Hemingway, Svetlana Alexievich, Kurt Vonnegut, Tim O'Brien, Wallace Terry, and Phil Klay, and films by directors Jean Renoir, Stanley Kubrick, Francis Ford Coppola, Stephen Spielberg, Terrence Malick, Kathryn Bigelow, and Spike Lee. In our discussions, we will reflect on how these largely fictional narratives of war have shaped our understanding of culture, politics, and history.

**Recommended Prep:**  There are no prerequisites. The seminar is designed for a general audience. Literary and/or media studies backgrounds are not required, nor is the material presented in a way that requires any special knowledge of military history. All texts originally written or filmed in languages other than English will be provided in translation or with subtitles.

**Requirements:**  Course open to Freshman Students Only
Freshman Seminar  62R

LGBT Life Stories (212729)

Linda Schlossberg

2020 Fall (4 Credits)  Schedule:  T 1245 PM - 0245 PM

Instructor Permissions:  Instructor  Enrollment Cap:  15

In this seminar we’ll read a range of classic LGBT life stories (memoirs, journals, diaries, essays, and autobiographies), beginning in the 1800s and ending in the present. We will study them as products of their specific historical moment, paying close attention to changing ideas about race, class, gender, and sexuality. Questions: How do people narrate the story of their identity? What aspects of their life histories do they highlight; what do they censor? How does the "coming out story," generally understood to be characterized by truth-telling and revelation, borrow from the conventions of fiction?

Freshman Seminar  62U

Zombies and Spirits, Ghosts and Ghouls: Interactions between the Living and the Dead (212697)

Shaye Cohen

2020 Fall (4 Credits)  Schedule:  R 0945 AM - 1145 AM

Instructor Permissions:  Instructor  Enrollment Cap:  15

Virtually all the cultures and religions of the world, from ancient to contemporary times, have teachings and rituals about death. In this seminar we will deal with a subset of this very large topic, namely, the relationship of the living and the dead. The dead are often depicted as still-living in some way and still in communication with us and our world. Are they friendly or hostile? Beneficent or malevolent? Think "undead" and "zombie" versus "saint" and "angel." In this course we will look at some of the myriad ways that religions and cultures conceive of the relationship of the living with the dead. We the living care for the dying and the dead, and hope that the dead will care for us, but how this works exactly is the subject of much speculation. American secular culture, at least in its cinematic expression, has a vigorous belief in the afterlife, especially in having denizens of the afterlife, in the form of zombies, ghosts, and poltergeists, intrude on the world of the living. In our seminar we will survey this rich set of themes as expressed in literature, art, music, cinema, and philosophy.

Requirements:  Course open to Freshman Students Only
Freshman Seminar  62Y

Back to the Future: How the Past Imagined the Cities of Tomorrow (213247)

Bruno Carvalho

2020 Fall (4 Credits)  Schedule:  R 0300 PM - 0500 PM

Instructor Permissions:  Instructor  Enrollment Cap:  14

What will the cities of tomorrow be like? How did people in the past imagine our cities would be like? Our ability to foretell the future, it turns out, has a mostly poor record so far. And yet, predictions, visions and expectations can teach us a lot about how people make sense of their world. Since the 1800s we have seen a boom in urbanization, as well as in utopian and dystopian depictions of cities. In fact, we can think of modernity in terms of competing views about the future. Throughout the 20th century, for example, many envisioned flying vehicles. Some vied for segregated cities, others for diverse communities. Today, with climate change, labor precarity, and the effects of the coronavirus pandemic setting in, it often seems as if a dire destiny is inevitable. To some, it is as if the future, not the past, is already fixed. Others invite us to make radical changes. Most tend to assume that the future will be very different from the past. But some cultures think differently, and we will also consider alternative conceptions of time. As we reflect on our current moment, we will investigate multiple urban visions in design, literature and film, asking: How do expectations about the future shape the present? How did unrealized projects impact the built environment? Can fiction and the arts stretch the limits of the thinkable? How might futures imagined in the past help to address our urban and environmental challenges?

Freshman Seminar  63K

"Copycat" China? (215846)

Thomas Kelly

2021 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions:  Instructor  Enrollment Cap:  12

In our age of deception, China is widely blamed for a failure to respect intellectual property. These attacks are not new: Chinese makers have long been condemned for flooding the market with cheap knockoffs, forgeries, and counterfeit brands. Challenging such stereotypes, this seminar explores ideas of copying in Chinese art and literature from ancient times to the present day. We will uncover a surprising history of forgeries, hoaxes, swindles, and scams, questioning what is meant by "originality." In doing so, we will also
investigate the role of forgeries in shaping Western misconceptions about Chinese culture. From the Terracotta Army and medieval Buddhist spells to Mao's Golden Mangoes and "Shanzhai Harry Potter," the seminar asks what makes something a "fake." What is the relationship between forgery and invention? How have piracy and plagiarism influenced cultural innovation? What makes someone a skillful faker? Giving you hands-on experience in the Harvard Art Museums and the Harvard-Yenching Library, we will learn what it takes to authenticate works of art and spot forgeries. Readings and class discussions will question what we think we know about China, creativity, and the timeless art of "faking it."

Course Notes: No knowledge of Chinese required. All readings are in English. There will be required visits to the Harvard Art Museums and the Harvard-Yenching Library.

Freshman Seminar  63L

Memory Wars: Cultural Trauma and the Power of Literature (215850)

Nicole Suetterlin

2020 Fall (4 Credits) Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 15

How do we respond to a traumatic event? Denial, acceptance, blame, reconciliation—there are many stances we can take toward a harmful act we have suffered or committed in the past. When entire populations have suffered or perpetrated crimes against humanity, the question of how to deal with this traumatic past can spark a full-blown memory war—such as the one raging in the U.S right now over Confederate monuments. In this seminar, we explore how the catastrophic events of World War II, slavery, and apartheid affect the way we think and act as individuals, groups and citizens today. What power do literature and the arts have in bringing peace to a society at war with its past? Our diverse spectrum of materials includes: acclaimed American, German, and South African writers such as Toni Morrison, Paul Celan, and Sindwe Magona; human rights philosopher Hannah Arendt; comedian Trevor Noah; and civil rights lawyer and Harvard Law School graduate Bryan Stevenson, who has been fighting racial bias in the U.S. criminal justice system for the past three decades. Topics include: literature about the Holocaust, slavery, and apartheid; Germany's and South Africa's recent "ethical turn" in memory culture; reconciliation and reparation; mass incarceration; punitive vs. restorative justice; social justice.

Freshman Seminar  63M

War Stories: Looking at War Through the Tales We Tell (216108)

Drew Faust
This seminar will explore American wars from the Civil War to the present through the lens of fiction and film. As Ernest Hemingway once explained to F. Scott Fitzgerald, "War is the best subject of all. It groups the maximum of material and speeds up the action and brings out all sorts of stuff that normally you have to wait a lifetime to get." War has been lodged at the heart of the humanities since the time of Homer. War and narrative in some sense create one another. War is not random, shapeless violence. Fighting is reconceived as war because of how humans write and speak about it. It is humans that give it meaning. This seminar will explore how war has shaped stories and stories have shaped war in ways that have both changed and persisted from the nineteenth century to the present. A wide range of novels, drama, short stories and film will enable us to compare genres as well as eras as we examine how writers and the soldiers and civilians they create have grappled with the moments of truth that wars provide.

**Freshman Seminar  63N**

Narrative Negotiations: How do Readers and Writers Decide (216104)

Homi Bhabha

2020 Fall (4 Credits)  Schedule:  W 0945 AM - 1145 AM

Instructor Permissions:  Instructor  Enrollment Cap:  15

Narrative Negotiations explores narrative "voice" in a wide range of literary and cultural texts. Narrative voice is a lively dialogue between the author and the reader as they engage in the experience of determining the value and veracity of the narrative: whose story is it anyway? The writer creates the imaginative universe of character, plot, emotions and ideas—she seems to be holding all the cards; but it is the reader who rolls the dice as she draws on her human experience and moral values to question the principles and priorities of the storyteller. The game of narrative becomes deadly serious when storytelling confronts issues of colonialism, slavery, racial profiling and gender discrimination. Is the right to narrative restricted to those who have suffered the injustices of exclusion? What is my responsibility as a storyteller—or a reader—if I am a witness to violence, or an advocate against injustice, but my life-story is one of privilege, protection and security? What is the role of the politics of identity or cultural appropriation in determining whose story is it anyway? Throughout the seminar students will be encouraged to draw on their own histories, memories and literary experiences as the enter into the world of the prescribed readings. For the final assessment I hope students will choose critical and creative ways of telling their own stories, or the stories of others who have captured their imaginations. Seminar participants will be required to come to each class with two questions that pose issues or problems based on the texts that are important for them, and may prove to be significant for their colleagues. I will invite members of the group to pose their questions and start a discussion.

Claire Chase

2020 Fall (4 Credits)  
Schedule: R 0945 AM - 1145 AM  
Instructor Permissions: Instructor  
Enrollment Cap: 14

Why do people come together to make new music? How does the act of making music build community and engender positive, even transformative, social change? How have musicians adapted and responded to the new realities of social distancing and remote collaboration in the era of COVID-19, and how have musical communities come together to fight for social justice during this time? How might societies of the future be impacted by these new modes of gathering, sounding, organizing and making music? And how might we as a musical community be of service to a suffering world? We will explore these questions in a hands-on, exploratory environment by becoming our own musical community as a class over the course of the semester. We will study graphic and open-form scores and varied types of musical notation (written and oral), and we will build our own musical instruments (electronic and acoustic). We will also invite members of our growing Harvard community to join us in music-making events in a variety of venues online and offline. Small group work as well as collaborations that extend beyond our unit will be explored. We will experiment with a wide range of pieces designed for musicians and non-musicians alike by composers such as Pauline Oliveros, Yoko Ono and Alvin Lucier, and we will learn about the intersection of music and community from guest lecturers in the fields of social justice, visual art, literature and integrated technologies.

Recommended Prep: While no prior specific musical experience is required for the seminar or for our various community participants, what is required is curiosity, openness and enthusiasm about how and why music brings people together.

Nietzsche (216110)

Jay Harris

2020 Fall (4 Credits)  
Schedule: R 0300 PM - 0500 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 12

In his autobiography, Friedrich Nietzsche included a chapter entitled, "Why I Write Such Good Books." While he won't win any prizes for humility, he accurately anticipated the judgment of history: he did write some amazing books. In them, Nietzsche addresses some of the big questions of human existence in an elusive style that continues to resonate with—and confound—many. Indeed, he has allegedly influenced numerous philosophical schools, among them existentialism, post-structuralism, and deconstruction. More interestingly, he has been considered a promoter of anarchism, fascism, libertarianism, liberal democracy, and (incredibly) socialism. Nietzsche has always been of special interest to young people who have often appreciated the irreverence and freshness of his thought, as well as the often very high literary quality of his writing. In this seminar, we explore Nietzsche's moral and political philosophy with emphasis on the themes he develops in his best-known and most accessible work, The Genealogy of Morality. Here he asks fundamental questions regarding how we came to a moral system rooted in self-denial and chastity (among other things). However, we also read several other of Nietzsche's works, and do so chronologically, all the
while being guided by his autobiographical reflections on these books. The other works include *The Birth of Tragedy*, *The Gay Science*, and *Thus Spoke Zarathustra*.

**Recommended Prep:** The seminar presupposes no previous exposure to Nietzsche or philosophy. The purpose is to get a sense of philosophical questions by engaging with one rather irreverent thinker.

### Freshman Seminar 63R

**What is a Classic?** (216124)

_Rachel Love_

2020 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

**Instructor Permissions:** Instructor  **Enrollment Cap:** 15

The question of what makes certain works 'classics' has plagued readers ever since they had more than one book to choose from. When faced with more works of literature and art than one could consume in a single lifetime, the label 'classic' provides readers with a narrowed selection that is guaranteed to be worth the time and effort to engage with, that is vital to participation within an intellectual community. Classical literature, classical art, classical music—all suggest art forms that are fundamental, elevated, perhaps even elite…but why? And who gets to decide what qualifies as 'classical', especially when those who constitute today's intellectual communities are increasingly heterogenous and have greater access to an impossibly vast, impossibly diverse trove of global artistic production? In this seminar, we are going to read 'The Classics'—defined within universities as the study of literature from ancient Greece and Rome—in order to open up larger questions about the nature, purpose, and consequence of labelling certain works, aesthetics, and ideas 'classical'. We will read selections from a broad sampling of written works that survive from antiquity, learning firsthand what it means to read a classic. At the same time, we will be reading, watching, and listening to a diverse array of media that explain, criticize, and reimagine the role of classical literature and ideas in today's world.

**Recommended Prep:** There are no prerequisites for this class. All readings are in English, and no knowledge of Latin or Greek is expected.

### Freshman Seminar 63S

**Surviving Your First Year at Harvard: Lessons of Resiliency From Mexican Artist Frida Kahlo** (216125)

_Maria Parra-Velasco_

2021 Spring (4 Credits) **Schedule:** TBD

**Instructor Permissions:** Instructor  **Enrollment Cap:** 12
Are you trying to discover your passion in life? Is love a concern of yours? Do you often think about your appearance, and what others might think of you? Is a strong sense of community important to you? Do you fantasize about (better) Mexican food at Annenberg? Are you looking for opportunities to express your creativity? If any of these questions resonate with you, then this seminar is for you. This seminar will explore ways to tackle these and other questions by learning about the Mexican global icon Frida Kahlo. Born in Mexico City at the beginning of the 20th Century, Frida was a bright, complex, unapologetic and creative woman. She built strength and resiliency from a very young age in the face of polio and a terrible accident that incapacitated her from her teen years until her death at 47. Despite these hardships, Frida never forgot to enjoy life and to love both men and women. She was always in solidarity with those in need, and through her art she gave voice to the voiceless: women, indigenous communities, and the disabled. As we learn about Frida’s journey, we will travel in time through Mexico’s complicated social history and Mexico’s rich and creative popular culture which includes fashion, cuisine and music. We will discover the hidden gems of Mexican art within Boston and Harvard Museums. Finally, this seminar hopes to be an open door to explore the vast field of the Humanities and art making.

Build a Modern Art Exhibition—Dig up Harvard's Archives (216111)

*Felipe Pereda*

2021 Spring (4 Credits)  
**Schedule:**  TBD  
**Instructor Permissions:**  Instructor  
**Enrollment Cap:**  12

The making of an exhibition entails a thorough process of investigation. We will need to find the works of art, document them and construct an argument that will be brought to life at a museum gallery. The goal of this seminar is to give you the chance to participate in the research and design of this exhibition, that focuses on the work of a major figure of Spanish and Filipino art of the 20th century, Fernando Zobel (1926-1984), programmed at the Prado Museum, Madrid. A Harvard Graduate (1949) whose love for painting and collecting mandated his life, Zóbel saw and cultivated art as a universal language without frontiers. Harvard’s archives hold hundreds of Zobel’s letters, drawings, paintings and even his class note-books that
will guide us into the fascinating life of a modern artist while allowing you to channel the role of a curator.

Recommended Prep: Some knowledge of Spanish will be useful but is not required. Zóbel was bilingual, Spanish/English and expressed himself in either language.

**Video: The Medium of Everyday Life (216099)**

*Karthik Pandian*

2021 Spring (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 10

Video is fast becoming the medium of everyday life. We use it to communicate, learn, entertain, inform, and express ourselves. At the same time, we are often used *by it* - manipulated, programmed, influenced, distracted, fooled. In this production seminar, we will explore the medium of video by putting works of contemporary art into dialog with memes, viral videos, and other social media from the present moment. Artists whose work we will look at represent a broad range of backgrounds and experiences, motivating us to consider how video engages questions of race, class, gender, and sexuality. Over the course of the term, students will create a series of videos inspired by these discussions, drawing on technical workshops introducing the basics of shooting, editing, and publishing videos.

**Recommended Prep:** No experience with video production is necessary and all materials will be provided with no cost to the student.

**Vegetal Humanities (216106)**

*Carrie Lambert-Beatty*

2021 Spring (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

A paradigm is changing. In Western culture, plant life tends to be green background for the more interesting lives of animals. Senseless, immobile, and silent, plants—99% of the planet's biomass—are
resources for human use or enjoyment, if not enemies that civilization must beat back. But in the last
decade—and in the context of climate crisis—this model has been under pressure: from the voices of
indigenous knowledge-keepers and activists; from scientific findings in plant communication, sensation,
and (arguably) intelligence; and from artists and writers, dancers and filmmakers who show us a vegetal
realm at once more familiar and more alien than you may have imagined. This seminar invites you to try out
a botanically-based cultural sensibility. How does plant-awareness affect your sense of time and
experience of space? What happens to core concepts of the arts and humanities—subjectivity, perception,
ethics, and the human condition itself—when you think them vegetally? How does recent art change
cultural understanding of plants? And how does plant-thinking affect the experience of art? Readings in
philosophy, literature, and anthropology of plants; case studies in contemporary art, film, and design. You’ll also learn from direct observation of vegetal lives; from experts at Harvard’s unique botanical
institutions; and from your own research into a single plant species’ natural and cultural history.

Recommended Prep: No prior art or botanical knowledge is expected. However students
with backgrounds in agriculture, ecology, horticulture, or botany are especially welcome.

**Freshman Seminar  63X**

Happiness and Different Ways of Life (216188)

*Susanna Rinard*

2020 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

What is happiness, and what can we learn from different ways of life about what conduces to human
happiness? In this seminar we begin with an overview of thought in philosophy and contemporary
science about the nature of happiness (our guide: Sissela Bok’s book Exploring Happiness). We then
consider a few different ways of life. First, we look at modern-day Buddhist approaches to the search
for happiness (our guide: Matthieu Ricard’s Happiness). This will provide a context in which we can
consider to what extent internal conditions—your mental habits, your attitude, your overall outlook—are determinants of happiness. Then we turn to a study of the lifestyles of prehistoric humans, and
consider their approaches to child-rearing, dispute resolution, and more (our guide: Jared Diamond’s
The World Until Yesterday). Looking at these radically different cultures will prompt us to consider
whether our modern society could benefit from re-adopting some aspects of these ways of life. Finally,
we look at the conditions of poor women in India, and what we can learn from them about justice and
quality of life (our guide: Martha Nussbaum’s Women and Human Development). We will consider both
the devastating effects of oppression and certain kinds of material poverty, as well as the ways in
which people can nonetheless flourish in difficult circumstances. Throughout the course we will see
what can be learned by combining abstract philosophical reflection on happiness with attention to the
details of the actual lives of human beings at different places and times.

Lil Nas X reinvented a Western aesthetic with his 2019 hit, *Old Town Road*:

*I got the horses in the back / Horse tack is attached /

*Hat is matte black / Got the boots that’s black to match.*

The 20-year-old Georgia rapper joined a parade of artists, authors, scholars, and citizens who have blended the imagined and the historical into something entirely its own. This seminar traces how he and others, in the present and in the past, have engaged in similar kinds of reimagining while also attempting to uncover the material history of what we think of as the American West. The West has long been a site of conflict and violence, yet many insist that we see it as a land of adventure and opportunity. How did we arrive at this peculiar dichotomy? What is the American West, and what does its flexibility as a cultural concept teach us about America itself? How did a place vastly peopled by diverse communities and nations become imagined as an open and untouched expanse? How do the worldviews and experiences of a diverse array of Indigenous peoples complicate this mythology and the idea of the “American” West? We will consider the West’s portrayal in various mediums—historical documents, film, fiction, photography, painting, music, and more—and develop diverse analytical skills and interdisciplinary methods for answering these questions.

Have you ever received cash for babysitting? Or used a friend’s HBO password? Or lied about your age to access a webpage? Although terms like “informal sector” and “black market” might seem to imply marginality, economic activities that evade or contravene legal regulation are part of everyday life. As you will learn in this seminar, this is hardly a recent development. Spanning the late-colonial period to the present, this seminar samples histories of controversial and shadow economies in the territory now known as the United States. We will examine a range of case studies, including counterfeit currency, enslaved
human beings, commodity futures, animals, blood, and sex. In each case, we will analyze how the changing
legal and moral boundaries around the licit market (separating it from the black or grey market) have been
drawn and negotiated, and what the effects of those boundaries on the organization and valuation of illicit
commodities and markets have been.

Freshman Seminar  64C

Literature of Epidemics and Pandemics: Tackling Oppression (216193)

Karen Thornber

2020 Fall (4 Credits)   Schedule: M 0600 PM - 0800 PM
Instructor Permissions: Instructor   Enrollment Cap: 15

Wherever you live—whether in the United States, Asia, or anywhere in-between; whether in an isolated rural
community, a booming megacity, or anywhere in-between—it is almost certain that your life has been
affected if not transformed by Covid-19. This disease is not only a health crisis from which more than a
million people will lose their lives. It has also triggered a financial crisis, having left millions and likely soon
billions unemployed or underemployed. Just as significantly, COVID-19 has further exposed and
exacerbated countless of the inequalities in our societies, injustices fueled by racism, sexism, classism,
ableism, ageism, ethnocentrism/jingoism, heterosexism and similar and frequently intersecting forms of
oppression in the United States and around the world. Already, creative narratives on the current
pandemic—novels, plays, poems, short stories, essays, and memoirs—are exposing the many ways our
societies are failing and have long failed our most vulnerable. These narratives are also providing guidance
for a more equitable and sustainable future.

Putting our own experiences living through a pandemic into broader historical and cultural perspective, in
this seminar we read a selection of acclaimed novels, short stories, drama, poetry, memoirs, and essays
from around the world (Africa, Asia, the Americas, Europe) and from classical times to the present on a
range of epidemics and pandemics. This literature on epidemics and pandemics has played a large role in
documenting (and in some cases glossing over) historical injustices and inequalities on the one hand, and
on the other, imagining and inspiring future transformations. We will be most concerned with what these
narratives tell us about existing and longstanding forms of oppression, our frequent (in)capacities as
individuals, communities, and societies to ameliorate much less eliminate injustice and inequality, and
what vision these narratives can provide us as we continue to live through and one day emerge from Covid-
19. Class discussion gives the necessary historical, cultural, and literary contexts for these primary texts.
In-class presentations and final projects offer students opportunities to engage more deeply with their local
communities.

Recommended Prep: The only prerequisite for this seminar is a desire to read a range of
thrilling, provocative works from around the world that tackle some of
the most significant problems that have faced and continue to face
societies. No non-English language expertise required, but students
who can read a novel in the original language are encouraged to do so.

Freshman Seminar  64D
Water Rights in the Americas (216284)

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  12

Water is life, but is it a human right? Water use is a contentious issue globally because we rely on water for nearly every productive activity, but it is often scarce and not distributed equally. In this seminar, we will examine the social and physical shape of water in a modern and historical context to better understand the persistence and escalation of struggles over water access both locally and globally. While all bodies of water deserve mention, civilizations have most often relied on rivers to act as veins pumping fresh water like life blood. This class discusses popular and scholarly understandings of water issues, paying particular attention to the Boston area and then extending to other populations in the Americas, from South America through Canada. We begin by exploring the importance of Boston's waterways, and from there we examine global water policies, learning how marginalized groups have made use of water justice strategies to defend their identity, material wealth, and health. We will then come full circle by analyzing community activism on such local waterways as the Mystic River, and you will design your own proposal to protect our local waterways.

Freshman Seminar  64E
Asian American Literature (216282)

Catherine Nguyen

2020 Fall (4 Credits)  Schedule:  T 0600 PM - 0845 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

What is Asian American literature? Recently, Asian American literature has been increasingly visible with the 2016 Pulitzer Prize winner Viet Thanh Nguyen's *The Sympathizer* and with the many *New York Times* best sellers by Asian American writers. Asian American literature is born out of Asian immigration to the United States; it articulates the hardships of resettlement and assimilation and also critiques racism and the model minority. Asian American literature troubles literary genres, identity categories, borders, and the notion of Asian America itself. We will read a wide selection of literature that speaks to the range of Asian American experiences and the unique possibilities of Asian American writing. Moreover, we will engage in art workshops on zines, painting, and protest postcards as a creative way to approach Asian American
literature as well as activism and anti-racist work with the support of the Elson Family Arts Initiative Fund to Support Integration of the Arts into the Curriculum.

Freshman Seminar   64F

CIA Operations in the Global Cold War (216283)

Beatrice Wayne

2020 Fall (4 Credits)  
Schedule: W 0945 AM - 1145 AM

Instructor Permissions: Instructor  
Enrollment Cap: 12

What was the secret side of US foreign policy during the global Cold War? This course uses empirically grounded readings from across the Americas, Africa and Asia to understand the impact of the Central Intelligence Agency's covert operations on governments, organizations, and ordinary citizens living across the globe. We will examine memoirs, declassified documents and congressional hearings to understand the rationale behind the Central Intelligence Agencies actions, and engage with popular culture produced about the CIA to understand how coverage and representations of the Central Intelligence Agency have reflected and clashed with the realities of their operations. As this class is deeply engaged with understanding the response of global populations affected by this arm of U.S. foreign policy, we will analyze the literature, poetry, films, and various forms of cultural production from those who experienced the fallout of CIA covert actions in their regions. This course will focus on methods as well as ideas, exploring the challenges and restrictions inherent in studying an organization that is all about keeping secrets. Students will get hands-on experience with working to declassify documents from the U.S. State Department. The course encourages students to ask new questions about the way they see themselves, their fellow citizens, and their responsibilities to the wider global community.

Freshman Seminar   70S

Sex, Money, and Power in the Postcolonial World (205048)

George Paul Meiu

2020 Fall (4 Credits)  
Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor  
Enrollment Cap: 12

With globalization, sex—everywhere—has become more central to who we are as citizens and consumers, how we gain rights and resources, and how we relate to others as members of a specific race, ethnicity, region, or culture. Worldwide, states invest or disinvest in people according to how they have sex, adopt
gender identities, or sustain sexual morality. Terrorist organizations claim to use violence to reestablish bastions of piety and sexual propriety; various populist movements imagine immigrants and refugees to threaten their societies, in part, by failing to uphold the sexual norms of adopting countries; and transnational NGOs and activists seek to "rescue" or "rehabilitate" sex workers, gays, lesbians, transgender, and other people vulnerable for their intimate and social lives. The growing importance of sex to a global consumer culture only heightens the rush to secure societies from the so-called "perversions of globalization." Tourists now travel for sex to various destinations in Africa, Asia, Latin America, and the Caribbean; poor, unemployed men and women, in former colonies, sometimes use sex as a means of enrichment and empowerment; and amidst the rise of religious fundamentalisms, commodity ads incite youths to consume sex along other goods to build authentic selves. In this seminar, we ask: Why does sexuality become so central to how we imagine our world and futures? Why is sex so important in defining us, as subjects and populations? And how do older colonial stereotypes of race, ethnicity, and culture shape sexuality politics in the new global order? To address these questions, we read about how sex relates to politics and the economy in countries shaped by the histories of colonialism in Africa, Latin America, South Asia, and Europe; watch documentaries about prostitution and sex tourism; and jointly curate a small museum exhibit about sexuality in the postcolonial world.

Freshman Seminar 70Y

Asian America (205175)

Diana Eck

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 12

How "Asian" is America today? This seminar explores the Asian dimensions of American society, with special attention to religion, ideas, and culture from the first encounters of Thoreau and Emerson with texts and ideas of the "Orient" to the saturation of modern America with the holistic cultures of yoga, tai chi, and mind-body medicine. We will look at the histories of immigrant communities from India, China, Japan, Korea, and Vietnam and new forms of religious and cultural life they brought with them—Hindus and Sikhs, Buddhists of many lineages, as well as Asian Christian communities. How has Asia reshaped the collective identity of the United States?

Freshman Seminar  71F
The Origins of the Human Mind (205222)
Susan Carey
2021 Spring (4 Credits)    Schedule:    TBD
Instructor Permissions:    Instructor    Enrollment Cap:    12

The adult human mind is a unique phenomenon on earth. Only people can ponder the causes of and cures for global warming or pancreatic cancer, and can think thoughts about molecules, genes, democracy... Animals, and human infants, do not have most of the 500,000 concepts expressed by words in English. How does the human mind work, and how can we understand how it came to be, with its vast repertoire of concepts from which we routinely compose thoughts? Seminar participants will explore together the origins and development of human knowledge in the individual child, in relation to two larger time scales: biological evolution and historical/cultural development. We will begin with several case studies, including case studies of the origin of a perceptual ability (depth perception), and of the concepts natural number and agent and mind. These case studies illustrate how all of the disciplines within the cognitive sciences, as well as anthropological, archeological and historical disciplines, shed light on these issues and establish that these perceptual and conceptual capacities have deep evolutionary roots. The main focus will be on experimental work from psychology. We will then turn to two case studies chosen by the participants in the seminar, chosen to illuminate human uniqueness (candidate topics include the origin of moral concepts, of logic, or of language). At the end of this seminar students will have a grasp of the theoretical debates about the nature of the human mind that have animated philosophy since the time of the Greek philosophers, as well as why considerations of the origins of the mind were always seen as central to these debates.

Recommended Prep: Students taking this seminar should have an interest in learning about the cognitive sciences, which draw primarily from linguistics, analytic philosophy, computer science, and experimental psychology.

Freshman Seminar  71G
Americans at Work in the Age of Robots and Artificial Intelligence (207507)
Benjamin Friedman
2020 Fall (4 Credits)    Schedule:    W 0300 PM - 0500 PM
Instructor Permissions:    Instructor    Enrollment Cap:    14

Where will the coming generation of Americans (say, today’s 18-year-olds) find jobs? And will the jobs be worth having? People have worried about losing their jobs to technology at least since the Luddites 200 years ago. In the aggregate, they have been wrong. The automobile put lots of stable boys and saddle makers out of work, but it created vastly more jobs making cars, and fueling them and repairing them, and
it opened the way for whole new industries like roadside motels and restaurants. With robots increasingly performing the tasks once done by blue-collar labor, however, and computers and artificial intelligence now eliminating the need for many workers once thought to be immune because of their cognitive skills, today’s technological threat seems different. It is no longer just the unskilled and undereducated whose jobs are at risk. Moreover, the challenge may be especially acute in America, where wages are far higher than in many other countries and an ever greater share of what we consume and invest not only can be provided from overseas but often is. Does the next generation of Americans, then, face a genuine threat from advancing workplace technology? If so, what are the dangers – not just economic, but social, political, even moral – to the country as a whole? Most important, what can we do about it?

Freshman Seminar  71P

Making Places and Spaces in Modern America (212696)

Lizabeth Cohen

2020 Fall (4 Credits) Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 12

How did a home in 1945 compare to one in 2000? Did the opening of shopping malls in the 1950s change people’s consumer habits? What made living in suburbs similar to and dissimilar from cities? How did various work and leisure settings alter people’s attitudes toward labor and play? In what ways was traveling by airplane from airports different from transit by train? The built and natural environments offer important clues to how American culture, politics, and social life have transformed since World War II. In this seminar we will examine closely the shifting character of the ordinary and extraordinary places and spaces of postwar America. We will explore typical environments like the neighborhood, school, factory, movie theater, bar, and office as well as more unusual sites like a prison and Disneyland. In every place they occupied, Americans have left an important record of their values, tastes, and priorities. In the diversity of their choices we can see both what unites Americans in a common culture and what keeps them apart, segregated in different physical—as well as social and political—worlds, often defined by race, class, and gender. In addition to our group investigations through readings, media, and discussion, students will undertake their own exploration of a place or space that has changed significantly over time.

Students are expected to attend every seminar meeting to insure continuity in our discussions and to maximize the opportunity this freshman seminar will offer to get to know each other and to share ideas. Inevitably students will bring their own unique experiences with the American built environment to the class, from which we will all benefit.

Why are people so willing to humiliate, oppress and even massacre people from other social groups? What are the obstacles impeding the construction of truly multi-ethnic societies in which people from all ethnic groups function as equal partners in the pursuit of the national project? What are the factors responsible for the horrors of the holocaust and similar acts of genocide in places such as Rwanda, Cambodia and Myanmar. In this seminar we will explore those aspects of human nature which lie at the root of the seemingly intractable problem of social exclusion and oppression. We will explore the cognitive, affective and motivational components of intergroup brutality by taking an excursion through both classical and contemporary approaches used by social scientists to come to grips with the psychology of social exclusion. This seminar will provide students with an overview of the major theoretical and methodological perspectives informing our understanding of the psychology of prejudice and oppression in modern society. These various theoretical perspectives will span disciplines such as social, political and evolutionary psychology, sociology, political science, and anthropology.

Democracy is in crisis. The problems we face—pandemic, environmental destruction, economic and technological upheaval, global migration—are far too complex for the average citizen to grasp in detail. Meanwhile, the tools of disinformation and manipulation are more powerful than ever. Set aside, for a moment, any default faith in democracy you’ve grown up with: do you really believe you can trust your fellow citizens to make wise decisions about how to approach these issues? In this seminar, we'll put to the test the most powerful answer to such worries that democracy’s defenders can offer: education. If we are not now the well-informed, open-minded, scientifically literate, engaged citizens that a healthy democracy
requires, can our educational institutions be designed to bring us sufficiently close to that ideal? Or, as so often seems to be the case in contemporary America, are our schools doomed to reproduce the divisions and inequalities that they inherit? To address these guiding questions, we'll attack philosophical questions about the very nature of democracy and human cognition, and draw on the best research contemporary social science has to offer. Our companions in inquiry will be some of history’s greatest theoreticians of education—Plato, Dewey, Freire—but also leading thinkers of today (many of whom are members of Harvard’s faculty): Susan Carey, Danielle Allen, Daniel Koretz. By the seminar’s end you’ll make your own original contribution to this collective intellectual effort by completing, in collaboration with your classmates, a project of your own design.

**Freshman Seminar 72E**

*That Seventies Seminar: Discovering a Decade that Made America (215845)*

*Jane Kamensky*

2021 Spring (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12  

Sure, you know Watergate and disco. But did you know that the American 1970s also witnessed the rise of phenomena as diverse as the environmental movement, neoliberal economic policy, mass incarceration, modern conservatism, terrorism, gay rights, hip hop, the “zipless fuck,” and the abortion wars? Freshman Seminar 72E takes a short, strange trip through this generative and often-mocked decade, whose imprint lingers powerfully today, now fifty years on. Our approach is both thematic and chronological. Each week, our discussions will center on a particular year, with special attention to a hot-button topic that gripped the American public then (and throughout the decade). Our encounter is meant to be immersive: most of the readings, listening, and viewing consists of primary sources (produced at the time). By the end of the semester, you should have a feel for this slice of the past, ear-worms and all, a sense of the decade’s enduring impact, and through that, new strategies about how to navigate the political, economic, and cultural dilemmas of the present moment.

*The American Democratic Tradition: Past, Present, and Future (216122)*

*James Kloppenberg*

2020 Fall (4 Credits)  

**Schedule:** T 1200 PM - 0245 PM  

HARVARD UNIVERSITY  
Page 1358 of 3624  
8/25/2020 0:22 AM
The United States boasts one of the world's oldest continuously operating democracies. Why does it seem so unstable in 2020? Why is American politics so polarized? Is that polarization healthy or hazardous? What should Americans do to fix what ails our democracy? To answer those questions, we will examine contemporary US democracy in relation to its history, tracing the origins and growth of our ideas and institutions from the colonial era to the present. Readings will include selections from thinkers such as Jefferson, Madison, Tocqueville, Grimkè, Douglass, Lincoln, Sumner, Carnegie, Gilman, Du Bois, Dewey, Hayek, Friedman, Crenshaw, Joan Williams, Obama, and Coates. Students will investigate the sources of Americans' current disagreements and debate proposals to address problems such as economic and social inequality, apathy, intolerance, racism, sexism, and climate change. They will also explore the resources available at Harvard for active political and social action, including Harvard Votes, the Institute of Politics, Phillips Brooks House, and the Mindich Program in Engaged Scholarship, among others. In addition to writing brief essays throughout the fall, at the end of the semester each student will write a presidential inaugural address for delivery in January, 2021, or, if you prefer, January, 2025, in the middle of your freshman or senior year.

**Recommended Prep:** Although no particular background is required for the seminar, a serious interest in American politics and a solid grounding in US history, such as that provided by a good high school history class, is recommended.

**Freshman Seminar 72K Section: 01**

Marvelous Markets: From Airbnb to Feeding the Hungry (216267)

*Scott Kominers*

2020 Fall (4 Credits)  **Schedule:** T 0345 PM - 0545 PM

**Instructor Permissions:** Instructor  **Enrollment Cap:** 15

Markets are everywhere, but they don't always work the way we want them to. While economists' "ideal" markets are supposed to find their way to socially optimal outcomes, real-world markets often fall far short. Valuable goods don't always reach the people who want to buy them; prices don't always match up across venues; and jobs can be hard to find even when the labor market isn't tight. This seminar explores the purpose and potential of markets, drawing on classical ideas in economic theory. At the same time, we look at the pitfalls: how and when markets lead to inequitable outcomes, or just fail to create value overall. Then, we ask: How should markets work—and how can economists and entrepreneurs help bring them there? We learn what makes marketplace platforms successful: How Uber and Airbnb create value from slack capacity; how social crowdfunding platforms like GoFundMe create trust; and how both dating sites and Craigslist thicken thin markets. And we see how marketplace design creates opportunities even in settings we might find surprising, such as when the nonprofit Feeding America uses a marketplace mechanism to distribute food to its nationwide network of food banks. Finally, we explore how better marketplace design can help address some of the deepest problems today's markets have created—including inequality, the decline of labor, and climate change. Readings include research and philosophy papers, economics journalism, business case studies, and even a bit of fiction. Yes, we will discuss cryptocurrency/blockchain.
Freshman Seminar  72L

Political Crisis and Radical Change in Recent History (217385)

*Charles Maier*

2021 Spring (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

All societies experience political disagreement and some degree of social conflict. Not all of these difficult passages lead to violence or a change of regime. How do we judge when governments are close to collapse and what outcomes might we expect? Were alternative outcomes possible? Can we separate the impact of long-term or "underlying" conditions from immediate provocations?

In an effort to answer these questions, this seminar will focus on some spectacular cases of political crisis in recent history that have brought down both democratic and authoritarian regimes—sometimes after long periods of strain but often unexpectedly. In some cases, these crises led to democratic advances, but we will also consider crises in which serious unrest was finally repressed or dissipated (e.g. in Paris 1968, China 1989, the Arab Spring, 2011). Students will be asked to strategize as well as analyze.
Humans seem to have always imagined the end of their world order. It appears that, without the "sense of an ending," not only artistic production, but also individual and social lives cannot be made coherent and effective. Fantasizing about the apocalypse is something that many people in the US and almost everywhere else in the world used to do on a daily basis either by watching their favorite shows on TV, by playing videogames, or by listening to political speeches. Of course, in 2020 all this has become not only fictional anymore due to the tragedies and disruptions brought about in our daily life by the Covid-19 pandemic: we truly live in a post-apocalyptic world. But it is worth remembering that many experienced such a condition even before 2020 and we can learn from their reflections and imaginations how to live the apocalypse.

This course will start from these observations to ask why imagining the end is so pervasive in contemporary cultures, what ethical choices are put in front of us "at the end of the world as we know it", and how we can analyze critically where apocalyptic images are coming from and how they are used in contemporary conversations.

Imaginations of the end have their roots in a literary genre that is often called "apocalyptic" and has been alive and productive since antiquity. The course will look at this historical trajectory, but most of the work will be focused on contemporary cultural products, such as movies, short stories, songs, art, comic books, videogames, and so on. The products of writers, filmmakers, and artists will be analyzed and observed as thought experiments and "revelations" about the incoming end and its aftermath. Much of this work will be carried out in collaboration with the Harvard Art Museum and through the participation of writers and artists as guest lecturers and interviewees.

Thus, students will be asked to observe how thinking about a catastrophic future is actually a means to reflect about the present, by identifying whether humans are doing something wrong, whether they have any chance to correct their mistakes, or what strategies can be deployed to face with resilience the aftermath of the end. In this perspective, for instance, God, aliens, or meteorites are metaphors representing our powerlessness, while sins, zombies, or climate change are wake up calls for humankind. "Prophets of doom" can be channels of liberating and progressive energy, but can also become instruments to set up for destruction people who look and act differently. Apocalyptic scenarios almost always distinguish humankind in the two opposed camps of those who are saved and those who are condemned, but in more modern apocalypses the Enemy (like the biblical Antichrist) looks more and more indistinguishable from our own selves.

Ultimately, the course will ask you to reflect about your own fantasy of the end and write (or photograph, or sing) it.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.
Humans seem to have always imagined the end of their world order. General Education 1002
The Democracy Project (203045)
Jill Lepore
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a
The United States is founded on the idea of equality but equality has always been elusive and has only ever been achieved through struggle, argument, and action. This course examines American history--especially the history of race, immigration, and constitutional justice--through historical analysis, democratic deliberation, and public-minded projects. It's a history course—but a history of the present.

Class Notes: This course has several synchronous components. Most weeks, there will be a Town Hall on Mondays from 4:30-6:30 p.m. EST. Only a subset of the class is expected to attend the Town Hall each week. Students who do not attend the Town Hall live one week will watch a recording of it in an interactive viewing session. All students are expected to attend a weekly synchronous section, and the course will have several other opportunities for synchronous work on collaborative projects each week. Please see the syllabus on the course Canvas site for more detail.

General Education 1006
Music From Earth (215876)
Alexander Rehding
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a
In 1977 humanity sent a mixtape into outer space. The two spacecraft of NASA’s Voyager mission include a Golden Record, featuring greetings in 55 earth languages, 116 images of the planet and its inhabitants, plus examples of music from a range of cultures across the world: from Azerbaijani bagpipes to Zaire pygmy songs, from English Renaissance dances to Stravinsky’s Rite of Spring, and from Louis Armstrong to Chuck Berry. The samplings of earthbound auditory culture are on their way into the unknown. The Voyagers left the solar system around 2014, and in about 40,000 years the sun will no longer be their nearest star.

The Golden Record raises a number of big questions. The vast temporal and spatial distances that it traverses force us to change our perspective so as to imagine the distant future and to think far beyond our usual comfort zone. In trying to make contact with the Big Other—quite literally, communicating with the
alien—the Golden Record asks us to confront our very humanity and to pose questions of self-representation and communication on the broadest level. It is ironic that in 1977 the idea of communicating with aliens was something of a crackpot theory that serious scientists rarely promoted, whereas the vast number of exoplanets that have been discovered over the last forty years has given new relevance to this idea. We now believe that there must be at least 100 billion exoplanets, so the tables have turned: now it seems statistically unlikely that there would be no other inhabited planet in the universe.

The central question we will ask in this class is bafflingly simple: What might happen if someone picked up the Golden Record at the other end? What does listening actually mean on this broadest, interplanetary level? Of course, any answer must remain speculative, but this doesn't mean that we must throw our arms up in the air in despair. SETI, the Study of Extra-Terrestrial Intelligence, has identified a number of factors that we can safely assume to be universally recognizable across planets. Chief among them is the binary system of zero and one; it is also likely that sensory perception will rely on vibration patterns in a fluid medium. These give us a basis for some informed speculation. Concrete answers will likely remain evasive, but the creative and deductive work that goes into solving these puzzles are just as important as the answers themselves.

Class Notes: This course's live lectures are scheduled for noon-1:15 p.m. Eastern time Tuesdays and Thursdays, and students are encouraged to attend at that time. If you are unable to attend lecture synchronously, you will be able to watch recorded lectures instead and attend an alternate synchronous course session. All students are also expected to attend a weekly TF-led synchronous section.

Who Do You Think You Are? The Ethics of Identity (215892)

Jay Harris

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

Who are you? We typically answer this question with a name and a collection of identity terms. Our identities may be ascribed or chosen; we often experience them as simply given, and we sometimes struggle against them. We use these identity categories, in turn, to structure decisions, negotiate relationships, and otherwise shape our lives. Our identity groups seem to make ethical claims on us, and we refer to them in making claims on one another. Yet the ways we conceptualize our identities may change over the course of our lives, and the identity concepts available to us may be more historically and culturally contingent than we recognize. In this course, we will take a step back from the ways we habitually think of identity. Using the tools of multiple disciplines — including art, philosophy, literature, religion, history and sociology — we will deepen our understanding of what identity is and what role it plays in our lives.

We will begin by confronting ethical questions that arise at the level of the individual, and then expand to
questions that arise for social groups, and finally, to questions that arise for institutions:
• How should each of us negotiate between identities that prioritize different values? What role should our identities play in the task of crafting a life and sense of self?
• What claims, if any, can groups organized around identity make on individuals? ("You are one of us, so show some solidarity with our struggle.") What claims, if any, can individuals make on identity groups? ("This group ought to be more inclusive to people like me.") What is to be done when groups hold views about identity that are helpful to some but cause injury to others, both within groups and outside groups? ("We can't accept you and still be true to who we are.")
• When, if ever, should institutions organize individuals into identity categories and relate to them through these categories? (Is it ethically appropriate to use identity categories to institutionalize affirmative action? The census? Scientific research on race and sex? The very idea of a nation-state?)

Through this course, students will learn to analyze the ways identities impact human lives, relationships, and structures. The purpose of the course is not to try to answer questions about personal identity, social identity, or identity politics once and for all, but to have a rich and open discussion of the issues, and help shape a richer, and more nuanced private and public deliberations on identity and ethics beyond the classroom.

Contemporary Developing Countries: Entrepreneurial Solutions to Intractable Problems (107464)

Satchit Balsari
Tarun Khanna

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissons: None Enrollment Cap: n/a

What problems do developing countries face, and how can individuals contribute to solutions rather than awaiting the largesse of the state or other actors? Intractable problems – such as lack of access to education and healthcare, forced reliance on contaminated food, deep-seated corruption – are part of the quotidian existence of the vast majority of five of the world's seven billion people. Developing societies suffer from what we refer to as 'institutional voids' that make organized activities of all sorts difficult; think of the mundane but important physical infrastructure that allows us to get to work or school in the developed world, as well as our access to higher-order institutions such as the availability of information at our fingertips or the security of the rule of law. The course demonstrates that reflecting upon the nature of the developing world's intractable problems through different lenses helps characterize candidate interventions to address them. The scientist's hypothesis-driven and iterative experimentation, the artist's imagined counterfactuals through putting oneself in others' shoes literally and theatrically, and the planner's top-down articulation of boundary conditions, all tailor the ultimate solution.

Class Notes: This course's live lectures are scheduled for 3-4:15 p.m. Eastern time Mondays and Wednesdays, and students are encouraged to attend at that time. If you are unable to attend lecture synchronously, you will be able to watch recorded lectures instead and attend an alternate synchronous course session. All students are also expected to attend a weekly TF-led synchronous section.
General Education 1012
The Art and Politics of Propaganda: The Nazis and Their Legacy (108580)

*Eric Rentschler*

2020 Fall (4 Credits)  
**Schedule:** MW 1200 PM - 0115 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

As thinking beings we consider the limits of human potential and wonder what is the worst. The Nazis obsess us because they were masters of extremity who brought to the world unprecedented violence, destruction, and murder. They were also masters of propaganda who engineered sophisticated techniques of mass manipulation; in this endeavor cinema and modern media assumed a seminal role. This course considers why films proved to be so essential to the Hitler regime and so captivating to German audiences of the Third Reich. It also reflects on the continuing allure of Nazi sights and sounds for contemporary mass culture.

**Class Notes:** You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1014
Ancestry (203820)

*Maya Jasanoff*

2021 Spring (4 Credits)  
**Schedule:** TBD

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 240

 Everyone comes from somewhere. We carry our ancestries in our DNA, genealogy, family stories, and more. What do these forms of evidence tell us about who we are, as a species, as a social group, or as an individual? This course looks at ancestry from a range of perspectives: biology, anthropology, genealogy, history, law, and memory—from the origins of human populations to the origins of you. Whether or not you are coming into this course with a prior interest in genealogy or family history, you will leave it with a sharper sense of the role played
by ancestry in the terms we routinely use to describe ourselves—as well as in policies and practices shaping everything from citizenship law to college admissions. We will pay close attention to different kinds of evidence—particularly genetic and genealogical—the kinds of questions they answer or raise, and what happens when they collide. We will also explore in depth the implications of genetic ancestry testing for concepts of race, ethnicity, and nationality. By its end, the course should make you better able to uncover implicit assumptions in qualitative and quantitative data alike, and to assess a claim’s value and scope. Most of all, it will prompt you to reconsider you ideas about ancestry, lineage, and inheritance, and enrich how you think about identity in your life outside the classroom and after this semester, at Harvard and beyond.

Ethics of Climate Change (205079)
Lucas Stanczyk
2021 Spring (4 Credits)
Instructor Permissions: None
Instructor
Enrollment Cap: n/a

How should governments respond to the problem of climate change? What should happen to the level of greenhouse gas emissions and how quickly? How much can the present generation be expected to sacrifice to improve conditions for future generations? How should the costs of mitigation and adaptation be apportioned between countries? Should significant funds be allocated to the study of geo-engineering? We will consider these and other questions in an effort to understand our responsibilities in respect of climate change, with a special focus on the structure of the analytical frameworks that have been dominant among policymakers.

General Education 1018
How to Build a Habitable Planet (118517)
Charles Langmuir
2020 Fall (4 Credits)
Instructor Permissions: Instructor
Instructor
Enrollment Cap: 60

Schedule: TR 1200 PM - 0115 PM
The aim of this course is to place human beings in a universal and planetary context. You will learn where we come from beginning with the Big Bang and ending with modern human civilization and our relationship to the planet from which we have evolved and on which we depend. You will understand the factual evidence for the Big Bang, the origin of the elements, plate tectonics, evolution and climate change. From this story a process of planetary evolution emerges and we will consider whether this process is likely to be common or a unique accident. Earth history has been punctuated by a series of revolutions where the planet molts to a new level of functioning. Viewed in this context, human civilization is the latest molting of the planet, giving Earth the possibility of a conscious presence to itself and in the galaxy. Are we as human beings an agent of planetary evolution, or instead a parasite or cancer to planetary systems? This question provides a novel perspective on current environmental problems and how we might deal with them, and moves the question from technology to personal philosophy and behavior. It also casts a different light on the likelihood of alien civilizations and whether we need to fear them. Climate change is seen in a much broader perspective of the relationship between people and Earth, and how our personal behavior is not trivial, but central. Readings include the book How to Build a Habitable Planet, short recorded lectures to deliver the scientific content, and discussion sessions each week to address any difficulties and explore the broader implications for human beings of what we are learning. At the end of this course, you will have a greater understanding of the past, present, and future of the planet we call home, and the planetary consequences of your life decisions.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

The Stories We Tell (212851)

David Damrosch
Martin Puchner

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

The Stories We Tell is based on the premise that we are story-telling animals. There have been human societies without the wheel, but none without stories. We use stories to make sense of experience, to understand where we are coming from, and to orient ourselves in the world. Today, we are asked to produce stories to get into college, to run for president, to pitch start-up companies, and to turn scientific
insight into new policies. Where do these stories come from?

The course draws on our entire storytelling inheritance from around the globe. We single out different types of stories, from the hero-epics of the ancient world (Gilgamesh) and pedagogical story-collections (1001 Nights) to the invention of psychological realism by the first novelist (Murasaki Shikibu), and we supplement those with modern storytelling techniques from Asia (Eileen Cheng) to Latin America (Clarice Lispector). Since our most important stories are not confined to literature, we also include those religious and philosophical storytellers (Confucius; Socrates) as well as political stories (Declaration of Independence; Communist Manifesto) that have shaped human affairs. Along the way, we examine the technologies, from clay tablets and papyrus scrolls to print and the Internet, thought which these stories have survived into the early twenty-first century and are shaping our world today.

The course includes in-class exercises, research assignments (Wikipedia entries), and a final exam.

Human Evolution and Human Health (112339)

*Daniel Lieberman*

2021 Spring (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

How and why did humans evolve to be the way we are, and what are the implications of our evolved anatomy and physiology for human health in a post-industrial world? Why do we get sick, and how can we use principles of evolution to improve health and wellbeing? To address these questions, this course reviews the major transitions that occurred in human evolution, from the divergence of the ape and human lineages to the origins of modern humans. Also considered are the many effects of recent cultural and technological shifts such as agriculture and industrialization on human health.

What is Life? From Quarks to Consciousness (126148)

*Andrew Berry*  
*Logan S. McCarty*

2020 Fall (4 Credits)  
**Schedule:** MWF 0300 PM - 0415 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 75
This course views life through multiple lenses. Quantum physics involves uncertainty and randomness, and yet paradoxically it explains the stability of molecules, such as DNA, that encode information and are critical to life. Thermodynamics is about the universe’s ever increasing disorder, and yet living systems remain ordered and intact. This course will examine how these physical laws underpin life and how life itself has diversified since originating 3.5 billion years ago.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend live lecture synchronously three times weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Finding Our Way (126603)

John Huth
2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 50

How do you navigate our increasingly automated culture? In this course, we will use the theme of primitive navigation to open our eyes to the physical world in a direct and palpable manner. Basic principles include human cognition of physical and mental maps, dead reckoning, direction finding from nature. The course includes the basics of astronomy, including planetary orbits, meteorology, thermodynamics, bird behavior, electromagnetic radiation, optics, waves, tides, ocean currents, and fluid dynamics. Navigational practices of Pacific Islanders, Norse, medieval Arabs, and early western Europeans provide a focus. Main themes of the course will include automation bias, spatial cognition as a template for other forms of cognition, and reasoning when there is no ‘right’ answer. Some facility with algebra and trigonometry is useful. A series of hands-on projects are employed to understand navigational practices discussed in lecture.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Res Publica: A History of Representative Government (120049)

Daniel Carpenter

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

"A republic, if you can keep it." So did Benjamin Franklin characterize his hopes for American government. What did Franklin and others mean by republic, and why did he and so many others worry that it might be something hard to hold onto? This course will give you the theoretical basis and historical evolution of republics so that you can understand the American system of a democratic republic, now spread widely around the planet even as it is considered under threat. You will read Hamilton alongside Jefferson, Machiavelli alongside Montesquieu, and Angelina Grimké alongside Frederick Douglass. You will consider systems of governance in Republican Rome, medieval Europe, early modern England and France, Native American nations and the United States. The thinkers and founders you will read thought long and hard what freedom is, how to balance executive and legislative power, and why republics and democracies can be unstable. As a democratic republic, the United States places great faith in the capacity of voters to choose their rulers, who in turn make most of our policies. Is this faith misplaced? What is the role for virtue in a republic, and what is virtue? How does inequality undermine republican stability, and what might be done about it?

Screen reader support enabled.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Conflict Resolution in a Divided World (107669)
Daniel Shapiro
2020 Fall (4 Credits) Schedule: M 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 96

How should we understand conflict in our own lives and in the world around us? At all levels of society, people tend to approach conflict as an adversarial battle—communities polarize, ethnopolitical groups clash, and nations and international institutions face daily political tensions. To prepare you for a lifetime of civic engagement, this course empowers you with new pathways for examining enduring questions about the roots of conflict and interdisciplinary approaches for resolving it. We will explore rational, emotional, and identity-based perspectives on conflict resolution and connect these aspects to your own life challenges and to conflicts ranging from on-campus divisions to large-scale political disputes. Because conflict resolution often involves tough decisions and moral dilemmas, we also will examine models for understanding its broader sociopolitical and ethical dimensions. The hope is that, by the end of this course, you will have a deeper understanding of conflict resolution and will be better equipped to navigate its many contours to advance the vision of a more peaceful world.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. Texts in Transition (212840)
Ann Blair
Leah Whittington
2020 Fall (4 Credits) Schedule: MW 0300 PM - 0415 PM
Instructor Permissions: Instructor Enrollment Cap: 50
We live in a moment of rapid changes in the ways we communicate. As our writing becomes ever more digital—and paradoxically both more ephemeral and more durable—the attitudes and tools we have for preserving our culture seem more complex and fluid. This course studies how written language—text—travels through time and across media. We will ask: how good are texts for capturing, transmitting, and preserving human experience? How have texts come down to us from the distant past? How do we ensure that what we write today will survive into the future? As we investigate contemporary approaches to cultural preservation, we will consider how pre-modern European cultures transmitted and transformed texts, and created institutions that we still rely on today, including museums, libraries, and archives. Each week you will observe or apply methods of preservation, restoration, destruction, translation, and transmission in an attempt to preserve a personal artifact. We will also read works of literature that reflect on questions of durability, ephemerality, and written memory. Students will work through weekly assignments toward a final project focused on studying, curating, and preserving a textual source of their choice.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Global Feminisms (212848)

*Durba Mitra*

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 60

Feminism shapes the world we live in today. Debates about women's and sexual rights define almost every public debate today -- from sexual harassment, to electoral politics, to development, public health, human rights, and political protest. But when, and where, did ideas of women's equal rights and liberation emerge? This course digs into the deep history of feminism from a global perspective. It traces the intimate relationship between feminism, colonialism, and racism in case studies from America, Europe, Asia, Africa, and the Middle East, from the eighteenth century until today. We will immerse ourselves in rare materials on transnational and global feminisms in digital archives and use the tools of feminist thought to critically
engage concepts like decolonization and decarceration. Over the course of the semester, you will build a toolkit of critical thinking and writing skills by engaging diverse primary sources, including political writings of women of color and colonized women, short stories, posters, movies, and human rights reports. You will come away from the course having a deeper understanding of ideas of equality and justice that define politics today.

Readings will highlight marginalized authors, women writers, especially women of color authors, from previously enslaved women in the US South to indigenous people to colonized women in India and Africa. Reading assignments will focus on primary historical sources and encompass diverse genres, from political thought and speeches to fantasy fiction and posters.

Students will build critical skills through assignments that build source analysis skills over the course of the semester, including a feminist mixtape, a short reflective response to online archives, and a final creative project.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Experiments that Changed Our World (212854)

Philip Sadler

2020 Fall (4 Credits) Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: Instructor Enrollment Cap: 50

Facing the edifice of preexisting knowledge, how are breakthrough scientific discoveries made that contradict the existing canon? Twelve great experiments that have transformed our understanding of nature will guide us, first through immersion in the scholarship and popular beliefs of the time. Next, how did the discoverer prepare? What were the motivations, prior experiences, and training that led to the threshold of a fruitful advance? Then, to the degree possible, we will carry out the exact same investigations, building our own simple equipment from scratch, duplicating the challenges of wresting patterns from noisy and incomplete data. Students will compare their results to both private and published versions of the original research. The course will examine the magnitude of the cognitive shifts experienced and the often uphill battle to acceptance. We will build an understanding of the nature of
scientific progress, examining how the mastery of natural phenomena leads to new technologies and how these can contribute to further scientific discovery.

Experiments are drawn from the natural sciences, ancient to modern, from Eratosthenes measuring the earth's size to Rosalind Franklin determining the structure of DNA. We will consider how these discoveries continue to impact society, as well as the many ethical questions raised. The course will examine the difficulty of accepting new experimental evidence falsifying accepted scientific paradigms and how this remains an issue that plays out in current society. By unpacking these 12 experiments, students will be able to better prepare for their own future discoveries and contributions.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Sleep (212896)

*Charles Czeisler*

*Frank Scheer*

2020 Fall (4 Credits)  

**Schedule:** TR 1030 AM - 1145 AM  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

What is sleep? Why do we sleep? Why don’t we sleep? How much sleep do you need? What are circadian rhythms? How do technology and culture impact sleep? This course will explore the role of sleep and circadian timing in maintaining health, improving performance and enhancing safety. We will evaluate the causes and consequences of the epidemic of sleep disorders and deficiency in our society, with particular attention to impacts on brain (learning and memory, mood and cognition) and body (appetite and metabolism, hormones and heart) functions. Personal and public policy approaches to issues such as drowsy students, drowsy drivers and drowsy doctors will be addressed.

Class Notes: This course is offering two sessions to accommodate students in
differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

General Education 1039

Higher Education: Students, Institutions, and Controversies (212844)

Manja Klemencic

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

Though we may think of universities and colleges as centers of learning and research, they too are subject of teaching and burgeoning research. This course explores contemporary higher education institutions and their students through a number of different perspectives and approaches. We identify major issues and controversies in higher education – how students learn, unequal access, the rise of corporate universities, changing funding models for higher education, politics of higher education, and more. We will read what
leading scholars from the interdisciplinary field of higher education studies have written about these and other issues. Through personal reflection and insights from guest speakers from Harvard administration, we will look behind the scenes at Harvard student experiences. We will also seek to understand the workings of different types of higher education institutions, conducting field visits to universities and colleges in the Boston area. The centerpiece of this course is a capstone project that involves original research --theoretical or empirical or applied-- on a chosen higher education topic. The capstone research projects will be showcased on an online platform open to the Harvard community to inform and inspire practice and future research. This is an opportunity to gain perspectives on established and emerging areas of higher education research, insights into today’s changing higher education landscape, and the tools to address higher education issues. As student researchers you will develop agency to voice, critically examine and propose solutions to higher education issues you care about at Harvard and beyond.

Anime as Global Popular Culture (125611)

*Tomiko Yoda*

2020 Fall (4 Credits)  
**Schedule:** TR 0430 PM - 0545 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 50

In this course, students will learn to engage Japanese or Japanese-style animation (sometimes known as anime) through two-pronged approaches. First, the students will learn to evaluate the aesthetic and socio-cultural relevance of anime in relation to the criteria and perspectives developed through the study of more established artistic forms such literature, cinema and visual arts. We will cover topics including, anime’s generic conventions, formal aesthetic, and narrative motifs. Secondly, students will learn to address the cultural value of anime in manners that recognize the specificity of its media ecology, encompassing the modes of production, distribution, and consumption. In particular, we will pay close attention to the ways media technology, industrial production of anime, marketing, and fan culture are integral facets of anime eco-system. In this sense, we will study anime as a node in the global network, involving diverse commercial as well as non-commercial medias such as graphic novels, live-action films, video games, character merchandises, and fanzines and other fan practices. The course as a whole suggests that we need to work between these two approaches in order to understand anime as a medium of global popular culture today.

**Class Notes:**  
This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. Deep History (205088)

Matt Liebmann
Daniel Smail

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

When does history begin? To judge by the typical history textbook, the answer is straightforward: six thousand years ago. So what about the tens of thousands of years of human existence described by archaeology and related disciplines? Is that history too? This introduction to human history offers a framework for joining the entirety of the human past, from the long ago to the present day, in a single narrative that stretches across many disciplines. We will explore a series of interrelated themes each of which invites questions that travel across time and space. The material presented through lectures, discussions, and activities will not only guide students through a collaborative exploration of human experience, but will also encourage them to contemplate how such experiences mirror and contrast with their own. To help anchor ourselves in the timeline of past and present, we will engage with the world-class collection of artifacts in Harvard’s museums, giving students a unique, hands-on opportunity to experience human history through material remains. Course notes: No prior college-level course in archaeology, history, or a related field is required or assumed, and First-year students are welcome. Because the course touches on ideas in many disciplines beyond history and archaeology, including art, economics, human evolutionary biology, psychology, and religion, we welcome a range of students who can bring unique perspectives and expertise to class discussion.

General Education 1046

Evolving Morality: From Primordial Soup to Superintelligent Machines (203129)

Joshua Greene

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 200

In this course we’ll examine the evolution of morality on Earth, from its origins in the biology of unthinking organisms, through the psychology of intelligent primates, and into a future inhabited by machines that
may be more intelligent and better organized than humans. First, we ask: What is morality? Many people believe that morality descends from above, as divine commands or as abstract, timeless principles akin to mathematical truths. Here we take an empirical approach to morality, viewing it as a natural phenomenon that rises up from below—born of the strategic interactions among lifeforms and societies struggling to exist. Next, we take a scientifically informed look at the foundational questions of moral and political philosophy. Many people believe that the “is” of scientific knowledge has nothing to do with the fundamental "oughts” of morality, that science and morality exist in separate realms (and belong in separate courses). Here we challenge this assumption, asking whether our scientific self-knowledge can, and should, change our views about what’s right and wrong and how a society should be organized. Finally, we consider the distinctive moral challenges posed by what may be the next stage in Earth’s evolutionary history: the rise of artificial intelligence. Many people believe that there is and always will be a fundamental division between human minds and machines. Here we challenge this assumption, going beyond the tropes of science fiction and drawing instead on the latest advances in cognitive neuroscience and neurally inspired artificial intelligence. Our conclusions will have implications for moral challenges of the near and more distant future: Can self-driving cars, military drones, and life-like robots be programmed to behave morally? Will artificial intelligence displace human labor? If so, how can our societies adapt? Could machines displace humans entirely? If so, how can we stay in control? If machines do take over, will they be our conquerors or our children? Across diverse topics, this course explores the implications of a single idea: that the wonder we see around us, and ahead of us, is the product of competition and cooperation at increasing levels of complexity.

Course Notes: Not open to students who have taken PSY 2250. Prior to Spring 2019, this course was offered as PSY 1002.

Requirements: Anti-requisite: Cannot be taken for credit if PSY 1002 already completed

General Education 1051

Reclaiming Argument: Logic as a Force for Good (112199)

Ned Hall

2020 Fall (4 Credits)  

Instructor Permissions: Instructor Enrollment Cap: 12

Schedule: M 0900 AM - 1015 AM

Our lives are awash in argument and persuasion. This course aims to teach you how to manage argument and persuasion in your own life – not just with skill, but ethically. Accordingly, we will have two main goals. The first is to develop your skill at recognizing the myriad ways in which language can be used and misused as a tool for persuasion, by teaching you a variety of techniques drawn from formal logic, linguistics, and the discipline of argument-mapping. Master this skill, and anytime someone attempts to persuade you of something, you will be able to understand the structure of their attempt so deeply that you need not fear manipulation, but can decide for yourself whether you wish to sign on to the conclusion they want you to reach. Our second goal is even more important: we hope to show you how you can – and why you should – construct your own arguments with such clarity, honesty, and logical transparency that the people you direct them to will be optimally placed to decide, for themselves, whether and why they ought to agree with you. In this way, you will come to see argument not primarily as a contest to be won or lost, but
as something that should be reclaimed for a more noble purpose: building genuine understanding between people, even across profound differences of viewpoint.

Class Notes: This course has five separate times for instructor-led sessions each week. Students should enroll in only one of these; each has a separate listing in the course catalog. Additionally, you thereby commit to attending a TF-led section at the same time on the corresponding weekday. Please see the course Canvas site for more information and a detailed schedule.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

General Education 1052

Race in a Polarized America (116248)

Jennifer Hochschild

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

How do we manage issues of race, ethnicity, and immigration in a polarized political era? What role did race play in the election of President Trump, after eight years of the presidency of Barack Obama? How can we be good citizens of the world when Americans have such mixed views and take such mixed actions in engaging with racial hierarchy, identity, or interaction?

This course addresses these questions by examining policy disputes around issues such as incarceration and policing, free speech, the role of biology in ancestry and medical care, electoral politics, activism, and movement across borders. We will examine class, nationality, and gender differences within and across groups, and how group boundaries are made stronger or weaker. We will consider how to reduce unproductive polarization, and how you -- the new generation of citizens of the world -- can promote a better America even, or especially, when we do not agree on just what "better" entails.

Course readings range from public speeches and interviews to works in political science, sociology, economics, and a bit of genomic science. You will learn how and where the United States has progressed in promoting group equality and fairness, as well as where it has not or has even moved backwards. You will end the course with a deeper understanding of the core American paradox of the persistence of group hierarchy in a country dedicated to democracy, equality, and liberty, and what people such as yourselves can do to resolve that paradox.

General Education 1053

The Global Heart Disease Epidemic: Stopping What We Started (215875)

Richard Lee

2020 Fall (4 Credits)  Schedule:  MW 0300 PM - 0415 PM

Instructor Permissions:  Instructor  Enrollment Cap:  50

Heart diseases have killed occasional humans since ancient times, but only in the past century have heart diseases become epidemic throughout the world. In fact, the first description of a heart attack in a human was not until 1912. In the current century, heart diseases will be the leading global cause of death, and the majority of those heart disease deaths will actually occur in the developing world. The epidemic of heart disease has been driven by many social, economic and technological events. Some of these events have been dramatically detrimental to human health, such as the accidental invention of the American cigarette by a slave in North Carolina in the 19th Century—an invention that is projected to kill one billion people between 2000 and 2100. Other events, such as advances in public health and safety, have been beneficial by extending lifespan and preventing early death, but they have also allowed age-related heart diseases to explode. Technological advances have improved our economic productivity but also led to changes in our lifestyles that promote heart diseases. In this course, we will consider the complex relationship of health and society by examining the epidemic in common heart diseases. We will explore how major lifestyle factors such as tobacco, alcohol, exercise and diet affect health, and we will also consider how economics and politics powerfully influence health. We will also discuss the role of government and our obligations to each other, and to future generations.

Class Notes:  This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. General Education 1054

Political Economy and Its Future (126203)

Dani Rodrik
Roberto Mangabeira Unger

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

The world’s economic and political order reels under mounting challenges: the global financial crisis, the austerity debacle, a slowdown in economic growth and productivity, the aggravation of inequality and the inadequacy of conventional responses to it, the discrediting of the Washington Consensus, the globalization backlash, the re-emergence of nationalist politics in Europe and the United States, and a contest over the meaning, value, and requirements of democracy. We examine connections among these phenomena and explore alternative ways of thinking about contemporary market economies and their reconstruction. We organize the course around four related themes: the worldwide financial and economic crisis of the recent past and its management; the effort to promote socially inclusive economic growth in richer as well as in poorer countries; the nature, fate, and dissemination of the new knowledge-intensive style of production; and the past, present, and future of globalization.

Course Notes: Students should have some previous acquaintance with economics but no advanced economic training is required.

Jointly offered with the Law School.

Human Nature (202992)

Erin Hecht
Martin Surbeck

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 100

This course asks: What makes us behaviorally and psychologically human? In what ways are humans similar to other species and in what ways are we different? What are the evolutionary origins of the behavioral and psychological features found across human societies including parental love, sibling rivalry, pair-bonding, incest aversion, social status, war, norms, altruism, religion, language, and cooking? At the same time, how can we account for the immense diversity we observe in behavior and psychology across time and across societies? Tackling these questions within a broad evolutionary framework, the course will draw on the latest insights and evidence from evolutionary biology, primatology, anthropological ethnography, neuroscience, genetics, linguistics, economics and psychology. We’ll fully contextualize contemporary behavior by examining studies of non-human primates, especially chimpanzees, and a broad breadth of human variation, based on comparative studies of hunter-gatherers,
herders, agriculturalists and—the most unusual of all—people from industrialized societies. We'll also consider how cultural evolution has shaped our genetic evolution, both over our species' deep history and in more recent millennia. Along the way, we'll consider how understanding the evolutionary origins of human behavior, psychology and culture informs how we approach contemporary issues such as patriarchy, polygamous marriage, sex differences, child abuse, mating preferences, homosexuality, racism, psychological variation among populations and the use of oral contraceptives.

Class Notes: This course's live lectures are scheduled for 10:30-11:45 a.m. Eastern time Mondays and Wednesdays. If you are unable to attend lecture synchronously, you will be able attend an alternate synchronous course session involving a group viewing and discussion of the recorded lecture. All students are expected to participate in: (1) either live lectures or scheduled asynchronous group viewings of live lectures; (2) a weekly synchronous TF-led section; (3) regular small working group meetings of 4-5 students; and (4) asynchronous Slack discussions.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

World Health: Challenges and Opportunities (126193)

Sue J. Goldie

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 135

Extraordinary changes in the world present both risks and opportunities to health—unprecedented interconnections across borders, rapidly shifting global demographics, and changing patterns of diseases and injuries. This course will challenge your assumptions about the world's populations, as you discover surprising similarities and unexpected differences between and within countries. Approaching the concept of health as a fundamental prerequisite for building strong societies, we will explore its connection to human rights, international relations, and sustainable development. Using case examples of contemporary health challenges, we explore the influence of social, political, and environmental determinants on health, particularly transnational risks associated with globalization. We consider solutions from an array of...
perspectives, contributions from within and outside the health sector, and interventions at the local, national and global levels. By the end of the course, you will be equipped to thoughtfully analyze important health challenges and appreciate how evidence is contextualized and translated to policy and action.

Brains, Identity, and Moral Agency (109360)

*Steven Hyman*

2021 Spring (4 Credits)  
**Schedule:** TBD

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 50

Advances in brain science have the potential to diminish many forms of human suffering and disability that are rooted in disordered brain function. But what are the ethical implications involved in altering the structure and function of human brains? What's at stake when we have the ability to alter a person's narrative identity, create brain-computer interfaces, and manipulate social and moral emotion? In this course, you will ask and attempt to answer these questions, and discuss the implications of mechanistic explanations of decision-making and action for widely-held concepts of moral agency and legal culpability. This course will prepare you to be a thoughtful citizen of a world characterized by rapidly emerging understandings of human brain function, and by new technologies intended to repair or influence human brains.

**Course Notes:**  
For students who have taken MCB 80, it is contemplated that there will be a section that incorporates more advanced concepts from neurobiology.

**Recommended Prep:**  
LPS A or LS 1a, a 4 or 5 on the AP Biology exam, or equivalent experience in biology

Creativity (215890)

*David Atherton*

2021 Spring (4 Credits)  
**Schedule:** TBD
Instructor Permissions: None Enrollment Cap: n/a

Geniuses are said to possess it. Self-help books offer to teach it. Both the arts and the sciences celebrate it. It sits at the heart of some of our oldest myths and is the subject of up-to-the-minute neuroscientific research. Some say it comes in momentary flashes; others call it a way of life. Some identify it as the key to deep fulfillment; others claim that it entails intense suffering. Many agree that it sets us apart as a species—but does it? What is creativity? How have humans made sense of it across centuries and cultures, and what role might it play in our lives today? Exploring creativity takes us into the very question of what makes us human, and the answers we discover can help equip us for the lives we will lead beyond the classroom. This course casts a wide net, drawing upon humanistic and scientific approaches as it takes us from ancient treatises on the art of poetic composition to modern brain scans, and from centuries-old debates over intellectual property to present-day questions of artificial intelligence. Is creativity the same as originality? Can plagiarism be creative? Should one own the fruits of one’s creative labor? Do literary and scientific invention spring from the same source? What happens in the brain at moments of creative insight? Is there an ethical component to creativity? Prepare to question some of our deepest-held assumptions: about genius, invention, expression, originality, identity—and humanity.

General Education 1070

Life as a Planetary Phenomenon (120881)

Dimitar Sasselov

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: 300

What is it about Earth that enables life to thrive? This question was reinvigorated with the 2016 groundbreaking discovery of a habitable planet around the nearest star, Proxima Centauri. A decade of exploration confirmed that such planets are common in our galaxy, and the commonality of habitable planets has raised anew some age-old questions: Where do we come from? What is it to be human? Where are we going? Are we alone in the universe? And last, but not least, what are the dangers of becoming a multi-planet species? Life and planets are intricately linked through geological processes, chemistry, and ultimately, biology, all of which you will explore in this course as we endeavor to answer questions about our place on this planet and beyond. You will gain knowledge of some natural sciences fundamentals while exploring current issues in biotechnology and space exploration technology. This course aims to equip you with both a conceptual understanding of Earth and its place in the universe as well as the quantitative reasoning to think critically about it. Hands-on experiences are central to accomplishing these objectives.

General Education 1071

African Spirituality and the Challenges of Modern Times (212849)

Jacob Olupona

2020 Fall (4 Credits)  Schedule:  TR 0900 AM - 1015 AM

Instructor Permissions: Instructor  Enrollment Cap:  50

This course explores Africa's religious and spiritual heritage on the continent in precolonial, colonial, and postcolonial periods. We begin by examining the main principles of African religious traditions, considering how they have changed and adapted to current situations today. We investigate the historical and contemporary relevance of indigenous traditions with attention to: cosmology, cosmogony, mythology, ritual practices, divination, healing ceremonies, and sacred kingship within both rural and urban African life. We expound how spirituality defines and influences other cultural and social practices, such as statecraft (chiefs, kings, diviners as guidance of tradition); the environment (climate change and environmental degradation); health (traditional healing rites and new religious movements' approach to healing); women, gender, and social justice; music and the arts; and questions of human rights as well as ethnic and racial conflicts. The course additionally explores how African indigenous religion has responded to Islam and Christianity on the continent, resulting in what we often call "Africa's Triple Heritage." It subsequently examines African religious sensibilities in the contemporary period, briefly considering how African religions are portrayed in popular culture (with such films as Black Panther) as they relate to issues of modernity and community relations. Finally, while we examine the movement of African religion to the so-called "New World," we look at the status of African spirituality as a global tradition and its role in the creation of new immigrant identities in Europe and the Americas.

Class Notes:  This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes:  You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1074

The Ancient Greek Hero (113501)

Gregory Nagy

2020 Fall (4 Credits)  Schedule:  M 1200 PM - 0115 PM
How to face death? Concentrating on this central human question, we will explore some of the greatest works of ancient Greek literature (in English translation). For the Greeks, a special way to address the problem of death was to think long and hard about what they called heroes in their myths. Our purpose in this course is to extend that kind of thinking to the present. Assignments invite you to engage in personal reflections on the meaning of life and death in the light of what we read in Greek literature about the ordeals of becoming a hero.

Class Notes: This course meets for live plenary sessions at noon Mondays and 10:30 a.m. Tuesdays (Eastern time) each week. Students are encouraged to watch one or both of the plenary sessions live, but if they are unable to do so, they will have opportunities to watch them at another time. Any students who do not attend a plenary session live will have alternate synchronous activities arranged; additionally, all students will attend one TF-led synchronous section meeting per week. Students will participate as a highly prepared member of a panel for at least one plenary session per term.

General Education 1076

Equity and Excellence in K12 American Schools (107341)

Katherine K. Merseth
Jacob Fay
Each year, between September and June some 52 million students attend public schools in America. But why? Why do we have K-12 schools in America? What is their purpose? What do we expect schools to accomplish? Headlines decrying the failed state of our nation's schools and clarion calls for the improved quality and reach of American schooling in the 21st century are commonplace. Against this backdrop, the course grapples with questions that have defined American K-12 education throughout history. What constitutes educational excellence? Is it realistic or naïve to strive for both equity and excellence for all students? Who are we educating and how important are student identities to schooling outcomes? Given that educators, families, politicians, and the courts often disagree vehemently about the answers to these questions, the course explores these debates and considers who and what will define the future of American K-12 education and its role in society.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

General Education 1078

Disease, Illness, and Health through Literature (214343)

Karen Thornber

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

Inevitably, at some point in our lives, most of us will develop a health condition that requires medical treatment and care. We also, regardless of our career, are likely to be called on to provide care for individuals (loved ones and/or patients) whose health conditions make it impossible for them to care for themselves. Moreover, as COVID-19 has made glaringly apparent, economic, racial, social, and other inequalities mean many members of society are especially vulnerable to serious health conditions. How can we be effective partners in care, both in our personal lives and, for those in the health professions, in our professional lives? How can we best prepare ourselves to be effective care partners, whether we are the givers of care, the receivers of care, or both? What should our short-term and long-term goals be as individuals, communities, and societies, and how can we best implement these goals? As healthcare costs soar and considerable suffering from disease and illness continues despite regular advances in medical technology, what should we advocate for in our communities, our societies, our nations, and beyond to ameliorate if not eradicate racism, sexism, classism, ableism, ageism, ethnocentrism/jingoism, heterosexism, and similar and frequently intersecting forms of oppression, easing the burden of disease and illness on caregivers and care recipients alike? This course provides the ideal space for you to examine, contemplate, discuss, and debate these and similar fundamental questions, which all of us increasingly must face. Class discussions, readings, and written assignments will provide you with the tools to become more effective advocates for and providers of compassionate, empathic care, both now and in the future. Engaging with a diverse range of fiction, drama, creative non-fiction, life writing, and memoirs from five continents by physicians, patients (including physician-patients), activists, and other concerned individuals, the course challenges many fundamental preconceptions regarding disease, illness, health, and care. This course helps us interrogate what it means to promote healing and wellbeing in our personal and professional lives particularly in the current COVID era.

Class Notes: Every week, students in Gen Ed 1078 are expected to participate in 2 hours and 15 minutes of synchronous (live) class via Zoom. This will consist of participation in 1) either a 75-minute synchronous
lecture or a 75-minute live peer learning session as well as 2) a 1-hour live section with a TF.

This course’s live lectures are scheduled for 3-4:15 pm Eastern time Mondays and Wednesdays, BUT, students are only required to attend one live lecture every other week; the attendance schedule will be determined the first week of class. Moreover, the MW 3-4:15 time is flexible, and if student time zones require it, the professor will hold every other Wednesday’s live lecture at a different time.

Students must attend the live lectures to which they're assigned, but they're also welcome to attend as many additional live lectures as they'd like. All lectures will be recorded, and students are responsible for watching the recordings of lectures they do not attend synchronously. Weeks where students do not attend a live lecture, they are required to attend a synchronous peer-learning session.

Every week, all students will also attend a required synchronous section with their TF; section times will be determined based on student preferences.

General Education 1079

Why is There No Cure for Health? (125932)

David Cutler

2020 Fall (4 Credits) Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

Around the world, billions of dollars are spent on health care treatments, public health initiatives, and pharmaceutical research and development. So why are we still not able to prevent preventable diseases, provide affordable healthcare for millions of people, and deliver cures for curable diseases? And what are the best ways to address these issues?

Because these questions are so large, we will focus our discussion around questions like: What steps should be taken to address epidemics? How should the United States reform its health care system? And how should prescription drugs be produced and sold?

We will explore how social scientists address empirical questions, the types of data that are available, how those data are analyzed, and the confidence with which causal statements are made. By the end of the course, you will be able to dissect a large question—such as how to reform American healthcare—into its technological, social, economic, and moral components, and weigh potential solutions according to these guiding vectors.

Class Notes: You are expected to attend live lecture synchronously twice weekly at
the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1080

How Music Works: Engineering the Acoustical World (205412)

Robert Wood
Kelly Miller

2020 Fall (4 Credits) Schedule: M 0900 AM - 1015 AM
Instructor Permissions: Instructor Enrollment Cap: 50

How does Shazam know what song is playing? Why do some rooms have better acoustics than others? How and why do singers harmonize? Do high-end musical instruments sound better than cheap ones? How do electronic synthesizers work? What processes are common in designing a device and composing a piece of music? How is music stored and manipulated in a digital form? This class explores these and related themes in an accessible way for all concentrators, regardless of technical background. The class is driven by hands-on projects to enhance your technical literacy, a critical skill for anyone designing solutions to today’s most pressing and complex issues. The projects are designed so that the creativity of students in all fields will have a role to play. Lectures, demonstrations, and guest lecturers/performers are integrated into the class to build foundational knowledge and to inspire. We will also explore wider social and historical themes related to music and acoustics. The class is approached from an engineering perspective, using music and musical instruments as the framework to introduce a broad array of concepts in physics, mathematics, and engineering. Requires no previous exposure to physics or calculus beyond the high school level.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

The First Nine Months (212874)

David Haig

What makes a human? A baby develops from a single cell during the nine months of gestation, but the process that begins so simply has complications that stretch beyond the womb into questions of human identity and individuality. This course will explore the process of embryonic and fetal development, highlighting complicated questions such as the medical dilemma of maternal-fetal conflict, which occurs when doctors must evaluate the competing health needs of both fetus and mother. You will study disorders of pregnancy such as gestational diabetes and preeclampsia, as well as types of nonstandard fetal development, like monozygotic twins or microchimerism, that result in human diversity. The course will also consider the kinds of families made possible by ovum donation, sperm donation, surrogate pregnancies, and the like, as well as the questions of bioethics raised by such assistive reproductive technologies.

The Border: Race, Politics, and Health in Modern Mexico (204416)

Gabriela Soto Laveaga

Why does the Mexico-U.S. border continue to be a space for debate and controversy? This course
examines how the creation of the U.S.-Mexico border in 1848 shaped modern Mexican society from the nineteenth century to our present. For many, the border served (and serves) as a protective barrier from poverty, violence, and, especially, disease. By the early twentieth century many Mexican bodies were perceived as "alien," "illegal," and in need of patrolling. Yet these descriptions were also used by Mexican politicians to describe and isolate groups such as Indigenous and Chinese within Mexico. By examining, for example, Mexican public health campaigns, response to epidemics, and how Mexican ideas of race and health played out within Mexico we can better understand the U.S.-Mexico border today.

What Is a Book? (212857)

David Stern

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

You have spent much of your life since kindergarten (and perhaps earlier) reading books; and you will spend much of your time at Harvard continuing to read them. But do you even know what a "book" is? Is it merely a conveyor, a platform, for presenting a text? Can a book have a use other than being read? Does the nature of the material artifact inscribed with words shape or influence the way you understand their meaning? Do people read a scroll differently than they do a book with pages? Or a digital text on a screen? Why does the physical book persist in the digital age? To answer these questions, we will focus upon "the book of books," namely, the Bible, as it has changed and developed in Jewish and Christian tradition over the last two thousand years. This course is not about the Bible but about the book. The reason we will use the Bible as our primary example of a book is simply because it has undergone more changes as a material artifact than any other book in Western culture. Furthermore, its own impact upon Western book culture has been greater than that of any other book. We will make regular use of the manuscripts and rare printed books in Houghton Library. Direct contact with books as material objects will be the focus of the course.

General Education 1091

Classical Chinese Ethical and Political Theory (121778)

Michael J. Puett

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

What is the best way to live a fuller and more ethical life? Concretely what should we do to begin to live in a
more flourishing and inspiring way? Questions such as these were at the heart of philosophical debates in China. The answers that classical Chinese thinkers developed in response to these questions are among the most powerful in human history. Regardless of whether one agrees with them or not, they should be studied and taken seriously by anyone who cares about ethics, politics, and the ways to live life more fully.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

American Society and Public Policy (119025)

*Theda Skocpol*

*Mary Waters*

2020 Fall (4 Credits)  

**Schedule:**  

MW 0130 PM - 0245 PM

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

In a period of contentious politics, Americans are debating fundamental issues about economic wellbeing and social justice. How can the nation expand opportunity and security for workers and families following years of rising socioeconomic inequalities and shifts in the relationship of families to work? How do we regulate immigration and citizenship and cope with surges in refugees and asylum seekers? How have ongoing partisan polarization and rising economic inequalities influenced U.S. responses to the current COVID-19 pandemic and the accompanying economic crisis? Controversies in these areas are bitter and persistent, and this course will introduce students to the ways the United States has dealt with each of set of challenges.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

2020 Fall (4 Credits) Schedule: TR 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a

If you are sick or hurt, whether you live or die depends not only on biological factors, but social ones: who you are and where you are, what sort of healthcare system is available to help you survive, and what kind of care is available to help you recover, if society believes you deserve it. The global coronavirus pandemic illustrates with dramatic urgency the role social forces play in patterning health inequities and determining individual fates. The vulnerabilities of those most likely to get sick and to die from Covid-19 stem from the ongoing effects of systemic racism on racialized subjects, the devaluation of eldercare and precarity of low-paid work under neoliberal forms of governance, and enduring material effects of colonial-era power structures that render health care systems dangerously weak or inaccessible for many communities. Now, as ever, it is imperative to develop frameworks and methodologies to identify and to intervene effectively in harmful social configurations that cause illness and suffering.

Most medical research narrowly focuses on the biological basis of disease, but this course takes a novel biosocial approach to reveal how governments, institutions, and histories shape health and well-being, how poverty and racism get into someone’s lymph nodes, how cost-saving measures manifest as tuberculosis in someone’s lungs. In doing so, the course challenges conventional assumptions within the field of global health—examining how interventions influence what happens after a catastrophe in unexpected ways, how the persistence of health inequalities over centuries can be explained, how the structures of powerful institutions influence the policies they develop, how the poor deserve not only health care but high quality health care, and how caregiving and global health are urgent moral practices.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1094
Confronting Climate Change: A Foundation in Science, Technology and Policy (126633)
Daniel Schrag
This course will consider the challenge of climate change and what to do about it. Students will be introduced to the basic science of climate change, including the radiation budget of the Earth, the carbon cycle, and the physics and chemistry of the oceans and atmosphere. We will look at reconstructions of climate change through Earth history to provide a context for thinking about present and future changes. We will take a critical look at climate models used to predict climate change in the future, and discuss their strengths and weaknesses, evaluating which forecasts of climate change impacts are robust, and which are more speculative. We will spend particular time discussing sea level rise and extreme weather (including hurricanes, heat waves, and floods). We will look at the complex interactions between climate and human society, including climate impacts on agriculture and the relationship between climate change, migration and conflict. We will also discuss strategies for adapting to climate change impacts, and the implications of those strategies for sub-national and international equity.

The last half of the class will consider what to do about climate change. First, we will review the recent history of greenhouse gas emissions, as well as various national and international efforts to limit them in the future. We will discuss reducing carbon emissions using forestry, agriculture and land use, and then focus on how to transform the world's energy system to eliminate CO2 emissions. We will conclude by examining different strategies for accelerating changes in our energy systems to limit greenhouse gas emissions.

The course is intended as a foundational course on climate change for students from around the university, preparing them for more specialized courses in their individual concentrations or degree programs. No prerequisites are required; students will be encouraged to apply their different preparations and interests to the various individual and group assignments. The course emphasizes the scientific and technological aspects of climate change (including the clean energy transition), but in the context of current issues in public policy, business, design and public health.

Class Notes: GENED 1094 is a University Course, which means that students from all Harvard schools are able to enroll. While graduate students will be separated from undergraduates in sections, all students will learn together in other ways and benefit from each other's perspectives.

**General Education 1095**

Is War Inevitable? (214413)

*Derek Penslar*

2021 Spring (4 Credits)  Schedule:  TBD  Enrollment Cap:  50

Why is there war? Will there always be war? This course tackles these questions through a historical
overview of human conflict that incorporates approaches from International Relations, Psychology, Ethics, and Comparative Literature. The course begins by discussing the socio-biological roots of human aggression and altruism, and pre-modern justifications for war and attempts to place limits on its conduct. We will then move on to a series of case studies of modern wars, divided into six types - interstate, revolutionary, civil, colonial, separatist, and global. We will examine each type of war’s effects on fighters and non-combatants alike and repercussions for post-war society. We will see how each type of war has fostered different approaches – ranging from international humanitarian law, organizations like the League of Nations and United Nations, and anti-war protest movements – to the prevention, mitigation, or resolution of conflict. We will conclude with two final case studies: the Cold War (1947-1991) and "War on Terror" (2001 -), which have reduced war's intensity but rendered it more difficult to eradicate and more potentially destructive.

Our readings will combine textbook overviews of wars and their aftermath, in-depth studies of specific topics, and primary sources such as works on military strategy and just war theory, representations of war in literature and cinema, and diaries and memoirs. Course requirements include a take-home midterm, a final examination, and two short papers based on the primary sources.

Tradition, Performance, and Culture (125216)

Joseph Nagy

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

What is culture, and how does it shape us? This class explores how folklore (a broad term meant to include all aspects of tradition, custom, and heritage) and its expressive manifestations shape national, regional, and ethnic identities. In particular, we examine the function of folklore within the communities that have, perform and use these cultural goods, as well as the ways traditions are expressed and performed in daily life. In this course, you will study major forms of folklore (e.g., myths, legends, beliefs, rituals, festivals), as well as the theoretical approaches (e.g., performance theory, the ethnography of communication) used to interpret cultural documents drawn from the world of traditional expression and ritualized behavior.

From Mexico to India, San Francisco to Tokyo, natural disasters have shaped both the surface of our planet and the development of civilizations. These catastrophes claim thousands of lives and cause tens of billions of dollars in damage each year, and the impact of natural disasters is only increasing as a result of human population growth and urbanization. This course uses the methods and skills associated with earth science to help you to develop an understanding of both the causes and impacts of these events. Readings will be assigned from the textbook *Natural Disasters* by Patrick Abbott (11th edition), to deliver the scientific content - recorded lectures will be available throughout the course, and live lectures and discussion sessions will be held each week to address any difficulties with the material, to facilitate discussion, and to provide an opportunity for interacting with fellow students and the teaching staff. By the end of this course, you will be able to understand the ways in which societies can systematically anticipate and prepare for the kinds of natural disasters which many people have come to assume are inevitable.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.
quintessential example of the "exotic, mysterious ancient world" – Ancient Egypt – to interrogate these questions. Who has "used" ancient Egypt as a construct, and to what purpose? Did you know that pyramids, mummies, King Tut, and Cleopatra represent just the (overhyped) tip of a very rich civilization that holds plenty of life lessons for today? Combine the ancient Egyptians’ explanations of the world’s natural forces with all the social complexity of human interaction and you have a fully formed society—about four millennia of accumulated experience!

Can investigating the "real" ancient Egypt unpack our current misconceptions about the land of the pharaohs? Hardly morose, tomb-building "zombies," the Egyptians embraced life in all its messy details. Piety and corruption, imperialism and isolationism, divinity and mortality all played significant roles in life along the Nile. What can we learn about the nature of politics and society in our time by seeing the parallels between the ancient past and today?

We will explore archaeology, modern Egyptomania, repatriation, new digital visualization technologies, and international politics. What was ancient Egyptian racism? What is archaeological racism? Who owns the past? Who needs it? We will take excursions into Egyptian art, history, politics, religion, literature and language (hieroglyphs), plus the evolution of Egyptology as a discipline. Field trips to the Museum of Fine Arts, Boston, the Peabody Museum, and the Harvard Semitic Museum are included, along with the Giza Pyramids in 3D, viewed in Harvard’s Visualization Lab classroom.

Students will gain a transformative appreciation for the outstanding monuments and intellectual traditions of ancient Egypt. And with newly broadened horizons, we will debunk the popular myths.

General Education 1102

Making Change When Change is Hard: the Law, Politics, and Policy of Social Change (212858)

_Cass Sunstein_

_Samantha Power_

2020 Fall (4 Credits)  
_Instructor Permissions:_  
_Instructor_  
_Schedule:_  
_MW 1200 PM - 0115 PM_

_How does change happen? When, why, and how do people, and whole nations, come together to influence large-scale policies and actions on issues like the environment, equality, criminal justice? Why do revolutions occur? This course will try to answer these questions, and do so by exploring a diversity of efforts related to societal change. In an effort to draw general lessons for those interested in making change, we will assess a range of political and legal approaches; examine mass movements and the leadership by organizations, governments, and individuals; and attempt to gauge outcomes. Using research from psychology, political science, and economics, and focusing on case studies, the course will explore the ideas behind several arguments: 1) big problems are rarely resolved with comparably big solutions, but instead are better met with small acts of reform; 2) coalition-building among strange bedfellows is usually indispensable; 3) agents of change fare best when they look to measure their impact and never lose sight of the real world results they seek, rather than the expressive highs along the way; 4)
informational "cascades" are possible and critical, as people follow one another; and 5) group polarization can be both desirable and dangerous, as groups become more heated and more extreme.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

General Education 1104
Science and Cooking: From Haute Cuisine to Soft Matter Science (126638)

Pia Sorensen
David Weitz

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrolment Cap: n/a

Food and cooking are part of your everyday life. Whether you are a skilled chef or a home-cook, what you do in the kitchen is deeply rooted in science. This class brings together top chefs and Harvard scientists to explore how everyday cooking and haute cuisine can illuminate basic principles in physics and chemistry. Throughout the semester you will watch as chefs reveal the secrets behind some of their most famous culinary creations. Inspired by such cooking mastery, we will then explore the science behind the recipes. Students will gain a solid understanding of the properties and fundamental behaviors of soft matter materials. All food is made of soft materials, and cooking relies on many of their fundamental properties. Topics will include: emulsions, illustrated by aioli; elasticity, exemplified by the done-ness of a steak; and diffusion, revealed by the phenomenon of spherification, the culinary technique pioneered by Ferran Adria. The course includes laboratory work where students develop their skills as experimental scientists. Other assignments include weekly homeworks, in-class exercises, and a final project where students explore the science of a culinary topic of their choosing.

Course Notes: Occasionally there will be an optional 15-30 minute question and answer session with visiting chefs.
**General Education 1105**

Can We Know Our Past? (112378)

Matt Liebmann

Jason Ur

2020 Fall (4 Credits)

**Schedule:** MW 1030 AM - 1145 AM

**Instructor Permissions:** None

**Enrollment Cap:** n/a

What happened in the past? How do you know? Even though today we take great pains to document every major event that occurs, more than 99% of human history is not written down. How, then, can we determine with any certainty what people did, let alone thought about, hundreds, thousands, and even millions of years ago? This course addresses these and other fundamental questions: Can we ever really know what happened in the past? If the past is "dead and gone," how do we know what we (think we) know about it? And what is our degree of certainty about the past societies and cultures that historians, archaeologists and others study today? Through hands-on interaction with artifacts, experiments and other analytical methods you will consider how these approaches relate to different "stakeholders" – groups of people whose understanding of themselves is rooted in a connection to history. By the end of this course, you will have a sense of how your knowledge of the seemingly-distant past is, in fact, intimately tied to your experiences in the contemporary world.

**Class Notes:** This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

**Class Notes:** This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

Classical Mythology: The Power of Myth in Antiquity and Today (126004)

Brigitte Libby

2021 Spring (4 Credits) Schedule: TBD
The myths of ancient Greece and Rome embody both our worst nightmares and our most fabulous fantasies. Heroism, happy endings, and everlasting love blend with disturbing themes of parricide, cannibalism, incest, misogyny, and unthinkable violence. The resulting stories have fascinated generations of artists, writers, and thinkers, and this course will serve as an introduction to this distant but strangely familiar world. We will move from the very first works of Greek literature through the classic Greek tragedies and the Roman tales in Ovid's Metamorphoses. Along the way, we will ask these fundamental questions: What is "mythology"? What can these ancient stories tell us about ourselves as human beings, and why are they still so resonant thousands of years later? And how does mythology both ancient and modern continue to reflect and shape our world view today? We will use examples from classical mythology to see how a society can re-remember and revise traditional stories to fit changing cultural circumstances and political ideologies. Our discussions will consider ancient rationalizations of myth, psychoanalytic approaches to myth, the use of myth in politics, and the reception of classical myth in the modern world.

*Prediction: The Past and Present of the Future (212919)*

*Alyssa Goodman*

2021 Spring (4 Credits)  

**Schedule:** TBD

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Human beings are the only creatures in the animal kingdom properly defined as worriers. We are the only ones who expend tremendous amounts of time, energy, and resources trying (sometimes obsessively) to understand our futures before they happen. While the innate ability of individual people to predict has not changed much in the past few millennia, developments in mathematical and conceptual models have inordinately improved predictive systems. These systems have integrated comparisons to past results and quantified how "certain" we can be about various aspects of the future -- processes that were, in many cases, inconceivable at one point in the past. This course is a coordinated investigation of the history and future of prediction, beginning with Ancient Mesopotamians reading signs in sheep entrails and ending with modern computer simulations for climate, health, wealth, and the fate of our Universe. In this class, you will design your own predictive systems to critically engage with assumptions about how the world works and situate your explorations in a study of how motivations and techniques for divining the future have changed--and not changed--throughout human history.

Human Trafficking, Slavery and Abolition in the Modern World (214486)

Orlando Patterson

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: None  Enrollment Cap: n/a

We often think of slavery as being a dark chapter in our past, but this is a tragic oversimplification. What defines slavery in the modern world, and what are the moral, political and social implications of its continued existence? As we explore its underpinnings, we discover that all of us may be in some way complicit in its survival. This course surveys the nature, types and extent of modern servitude such as transnational and domestic prostitution, forced marriage, labor trafficking and forced domestic labor, child soldiering and other forms of enslavement of children, organ trafficking and other health aspects of trafficking, debt-bondage, and the forced exploitation of other vulnerable groups such as refugees and stateless persons. Throughout the course, but especially in the final part, we examine anti-trafficking and anti-slavery measures and movements and ways in which you can increase awareness or become involved. You will, by the end of our exploration, be able to trace the moral and ethical arguments surrounding human slavery in its various forms, understand the ways in which this problem still affects so many people, and what can and should be done about it.

Nature (109030)

Joyce Chaplin

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: None  Enrollment Cap: n/a

The planet is in crisis; we live in a state of emergency. Our emergency circumstances encompass a range of daunting environmental problems that make inaction simply not an option. We need to think clearly and calmly about this crisis to craft the best possible solutions. But the kind of clear, calm thought we will need to use requires two kinds of understanding. First, we must think with precision about what nature is, especially in its ethical dimensions. Second, we will need to understand how to deal with the inevitable tradeoffs any solutions to our environmental crises will bring with them. How, in short, is it possible to craft solutions that will be as just as possible, to as many people as possible? And if that justice should extend beyond the human community, to include the nonhuman parts of nature, how will this be accomplished? This class is designed to give you an intellectual, verbal, and ethical toolkit for dealing with the important debates over imperiled natural resources and competing human needs that will only become more urgent as the years go by.

The Political Economy of Globalization (107821)  
Robert Lawrence  
Lawrence H. Summers  
2020 Fall (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a  
Schedule: R 0900 AM - 1015 AM  
Why is populism becoming pervasive - and is there a revolt against global integration? What is the right balance between national sovereignty and international integration? Is the US equipped to sustain its role as a global leader? How does international trade affect prosperity and inequality? Should we regulate multinational companies who move their factories to countries with lower labor standards? How should the IMF respond to financial crises in Europe and the developing world? How will the rise of China change the world system? This course uses basic economic logic to illuminate the choices - and trade-offs - faced by governments, international institutions, businesses and citizens as the global economy evolves. Our course is based on the premise that passion without careful reason is dangerous and that reliance on solid analytics and rigorous empirical evidence will lead to a better world. Policy issues are debated in class by the professors and guest speakers, and students will participate in simulated negotiations on Brexit and on the US-China economic relationship, experiencing the issues first hand, as well as illustrating the importance of decisions made by individual actors for the evolution of the global system.  
Class Notes: All students are expected to attend Thursday lecture and a TF-led synchronous section each week. A second set of course materials will be available to view asynchronously.

General Education 1122  
The Social Responsibilities of Universities (215898)  
Julie Reuben  
2021 Spring (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a  
Schedule: TBD  
What do universities owe society? Since their origins in medieval Europe, universities have been granted special privileges because they have been understood to contribute to the social welfare. Do these privileges incur corresponding obligations on universities? Should they influence how universities educate their students or create, share and preserve knowledge or conduct their internal affairs? To explore these questions, we will examine normative texts about higher education’s purposes, social scientific studies of how universities function and examples from the history of U.S. higher education. For each of these three domains—the education of students, the production of knowledge, and the administration of institutions—we will analyze historical cases, such as universities’ contribution to the military effort during World War I and
universities role in "urban renewal" during the 1950s and '60s, as well as contemporary controversies, such as affirmative action and divestment. Students will be asked to consider these issues from the perspective of university leaders and the interests of the larger society as well as consider what it means to them as members of an academic community.

General Education 1123

Islam and Politics in the Modern Middle East (126908)

Malika Zeghal

2020 Fall (4 Credits)  

Schedule: M 0900 AM - 1145 AM  

Instructor Permissions: Instructor  

Enrollment Cap: 50  

Today's news headlines consistently point to the role that religion plays in the political life of Middle Eastern societies. But do these headlines tell the whole story? This course will challenge simplistic explanations of the dominant role of Islam in Middle Eastern politics by putting it in historical perspective. You will explore the genealogy of some of the most important debates about the role of religion in politics: the extent of Middle Eastern states’ involvement in religion, the place of religious minorities, whether religious norms should infringe on individual freedoms, and the various political theologies at play in Islamist opposition movements, in liberal conceptions of religion, and in state religious interpretations. At the crux of these vigorous debates is the issue of the meaning of a "Muslim state," an issue that has shaped vibrant discussions and deep political disagreements that you will discover through textual and historical analysis of primary sources. Understanding who were the men and women who participated in these debates over the modern history of the Middle East, what they argued for and against, and the context in which they made their claims will provide you with the historical and textual perspective to make sense of the news headlines about religion and politics in the Middle East.

Course Notes: Sections offered in English or Arabic.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend live lecture synchronously once weekly at the time listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1125
Artificial & Natural Intelligence (215896)

Venkatesh Murthy

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

What is intelligence? An inquiry into the nature of intelligence can take different forms – philosophical, biological, mathematical or technological. In this course, we will use machine intelligence (everything from voice recognizing smartphones to game-playing computers) as a handle to think about natural intelligence (brains and behavior of animals). Although we will start with big, general questions, we will quickly move to concrete queries about brains and computers. This approach, rather than just starting with brains of animals, may be useful in framing more universal questions independent of the specific architecture of brains of animals. As machines increasingly perform tasks that were once thought to be solely in the domain of humans, there is an urgent need for discussions of the moral and societal implications of artificial intelligence. This course targets students interested in brains and computers in equal measure, are comfortable discussing ethical concerns.

The Conduct of Life in Western and Eastern Philosophy (122544)

Roberto Mangabeira Unger
Cornel West

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

A study of approaches in the philosophical traditions of the West and the East to the conduct of life. Philosophical ethics has often been understood as meta-ethics: the development of a method of moral inquiry or justification. Here we focus instead on what philosophy has to tell us about the first-order question: How should we live our lives?

Course Notes: No prerequisites other than a willingness to consider a wide range of problems and materials. Extended take-home examination.

Offered jointly with the Law School as 2392 and the Divinity School as 2313.

Power to the People: Black Power, Radical Feminism, and Gay Liberation (108482)

Michael Bronski

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 50

An introduction to the radical American social change movements of the 1960s and 70s. We will examine the specific historical conditions that allowed each of these movements to develop, the interconnections and contradictions among them, and why their political power faded, only to reemerge in new manifestations today. Along with historical analysis, we will examine primary source materials, manifestos, autobiographies, and media coverage from the period, as well as relevant films, music, and fiction. The class will be a mixture of lecture and discussion. Midterm and final assignments will include options for engaged scholarship with community engagement projects.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

General Education 1131

Loss (212841)
Loss is an inevitable fact of human existence. Small losses most of us learn to bear with equanimity. But enormous, wrenching, life-changing losses open voids in our lives for which we can never feel adequately prepared, even if we can see them coming. This course tries to understand the nature of loss on a physical and emotional level, to give us some framework for coping with it and to help us develop some empathy in those very difficult situations when someone else has faced a loss and we do not know how to react. Our main focus will be upon the loss of someone "close" to us, through either death or a personality-changing accident or illness ("close" is in quotation marks, because some of these losses may be of public figures whom we have never met personally, but whose loss makes an impact on our entire society). We will compare this form of loss with others, such as loss of country through exile or forced migration and loss of part of oneself through amputation. Our approach will be threefold: we will try to understand the physiological and psychological effects of loss; we will study the rituals that different societies have evolved to mark loss and memorialize the lost; and we will analyze textual, artistic, and musical expressions of loss, chiefly "great works," but also some more humble attempts to record the emotional rupture that loss entails. We will work on a broad canvas, both spatially and chronologically, looking at personal testimonies as various as Cicero's reactions to the death of his adult daughter; the diary of the nineteenth-century Japanese poet, Kobayashi Issa, charting his father's last days; two great twentieth-century authors, C. S. Lewis and Joan Didion, writing about the loss of their life partners; and many others. We will encounter tombstones with simple inscriptions commemorating the death of family pets from the Roman world and set these in the context of scientific research on the human-animal bond, as manifested by both humans and animals reaching the end of their life. We will study prayers for the dead in the major faith traditions, and visit (virtually) the Rothko Chapel in Houston, Texas, to consider the therapeutic effects of the somber walls of its octagonal interior. We will listen to two Requiem Masses, one religious and one secular. We will examine mourning rituals in the Shona culture of Zimbabwe, to see how pre-colonial beliefs and practices have become melded with the religious practices of the colonizers. By the end of the course, which will have ranged far beyond these few examples, we will have gained a deeper understanding of the effects of loss on us both individually and collectively, and of the rituals and therapies that different societies have developed over time to mark and memorialize it.

General Education 1133

Is the U.S. Civil War Still Being Fought? (128327)

John Stauffer

Most of us were taught that the Civil War between the Confederacy and the Union was fought on battlefields chiefly in the American South between the years of 1861-1865. In this narrative, the North won and the South lost. But what if the issues that resulted in such devastating bloodshed were never resolved? What if the war never ended? This course demonstrates the ways in which the United States is still fighting the Civil War, arguably THE defining event in U.S. history. In each class, we connect current events to readings ...
and themes in the course, highlighting how and why the war is still being fought. From Nat Turner’s slave
rebellion in 1831 to the recent riot (or battle) in Charlottesville, we trace how and why the South was in
certain respects the victor, even though the Confederacy was destroyed and the Constitution amended. We
examine the different kinds of war—ideological, political, cultural, military, and para-military—that placed the
unfreedom of blacks—as slaves, serfs, and prisoners—at the center of larger conflicts over federal versus
state and local rule, welfare, globalization, and free trade. We analyze the Civil War in literature, art, politics,
photography, prints, film, music, poetry, speeches, and history, while also discovering how these cultural
forms worked to shape our memory of the event itself. By the end of the course, we will be able to show
how and why contemporary U.S. debates are rooted in this defining narrative, and we will better understand
the dilemmas the nation faces today.

Understanding Islam and Contemporary Muslim Societies (108890)

Ali Asani

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

The course is an introduction to the fundamental concepts of Islam and the role that religious ideas and
institutions play in Muslim communities around the world. Its main concern is to develop an understanding
of the manner in which diverse notions of religious and political authority have influenced Muslim societies
politically, socially and culturally. Through specific case studies of countries such as Saudi Arabia, Iran,
Turkey, Egypt, Pakistan, and Afghanistan, the course considers the role played by ideologies such as jihad,
colonialism, nationalism, secularism, and globalization in shaping the ways in which Muslims interpret and
practice their faith today. The course briefly considers the contemporary situation of Muslim minorities in
Europe and the United States.

Course Notes: Offered jointly with the Divinity School as 3628.

Power and Civilization: China (142451)

Peter K. Bol
In China today we see a new country built on the bedrock of an ancient civilization. China's re-emergence as a global economic power and political model has deep roots. From Rome to the Romanovs, from Byzantium to the Ottomans, on to the global empires of the West, all the great multiethnic empires of the world have come and gone, while a unitary, multi-national, Chinese empire has endured. The ancient Chinese ideal of a single, unified civilized world has had consequences. It was, and still is, a grand vision: all peoples unified under a single ruler and an integrated social order that finds a place for every person in security and harmony. It created the first centralized bureaucratic state; it institutionalized meritocracy; its economy became the world’s greatest market; its philosophies provided models of humane governance; its inventions spread across the globe. And yet in practice it has also been a story of conflict and control, of warring states and competing peoples. We will discuss how the choices China has made in the past bear on the challenges it faces today, when a modern "China model," with ancient roots, competes with the United States for global leadership.

Class Notes: You are expected to attend the weekly plenary session as well as a TF-led section that meets live via Zoom. Section assignments will be determined after the enrollment deadline.

General Education 1137

The Challenge of Human Induced Climate Change: Transitioning to a Post Fossil Fuel Future (120031)

Michael McElroy

Human induced climate change has the potential to alter the function of natural ecosystems and the lives of people on a global scale. The prospect lies not in the distant future but is imminent. Our choice is either to act immediately to change the nature of our global energy system (abandon our dependence on fossil fuels) or accept the consequences (included among which are increased incidence of violent storms, fires, floods and droughts, changes in the spatial distribution and properties of critical ecosystems, and rising sea level). The course will be designed to provide students with an understanding of relevant physical, technical and social factors including an historical perspective. In the latter half of the course, the plan will be to engage students in an interactive dialogue on possible responses recognizing explicitly differences in motivations for different constituencies - for developed as distinct from developing economies for example. We plan to explore options for a zero carbon future energy system including the challenges involved in implementing the necessary transition. If we fail to abandon our dependence on fossil fuels - and the time scale over which we must do so to realize even the minimal objectives outlined in the recent Paris climate accord is as brief as a couple of decades or even less – might we need to explore possibilities for geoengineering, for purposeful intervention in the global climate system? Arguments for and against such options will be discussed and debated. We will expect students to be actively involved in exploring, researching and debating responses to any and all of these interrelated issues.
Course Notes: Students who have taken Science A-52 may not take this course for credit.

Recommended Prep: Students are expected to have a background of high school algebra and trigonometry.

Dark Satanic Mills: How the Factory Made Our World (215897)

Victor Seow

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

From spam to smart phones, much of the stuff we consume in our daily lives are factory-made. In the process of producing for our endless needs and wants, the factory has mobilized and motivated some of the latest advances in science and technology, defined and redefined the nature of work, and, through its polluting presence, pushed against the limits of our planetary boundaries. As such, it is implicated in nothing less than the making and unmaking of our modern world. This course examines the rise and transformation of the factory in global history, from cotton spinning mills in eighteenth-century England to robotics manufacturing plants in China today. Along the way, we will explore how innovations such as electrification, the assembly line, and computer numerical control shaped and were shaped by the dynamics between labor and management and by other forces of production. Readings will include the writings of Charles Dickens, Fredrich Engels, Frederick Taylor, Philip Dick, Ruth Cowan, Aviva Chomsky, Leslie Chang, and others, the personal testimonies of workers, and a graphic novel. As part of the course, we will be taking a field trip to Lowell, Massachusetts, a town once bustling with textile factories that was at the center of the American industrial revolution.

Global Japanese Cinema (159550)

Alexander Zahlten

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

Global Japanese Cinema introduces some of the masterworks from the rich history of Japanese cinema as a way of exploring the global language of film. Participants will learn how to analyze moving images and the
ways they influence us – a basic media literacy that we all need for life in a media-saturated society. Additionally we will learn how culture, in this case moving images, flows across the globe and transforms its meaning in site-specific ways. We will see how Japanese cinema's use of slow motion entered the American gangster film, or how samurai films helped create the Italian "Spaghetti Westerns", and many other examples. How do moving images constantly nudge us into a specific worldview, and how does the global circulation of these media subtly shift those nudges in unexpected ways? What does it mean that we nonetheless share a common media memory despite living in very different parts of the world? Join the course and explore how moving image culture functions in a networked, media saturated world!

Course Notes: Japanese language skills are not required.

Moctezuma's Mexico Then and Now: The Past, the Present and Pandemics in North America (112754)

William Fash
David L. Carrasco

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

This course provides students with the opportunity to explore how the study of pre-Hispanic and Colonial Mexican and Latina/o cultures provide vital context for understanding today's changing world. The emphasis is on the mythical and social origins, glory days and political collapse of the Aztec Empire and Maya civilizations as a pivot to the study of the sexual, religious and racial interactions of the Great Encounter between Mesoamerica, Africa, Europe, and the independent nations of Mexico and the United States. The study of the archaeology, artistic media, cosmovision, capital cities, human sacrifice and the religious devotions of ancient Mesoamerica illuminate the Day of the Dead and Virgin of Guadalupe phenomena today. Hands-on work with objects at the Peabody Museum aids in examining new concepts of race, nation and the persistence of Moctezuma's Mexico in Latino identities in the Mexico-US Borderlands. One of the biggest student/museum events at Harvard is the Day of the Dead celebrations at the Peabody Museum, which provides the opportunity for students to work directly with the materiality of the longue durée of Mexico's storied history and evocative worldview. The museum objects and sections exercises provide the students with ways to integrate their classroom work to the collections and public program of the museum, plus experience community both locally and across cultural boundaries and physical borders. This course empowers our students to evaluate the ways the U.S. is changing and struggling to define itself in relation to Latin America and especially the migration of peoples, ideas, arts, music, food from and through Mexico.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.
General Education 1149

One Book, Two Religions, Many Truths (120880)

Shaye Cohen

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

The Hebrew Scriptures, what Christians call the “Old Testament” and Jews call the “Bible,” are the basis of both Judaism and Christianity, and stand behind many debates in our contemporary culture wars. In this course we shall survey how this work of literature, through interpretation and re-interpretation, spawned and spawns a wide variety of truths. Implicit themes: What is truth? How do we know it when we see it? Can a text written long ago contain truths for contemporary society?

General Education 1150

Medicine and Conflict: The History and Ethics of Healing in Political Turmoil (212839)

Soha Bayoumi

2020 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

"War is the only proper school for surgeons," the Ancient Greek physician, Hippocrates, is quoted to have said. This saying has been used to show how medicine and war have been thought for millennia to shape each. Medicine has played a major role in situations of political conflict, ever since human societies engaged in war and started elaborating "just war doctrines," that determine how belligerent parties should conduct war, as an attempt to "civilize" war and mitigate its scourges.

Through an investigation of case studies from the modern and contemporary world, this course will examine the role played by medicine in situations of political conflict, as well as the role played by war and humanitarian crises in the history of medical thought and practice. It will explore how medical knowledge and expertise have been deployed in situations of political violence or tumult and will ponder some of the ethical dilemmas faced by medical professionals in those contexts. Covering cases ranging from surgery in the American Civil War to the provision of medical care in the Syrian refugee crisis, some of the themes discussed will include biomedical ethics in armed conflict, torture, trauma, contagion, and medical innovation in conflict contexts.

Class Notes: You are expected to attend live lecture synchronously twice weekly at
the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1153

Shakespeare's Timeliness (216287)

Marjorie Garber

2020 Fall (4 Credits)  

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None  

Enrollment Cap: n/a

The First Folio of Shakespeare's plays was published in 1623, seven years after the playwright's death. A memorial poem by Ben Jonson, included in the book, described Shakespeare, famously, as "not of an age, but for all time." This course will argue that the works of Shakespeare—like all great works of literature—are both "of an age" and "for all time."

What we often call "timelessness" in literature and art is in fact more accurately described as multiple timeliness: the way a work can speak to its moment, whether the moment is that of its conception, its production, or its reception. The plays of Shakespeare, whether they are comedies, histories, tragedies, or romances, have their lives in at least three time periods: the time and place in which they are written (Shakespeare's England during the reigns of Queen Elizabeth and King James), the time and place in which they are set (medieval Scotland in Macbeth, ancient Rome in Julius Caesar), and the time and place in which they are produced, seen, or read ("now," whether that means nineteenth century England, twenty-first century Cambridge MA, or global Shakespeare today).

Over the centuries since the plays were written, Shakespeare's plays have almost uncannily connected with developments in social and political history and in human character. It is not an exaggeration to say that in some cases Shakespearean characters, scenes, and phrases, have influenced the way subsequent ages have thought about people and politics, and even how they have acted, or reacted, to historical events. Like the eyes in a portrait that are described as following the viewer around the room, the plays of Shakespeare seem always to be trained upon the audience, no matter what the time or place.

This course will discuss Shakespeare's multiple timeliness and the effect of "timelessness" that is generated by it—and, by extension and analogy (including some analogies within the plays) the way "timeliness" and "timelessness" intersect in the production and consumption of works of art.

General Education 1156
Modern Art and Modernity (108950)

Ewa Lajer-Burcharth

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  None  Enrollment Cap:  n/a

What makes art modern? What role has modern art played in the constitution of the modern subject? This course traces art's transformation from tool of aristocratic and ecclesiastical elites into instrument of broad public instruction and civic debate on controversial topics. Spanning roughly three centuries, from the 1730s to the 1980s, the course traces the emergence of art's broader social resonance and responsibility, and the belief in its transformative power, which remains a defining aspect of much modernist and avant-garde art produced across Europe and the Americas.

Anchored by a significant date, each lecture explores the social, political, cultural, and technological conditions of a specific historical moment through the lens of a major artistic event. This enables a demonstration of the ways in which advanced forms of artistic practice have played a fundamental role in the formation of modern culture and society by creating and preserving a space for critical reflection and debate. A wide range of media will be considered, from the traditional fine arts of painting, sculpture, and print-making to photography, photomontage, video, installation, and performance art.

The primary laboratory for our first-hand examination of works of art is the Harvard Art Museums. Our ultimate objective is to establish the relevance of modern art and visual culture—to reveal their potential, in other words—as an indispensable basis for your own engagement and debate with our present historical moment. To this end, we will help you develop and deploy visual and historical literacy, skills that are fundamental to your navigation of the visual sphere today. Such competencies will empower you to make sense of the increasingly visual world in which we live, and, thereby, enable you to play a role in safeguarding for future generations art's capacity to create a space for human imagination and critical reflection.

General Education 1157
Music and Poetry (215891)

Suzannah Clark

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  None  Enrollment Cap:  n/a

Song—the combination of music and words—is arguably the most prominent musical soundtrack of our lives and has been for centuries. This combination seems to accomplish something that neither the words nor the music can achieve on their own. Yet, writings about vocal music are often preoccupied with aesthetic, philosophical, religious, and political debates over which of the two art forms deserves primacy: music or poetry. This course will explore the history of music and poetry from the middle ages to the present day. We shall begin with the middle ages, thanks to the burst of vernacular song by the troubadours and trouvères whose notated songs afford scrutiny of what they and their contemporaries had
to say about the power of music to enhance, undermine, or contradict a poetic text. They also wrote songs about why they should sing—thus laying out an aesthetics of their sonic activity. This will serve as a starting point for our analysis of some 800 years of the practice, challenges, and purposes of putting music and poetry together, covering a repertoire of poet-composers (those who write both the text and music), famous collaborations between poets and musicians, and composers who create musical settings of pre-existent texts. Through different cultural and historical contexts, we will explore the rich layers of meaning and interpretation available in the interplay of poetry and music: from readings of the text, to scrutinizing how the music serves as an interpretation of a text (including cases of different musical settings of the same poem), to hearing how different performances bring out different interpretations. Although the focus of this course will be on the Western tradition, students will be invited in some assignments to apply concepts learned in the course to music from any historical and global tradition. No prior knowledge of music or poetry is expected or required.

*Water and the Environment (213406)*

*Kaighin McColl*

2021 Spring (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a  

What do landslides in Brazil, droughts in California, mass migration in Syria and the collapse of Mayan civilization all have in common? Water. This course introduces students to the terrestrial water cycle: how it works, how humans manipulate it, and how it manipulates us. Students will learn about the major components of the terrestrial water cycle, including precipitation, evapotranspiration, runoff and streamflow, and saturated and unsaturated subsurface flow. We will also learn about the causes and consequences of natural hazards associated with the water cycle -- including floods, landslides and droughts – and examine several case studies, with a focus on human impacts. The course will consider how the water cycle has contributed to the demise of past civilizations, and explore implications for modern society in a warming world.

*American Capitalism (125496)*

*Sven Beckert*

2021 Spring (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a
How did capitalism emerge, expand and transform daily life in North America over the past 500 years? In this course, students will gain an in-depth understanding of how North America turned from a minor outpost of the Atlantic economy into the powerhouse of the world economy, how Americans built a capitalist economy and how that capitalism, in turn, changed every aspect of their lives. In the process, they will come to understand how contemporary capitalism is the result of centuries of human engagement, struggle, and aspirations. Topics range from the structure of Native-American economies to the economic consequences of the Civil War; from the impact of capitalism on gender relations to the changing structures of American businesses; and from the position of the United States in the world economy to the role of the government in channeling economic development. Boston merchants and Georgia sharecroppers, enslaved cotton growers and reforming statesmen, workers at the Ford assembly line and Silicon Valley entrepreneurs will all appear in the story. The course will put particular emphasis on the global context of American economic development and situate it deeply in political and social changes. Ultimately, students will gain an understanding of how the contemporary capitalism that so powerfully shapes all of our lives has emerged over the course of several centuries, and how the tools to understand the history of American capitalism can be applied to understanding our contemporary situation. Assignments in particular will encourage students to think about contemporary problems from historical perspectives.

Requirements: Anti-req: Cannot be taken for credit if HS B-49 already complete

General Education 1165
Superheroes and Power (215872)
Stephanie Burt
2020 Fall (4 Credits)

What's a hero? What's a superhero? Who gets to be one, and who decides? Why are superheroes so popular now? What do their stories tell us—casual viewers and devoted readers, fans and non-fans and aspiring writers—about how power works, about its social, emotional, material and economic dimensions, and about how we represent power in art? This course looks at superheroes, famous and infamous, old and new, in comics, on TV, in movies and novels and poems, as ways to answer questions about how power operates in our society and in others: power and violence, power and persuasion, power and social cohesion, power and disability, power and the sources of the self. You’ll read great and not-so-great superhero and superhero-adjacent stories from Gilgamesh to Wolverine, Wonder Woman to Ms. Marvel by way of John Milton. You’ll learn how to see the shape of a story, how to consider form style, technique in comics and other media. You’ll learn how to look at markets, at states and at the law, at fan communities and fan cultures, at the kinds of power stories and characters exercise in the real world. You’ll discover thinkers from politics, psychology, literary studies, and religion, among them Hannah Arendt, Max Weber, and Rosmarie Garland-Thomson, with something to say about power. You might even create some superheroes yourself. This course will show
you not just how to read a set of very complicated, often underrated, influential modern stories, but how to think about power in public, in fiction, and in everyday life: who decides how others live, who decides what’s normal, who gets to make, and who gets to break, the rules.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

Who do we mean when we say "we?" How does a society deal with religious, ethical, and cultural diversity? What challenges do we face as people of different communities encounter one another in cities and public institutions, schools and businesses, neighborhoods and families? These are urgent questions in many nations today, but in this course we focus on the United States. We explore, discuss, and analyze the changing multi-cultural and multi-religious landscape of America with an eye to the growing Muslim, Buddhist, Hindu, and Sikh communities in the most recent period of post-1965 immigration. In what contexts do these and other minority communities encounter America's secularism, its commitment to religious freedom, and its long-dominant Christian and Jewish communities? Our approach will be through the study and in-class discussion of case-studies enabling you to enter into some of the controversies and dilemmas that confront schools, universities, town councils, zoning boards, and places of work. You will be challenged to take the perspective of mayors and concerned citizens, teachers and executives, religious and civic leaders – all confronting the choices and changes of a dynamic society. You will inevitably consider your own perspective on the issues we engage. You will gain a deeper understanding of the religious complexity of America and a new sense of the challenges confronting "we the people."

Class Notes:
This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes:
You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1167
Climate Crossroads (215873)

James Engell
James Anderson

2020 Fall (4 Credits)  

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Instructor  
Enrollment Cap: 75

What one thing is changing everything in your lifetime—and for generations to come? It's changing what you eat; it's changing buildings you live in; and it's changing politics, the arts, and finance. The change is accelerating. This course reveals fundamental alterations that climate disruption is bringing to multiple human activities and natural phenomena.

The course represents a crossroads in two senses. First, it's a crossroads of disciplines. Climate change affects science, society, culture, government policy, biodiversity, and environmental justice. To understand it is inherently interdisciplinary and requires standing at the crossroads of several approaches. Second, humanity itself is at a new crossroads. Because global climate is shifting rapidly, this prompts new views of humans in geologic time, as well as new thinking in economics, law, finance, and science.

Climate change isn't just "global warming." It's an alteration of conditions on Earth to which all creatures and societies are adjusting. What is the science of climate change? Why can't understanding and dealing with climate change be confined to science?

Through materials and assignments that address quantitative understanding and qualitative judgment, you'll learn why it's unwise to seal the interrelated issues of climate change in separate disciplines; conversely, why it's necessary to use separate disciplines to acquire the knowledge and applications needed to formulate policy and actions. You'll learn about climate adaptation (adjusting to changing climate), mitigation (reducing the speed and severity of climate change), and resilience (e.g., recovering from extremeweather events). You'll discover how careers in many different areas increasingly involve thinking about climate.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

General Education 1169

What Is the Good China Story? (216288)

David Wang

Wai-ye Li

2020 Fall (4 Credits) Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

The course takes as its point of departure President Xi Jinping’s call in 2013 to “tell the good China story,” and in 2020 to “tell the good China story of combating coronavirus.” What is the good China story? Is this the story China should tell about itself to the world? Is this about cultural self-perception, understanding the world, cross-cultural communication, or simple propaganda? More importantly, how can we tell China stories from perspectives outside of China?

What seems beyond dispute is the power of stories to bring China to the world and the world to China. In exploring the “fictional turn” of contemporary Chinese cultural politics as it relates to the world, we will also trace its genealogy to earlier historical moments. Stories matter in China, not only in our times but also throughout history.

Narrative fiction is one of the most effective ways to engage with the Chinese past and the Chinese present. Instead of presenting China as a monolithic civilization, this course uses stories to understand “the world of China” and “China in the world” from ideological, ethnic, cultural, and geo-political perspectives. The course highlights the variety and vitality of stories from both modern and pre-modern periods. In genres ranging from religious allegory to science fiction, from moral fable to fantastic romance, from philosophical anecdote to political satire, Chinese stories have enlightened, intrigued, puzzled, and scandalized readers, reflecting and constructing ever-changing worldviews.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1170

Confronting COVID-19: Science, History, Policy (216286)

Allan Brandt

Ingrid Katz

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: 500

We are living in a world radically reshaped by the ongoing COVID-19 pandemic. This course will investigate the wide range of questions raised by the pandemic, its impact and significance. We will also examine how diseases raise fundamental issues for science, policy, and society. In addition to assessing our scientific and medical knowledge about COVID-19, the course will utilize strategies from history, the humanities, and
the social sciences to illuminate central policy and political considerations for addressing the epidemic in the U.S. and across the globe. The course will bring experts from a wide array of fields to offer approaches for understanding essential issues raised by the pandemic, including: the science of the virus; medical and public health responses; as well as its impact on economies, society, and culture. We will also broadly consider how epidemics reveal existing social structures such as fundamental health disparities and social inequalities. Among the questions we will explore are: how do we balance basic freedoms and social restrictions as we face critical new threats to human health; and how do we think about risk and vulnerability in the face of uncertainty from both a personal and political viewpoint? As this epidemic unfolds in real time, you will have an opportunity to integrate interdisciplinary perspectives for understanding epidemic disease and how it shapes and reflects powerful social forces and global systems.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Justice: Ethics in an Age of Pandemic and Racial Reckoning (216258)

Michael Sandel

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: 600

What is a just society? What do we owe one another as citizens? What is a good life? These questions, long debated by philosophers, arise with special urgency at a time of pandemic and racial reckoning.

The course explores these questions by considering how philosophers have tried to answer them, and by debating contemporary issues—in politics and everyday life—that prompt us to ask: What's the right thing to do? Topics include controversies about equality and inequality, individual rights and the common good, the role of government and markets, and competing conceptions of identity and community. Cases include ethical questions arising from the pandemic and recent debates about racial justice.

Class Notes: Justice is a University Course, which means that students from all Harvard schools are able to enroll. Enrollment is limited to 750. Students who submit a petition to enroll by August 21 will have
priority.

Class Notes: Class meetings integrate video materials with live discussion—sometimes with the class as a whole, sometimes in small breakout sessions. Due to the participatory nature of the course, students are expected to attend all class meetings. Those unable to attend in the morning are welcome to attend the evening version of the course (M and W, 7:30-8:45pm). This is not a recorded version of the morning class, but a live, participatory session covering the same material and led by Dr. Sergio Imparato. All students will also have a weekly, small group discussion section.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

General Education 1172

Poetry in America: Writing America 1620-1850 (125187)

Elisa New

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

This General Education course will contemplate art's formative role in the development of civilizations by allowing students to trace the gradual development of America's self-conception through the lens of its poetry.

"[P]oetry was all written before time was," wrote Ralph Waldo Emerson in his essay "The Poet." When Emerson wrote these words in 1844, nearly 75 years after the Revolution, he feared America had not yet found its "seers," "sayers," and "namers"—its poets. But Emerson's quest for "the poet" in fact applied to all those makers—essayists, orators, painters, architects, composers—whose creativity gives a culture its characteristic look and sound, its special vernacular and values. It was, in Emerson's conception, the poet's--the artist's--integrity on which civilizations depend: a culture's attitude to its citizens and its non-citizens; the use or misuse of its natural resources; the treatment of its laborers; the standards of its schools; the meanings it assigned marriage, death, masculinity, femininity; its ideas of the spiritual, the beautiful, the entertaining—all these would be, Emerson believed, encoded in its art. What a nation's poets wrote was, finally, what that nation would become.

Students in Writing America will read, discuss, and debate poems written for these high civilizational stakes, and they'll explore the diverse functions poetry played in a wide variety of print venues (from
newspapers and women's magazines, to funeral programs, to farmers' almanacs). The syllabus covers major poets from the colonial period through 1850 (including Bradstreet, Taylor, Wigglesworth, Wheatley, Freneau, Poe, Emerson, Longfellow); through these poets, students will be able to follow the emerging role of the "author" and "the arts" within American culture. But much of their study will be focused on poetry whose aims were not purely, or even primarily, literary. Beginning with the first book published in North America (The Bay Psalm Book, printed in our very own Harvard Square), they'll read jeremiads and funeral elegies sanctioning transfers of political power, as well as political ditties of the 1770's urging patriots to give up imported luxuries like tea and silk. They'll read selections from partisan satires and epics of the Revolution, mock-epics celebrating indigenous foods like cornmeal mush, and poetry celebrating the beauties--and exploitable resources--of the American landscape. They'll pay close attention to how the demonization--and romanticization--of indigenous peoples in popular verse rendered native Americans figuratively extinct, even while poetry enabled some African Americans and women to achieve not only visibility, but celebrity. Writing in America students will come to understand how poetry helped Americans embrace the virtues of labor and middle class life, and how it supported emerging ideals of literacy and cultivated, and fed, robust mass cultural appetites. Throughout the semester, students will connect poetry's relationship to music, oratory, painting, statecraft, homiletics, and other expressive genres, considering throughout the role art plays not only in reflecting but in shaping distinctive cultures.

Class Notes: The course has been designed for remote asynchronous learning, and all of its lectures and discussions are filmed documentary style around Harvard and at numerous historic sites in Cambridge (The First Church, Mt. Auburn Cemetery, the Longfellow Historic Site), Boston (King's Chapel), Concord (The Old Manse), Cape Cod (Corn Hill in Truro, Truro Historical Society, Highland House Museum), and elsewhere. The course's asynchronous design allows students to watch lectures on their own time, and then to apply and demonstrate knowledge via written discussions and other online assessments. These activities, in turn, furnish the materials for more personal, synchronous Zoom sessions, which will take place 2-4 hours weekly with times based upon enrollees' preferences. The course also includes numerous guest interpreters such as Vice President Al Gore, Glenda Carpio, Michael Pollan, Jonathan Walton, Lawrence Buell, and the late Mayor Tom Menino. All lecture videos are richly illustrated with archival materials from Harvard and beyond.

Germanic Languages and Literatures
Subject: Scandinavian

Scandinavian  55 Section: 1
One Hundred Years of Scandinavian Cinema (159715)

2021 Spring (4 Credits) Schedule: TBD
TBD

Instructor Permissions: None Enrollment Cap: n/a

This course explores Scandinavian cinema from the pioneers of the silent era to the globally successful hit films of the present day. Students will trace the development of Scandinavian cinema through the films of directors such as Viktor Sjöström, Carl Th. Dreyer, Lars von Trier, Ingmar Bergman and Lukas Moodysson and discover the profound influence the region's films have had, and continue to have, on filmmaking in America and the world.

Course Notes: Conducted in English.

Beginning German (113802)
Lisa Parkes

2020 Fall (4 Credits)  

Schedule: MTWR 0900 AM - 1000 AM

Instructor Permissions: Instructor  
Enrollment Cap: 12

An introduction to German language and culture for students with no knowledge of the language. Students develop basic communication competencies (spoken and written), with an emphasis on interpersonal communication. Instruction is supplemented by a variety of texts, including poetry, songs, and visual media. The first half of this course may not be taken as a half course for credit toward the AB degree; there are no exceptions to this rule.

Course Notes: May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students must complete both terms of this course (parts A and B) in order to receive credit.

**German 62** Section: 1

Advanced Conversation and Composition: Berlin Stories (120838)

*Lisa Parkes*

2021 Spring (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** None  
**Enrollment Cap:** 12

This course is designed to further students' spoken and written German at the advanced level. Students will analyze and practice the stylistic and rhetorical features of various written and spoken genres. By focusing on aspects of contemporary society in the German-speaking countries, students will broaden and refine their vocabulary and idiom, become sensitized to different registers, as well as hone points of grammar.

**Course Notes:** Conducted in German.

**Recommended Prep:** German 61, equivalent preparation, or permission of the instructor.
German 63  Section: 1

Germany and Europe: Heimat, Exile, Return (160494)

Nadine Schwakopf

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  None  Enrollment Cap:  n/a

This course discusses 20th and 21st Century German culture and poetics in dialogue and dispute with its European neighbors. Particular emphasis will be put on the effect of history on contemporary political, cultural and historical issues. How did the rest of Europe react to the German unification? How does Germany relate to its "Gastarbeiter" today? This course is designed to provide students with the ability to gain insights into how personal and collective identity is constructed and problematized through art and culture. In this interdisciplinary course we will work with a variety of written genre (poetry, short stories, plays, essays, journalistic non-fiction), as well as visual art, architecture, and film. We will take a cultural studies approach to understanding how to read effectively and interpret textual and visual materials. Conducted in German.

German 90R

German 101

German Literature, Culture, and Society (159603)

Nadine Schwakopf
This course examines the major social-political trends and tensions that have informed literature and culture in the German-speaking countries. Students will develop the language skills to discuss, analyze, and interpret a variety of texts and cultural phenomena from the 18th to the 21st centuries, with special attention to social theory and political critique. Our readings and discussions are organized around pairs of thinkers who address the same issues from a different time, place, angle, or genre. Further emphasis is placed on the history of ideas and how it contributes to current issues and debates. Paired readings may include Kant and Kleist, Freud and Kafka, Benjamin and Brecht, Böll and Celan, Seghers and Wolf.

Course Notes: Readings and discussion in German.

German 102

German Literature, Art, and Thought (159710)

Nadine Schwakopf
Nicole Suetterlin

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

This course explores the major trends and tensions that have informed German literature, art and thought from the 18th to the 21st centuries. In addition to developing the language skills to discuss, analyze and interpret literature, students will explore the rich cultural tradition in the German-speaking countries and its continued relevance for the world. Topics include: Enlightenment; Age of Goethe; Third Reich; GDR surveillance; Cold War; German reunification; remembering the Holocaust; rise of right-wing populism (AfD); ecological revolution. Figures include: Lessing, Goethe, Schiller, Wagner, Nietzsche, Freud, Einstein, Brecht, Celan, Dürrenmatt, Wolf, Draesner, Horn.

Course Notes: Readings and discussions in German.

German 119A Section: 1

Great Works, Short Texts: German Poetry (216056)
Peter Burgard

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

Close reading of poems by Klopstock, Goethe, Schiller, Hölderlin, Brentano, Eichendorff, Droste-Hülshoff, Heine, Mörike, Hofmannsthal, George, Rilke, Trakl, Lasker-Schüler, Brecht, Benn, Eich, Bachmann, Enzensberger, Celan, Jandl, Kirsch, Brinkmann, and Grünbein. While the course focuses entirely on the close reading of outstanding texts in the German literary tradition, ancillary reading situates these texts in the history of German culture.

Course Notes: Readings in German, discussions in English.

German 134 Section: 1

Understanding Beethoven (203284)

Alexander Rehding
Peter Gordon

2021 Spring (4 Credits) Schedule: W 0900 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

This undergraduate seminar, co-taught by two professors, combines historical, cultural, and musicological approaches so as to develop a deepened understanding and appreciation of Beethoven's music, assessing its intrinsic character while also placing it in German cultural, intellectual, and political history. The course does not require extensive musicological knowledge, but an understanding of basic music theory and music history will be presumed. Students will be required to attend performances by the Parker String Quartet, and there will be at least one class-trip to a performance at the Boston Symphony Orchestra. The course counts for credit in either history or music or German.

Course Notes: This course is also offered through the Music Department as MUS 192r and the History Department as HIST 13k. Credit may be earned for only one of the following: German 134, Music 192r, or History 13K.

German 140 Section: 1

German Social Thought, Nietzsche to Habermas (126545)

Peter Gordon

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

This course is also offered through the Music Department as MUS 192r and the History Department as HIST 13k. Credit may be earned for only one of the following: German 134, Music 192r, or History 13K.
A philosophical and historical survey of major debates in modern German social theory over the span of a century, from Nietzsche's anti-foundationalist critique of morality and truth to Habermas's attempt to rebuild a pragmatic-transcendentalist theory for ethical and discursive reason after the collapse of metaphysics. Readings by Nietzsche, Weber, Heidegger, Adorno, Horkheimer, and Habermas.

Course Notes: This course is equivalent to German 140. Credit may be earned for History 1323 or German 140, but not both.

German 143

German History: A User's Guide (203214)

Alison Frank Johnson

2020 Fall (4 Credits) Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

German History loomed like a specter over the twentieth century. In the twenty-first century, Americans have been debating the relevance and legitimacy of comparisons between German history and our contemporary world. How useful is German history for understanding our current moment? How might our present day concerns distort what we see in the past? This course will examine the history of Germans in Europe and elsewhere, starting with the revolutions of 1848 and ending with the separation of Austria, West Germany, and East Germany following the Second World War. Themes will be war, insurrection, and terrorism, revolution and counter-revolution, gender and sexuality, reform, violence, anti-semitism, racial thinking and racism, and migration.

Course Notes: This course is also offered through the History Department as History 1265. Credit may be earned for either German 143 or History 1265, but not both.

German 144 Section: 1

Freud and Psychoanalysis (216353)

Benjamin Morgan

2020 Fall (4 Credits) Schedule: R 1200 PM - 0200 PM

Instructor Permissions: None Enrollment Cap: n/a

This course will be equally accessible to students in German, comparative literature, history and literature, philosophy, religious studies, psychology and history of science (all texts will be available in translation). The course will give you a grounding in the early history of psychoanalysis; will investigate the relations
between psychoanalysis and literature; and will assess the contribution of this tradition of thought to the intellectual life of the twenty-first century. The main readings will be taken from key texts by William James, Sigmund Freud, Carl Gustav Jung and Melanie Klein. We will explore the conceptual tools that the thinkers brought to bear on the affective life of human beings, and will investigate their implications and their continued relevance. How do different models of the human mind shape the way we relate to ourselves and others? To what degree can we access, understand and cultivate our unconscious affective life? The relation between psychoanalysis and literary texts will be explored through texts by Arthur Schnitzler, Thomas Mann and Toni Morrison. The critical engagement with founding texts of psychoanalysis and analytic psychology will also allow you to develop a nuanced assessment of recent re-deployments of the psychoanalytic tradition such as Jonathan Lear and Julia Kristeva. It will also allow you to evaluate challenges to Freudian constructions of the unconscious by cognitive scientists and philosophers such as Hugo Mercier & Dan Sperber (2017), and Nick Chater (2018).

The mid-term paper will consist in a short exploration of a topic of your choice related to the readings. This topic will be further explored in your final paper.

Under Surveillance: Media, Security, and the Loss of Privacy (216322)

*Eric Rentschler*

2020 Fall (4 Credits)                Schedule:        T 1245 PM - 0245 PM

Instructor Permissions: None         Enrollment Cap:   n/a

With a camera positioned at the entrance to the director's factory, Louis Lumière's famous early film of 1895, La Sortie de l'usine Lumière à Lyon, captured workers as they left for the day. Today, surveillance practices have infiltrated daily lives around the globe, from the ubiquitous cameras on city streets and public spaces to tracking systems that monitor, store, and monetize even our most intimate activities. In this class we will probe and problematize the modern history of surveillance technologies and monitoring practices, from the first manifestations of police photography to CCTV, drones, racial profiling, GPS technology, and user security on social media and digital platforms. To this end we will look at exemplary features such as The Conversation (1974), Strange Days (1995), Caché (2005), Red Road (2006), The Lives of Others (2006), and Snowden (2016), documentaries like 13th (2016), The Creepy Line (2018), and The Great Hack (2019) as well as selected videos and tv programs. We will also consider the analytical and theoretical perspectives of, among others, Michel Foucault, Jean Baudrillard, Wolfgang Ernst, Gilles Deleuze, Harun Farocki, Shoshana Zuboff, Catherine Zimmer, Lev Manovich, Mark Andrejevic, Thomas Levin, Patricia Pisters, and Christian Parenti.

Course Notes: This course is equivalent to AFVS 184E. Credit may be earned for German 150 or for AFVS 184E, but not both.

Nadine Schwakopf  
2021 Spring (4 Credits)  
Schedule: T 1245 PM - 0244 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 15  
This course uses Austrian literature to think through some of the most pressing questions of modern European (and, specifically, Austrian) history. We will read some of the greatest novels and novellas in modern German-speaking literature as we learn about the Habsburg monarchy, turn-of-the-century Vienna, the First and Second World Wars, the expulsion of Austrian Jewry, and postwar mythmaking. Important themes include: women's role in society and in the family; the rise of nationalism as a social and political force and the viability of multinational empires; sex and sexuality; justice, mercy, and retribution; what Austria is and what it means to be Austrian; anti-Semitism, Zionism, and European Jewry; cultural, political, and violent forms of social protest; the transformative power of war. Open to undergraduate and graduate students, with the permission of the instructor.  
Course Notes: This course is equivalent to History 1919. Credit may be earned for History 1919 or German 179, but not both.

German  260 Section: 1  
Writing the Body in the Posthuman Age (216389)
Genetic engineering, artificial intelligence, smart surveillance – recent scientific and technological advancements have reconfigured our understanding of the human body and its environment in unprecedented ways. The molecular revolution in the life sciences has turned the body into a software that can be coded, recoded and rewritten. Meanwhile, the digital revolution has allowed algorithms to take an increasing hold over people’s online selves. Developments such as these constitute what a broad range of cross-disciplinary researchers in the so-called posthumanities have termed the “posthuman predicament” in recent years. The current Sars-CoV-2 pandemic has but exacerbated the challenges we face in the posthuman age, increasing the need for defining the boundaries of the human body, both molecular and digital, and the power structures that govern it in the 21st century. How can literature and the arts help us address these challenges? This course explores how contemporary literature as well as literary and cultural theory construct the body, define the self, and critique biopolitical powers in the posthuman age. Focusing on German literature specifically, the course also inquires how events such as German reunification, the 2015 migration crisis, or the rise of authoritarianism in some EU member states correlates with the posthuman predicament. Reading materials include authors such as Berg, Erpenbeck, and Grünbein, and theorists such as Foucault, Habermas, and Hayles.

Course Notes: Discussions in English, readings in English and German. Open to undergraduates with permission of instructor.

The Frankfurt School the 21st Century (216352)

Benjamin Morgan

2021 Spring (4 Credits) Schedule: R 1200 PM - 0200 PM

Instructor Permissions: None Enrollment Cap: n/a

This course will be equally accessible to students in German, comparative literature, history and literature, philosophy, religious studies, psychology and history of science (all texts will be available in translation).

What conceptual tools can help us understand current social trends or the roles played by literature, mass culture and philosophy in today’s society? We will start with Rahel Jaeggi’s recent ‘Critique of Forms of Life’ (2014, trans. 2018). Where earlier Frankfurt School theorists such as Horkheimer, Adorno or Habermas hoped to ground their critique of society in something (reason, art, an idealized communication) that in some sense lies beyond or before everyday practices, Jaeggi takes up the mantle of Frankfurt-School-style critical theory but proposes a model that derives its evaluative norms from inside the very forms of life under analysis. The course will put Jaeggi’s thought in historical context, showing the origins of key aspects of her approach in earlier Frankfurt School thinkers, as well as productive lines of thought explored by the earlier generations that she has chosen not to develop further. You will read major essays by authors from the first generation: Adorno, Benjamin, Horkheimer. An extract from Habermas’s ‘Structural Transformation of the Public Sphere’ will give you a sense of subsequent developments. The excerpts will be contextualized by comparisons with influential contemporaries: John Dewey, Erich Auerbach and
Hannah Arendt. By the end of the course you will have an understanding of the foundational model of critical theory initiated by the Frankfurt School, as well as a nuanced sense of how their ideas might serve an analysis of our 21st-century present.

The mid-term paper will consist in a short exploration of a topic of your choice related to the readings. This topic will be further explored in your final paper.

<tr>
<td>To explore key literary, cultural and critical theories, we pose questions through readings of classic and contemporary theorists, from Aristotle to Kant, Schiller, Arendt, Barthes, Foucault, Glissant, Ortiz, Kittler, and Butler, among others. Their approaches include aesthetics, (post)structuralism, (post)colonialism, media theory, gender theory, ecocriticism. Each seminar addresses a core reading and a cluster of variations. Weekly writing assignments will formulate a question that addresses the core texts to prepare for in-class discussions and interpretive activities.</td>

Subject: Germanic Philology

Germanic Philology 200 Section: 1

History of the German Language (156291)

Benjamin Morgan

2021 Spring (4 Credits) Schedule: F 1200 PM - 0200 PM

Instructor Permissions: None Enrollment Cap: n/a

This graduate class will introduce you to key ideas in historical linguistics, as well as helping you develop a reading knowledge of Old High German and of different styles, registers and dialects of Middle High German. We will work closely with a range of texts from an Old High German heroic lay, the ‘Hildebrandlied’, a probably eighth-century lay recorded in a late ninth century manuscript, to the religious writings of Mechthild von Magdeburg and Meister Eckhart in the thirteenth and fourteenth centuries.

The mid-term exam will consist in a short commentary on an Old High German text. The final exam will be a short commentary on a Middle High German text.

Subject: Swedish

Swedish 10A
Beginning Swedish Language and Literature (121412)

Agnes Broome

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

A basic course focusing on listening, speaking, reading, and writing skills. During fall term, pronunciation and listening comprehension will be emphasized, as well as regular writing assignments. Literary, film, music and other cultural texts will be introduced relatively early on. By semester’s end, students will have achieved a basic literacy in everyday Swedish.

Course Notes: Not open to auditors.
Swedish 10B

Beginning Swedish Language and Literature (126648)

Agnes Broome

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

Continuation of the basic course focusing on a basic mastery of listening, speaking, reading, and writing skills. During spring term, the emphasis is on more advanced conversation and an exploration of Sweden's culture and civilization through selected texts and video. By semester's end, students will be able to carry on conversations in everyday Swedish, read news articles, and write letters and produce substantial creative work.

Course Notes: Not open to auditors.

Swedish 20A

Intermediate Swedish: Childhood in Swedish Literature and Culture (112472)

Agnes Broome

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 12

Sweden and Swedish Finland have produced some of the most translated and beloved works of children's fiction in the world. In this intermediate Swedish language course, we will review the essentials of Swedish grammar and vocabulary as we explore some of these classic works of children's fiction, film, and comic books and the aspects of Swedish culture they illuminate. The final project for this class involves producing your own work of children's fiction or film.

Course Notes: Conducted in Swedish. Not open to auditors.

Prerequisite: Swedish Ab or equivalent.

Recommended Prep: Swedish Ab or equivalent.

Did you know that one of the strongest indicators of a healthy society is the health of its teeth? Everyone has teeth, but most people in the world don't have access to affordable dental care. This discussion-based course assesses current global health policies and approaches for addressing pressing health challenges despite resource constraints and severe political neglect. It aims for students to be competent in incorporating the global burden of oral diseases into foundational concepts of global health and world development. These include how oral diseases are associated with globalization, poverty, infectious and non-communicable diseases, maternal and child health, mental health, nutrition, tobacco, alcohol, urban and rural infrastructures, climate change, and the environment. This course demonstrates how complete health and an end to global poverty are not possible without including oral health in the global health and development agenda.

Course Notes: Students who complete GHHP 30 may apply to participate in an experiential learning opportunity in San Vito, Costa Rica over spring break. Since slots are limited, there will be a lottery.

Class Notes: Students are expected to attend one class lecture per week, on Mondays from 10-11:15 am or Fridays 1:30-2:45 pm.

Global Health & Health Policy  50

The Quality of Health Care in America (114957)

Anupam Jena

2021 Spring (4 Credits) Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 42

Offers information and experiences regarding the most important issues and challenges in health care quality. Overview of the dimensions of quality of care, including outcomes, overuse, underuse, variation in practice patterns, errors and threats to patient safety, service flaws, and forms of waste. Each session focuses on one specific issue, exploring patterns of performance, data sources, costs, causes, and remedies. Explores desirable properties of health care systems that perform at high levels in many dimensions of quality.

Course Notes: Lotteried course, enrollment limited to 42.

Global Response to Disasters and Refugee Crises (161268)

Stephanie Kayden  
Michael VanRooyen

2021 Spring (4 Credits)  
Schedule:  
R 1245 PM - 0245 PM

Instructor Permissions:  
Instructor

Enrollment Cap:  
30

Climate change, urbanization, and conflict mean that global disasters are on the rise. How should the world respond when disasters force people from their homes? How can we better help the world’s refugees? This course examines the past, present, and future of the international humanitarian response system. We will explore how Doctors Without Borders, the United Nations, the Red Cross, and other aid agencies came to be and how global response standards, international humanitarian law, and new technologies are shaping worldwide disaster relief.

Through interactive discussions and case studies, students will learn how aid workers interact with governments, militaries, and civil society to provide refugee aid. At the end of the course, students can choose to live the refugee experience during a large-scale, weekend outdoor simulated humanitarian response training program together with other students and professional aid workers from around the world.

Course Notes:  
Lotteried course, enrollment limited to 30.

Research in Global Health and Health Policy (123102)

David Cutler

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Global health and health policy are interdisciplinary fields that apply the theories and methods of statistics, sociology, political science, economics, management, decision science, and philosophy to the study of population health and health care. Research from these fields influences policymaking in a variety of settings. For example, the Patient Protection and Affordable Care Act (ACA) drew upon health policy research to develop programs for improving access and quality of care in the United States. Similarly, global health research guides international institutions, such as the World Health Organization, in determining health guidelines for all countries. Global health and health policy research can also inform practices inside hospitals, initiate programs for diseases like HIV, and regulate the food and drug industries. This course introduces the fundamentals of research design and methods in global health and health policy and assists students in developing research projects and crafting policy recommendations that can impact health care systems and public health.

Course Notes:  This course fulfills the research requirement of the Secondary Field in
Global health and health policy are interdisciplinary fields that apply the theories and methods of statistics, sociology, political science, economics, management, decision science, and philosophy to the study of population health and health care. Government 10

Foundations of Political Theory (124414)

Danielle Allen

2021 Spring (4 Credits)  
Schedule: TBD

Instructor Permissions: None  
Enrollment Cap: n/a

This course investigates the central problems of political theory that concern the justification of democracy. Is democratic rule the uniquely just form of collective decision-making? What political institutions best express the democratic values of equality, deliberation, and participation? What are the moral responsibilities of citizens - whose representatives exercise political power in their name? Is democracy a human right? Readings integrate contemporary work in political philosophy with canonical thinkers, including Plato, Aristotle, Rousseau, and J.S. Mill.

Government 20

Foundations of Comparative Politics (117853)

Steven Levitsky

2020 Fall (4 Credits)  
Schedule: TBD

Instructor Permissions: None  
Enrollment Cap: n/a

Provides an introduction to key concepts and theoretical approaches in comparative politics. Major themes include the causes of democratization, economic development, ethnic conflict, and social revolutions; as well as the role of the state, political institutions, and civil society. Examines and critically evaluates different theoretical approaches to politics including modernization, Marxist, cultural, institutionalist, and leadership-centered approaches. Compares cases from Africa, Asia, Europe, Middle East and Latin America to provide students with grounding in the basic tools of comparative analysis.

Class Notes: comparative_subfield

Class Notes: This course will be accessible to students in all time zones. It will be a flipped class with asynchronous recorded lectures and synchronous meetings with Professor Levitsky on either Tuesdays at 7:30pm or Wednesdays at 12pm. There will also be weekly TF-led discussion sections.
Government  30

American Government: A New Perspective (111813)

Paul Peterson

2020 Fall (4 Credits)  Schedule:  MW 0130 PM - 0245 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

Provides an overview of contemporary American politics. It analyses the way in which recent changes in elections and media coverage have helped shape key aspects of American government, including the courts, Congress, and the Presidency, the workings of interest groups and political parties, and, also, the making of public policy. Permanent political campaigns have altered governmental institutions and processes. The course explains how and why.

Government  40

International Conflict and Cooperation (126258)

Stephen Chaudoin

2021 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions:  None  Enrollment Cap:  n/a

This course is an introduction to the analysis of the causes and character of international conflict and cooperation. The course begins with a foundational review of the different levels at which states interact and the primary theoretical paradigms in the field. It then addresses how states achieve cooperation in the face of international anarchy. The course next addresses basic bargaining theory, which uses insights from economics to explore how bargaining breakdowns, commitment problems, and incomplete information can lead to war. Thereafter we examine three popular topics in contemporary international relations research: the roles that psychology, leaders, and domestic politics play in explaining international conflict and cooperation. We will also look at international organizations/law, terrorism, trade, foreign aid, international development, and climate change.
This course, an introduction to data science, will teach you how to think with data, how to gather information from a variety of sources, how to import that information into a project, how to tidy and transform the variables and observations, how to visualize, how to model relationships, how to assess uncertainty, and how to communicate your findings. Each student will complete a final project, the first entry in their professional portfolio. Our main focus is data associated with political science, but we will also use examples from education, public health, sports, finance, climate and other. (Previous course number: Gov 1005).

Class Notes: Gov 50 corresponds to old course number Gov 1005 (Data)
Government 50 Section: 002

Data (115859)

David Kane

Government 51

Data Analysis and Politics (123443)

Matthew Blackwell

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

How can we measure racial discrimination in job hiring? What is the best way to predict election outcomes? What factors drive the onset of civil wars? The goal of this course is to give you the ability to understand, explain, and perform research on the most pressing social and political issues with a special focus on data analysis and causal reasoning. You will be able to read and understand the methodology of
most academic articles in the social sciences while also learning the core ideas and tools of data science used across many industries.

**Course Notes:** This course must be taken for letter grade.

**Class Notes:** Gov 51 corresponds to old course number Gov 50 (Political Science Research Methods).

**Class Notes:** This course will be accessible to students in all time zones. It will be a flipped class with asynchronous lectures (prerecorded lecture videos) and synchronous classes with Professor Blackwell. Synchronous sessions for international students will be scheduled after registration. There will also be weekly TF-led discussion sections and study halls.

Models (211173)

*David Kane*

2021 Spring (4 Credits)  

**Schedule:** TBD

**Instructor Permissions:**  

- **Instructor:**  
- **Enrollment Cap:** n/a

Statistical models help us to understand the world. This class explores the use of models for analysis in the social sciences broadly, and in political science specifically. Does a history of slavery in a county influence contemporary political views? Does perceived demographic change impact policy preferences? Does having daughters affect a judge’s rulings? We use the R programming language, RStudio, Git and GitHub. Each student will complete a replication as their final project, an attempt, successful or not, to reproduce the results from a published article in the academic literature. This class provides an introduction to data science and is designed to lay the groundwork for an empirical senior thesis. (Previous course number: Gov 1006)

**Class Notes:** Gov 52 corresponds to old course number Gov 1006 (Models).

**Recommended Prep:** Gov 50 and statistics at the level of Gov 51, or permission of the instructor.

Government  62
Research Practice in Qualitative Methods (108287)

George Soroka

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

With the goal of preparing students to undertake original research, this course introduces students to basic principles and tools of qualitative research in the social sciences. Focus is on comparative research design and the principal tools of qualitative research. Topics examined include the pitfalls of selection bias, the logic of causal inference, measurement and conceptualization, and the potential of mixed methods. Research techniques covered are process tracing, analytic narratives, natural experiments, archival research, interviews, and ethnography.

Topics and Resources in Political Theory (108285)

Michael Rosen

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

This course introduces students to the most important debates in contemporary English-language political theory, centered on questions of justice, equality and rights. We then turn to topics that reflect the individual interests of students who enroll. The course is designed to help participants to make the transition from being critical readers of political thought to being independent contributors to debate. It will be especially useful for those considering writing a thesis in political theory.

Government  90A
Southeast Asia in World Politics (117994)

George Soroka

2020 Fall (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  12

This course examines the politics—historical and contemporary—of Southeast Asia to address recurring themes in political science.
If you've ever wondered, "What is national identity and where does it come from?", "How can I spot a populist in the wild?", "Why do democracies (or dictatorships) die?", "Was colonialism profitable?", "What is it like to be stuck between the great powers?", "Where did all the Communists go?", "Can multiethnic / multi-religious democracy succeed?" or simply, "What's going on over there?", this course has a lot to offer you.

People who take courses like this are well-positioned to win grants for research, study, or work in Southeast Asia.

Our ultimate focus will be on contemporary politics, but we will devote considerable time to understanding how historical experiences shape what we see today. We will cover the entire region, but devote the most attention to Indonesia, the Philippines, Burma, Malaysia, Thailand, and Vietnam.

Class Notes: Introductory undergraduate seminar intended for first-year students and sophomores.

Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Breaking the Glass Ceiling: The Politics of Women in Leadership (111734)

George Soroka

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 12

Why is there underrepresentation of women in leadership? Who becomes a leader and why? What makes effective leaders? Do women "lead differently" than their male counterparts? Do quotas or other diversity policies work? These questions will motivate this interactive seminar as we examine research and case studies about female leaders of all types — from those running for office to those serving in high levels of government to those working as grassroots organizers.

Class Notes: Introductory undergraduate seminar intended for first-year students and sophomores.

Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Technology Science Practicum (207920)

*Latanya Sweeney*

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: n/a

This practicum is a capstone to the Technology Science Program, designed to give students the opportunity to conduct original research and write a publication-ready research paper. In consultation with the instructor, students select a concrete technology-society conflict to address, produce autonomous research to analyze it, and provide a set of actionable recommendations or produce appropriate technology to solve it. Throughout the semester, students receive feedback both from their peers and the instructor to aid the development of their projects. Class meetings include the development of writing schedules, discussions focused on framing, analysis, methodology, and peer-review of student projects. Emphasis is placed on issue spotting, academic story-telling and research framing for maximum impact. The course culminates with a formal presentation of the students' projects and papers.

Public Policy Practicum (214596)

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 12

This course provides students an opportunity to do policy research. Students will read academic research on policy and the politics of policy making, and then do their own research for a policy proposal commissioned by a real client, such as a legislator or an NGO. Each student will write a research paper on a topic related to the group project. This research will also contribute to a single, integrated report and oral presentation for the client.

#AbolishPolice: The Politics of Public Safety in the Age of Social Media (216449)

Jennifer Halen

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 16

Recent examples of police brutality have ignited unforeseen momentum for police and prison abolition. Online activism has helped to fuel this unprecedented moment, sparking heated debates about equitable public safety. We'll discuss these debates as well as questions like: what would police abolition look like in practice? How does #AbolishPolice relate to parallel/complementary movements like #DefundPolice, #AbolishIce, #BlackLivesMatter, and others? And how do online campaigns affect the speed, intensity, and content of social movements? Topics will also include the intellectual
roots and history of the carceral abolition movement, activist tactics and technologies, and institutional design and change.

Class Notes: Course Format: Synchronous Traditional Seminar.
Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

Political Economy of the Environment (207736)

Alexander Gard-Murray

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  16

This course will apply the tools of political economy to the study of environmental policymaking, both in the United States and around the world. How are different interests represented in the creation and implementation of environmental policy? What makes some countries more active on environmental issues? When do businesses choose to support environmental action? Why do some kinds of environmental problems seem easier to solve than others? We will study these questions with a range of contemporary and historical case studies, drawing on both the academic literature and accounts from activists, lobbyists, and policymakers.

Meritocracy and its critics (213734)

Michael Sandel

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  16

Suppose a society achieved truly equal opportunity, so that people could rise as far as their talents and hard work would take them. Would this be a just society? Would those on top deserve their success? To what extent is American society a meritocracy? Do universities promote opportunity or reproduce privilege? The seminar will explore these and other questions related to equality, mobility, and the American dream.

Globalization and Private Governance (125573)

Michael Hiscox

This research seminar examines the impacts of globalization on attempts to address key social, political, and environmental problems, including climate change, focusing in particular on the roles played by multinational corporations. Topics include: international institutions and agreements and how these affect regulatory standards set by governments; the potential (and limits) of corporate responsibility and sustainability initiatives; the effectiveness of activist campaigns, including consumer boycotts; the impacts of voluntary certification and labelling schemes, such as Fair Trade, and; the prospects for social enterprise and purposeful business.

Class Notes: Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students’ time zones and course schedules.

Crime, responsibility, and the law (213657)

Gabriel Katsh

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

One of the central questions of any political system is how to respond to those who violate the legally enforced norms of behavior that make up the criminal law. In this seminar, we will consider the philosophical justifications that have been given for the operation of the criminal justice system and, in particular, for the practice of punishing offenders. We will focus on the contrasting ideologies of retributivism and consequentialism and how those systems address moral principles such as responsibility, agency, blame, and desert as well as more practical concerns such as deterrence and public safety. Readings will be drawn from a wide range of sources, primarily political theory and law, but also the philosophy of mind, sociology, history, and neuroscience.

The Politics and Ethics of Medical Care (109731)

Gabriel Katsh

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 16

This course is an introduction to medical ethics and the ways in which political theory can inform our understanding of the moral and political dimensions of medical care. Using case studies as a launching point, we will explore ideas about autonomy, paternalism, beneficence, and distributive justice, and their application to issues such as informed consent, medical privacy, and the right to refuse care. The Fall 2020 iteration of the course will focus in particular on ethical and policy dilemmas that have arisen in the context of the coronavirus pandemic, including questions about the distribution of scarce resources, the health effects of inequality, and balancing the needs of public health with concerns about individual liberty. Readings include classics of moral and political philosophy, writings by contemporary medical ethicists, Supreme Court decisions, and some empirical and historical studies.

Class Notes: Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Politics of Climate Change (207733)

Nara Dillon

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 16

This course will explore the political problems involved in mitigating and adapting to global climate change. We will draw on both the empirical and normative political literatures, as well as climate science and economics, to approach key questions about climate politics. What do we owe to the future and to people elsewhere? What are the costs of different policy options, and how should they be distributed? How have different governments responded, and what factors shape their responses? What role do international treaties, social movements, and public opinion play? And what can or should be done to change our current trajectory?

Class Notes: Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Politics of Religion in Liberal Democracies: America and the European Union (108915)
George Soroka

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 16

This course examines the various ways, normative and practical, in which politics interact with religion in the U.S. and select EU-member countries. Structuring it are three main tasks: to examine the utility of secularization theory in explaining changes on the political landscape; to compare and contrast American and European experiences with religion in the public sphere; and to consider the political implications of increasing religious/ideological pluralism within these societies.

Class Notes: Course Format: Synchronous Seminar.
Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Transitional Justice and the Politics of Truth Commissions (207734)

Gloria Ayee

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 16

Scholars, policymakers, and political leaders have long debated appropriate responses to severe human rights violations that occur during periods of periods of civil conflict, war, and genocide. This course introduces students to interdisciplinary studies in transitional justice and post-conflict reconciliation by focusing on the work of truth and reconciliation commissions. Students will examine key concepts and theoretical perspectives that are central to the field of transitional justice. Drawing on cases such as South Africa, Chile, Peru, and Canada, the course will critically examine how truth commissions are used to provide accountability for human rights abuses carried out by the state.

Class Notes: Course Format: Synchronous Seminar.
Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

Technically Justice? The Politics of Technology and Criminal Justice Reform (214573)

*Jennifer Halen*

2021 Spring (4 Credits)  
Schedule: TBD  
Instructor Permissions: Instructor  
Enrollment Cap: 16

The U.S. criminal justice system is rife with problems that have devastating consequences for individuals, families, and communities. How can we fix this troubled institution? This class examines the politics and policies behind the explosion of tech-based reforms, including surveillance tech, predictive policing, Virtual Reality, and many other theoretical and applied reforms. Additionally, the class will explore activists’ and prison abolitionists’ perspectives and technologies used to resist or alter the carceral system. The empirical and normative consequences of each of these perspectives and technologies will be discussed throughout.

Sino-US Relations in an Era of Rising Chinese Power (124775)

*Alastair Johnston*
Assesses theoretical arguments and empirical evidence concerning the implications of Chinese economic and military modernization for conflict and cooperation between China and the US. Some issues examined include global arms control, trade, the environment, and regional security.

**Government  94JW**

Democracy in Practice in the Global South (216772)

*Julie Weaver*

2021 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions:  None  
Enrollment Cap:  16

This seminar explores how democracies operate on the ground in low- and middle-income countries today. What is the reality of how democracy works in practice versus how it is conceived and designed? What are developing countries' major democratic challenges and successes? How does a country's income level impact, and in turn is impacted by, democratic participation? Main themes to be covered include overarching issues like representation, institutions and state strength, as well as more specific areas of democratic practice such as participatory democracy, civil society, corruption, and managing diversity.

**Government  94KJ**

The Psychology of International Politics (216183)

*Joshua Kertzer*

2021 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions:  Instructor  
Enrollment Cap:  16

This undergraduate seminar explores the political psychology of international relations and foreign policy. Topics covered include how leaders make decisions in foreign policy, signaling and perceptions, reputation and status, ideology and culture, nationalism and identity, political violence, and emotions and moral reasoning.
Government 94MCC

Peace-Building: Approaches to Reducing Ethnoreligious Conflict (213364)

Melani Cammett

2020 Fall (4 Credits)  
Schedule: TBD

Instructor Permissions: Instructor  
Enrollment Cap: 16

Since the end of the Cold War, identity-based conflict has been on the rise. Many countries in Africa, South and Southeast Asia, the Middle East and the Former Soviet Union have witnessed wars and conflict and riots that are ostensibly waged for ethnic or religious reasons. Even if they are not the root cause of these conflicts, such identities often become politically salient as a result of political violence targeting ethnic or religious "others" and, once activated, exhibit remarkable stickiness in social and political life. When intergroup tensions have ratcheted up, is it possible to reduce their importance? Can a shared civic identity be constructed in the wake of violence waged in the name of ethnicity or religion? This course aims to explore these questions through an exploration of relevant social science literature and in-depth analyses of case studies of conflict and conflict resolution.

Class Notes:  
Course Format: Synchronous Seminar. The rest of student interaction time will be spent in section, peer group activities, and office hours.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes:  
Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

Global Cities in East Asia (216184)

Nara Dillon

2021 Spring (4 Credits)  
Schedule: TBD

Instructor Permissions: Instructor  
Enrollment Cap: 16
This seminar examines urbanization and globalization in East Asia. We will first focus on the history and geography of globalization. The second part of the course turns to theoretical debates about contemporary globalization and a range of controversies surrounding global cities. Why are some cities more "global" than others? Is globalization increasing inequality in urban society? Is globalization making cities more similar to each other in urban planning and architecture? Tokyo, Beijing, Hong Kong & Bangkok will be the Asian global cities explored in depth in the reading.

Inequality and American Democracy (125211)

Theda Skocpol

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 16

The "rights revolutions" of the 1960s and 1970s removed barriers to full citizenship for African Americans, women, and other formerly marginalized groups. But inequalities of wealth and income have grown since the 1970s. How do changing social and economic inequalities influence American democracy? This seminar explores empirical research and normative debates about political participation, about government responsiveness to citizen preferences, and about the impact of public policies on social opportunity and citizen participation.

Government 94PY
Revolution and Politics in Contemporary Iran (109733)

Payam Mohseni

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 16

Iran is increasingly a significant power in the Middle East and a salient country to global affairs. Accordingly, this course examines the intricacies of Iranian politics since the 1979 revolution. It explores a broad range of topics including the causes of the Iranian revolution; the political implications of the Islamic regime's institutional architecture; the competitive factional dynamics within the ruling elite; Iranian foreign policy, Iran-US relations, and nuclear negotiations; and Shia political ideology.

Class Notes: Course Format: Synchronous Seminar.
Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.
Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

A Revolt against Globalization? How Political Economies Change (205265)

*Peter Hall*

2020 Fall (4 Credits)  
Schedule: TBD  
Instructor Permissions: Instructor  
Enrollment Cap: 15

What drives the social and economic policies of the developed democracies? Is the current wave of populism a revolt against globalization? This course explores changes in the growth strategies pursued by the OECD countries since 1945 and the developments in electoral and producer group politics that drive them across different varieties of capitalism, including contemporary debates about the crises of capitalism and democracy.

Class Notes: Course Format: Synchronous Seminar.  
Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

John Rawls (216470)

*Michael Rosen*

2020 Fall (4 Credits)  
Schedule: TBD  
Instructor Permissions: Instructor  
Enrollment Cap: 10

John Rawls's thought is immensely original and challenging, but it can also be hard to grasp. Rawls wrote extensively and his presentation of his ideas changed in significant ways over the course of his long career. This class sets itself the simple goal of reading all of Rawls's main writings without the distraction of
secondary debates. The hope is that, at the end, we will each be able to come to our own evaluation of the most influential political philosopher of the twentieth century.

Class Notes:

Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Who Gets Represented? (216441)

Daniel Smith

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 16

Who serves in Congress and other legislatures, and do the backgrounds of politicians affect how policies are decided and which policies get adopted? This seminar explores the political representation of different groups in society, and the consequences of representation for policy outcomes. Topics include the representation of women, racial and ethnic minorities, LGBTQ+, religious groups, geographic regions, class interests, and other social divisions.

The Politics of Economic Inequality (216213)

Thomas Remington

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  16

This seminar investigates the political factors contributing to rising economic inequality in the United States, other developed democracies, transition countries, and globally. The first half will focus primarily on the United States and the second half will examine inequality in comparative and global perspective. We will review the major theories of inequality and examine the consequences of economic inequality for political equality, social mobility, and the differential impact of the COVID-19 pandemic. Throughout, we will relate political to economic factors that drive economic inequality, identifying commonalities and differences across countries.

Global Ethnic Politics (207739)

Gloria Ayee

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  16

Global Ethnic Politics is an undergraduate course that focuses on the social and political implications of ethnic identities in different parts of the world. The course provides a comparative, global analysis of race and ethnicity, and is designed to help students understand the history, dynamics, and salience of ethnic inequality and political cleavage. Issues under consideration include definitions of race and ethnicity, colonization, nationhood, the politics and political history of indigenous peoples, the history and persistence of White supremacy, multiculturalism, legacies of slavery, ethnic political mobilization, panethnicity, diasporas and transnationalism, migration, ethnic cleansing and genocide, and contemporary racial stratification.

Undergraduate seminar. Enrollment by lottery. Please see Gov Dept undergraduate website for details.

Government 94YW
Comparative Political Development (216212)
Yuhua Wang
2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  16

This course examines the historical development of different political institutions in the world. Why did modern nation states and representative governments emerge in Europe? What was the path of political development in other parts of Eurasia, such as China and the Middle East? How did different political institutions influence economic development in the long term? We explore these big questions drawing materials from political science, history, sociology, anthropology, and economic history. A major course objective is to understand how the roots of political development in different countries connect with their politics and economies today.

Introduction to Geographic Information Systems (122850)

Jill Kelly

2020 Fall (4 Credits)  

Schedule: T 0300 PM - 0545 PM  

Instructor Permissions: Instructor  

Enrollment Cap: 30  

This course teaches the use of Geographic Information Systems (GIS), a collection of hardware and software tools that allow users to visualize and analyze geographic data in its spatial configuration. Students will learn the theory of geospatial analysis alongside practical methods for acquiring, manipulating, displaying, and analyzing cartographic data.

Course Notes: No prerequisites.

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. Additional interactive sessions for international students will be scheduled after registration.

Spatial Models of Social Science (207780)

Jill Kelly

2020 Fall (4 Credits) Schedule: T 1200 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

This course will survey the theory and application of airborne and satellite remote sensing, primarily as a tool for spatial social science. Students will learn the basics of electromagnetic radiation, reflection and absorption, satellite and sensor technology, and digital image analysis, with a focus on data acquisition and preparation. Students will learn the use of software for image processing and analysis, the fundamentals of raster GIS, and the use of a scriptable online platform for quick remote processing. Applications will have a social focus, including urbanization and development, infrastructure, settlement morphology, change detection, and interactions between the human and natural environments.

Available for undergraduate and graduate students.

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. Additional interactive sessions for international students will be scheduled after registration.

Community Based Survey Research Practicum (216451)

Chase Harrison

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a
Surveys are used by a variety of community and government organizations to gather information and answer policy questions. This practicum will provide students with the opportunity to develop their knowledge of survey research by designing and conducting an original survey for an actual client based in the community. Students will learn how to listen to, understand, and evaluate organizational needs and goals, how to translate those goals into an effective survey research design, how to develop, design, and pilot a survey to provide actionable data to improve social processes or answer useful questions.

Recommended Prep: Prerequisite: GOV 1010, or an introductory course in social science research methodology, or previous experience working with surveys or survey data.

Conservatism and its Critics (216332)

Eric Nelson

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: None  Enrollment Cap: n/a

What is conservatism? Is it merely a temperament or sensibility? Or is it a coherent approach to political theory and practice? Should conservatives defend free markets? Must they reject the discourse of natural rights? Can a liberal be conservative? Can a socialist? This course will explore such questions and others like them through a close reading of conservative writers and their critics. We will begin with the rise of conservatism as a political force in the wake of the French Revolution and follow its fortunes across the next two centuries, in works of political theory as well as literature. Authors will include Edmund Burke, Mary Wollstonecraft, Samuel Taylor Coleridge, Ford Madox Ford, Friedrich Hayek, Michael Oakshott, Robert Nozick, and Tom Stoppard. We will be interested throughout in asking what, if anything, is conservative about the Conservative Movement in contemporary American politics.

Feminist Political Thought (207714)

Katrina Forrester

2020 Fall (4 Credits)  Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None  Enrollment Cap: n/a

What is feminism? What is patriarchy? What and who is a woman? How does gender relate to sexuality, and to class and race? Should housework be waged, should sex be for sale, and should feminists trust the state? This course is an introduction to feminist political thought since the mid-twentieth century. It explores the key arguments that have preoccupied radical, socialist and liberal feminists, and how debates about equality, work, and identity matter today.

Class Notes: theory_subfield

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture. To accommodate students in different time zones, an additional section will be scheduled after enrollment. There will also be weekly TF-led discussion sections.

Educational Justice (204038)

Jacob Fay

2021 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions: Instructor  Enrollment Cap: n/a

Educators and educational policy makers regularly face challenging ethical decisions. For example, what should be done about a student with diagnosed emotional issues who frequently disrupts class, but who benefits from being mainstreamed? Should teachers resist grade inflation even if it helps their students in the college and labor market? Is it just to expand a charter school that achieves outstanding academic outcomes at the cost of high attrition rates? When school closure or teacher evaluation policies disproportionately impact low-income communities of color, is that in itself evidence of an injustice that must be addressed? These kinds of questions are often addressed as technocratic challenges of leadership, legal compliance, or accountability. This course, by contrast, addresses the ethical dimensions of educational practice and policy, with justice as our primary focus. We will engage with philosophical, theoretical, and empirical readings from a wide variety of disciplines. We will also grapple with case studies of dilemmas of educational justice from classrooms, schools, districts, and organizations in the United States and abroad. Our goals will be to deepen our own understandings of educational justice, to engage with others about complex ethical judgments across multiple lines of difference, and to learn how to enhance educators’ and policymakers’ capacities to make ethical decisions under challenging conditions.

Course Notes: Undergraduates permitted upon application to instructor. Offered at HGSE as A-203.

Policymaking shapes the contour and content of our life choices. Political leaders can constrain our options without our knowledge, attach strings to policy benefits, and manipulate us in diverse ways. Lawmaking and campaigning, then, seem to demand heightened moral scrutiny. This course explores whether there are special vulnerabilities that arise in democratic settings. Does our ideal of the citizenship make us uniquely susceptible to certain forms of manipulation, from nudging to gaslighting? How can citizens inoculate themselves from the manipulative practices that democracy sustains?

Civil Resistance: How It Works (217384)

*Erica Chenoweth*

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 5

Civil resistance is the application of unarmed civilian power using nonviolent methods such as protests, strikes, boycotts, demonstrations, without using or threatening physical harm against the opponent. The use of civil resistance has been increasing around the world in recent decades in places as diverse as Sudan, Algeria, Russia, Serbia, Spain, Egypt, Iran, Maldives, the Niger Delta, the West Bank, Thailand, Myanmar, and the United States, among others. Because civil resistance can have profound effects, it is essential to understand the causes, dynamics, outcomes, and consequences of civil resistance campaigns. Such questions also have clear practical implications for those seeking to use, support, or assist such movements – as well as those who would seek to undermine them.

This course serves as a primer on the topic of civil resistance, introducing students to the primary explanations for how and why civil resistance works, as well as the practical implications of empirical research on the topic for observers, activists, and policymakers alike. The five primary goals of the course are to: (1) present leading explanations, concepts, approaches, and discourses for understanding civil resistance; (2) explore and recover in-depth cases to better understand how civil resistance succeeds and fails; (3) apply empirical research to current questions and controversies that dominate activist and organizer circles; (4) provide students with opportunities to synthesize their knowledge; and (5) allow students to deepen their knowledge about several historical cases around the globe, particularly neglected cases that can offer up novel insights and perspectives.

Course Notes: Jointly offered with HKS as IGA 147.

Class Notes: Students enrolled in this course attend two 75-minute class meetings a week. To support remote learning across time zones, students may register for one of two sections of this course. Both sections of the course meet together for one of the weekly meetings and meet in separate time blocks for the other weekly meeting. Course sections and meeting times are listed separately in my.harvard for registration.

This course is an introduction to the politics and political economy of development in modern Sub-Saharan Africa. Topics include the legacies of colonial rule, state formation, state failure and conflict, democratization and democratic erosion, corruption and political accountability, and the role of foreign aid. Readings draw from comparative politics, political economy, history, geography, and development economics. The course puts an emphasis on research design and evaluating causal claims.

**Government 1171**

The Making of Modern Politics (114770)

*Peter Hall*

How are democracies created and why do they collapse? What causes revolution? What were the consequences of the industrial revolution? What roles do ideas, institutions and interests play in processes of political change? This course examines the long-term historical developments behind the creation of modern politics. Focusing on Britain, France, Germany and Italy from the 1600s to the 2000s, it explores the lessons Europe offers for the development of democracy.

**Course Notes:**

This course, when taken for a letter grade, meets the General Education requirement for Societies of the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Politics of Europe (121735)

*Daniel Ziblatt*

This course, when taken for a letter grade, meets the General Education requirement for Societies of the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

**Class Notes:**

comparative_subfield
Examines political and economic change in Europe focusing primarily on England, France, Germany, Italy, Netherlands, Scandinavia, Spain, and the European Union with some focus on eastern Europe. Topics include the rise of modern states, industrialization, revolutions, democratization, the rise of fascism, the European Union, the politics of the post communist transitions, and contemporary far-right anti-immigrant populist parties. The course analyzes these phenomena from a variety of different theoretical perspectives, including economic, institutionalist, and leadership-centered approaches.

Negotiating Post-Soviet Conflict: The Geopolitics of Eastern Europe and the Caucasus (212603)

Arvid Bell

2021 Spring (4 Credits) Schedule: T 0945 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

This undergraduate course will use case studies and virtual immersive negotiation simulations to explore the dynamics underpinning hot spots in the post-Soviet space with a focus on Georgia, Eastern Ukraine and US-Russia relations. Students will not only gain a deeper understanding of current political events in Eurasia, but they will also improve their individual negotiation and conflict management skills.

Course Notes: This course includes six Tuesday sessions in addition to three extended Saturday sessions that feature immersive negotiation exercises. The exact dates of the Saturday sessions will be announced at a later date. Students are expected to attend all nine course sessions for synchronous learning.

Politics in Brazil (109554)

Frances Hagopian

2020 Fall (4 Credits) Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None Enrollment Cap: n/a

Interactive course introduces students to contemporary politics and policy in Latin America's largest country. Examines the colonial origins of inequality and truncated democracy, twentieth century authoritarianism and democratization, the design of political institutions, and such contemporary policy challenges as health, security, and
the environment. Emphasis is on how the mobilization of civil society, stronger political parties, and innovative social policies deepened citizen participation, reduced inequality, and advanced social inclusion, and how recent political polarization and economic crisis weaken political representation and threaten democracy. Course culminates in a present-day policy exercise that includes partnering with University of São Paulo students.

Class Notes: comparative_subfield

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture. To accommodate students in different time zones, an additional interactive session will be scheduled after enrollment. There will also be weekly TF-led discussion sections and meetings with students in our "sister" course on Brazilian politics at the University of Sao Paolo.

Comparative Politics in Latin America (146761)

*Steven Levitsky*

2021 Spring (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

Examines dynamics of political and economic changes in modern Latin America, focusing on Argentina, Brazil, Chile, Cuba, Mexico and Venezuela. Topics include the rise of populism and import-substituting industrialization, revolutions and revolutionary movements, the causes and consequences of military rule, the politics of economic reform, democratic transitions, and democratic consolidation. The course analyzes these phenomena from a variety of different theoretical perspectives, including cultural, dependency, institutionalist, and leadership-centered approaches.

Course Notes: Course is open to graduate students with instructor permission.

Race, Film, and American Politics (211313)

Gloria Ayee

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 30

Race, Film, and American Politics is a course that examines the multifaceted ways in which racial and ethnic identity has been represented in American film. Drawing on political science, sociology, anthropology, and film and media studies, we will assess the ways in which the mainstream media in the United States — focusing primarily on the Hollywood film industry — has portrayed different population groups and shaped our understanding of what it means to be American. The course will address issues of social stratification, and consider the intersection of identity and politics by analyzing historical shifts in cinematic representation in the United States.

Class Notes: american_subfield
Government 1338
Institutional Development in Native America (216175)
Daniel Carpenter
2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a
Examines the challenges and strategies of advocacy, sovereignty building and institutional development among Native Nations in the U.S. Includes engaged scholarship working with Native Nations on these issues.
Class Notes: american_subfield

Latanya Sweeney

2021 Spring (4 Credits)  

Schedule:  
TBD

Instructor Permissions:  
Instructor  
Enrollment Cap:  
30

We live in a new kind of technocracy—a society in which technology design dictates the rules that govern daily life. In the race to construct the latest gadget, app and online service, winning depends on rapid uptake and business success. Losing are social norms and democratic values. This course uses case studies to understand issues, introduces a formal framework to model and reason about technology-society conflicts and then demonstrates the power of scientific experimentation and ability to exploit paradigm shifts as means to a victorious future where society reaps the benefits of technological innovations without sacrificing critical values.
Government 1516

American Presidential Elections (216335)

Jon Rogowski

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

This course studies presidential elections in historical and contemporary perspective. It examines the development of presidential nominating procedures, the effectiveness of presidential campaigns, and the structural and individual-level factors that shape election outcomes, and links these topics to the 2020 presidential election. The course concludes by discussing the implications of presidential elections for American democracy and considering proposals for reform.

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. Additional interactive sessions for international students will be scheduled after registration. There will also be weekly TF-led discussion sections.

Government 1539

Politics of the American Presidency (205108)

Jon Rogowski

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

This course surveys the politics of the American presidency in a system where power is distributed across branches of government. From this institutional perspective, the course uses historical and contemporary examples to engage the following questions: What is presidential power and what are its implications for American democracy? When do presidents succeed — and why do they fail? How do presidents manage relations with Congress, the courts, the bureaucracy, and the public? How do presidents make decisions about war and peace? Through answering these questions, the course illuminates the factors that shape the behavior of the world’s most powerful political leader.
Terrorism dominates the headlines, but few observers attempt to think critically about the origins, evolution, and variable impacts of terror groups over the course of history. Alongside many enduring myths and misperceptions about terrorism, the history of this violent technique is rife with puzzles. Why is it so difficult for people to agree on a common definition of terrorism across the globe? Why do groups take up arms against civilians to effect political change? Why do some groups remain fairly restrained in their use of violence while others routinely engage in mass atrocities? Why do some terror groups end within a year of their emergence, whereas others toil along for decades? What are the most effective ways to combat terrorism? What is really "new" about the "new terrorism"? The course takes a theoretical and historical approach, attempting to nest contemporary challenges within the broader global context of terrorism as a phenomenon. To this end, the course will acquaint students with the historical evolution of domestic and international terrorism while introducing them to the major analytical approaches to the study of terrorism. The five primary goals of the course are for students to: (1) present leading theories, approaches, and concepts for understanding terrorist behavior around the globe; (2) evaluate current approaches to terrorism against prevailing evidence; (3) apply cumulative knowledge to current policy problems and make informed inferences about future developments; (4) deepen their knowledge about particular cases or topics regarding terrorism and counterterrorism; and (5) synthesize their knowledge during in-depth course discussions and several written assignments. By the end of the course, students should understand the fundamental analytical and policy debates surrounding terrorism globally, as well as several policy alternatives that may lead to solutions. Students should also develop substantive knowledge about current trends in terrorism and counterterrorism. By the end of the term, students should be comfortable taking an intellectual stand about topics related to terrorism, defending their positions with evidence, engaging in self-critique, deriving actionable policy recommendations, and communicating those recommendations to both specialist and non-specialist audiences—particularly when the empirical record contrasts with the conventional wisdom. Course assignments are designed to enhance those skills.
Explores the organized use of violence for the purposes of the state, with particular attention paid to the question of strategy and the sources of victory.

Controlling the World's Most Dangerous Weapons (147213)

*Matthew Bunn*

*William Tobey*

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 5

Preventing nuclear war is one of the truly existential challenges facing the human species -- but the danger is rising, as tensions among nuclear powers increase, nuclear agreements are challenged, and new technologies and arms competitions create new uncertainties. From Iran to North Korea, from U.S.-Russian and U.S.-Chinese nuclear competition to Syria's deadly chemical assaults, decisions about nuclear, chemical, and biological weapons can make the difference between war or peace and between safety or grave danger for people around the world. This course will give students an understanding of these weapons and the global efforts to prevent their use and control their spread. The course covers policy tools from treaties and diplomacy to sanctions and war. This year, particular attention will be paid to emerging great-power competition and its implications for deterrence and arms control. Students will learn to use an integrated, risk-informed approach to assessing policy options when difficult choices need to be made in the face of large uncertainties. This will help prepare students for careers dealing with choices about these deadly weapons.

Class Notes: Also offered by HKS as IGA 232.

Behavioral Insights and Public Policy: Nudging for Good (204958)

*Michael Hiscox*

2021 Spring (4 Credits)  
**Schedule:** TBD

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Behavioral economics focuses on the ways in which our individual actions, rather than resulting from rational self-interested decisions, reflect a variety of biases, habits, emotions, and considerations about others. Many governments have created behavioral insights teams to apply these insights to rethink traditional approaches to policy. We will examine recent research and applications in areas including healthcare, crime, discrimination, retirement savings, consumer credit, environmental conservation, welfare, employment, education, taxation, and foreign aid.

Central Asia in Global Politics (207984)

Nargis Kassenova

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

The course is designed as an in-depth study of the place of Central Asia in global politics and the policies of key external actors, such as Russia, the United States, China, European Union, Turkey, Iran, Japan, South Korea and India, toward the region. Students are familiarized with the ways Central Asia has been contextualized both in scholarly sources and media. We will dwell on the changing geopolitical dynamics of the region and analyze similarities and differences in the foreign policies of Central Asian states. At the end of the course, we will discuss future prospects of the region.

Government 1790
American Foreign Policy (156115)

Joshua Kertzer

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

Explores America's role in global politics as explained by the major theoretical perspectives in international relations. Topics covered include American grand strategy, bureaucratic politics, the role of public opinion in foreign policy, and contemporary challenges such as anti-Americanism, the rise and fall of great powers, terrorism, and nuclear weapons.

Class Notes: IR_subfield

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. Additional interactive sessions for international students will be scheduled after registration. There will also be weekly TF-led discussion sections.
**Government 1796**

*Graham Allison*

*David Sanger*

2020 Fall (4 Credits)  

**Schedule:**  
M 0430 PM - 0715 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
23

Using a series of case studies from the front page, and from the most urgent and important issues on the U. S. national security agenda, this course will engage students in grappling with the hardest American national security challenges of the decade ahead. Issues range from Russiagate and the economic and military rise of China to Iran, Syria and the continuing war on terrorism. Assignments require strategic thinking: analyzing dynamics of issues and developing strategies in a government whose deliberations are discombobulated by leaks, reports about internal differences among policymakers, and press analyses. Students will learn to devise strategies and write Strategic Options Memos as participants in the policymaking process. Strategic Options Memos combine careful analysis and strategic imagination, on the one hand, with the necessity to communicate to major constituencies in order to sustain public support, on the other. A major subtheme of the course explores coping with a world where a pervasive press makes secrecy more often the exception than the rule. In each case, there will be exploration of how media coverage affects decision making, with an examination of leaks about Russia’s cyber intervention in the 2016 election, WikiLeaks, and the Snowden case as well as the revelations about drones and secret, American-led cyberattacks, and other examples of the publication of classified information.

**Course Notes:**  
Offered jointly with the Kennedy School as IGA-211.

Quantitative Social Science Methods I (124780)

*Gary King*

2020 Fall (4 Credits)  

**Schedule:**  
M 1200 PM - 0200 PM

**Instructor Permissions:**  
None

**Enrollment Cap:**  
n/a

This class introduces students to quantitative methods and how they are applied to political science research. It has two overarching goals. First, we focus on the theory of statistical inference - using facts you know to learn about facts you don’t know - so that you can truly understand a wide range of methods we introduce, feel comfortable using them in your research, digest new ones invented after class ends,
implement them, apply them to your data, interpret the results, and explain them to others. Second, students learn how to publish novel substantive contributions in a scholarly journal. A substantial portion of those in this class publish a revised version of their class paper as their first scholarly journal article. Please see http://j.mp/G2001 for details.

Class Notes: Students enrolled in this course are expected to attend one session on Monday from 12 to 2pm and one additional 75-minute section on Thursday at either 7:30AM or 1:30PM. Lecture videos and recordings of the class meetings will be available online.

Quantitative Social Science Methods II (111530)

Matthew Blackwell

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

This course provides a rigorous foundation necessary for quantitative research in the social sciences. After reviewing the basic probability theory, we offer a systematic introduction to the linear model and its variants -- the workhorse models for social scientists. We cover the classic linear regression model, least squares estimation and projection, fixed and random effects models, principal components analysis, instrumental variables, flexible regression models, and regularization for high dimensional data. In covering these topics, we deepen our knowledge of fundamental concepts in statistical inference while also demonstrating how these methods are applied in political science.

Recommended Prep: Basic probability and statistical inference, familiarity with R.

Requirements: Prerequisite: Gov 2001 or the permission of the instructor.

Research Design in Political Science: Qualitative and Mixed Methods (207717)

Melani Cammett
Frances Hagopian

This course introduces students to multi-method research design and the basic principles and tools of qualitative research in the social sciences. Topics examined include the logic of causal inference, measurement and conceptualization, choosing cases, natural experiments, the potential uses of mixed methods, and research ethics. Research techniques covered are process tracing, archival research, interviews, and ethnography. Students will also have the opportunity to workshop their early-stage research. The application of multi-methods research designs is emphasized throughout the course.

Government 2034

Ethics, Economics, and Law (124836)

Michael Sandel

Explores controversies about the use of markets and market reasoning in areas such as organ sales, procreation, environmental regulation, immigration policy, military service, voting, health care, education, and criminal justice. The seminar will examine arguments for and against cost-benefit analysis, the monetary valuation of life and the risk of death, and the use of economic reasoning in public policy and law.

Course Notes: Offered jointly with the Law School as LAW - 2076. Meets at the Law School. Open to GSAS students with permission of the instructor.
In what sense, if at all, does Philosophy depend essentially upon its history? We approach this question in three phases. First, we compare the engagement with history found in the philosophical work of Hegel and Heidegger. Next, we address the meta-philosophical question itself through the work of figures like Bernard Williams, Michael Rosen, and Eileen O’Neill, among others. Finally, we explore the particular engagement with history manifest in the genealogical method, especially as it has been pursued recently by feminist philosophers such as Rahel Jaeggi, Sally Haslanger, and Amia Srinivasan.

Course Notes: The course enrollment will be capped at 20 with priority for Gov and Philosophy G1s and G2s.

Class Notes: Also offered by the Philosophy Department as PHIL 238.

Course Format: Synchronous traditional seminar.
Government 2056
Political Thought of the English Revolution (123245)

Eric Nelson

2020 Fall (4 Credits)  
Instructor Permissions: None  
Schedule: F 1245 PM - 0245 PM  
Enrollment Cap: n/a

This course will survey the remarkable range of political responses to the English constitutional crisis of 1640 to 1660, from theories of divine right to the arguments of the Levellers. Readings will include Filmer, Harrington, Lilburne, Milton, Nedham, Parker, and Sidney. Special attention will be paid to the idiosyncratic perspective of Thomas Hobbes.

Class Notes: Course Format: Synchronous traditional seminar.

Requirements: Course open to Doctoral Students Only

Government 2098
After Pandemic: political philosophy, political economy, and public policy for a new social compact (216190)

Danielle Allen

2020 Fall (4 Credits)  
Instructor Permissions: None  
Schedule: R 0900 AM - 1145 AM  
Enrollment Cap: n/a

The COVID-19 pandemic has delivered a shock to the nations of the world and the global political economy. In the U.S. the experience of the pandemic has been defined by failures of governance, leadership, and technocratic expertise and by the stark exposure of underlying health inequities, and the broad social vulnerability for individuals and the polity generally that flows from inequity. The centrality of care to our economy and social-well being has also been brought to the fore, made absence by the sudden disappearance of structures like schools that have come to develop so much of the care and services of the social safety net in the U.S. While much innovation in political philosophy, political economy, and public policy has been in development for the last decade, since the global financial crisis, the pandemic presents an occasion for harvesting the fruits of that work with the goal of articulating the foundations of a new social compact. This course will explore intersecting contributions in the domains of political philosophy, political economy and public policy that: (1) articulate goals for a 21st century vision of justice as tightly linked to democracy; (2) search out policy mechanisms that maximize the use of free exchange to align public and private goods thereby delivering material security, widely shared prosperity, negative positive, and social rights protection, and social equality; and (3) foster collective experimentation with the formal rules of contemporary polities toward those ends.

The course will spend the first three weeks on Danielle Allen’s forthcoming book, Justice by Means of Democracy, chapters from Glen Weyl and Eric Posner’s book and 2 papers by Weyl, Radical Markets, and Marc Stears forthcoming book, Out of the Ordinary. The subsequent weeks will focus on specific policy innovations, including writings such as the following:
1. Audrey Tang on "civic media"
2. Beth Noveck on participatory digital democracy
3. Colin Mayer and/or Michelle Meagher on the future of the corporation
4. Matt Prewitt on data cooperatives
5. Vitalik Buterin or Zoë Hitzig on crowd-funding/matching
6. Fiona Scott Morton on controlling corporate power
7. Joel Rogers and Joe Lambke on urbanism
8. Nicole Immorlica and/or Kaliya Young on identity systems
9. Sam Hammond on social insurance and welfare
10. Branko Milanovic and/or Maggie Peters on migration and trade

Class Notes:
Course Format: Synchronous traditional seminar.

Politics of Development (207715)

Melani Cammett

2020 Fall (4 Credits) Schedule: T 1245 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

This graduate seminar centers on big questions related to why development occurs in some places or times and not others and adopts a broad understanding of development, focusing on both economic and social development. Topics include but are not limited to states and markets, the origins and effects of the "developmental state" and state capacity, regime type and development, the influence of historical legacies, the role of elites and citizens in driving development, welfare regime variation in developing countries, ethnoreligious diversity and development, the relationship between development and conflict, and the relationship between the scholarly study of development and development policy and practice. The course opens with foundational approaches and quickly moves into key contemporary debates, with readings that use a broad array of methods and approaches.

Political Economy of Development (207722)

Pia Raffler

2020 Fall (4 Credits)  Schedule: M 0300 PM - 0500 PM
Instructor Permissions: None  Enrollment Cap: n/a

This graduate seminar provides an overview of the research frontier on political accountability and governance in developing countries, including democracies, electoral autocracies, and authoritarian regimes. Topics include democratization and democratic erosion, voting behavior, clientelism, accountability, the bureaucracy, and the role of foreign aid. While including some foundational readings, the syllabus puts emphasis on recent work. Readings primarily draw from comparative politics, political economy, and development economics. In addition to theory and empirics, the course focuses on the nuts and bolts of collecting qualitative and quantitative primary data. Parts of this seminar are hands-on, and students are expected to have a background in causal inference and statistical programming. Students will replicate and extend the data analysis of a recent study, write a peer review of an academic article, and write a research proposal or pre-analysis plan.
Government 2131
Comparative Politics of Latin America (132056)
Alisha Holland
2020 Fall (4 Credits) Schedule: F 1200 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a
Topics: historical paths, economic strategies, inflation and exchange rates, international explanations of domestic outcomes, authoritarian and democratic regimes, state institutions, the Roman Catholic Church, social movements, parties and party systems, and voters and voting behavior.

Government 2148
Civil Society, West and East (114710)
Susan Pharr
Grzegorz Ekiert
2020 Fall (4 Credits) Schedule: W 0300 PM - 0545 PM
Instructor Permissions: None Enrollment Cap: n/a
Focusing in particular on European and Asian settings, the seminar examines debates over what civil society is, notions of public space and social capital, and the role of civil society in political transitions.
advanced undergraduates, and have a special undergraduate-friendly Requirement Option. In the past, Susan Pharr has offered Gov 94gs, "Globalization and Civil Society"; but this course will no longer be offered in the future, so undergraduates interested in the rise (and fall?) of civil society across the globe should consider taking Gov 2148. This is the last time Gov 2148 will be offered, so this is your last chance to take it!

Class Notes: Introductory session will be held on 8/19 from 3 to 3:30pm followed by Prof. Pharr’s office hours from 3:30 to 4pm.

Joshua Kertzer

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: None  Enrollment Cap: n/a

This graduate seminar explores psychological approaches to international politics. Topics covered include heuristics and biases, signaling and perceptions, motivated reasoning and stereotypes, emotions and moral reasoning, personality and operational codes, ideology and culture, small group decision-making, intergroup relations, reputation and status, national and transnational identities, political violence, and evolutionary and biological approaches.

Government 2798
Field Experiments for Policy and Program Evaluation (205110)

Michael Hiscox

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: None  Enrollment Cap: n/a

The aim of the course is to provide students with training in how to design and implement randomized controlled trials to test causal models and evaluate policies and programs based on those models. We will
discuss working with government and non-government partners, ethics, sampling, blocking, statistical power, online platforms, and communicating findings. Examples will be drawn from research on political campaigns, business programs, economic development, public health, education, employment, welfare, taxation, discrimination, and criminal justice.

Government 3002
Teaching and Communicating Political Science (143023)

Thom Wall
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

This is a required course for Government PhD students who are teaching in the department for the first time (typically G3s). The course meeting five times in the fall semester. Between meetings, you will have the chance to apply what you learn through peer observation, having your section videotaped, and watching your section with the Departmental Teaching Fellow. The ultimate goal of this course is to help you to become a good teacher and an effective speaker.

Course Notes: Limited to and required of all first time teaching fellows in Government.

Graduate School of Arts and Sciences
Subject: Graduate School of Arts and Sc

Graduate School of Arts and Sc 299
Introduction to Graduate School: Skills and Practices for Scholarly Success (213514)
Robin Bernstein
2020 Fall (4 Credits)  Schedule:  MW 0300 PM - 0415 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

The course trains graduate students in the humanities and social sciences in fundamental skills that lead to scholarly success. Students learn to read journal articles swiftly and with high comprehension and retention, to write clear and persuasive prose, to teach effectively, and to identify and apply for grants. The course also leads students through a process by which they orient themselves to the major journals, scholarly organizations, and conferences in their respective disciplines. During the semester, each student produces a series of documents of direct, practical value: a polished academic C.V., a Harvard Scholar website, an Individual Development Plan, and a syllabus, among others.

Course Notes:  Course is only open to doctoral students in the Social Sciences and Arts and Humanities.
Requirements:  GSAS Students Only

Migrant Geographies: Between Asia and the United States in the Twentieth Century (216180)

Hardeep Dhillon

2020 Fall (4 Credits)  
Instructor Permissions: Instructor  
Schedule: T 0300 PM - 0545 PM  
Enrollment Cap: 15

This seminar uses histories between Asia and the United States to illuminate one of the most urgent issues of our time: the relationship between borders, human mobility, and society. Moving across histories of Asian migration that tie into indigenous, black, and other migrant histories, this seminar expands our understanding of what constitutes "the border," and how migrant lives were made and remade in relation to such borders. The readings for each week enunciate the forms of border making this seminar explores which include but are not limited to: deportation, documentation, public health, gender and sexuality, and borderlands.

Slavery in the Global Middle Ages (216000)

Daniel Smail

2020 Fall (4 Credits)  
Instructor Permissions: Instructor  
Schedule: W 0300 PM - 0545 PM  
Enrollment Cap: 15

Slavery was a ubiquitous phenomenon in Europe, Africa, and Asia in the centuries between the fall of Rome and the rise of the Atlantic slave system. Using a mixture of primary and secondary readings, this course offers students a survey of the medieval forms of slavery in Europe, North Africa, the Middle East, and the Indian Ocean, with additional comparative readings where relevant. A major focus will be the distinctly gendered forms of slavery that emerged in Christian and Muslim lands in the Mediterranean between 1200 and 1500. Assessments will include participation, several short papers, and a capstone project.

History 12G Section: 01
Atlantic Slave Wars (216003)

Vincent Brown

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  15

This course explores how the violence of imperial expansion and transatlantic enslavement remade the history of Europe, Africa, and the Americas. European imperial conflicts extended the dominion of capitalist agriculture. African battles fed captives to the transatlantic trade in slaves. Masters and their subalterns struggled with one another continuously. These clashes amounted to a borderless *slave war*: war to enslave, war to expand slavery, and war against slaves, precipitating wars waged by the enslaved against slaveholders, but also between slaves themselves. Examining how conflicts in one part of the world travel and take root in another will enhance our understanding of the relationship between European, African, and American history.

How Empires Fall: Case Studies and Theoretical Approaches from the Bronze Age to Today (216181)

Henry Gruber

2021 Spring (4 Credits)  Schedule:  W 0300 PM - 0545 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

What happens when empires fall? In this course, we will examine three historical imperial collapses from the deep past: the Bronze Age Collapse, the fall of Rome, and the end of Aztec Empire. We examine these events from a material and archaeological perspective, supplemented with primary source readings in translation, analyzing the varying impacts of internal dissention, external military conflict, climate change, and pandemic disease. Then we will turn to the present and examine decolonization and its legacies, as well as questions of contemporary empire. The course is writing focused, and assignments build to a final research paper.

History 12I Section: 01

Statelessness (216194)

Kalyani Ramnath

2020 Fall (4 Credits)  Schedule:  R 0300 PM - 0500 PM
Instances of statelessness and refugeedom dominate headlines today. But what does "statelessness" mean? Rather than solely focusing on contemporary legal interpretations of statelessness, this course emphasizes twentieth century global, regional, and national histories within which statelessness emerged as a political and legal category. Engaging judgments, treaties, videos, and images, students explore postwar displacement, decolonization, postwar reconstruction and Cold War tensions. The course also dwells on the limits of refugee regimes: including the partition of India, forced repatriations in Sri Lanka, and asylum-seeking in Hong Kong. A final module discusses ethical and political issues at stake in writing histories of statelessness, and discusses potential archives, including the use of oral histories.

Course Notes: The first meeting for the course will be Thursday, September 4th. The final meeting day and time may be adjusted depending on enrollment after the course registration deadline on Wednesday, September 9th.

Reformers and Revolutionaries in the Arab World (216747)

Rosie Bsheer

2020 Fall (4 Credits) Schedule: T 0900 AM - 1100 AM

Instructor Permissions: Instructor Enrollment Cap: 12

What constitutes social movements and how do they challenge structures of social, cultural, and political domination? In what ways have social movements and popular mobilizations shaped everyday life and modern state forms in the twentieth century Arab world? This synchronous online course will address these questions by examining the local, regional, national, and international contexts within which social movements have operated in the Arab world from the late Ottoman to the contemporary era. We will study popular politics through the prism of intellectual and social history, political and anthropological theories, gender, and film, drawing on works on Algeria, Bahrain, Egypt, Iraq, Lebanon, Oman, Palestine, Saudi Arabia, and Syria.

Arabs, Jews, and "Arab Jews" in the Modern Middle East (216117)
What has it meant to be an Arab, a Jew, or an "Arab Jew" in the modern Middle East? We will historicize these identities by tracing their shifting meanings in the late 19th and 20th-century Arabic-speaking world, from Morocco to Iraq to Yemen. We'll examine everyday relationships and political encounters between Jews and Arabs in the context of the Ottoman Empire, British and French colonialism, Zionism and Arab nationalism, anti-Semitism and Islamophobia, and the ongoing Israeli-Palestinian conflict. Students will be assigned fiction literature, primary documents, podcasts, theoretical texts, visual sources, and films.

Power and Protest: U.S. Social Movements in the 1960s and 1970s (216116)

Lisa McGirr

The 1960s and 1970s witnessed dynamic movements of collective action in the United States and the world. This research seminar charts the key events, actors, ideas and strategies of these movements—from civil rights and black power to women's rights and the conservative movement—and situates them within the central economic, social, and geopolitical developments of the post-World War II period. Students will gain an understanding of why so many different social movements emerged in this moment and explore their trajectories and successes and failures.

History  13C  Section: 01

St. Louis from Lewis and Clark to Michael Brown (159640)

Walter Johnson

St. Louis was the epicenter of American empire in the nineteenth century: the point of embarkation for
Lewis and Clark; the military headquarters for U.S. Indian wars. It was likewise central to the history of slavery: from the Missouri Compromise to Dred Scott. The city’s intertwining of the history of empire and race continued through the twentieth century in its prominent role in the defense industry as well as the history of segregation, urban “redevelopment,” and police violence. How does the global capitalist and imperialist history of St. Louis relate to its recalcitrant inequality, structural racism, and endemic violence?

Understanding Beethoven (203019)

*Peter Gordon*

*Alexander Rehding*

2021 Spring (4 Credits) Schedule: W 0900 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 15

This undergraduate seminar, co-taught by two professors, combines historical, cultural, and musicological approaches so as to develop a deepened understanding and appreciation of Beethoven’s music, assessing its intrinsic character while also placing it in German cultural, intellectual, and political history. The course does not require extensive musicological knowledge, but an understanding of basic music theory and music history will be presumed. Students will be required to attend performances by the Parker String Quartet, and there will be at least one class-trip to a performance at the Boston Symphony Orchestra. The course counts for credit in either history or music.

Course Notes: Counts for credit as one of the following: German 134, History 13K or Music 192r.

"Black Indians": History, Identity, and Theory (212655)

*Tiya Miles*

2020 Fall (4 Credits) Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This seminar will explore intersections in African American and Native American histories with an emphasis on pivotal moments in the shaping of a modern identity referred to as "Black Indian." Students in this seminar will explore and analyze historical contexts and contingencies leading to thick interactions between people of African descent and indigenous Americans as well as experiential testimony by
individuals asserting mixed race and/or bi-cultural Afro-Native identities. During our time together, students will discover not only the impact that black and native peoples have had on one another, but also the impact they (and ideas about them) have had on the development and sustainment of an American national identity.

U.S. History: Major Themes in the Twentieth Century (125517)

*Lisa McGirr*

2020 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 15

Schedule: M 0945 AM - 1145 AM

The twentieth-century United States is a vibrant and flourishing field of historical study. The goal of this seminar is to introduce students to the central questions, problems and debates in the history of the "American century." Students will learn how the literature of history has developed through reading both older and newer approaches. Readings focus on questions of politics, political culture, the state and social life. The course is both thematic and chronological (as well as necessarily selective). Students are expected to prepare well for seminar and to participate actively in discussion. Each class will begin with a brief introduction to the readings (no more than five minutes) by a member of the seminar. The idea here is for one student to take special responsibility for leading discussion, raising questions and problems posed by the reading.
History 80G Section: 01
Travelers to Byzantium (108055)
Dimiter Angelov
2021 Spring (4 Credits) Schedule: R 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 15
This seminar is based on the fascinating firsthand accounts of travelers who visited Constantinople and other areas of Byzantine world. The texts will generate questions for discussion and research on a wide range of issues, such as Byzantine civilization, cross-cultural contacts in the Middle Ages, the practice and experience of travel, and the interrelationship of travel, ethnography, and politics. Sources will be chosen from among the works of western, Islamic, Jewish, and Russian travelers.

History 82D Section: 01
French Colonial Encounters: 1870's to Present (117904)
Mary Lewis
2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15
Explores and compares three colonies in the French Empire: French West Africa, Algeria, and Indochina, considering how colonial rule was extended, how individuals responded, and what reverberations there were between colony and metropole.
Recommended Prep: No foreign languages required, however one language relevant to the regions studied (e.g. French, Arabic, Vietnamese, etc.) is helpful.

History 82F Section: 01
The Origins of the Cold War: The Yalta Conference (1945) (124495)
Serhii Plokhi
The Yalta Conference is analyzed in the context of the long-term geostrategic goals of the United States, the United Kingdom, and the USSR. Special attention is paid to psychological and cultural aspects of the negotiating process.

History Lab (109759)

Gabriel Pizzorno

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: n/a

History Lab offers History concentrators and other students a chance to spend a semester working with History faculty on faculty research projects. Outcomes will include familiarity with a range of digital tools for research and data visualization and insights on how to design and execute a major research project. Please consult the course's Canvas site for details and a list of the projects offered this term.

Class Notes: Fall 2019 Project: Tracing U.S. Immigration History from Imperialism to Globalization.

"What is Intellectual History?" (109927)

*Ann Blair*

2021 Spring (4 Credits)  
Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor  
Enrollment Cap: 15

Intellectual historians study almost every period, place, and theme in human history: from classical times to the present, from Asia to the Americas, by examining philosophy and religion, social and political thought, literature and art, and other expressions of human agency and intention that range from ancient epics to graphic novels. This section will draw examples from a wide range of moments and regions to ask how intellectual history has developed as a field, what methods it uses, and how it can be distinguished from other forms of history even as it informs debates of interest to all historians.

Course Notes: Required of all History concentrators and offered every spring semester. Typically taken in the spring term of sophomore year, but first-semester sophomores planning to concentrate in History are encouraged to take it at the first opportunity. Open to students taking a secondary field in History and to students in other concentrations (space permitting). This course may not be audited or taken Pass/Fail. It enrolls prior to shopping period through the History concentration. Please contact the ADUS in History or the admin tutor in History 97 (Matthew Sohm, msohm@g.harvard.edu), if you wish to enroll without being a regular-sequence concentrator in History, preferably by Thanksgiving.

"What is Imperial History?" (109930)

*Sugata Bose*
Though empires have recently disappeared from the map, for historians these sprawling multi-ethnic, multi-confessional states remain crucial laboratories for the study of violence, power, ideology, aesthetics, and identity. This section will introduce students to the many ways historians define empires and interpret the experiences of those who inhabited them. How does one write the history of such diverse, expansive entities? How does imperial history incorporate the perspectives of disenfranchised, enslaved, and colonized peoples? What is its scale? How does the work of historians relate to images of empire generated through public commemoration and popular memory?

Course Notes: Required of all History concentrators and offered every spring semester. Typically taken in the spring term of sophomore year, but first-semester sophomores planning to concentrate in History are encouraged to take it at the first opportunity. Open to students taking a secondary field in History and to students in other concentrations (space permitting). This course may not be audited or taken Pass/Fail. History 97H Section: 01
"What is Urban History?" (110445)

Lizabeth Cohen

2021 Spring (4 Credits) Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

The COVID-19 crisis and its economic fallout have directed new attention to the viability of cities in the United States. This seminar will explore the methods, sources, and ideas historians have employed to understand the evolution and significance of American urban environments. How central have cities been to American identity? What changes have taken place in the way cities have related to their larger metropolitan areas? How have ethnicity, race, gender, and sexuality played out in the urban experience? What impact have cities had on the health of the American environment? Questions like these will drive this seminar.

Course Notes: Required of all History concentrators and offered every spring semester. Typically taken in the spring term of sophomore year, but first-semester sophomores planning to concentrate in History are encouraged to take it at the first opportunity. Open to students taking a secondary field in History and to students in other concentrations (space permitting). This course may not be audited or taken Pass/Fail. It enrolls prior to shopping period through the History concentration. Please contact the ADUS in History or the admin tutor in History 97.
History 97I Section: 01

"What is Biography?" (110446)

Jill Lepore

2021 Spring (4 Credits) Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

Biographers write histories of lives. Their storytelling is often novelistic but their standards of evidence are those of the historian. They confront distinctive questions: What lives are worth writing? What is the relationship between the individual and society? What rules govern the relationship between biographers and their subjects? How has the art of biography changed over the centuries, and what forces have driven those changes? In this section, we'll read both notable biographies and the critical literature on biography as a genre that is often seen to be at odds with the conventions of other kinds of historical writing.

Course Notes: Required of all History concentrators and offered every spring semester. Typically taken in the spring term of sophomore year, but first-semester sophomores planning to concentrate in History are encouraged to take it at the first opportunity. Open to students taking a secondary field in History and to students in other concentrations (space permitting). This course may not be audited or taken Pass/Fail. History 97P Section: 01

"What is Indigenous History?" (215835)

Philip Deloria

2021 Spring (4 Credits) Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

While some first peoples prefer culturally specific identities over the general term "indigenous," others
embrace indigeneity as an opportunity to establish global connections, explore overlapping colonialisms, assert political identities, or seek redress through international institutions. This seminar investigates the challenges and opportunities to be found in indigenous history. Drawing from the Americas, the Pacific, the Arctic, Asia and elsewhere, we will consider settler colonialism, genocide, slavery and *survivance*, representational politics, and a range of common challenges such as language loss, climate change, and reconciliation. We’ll explore colonial archives and oral histories, political tracts and legal cases, autobiographies, protest movements, and more.

**Course Notes:** Required of all History concentrators and offered every spring semester. Typically taken in the spring term of sophomore year, but first-semester sophomores planning to concentrate in History are encouraged to take it at the first opportunity. Open to students taking a secondary field in History and to students in other concentrations (space permitting). This course may not be audited or taken Pass/Fail. The War in Vietnam (205257)

**Fredrik Logevall**

2021 Spring (4 Credits)  Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None  Enrollment Cap: n/a

The struggle for Vietnam occupies a central place in the history of the 20th century. How did it happen? Why did first France and then the United States wage large-scale war there, and why did both powers fail in their effort to subdue the revolutionary Vietnamese forces? And what is the legacy of the struggle for our world and for U.S. foreign policy today? This course examines these and related questions, with particular attention to the long period of direct American involvement. The events will be considered in their relationship to Vietnam’s history, to American politics and society, and to the concurrent Cold War.

Course Notes: This course is jointly-offered with the Kennedy School as IGA-291. The enrollment for HKS students is 10. No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

The 20th Century United States: Politics, Society, Culture (212669)

**Lisa McGirr**

2021 Spring (4 Credits)  Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None  Enrollment Cap: n/a

This course charts key developments in the history of the 20th century United States beginning with United States emergence as a leader of global capitalism. Topics include World War I, twenties culture wars, the New Deal, World War II, the Cold War, sixties social movements, neo-liberalism, and the rise of mass
incarceration. The contest over the meaning of American freedom at all levels of American society—from Congressional debates to the picket line—forms a central theme. The course includes discussion of high and low politics, political economy, and shifting patterns of culture. The course has two goals: First, to provide the foundational knowledge about past political struggles that will help students understand the roots of issues still wrestled with today; and second to introduce students to historical thinking and interpretation through the analysis of primary and secondary sources. No prerequisites are required and the course is open to all undergraduates.

Course Notes: No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

Modern Europe, 1789 to the Present (207529)

*Carla Heelan*

2021 Spring (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

This survey course explores the political, social, economic, and cultural history of Europe from the French Revolution to the present. Topics include agricultural, commercial and industrial development; demographic change and social stratification; mass migration, trade and globalization; religion and political ideology; monarchies, republics and empires; war, peace and revolution. Throughout the period that this course covers, European history became increasingly hard to separate from its global dimensions, and the syllabus reflects that.

Course Notes: No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

The Early American Republic: The United States from 1783-1873 (204982)

*Annette Gordon-Reed*

2021 Spring (4 Credits) Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a
This course will explore the creation of the United States after the conclusion of the American Revolutionary War through the presidency of Andrew Jackson. We will focus on politics, social and cultural life during this period. We will discuss, among other things, the concepts of republicanism and federalism, the French and Haitian Revolutions’ effect on politics in the 1790s, Jefferson versus Hamilton, slavery, and attitudes toward Native Americans and women. Other topics: Jefferson's election in 1800, the War of 1812, the initial conflicts over slavery, the calls for a “white man’s government” and the overall effects of Jackson's presidency.

Course Notes: Offered jointly with the Law School as Law 2060.

Native American and Indigenous Studies: An Introduction (207523)

*Philip Deloria*

2020 Fall (4 Credits)  
**Schedule:** MW 1030 AM - 1145 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a  

Though American Indian people make up 1.7% of the U.S. population, their importance outweighs the census numbers. Native American history and politics define critical issues in law, energy, land management, and government, while the culture industries inevitably confront the curious hold that indigenous people have on American culture. American conquest and colonialism invite connection and comparison across a global scale, particularly in settler states such as Canada, Australia, and Aotearoa/New Zealand. This course offers a broad introductory survey of these and other issues as it explores the development and current state of the history-based interdisciplinary field known as Native American and indigenous Studies.

Course Notes: No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

The State of Israel in Comparative Perspective (203044)

*Derek Penslar*

2020 Fall (4 Credits)  
**Schedule:** TR 1030 AM - 1145 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a
This course addresses controversies surrounding the history of Zionism and the state of Israel. Central to these controversies are questions of comparison. Is Zionism a movement for collective liberation, like national movements of stateless or colonized peoples, or a variety of western colonialism? Does Israeli statecraft operate within a normal geopolitical spectrum, or is it unusually expansionist and aggressive? This course seeks to answer such questions through a broad and deep analysis that spans the 19th and 20th centuries, pays close attention to Israel’s social and cultural history as well as high politics and military affairs, and imbeds modern Israel into multiple global contexts.

Native American Women: History and Myth (212666)

*Tiya Miles*

2021 Spring (4 Credits)  
**Schedule:** TR 0130 PM - 0245 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course explores histories of women from diverse indigenous nations within the current boundaries of the United States. We will attend closely to methods and sources employed in historical inquiry about Native women even as we track change over time in a range of contexts. We will address multiple themes that intersect in Native women’s experience: tensions between history and myth, concepts of family and intimate relationships, spiritual understandings and notions of tradition, gender roles and cross-cultural gender difference, processes of colonialism, conceptions of land and effects of land dispossession, cultural negotiation and adaptation, public representation and misrepresentation, and personal, familial, and tribal perseverance.

Japan in Asia and the World (142657)

*Andrew Gordon  
David Howell*

2021 Spring (4 Credits)  
**Schedule:** TR 1030 AM - 1145 AM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Japan is a collection of islands, but its past and present unfolds through continuous interaction with wider worlds. This course places Japan in contexts of Asian and global history. It begins with the people, institutions, and ideas of premodern Japan, from the emergence of a court-centered state 1500 years ago to a warrior-dominated society centuries later. We then examine the tumultuous process of change from the 19th century through the present and explore how people in Japan have dealt with the dilemmas of
modernity that challenge us all.

Course Notes: No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

Race, Capitalism, and the Coming of the Civil War (123124)

Walter Johnson

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

This course treats the history of the 19th-century US and the Civil War in light of the history of US imperialism, especially the War of 1812, the Mexican-American War, and the illegal invasions of Cuba and Nicaragua in the 1850s. Likewise, it relates the history of slavery in the US to the Haitian Revolution, the Louisiana Purchase, Indian removal, Atlantic cotton, land and money markets, and the hemispheric history of antislavery.

Course Notes: No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and
freshmen welcome.

Class Notes: Please refer to the History 1028 canvas site to view the lectures for the course online. Professor Johnson will be in touch to set up a separate time to meet with students who are enrolled in the course.

Byzantine Civilization (108059)

_Dimiter Angelov_

2021 Spring (4 Credits)  

Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: None  

Enrollment Cap: n/a

The Byzantine (Eastern Roman) Empire outlived the fall of Rome by a thousand years. In what ways did Byzantium preserve the institutions and politics of imperial Rome? In what ways was it a medieval civilization? How did Byzantium's professional armies, able diplomats, and brilliant intellectuals ensure its survival and renewed expansion? This course traces the story of the Byzantine Empire between c. 600 and 1453, setting it in the context of medieval and world history.

Course Notes: No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

Modern South Asia (116237)

_Sugata Bose_

2020 Fall (4 Credits)  

Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: None  

Enrollment Cap: n/a

This course provides the historical depth in which to understand modern and contemporary South Asia in broad Indian Ocean and global contexts. It explores the history, culture, and political economy of the subcontinent which provides a fascinating laboratory to study such themes as colonialism, nationalism, partition, the modern state, democracy development, religious identities, and relations between Asia and the West. Significant use of primary written sources (in English) and multi-media presentations.

Course Notes: No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and
freshmen welcome.

History 1039 Section: 01

First Empires: Power and Propaganda in the Ancient World (159593)

\textit{Gabriel Pizzorno}

2021 Spring (4 Credits)

\textbf{Instructor Permissions:} None \hspace{1cm} \textbf{Enrollment Cap:} n/a

This course traces the continuum of socio-political and cultural developments in the Near East that led, over the course of three millennia, from stateless societies to the emergence of Assyria as the first empire in history. The class focuses on the long-term history of power centralisation, and the role of ideology and propaganda in overcoming resistance to this concentration of authority. The course material covers a broad evidentiary and chronological range. We will employ textual, visual, and archaeological sources to explore the evolution of the political and cultural landscape in the Near East and the Mediterranean, from the emergence of the first city-states in the late fourth millennium BCE to the early development of Roman imperial ideology around the start of the Common Era.

History 1040 Section: 01

The Fall of the Roman Empire (121636)

\textit{Michael McCormick}

2020 Fall (4 Credits)

\textbf{Instructor Permissions:} None \hspace{1cm} \textbf{Enrollment Cap:} n/a

Uses the latest results of archaeology, written sources, environmental sciences, genetics, GIS, etc., to study the changes, violent or subtle, that transformed the Roman world to produce medieval civilization between ca. 300 and 700. Topics include Constantine’s conversion; economic recovery, collapse and climate change; the barbarians; women and power; pandemic disease; emphasizes reading of ancient sources in translation, archaeology, and the sciences of the human past.

\textbf{Course Notes:} No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

Global Africa: From Human Origins to 1860 (216170)

2021 Spring (4 Credits)  Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None  Enrollment Cap: n/a

Africa is a vast continent of peoples and histories that are central to a shared global past, present, and future. But popular perceptions marginalize Africa’s contributions to world history, often imagining it as a place without history prior to the arrival of Europeans. This course counters these perceptions, introducing students to the diversity of the continent’s peoples and their histories from human origins to the mid-nineteenth century. Students will get a fresh look at Africa's early history in a global perspective focusing on the theme of mobility—of people, goods, and ideas—that has shaped the continent's interconnectivity over time.

Reasoning from the Past: Applied History and Decision Making (213257)

*Fredrik Logevall*

2020 Fall (4 Credits)  Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor  Enrollment Cap: 5

This course provides a basis for using history as a tool for analyzing foreign, security, and scientific policy. It also calls attention to some common fallacies in reasoning from history and discusses ways to avoid them. Along the way, we will consider the evolution of the modern international system and particularly the evolving role of the United States.

Course Notes: Offered jointly with the Kennedy School as IGA 125 A/IGA 125 B. The enrollment limit for FAS students is 5.

Class Notes: *Students enrolled in this course attend two 75-minute class meetings a week. To support remote learning across time zones, students may register for one of two sections of this course. Both sections of the course meet together for one of the weekly meetings and meet in separate time blocks for the other weekly meeting. Course sections and meeting times are listed separately in my.harvard for registration.*

History 1125B Section: 01
Reasoning from the Past: Applied History and Decision Making (217402)
Fredrik Logevall
2020 Fall (4 Credits) Schedule: W 0300 PM - 0415 PM
M 1200 PM - 0115 PM
Instructor Permissions: Instructor Enrollment Cap: 5
This course provides a basis for using history as a tool for analyzing foreign, security, and scientific policy. It also calls attention to some common fallacies in reasoning from history and discusses ways to avoid them. Along the way, we will consider the evolution of the modern international system and particularly the evolving role of the United States.

Course Notes: Offered jointly with the Kennedy School as IGA 125 A/IGA 125 B. The enrollment limit for FAS students is 5.

Class Notes: Students enrolled in this course attend two 75-minute class meetings a week. To support remote learning across time zones, students may register for one of two sections of this course. Both sections of the course meet together for one of the weekly meetings and meet in separate time blocks for the other weekly meeting. Course sections and meeting times are listed separately in my.harvard for registration.

History 1144 Section: 01
The Renaissance in Florence (114065)
James Hankins
2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a
The Renaissance has been described by historians as a revival of antiquity, as a revolt against the Middle Ages, and as the beginning of the modern world. This course examines these claims in the context of a detailed examination of the society and culture of Florence, the most important Renaissance center, from the time of Dante to the time of Machiavelli.

Early Modern Europe, 1450-1789 (107973)
Tamar Herzog
2020 Fall (4 Credits) Schedule: MW 0900 AM - 1015 AM
Instructor Permissions: None Enrollment Cap: n/a
This course is an introductory survey of European Early Modern history, from the fifteenth to the late eighteenth century. Organized chronologically and thematically, it examines developments from the late Middle Ages to the Age of Revolutions, including the passage from feudalism to urban institutions, the Renaissance, European Expansion overseas, the Protestant and the Catholic Reformations, the Scientific Revolution, the Rise of Absolutism, slavery, the Enlightenment, and Revolutions. Meetings will alternate between lecture and discussion of primary sources (available in English translation).

Course Notes: No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

History 1265 Section: 01
German History: A User's Guide (110285)
German History loomed like a specter over the twentieth century. In the twenty-first century, Americans have been debating the relevance and legitimacy of comparisons between German history and our contemporary world. How useful is German history for understanding our current moment? How might our present-day concerns distort what we see in the past? This course will examine the history of Germans in Europe and elsewhere, starting with the revolutions of 1848 and ending with the separation of Austria, West Germany, and East Germany following the Second World War. Themes will be war, insurrection, and terrorism, revolution and counter-revolution, gender and sexuality, reform, violence, anti-Semitism, racial thinking and racism, and migration.

Course Notes: This course is also offered through the German Department as German 143. Credit may be earned for either German 143 or History 1265, but not both. No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

### History 1323 Section: 01

German Social Thought, Nietzsche to Habermas (126545)

Peter Gordon
A philosophical and historical survey of major debates in modern German social theory over the span of a century, from Nietzsche's anti-foundationalist critique of morality and truth to Habermas's attempt to rebuild a pragmatic-transcendentalist theory for ethical and discursive reason after the collapse of metaphysics. Readings by Nietzsche, Weber, Heidegger, Adorno, Horkheimer, and Habermas.

Course Notes: This course is equivalent to German 140. Credit may be earned for History 1323 or German 140, but not both.

History 1433 Section: 01
History of American Populisms (126293)

Brett Flehinger

This course studies the American Populist tradition that defines the common "people" as the foundation of American economic and political life and thrives on opposition between the people and "elite" interests. The class places the formal Populist movement of the late nineteenth century in broader context, from Jeffersonian tradition through the rise of anti-elitist and anti-government movements characterized by George Wallace, Sarah Palin, the Tea Parties, and the political rise of Donald Trump.

Course Notes: No prior college level History is required or assumed. Students
seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

Modern China (109621)

_Arunabh Ghosh_

2021 Spring (4 Credits)  
Schedule: TR 1200 PM - 0115 PM  
Instructor Permissions: None  
Enrollment Cap: n/a  

This lecture course will provide a survey of some of the major issues in the history of post-imperial China (1912-). Beginning with the decline of the Qing and the dramatic collapse of China's imperial system in 1911, the course shall examine how China has sought to redefine itself anew over the past one-hundred years. The revolutionary years of 1911, 1949, and 1978 will serve as our three fulcra, as we investigate how China has tussled with a variety of ‘isms’ (such as republicanism, militarism, nationalism, socialism, and state capitalism) in its pursuit of an appropriate system of governance and social organization. In so doing, we shall also explore the social, economic, cultural, and scientific changes wrought by these varied attempts at state-building.

Ian J. Miller

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

Energy in one of its myriad forms drives the movement of planets, the mechanisms of life, the spinning of turbines, and the transfer of digital information. This intensive graduate course attacks the problem of how to write the history of energy through the frame of field formation. We will look at the role of energy in the grandest events in the historiographical showcase: the industrial revolution and the advent of the Anthropocene. We will also explore the ways that industrial and caloric politics have contorted bodies, human and otherwise, in pursuit of power and profit.

Course Notes: No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

Modern Japan: Empires and Aftermaths (215991)

Andrew Gordon

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

Examines Japan in the 20th century world, first its rise and fall as an empire, then its integration into an American dominated world order. Looks at political, social, economic and cultural aspects of the Japanese experience of modernity from the late 19th century through World War II. Then turns to the "rise and fall" of Japan's world beating economy, and the great social and cultural transformations of the postwar decades. Offers historical context for contemporary issues ranging from economic crisis and inequality to tension with Asian neighbors.

Course Notes: No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and freshmen welcome.

Intro to Harvard History: Beyond the Three Lies (212928)

Zach Nowak

2021 Spring (4 Credits)  Schedule:  TR 0900 AM - 1015 AM
Instructor Permissions:  None  Enrollment Cap:  n/a

Harvard's history is a story of professors, students, courses, and research that has led to world-changing innovations. But it is also a story of student unrest, gender unease, and the exclusion of women and minorities, enslaved people, Native Americans, and working-class people. All of them made Harvard and left traces in its archives, libraries, and museums, its buildings, and even in its soil. Some Harvard stories have been told; others have been forgotten. In this class, we will uncover Harvard's past. There will be several field trips to Harvard's archives and museums and other places on campus most students will never visit. If you wish, the University Archives will preserve your final paper on Harvard history for perpetuity.

Course Notes:  This class was designed especially for first-gen students, first-years, sophomores, and those who haven't taken a college History class. HIST 1636 will change the way you see Harvard and give you research and writing skills to use for all your other courses.

History 1852 Section: 01
The Game: College Sports as History (216325)

Zach Nowak

2020 Fall (4 Credits)  Schedule:  TR 0730 PM - 0845 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

The old adage about sports—"It's only a game"—just isn't true. Athletics, especially at the collegiate level, has always been much more than just a game. College sports were responses to the grinding tedium of the colonial-era curriculum; a way to establish hierarchy among students in the nineteenth century; an important source of revenue and a powerful driver of alumni giving in the twentieth.

In this class, students will use the lenses of race, class, and gender to examine events in American sports history. College gyms, fields, stadiums, and rinks have been the scenes of both delightful distraction and the battlegrounds for all sorts of controversies. College sports, in other words, are an integral part of American cultural and social history. The course uses the lens of college sports, and Harvard College athletics, in particular, to gain insights into the "Game" and the ways athletics both was impacted by and, in turn, shaped wider currents of cultural and social change in American history.

Students will use three digital archives—the Crimson, Harvard Alumni Bulletin back issues, and scanned records on various Harvard and Radcliffe teams—to write several short, archivally-based
research papers. Students will also carry out one oral history with a past Harvard scholar-athlete; this will be deposited in the Harvard archives. There is an option to do this with a high school student as part of a Mindich Program community engagement component.

Course Notes: This class was designed especially for first-gen students, first-years, sophomores, and those who haven't taken a college History class.

Class Notes: This class has been designed with the particular challenges of remote learning in mind. See the course's Canvas site for a detailed description of how the instructor will respond to these challenges.

Narrative History: Art and Argument (207531)

*Maya Jasanoff*

2020 Fall (4 Credits)  

**Schedule:** M 0300 PM - 0545 PM

**Instructor Permissions:**  

**Enrollment Cap:** 15

Who, what, where, when, how, and why? The elements of history are the elements of a story, and the art of writing history is the art of how to tell it. This course offers an intensive workshop on the art and craft of historical narrative. Through reading (from T. B. Macaulay to Hilary Mantel) and in-class writing exercises we will develop a repertoire of techniques to address issues central to historical story-telling, such as establishing scene and character, handling evidence, and embedding argument. Open to any advanced undergraduates and graduate students interested in writing as a craft.

Racial Capitalism and the Black Radical Tradition (205076)

*Vincent Brown*

*Walter Johnson*

2020 Fall (4 Credits)  

**Schedule:** R 0300 PM - 0500 PM

**Instructor Permissions:**  

**Enrollment Cap:** 15

This course explores a history of radical responses to a world system dependent on war, empire, enslavement, and genocide. Guided by the writings of such scholars as W.E.B. Du Bois, C.L.R. James, Eric
Williams, Walter Rodney, and Cedric Robinson, among others, students will examine the history of racial capitalism through the rebellions it has inspired, considering them as crucial occasions in the making of a black radical tradition.

Course Notes: Students in the course will be required to write weekly responses, and a twenty-page final paper.

Austrian History in Literature (212656)

*Alison Frank Johnson*

*Nadine Schwakopf*

2021 Spring (4 Credits) Schedule: T 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This course uses Austrian literature to think through some of the most pressing questions of modern European (and, specifically, Austrian) history. We will read some of the greatest novels and novellas in modern German-speaking literature as learn about the Habsburg monarchy, turn-of-the-century Vienna, the First and Second World Wars, the expulsion of Austrian Jewry, and postwar mythmaking. Important themes include: women's role in society and in the family; the rise of nationalism as a social and political force and the viability of multinational empires; sex and sexuality; justice, mercy, and retribution; what Austria is and what it means to be Austrian; anti-Semitism, Zionism, and European Jewry; cultural, political,
and violent forms of social protest; the transformative power of war. Open to undergraduate and graduate students, with the permission of the instructor.

Course Notes: This course is equivalent to German 179. Credit may be earned for History 1919 or German 179, but not both.

History 1930 Section: 01

Literature and Social History: A View from Brazil (159656)

Sidney Chalhoub

2021 Spring (4 Credits) Schedule: W 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

The objective of this course is to study major authors and works of nineteenth-century Brazilian fiction. Writing fiction from a spot deemed to be in the "periphery" of the western world meant a difficult and complex engagement with European literary and intellectual traditions. The course will focus primarily on the evidence regarding changes in the politics of social dominance in the period—from slavery and paternalism to the worlds and meanings of "free" labor. Questions of class, gender and race in the general context of defining and setting new limits of citizenship rights will be emphasized.

History 1931 Section: 01

Slavery, Disease, and Race: Brazil in the Atlantic World (159657)

Sidney Chalhoub

2020 Fall (4 Credits) Schedule: W 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

Of the estimated 12.5 million people taken from Africa to be enslaved in the Americas, 4.9 million went to Brazil alone (in contrast to about 450 thousand who arrived in the United States). The black population in the country today is the second largest worldwide, inferior only to Nigeria. In this seminar we will explore slavery and emancipation in Brazil in its connections with Africa, the Caribbean, and the United States. The relation between disease (especially yellow fever epidemics), labor struggles, and the making of racial ideologies in the Atlantic world in the age of slave emancipation and in the post-emancipation period will be emphasized.
History 1937 Section: 01
Social Revolutions in Latin America (159555)

Alejandro de la Fuente

2021 Spring (4 Credits) Schedule: T 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 15

This course seeks to explain why social revolutions have taken place in Latin America and analyzes their impact on the region. The objective is for students to gain a critical understanding of the origins, development, and impact of revolutionary movements in Latin America during the twentieth century. The course examines several case studies, which may include Mexico, Cuba, Chile, Nicaragua, the Zapatista uprising in Chiapas, and the so-called "Bolivarian revolution" of Venezuela. Our goal is to identify similarities and differences among these cases.

Course Notes: This course is also offered through the African and African American Studies Department as AFRAMER 199X. Credit may be earned for either History 1937 or AFRAMER 199X, but not both.

History 1939 Section: 01
Economic History of Modern China (207525)

Arunabh Ghosh

2020 Fall (4 Credits) Schedule: M 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 15

This conference course offers a close examination of the economic history of modern China set against the background of major debates in the field of world economic history and within the field of modern Chinese history. The approximate time frame covered is from the late eighteenth century to the present. Prior coursework in Chinese history (in particular on modern China) is recommended but not necessary.
History 1947 Section: 01
The Imperial Map: Geographic Information in the Age of Empire (213281)
Kelly A. O’Neill
2020 Fall (4 Credits) Schedule: TR 0900 AM - 1015 AM
Instructor Permissions: Instructor Enrollment Cap: 15
Maps and empires have entangled histories. In this course we will examine the evolution of geographic information technology and the way imperial states and subjects used atlases, boundary surveys, town plans, and topographical maps to manage information flows and generate political and cultural capital. We will learn to speak the language of maps: particularly maps of the Russian Empire. Through units devoted to Siberia, the Black Sea, and European Russia, we will reconstruct the history of an empire through maps held right here at Harvard.

Japanese Imperialism and the East Asian Modern (124016)
Ian J. Miller
2021 Spring (4 Credits) Schedule: R 1245 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 15
Explores the role of Japanese imperialism in the making of modern East Asia. By the 1940s Japan's empire stretched from the cold northern woods of Sakhalin Island to Taiwan, Korea, China, and Southeast Asia. We use the analysis of this world-historical force to examine the tensions between modernization and imperialism across the region. Readings will take us to Manchurian museums, Shanghai jazz clubs, and Burmese battlefields.

Course Notes: No knowledge of Japanese language or history required.

Abolitionist Women and Their Worlds (216001)
Tiya Miles
2021 Spring (4 Credits) Schedule: W 1245 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 15
What was life like for women who stood at a major crossroads of history? What was required, in tumultuous times, to think and act boldly? This course focuses on women from diverse racial and regional backgrounds who labored to abolish slavery in the United States and then enlarged their political visions to include a range of progressive causes: anti-racism, desegregation, temperance, black suffrage, and women's suffrage. We will explore the texture of women's experiences in the 19th century, the conditions that gave rise to multifaceted societal change, and the ways in which that change unfolded. Finally, our course will consider how these women's stories are remembered in present-day public culture and whether knowledge of this era can play a role in the urgent societal issues of our own time.

Class Notes:

History 1955 will meet at the Schlesinger Library.

History 1973A Section: 01

Re-Wilding Harvard (216270)

Joyce Chaplin
David Moreno Mateos

2020 Fall (2 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 15

This is a year-long class on rewilding, returning a habitat to an earlier form. We will: research historical and cultural definitions of wilderness and landscape, identify what precolonialist habitats were like in New England, survey how such places have been and might be restored, and then we will rewild part of Harvard. The class is open to both graduate students and undergraduates in a broad and relevant range of disciplines and will fulfill conference course credit in the History Department. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: This course will be jointly offered with the Graduate School of Design as SCI 6375A/B.

Class Notes: In order to accommodate students, the meeting day and time for the course will be determined after the course registration deadline on Wednesday, September 9th.

The Soviet Empire, 1917-1991 (215999)
Terry Martin
2020 Fall (4 Credits) Schedule: T 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 15

This course will analyze the Soviet Union as a multi-national state and ask to what extent it functioned as an empire and how its strategies of national rule evolved from the revolution to 1991. It will also analyze Soviet foreign policy towards other Communist states in eastern Europe and in Asia and ask to what extent these were imperial. Finally, it will look at how strategies of domination over non-Russians in the USSR and abroad interacted in the collapse of European Communism.

The End of the Russian Empire (216503)

*Terry Martin*

2020 Fall (4 Credits)  
**Schedule:** R 0300 PM - 0545 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

General introduction to the history of the Russian empire from the emancipation of the serfs in 1861 through the two Russian revolutions of 1917 to the final establishment of Bolshevik rule in 1921. Primary themes will be revolutionary and reaction projects in political, economic, spiritual, artistic, national, and social life.

The Nuclear Age: An International History (216004)

*Serhii Plokhii*

2021 Spring (4 Credits)  
**Schedule:** T 0945 AM - 1145 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

This course discusses the history of nuclear weapons as a defining factor in international politics of the second half of the twentieth century. It offers a reexamination of what has become known in historiography as the first nuclear age at a time when the world is entering a new nuclear age marked by the collapse of Cold War-era arms control treaties and the renewal of the nuclear arms race. The readings discuss the impact of nuclear weapons on strategic thinking during the Cold War, failed attempts to establish international control over nuclear weapons, the birth of the non-proliferation regime, and the limited success of denuclearization since the Cold War.

Introduction to Digital History (156564)

*Gabriel Pizzorno*

2020 Fall (4 Credits)  
**Schedule:** T 1200 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15
This course trains students in a range of digital methods used for the acquisition, analysis, and visualization of data in the context of historical research. Beyond developing practical skills, students will learn how to critically evaluate the potential and limitations of new technologies, and how to integrate them into their work in a careful, theoretically informed way.

Jewish History as World History: Graduate Readings Seminar (216479)

*Derek Penslar*

2020 Fall (2 Credits)  
Schedule: W 0900 AM - 1100 AM  
Instructor Permissions: Instructor  
Enrollment Cap: 10

Although Jews have historically been dispersed throughout much of the world, until recently modern Jewish historians have worked within the framework of the nation-state. In this class we will read both older and newer works of Jewish history through a comparative, trans-national, and international lens. We will assess the strengths and weaknesses of local, national, regional, and global approaches to the study of the Jews of modern Europe, the Middle East and North Africa, and the Americas. Aside from active participation in and facilitation of weekly meetings, the course's main requirement is a 20-page historiographical essay on a subject chosen by the student and relevant to the course's purview. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Energy History: Seminar (216169)

*Ian J. Miller*

2020 Fall (4 Credits)  

**Schedule:** F 0945 AM - 1145 AM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 10

This seminar is a critical introduction to the history and historiography of energy, a field entangled with the history of fossil-fueled climate change. We will work our way back into the history of energy, using theories of energy to rethink such key issues as industrialization, labor, empire, and urbanization. In the process, we will rethink stark distinctions between socialism and capitalism; bodies and environment; nature and culture. And we will pay particular attention to the edges of the field: where are the opportunities for new work? What new questions does a focus on energy allow us to ask?

**Class Notes:** This course will meet Friday mornings beginning at 9:45am and ending at 11:45am.

Legal History Workshop: Legal Pluralism (215929)

*Tamar Herzog, Charles Donahue*

2020 Fall (4 Credits)  

**Schedule:** M 0500 PM - 0700 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 11

This workshop aims to provide students with an historical perspective on the phenomenon of legal pluralism world-wide, but with a focus on the medieval and early modern worlds, Europe and its colonies. Assignments and class discussions will feature a mix of major works in the field of legal history, introducing students to critical methodologies and historiographical debates, and
workshop presentations by leading historians currently writing on questions of legal pluralism. Further information about the topics to be covered will be available on the course website closer to the Fall semester.

Course Notes: Law students will have the choice of adding a writing credit to this two-credit workshop by completing a substantial paper. Those who choose to write a substantial paper will receive three credits (two classroom, one writing) upon successful completion of the course; those who do not complete substantial papers will receive two classroom credits. All FAS graduate students who enroll in the workshop must complete a substantial paper and will receive four credits upon successful completion of the course. The enrollment limit for FAS students is 11. This course is jointly-offered with the Law School as Law 3046.

Medieval Societies and Cultures: Proseminar (143662)

Daniel Smail

2020 Fall (4 Credits) Schedule: R 0300 PM - 0545 PM

Instructor Permissions: None Enrollment Cap: n/a

Introduction to the study of medieval history and to the literature basic to the examination field. Readings include both canonical works as well as recent studies. Though designed for specialists in medieval European history, the course welcomes all non-specialists interested in exploring large issues of comparative history and chronological depth.

Course Notes: May not ordinarily be credited as one of the research seminars required in the first-year program.

Recommended Prep: Reading knowledge of French and/or German.

Religion and Public Life in North America, 16th Century to the Present: Seminar (216178)

James Kloppenberg
Catherine Brekus
David Holland

2020 Fall (2 Credits)  Schedule: W 1230 PM - 0230 PM
Instructor Permissions: Instructor  Enrollment Cap: n/a
Examines the long historical relationship between religion and American public life. Contrary to the predictions of previous generations of scholars, religion remains a potent force in the U.S. Secularization, once imagined as the inevitable result of modernity, has not relegated religion to the realm of private life or reduced its influence in political, economic, and legal debates. The course is especially interested in tracing the role of religion in shaping conversations about religious freedom, war, democracy, social reform, capitalism, and the common good. Particular attention will be paid to change and development over time, especially in regard to two key terms of "religion" and "public." Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: This course will be jointly offered with the Harvard Divinity School as HDS 2341A.

Graduate Readings in 20th-Century African-American History: Seminar (122157)

*Evelyn Brooks Higginbotham*

2020 Fall (4 Credits)  
**Schedule:**  R 1200 PM - 0200 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 10

In this graduate seminar we will read books and articles on topics that reflect the diverse experiences and ideologies of African Americans in the twentieth century. We will discuss and analyze differing historical interpretations and methodologies. We will also explore a variety of historical writings, e.g., biography, intellectual history, race and gender studies, labor history, transnational history, etc. Students are required to write a short report on a recommended reading each week, in addition to being prepared to discuss the required reading. A historiographic paper will be due at the end of the term.

*Tamar Herzog*

2020 Fall (2 Credits)  
**Schedule:**  W 0300 PM - 0545 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

The Latin American History Seminar and Workshop is a yearlong research seminar and workshop that meets every other week to study a central question in Latin American history (in the fall) and provide opportunities for scholars to share their own work and learn about the scholarship of others in a workshop form (in the spring). In 2016-2017 we will discuss how differences were defined, negotiated, represented, and challenged in colonial Latin American, creating both inclusion and exclusion. Among differences considered would be distinctions between local and metropolitan; citizens and foreigners; narratives of origin and ancestry based on racial, ethnic, or religious criteria; and gender distinctions. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

History 2637  Section: 01

Preparing for the Field: An Introduction to Sources and Methods in Studying PRC History: Seminar (216814)

Arunabh Ghosh

2020 Fall (4 Credits)  Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor  Enrollment Cap: 20

This shared online graduate course aims to prepare students in North American universities for historical research on the People’s Republic of China. In its incarnation (its fourth), it is jointly hosted by Arunabh Ghosh, Harvard University, and Jacob Eyferth, University of Chicago. It is open to Harvard and Chicago graduate students and qualified students from other institutions. The rationale for co-teaching this course is that PRC history is emerging as a separate field, but that most institutions don’t have enough PhD students in this subfield to justify a dedicated PRC research seminar. In origin, this is an archive course with a focus on how to gain access to PRC archives, locate materials, read handwritten texts, and interpret official documents. Since Chinese government restrictions (not to mention the coronavirus) have imposed limits on archival research, we will also discuss non-archival research methods, including oral history, the use of published and "semi-published" materials, digital research, archival research outside the PRC, and work with "garbage materials" (垃圾资料) acquired from private vendors.

History of Global Capitalism: Seminar (212679)

Sven Beckert  Sophus Reinert

2020 Fall (2 Credits)  Schedule:  M 0345 PM - 0545 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

The history of capitalism is one of the most important topics in the study of the past, as the expansion of capitalism has revolutionized almost all aspects of human life in almost all areas of the world during the past 500 years. The seminar will introduce students to a lively debate among social scientists on what this capitalist revolution has been about and how best to explain it. We will read canonical texts in the field, debate current research and guide student research in the field. We will study capitalism from a global and historical perspective. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Reading and Research (112981)

David Shumway Jones

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

Instructors listed above under History 3010 supervise individual work in preparation for the General
Examination for the PhD degree.

Course Notes: Limited to candidates for the PhD who are in residence, who have been for a year in residence, and who are in good standing in the Graduate School. May ordinarily be taken only in preparation for a field (or fields) to be examined on the General Examination. May not be counted toward the AM degree except by permission of the Department.

God Save the Queen! Ruling Women from Rome to the Renaissance (127654)

Sean Gilsdorf

2021 Spring (4 Credits)  Schedule:  MW 0130 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

This seminar will explore female rulership in Europe from the late Roman empire to the age of Elizabeth I. Discussion of varied texts and images (most of them primary sources in translation) will reveal the role of queens within their societies, their relationship to broader social and cultural institutions such as the Christian Church, and the ways in which queens were celebrated, criticized, and imagined by writers and artists of their time.

Class Notes:  Seminars meet for two hours of synchronous class discussion each week.
To register, complete History & Literature's application to enroll.
This seminar is designed for first-years and sophomores, who are especially encouraged to apply.

History & Literature  90DB
Museums in America (205588)

Reed Gochberg

2020 Fall (4 Credits)  Schedule:  M 1200 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

In this seminar, we will consider the literary and cultural history of American museums from the eighteenth century to the present. How have museums prompted broader discussions about taste, expertise, and authority? How can we understand the legacies of historical collecting practices for contemporary institutions? And how have recent debates about decolonization, repatriation, and accessibility informed new ideas about what role museums can play in American culture? Throughout the semester, we will examine a range of sources, from fiction, museum catalogues, and periodicals to paintings, artifacts, and installations; we will also research objects in Harvard's museum collections and develop a collaborative digital exhibit.

Class Notes:  Seminars meet for two hours of synchronous class discussion each week.
To register, complete History & Literature's application to enroll by
August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

### History & Literature 90DR

**American Speeches (212821)**

*Drew Faust*

2020 Fall (4 Credits)  
**Schedule:** M 0300 PM - 0500 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

This course will explore speeches across the sweep of American history, examining them both as windows into their own era and as texts created to inform and persuade. We will ask who speaks and how and the ways that has evolved over time, and we will seek to identify the enduring and changing elements of effective oratory from Jonathan Edwards to Frederick Douglass to contemporary commencement addresses and campaign speeches. Assignments include the composition and delivery of a speech.

**Class Notes:**  
Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.

If the number of applications exceed the capacity, preference will be given to History & Literature and History concentrators, and to seniors, juniors, then sophomores.

**Red Scares (212825)**

*Steven Biel*  
*Lauren Kaminsky*

2021 Spring (4 Credits)  
**Schedule:** MW 0300 PM - 0415 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 10

When, in his 2019 State of the Union address, President Trump said, "We are born free, and we will stay
free. Tonight, we renew our resolve that America will never be a socialist country," he invoked American rhetoric that is at least one hundred years old. The first so-called Red Scare, precipitated by World War I and the Bolshevik Revolution in Russia, produced the Espionage Act, which was recently used to charge former CIA analyst Edward Snowden in the leak of classified documents related to the NSA’s surveillance program. In the second Red Scare that followed World War II, the House Un-American Activities Committee (HUAC), Senator Joseph McCarthy, the FBI, and others conducted widespread investigations of suspected communists and purged “subversives” from all levels of government, the entertainment industry, public and private schools, colleges and universities. Beginning with early 20th-century fears that revolutionary socialism could spread from Russia around the world, this course explores anxieties about subversion and perversion in American politics and culture at the dawn of the Cold War. Readings will include texts by Emma Goldman, Sacco and Vanzetti, John Dos Passos, Langston Hughes, Elia Kazan, Richard Wright, Lillian Hellman, E. L. Doctorow, and Tony Kushner, as well as films such as The Manchurian Candidate, Pickup on South Street, Invasion of the Body Snatchers, My Son John, and On the Waterfront. Assignments will include research involving Harvard archives and FBI files.

Class Notes: Seminars meet for two hours of synchronous class discussion each week.
To register, complete History & Literature’s application to enroll.
This seminar is designed for first-years and sophomores, who are especially encouraged to apply.

Race and American Empire (213373)

Ernest Mitchell

2020 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 10

Schedule: R 0300 PM - 0545 PM

This course examines the early 20th century expansion of U.S. military influence in the Atlantic and Pacific, and how this expansion shaped and was shaped by theories of race. Beginning with the Spanish-American War (1898), we will follow a series of U.S. interventions in the Atlantic (Cuba, Dominican Republic, Haiti, Honduras, Mexico, Nicaragua, Panama, Puerto Rico, Venezuela) and Pacific (Guam, Hawaii, Philippines). We will also explore the tensions between imperialism and white supremacy, as theorized by Madison Grant and Lothrop Stoddard. Special attention will be paid to black intellectuals (W.E.B. Du Bois, Anna Julia Cooper, Katherine Dunham, Jessie Fauset, Amy Jacques Garvey, Langston Hughes, Zora Neale Hurston, James Weldon Johnson, Eric Walrond, Ida B. Wells) who both aided and contested U.S. imperial designs. Through photographs, architecture, film, novels, ethnographies, memoirs, speeches, and cartoons, we will study debates about the international role of the U.S. through World War II.

Class Notes:

Seminars meet for two hours of synchronous class discussion each week.
To register, complete History & Literature’s application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.
This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

Too Soon? Comedy in Europe's Tragic Twentieth Century (213374)

*Kathryn Brackney*

2021 Spring (4 Credits)  
**Schedule:**  
R 1200 PM - 0245 PM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
10

In the first half the twentieth century, Europe was the site of two wars that depleted the world's population, dislocated millions, and stripped once diverse regions of the continent of their minority populations. Even as Europe started to rebuild itself in the 1950s, progress occurred under the shadow of two hegemonic superpowers in possession of weapons capable of incinerating not just both sides of the Iron Curtain but the entire planet. What cultural role has comedy played in coming to terms with all of this tragedy? In a 1966 profile of Bertolt Brecht for *The New Yorker*, Hannah Arendt wrote of "the terrible freshness of the post-war world"—in which all that poets could do in the rubble was laugh at the sky that remained. As Europe destroyed and reinvented itself through the twentieth century, how did humor serve as a tool for working through the past and its relation to the present? This course will draw on sources in various media to examine how comedy can be a means of not just coping with history but understanding it. We will consider humor as a tool of political critique, historical analysis, and mourning and pay particular attention to the boundaries and historicity of taste. Assigned readings and films include works by Terry Eagleton, Sigmund Freud, Hannah Arendt, Karel Čapek, Ernst Lubitsch, Jean-Luc Godard, Milos Forman, Leander Haußmann, and Yasemin Şamdereli.

**Class Notes:**  
Seminars meet for two hours of synchronous class discussion each week.

A Cultural History of the Internet (216225)

*Briana Smith*

2020 Fall (4 Credits)  
**Schedule:**  
R 0300 PM - 0545 PM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
10

This course introduces students to the hippies, hobbyists, hackers, cyberspace explorers, and Second
Lifers who embraced digital networks as a means to transcend geographic limitations and connect humans in virtual communities online since the late 1960s. We will also examine how corporate and government entities responded to the digital utopian ethos of egalitarianism, communalism, and anarchy. We will explore this history against the backdrop of the late Cold War, the Reagan era, neoliberalism and globalization, Y2K, 9/11, the 2008 global financial crisis, and 2020, and through the lens of race, gender, class, and subculture. Film, music, art, archived websites, memoirs, manifestos, fiction, and non-fiction will shed light on the ways popular culture shaped and was shaped by the rise of networked computing. While course materials are primarily rooted in the United States, we will consider both transnational connections as well as attempts to forge supranational networks in cyberspace.

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's [application to enroll](application) by August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

Music and Resistance in the Modern United States (216241)

*Lucy Caplan*

2020 Fall (4 Credits) Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: 10

While music is often touted as a "universal language" that generates social harmony, it also expresses dissent from and resistance to the status quo. This course asks how music works as a type of social and political resistance, and what aesthetic and formal qualities enable it to do so. We will explore the relationship between music and resistance in the twentieth- and twenty-first-century United States, in contexts that range from Ma Rainey's defiant blues songs to Lin-Manuel Miranda's blockbuster musical Hamilton. Focusing especially (but not exclusively) on African American music and musicians, we will consider how music informs modes of resistance tied to race, class, gender, and sexuality. In addition to asking how music can resist extant arrangements of power, we will also consider the types of futures that music can imagine. By examining an array of historical sources, theoretical texts, and sonic archives, students will develop the ability to analyze music from a critical and interdisciplinary perspective. There will also be opportunities for hands-on and creative projects.

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's [application to enroll](application) by August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.
History & Literature   90EE

Fighting the Climate Crisis (216227)

Patrick Whitmarsh

2020 Fall (4 Credits)  Schedule:  MW 0130 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

Humanity currently faces a rapidly worsening environmental situation in light of the global climate crisis: rising seas and ocean acidification, deforestation and ecosystem collapse, and species extinction at alarming rates. Behind these worrying developments, however, lies a human history of imperialism, industrialization, and globalization that remains inextricable from the so-called natural world. Recent efforts in climate justice, such as Extinction Rebellion and the Green New Deal, have sought to counter this history by imagining new visions for sustainable societies. In this course, students will explore the ways that storytelling and history intersect with the discourse on the global climate crisis, as well as the social responsibilities of artists, businesses, and citizens in effecting climate justice. The course is divided into three units: the first covers early environmental movements from 1945 to 1970, leading to the establishment of the first Earth Day; the second covers 1971 to 2001, from the 1970s oil crises to the terror attacks of September 11th, 2001; and the final unit looks at the period from 2002 to the present, tracing the increasing politicization of climate change and culminating with the United States' withdrawal from the Paris Climate Agreement. Throughout these units, we will study materials from environmental history, politics, and fiction by writers such as Ursula K. Le Guin, Octavia Butler, and Ted Chiang. While exploring these cultural and literary documents, students will reflect on historical outcomes and unrealized possibilities, as well as the delicate connections between past, present, and future—how what we do today affects what happens tomorrow.

Class Notes:  Seminars meet for two hours of synchronous class discussion each week.
To register, complete History & Literature’s application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.
This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

White Rage: Progress and Backlash in American History (216228)

Andrew Pope

2020 Fall (4 Credits)  Schedule:  W 1200 PM - 0245 PM
Instructor Permissions: Instructor  Enrollment Cap: 10

The course examines how people struggled to achieve the full-promise of freedom throughout American history. The organizing theme of the course is the cycle of progress and retrenchment, of revolutions and counter-revolutions, that has come to define American life. The course begins with enslaved people's struggles for freedom and the white planters who created a form of representative government to maintain the institution. From there, we proceed chronologically through American history to the present, exploring changing notions of community, strategies used to gain freedom, and the range of violent responses that groups seeking liberation encountered. Our readings will include a play by Suzan Lori-Parks, manifestos by white power advocates, George Schulyer's novel Black No More, literary criticism by Toni Morrison, political speeches, oral history interviews with formerly enslaved people and migrant workers, among many other historical and literary sources. While race has been an important element to every debate about political representation in American history, most debates represented overlapping interests of race, gender, class, and even sexuality. As such, we will take up each issue throughout the semester. In a presidential election cycle dominated by white rage, we will study how it has shaped American history in the past and its lasting consequences in the present.

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

History & Literature  90EG

Human Rights and Ethnic Studies (216229)

Mark Sanchez

2020 Fall (4 Credits)  Schedule: M 0300 PM - 0545 PM

Instructor Permissions: Instructor  Enrollment Cap: 10

Human rights is often considered a bulwark against authoritarianism and fascism, our "last utopia," but others have critiqued human rights as either a new form of imperialism or as an imposition of western values on the rest of the world. These debates demonstrate that human rights is both a powerful way of calling attention to matters of injustice as well as an idea that is itself the subject of critique. How did this come to be? In this class, we will track the increased attention on human rights in the latter half of the 20th century. Together we will explore how organizers, writers, and intellectuals in the tradition of what we broadly call Ethnic Studies have engaged the dilemmas of human rights while trying to work towards a more just world. We will cover how human rights became an important diplomatic tool during the Cold War, exploring the rise of institutions such as the United Nations and Human Rights Watch. However, we will also engage alternative, grassroots histories of human rights. For example, we will discuss how queer writers and writers of color offered their own emancipatory visions of rights. We will look at social movements such as the Third World Liberation Front Strikes of the late 1960s as calls for more expansive notions of rights. Overall, this class will ask us to confront how even the notion of "rights" has a history. It will ask us to consider that the idea that some have "rights" is often accompanied by others'
"rightlessness." Ultimately, this class will provide a space for us to consider the question that activists have long asked: can rights save us?

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

History & Literature  90EH

Asian American Genre Fictions (216230)

Ellen Song

2020 Fall (4 Credits)  

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: 10

There was an explosion of works by Asian American authors on the American publishing scene near the turn of the millennium, an unexpected consequence of the Immigration and Naturalization Act of 1965, which brought an influx of immigrants from Asia and dramatically altered the demographic composition of the U.S. The descendants of these post-1965 immigrants comprise a diverse group of Asian American authors, and in this course, we study the many different genres and forms of contemporary Asian American fiction. Asian American literature is often associated with certain themes (inter-generational conflict in families, fraught nature of immigrant identity, etc.), but this course instead emphasizes the formal qualities of contemporary Asian American writing alongside their domestic and global historical contexts. We will consider, for example, the spy narratives of Chang-rae Lee's Native Speaker and Viet Thanh Nguyen's The Sympathizer; the noir style of Suki Kim's The Interpreter, a murder mystery; "corporate novels" like Ling Ma's Severance; or works that question the expectations placed onto racialized authors, like Nam Le's short story "Love and Honor and Pity and Pride and Compassion and Sacrifice." What are the aesthetic characteristics of these works? What, if any, are their political investments? In asking these questions, this course seeks to understand, from our vantage point, just what about them is "Asian American" anyway?

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

History & Literature  90EI

Islam in Early America (216231)

Arianne Urus

2021 Spring (4 Credits)  Schedule:  W 0300 PM - 0545 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

Muslims first arrived on the shores of the Americas at the turn of the sixteenth century, yet their long history in the western hemisphere has been largely forgotten. For centuries Islam was the second-most widely practiced monotheistic religion in the Americas, after Catholicism; some Muslims came from Spain to escape persecution at the hands of the Inquisition for continuing to practice their religion, while others were taken captive and forcibly crammed into the hulls of ships on the West African coast and transported across the Atlantic, where, in 1522, they participated in the first uprising of enslaved men and women in the Americas on a sugar plantation on the island of Hispaniola (the site of present-day Haiti and the Dominican Republic). From the very beginning of European imperialism in the Atlantic World, Muslims were integral to the history of what scholars call "Vast Early America." Their stories are entwined with the larger threads of early American history including those of missionary work, European interimperial conflict, slavery, the genocide of Native peoples, and capitalism. This course unfolds in four units that will take us from the first early modern European encounters with Islam to the stories of Muslim agents of European conquest and Muslim resistance to enslavement in the Caribbean and US South, to how the Founding Fathers thought about Islam and the status of Muslims in the early Republic. We will work with sources ranging from Laila Lalami's 2014 novel, The Moor's Account, to Thomas Jefferson's copy of the Qur'an, as well as the autobiography of Omar Ibn Said written in Arabic from a jail cell in South Carolina and Rhiannon Gidden's new opera based on Said's story.

Class Notes:  Seminars meet for two hours of synchronous class discussion each week.
To register, complete History & Literature's application to enroll.
This seminar is designed for first-years and sophomores, who are especially encouraged to apply.

History & Literature  90EJ

Espionage: A Cultural History (216232)

Duncan White

2021 Spring (4 Credits)  Schedule:  W 1200 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

Over the course of the twentieth century the spy thriller became a central part of our culture, changing the way people imagined how the state operates in secret. Why are we attracted to stories of paranoia and conspiracy? What is the history of this genre, and how is it intertwined with the history of espionage? This course will consider the historical origins of spying, exploring how the modern intelligence agencies had their origins in the project of empire. The bulk of the course will be divided into three units. The first will consider the British spy panic of the early twentieth century, in which a wave of pseudo-realistic espionage fiction, including from Erskine Childers, Baroness Orczy and William le Queux, contributed to an
atmosphere of panic and paranoia about Germany ahead of the First World War. The second unit focuses on the central role played by espionage in the Cold War, from the Cambridge Five to COINTELPRO. We will consider how espionage worked in the conflict, while thinking about the role that spies played in the popular imagination, from the glamor of James Bond to the "insider" realism of Helen MacInnes, Graham Greene, and John Le Carré, to revisionist thrillers like Viet Than Nguyen's The Sympathizer and Lauren Wilkinson's American Spy. In the final unit we will explore how espionage changed during the War on Terror, considering how spying was set up as a weapon against terrorism in the popular imagination, from Homeland to Zero Dark Thirty. In the final week we will consider the idea of surveillance capitalism and the idea that espionage is now inextricably part of our everyday lives.

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll.

This seminar is designed for first-years and sophomores, who are especially encouraged to apply.

Midcentury America saw the explosion of a genre on the page and screen—the hardboiled crime novel and the film noir. Noir represented a foil to postwar optimism: its protagonists were cynics and loners. Filled with lurid crimes and deeds, noir suggested a dark underbelly to American society and its promises of domestic fulfillment, economic stability, and institutional support. Husbands and wives plotted each other's murders; the city streets beckoned with sin; and the police were no match for the private detective. Yet even while these stories foregrounded alienation, they also had a mass cultural appeal to American audiences. We will examine noir not only as an aesthetic—filled with brutality stylishly dressed up in beauty—but also as a political commentary on disillusionment and conformity. How did representations of the tough guy and the femme fatale reflect or shape the gender and sexual politics of the era? How were race and ethnicity imagined as criminal categories for suspicion? And how did America's anti-heroes reflect a changing conception of nationhood and citizenship in the atomic age? By looking at cultural works like film, novels, and true crime pieces next to works of sociology and psychology from the period, we will consider what audiences' fascination with violence, murder, and deceit revealed about the American identity.

In a controversial—and bestselling—recent novel, Michel de Houellebecq imagines France's government and society taken over from within by Muslim extremists who impose Sharia law. Fears of internal "colonization"—by Muslims, immigrants, Jews, Americans, and various "Others"—are nothing new in French history. Yet, by tapping into the growing influence of the anti-immigrant extreme right in French politics over the past several decades, the popularity of Houellebecq's novel raises a number of provocative questions for contemporary French—and global—society: how has a country premised on the "equality" and "fraternity" of all of its citizens continued to exclude religious, ethnic, and racial "Others"? And, perhaps more perplexingly, how did what was once a global empire—whose reach extended from the South Pacific to the Caribbean, from North and sub-Saharan Africa to Southeast Asia—become so anxious about being "colonized" within Europe itself? Most proximately, how did the violence of France's colonial wars—in Algeria and Indochina especially—and the tumult of postcolonial migration shape the fears and fantasies of national and imperial identity?

This course will address these questions by taking a longer and wider view of the (post)colonial experiences of twentieth-century France. Surveying works of history, politics, literature, anthropology, and film—from Sartre and de Beauvoir to Houellebecq and Sarkozy, Ousmane Sembène and Frantz Fanon to Azouz Begag, Linda Lė, and Alain Mabanckou—we will seek to understand how the perceived dangers of invasion drew on and departed from the ambiguities and insecurities of imperial power.

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

How do we know the histories of colonialism and empire? In this course, we will study how European expansion in the Americas fueled and was fueled by the production of records and representations of...
colonial spaces and their peoples. We will study how violence and resistance shaped alternative systems of knowledge making among Indigenous and African communities, including oral histories, wampum, featherwork, graffiti, and vodou. We will work with sources by canonical authors including Columbus, Montaigne, Mary Rowlandson, and Juana Inés de la Cruz alongside the works of anonymous or unfamiliar writers, artists, and craftspeople including Afro-Brazilian healers, Tupinambá featherworkers, and the Massachusett and Nipmuc printers who worked in Harvard Yard. Throughout our course, we will ask: what interplay of power, resistance, and chance produces an artwork, document, or memory of the past—or ensures its survival and visibility in the present? What responsibility does a historian or critic have towards the silences of the archive and what strategies might recover marginalized perspectives from the past? How can attending to these histories of the archive shape the stories we tell today?

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature’s application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

For the Fall 2020 semester all course readings are accessible through the Canvas site. Assignments are designed to take advantage of the many digital collections of sources relating to the colonial past available online. In class, we will make virtual visits to archives and collections available at Harvard.

Latin American Revolutions (216236)

James Mestaz

2020 Fall (4 Credits) Schedule: MW 0430 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 10

This course explores the origins, trajectory, and outcomes of three twentieth century Latin American revolutions: Mexican, Cuban, and Nicaraguan. Students will analyze what these three revolutions shared in common, such as the causes, which included discrimination, US imperialism, state violence, economic inequity, and political marginalization, but also consider the nuances of what made them different, and in which ways the later revolutions were inspired by the previous ones. The class will rely on primary sources, such as novels, film, photographs, music, murals, and manifestos to explore how all sectors of society helped foment changes to the physical, economic, and social landscapes in these countries. Students will investigate community grassroots mobilization tactics and what the revolution meant for marginalized groups such as indigenous, women, or queer people. Learning the difficulties of implementing profound change will help students understand how resistance and democracy meant different things to different communities, and how the definition of what is meant by a revolution evolved over time. Studying Latin American Revolutions will help students grasp the complexities of our increasingly globalized society, and reconsider the efficacy of our own political systems, freedoms, and democracy.
Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

The Reinvention of New York City (216237)

*Michael King*

2020 Fall (4 Credits)   

**Schedule:**   

MW 0300 PM - 0415 PM

**Instructor Permissions:** Instructor   

**Enrollment Cap:** 10

The recent history of New York City is one of crisis, resilience, and rebirth. From the terrorist attacks of 9/11 to the devastation of the pandemic, New Yorkers have experienced tragedy and reinvented their city in its aftermath. This is a cycle with a deeper history: in this course we will focus on how New York City reinvented itself in the Seventies and Eighties. On October 16, 1975, New York City was on the brink of bankruptcy. With nearly five hundred million dollars of debt due the next day and only thirty-four million in its bank, catastrophe seemed inevitable. Fortunately, the city was able to raise funds and avoid bankruptcy. Nevertheless, New York City was and had been a space on fire—both literally and figuratively speaking—for at least a decade prior. Landlords burned down buildings to collect insurance; Black, Latinx and LGBTQ communities fought for the right to claim space and protections. In the midst of these fires, however, many different communities seized upon cheap rent and abandoned spaces in order to use them as sites of profound community- and art-making. This course will explore the social and historical contexts under which the residents of New York City contended with precarity in order to create vibrant spaces of living. In order to understand how individuals and communities both understood and created the city around them, students will look at a wide variety of texts, including but not limited to songs, visual art, performance pieces, editorials, and oral histories. Students will be encouraged in how the New York City they know was shaped by this history and what lessons can be drawn from this period of unprecedented creativity as the city once again faces a precarious future.

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.

History & Literature 90EP

The Global History of Pests (216238)

Samuel Dolbee

2020 Fall (4 Credits) Schedule: W 0600 PM - 0845 PM

Instructor Permissions: Instructor Enrollment Cap: 10

Pests have had impacts large and small on human life, serving as sources of lethal pandemics and minor annoyance alike. But what constitutes a pest has varied greatly over time and space. This course examines these themes with a focus on the late nineteenth century and early twentieth century, an era of optimism for pest eradication and visions of environmental control more broadly. It subsequently turns to the consequences of these efforts—both life-saving and deleterious—to the present. Throughout, the course contextualizes pests as products of sedentary agriculture, empire, and capitalism. Topics include mosquitoes and revolution in Haiti, street dogs and health in Istanbul, and rats and race in Baltimore. The course also touches on the broader cultural resonance of pests, by attending to how the language of pests has come to apply to invasive species, germs, and certain humans. The sources for thinking through these questions are broad, ranging from Frantz Fanon's The Wretched of the Earth to Disney public health reels featuring The Seven Dwarfs happily spraying insecticides to Rachel Carson's Silent Spring. In sum, the course brings together environmental history, the history of medicine, and the history of science to consider how humans have created pests and pests have created humans.

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

Nuclear Imperialisms (216239)

Rebecca Hogue

2020 Fall (4 Credits) Schedule: TR 0600 PM - 0715 PM

Instructor Permissions: Instructor Enrollment Cap: 10

This course will examine nuclear narratives in global contexts as reminders and remainders of empire. Are nuclear futures only tied to whims of unpredictable world leaders, or are they already part of our daily realities? Whose stories of nuclear proliferation are told, and whose are suppressed? Drawing on government propaganda, activist writing, television, fiction, photography, poetry, and film from 1945 to the present, this course will explore the cultural and material legacies of radiation around the world. From American "atomic culture" of the 1940s and '50s to Cold War era peace movements in the Pacific Islands to
nuclear disasters like Chernobyl and Fukushima, we will assess whether nuclear cultures have changed over time by using a place-based investigation of nuclear research, uranium mining, atomic bombs, "clean" energy, and anti-nuclear resistance. Course texts will include poetry by Kathy Jetil-Kijiner and Craig Santos Perez, fiction by Ruth Ozeki and Robert Barclay, documentaries such as The Atomic Café and The Return of Navajo Boy, as well as popular film and television like Dr. Stranglove (1964), Star Trek (1967), and Godzilla (1954).

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

History & Literature  90ER

Industrialization and Inequality: from the Gilded Age to the Progressive Era (216240)

*Morgan Day Frank*

2020 Fall (4 Credits)  Schedule:  W 0300 PM - 0545 PM

Instructor Permissions:  Instructor Enrollment Cap: 10

Industrialization after the Civil War transformed American life in dramatic and horrifying ways, and it transformed "literature" as a category of cultural consumption too. Some writers, like the muckrakers, believed that their work had the capacity to shape public life. Others like Henry James conceived of their writing as art that operated according to its own rules. Still others like Ambrose Bierce grew pessimistic about literature's capacity to accomplish anything whatsoever. This course will examine American literature at the turn of the twentieth century, when robber barons enriched themselves and many Americans were plunged into deep poverty. Through readings like Edith Wharton's Custom of the Country, Mark Twain's Mysterious Stranger, and Sutton Griggs's Imperium in Imperio, we will consider the literary response to a range of historical developments, including the rise of consumer capitalism, the industrial nation's fascination with pre-industrial life, and the creation of African American secret societies. By studying the shifting meanings of the literary as the country moved from the unfettered capitalism of the Gilded Age to the regulatory apparatuses of the Progressive Era, we will ultimately seek to better understand the meaning of literature in our own fraught historical moment. Whether we should turn to literature to solve our problems, or whether literature is itself part of the problem, are questions we will pose over the course of the semester.

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll by August 21. Instructors will notify students of enrollment decisions on August 24.

This seminar is open to all undergraduates, but priority will be given to sophomores interested in concentrating in History & Literature.

Prison Abolition (216326)

Thomas Dichter

2021 Spring (4 Credits)

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

Is prison abolition a serious proposal, an aspirational ideal, a trendy slogan, or a blueprint for social transformation? This interdisciplinary and community-engaged course situates the prison abolition movement in deep historical context and explores its current relation to the politics of criminal justice reform. We will study the movement's connections to slavery abolitionism, anti-lynching activism, Indigenous struggles for sovereignty, and the Black Power movement. We will examine the emergence of the modern prison abolitionist movement in the 1970s, as well as more recent developments concerning immigration detention, Black Lives Matter, and COVID-19. Our readings will include interdisciplinary scholarship on the carceral state in addition to protest writings and activist materials. A major component of the course will be collaborative activities and service with community organizations focused on incarceration and the criminal legal system, through which we will consider what prison abolitionist ideas might look like in action. There will be opportunities for dialogue with scholars and activists as we investigate prison abolition not as a singular policy, but as a rich and challenging set of questions for rethinking matters of violence, inequality, and social change.

Class Notes: Seminars meet for two hours of synchronous class discussion each week.

To register, complete History & Literature's application to enroll.

This seminar is designed for first-years and sophomores, who are especially encouraged to apply.

Introduction to Japanese Art (118347)

*Melissa M. McCormick*

2020 Fall (4 Credits)  

**Schedule:** TR 0430 PM - 0545 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 24

This course surveys artistic production in Japan from the prehistoric period to the twenty-first century. The goal is not to define the national or “Eastern” character of Japanese art, but to interrogate manifestations of human creativity produced in the archipelago on their own terms. Students learn to analyze key examples of painting, prints, sculpture, and architecture, while also exploring calligraphy, garden design, ceramics, performance art, and fashion. Essential themes include the relationship between art and sociopolitical development, the complexities of Sino-Japanese cultural exchange, and the integration of art into the practice and conceptualization of religion and philosophy, as well as the performance of gender, race, and class.

**Class Notes:**  
The two weekly synchronous meetings will consist of short lectures, interactive exercises focused on visual analysis, discussions of the readings and lecture content, and student-led short presentations. There are no prerequisites for this course; all are welcome.

Enrollment is limited to 24. To register please complete the questionnaire by August 21. Instructors will notify students of enrollment status on August 24.
History of Art & Architecture  45M

Medieval Media (215760)

Jeffrey Hamburger

2020 Fall (4 Credits)  

Schedule:  TR 0130 PM - 0245 PM

Instructor Permissions:  None  
Enrollment Cap:  n/a

From the invention of the icon and the book in late Antiquity to printing and panel painting in the 15th century, the Middle Ages harnessed new visual media to revolutionary effect. The course examines space (architecture), light (stained glass), body (sculpture/relic), figure (fresco, tempera, oil), word (roll/codex), abstraction (diagram), mass media (printing).

Course Notes:  This is an introductory seminar without prerequisites intended exclusively for undergraduates. Students will meet twice a week with one session acting as a lecture and the other as a discussion of that week’s topic.

History of Art & Architecture  56G

Spanish Golden Age Painting: Truth and Deceit (205401)

Felipe Pereda

2020 Fall (4 Credits)  

Schedule:  TR 1030 AM - 1145 AM

Instructor Permissions:  None  
Enrollment Cap:  n/a

The art of the Spanish Golden Age is well known for its radical naturalism, on the one hand, and its intense religious imagery, on the other. This course will be an introduction to the major artists of this period – Murillo, Velázquez, Zurbarán and others— from the point of view of painting’s power to produce visual illusions and deceive their spectators. Consequently, the course will consider artistic tropes of illusion and disillusionment in relation to early modern debates on belief and skepticism.
Should the U.S. government or any government have an official style, and if so, what style should it be? The recent presidential executive order, called "Making Federal Buildings Beautiful Again," has brought the problem of beauty and the question of style centerstage to cultural debates on architecture and the built environment. But it's not a new debate. This undergraduate lecture course examines the ways architecture has serviced the nation-state, and advanced political, economic and social ideologies. It examines how architecture has been used as a tool of political and cultural power and a technique for social governance. We will focus on the 20th and 21st Century, examining case studies from across the globe. We will explore paradigmatic examples of aesthetic fundamentalism such as the embrace of classical architecture in Nazi Germany and Stalinist Russia, and the promotion of architectural modernism by the Vargas' Dictatorship in Brazil, and Mussolini's Fascist Italy. We will look at memorialization through architecture such as the recent National Museum of African American History and Culture in Washington DC and the Ningbo History Museum in China; engage current debates on monuments and collective memory; and explore the democratizing use of contemporary architecture and urbanism in Colombia. The course looks at "the good, the bad and the ugly" examining architectural aesthetics as a form of cultural power. It focuses on pressing issues affecting our shared built environment as we confront an uncertain future. In short, we will look at why, today, Architecture continues to have meaning, and answer whether buildings need to be "beautiful" or significant.

Money is everywhere. As both an abstract construct and a material entity, money makes the world go around. Since before the invention of writing, money has been a common facet of everyday life, informing how we think and how we act. The course explores how societies across human history have made, used, and valued money in divergent ways. We will consider money as an object of aesthetic appreciation, an ethical problem, an architect of social relations, and environmental disruptor, a tool of political resistance, and much more. How has coinage design been a function of money's role as a political, religious, and cultural symbol? Is money a measure of value, and how does it align with other potential values, such as religious, moral, and aesthetic ones? Is it ethically neutral or an instrument of moral vice or virtue? What were the debates surrounding the rise of paper money beginning in the eighteenth century? How was money used as a tool of political resistance during the suffragette movement? Does money get recycled,
and what is the environmental cost of different money forms today? What are the links between art, literature, theater, cinema, and money?

History of Art & Architecture  88

China in Twelve Artworks (161270)

Eugene Wang

2021 Spring (4 Credits)  Schedule:        MW 1200 PM - 0115 PM

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

China is grasped through twelve artworks, spanning three millennia from the Bronze Age to the twentieth century. These artworks form both a timeline and a jigsaw puzzle with recurrent themes, e.g., the correlation between cosmos, body, and mind. The course consists of case studies, revealing both larger intellectual trends and the nuanced way artworks engage established formal conventions. Students learn about China through art and acquire visual literacy that takes art on its own terms.

Design Speculations: Senior Design Tutorial (207690)

Megan Panzano

2020 Fall (4 Credits)  Schedule:  R 0900 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  14

This seminar will serve as a design platform for inquiry, documentation and analysis in relation either to the thesis topic or capstone project of interest to each student. Thesis students will be responsible for selecting a Thesis Advisor (or Advisors) with whom they will meet regularly to develop specific intention, substance and methodology of the thesis research and paper. This seminar is a support of independent thesis and/or independent project research, extending methodological inquiry of the project topic to design where students may convene to collectively discuss and experiment with design speculations – design tests that explore research through the visual and spatial language of architecture. The course will cover topics general to design research with discussions, assignments, and readings focused on three main themes in relation to architectural design: Discourse, the development of a proposition for the role and significance of architecture relative to the project topic of interest; Method, the design steps/process of working through a design application/inquiry of those ideas; and Context, the relationship of the project topic of study to broader surroundings which include but are not limited to the discipline of architecture, cultural contexts, technical developments and/or typologies. The seminar will emphasize and support the translation of ideas emerging from independent research into visual forms of representation including, but not limited to, drawings, diagrams, images, study models, and short animations. The techniques of representation reviewed will be catered to the project topics of individual students, but will also form a part of the general discussion of the course.

HAA 96A Transformations or HAA 96B Connections design studios is a pre-requisite to the Design Speculations course.

Architecture assembles multiple models, surfaces, and materials; it is not a single monolithic thing, rather it is comprised of disparate parts and organizational systems operating at different scales. Design, the bringing together of these elements, requires sensitivity, registers scale, and renders perceptual effect. This course is an introductory architectural design studio focused on building foundational architectural concepts and design methodologies studied through a process of making. A series of physical modeling/fabrication assignments explore spatial and organizational transformations as a consequence of the changing interactions among material, fabrication technique, and form. Resultant expressions of space, scale, and perceptual effects are discussed and evaluated in relation to a series of course readings that frame the intentions of each assignment within architectural theory and history discourse.

Both studios in the Architecture Studies Track (Transformations HAA 96A and Connections HAA 96B) explore architectural means and methods of design. Each begins from a different scale of inquiry, but converges at a similar end. This studio originates at the scale of material - focusing on specific capacities and effects thereof as well as the details of assembly - and expands from this to an investigation of an occupiable architectural scale in relation to a dynamic site.

The course emphasizes fluency in the visual and spatial communication of ideas through instruction in 2D drawing and 3D modeling techniques. Technical workshops are provided in choreography with serial assignments encompassing drafting and 3D modeling (AutoCAD + Rhino), techniques of fabrication (Rhino to various outputs), 3D printing, and representational processing (Adobe Creative Suite). The studio exposes students to critical architectural thinking and design methods for more broad disciplinary application following. No particular skill set, technical or otherwise, is a required prerequisite for this course; students from all backgrounds are welcome.

History of Art & Architecture 96B

Architecture Studio II: Connections (110362)

The practice of architecture fundamentally asks us to continuously engage with, and re-conceptualize, the world for which we are designing. As such, architecture as a discipline is not only about designing buildings, but also about challenging us to imagine new ways of seeing the world. This studio takes on the challenge through a series of design exercises focused on understanding, engaging with, and reimagining the urban condition. Throughout the course, we will approach architectural design as both a method of producing urban environments, and also as an avenue through which to understand our cities. We will be directly confronting the social, political, and environmental contexts that are necessarily implicated in any design process.

Both studios in the Architecture Studies Track (Transformations HAA 96A and Connections HAA 96B) explore architectural means and methods of design. Each begins from a different scale of inquiry, but
converges towards a similar end. This studio originates at the scale of the urban site, and begins with a set of design research assignments that ask students to imagine the city from the perspective of a non-human agent. Extrapolating abstract principles from these agents, we will be mobilizing the possibilities of architectural representation to reimagine the city through mapping, diagraming, and collage. The studio culminates in a design proposal for a site in Harvard Square. Students will be given an architectural brief, and will produce projects that address existing site conditions, programmatic space requirements, and projected users of the site. Technical workshops will provide all the necessary skills required for the course, and will allow students to develop aptitude in architectural drawing, mapping, rendering, and simple animation. No existing expertise or technical proficiency is necessary for this course. Students from all backgrounds are welcome; we will be encouraging interdisciplinary thinking throughout the design research process.

From Byzantium to the British Isles: The Materiality of Late Antiquity (205052)

Evridiki Georganteli

2021 Spring (4 Credits) Schedule: M 0900 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 12

This course explores the extraordinary cultural transformation of Europe, the Mediterranean, and the Middle East underwent from Diocletian's reorganization of the Roman Empire in the late third century to the Islamic conquest of the Iberian Peninsula in the eighth century. Monuments and sites, sculpture, mosaics, frescoes and ceramics, icons and relics, textiles, coins, and seals chart the movement of people, commodities, and ideas along routes of warfare, pilgrimage, trade, and diplomacy. Was the world of late antiquity still bearing the hallmarks of Roman connectivity, administration, and culture? Were Ireland and Anglo-Saxon England really the edge of the known world? What was the extent of the Eastern Roman Empire's cultural power in late antique Europe, Africa, and the Middle East? How did religious changes influence urban topographies, geographies of power, and artistic choices?

History of Art & Architecture  157K

The Age of Albrecht Dürer (159977)

Joseph Koerner

2020 Fall (4 Credits)  
Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor  
Enrollment Cap: 15

Albrecht Dürer became the world's first world-famous artist largely because he invested his talent in the new medium of print. Multiplying his work a thousand fold and disseminating it (on sheets of paper) to innumerable viewers in multiple locations, print made Dürer the first beneficiary of "distance viewing" and, thus, a perfect topic for "distance learning" forced on us by the current pandemic. Looking together, creatively, at this artist's fascinating and enduring oeuvre — all available online — we will explore the wider cultural dynamics of Renaissance and Reformation that underlay the making, and the breaking, of art.

Additional Course Attributes:
History of Art & Architecture 158P

Drawing Lessons (216058)

Margaret Grasselli

2021 Spring (4 Credits)  Schedule:  F 1200 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

This course, taught from original drawings in the collection of the Harvard Art Museums, explores a broad range of topics associated with the materials, functions, preservation, collecting, exhibiting, and cataloguing of European and American drawings from the fifteenth century through the nineteenth century. Emphasis will be placed on close examination of the drawings, and discussions will include identification of media, characteristics of the execution, inscriptions, and other details that contribute to an understanding of the creation, purpose, and history of each sheet. Class members will collaborate on creating a virtual exhibition of drawings from the Harvard collections, to be presented online. Assignments involve reading, writing, and working directly from the objects. Broad knowledge of the history of European and American art is desirable but not required.

Francisco de Goya (203078)

Felipe Pereda

2021 Spring (4 Credits)  Schedule:  M 1200 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

This course is about two things. First it's an introductory course to the art of Francisco de Goya (1746-1828) at the time of the Enlightenment and early Romanticism. It will look into his formation in the institutions of the Old Regime (Travel to Rome, member of the Royal Academy, Court Artist) and explore how Goya challenged this artistic culture, exploring new ideas for the meaning of art, of its public and of the role of the artist in society. Second, the course will discuss Goya's work (from his early "caricatures," the Caprichos, to the Disasters of the War) in relation to modern debates about testimony, witnessing and trauma. The class will take place, half in the seminar-room, half at the museum's study-room looking at prints and drawings from his own work and other contemporary masters.

Harvard Square (212807)
Suzanne Blier
2020 Fall (4 Credits) Schedule: M 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 15

Harvard Square has a rich history; under its earlier name of Newtowne (founded in 1630), it was once the site of the Massachusetts capital. Much has changed. This class looks back on the many changes Harvard Square has undergone, recent challenges it has faced, and asks class members to think forward about how it might be re-envisioned. This class will combine work in local archives on issues related to history and policy, meetings with local Cambridge officials, and an array of local design and drawing assignments. Learn how Harvard fits in; Be part of the change.

Stranger than Fiction (108657)
Carrie Lambert-Beatty
2020 Fall (4 Credits) Schedule: T 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 18

Is there an art history of post-truth? False personas, invented figures, museums of unnatural history and other fictive phenomena fill the annals of contemporary art. How do decades of factually-presented fictions, and thousands of temporarily deceived viewers, relate to the cultural changes that generated "truthiness," "fake news" and "The Death of Truth"? In this course you'll learn about installation art, conceptual art, photography, performance and video, while mapping out varieties of fact-based, fictional, and parafictional art, and debating their implications for art history— and for everyday life. (Note: class can be taken for credit in either HAA or AFVS; total enrollment limited to 18.)

History of Art & Architecture 176G
Women as Photographers in Weimar Germany and in Exile (215889)
Benjamin Buchloh
2021 Spring (4 Credits) Schedule: R 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 15
An extraordinary number of women trained to become photographers in Weimar Germany (1919-1933). Their presence and practices dramatically altered the conditions of visual culture in a country that had never achieved the levels of French modernism, for example, neither in terms of its aesthetic complexity nor in terms of its contributions to nation state identity. Female photographers not only changed the almost purely patriarchal structures of official German culture, but they also contributed to a fundamentally different model of artistic identity, one that was not only subversive in terms of its gender politics, but also dismantled hierarchical orders at large, thus dramatically expanding the spectrum of collective interest and participation in processes of representation, be they reflections on the everyday lives of the urban masses, on sexual politics and the New Woman, or trans-national travel, fashion and consumption as presented in the rapidly expanding industries of the illustrated magazines. The majority of these photographers had to emigrate after 1933, either because they were Jewish or because their left wing politics were prosecuted, or because their progressive aesthetic principles and projects were no longer tolerated by the Nazi Regime.

Thus the second part of the seminar will not only trace the dis- and relocations of these figures, but also explore the impact of exile on cultural identities and practices in the second half of the twentieth century.

### History of Art & Architecture 177G

**Workshop of Revolution: From Studio to Street After 1917 (215882)**

*Maria Gough*

2020 Fall (4 Credits)  

**Schedule:**  
W 0300 PM - 0545 PM  

**Instructor Permissions:**  
Instructor  

**Enrollment Cap:**  
n/a

Recent events have reminded us of the phenomenal power of the real-time convergence of people in public space. What is the role and responsibility of the artist in such moments of far-reaching political, social, and cultural upheaval and transformation? Should artists uphold the the (modernist) principle of the autonomy of the work of art? Or should they commit to the social turn that has characterized much artistic production of the last decade or so?

To help us debate this fundamental question, this course brings to the table one of the most extraordinary historical examples we have of artists radicalizing their aesthetic practices, tactics, and strategies to meet revolutionary objectives—that of the avant-gardes that emerged in Russia in the wake of the 1917 revolutions.

Remarkable for the number of women in their ranks, the Soviet avant-gardes of the 1920s and 1930s reconceptualized what it meant to be an artist. They advanced collective practices, counter-monuments, the politicization of abstraction, and innovative modes of exhibition design. Inventing new typologies of small-form architecture, such as agitational kiosks and vehicles, they transcended their traditional domain (studio, gallery, and museum) to operate directly in the public realm of the street. They designed demonstrations, outdoor theatrical spectacles, and workers' clubs for the enlightenment, relaxation, and entertainment of ordinary people. To expand their outreach, they moved away from the production of unique objects (paintings, sculpture) to engage instead the mass-distribution forms of industrial production, photography, film, print media, and poster, book, clothing, and textile design.

What lessons, whether positive or negative, might we learn from their example?

Course readings comprise short polemical essays by artists and their contemporary apologists and critics, and key texts by art historians and theorists. All readings in English.

Open to all graduate and undergraduate students. (To facilitate their preparation, undergrads will have, in addition to the regular course meeting, a dedicated one-hour section with a TF.)

Requirements: --Weekly preparation of readings (all available on Canvas); --Attendance and participation (via Zoom) at a two-hour meeting per week (and, for undergrads, also the one-hour prep section) --One or two 10-minute class presentations on the reading; --Paper of 10-12 pages (undergrads), 15-25 pages (grad students).

Class Notes: There will be an open house event on Wednesday, August 19th, from 4-5 pm ET. Please stop by. For more information, visit our Canvas page.

History of Art & Architecture  177K

Art After State Violence: The Paris Commune & its Repression (216466)

Maria Gough

2021 Spring (4 Credits)  Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

What does art look like after the state has slaughtered its own citizens? This course examines the extraordinary story of the Paris Commune, a popular uprising in 1871 that was brutally suppressed by the French national government, resulting in the death of at least 10,000 civilians, if not many thousands more.

We begin with the situation on the ground during the Commune, dedicating sessions to such topics as: the barricade as architectural typology; the use and manipulation of photography for partisan purposes; and the activism of the painter Courbet, including his putative role in the destruction of the Vendôme Column (an imperial-era monument commemorating Napoleon’s military conquests abroad). We then turn to examine the different ways in which modern painters responded to the Commune’s repression with sessions on: Manet’s representation of state violence; the fact that Impressionist painting, seemingly so oblivious to this violence, flowered in the 1870s, almost immediately in its wake; and the complex relationship between post-Impressionist art and anarchist thought in the 1880s and 1890s.

Open to all graduate and undergraduate students. (To facilitate their preparation, undergrads will have, in addition to the regular course meeting, a dedicated one-hour section with a TF.)

How might our mainstream histories of modern art change if we more fully acknowledged the Paris Commune and its repression as a key source of inspiration and/or trauma for modern artists in the decades
that followed? What might this example of art after state violence tell us about comparable episodes in other places and historical moments?

Open to graduate students and undergraduates.

Requirements:
--preparation of weekly readings, attendance at class meetings (via Zoom), and participation in discussion (40%);
--one or two brief introductory class presentations (10%);
--one research paper (undergrads 10-12 pages; graduate students 15-25 pages), topic to be chosen in consultation with the instructor (50%).

Open to all graduate and undergraduate students. (To facilitate their preparation, undergrads will have, in addition to the regular course meeting, a dedicated one-hour section with a TF.)

History of Art & Architecture  178N

Architecture and the "Museum" (215902)

Patricio del Real

2021 Spring (4 Credits)

Schedule: M 0900 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 15

Why has architecture entered the museum? Today, art museums continue to expand their offering on "buildings," some even opening departments dedicated to architecture and design. In these privileged exhibition spaces, architecture abandons its place in the world – its practical and everyday interactions in the built environment – to enter the realm of representation. At the same time, exhibitions are part of the production of architecture, conditioning its practice and stimulating its culture. This proseminar examines architecture as a cultural object in display. It looks for the historical conditions that normalized its presentation in the museum. Our focus: architecture exhibitions in the expanded field of exhibitionary practices, from professional associations to ministries of public works, that led architecture to enter the museum. We will look at: key exhibitions; their materials; what is put on display (models, drawings and objects); archives; collecting and acquisitions policies; curatorial strategies. Our aim, however, is to go beyond well-known exhibitions and explore why architecture has become a tool for cultural authority, elite aesthetics, market consolidation, and political soft power.

This seminar studies the history of modern Japanese painting through an examination of Nihonga, a neotraditional form of painting that emerged in the late nineteenth century. Conceptualized in part by Ernest Fenollosa and Okakura Kakuzo, Nihonga selectively combined traditional Japanese formats, materials, and subject matter with European pictorialism, and would go on to become the defining pictorial mode of academic painting in Japan, exerting a strong influence across the Asian world. A major premise of the seminar is that Nihonga is as essential to a study of global artistic modernism as any other genre or movement.

Can paintings project voice? Can soundscape be pictured? The seminar explores the long-standing Chinese tradition of "sonic painting" that captures lyric voice. It seeks to go beyond the text/image paradigm by shifting the focus on the voice effect in painting. In doing so, the course develops a methodology of characterizing the art of senses and pictorial means of performing voices, such as "singing" and lamentation.

The course explores art in global context, among those traditions in Africa, Oceania, and Native America, fields shared by both art history and anthropology. How does each discipline address local perspectives on art? Readings will be drawn from historical and more recent study. Issues addressed will be: approaches to field analysis, comparative perspectives, the role of history, artists, art markets, museums. Students will gain an understanding of the global art forms under consideration, and different disciplinary approaches, as well as questions important to the understanding of visual engagement.
History of Art & Architecture 246P

The Birth of the Author: Pictorial Paratexts in the Middle Ages (215763)

Jeffrey Hamburger

2021 Spring (4 Credits)  
Schedule: R 1200 PM - 0245 PM

Instructor Permissions: Instructor  
Enrollment Cap: 15

The interaction of authority and authorship in the High Middle Ages, especially in the context of glossed books and commentaries, but also emergent vernacular literatures, with a focus on pictorial constructions of authorship and the image of the book.

History of Art & Architecture 253K

Art in a State of Siege (215904)

Joseph Koerner

2021 Spring (4 Credits)  
Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor  
Enrollment Cap: 15

What challenges and opportunities arise for artists and writers working under dire conditions—martial, political, medical, and natural states of emergency? To what extent are such exceptional conditions the rule (as Walter Benjamin proposed)? Co-taught by Stephen Greenblatt (English) and Joseph Leo Koerner (History of Art), this course considers art and literature in states of siege against the backdrop of juridical theories of such states.

Course Notes: This class is co-taught by Stephen Greenblatt and is also offered as English 227s.

History of Art & Architecture 266

Art Writing in Persianate Culture (216264)
This seminar is focused on the reading and critical study of primary written sources about art in Persian and English translation from the 15th through 17th centuries focused on Persianate culture. Secondary sources in Persian and European languages are also considered for their approaches and methods to the examination of written sources.

The written sources are arranged chronologically and span several genres including the petition (Arzadasht), the calligrapher’s treatise (Simi Nishapuri, Sultan Ali Mashhadi, and Baba Shah Isfahani), the artist’s treatise (Sadiqi Beg), the travel narrative (Ghiyath al-Din Naqqash and Abd al-Razzaq Samarqandi), the album preface (Dust Muhammad), biographies of poets (Dawlatshah Samarqandi and Sam Mirza), biographies of artists and calligraphers (Qazi Ahmad and Mustafa Ali), and the memoir (Jahangir). Study of these sources will attend as much to their form, language, genre, literary history, and authorship as to their content and value for art history.

History of Art & Architecture 274

American Racial Ground (216085)

Sarah Lewis

How are artists, and how are disciplines in the arts and humanities, responding to the hyper-visuality of racial injustices on American ground? This course explores how visual artists including Mark Bradford, Theaster Gates, Amy Sherald, Xaviera Simmons, Hank Willis Thomas, and Kehinde Wiley, and new landmarks—such as the Equal Justice Initiative’s National Memorial to Peace and Justice and the creation of Black Lives Matter Plaza—have initiated a new set of "groundwork" tactics in the Stand Your Ground Era in the United States. Stand Your Ground laws, first established in 2005 and now in over thirty-three states, define the right to self-defense, to claim the ground on which one stands if there is a perception of "reasonable threat." The law disproportionately affects black and brown lives today. These artworks prompt the question, What does it mean to not be able to "Stand Your Ground"? What are the representational tools available to show the frequent challenge to this upright position as a statement of sovereignty over one’s own life? How has the manifold meaning of the term "ground"—as both reason, fact, but also soil itself, opened up a mode of critical inquiry to address the injustices wrought at our feet? Just as the field of environment studies has begun to consider its nexus with racial inequity; this course will approach these representations of the "ground" with a critical race art history perspective. It will give students the chance to consider the "groundwork" that artists have created as both practical labor for civic society, and as a prompt for new, critical methodological inquiry in the arts and humanities at large. Enrollment is limited to graduate students and a few undergraduates by application.

Class Notes: This class will meet for a 2-hour session on Mondays between 9:45 AM and 11:45 AM.

Class Notes: American Racial Ground Application
I wish I could accept every student who wanted to enroll in this course, but it is limited to 12 students.

Please read carefully:
1. Please fill out this application and email it to TF Jessica Williams at jessicawilliams@g.harvard.edu if you have interest in taking this course by 5pm on August 21st.
2. Request Instructor Permission to enroll on my.harvard.edu by 5pm on August 23rd.
3. Accept or decline your spot.

You will receive an email from Jessica Williams about whether you've been accepted or placed on the wait list by 5pm, August 22nd. You have 24 hours to accept your spot. To accept, go to my.harvard.edu, navigate to your Crimson Cart, and click "enroll" (you may need to "validate" your Cart before doing so). To decline, send an email to jessicawilliams@g.harvard.edu. There will be a short waitlist. We will contact waitlisted students about openings on August 23rd. Students from the waitlist who are offered a spot will have 24 hours to accept.

The Graphic Method: Recording the Body in Line, Film, and Flame (215885)

*Jennifer L. Roberts*

2020 Fall (4 Credits)  
**Schedule:** R 0300 PM - 0545 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 10

Beginning in the mid-nineteenth century and coalescing in the work of French polymath Étienne-Jules Marey, scientists worked systematically to develop methods of detecting and recording the elusive, invisible motions of living bodies. Hoping to penetrate the ephemeral secrets of vitality itself, they devised instruments that allowed the body to "write" its own signatures directly, usually as waveforms or photographic traces in time. The "Graphic Method" (the term was coined by Marey) is best known within art history for its central role in the development of chronophotography and cinema in the work of Marey and Eadweard Muybridge. But it had a much wider range of applications and implications: for example, it was synonymous with the development of dynamic medical imaging (the cardiograph was Marey's invention) and sound recording (the phonograph is a graphic trace of a sound wave). By the early twentieth century, the graphic method seemed to have disturbed every existing model of time, form, and expression in the humanities and sciences. And it had a long and continuing impact on modern and contemporary art. This course is designed for graduate students and advanced undergraduates. It will begin with a close look at Marey's work, then move to a thematic format. The course readings and discussions will focus primarily on the period from 1870-1920, but student research projects may address more recent works of art and visual culture.
History of Art & Architecture 276G

Deception (110252)

Carrie Lambert-Beatty

2021 Spring (4 Credits) Schedule: R 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 15

This course will treat questions of trickery, deceit, and duplicity as characteristics of art, and attempt to theorize the aesthetics of deception. The approach will be through contemporary art, where artists have reinvented the old association between art and illusion, but students of any period or culture will be able to pursue their interests as the class treats the long history, and complicated theory, of art's association with trickery.

Course Notes: Primarily for graduate students.

Buddhist Visualization: Dunhuang Caves (215886)

Eugene Wang

2020 Fall (4 Credits) Schedule: R 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 12

The cluster of embellished caves at Dunhuang, China, is among the largest decorated Buddhist cave complexes in the world, spanning the fourth to the fourteenth century. With 492 caves decorated with murals and sculptures, Dunhuang is the largest art gallery in situ in the world. The course explores the visual programs of Dunhuang caves. The disparate textual sources on which the murals are based do not explain their convergence in the same cave. A deep logic of world-making binds them together. Using available digital reconstructions that proffer spatial experience of the Dunhuang caves, we address some key questions: how do disparate murals in each cave add up to form a program and imply a process? What process? How do these cave visualize and stage the Buddhist spacetime and mental theater of meditation?

Tutorial - Sophomore Year (115419)

Anne Harrington

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 55

Sophomore tutorial is a hands-on course that introduces students to some of the most exciting and productive questions in the history of science, technology and medicine, while developing critical reading, presentation and discussion skills. Small groups of students will tackle different aspects of a larger theme each week and share discoveries in sessions led by the faculty instructor. The course will be further enhanced by a series of supervised individual projects.
Course Notes: Required for undergraduate concentration in History and Science. Students must register for the plenary class session that meets on Mondays from 9:00-11:45am OR 12:00-2:45pm, as well as a weekly section to be arranged. The 9:00 am class will begin at 9:45 am. The 12:00pm class will begin at 12:45 pm.

History of Science 98

Tutorial - Junior Year (109660)

Rebecca Lemov

2020 Fall (4 Credits) Schedule: W 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

This one-semester junior tutorial is a research-oriented tutorial taken in small groups. Focuses on enhancing research and writing skills through the completion of a directed research paper on subject matter of the student’s interest. Must be taken during the fall semester (except for students not in residence).

2021 Spring (4 Credits)  
Schedule: TBD

Instructor Permissions: Instructor  
Enrollment Cap: 25

This one-semester junior tutorial is a research-oriented tutorial taken in small groups. Focuses on enhancing research and writing skills through the completion of a directed research paper on subject matter of the student's interest. Must be taken during the fall semester (except for students not in residence).

History of Science  99A
Tutorial - Senior Year (118977)

Nadine Weidman

2020 Fall (4 Credits)  
Schedule: F 1200 PM - 0115 PM

Instructor Permissions: Instructor  
Enrollment Cap: n/a

Faculty-led seminar and intensive work with an individual advisor, directed towards production of the senior honors thesis.

Course Notes: Students are expected to complete a thesis or submit a research paper or other approved project in order to receive course credit. This course must be taken Sat/Unsat.

Knowing the World: An Introduction to the History of Science (123398)

Hannah Marcus  
Benjamin Wilson

2020 Fall (4 Credits)  
Schedule: TBD  
Instructor Permissions: None  
Enrollment Cap: n/a

What are the origins of modern science and of the scientific method? Have the ways of knowing the world of different cultures and societies changed over time? How has scientific knowledge been related to other enterprises such as art, religion, literature, and commerce? We will ask these questions and more through a broad survey of many of the crucial moments in the development of science from the Scientific Revolution of the 17th century to the present day. Topics and figures will include Galileo, evolution, eugenics, the atomic bomb, and the human genome project.

Starstruck! The History, Culture, and Politics of American Astronomy (213529)

Sara Schechner

2021 Spring (4 Credits)  
Schedule: TBD  
Instructor Permissions: Instructor  
Enrollment Cap: 12

This hands-on course will introduce key episodes and issues in the history of American astronomy by close looking at rare early scientific instruments and tangible objects in Harvard collections. Starting with the story of Captain John Smith, Pocahontas, and a sundial, the course will move from colonial relations with Native Americans to the controversial placement of observatories on sacred mountaintops today. In between, we will discuss the roles of religion, politics, science, and culture in the promotion of astronomy in American society. Topics will include comets and extraterrestrials, observatories, westward expansion, time selling, and the role of women. Each unit will begin with anchoring objects, and students will work behind the scenes in the Collection of Historical Scientific Instruments. There will also be opportunities to make and use your own instruments to engage with early methods of production and observation.
History of Science 130
Heredity and Reproduction (156318)
Sarah Richardson
2020 Fall (4 Credits)  Schedule: TR 0900 AM - 1015 AM
Instructor Permissions: Instructor  Enrollment Cap: 10
The sciences of human heredity and reproduction from Aristotle to Margaret Atwood. Readings include classic philosophical, scientific, and literary sources. The course takes up themes of technology and control; gender, race, class, and sexuality; scientific ethics; and interactions between biology and society.

Foreign Bodies: On Health and Migration (212935)
Eram Alam
2020 Fall (4 Credits)  Schedule: R 0300 PM - 0545 PM
Instructor Permissions: Instructor  Enrollment Cap: 10
During the twentieth century, unprecedented human mobility has raised significant questions regarding migration and health. Whether coerced or voluntary, these migratory flows reverberate through individuals, communities, populations, environments, and the body politic in unexpected ways. This course will focus on the relationship between health and migration and ask the following questions: How are moving bodies named and managed? What are the political, economic, juridical, and medical implications of movement? How is risk defined and constructed in relation to migration? Readings will include case studies from around the world, supplemented with theoretical and literary texts.

Course Notes: Enrollment limited to 20.

History of Science 147V
Graphic! Visualizing Medicine from Textbooks to Comics (205361)
Soha Bayoumi
2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: Instructor  Enrollment Cap: 25
Visuals play an important role in the history and practice of medicine, from medical textbooks to medical
imaging, and from hospital signage and public health posters to comics and graphic novels. This course will examine the use of visuals in medicine, but will place particular emphasis on a new academic and creative field known as "graphic medicine"—medical comics and graphic novels. Over the course of the semester, we will ask questions about how attending to the visual allows us to think in new ways about diagnostic practices, therapeutics, medical consumerism, doctor-patient communication, and ways in which patients and caregivers narrate their personal experiences of disease. We will pay careful attention to questions of class, race and gender, and to larger ethical and political issues raised by our materials.

**History of Science 148**

*Sick and Tired of Being Sick and Tired: A History of Health Disparities in America (216802)*

_Evelynn Hammonds_

2021 Spring (4 Credits) **Schedule:** TBD

**Instructor Permissions:** Instructor **Enrollment Cap:** 10

Since the arrival of Africans from Africa to America, their health and health care has been a critical issue for the nation. From the era of slavery to the present, African Americans have been disproportionately burdened by disease and ill health. Health disparities are the "inequalities that occur in the provision of healthcare and access to healthcare across different racial, ethnic and socioeconomic groups." This course examines this issue over the long time frame from the 17th century to the present. Currently, compared to the white population, African Americans are at an overall greater risk for many serious and life threatening diseases. This course will examine how these disparities emerged over time. It will explore the strategies and practices that African Americans and other ethnic groups employed to improve their health care. It will also examine the ways that cities, states and the federal government supported or ignored the health of African Americans and other marginalized communities. We will give special attention to the impact of the COVID-19 pandemic on these communities.

*Mental Health Matters: Recurring Themes and Unfinished Business (216373)*

_Anne Harrington_

2020 Fall (4 Credits) **Schedule:** M 1200 PM - 0245 PM

**Instructor Permissions:** Instructor **Enrollment Cap:** 30

This new course offers an opportunity to explore some of the unfinished business of modern-day mental health care through an historical lens, from incarceration to health inequities to trauma to the role of drugs and biological thinking. Mental health matters! But history matters too, because understanding the forces
that have brought us to our current moment arms us with insights that allow us to do better. This course has also been built from the ground up, to take advantage of the potential of online learning. The course may be online, but it is far from "virtual" -- on the contrary, the heart of this course will be the active real-time engagement it will offer all students who enroll.

**Course Notes:** Students must register for the plenary class session that meets on Mondays from 12:00-2:45am OR 3:00-5:45pm, as well as a weekly section to be arranged.
