**Instructor Permissions:**  None  **Enrollment Cap:**  n/a

Within our solar system, Earth is distinguished as the planet with life. Life was born of planetary processes, has been sustained for some four billion years by planetary processes, and through time has emerged as a set of planetary processes that is important in its own right. In this course we will investigate the ways that Earth and life interact, focusing in particular on the biogeochemical cycles of major elements. This will provide a framework for interpreting the history of life reconstructed from fossils and phylogeny.

**Course Notes:** OEB 56 is also offered as E-PSCI 56. Students may not take both OEB 56 and E-PSCI 56 for credit.

**Recommended Prep:** EPS 21, 22, or Life Sciences 1b; or permission of instructor.

Organismic & Evolutionary Biol  57
Animal Behavior (131446)

*Bence Olveczky*  
*Naomi Pierce*

2021 Spring (4 Credits)  **Schedule:**  TR 1030 AM - 1145 AM  
**Instructor Permissions:**  None  **Enrollment Cap:**  n/a

A review of the behavior of animals under natural conditions, with emphasis on both mechanistic and evolutionary approaches. Topics include classical ethology; behavioral endocrinology; behavioral genetics; learning and memory; communication; orientation, migration and biological rhythms; optimal foraging; evolutionary stable strategies; sexual selection; parental investment and mating systems; selfishness, altruism, and reciprocity; and sociality in vertebrates and invertebrates.

**Requirements:** Anti-Requisite: Cannot be taken for credit if NEURO 57 already complete.
Organismic & Evolutionary Biol  59

Plants and Human Affairs (143445)

Charles Davis

2021 Spring (4 Credits) Schedule:  MW 0130 PM - 0245 PM

Instructor Permissions:  None Enrollment Cap:  n/a

An introduction to the uses of plants by humans. Topics include the form, structure and genetics of plants related to their use as sources of food, shelter, fiber, flavors, beverages, drugs, and medicines. Plant structure and reproduction are studied in lecture and laboratory with a particular focus on relationships between the plant's structural, chemical, or physiological attributes and the utility plant.

Recommended Prep:  OEB 10 or permission of the instructor.

Organismic & Evolutionary Biol  60

Fundamentals of Marine Biology (217833)

Aaron Hartmann

2021 Spring (4 Credits) Schedule:  TR 1200 PM - 0115 PM

Instructor Permissions:  None Enrollment Cap:  n/a

We will explore the fundamentals of marine biology, and in doing so, learn about the complex lifestyles of organisms whose home spans three quarters of our planet. We will take a process-driven approach, focusing first on the fundamentals: the interrelated processes of marine physiology, ecology, and evolution. What biological processes help organisms succeed in the marine environment? How do species traits vary throughout the different environments in the world's oceans? How do gradual and rapid changes in the ocean environment alter the "rules of life" for marine species? As we build our understanding of these fundamentals throughout the course, we will use them as lenses to view, disentangle, and understand larger patterns in the oceans. In particular, we will focus on the diversity and distributions of biological functions, patterns of biodiversity, and the growing threats to marine life. Learning will be assessed via a first-third exam, a short paper, and a final presentation and paper. Ultimately, you will come away with a new understanding of the unique challenges and incredible opportunities that arise from life in saltwater.
Supervised reading on topics not covered by regular courses. For OEB concentrators, work may be supervised by faculty in other departments, provided it is co-sponsored by an OEB faculty member. For non-concentrators, work must be directed by an OEB faculty member. Students must submit a registration request to the OEB Undergraduate Office before enrollment. Students cannot take OEB 91r and 99r simultaneously with the same director.

Organismic & Evolutionary Biol 109

Conservation Ecology and Practice (208260)

David Foster

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

The conservation of land and waters has become a major tool in determining the patterns of land use, conserving biodiversity, combating global change, and ensuring that the benefits of nature are secured for society. With a focus on the U.S., this course will examine the history and changes in conservation rationale and approach, the ecological theory and research that helps guide conservation planning and execution, and the policies, finances, and practice that enable land conservation to be a powerful agent of landscape change. Field trips will focus on case studies and discussions with practitioners engaged in New England conservation from Boston to extremely rural landscapes.
Organismic & Evolutionary Biol 112

Arthropod biology: Arachnids and myriapods, their biology and evolution (216472)

Gonzalo Giribet

2020 Fall (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a

This course aims to introduce the evolutionary history and biology of arachnids, myriapods and related groups via a combination of learning their taxonomy and anatomy as well as their role as model organisms to understand phenomena such as segmentation or appendage specification. We aim to then use the knowledge acquired to study aspects related to web evolution, sociality, parental care, use of defensive secretions, and other behaviors that have made arthropods the most successful group of terrestrial organisms.

Recommended Prep: OEB10 (for undergraduates)

Organismic & Evolutionary Biol 114

Vertebrate Viviparity (142192)

David Haig

2020 Fall (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a

Viviparity has evolved many times in vertebrate phylogeny. The course reviews the diversity of parental care in vertebrates and explores the selective forces that have favored the evolution of live-bearing. The evidence for intergenerational conflicts is considered.

Recommended Prep: Life Sciences 1b or permission of instructor.
Organismic & Evolutionary Biol  119

Deep Sea Biology (145140)

Peter Girguis

2020 Fall (4 Credits)  Schedule:  TR 1030 AM - 1145 AM

Instructor Permissions:  Instructor  Enrollment Cap:  45

The oceans contain 97% of Earth's water, and host the most disparate ecosystems on the planet. This course provides an introduction to deep ocean habitats, macrofauna and microorganisms. Emphasis is placed on the physiological adaptations of organisms to their environment, as well the role of microbes in mediating oceanic biogeochemical cycles.

Course Notes:  Lab component.

Organismic & Evolutionary Biol  125

Molecular Ecology and Evolution (144180)

Scott Edwards

2020 Fall (4 Credits)  Schedule:  TR 1200 PM - 0115 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

A survey of theory and applications of DNA technologies to the study of evolutionary, ecological and behavioral processes in natural populations. Topics to be covered will span a variety of hierarchical levels, timescales, and taxonomic groups, and will include the evolution of genes, genomes and proteins; the neutral theory of molecular evolution and molecular clocks; population genomics and phylogenetic principles of speciation and phylogeography; metagenomics of microbial communities; relatedness and behavioral ecology; molecular ecology of infectious disease; and conservation genetics.

Course Notes:  Weekly computer laboratories will introduce the use of the internet and computational software in DNA sequence alignment and phylogenetic and population genetic analysis.

Recommended Prep:  Life Sciences 1b, OEB 10, OEB 53 or MCB 52.

Organismic & Evolutionary Biol  128

From Darwin to Derrida: The Evolution of Meaning and Purpose (216473)

David Haig
The seminar will read my recent book (of the same name as the course) intended for a general educated readership. The seminar would be suitable both for science students and for non-science students who wish to learn some evolutionary biology. Natural selection is a purposeless process that has evolved purposive creatures. The key innovation in the evolution of life was the origin of a textual record of past choices of natural selection contained within genetic sequences. The information in genes comes from the environment that selects. The textual record evolves as organisms are judged by the performance of the text in environmental context.

Class Notes: This semester-long course will be offered each semester in 2020-2021. It cannot be repeated for credit.

Organismic & Evolutionary Biol 130

Biology of Fishes (140830)

George Lauder

2021 Spring (4 Credits) Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: n/a
Fishes inhabit diverse aquatic environments including deep seas, intertidal zones, coral reefs, polar waters, the vast Amazonian basin, and great East African lakes. A single fish species may occupy diverse environments through extraordinary long distance horizontal and vertical migrations. To explore this unparalleled diversity, the course emphasizes bridging traditional academic boundaries with integrative analyses of the biology underlying rapid evolutionary radiations and stasis.

Organismic & Evolutionary Biol 137

Experimental Design and Statistics for Ecology (216474)

Benton Taylor

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 30

Experimental Design and Statistics for Ecology provides a practical "how to" introduction to conducting ecological research. Students gain hands-on experience forming testable questions and hypotheses, designing experiments to test these questions, implementing experimental designs, taking and managing data, and conducting an array of statistical analyses in R statistical software.

Course Notes: This course is geared toward senior undergrads and early graduate students.

Class Notes: Instructor: Professor Benton Taylor

Recommended Prep: OEB 55

Organismic & Evolutionary Biol 141

Biogeography (145864)

Gonzalo Giribet

2021 Spring (4 Credits) Schedule: TR 0900 AM - 1015 AM
Instructor Permissions: None Enrollment Cap: n/a

Biogeography aims to explain distributions of organisms through historical and ecological factors. This course will focus on the history of biogeographic research, developments in the area of historical biogeography, and on ecological processes that affect distributions of whole clades. Topics include plate tectonics and earth history, vicariance and dispersal, areas of endemism, phylogenetic niche conservatism, latitudinal gradients in species richness, and the theory of island biogeography. Software for biogeographical analysis will be discussed and evaluated.
Recommended Prep: Two following courses: Life Sciences 1b, OEB 10, OEB 51, OEB 52, OEB 53, OEB 54, OEB 55, OEB 181, or permission of the instructor. There will also be a lab component in addition to the lecture component of the course.

Organismic & Evolutionary Biol 145

Genes and Behavior (145857)

Yun Zhang

2020 Fall (4 Credits) Schedule: MR -

Instructor Permissions: Instructor Enrollment Cap: n/a

Behavior is inheritable and regulated by genes. This lecture course explores causal links between genes and behavioral traits, aiming to provide mechanistic understanding of how gene products control and influence behavioral outputs. The course will start with discoveries of genes whose mutations contribute to neurological diseases and psychiatric disorders, followed by main research approaches used to investigate genetic basis of behavior and brain function. The class will then have in-depth lectures and discussion on genes that regulate several behavioral traits including olfaction, itch and pain, circadian rhythm, sexual behavior, sleep, learning and memory.

Class Notes: One lecture and one discussion session per week via Zoom. Meeting times will be based on the needs of students enrolled.

Recommended Prep: Life Sciences 1a or permission of the instructor

Exceptional Paleobiological Insights into Animal Evolution (215692)

Javier Ortega-Hernandez

2021 Spring (4 Credits) Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: 12

In this course we will explore the importance of soft-tissue preservation in the rock record through an overview of major exceptional fossiliferous sites around the world and throughout the Precambrian to Mid-Phanerozoic, with particular emphasis on the evolutionary history of invertebrate animals. Our aim is to produce a thorough understanding of the inherent biases of the fossil record, how exceptional deposits break with these limitations, and the contribution of exceptional paleontological data towards reconstructing the origin and early evolution of the major animal groups. In addition, the course offers an
optional week-long field trip during spring break.

Course Notes: OEB 150 is also offered as E-PSCI 150. Students may not take both OEB 150 and E-PSCI 150 for credit.

Organismic & Evolutionary Biol 155R

Biology of Insects (142688)

Naomi Pierce

2020 Fall (4 Credits)  
Schedule: WF 0130 PM - 0245 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 15

An introduction to the major groups of insects. The life history, morphology, physiology, and ecology of the main taxa are examined through a combination of lecture, lab, and field exercises. Topics include the phylogeny of terrestrial arthropods with a review of the extant orders, an analysis of abiotic and biotic factors regulating populations, including water balance, temperature, migration, parasitism, mutualism, sociality, insect/plant interactions, medical entomology, and the use of insects in biological control.

Class Notes: The lab and field exercises will be offered as part of the "remote" version of the course, but modified to accommodate students who are working in different locations.

Organismic & Evolutionary Biol 207

The Fishy Aspects of the Human Body (211177)

Stephanie Pierce

2021 Spring (4 Credits)  
Schedule: M 0300 PM - 0500 PM  
Instructor Permissions: None  
Enrollment Cap: 20

Explore how the human body evolved through an analysis of the award-winning non-fiction book, Your Inner Fish: A Journey into the 3.5 Billion-Year History of the Human Body, by evolutionary biologist Neil Shubin. We will read and discuss each chapter in turn and discover how different parts of the human body can be traced back to creatures that lived eons ago. By the end of the course students will gain a better appreciation for how all life on Earth is interrelated and how our own bodies are a result of millions of years of evolutionary history.

Course Notes: Undergraduates are particularly encouraged to consider this course. It provides a basic foundation in anatomy that would be applicable for
many concentrations and career paths, such as IB, HEB, MCB, and human and veterinary medicine.

### Organismic & Evolutionary Biol 213

**Evolutionary Convergence, Mass Extinctions, and the Shape of Life (213310)**

**Javier Ortega-Hernandez**

2020 Fall (4 Credits)

**Schedule:**

R 0945 AM - 1145 AM

**Instructor Permissions:** None

**Enrollment Cap:** n/a

Understanding the origin of major animal groups and the composition of the biosphere represents a core objective of evolutionary biology. While molecular techniques allow us to reconstruct phylogenetic relationships between living animal phyla, as well as track the developmental mechanisms behind their morphology, extant diversity offers an incomplete view of the evolution of these organisms. We will examine how processes acting through deep time affect fundamental biodiversity patterns, including topics such as the origin of animals, the rapid diversification of major clades, and the impact of extinction. Our aim is to convey a sense of how evolutionary thinking has changed over the past few decades thanks to a combination of conceptual and technical advances, and to instill a sense of the importance of the animal fossil record as a source of data with a uniquely historical component among the biological sciences.

**Recommended Prep:** At least one of the following courses, or their equivalent, are encouraged: OEB 51, OEB 53, OEB 56, OEB 181.

### Organismic & Evolutionary Biol 218

**Ecosystem Restoration (215786)**

**David Moreno Mateos**

2021 Spring (4 Credits)

**Schedule:**

F 0800 AM - 1000 AM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 10

Given the current speed of habitat and species loss caused by human development, the restoration of degraded ecosystem is one of the greatest challenges humankind is facing. For this reason, the United Nations declared 2021-2030 as the UN Decade of Ecosystem Restoration. This global effort will need from experts on ecosystem science, management and design to have a deep understanding of how ecosystems recover from human disturbance and how we can use this knowledge to increase the currently limited performance of restoration practice. This course is particularly suited for students with interests in nature conservation, the natural component of landscape architecture, or ecosystem management in a broad sense. In this course, we will create a multidirectional learning environment where we all will learn from the
others to address real world restoration cases in all kinds of habitats, from forests to marine ecosystems. Students will have a particular real case assignment where the student will dig to the deepest possible level to increase biodiversity and ecosystem functionality through an understanding of the complexity that structures ecosystems. We will have key inputs from guest lectures coming from restoration companies with many years of experience restoring ecosystems worldwide. They will help us find targeted tools to support and design ecosystems both in urban and natural environments. We will increase our understanding of what nature is for humans and the Earth system and will increase our connection to it through field trips. In the fields trip, we will explore ecosystem complexity in New England’s recovering forests (like the Harvard Forest) and discuss with mangers the keys for restoration success and failure on the ground. Evaluations will be made through a combination of assignments, essays, and discussion participation. Basic previous knowledge on ecology is required. This course will arm students with one of the most important tools to work with and for nature in the coming decades.

Course Notes: This course is jointly listed with the GSD as SCI 6481.

Organismic & Evolutionary Biol 223

Topics in Neurogenetics (145012)

Yun Zhang

2021 Spring (4 Credits) Schedule: W 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

The goal of the class is to achieve an advanced understanding of the molecular and cellular mechanisms that regulate behavior. We will discuss key findings in the field, as well as the cutting-edge techniques used in these studies. The topics include decision-making, human olfaction, memory formation, inheritance of learned behavior, and mental illnesses, etc.

Course Notes: The course is primarily planned for new graduate students, but it is also open to interested senior undergraduates who have taken OEB 57 or MCB 80 and obtained permission from the instructor.

Organismic & Evolutionary Biol 242

Population Genetics (145409)

Michael Desai
daniel Hartl

2021 Spring (4 Credits) Schedule: W 0300 PM - 0545 PM

Instructor Permissions: None Enrollment Cap: n/a
Mathematical theory, experimental data, and history of ideas in the field, including analytical methods to study genetic variation with applications to evolution, demographic history, agriculture, health and disease. Includes lectures, problem sets, and student presentations.

Recommended Prep: LS1b or permission of the instructor.

Phylogenetics and Phylogeography in the Era of Genomics (143845)

Scott Edwards

2021 Spring (4 Credits)        Schedule:          W 0300 PM - 0545 PM
Instructor Permissions:       None                  Enrollment Cap:    n/a

The course will review the recent literature on methods of analysis in phylogenomics and phylogeography, with particular attention to analysis of large-scale data sets; accommodating gene tree heterogeneity; adequacy of models at the level of DNA sequence evolution and demographic history; and estimation of critical parameters of population history, such as phylogenetic relationships, reticulate evolutionary histories, rates of gene flow and species boundaries. Beginning with introductory lectures on neutral theory and coalescent theory as background, later weekly sessions will consist of presentations led by students and by local experts, including hands-on sessions working with state-of-the-art software.

Course Notes: Participants should have an account on the FAS Research Computing Odyssey cluster prior to course beginning.

Recommended Prep: OEB 53, OEB 181, OEB 125 or equivalent, or permission of the instructor.

Additional Course Attributes:

Organismic & Evolutionary Biol 277
Topics in Symbiosis: From Intracellular Symbioses to the Human Microbiome (146387)

Colleen Cavanaugh

2021 Spring (4 Credits)        Schedule:          W 0130 PM - 0400 PM
Instructor Permissions:       Instructor              Enrollment Cap:    12

Symbiosis between microbes and eukaryotes is a globally important phenomenon that has powerful effects on the physiology, ecology, and evolution of all living organisms and is a source of biological innovation. An outstanding example is that of mitochondria and chloroplasts, eukaryotic organelles arising from bacteria that became established within primitive single-cell organisms 1-2 billion years ago. Microbial symbioses expand the potential ecological niches and metabolic capabilities of the host-symbiont combinations, playing essential roles in ecosystem processes, evolution of new species, agriculture, and human health. Symbiosis has evolutionary potential in that the partnership can result in a "new organism", charging us to think about biodiversity on a different level.

Within the last decade, it has become evident that the human microbiome, collectively the communities of microorganisms that live on and in us, is intimately connected with human health and disease. With colonization at birth and developing throughout our lives, our microbiome plays a role in human nutrition and development, immunity and protection from pathogens, and is implicated in numerous diseases including obesity, inflammatory bowel disease, and mental disorders. These discoveries have prompted exciting new research areas focused on exploring the microbiome both in health and with the goal of eventually managing and curing related diseases.

This course will provide a broader understanding of microbial symbioses ranging from intimate associations (e.g., intracellular microbes) to the human microbiome in the context of ecology and
evolution. The book I Contain Multitudes by Ed Yong will serve as backdrop for the course combined with critical review and discussion of current research. Discussions and presentations will draw heavily from the primary literature, focusing on recent discoveries in the field.

The course is open to graduate students and to interested upper-level undergraduates who have taken courses or conducted research in microbial sciences, and/or obtain permission from the instructor.

Recommended Prep: Life Sciences 1a, 1b, OEB 10 or equivalent, course(s) in microbial science, or permission of instructor.

Microbial Sciences: Chemistry, Ecology and Evolution (124109)

*Michael Gilmore*

2021 Spring (4 Credits) Schedule: F 0845 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 20

This is an interdisciplinary graduate-level and advanced undergraduate-level course in which students explore topics in molecular microbiology, microbial diversity, and microbially-mediated geochemistry in depth. This course will be taught by faculty from the Microbial Sciences Initiative. Topics include the origins of life, biogeochemical cycles, microbial diversity, and ecology. Course will limit enrollment to 20 students.

Course Notes: Also offered as Microbiology 210.

Recommended Prep: For advanced undergraduates, Life Sciences 1a and 1b are required, or permission of instructor. MCB 52 is recommended.

Subject: Life Sciences

Life Sciences  2
Evolutionary Human Physiology and Anatomy (123674)

Daniel Lieberman  
George Lauder  
Andrew Biewener  
Joanne Clark Matott  

2020 Fall (4 Credits)  
Schedule: MWF 1200 PM - 0115 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 160  

Why is the human body the way that it is? This course explores human anatomy and physiology from an integrated framework, combining functional, comparative, and evolutionary perspectives on how organisms work. Major topics, which follow a life-course framework, include embryogenesis, metabolism and energetics, growth and development, movement and locomotion, food and digestion, stress and disease, and reproduction. Also considered is the relevance of human biology to contemporary issues in human health and biology.

Course Notes: This course includes a weekly 3-hour lab. This course may not be taken Pass/Fail.

Philosophy
Subject: Philosophy

Philosophy 3
The True and the Good (111175)

Bernhard Nickel

2020 Fall (4 Credits)  Schedule: TBD
Instructor Permissions: None  Enrollment Cap: n/a

The basic outlook of value and perspective that each of us adopts as we make decisions large and small are more than mere opinion. They are commitments that are open to deeper understanding and critique. Philosophy is the pursuit of such understanding and critique, and this course will introduce you to the practice of philosophy. The course has a two-fold focus: we will look at some of the central figures and problems of the Western philosophical tradition, including Socrates, Plato, Descartes, Locke, Kant, and Mill. We'll also look at how contemporary writers have responded to this tradition, especially from a feminist and anti-racist perspective. These include Charles Mills, Helen Longino, bell hooks, and Paul Taylor. This course has no prerequisites. Students need not have taken or be enrolled in Expos before taking this course: the course will introduce you to the mechanics and practice of philosophical writing.

Course Notes: In 2020-21, the course will have a hybrid structure. Lecture materials and recordings will be made available online for asynchronous study, and students will attend live classes in small groups for one hour twice a week with the instructors. To accommodate an appropriate variety of time zones, the meeting times of the live classes will be scheduled after students express interest in enrollment.

Philosophy 6
Ancient Ethics and Modern Morality (133181)

James Doyle

2021 Spring (4 Credits)  Schedule: TR 1200 PM - 0115 PM
Instructor Permissions: None  Enrollment Cap: n/a

An historical introduction to ethics, from the Greeks to, roughly, now. We begin with the concept of virtue in Homer and trace its development through Socrates, Plato, Aristotle, the Stoics and Aquinas. In the modern period we look, in a somewhat skeptical spirit, at the rise of the 'moral' as a supposedly sui generis category of reasons, traits, obligations etc., as this is found in Hume, Kant, Mill and others.

Philosophy of Law (156186)

Emilio Mora

2021 Spring (4 Credits)  Schedule:  MW 1200 PM - 0115 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

Is there a moral obligation to obey the law? What is the relation between law and morality? How should judges interpret the constitution? Does the practice of judicial review compromise democratic values? When and in what manner may the state interfere with the conduct of its citizens? We will discuss these and other questions in this survey course on the philosophy of law. Significant attention will be devoted to questions that lie at the intersection of legal and political philosophy. The final part of the course will be determined in consultation with course participants and will be devoted to philosophical puzzles arising in the law.

Philosophy 18

Human Ethics: A Brief History (141608)

Seth Robertson

2020 Fall (4 Credits)  Schedule:  TBD

Instructor Permissions:  None  Enrollment Cap:  n/a

Does might make right? Should a person focus on achieving immortality or on living a simple, happy mortal life? Is morality simply a matter of convention? Why be moral when being immoral could provide access to more wealth, fame, and power? What is the relationship between etiquette and morality? What do people owe a society that has failed in its obligations to its people? How can we identify and resist oppression, marginalization, and injustice? Human beings all over the world have been thinking about, discussing, and debating questions like these for thousands of years. This course aims to look at this history of ethics and moral philosophy from a genuinely inclusive perspective by focusing on ethical thought both from all over the world, with special emphasis on that of members of traditionally marginalized groups and from areas of the world that typically receive much less attention in academic philosophy and ethics.

Philosophy 101
Plato (156020)
Jacob Rosen
James Doyle
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

An examination of a range of Plato's dialogues, from shorter 'Socratic' conversations to 'Platonic' expositions of ambitious metaphysical theories and 'critical' reworkings of those theories. Topics will include the personality and philosophical activity of Socrates, Socrates' identification of virtue with a kind of knowledge and his related doctrine that everyone desires the good, his encounters with Sophists and teachers of rhetoric, Platonic theorizing about knowledge as a kind of recollection, the soul as structured and as immortal, and the famous Forms.
Philosophy 109

Early Chinese Ethics (213581)

Seth Robertson

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Early (Pre-Qin era) China was a hotbed of philosophical activity: scholars developed careful and fascinating ethical views in the context of serious philosophical debates between major schools of thought. This course focuses on some of these ethical debates between Confucian, Mohist, Daoist, and Legalist philosophers in early China. We'll read both classical texts such as the Analects of Confucius, Mengzi, Xunzi, Mozi, and Zhuangzi and important contemporary scholarship on these texts. Several moral questions will be of particular importance: What is the relationship between etiquette and morality? What are the most important virtues to acquire? Should we think of morality and moral development as something natural or artificial? Are we justified in caring more about some people (our closest friends and family) than others? We will have a special focus on three important interpretive themes for the course: (1) How can understanding the particular contours of the debates each scholar is engaged in help us understand their overall views? (2) How does each philosopher's view of human psychology and epistemology constrain, guide, and support their moral theorizing? (3) How can an understanding of early Chinese ethical thought, theory, and debate help enrich contemporary discussions in ethics and moral philosophy? No previous experience or coursework in Chinese philosophy is required for this course.

The seventeenth and eighteenth centuries were among the most exciting and revolutionary periods in the history of western philosophy. Among the most prominent philosophers working in that period, Locke, Berkeley and Hume have traditionally been grouped together under the label "British Empiricists" in virtue of their rejection of innate ideas and emphasis on experience as a source of knowledge. This undergraduate level course aims to provide an overview of the development of early modern empiricism while exploring in detail a number of central issues, arguments and controversies. Optional readings will place our three central figures in the larger context of philosophical developments in the early modern era. Topics will include the theory of ideas, the nature of body, personal identity, human agency, skepticism, and naturalism.
Philosophy 125

Beyond Dualism: Descartes and His Critics (121954)

Alison Simmons

2021 Spring (4 Credits)

Schedule:  
W 0300 PM - 0415 PM  
M 0300 PM - 0545 PM

Instructor Permissions: Instructor  
Enrollment Cap: 18

We will explore Descartes’ dualism in its historical context. After examining the transformation that Descartes brought about in our conceptions of body and mind (and ourselves), we will consider some of the notorious metaphysical problems his dualism gives rise to and some 17th- and 18th-century attempts to push back against it in the figures of Princess Elizabeth of Bohemia, Henry More, Margaret Cavendish, Anne Conway, and Anton Amo.

Class Notes: Students also have to enroll in a mandatory section with the course head, Wednesdays 3:00pm-4:15pm

Philosophy 137B

Topics in Wittgenstein (216457)

Warren Goldfarb

2020 Fall (4 Credits)

Schedule:  
F 1200 PM - 0245 PM

Instructor Permissions: Instructor  
Enrollment Cap: 10

Advanced explorations of Wittgenstein’s later philosophy. Topics include: rule-following, sensations and privacy, thought and intentionality, the first person, consciousness, free will, knowledge and skepticism.

Philosophy 140

Fundamentals of Logic (111424)
**W. Hugh Woodin**

2021 Spring (4 Credits)  
**Schedule:** MW 0600 PM - 0715 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a  

Introduction to the principles of mathematical logic, from the fundamental notions (language, axioms, validity) to the fundamental results (completeness, compactness, Lowenheim-Skolem). Familiar structures from mathematics will be examined through the lens of formal logic. There will be additional selected topics from model theory as time permits.  
**Text:** Mathematical Logic (The Berkeley-Harvard undergraduate course)  
**By:** Theodore Slaman and Hugh Woodin  
(Copies will be supplied).

Carnap and Quine (113545)  

*Warren Goldfarb*

2020 Fall (4 Credits)  
**Schedule:** W 1200 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 25  

Rudolf Carnap (1891-1970) was the preeminent figure in the logical positivist movement, later known as logical empiricism. We investigate its leading themes: meaning and verification, the foundations of logic and mathematics, the logical analysis of empirical knowledge, and the role of philosophy in framing criteria for ontology and objectivity. We then turn to W. V. Quine (1908-2000), starting with his criticisms of Carnap and analyzing his development of a post-positivist naturalism, which reshapes the approach to all these issues.

Modal Logic (156023)  

*Mark Richard*

2020 Fall (4 Credits)  
**Schedule:** MW 0130 PM - 0245 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a  

Modal logic in the first instance is the study of the logical properties of modal words like 'must', 'may', 'necessarily', and 'possibly'. The standard way of explaining the meanings of modal idioms like 'necessarily' --in terms of "truth at a possible world" --has been taken over by many linguists as a tool to analyze meaning in natural language (so-called 'possible worlds semantics'). It has also been used to
study the nature of provability in formal systems, to analyze programs in computer science, and to model temporal processes. The standard way of explaining the meanings of modal idioms like 'necessarily' --in terms of "truth at a possible world" --has been taken over by many linguists as a tool to analyze meaning in natural language (so-called 'possible worlds semantics').

This course is first and foremost a course in logic, but one that attends to modal logic's uses in philosophy and the study of language. One of the goals of the course is to introduce you to doing metatheory --proving things like completeness and soundness for logical systems. We also look in some detail some applications of modal logic and its semantics, discussing such things as: semantics for counterfactual conditions; such things as mutual knowledge and conversational context; the use of modal logic to model such things as computer programs and non-standard (e.g., intuitionistic) mathematical systems. The course does not suppose that you know any logic. We do move pretty fast through elementary logic; you may find the course challenging unless you have taken and remember some of an elementary logic course like EMR17. Grades will be determined by: class attendance, four to six problem sets, a take home final. The primary text for the course is Hughes and Cresswell, Hughes and Cresswell, A New Introduction to Modal Logic (Routledge).

Class Notes: In addition to the lectures, students also have to sign up for a mandatory section with the Course Head on Thursdays, 1:30-2:30pm

Philosophy 146

Philosophy and Mathematics (119554)

Peter Koellner

2021 Spring (4 Credits)    Schedule:    WF 1030 AM - 1145 AM

Instructor Permissions:    None    Enrollment Cap:    n/a

Infinity captures the imagination. A child stands between two mirrors and sees herself reflected over and over again, smaller and smaller, trailing off to infinity. Does it go on forever? ... Does anything go on forever? Does life go on forever? Does time go on forever? Does the universe go on forever? Is there anything that we can be certain goes on forever? ... It would seem that the counting numbers go on forever, since given any number one can always add one. But is that the extent of forever? Or are there numbers that go beyond that? Are there higher and higher levels of infinity? And, if so, does the totality of all of these levels of infinity itself constitute the highest, most ultimate, level of infinity, the absolutely infinite?

This course will involve an in-depth investigation of the infinite in mathematics. Topics include: Logicism, Hilbert's Program, Intuitionism, the Incompleteness Theorems, and the Search for New Axioms.

Throughout the course we shall address the classic philosophical questions concerning the nature of mathematics and our knowledge our knowledge of mathematics, questions which appear in their most pressing form in the context of the incompleteness phenomenon and the infinite.

Philosophy 147
Philosophy of Language (146883)

Bernhard Nickel

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

Language is of two-fold philosophical interest: intrinsically, it is a complex tool that mediates our relationships with the natural world and with each other. It is also a nexus which reflects metaphysics, epistemology, ethics, and pretty much every other aspect of philosophy. This course will introduce students to theories of language that seek to shed light both on how language works, and what we can learn about other matters from a closer investigation of language. We’ll read many of the classic discussions that have given rise to theories of meaning and whole fields, such as linguistics: Frege, Russell, Strawson, Grice, Kaplan, and Kripke, among others. We’ll also look at how more recent writers have applied the tools that philosophers of language of past generations have developed, with special attention to feminist concerns. This course has no formal pre-requisites, but students should have taken at least one philosophy course before enrolling in this course so that they have some experience reading and writing philosophy.

Course Notes: Students will receive comprehensive lecture materials for asynchronous study, and class time will be spent reviewing, deepening, and expanding on these lecture notes through seminar style discussion.

Philosophy 155
Topics in Philosophy of Religion (121705)

Parimal Patil

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

In this course, we will discuss the work of contemporary philosophers whose treatment of problems in philosophy of language (Dummett), epistemology and metaphysics (Johnston), and mind (Strawson) have a direct bearing on issues in the philosophy of religion.

Course Notes: Prerequisites: Previous course-work in Philosophy or permission of the instructor.

Class Notes: For students who cannot attend the regularly scheduled class meeting due to differences in timezone, recordings of the meetings will be made available and the instructor will meet with these students.
An examination of the relation between the mind and the natural world. Topics include: the mind–body problem and proposed solutions to it, consciousness, and mental representation. Readings will consist mostly of influential papers from the latter half of the 20th Century.

Class Notes: In a remote version of the Anscombe proseminar, I’d be nervous about taking on more than eight students. I would want to be providing detailed written responses every week to questions submitted to the 'Discussions' section of the Canvas site (this is something I already do to an extent but I would be beefing it up considerably). I might want to replace half of the seminar time (in the regular residential version) with, say, a half-hour one-on one session with each student, and add a compulsory 75-minute discussion section for the whole class each week (attendance at these has been optional in the past). And I would want to offer two versions of the remaining 75-minute seminar at
different times, to accommodate different time zones.

Philosophy 175T

The Ethics of Technology and Design: Autonomy, Community, Virtue, and Vice (116995)

Seth Robertson  
Meica Magnani

2021 Spring (4 Credits)  
Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Instructor  
Enrollment Cap: 25

As human interactions, choices, and relationships are increasingly mediated by computing and information technologies, we find ourselves facing new variations of age-old philosophical questions. This course examines how certain technologies force us to engage with and sometimes rethink classic questions in moral and political philosophy. This course examines these issues from two popular perspectives in contemporary moral philosophy: the perspectives of Kantian ethics and of virtue ethics. On the technology side, we will examine: the widespread replacement of human decision-making with algorithms; how recommender systems shape information flow and user choice; the proliferation and uses of personal data; and the human impact of interface design. On the philosophy side, we consider philosophical questions such as: What does it mean for our technologies to respect the autonomy of persons? What does it mean for our technologies to respect and promote a moral community of equals? When might our technologies undermine or promote autonomous choice, preference, and action? How might our technologies undermine or promote moral relations? How can technology contribute to or impede human flourishing? What personal traits or skills are needed to interact healthily with technology? How do our everyday interactions with technology influence our lives and our values for better or worse? How can we be at our intellectual best despite widespread propaganda, fake news, disinformation campaigns, and epistemic filter bubbles and echo chambers?

Philosophy 177

Educational Justice: Proseminar (203447)

Regina Schouten

2020 Fall (4 Credits)  
Schedule: TBD

Instructor Permissions: Instructor  
Enrollment Cap: 18

This course will explore the kinds of experiences children should have in schools and how those experiences should be distributed. We'll proceed by examining key topics pertaining to educational justice, including competing principles of justice in the distribution of education (egalitarian principles,
sufficientarian principles, prioritarian principles, etc.); competing reform agendas; the justifiability and relative priority of different educational aims (education for citizenship, education for career preparation, education for social justice, etc.); the family and its role in educational inequality; and higher education access. In addition to the philosophical contributions to these conversations, we’ll read enough of the relevant empirical literature to provide a working understanding of the structure and consequences of schooling in the US. Finally, we’ll explore some case studies that look at specific choices that arise in real time for educational decision-makers. These case studies highlight the moral dimensions of decisions about discipline, charter schools, special education, and school districts.

Course Notes: The proseminar will be taught in two independent sections, Wednesdays 12pm-2:45pm and Thursdays 12pm-2:45pm. Students should indicate which time(s) they are available when submitting their application to enroll, and they will be assigned to one of the two sections as part of the enrollment process. Both sections are led by Professor Schouten.

Philosophy 177I

Historical Injustice: Proseminar (218177)

Emilio Mora

2020 Fall (4 Credits) Schedule: F 0300 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 25

What is the moral and political significance of past injustice in the history of a political community? In a variety of national contexts, the redress of historical injustice has struck many as both a legitimate and urgent political cause. Others argue that, since both the original victims and perpetrators of historical injustices are dead, there are no persons who have valid claims against these historical episodes nor, at any rate, are there any individuals who can be rightly held responsible for injustices that predate their existence. This course examines the underlying philosophical questions that underpin and sustain these disagreements, focusing on the issues of ‘injury’, responsibility, and justice. In the first topic, we examine a number of accounts characterizing the nature, and defending the legitimacy, of historical injustice claimants as well as the main lines of objection to these claims. In the second topic we examine questions of responsibility. Which contemporary parties, if any, can be held responsible for the effects of historical injustice, and what is the basis and nature of their responsibility? In the final topic, we examine some of the questions and difficulties regarding the administration of a scheme of historical rectification, and we will seek to understand the relation of historical rectification to the project of social justice more generally. Would historical injustice claims be made redundant or otherwise be addressed by the implementation of an egalitarian scheme of distributive justice for all? Conversely, do historical injustices give rise to social and political complaints that must be specifically addressed by a scheme of historical rectification?

Philosophy 178Z

Inequality (205060)

Lucas Stanczyk

2020 Fall (4 Credits)  Schedule:  TBD
Instructor Permissions:  None  Enrollment Cap:  n/a

Growing economic inequality is said to be one of the defining challenges of our time. In this class, we will examine some of the most important problems thought to be raised by inequality through the lens of several systematic ways of thinking about social justice. Topics to be addressed include inequality of income and wealth, inequality of opportunity, gender and racial inequality, unemployment and poverty, unauthorized migration, authority in the workplace, threats to democratic institutions and various forms of political inequality. Special attention will be paid to Rawls's liberal theory of justice and its influential critics.

Course Notes: In 2020-21, the course will have a hybrid structure. Lecture materials and recordings will be made available online for asynchronous study, and students will attend live classes in small groups for one hour twice a week with the instructors. To accommodate an appropriate variety of time zones, the meeting times of the live classes will be scheduled after students express interest in enrollment.

Philosophy 180

Justice and the Politics of Cultural Memory and Representation (110657)

Emilio Mora

2021 Spring (4 Credits)  Schedule:  F 1200 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

In this course we will examine a range of issues which we might, very loosely, term ethical questions of social, cultural, and artistic representation. We will be examining three principal issues. Our focus will begin with questions of historical representation. In a range of national and social contexts questions of historical representation have become increasingly prominent and divisive political issues. How should a national community regard, relate to, and represent histories and historical figures implicated in past injustice? What are the ethical constraints and imperatives relating to the representation of these national histories? How do these injunctions relate to present political norms of equality and inclusivity and the demands of social cohesion? We will examine these questions in relation to some of the recent political controversies that have arisen over these issues, particularly in the American debate over confederate monuments. Secondly, we will examine questions regarding cultural appropriation. What is cultural appropriation, and what, if anything, is wrong with cultural appropriation? What are the ethical norms and constraints regarding cultural appropriation? Our treatment of this topic will range from discussions of particular controversial cases of cultural appropriation to an examination of the philosophical questions regarding the nature of culture and identity that lie at the heart of these practical controversies. Finally, we will consider ethical controversies relating to our engagement with ( construed broadly) artistic representations. How can we ethically enjoy tragedy? On the face of things it would appear paradoxical or else the mark of a sadist. Are pornographic representations of immoral acts wrong to consume and enjoy?
Can we continue to consume and enjoy the products of artists who have engaged in grossly immoral actions? Although we should not expect a set of master principles to govern this range of topics, we might realistically hope that the answers we give, and the philosophical difficulties we encounter in any one topic will help illuminate our treatment and investigation of the others.

**Course Notes:** For 2020/21, the course will be organized as small-group tutorials. Students will meet singly or in pairs with the instructor every week. At the beginning of the semester, students will work the instructor to create a reading list around the course topic that is specific to the students' individual interests.

Philosophy and Literature: Proust (113962)

*Richard Moran*

2021 Spring (4 Credits) 

**Schedule:** TR 0130 PM - 0245 PM

**Instructor Permissions:** None 

**Enrollment Cap:** n/a

The course will attempt to achieve a sense of Proust's great novel, In Search of Lost Time, as a whole, necessarily in an abbreviated form, but with the aim of tracing the plan that Proust worked out when he began the project. The bulk of the reading will be in Proust's text, but there will be regular secondary readings in philosophy and in the critical literature on Proust. Philosophical themes to be emphasized will include: the nature of subjectivity and the problem of other minds, the strategies of solipsistic desire, freedom and dependence, amour-propre and the desire for approbation, the nature and limits of the will (including 'involuntary memory'), personal identity and artistic vocation, the will to knowledge and self-deception.

**Philosophy 189**

Film and Philosophy (121780)

*Richard Moran*

2021 Spring (4 Credits) 

**Schedule:** MW 1200 PM - 0115 PM
Motion pictures have attracted philosophical attention since their invention, both as a distinctive form of experience or representation, as a new medium of art, and in the philosophical themes explored by individual films. In this course we will take up such themes as the nature of photography, the relation of image to reality, spectatorship and point of view, fiction and documentary, and film and skepticism (about the external world, about other minds). We will also consider questions specific to film storytelling: the temporality of life and action, emotional engagement with fictions, empathy and identification; the contrast of film and text, narration with and without a narrator, narration both reliable and unreliable, and the question of what 'authorship' can mean in the case of film. We will be discussing films from the 'classic' Hollywood period, as well as more contemporary films from Europe and elsewhere. There will be regular screenings and attendance will be mandatory. Readings will be drawn from philosophy and philosophically oriented film criticism, likely including André Bazin, Stanley Cavell, V. F. Perkins, George Wilson, Susan Sontag, Robert Warshow, Robert Pippin, Gregory Currie, Noel Carroll, Laura Mulvey.

Philosophy 222
British Empiricism (114435)
Jeffrey McDonough
2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: n/a
The seventeenth and eighteenth centuries were among the most exciting and revolutionary periods in the history of western philosophy. Among the most prominent philosophers working in that period, Locke,
Berkeley and Hume have traditionally been grouped together under the label “British Empiricists” in virtue of their rejection of innate ideas and emphasis on experience as a source of knowledge. This graduate level course aims to provide an overview of the development of early modern empiricism and its context while exploring in detail a number of central issues, arguments and controversies. Topics will include the theory of ideas, the nature of body, personal identity, human agency, skepticism, and naturalism. Students will emerge from the course with a foundational understanding of a crucial period of philosophical development and be positioned to contribute to current research. This course should also put them in a position to teach British Empiricism as an area of competence.

2020 Fall (4 Credits)  
**Schedule:**  
M 1200 PM - 0200 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
20

In what sense, if at all, does Philosophy depend essentially upon its history? We approach this question in three phases. First, we compare the engagement with history found in the philosophical work of Hegel and Heidegger. Next, we address the meta-philosophical question itself through the work of figures like Bernard Williams, Michael Rosen, and Eileen O’Neill, among others. Finally, we explore the particular engagement with history manifest in the genealogical method, especially as it has been pursued recently by feminist philosophers such as Rahel Jaeggi, Sally Haslanger, and Amia Srinivasan.

Rawls and his Critics (120528)

Regina Schouten  

Tommie Shelby

2021 Spring (4 Credits)  

Schedule: M 0300 PM - 0530 PM  

Instructor Permissions: Instructor  

Enrollment Cap: n/a  

To mark the 50th anniversary of A Theory of Justice, we’ll do a close reading of John Rawls’s classic text and consider the most significant critical responses it inspired. In addition to engagement from other liberal thinkers, we’ll read critiques from the perspective of libertarianism, Marxism, communitarianism, feminism, and black radicalism.

Political Morality of Social Reproduction (216501)

*Lucas Stanczyk*

2020 Fall (2 Credits) Schedule: TBD

**Instructor Permissions:** Instructor

**Enrollment Cap:** 20

This is a graduate seminar in political philosophy. The topic is how to think about justice in the processes of social reproduction. In every society that persists over time and does not simply collapse or disband, there are processes in place whereby its continued existence is reproduced from one day to the next. Food is grown, children are raised, streets are policed, and so on. These processes together are responsible for whatever benefits that life in the society brings, as well as for the social disadvantages that the persons living in the society are liable to experience. Among the most important ways that social reproduction in this sense can fall short of what morality demands is by exhibiting or depending on injustices of various kinds. This possibility gives rise to one of the more complex questions that can be asked about the content of political morality. How are we to conceive of justice in the ongoing production, or reproduction, of a whole society? The seminar will seek insight into this question by examining it from several more discrete directions. Topics to be addressed include the interdependence of rights and duties in a theory of social justice, how the state should define appropriate economic contributions, the role of the family in reproducing the system of social cooperation, and approaches to thinking about intergenerational justice.

**Course Notes:** In 2020-21, the seminar will have a hybrid structure. Seminar materials and presentations will be made available online for asynchronous study, and participants will be asked to share questions and comments. The seminar will then meet live for two hours once a week. To accommodate participants in a variety of time zones, the seminar will be scheduled after students express interest in enrolment.

Qualified undergraduates may enroll with the permission of the instructor.

The State and Violence (216502)

*Lucas Stanczyk*

2020 Fall (2 Credits) Schedule: TBD

**Instructor Permissions:** Instructor

**Enrollment Cap:** 20
An inquiry into the political morality of violence. Topics to be addressed include the role of violence and the threat of violence in delimiting conventional rights and freedoms, the morality of responding to state violence with civil and uncivil forms of disobedience, the moral distinction between disobedience and revolutionary aims and actions, approaches to thinking about prison reform and abolition, standards for the use of deadly force by the military and in policing, the difficulty of tolerance in the aftermath of widespread violence.

Course Notes: "In 2020-21, the seminar will have a hybrid structure. Seminar materials and presentations will be made available online for asynchronous study, and participants will be asked to share questions and comments. The seminar will then meet live for two hours once a week. To accommodate participants in a variety of time zones, the meeting time of the weekly seminar will be scheduled after students express interest in enrolment.

Qualified undergraduates may enroll with the permission of the instructor."

Philosophy 300AAA

First Year Colloquium (116505)

Ned Hall
Alison Simmons

2020 Fall (4 Credits)  
Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor  
Enrollment Cap: n/a

Our topic this year is epistemic agency: What is it? How do you exercise it? What gets in the way of it? In the first half of the term, we'll be looking at historical discussions of epistemic agency and its discontents. In the second half of the term, we'll be looking at contemporary discussions of it from a variety of angles. Along the way, we will work on developing a variety of philosophical skills. And we will be talking about how to "do" graduate school.

Course Notes: Limited to first-year graduate students in the Department.

Our topic this year is epistemic agency: What is it? How do you exercise it? What gets in the way of it? In the first half of the term, we'll be looking at historical discussions of epistemic agency and its discontents. In the second half of the term, we'll be looking at contemporary discussions of it from a variety of angles. Along the way, we will work on developing a variety of philosophical skills. And we will be talking about how to "do" graduate school.
We will read a good bit of the second and third books of Hume's Treatise along with contemporary reactions, both sympathetic and unsympathetic, to the views developed therein.

This course replaces the former TIME-T—teaching. Graduate students register for this course while serving as TFs to indicate that appropriate independent work is replacing numbered courses.

Physics
Subject: Physics

Physics 15A
Introductory Mechanics and Relativity (111164)

David Morin
Amir Yacoby
Keith Zengel

2020 Fall (4 Credits) Schedule: TR 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a

Newtonian mechanics and special relativity. Topics include vectors; kinematics in three dimensions; Newton's laws; force, work, power; conservative forces, potential energy; momentum, collisions; rotational motion, angular momentum, torque; static equilibrium, simple harmonic motion, damped and driven oscillations; gravitation; fictitious forces; fluids; special relativity.

Course Notes: Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15a. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester.

Class Notes: Students who are unable to attend the T/Th 12:00-1:15 lecture time due to incompatible time zones will be able to watch the lecture videos at other scheduled times (to be determined). These viewings will take place in groups where students will periodically work together on short problems, as they would do in the main lecture.

Recommended Prep: Mathematics preparation at least at the level of Mathematics 1b concurrently is required. However, some elementary ideas from multivariable calculus may be used and students are encouraged to take Mathematics 21a concurrently.

Class Notes: Students who are unable to attend the T/Th 12:00pm-1:15pm lecture time due to incompatible time zones will be able to watch the lecture videos at other scheduled times (to be determined). These viewings will take place in groups where students will periodically work together on short problems, as they would do in the main lecture. Please note we will only offer this accommodation due to an incompatible time zone, not for a conflict with another course. We anticipate offering three lab sections: one morning, one afternoon, and one evening time EST.

Recommended Prep: Mathematics preparation at least at the level of Mathematics 1b concurrently is required. However, some elementary ideas from multivariable calculus may be used and students are encouraged to take Mathematics 21a concurrently.

Physics 15B

Introductory Electromagnetism and Statistical Physics (111896)

Carlos Arguelles Delgado

Amir Yacoby

Keith Zengel

2021 Spring (4 Credits) Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

Electricity and magnetism. Topics include electrostatics, electric currents, magnetic field, electromagnetic induction, Maxwell's equations, electromagnetic radiation, magnetic fields in materials, and some basic notions in kinetic theory, entropy, temperature, and phase transition associated with electricity and magnetism.

Course Notes: Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15b. Students use creative problem-solving in applying theoretical topics to explore physical phenomena and design real life applications. Topics include experimental design, model testing, error analysis, basic programming, introductory circuit analysis, and practical applications of electromagnetism. PSI will meet weekly throughout the semester.
Class Notes: The instructors of the course will survey the students enrolled in the course to find out the best times for lectures and labs.

Recommended Prep: Physics 15a, Physics 16, or written permission of the Head Tutor in Physics. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Vector calculus, (div, grad and curl) are used extensively--in principle, this is taught in the course. Students taking Mathematics 21a concurrently will likely find that some concepts are introduced in Physics 15b before they have seen them in Mathematics 21a. Some students may wish to postpone Physics 15b until they have completed Mathematics 21a.

Physics 15C

Wave Phenomena (124154)

John Huth
Mara Prentiss

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Forced oscillation and resonance; coupled oscillators and normal modes; Fourier series; Electromagnetic waves, radiation, longitudinal oscillations, sound; traveling waves; signals, wave packets and group velocity; two- and three-dimensional waves; polarization; geometrical and physical optics; interference and diffraction. Optional topics: Water waves, holography, x-ray crystallography, solitons, music, quantum mechanics, and waves in the early universe.

Course Notes: Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15c. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester.

Class Notes: Lab times will be scheduled at times that work best for students enrolled in the course. 100% lab attendance is required.

Recommended Prep: Physics 15a and 15b or Physical Science 12a-b or equivalent. Mathematics at least at the level of Math 21b. Mathematical topics introduced during lectures will include matrix calculus, complex numbers, differential equations, and Fourier analysis.

Physics 15C

Wave Phenomena (124154)

Matteo Mitrano
Markus Greiner

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Forced oscillation and resonance; coupled oscillators and normal modes; Fourier series; Electromagnetic
waves, radiation, longitudinal oscillations, sound; traveling waves; signals, wave packets and group velocity; two- and three-dimensional waves; polarization; geometrical and physical optics; interference and diffraction. Optional topics: Water waves, holography, x-ray crystallography, solitons, music, quantum mechanics, and waves in the early universe.

**Course Notes:** Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15c. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester.

**Class Notes:** Links to the lectures will be provided on Canvas and all lectures will be recorded. Students who are unable to attend the lecture time due to incompatible time zones will be able to watch the lecture videos at other scheduled times (to be determined). These viewings will take place in groups where students will periodically work together on short problems, as they would do in the main lecture. Sections (1.5 hours) meet once each week, and attendance is required and part of your grade. The course has an interactive lab component, taught by Prof. Greiner with weekly lab sessions.

**Recommended Prep:** Physics 15a and 15b or Physical Science 12a-b or equivalent. Mathematics at least at the level of Math 21b. Mathematical topics introduced during lectures will include matrix calculus, complex numbers, differential equations, and Fourier analysis.

**Physics 16**

Mechanics and Special Relativity (111197)

*Howard Georgi*

*Keith Zengel*

2020 Fall (4 Credits) **Schedule:** TR 0430 PM - 0545 PM

**Instructor Permissions:** None **Enrollment Cap:** n/a

Newtonian mechanics and special relativity for students with good preparation in physics and mathematics at the level of the advanced placement curriculum. Topics include oscillators damped and driven and resonance (how to rock your car out of a snow bank or use a swing), an introduction to Lagrangian mechanics and optimization, symmetries and Noether's theorem, special relativity, collisions and scattering, rotational motion, angular momentum, torque, the inertia tensor (dynamic balance), gravitation, planetary motion and a little glimpse of quantum mechanics.

**Course Notes:** Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 16. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester. Emphasis is placed on collaborative teaching and learning. Many class materials are Mathematics notebooks.
Class Notes: Prof Georgi will go over the same material at both class times listed. Both sessions will be recorded and students are free to attend both but students MUST attend the time for which they sign up because the sessions will have pre-assigned breakout rooms and interactive polls. In-class interactions will contribute to student grades. It is likely that the morning class will be smaller than the afternoon class. See the SCHEDULE link in Canvas for more details.

Recommended Prep: Score of 5 on the mechanics section of the Physics C Advanced Placement exam, or equivalent. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Thorough knowledge of calculus of one variable and vectors plus some mathematical sophistication. The mathematical level will be significantly higher than that of Physics 15a. If in doubt, check the Canvas site ahead of time, or email the professor at hgeorgi@fas.harvard.edu, or just shop.

Physics 90R

Supervised Research (111672)

David Morin

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

Primarily for selected concentrators in Physics, or in Chemistry and Physics, who have obtained honor grades in Physics 15 and a number of intermediate-level courses. The student must be accepted by some member of the faculty doing research in the student's field of interest. The form of the research depends on the student’s interest and experience, the nature of the particular field of physics, and facilities and support available. Students wishing to write a senior thesis can do so by arranging for a sponsor and enrolling in this course.

Course Notes: A list of possible faculty sponsors and their fields is available in Lyman 238 and on the Physics Department Web page. Course enrollment forms may be obtained from Lyman 238.

Supervised Reading Course for Undergraduates (110569)

David Morin

2020 Fall (4 Credits)  
Schedule: TBD

Instructor Permissions: Instructor  
Enrollment Cap: n/a

Open to selected concentrators in Physics, Chemistry and Physics, and other fields who wish to do supervised reading and studying of special topics in physics. Ordinarily such topics do not include those covered in a regular course of the Department. Honor grades in Physics 15 and a number of intermediate-level courses are ordinarily required. The student must be accepted by a member of the faculty.

Course Notes: A list of possible faculty sponsors and their fields is available in Lyman 238 and on the Physics Department’s website. Course enrollment forms may be obtained from Lyman 238.

Physics 95

Topics in Current Research (111967)

Isaac Silvera

2020 Fall (4 Credits)

Schedule:
W 0430 PM - 0545 PM
M 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

Prior to taking this tutorial course, most juniors and seniors have learned physics by topics: Classical Mechanics, E&M, Quantum Mechanics, Particle Theory, Statistical Mechanics, etc. This tutorial is built around the Wednesday Night Seminar (WNS): every Wednesday two Harvard Faculty members give accessible presentations on their research to entering or interested graduate students (Gs), joined by the P95 students. Modern research uses all of the topics learned in physics courses, thus UGs are introduced to current research, including old and new developments and burning problems; they will learn from the Harvard experts as well as each other. The WNS is preceded by assigned reading and student presentations to the class on the basic underlying physics. Students develop critical skills in oral presentations, writing about research topics, and engaging in self and peer evaluation.

Course Notes: Primarily for junior and senior concentrators, however interested sophomores are welcome.

Class Notes:

All students and Gs are welcome to the WNS. During Covid, faculty presentations will be recorded and videos are watched prior to the WNS. Students prepare at least one Monday introductory presentation on Zoom and these are recorded. At the WNS the faculty describes their career trajectory and attending students ask questions on their career, physics research, and research opportunities. To accommodate students who may be in different time zones the WNS will be held on Wednesday at 4:30pm pm; Mondays will be at 3 pm.

**Physics 123B**

Laboratory Electronics (124108)

David Abrams

2020 Fall (4 Credits)

Instructor Permissions: Instructor

Enrollment Cap: 10

A lab-intensive introduction to digital electronic circuit design. Develops circuit intuition and debugging skills through hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. After a short introduction to the basics of electronic circuits and MOSFET switches, we move onto digital devices including logic families, Boolean arithmetic, combinatorial and sequential circuits including finite state machines. We continue with analog-digital interfacing, the use of microcontrollers at the assembly and machine code level and programmable logic devices (FPGAs). We will also discuss data conversion techniques.

Course Notes: Physics 123b is the same course as Physics 223b; students may not take both for credit. If you are a graduate student, please enroll in 223b. Limited to 10 students. If you would like to take the course including the analog material, you should wait until it is offered as Physics 123 or ES153.

Class Notes: The course will consist of a combination of pre-recorded and live lectures. We will meet virtually twice a week for the live lectures or a review of the pre-recorded material, followed by the course lab. Students will work in breakout rooms in groups of two on the lab
exercises. The instructor and course TFs will be available during the lab session to help students debug and understand their circuits.

Widely Applied Physics (120167)

*David Morin*

2021 Spring (4 Credits)  
**Schedule:** WF 1200 PM - 0115 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a
Uses physics to analyze important technologies and real-world systems. Stresses estimation and "back of the envelope" calculations, as are commonly used by research physicists. New physical concepts are introduced as necessary. Example topics: energy production and storage, nuclear physics, nuclear power and weapons, health effects of radiation, risk analysis, airplanes, spy satellites, rockets, fluids, water waves, mechanical design and failure, global warming, and cosmology. Emphasis is on developing physical intuition and the ability to do order-of-magnitude calculations.

Class Notes: Students who are unable to attend the W/F 12:00-1:15 lecture time due to incompatible time zones will be able to watch the lecture videos at other scheduled times (to be determined). These viewings will take place in groups where students will periodically work together on short problems, as they would do in the main lecture.

Recommended Prep: Physics 15a, b, c, and mathematics at the level of Mathematics 21a. Physics 143a and 181 are very helpful, and may be taken concurrently.

**Physics 129**

Energy Science (125656)

*Lene Hau*

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

Non-fossil energy sources and energy storage are important for our future. We cover four main subjects to which students with a background in physics and physical chemistry could make paradigm changing contributions: photovoltaic cells, nuclear power, batteries, and photosynthesis. Fundamentals of electrodynamics, statistical/thermal physics, and quantum mechanics are taught as needed to give students an understanding of the topics covered.

Recommended Prep: Physics 15a (or 16), 15b,c or 11a,b. Pre/co-requisite Physics 143a or Chemistry 160 or equivalent.

Additional Course Attributes:

**Physics 131**

Computational Neuroscience (217838)

*Haim Sompolinsky*

2021 Spring (4 Credits) Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None Enrollment Cap: n/a
Follows trends in modern brain theory, focusing on local neuronal circuits as basic computational modules. Explores the relation between network architecture, dynamics, and function. Introduces tools from information theory, statistical inference, and the learning theory for the study of experience-dependent neural codes. Specific topics: computational principles of early sensory systems; adaptation and gain control in vision, dynamics of recurrent networks; feature selectivity in cortical circuits; memory; learning and synaptic plasticity; noise and chaos in neuronal systems.

Course Notes: Also offered this semester as Neuro 131, and in other semesters as MCB 131. Cannot be taken for credit as Physics 131 if Neuro 131 or MCB 131 is already complete.

Recommended Prep: Basic knowledge of multivariate calculus, differential equations, linear algebra, and elementary probability theory.

**Physics 141**

The Physics of Sensory Systems in Biology (121885)

*Aravinthan Samuel*

2020 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Living organisms use sensory systems to inform themselves of the sights, sounds, and smells of their surrounding environments. Sensory systems are physical measuring devices, and are therefore subject to certain limits imposed by physics. Here we will consider the physics of sensory measurement and perception, and study ways that biological systems have solved their underlying physical problems. We will discuss specific cases in vision, olfaction, and hearing from a physicist's point of view.

Class Notes: The scheduled class meetings (Tu, Th 9-10:15 EST) will be discussions of the material presented in the pre-recorded lectures and reading assignments. If any students are unable to attend at 9 AM (e.g., because of time zone), Prof. Samuel will hold a second class meeting later on Tuesdays and Thursdays (which will be regularly scheduled based on a student poll at the start of class). Attendance at either the 9 AM or later meeting is mandatory. Students are free to join both. All zoom meetings will be recorded and made available on the website. Class participation is expected either live during these class meetings or through online discussions on Slack. For more information about the course and the schedule, please see the Canvas site.

Recommended Prep: Math 21a,b, Physics 15, or by permission of the instructor.

Requirements: Anti-Requisite: Cannot be taken for credit if NEURO 141 already complete.

Physics 143A
Quantum Mechanics I (108465)

John Doyle

2020 Fall (4 Credits)  Schedule:  TBD
Instructor Permissions:  None  Enrollment Cap:  n/a

Introduction to nonrelativistic quantum mechanics: uncertainty relations; Schrödinger equation; Dirac notation; matrix mechanics; one-dimensional problems including particle in box, tunneling, and harmonic oscillator; angular momentum, hydrogen atom, spin, Pauli principle; and if time allows: time-independent perturbation theory; and scattering.

Class Notes:  Class times will be determined to maximize the overlap with students in different time zones.

Recommended Prep:  Linear algebra including matrix diagonalization; Physics 15c or written permission of the Head Tutor.

Physics 145
Elementary Particle Physics (117719)
Introduction to elementary particle physics. Emphasis on concepts and phenomenology rather than on detailed calculational development of theories. Starts with the discovery of the electron in 1897 and ends with the theoretical motivations for the Higgs boson, and attempts to cover everything important in between. Students will also have a brief experience of particle physics research using Atlas experiment open data.

Recommended Prep: Physics 143a. Physics 143b or equivalent is useful.

Physics 151
Mechanics (111231)

Arthur Jaffe

2020 Fall (4 Credits)  Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None  Enrollment Cap: n/a

One can consider this course as a general introduction and overview to theoretical physics, even though it centers on the theoretical aspects of classical mechanics. We will study problems in the mechanics of particle motion and also problems in continuum mechanics, including classical field theory. We will consider linear systems and non-linear ones. We stress the role of conserved quantities in studying the laws of physics, and emphasize the relation between conserved quantities and symmetry. We study Lagrangian and Hamiltonian mechanics from the point of view of their relation to different fields of physics, including quantum theory. We discuss soliton solutions to some non-linear classical equations. Time permitting, we will discuss other non-linear phenomena that are important in physics.

Recommended Prep: Physics 15a, 15b or written permission of the Head Tutor; Mathematics 21a, b or equivalent.

Additional Course Attributes:

Physics 153
Electrodynamics (111822)

Philip Kim

2021 Spring (4 Credits)  Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: None  Enrollment Cap: n/a
Aimed at advanced undergraduates. Emphasis on the properties and sources of the electromagnetic fields and on the wave aspects of the fields. Course starts with electrostatics and subsequently develops the Maxwell equations. Topics: electrostatics, dielectrics, magnetostatics, electrodynamics, radiation, wave propagation in various media, wave optics, diffraction and interference. A number of applications of electrodynamics and optics in modern physics are discussed.

Class Notes: Prof. Kim will hold lectures for Physics 153 on Mondays and Wednesdays, noon - 1:15pm. Students who are unable to attend the main lecture due to incompatible time zones will be able to watch the recorded lecture videos (times to be determined at the beginning of the semester), together with a Teaching Fellow who will be able to answer any questions.

Recommended Prep: Physics 15a, b, and c, or written permission of the Head Tutor; Mathematics 21a, b or equivalent.

Physics 181

Statistical Mechanics and Thermodynamics (143450)

Matthew Schwartz

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a
This course provides an introduction to statistical mechanics and thermal physics. It surveys the fundamental elements of classical and quantum statistical mechanics (ensembles and partition functions) and thermodynamics (temperature, heat, work, free energy) and their application to a variety of physical systems. Topics covered may include heat engines, solid-state physics, blackbody radiation, phase transitions, physical chemistry, stellar physics, quantum information, Bose-Einstein condensation, and transport phenomena.

Course Notes: May not be taken for credit in addition to Engineering Sciences 181.

Recommended Prep: Physics 143a or equivalent.

Physics 195

Introduction to Solid State Physics (112107)

Julia Mundy

2020 Fall (4 Credits)  Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None  Enrollment Cap: n/a

The physics of crystalline solids and their electric, magnetic, optical, and thermal properties. Designed as a first course in solid-state physics. Topics: free electron model; Drude model; the physics of crystal binding; crystal structure and vibration (phonons); x-ray diffraction; electrons in solids (Bloch theorem) and electronic band structures; metals and insulators; semiconductors (and their applications in pn junctions and transistors); magnetism; superconductivity.

Course Notes: Physics 195 is also offered as Applied Physics 195. Students may not take both for credit.

Class Notes: If 3-4:15 PM EST falls outside of 7 AM - 10:15 PM in a student's local time zone, we will provide an alternative viewing of the lecture with the TF. This will likely be held at 8 AM EST although exact time subject to enrollment. Please note, we not not anticipate being able to offer lecture time accommodations based on conflicts with other courses, commitments or preferences.

Recommended Prep: Physics 15a, 15b and 15c or the equivalent. Physics 143a. Physics 181 and Physics 143b (taken concurrently) helpful but not required.

Physics 201

Data Analysis for Physicists (161201)
This course covers methods for analyzing experimental data. Students will learn both frequentist and Bayesian frameworks for statistical inference, modern computational methods such as Markov-chain Monte Carlo techniques, and the application to problems in particle physics, biophysics, condensed matter, applied physics, astrophysics, and other fields. The course emphasizes an intuitive, principled approach to data analysis and will involve discussions of ethics and reproducible research.

Course Notes: This course is suitable for students with limited or rusty programming skills. Students with more advanced programming skills may wish to take APMTH 207 or ENG-SCI 255.

Class Notes: Attendance is required on Monday and Wednesday lectures. The Friday course time is reserved for section.

Recommended Prep: Research experience commensurate with that of a first-year (or higher) PhD student in experimental physics. Students without such experimental experience must have taken Physics 191 or Physics 247 (or equivalent) first.

Cosmology (203431)
Cora Dvorkin
2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a
Graduate course on Physical Cosmology. Topics will include: the physics of Inflation, Cosmic Microwave Background anisotropies, evidence for Dark Matter, discovery of the accelerated expansion of the Universe, primordial gravitational waves, gravitational lensing, likelihood analysis, structure formation.

Class Notes: Lectures will be held live on Tuesdays and Thursdays 10:30am - 11:45am EST. Meeting times for sections (providing 2-4 hours of synchronous interaction) will be determined together with students enrolled in the class. Lectures will be based on a Flexible Live Lecture model. Lectures and sessions will be recorded.

2021 Spring (4 Credits) Schedule: WF 0430 PM - 0545 PM
Instructor Permissions: None Enrollment Cap: n/a

Course Notes: Also offered as ENG-SCI 220. Students may not take both for credit.
Recommended Prep: Familiarity with dynamics, vectors, multivariable calculus, and partial differential equations. An undergraduate course in continuum or statistical mechanics, electrodynamics, or quantum mechanics is strongly recommended.

Physics 223B
Electronics for Scientists (109346)
A lab-intensive introduction to digital electronic circuit design. Develops circuit intuition and debugging skills through hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. After a short introduction to the basics of electronic circuits and MOSFET switches, we move onto digital devices including logic families, Boolean arithmetic, combinatorial and sequential circuits including finite state machines. We continue with analog-digital interfacing, the use of microcontrollers in embedded systems and programmable logic devices (FPGAs). We will also discuss data conversion techniques.

Course Notes: Physics 223b is the same course as Physics 123b; students may not take both for credit. If you are a graduate student, please enroll in 223b. Limited to 10 students. The analog material will be offered as a separate course at a later date.

Class Notes: The course will consist of a combination of pre-recorded and live lectures. We will meet virtually twice a week for the live lectures or a review of the pre-recorded material, followed by the course lab. The instructor and course TFS will be available during the lab session to help students debug and understand their circuits. Some familiarity with the C programming language or Arduino programming will be helpful in the microcontroller portion of the course but is not a requirement.

Physics 223B

Electronics for Scientists (109346)

David Abrams

A lab-intensive introduction to digital electronic circuit design. Develops circuit intuition and debugging skills through hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. After a short introduction to the basics of electronic circuits and MOSFET switches, we move onto digital devices including logic families, Boolean arithmetic, combinatorial and sequential circuits including finite state machines. We continue with analog-digital interfacing, the use of microcontrollers at the assembly and machine code level and programmable logic devices (FPGAs). We will also discuss data conversion techniques.

Course Notes: Physics 223b is the same course as Physics 123b; if you are an undergraduate student, please enroll in 123b. Limited to 10 students. If you would like to take the course including the analog material, you should wait until it is offered as Physics 223.
Class Notes: The course will consist of a combination of pre-recorded and live lectures. We will meet virtually twice a week for the live lectures or a review of the pre-recorded material, followed by the course lab. Students will work in breakout rooms in groups of two on the lab exercises. The instructor and course TFs will be available during the lab session to help students debug and understand their circuits.

**Physics 232**

Advanced Electromagnetism (112263)

Girma Hailu

2021 Spring (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Maxwell’s equations in macroscopic media, conservation laws, Green's functions, time-dependent solutions and radiation, scattering and diffraction, and gauge invariance. Time permitting: geometrical optics and caustics, negative refractive index materials and radiation from rapidly accelerating charges.

Class Notes: The lectures involve interactive discussions and quizzes, and attendance is required. Time will be chosen after surveying the students enrolled in the course.

Recommended Prep: Physics 153 and Applied Mathematics 105a, 105b, or equivalent.

Topics in Experimental Particle Physics (109993)

Masahiro Morii

2020 Fall (4 Credits)  
**Schedule:** MW 0900 AM - 1015 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Topics in the elementary particle physics, focusing on experimental studies of the Standard Model and new physics beyond the Standard Model in the past 20 years. Half of the course will review ongoing experimental research in particle physics, with or without accelerators. The other half will cover particle detector technologies and data analysis methods.

Class Notes: Class will meet at the listed time (Mon/Wed 9:00-10:15 AM). The lectures will be recorded, but students are strongly encouraged to
The course will include interactive sessions with a TF at times to be attend in real time. The section time (or times) will be determined after the enrollment.

Recommended Prep: Physics 145 or equivalent, i.e. a course at the level of Griffiths, Introduction to Elementary Particles.

Physics 251A

Advanced Quantum Mechanics I (111314)

C. Vafa

2020 Fall (4 Credits)

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

Basic course in nonrelativistic quantum mechanics. Review of wave functions and the Schrödinger Equation; Hilbert space; the WKB approximation; central forces and angular momentum; spins and their addition, measurement theory; the density matrix; perturbation theory.

Class Notes:

Prof. Vafa will hold lectures for Physics 251a on Mondays and Wednesdays, 3:00pm - 4:15pm. The lectures will be recorded, and students who cannot attend the main lecture will have the opportunity to watch the lectures the following morning - Tuesdays and Thursdays, 8:00am - 9:15am, together with a Teaching Fellow who will be able to answer any questions. In addition, there will be two sections where TFs will go over the material.

Recommended Prep: Physics 143a, b or equivalent, or permission of instructor.

Physics 251B

Advanced Quantum Mechanics II (111876)

Matthew Reece

2021 Spring (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

Path integrals; relativistic quantum mechanics and quantum fields; identical particles; scattering theory; quantum information theory.

Class Notes:

The course will include interactive sessions with a TF at times to be
determined, to accommodate students in incompatible time zones.

**Recommended Prep:** Physics 251a.

**Physics 253A**

Quantum Field Theory I (122930)

*Matthew Schwartz*

2020 Fall (4 Credits)  
**Schedule:** TR 1030 AM - 1145 AM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Introduction to relativistic quantum field theory. This course covers quantum electrodynamics. Topics include canonical quantization, Feynman diagrams, spinors, gauge invariance, path integrals, ultraviolet and infrared divergences, renormalization and applications to the quantum theory of the weak and gravitational forces.

**Class Notes:** Times listed are preliminary. Please fill out the survey under quizzes so we can get a better sense of the course needs. Prof. Schwartz will give live lectures twice a week, Tuesday and Thursday from 10:30-12pm EST. Lectures will be recorded. Attendance at live lecture is not mandatory but encouraged. The lectures will be reviewed the same days at 8-9:30pm EST by the head TF Arindam. Sections are Monday at 10:30am and 8pm EST.

**Recommended Prep:** Physics 143a, b or equivalents.

Quantum Field Theory II (115442)

*Xi Yin*

2021 Spring (4 Credits)  
**Schedule:** WF 0130 PM - 0245 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

A continuation of Physics 253a. Topics include: states and local operators, the analytic S-matrix, IR divergence, effective action, non-Abelian gauge theories, renormalization group, spontaneous symmetry breaking and effective field theory, anomalies, and non-perturbative aspects of quantum field theories.

**Class Notes:** The class will be taught through Zoom. Attendance of the lectures are
required to allow for interaction between the students and the instructor. The course will include weekly discussion sessions with the TF at a time to be determined later.

Recommended Prep: Physics 253a.

**Physics 253CR**

Quantum Field Theory III (118459)

Daniel Jafferis

2020 Fall (4 Credits)  
Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None  
Enrollment Cap: n/a

This course will cover a variety of topics related to conformal field theories, including: an introduction to conformal field theories and the conformal bootstrap with an emphasis on greater than two dimensions; large N expansions; the a-theorem; analytic bootstrap methods; a self-contained introduction to the AdS/CFT correspondence.

Class Notes: The format of the class will be lectures at the set times via Zoom whiteboard with discussion strongly encouraged and attendance required, and an optional TF led section.

Recommended Prep: Quantum field theory at the level of Physics 253a.

**Physics 254**

The Standard Model (109328)

Matthew Reece

2020 Fall (4 Credits)  
Schedule: TBD

Instructor Permissions: None  
Enrollment Cap: n/a

The Standard Model of particle physics: theory and experimental implications. Topics include nonabelian gauge theory, spontaneous symmetry breaking, anomalies, the chiral Lagrangian, QCD and jets, collider physics and simulation, the Higgs at the LHC.

Class Notes: Lectures and meetings providing 2-4 hours of synchronous interaction will be determined together with students enrolled in the class.
Physics 262

Statistical Mechanics (110526)

Eugene Demler

2020 Fall (4 Credits)

Schedule: MWF 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

Basic principles of statistical physics and thermodynamics, with applications including: the equilibrium properties of classical and quantum gases; phase diagrams, phase transitions and critical phenomena, as illustrated by the liquid-gas transition and simple magnetic models. Time permitting, introduction to nonequilibrium phenomena including Langevin dynamics and Boltzmann equation.

Course Notes: Also offered as Applied Physics 284. Either course can be used to satisfy the statistical mechanics requirement in the Physics PhD program or the Applied Physics model PhD program.

Recommended Prep: Physics 143a and Physics 181 or Engineering Sciences 181.

Physics 268R

Quantum Phases of Matter (122818)

Subir Sachdev

2020 Fall (4 Credits)

Schedule: MWF 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

Class Notes: Given the pandemic, we are open to rescheduling the class time, depending upon student constraints.

Recommended Prep: Graduate courses in quantum mechanics and statistical mechanics,
including familiarity with second quantization and path integrals.

**Physics 271**

Topics in the Physics of Quantum Information (121970)

*Mikhail Lukin*

2020 Fall (4 Credits)  

**Schedule:**  

MW 1030 AM - 1145 AM

**Instructor Permissions:**  

None  

**Enrollment Cap:**  

n/a

Introduction to physics of quantum information, with emphasis on ideas and experiments ranging from quantum optics to condensed matter physics. Background and theoretical tools will be introduced. The format is a combination of lectures and class presentations.

**Class Notes:**  

Students who are unable to attend the M/W 10:30 – 11:45 lecture time due to incompatible time zones will be able to watch the lecture videos at other times, attend sections and office hours. They will work in groups to solve homework problems and to prepare and deliver the class presentations during the class time and sections, which will also be recorded.

**Recommended Prep:**  

Quantum mechanics at the level of introductory graduate courses.

**Additional Course Attributes:**

**Physics 285A**

Modern Atomic and Optical Physics I (118734)

*Susanne Yelin*

2021 Spring (4 Credits)  

**Schedule:**  

MF 1200 PM - 0115 PM

**Instructor Permissions:**  

None  

**Enrollment Cap:**  

n/a

Introduction to modern atomic physics. The fundamental concepts and modern experimental techniques will be introduced. Topics will include: Two-state systems, magnetic resonance, interaction of radiation with atoms, transition probabilities, spontaneous and stimulated emission, dressed atoms, trapping, laser cooling. Structure of simple atoms, coupling to fields, light scattering. Fundamental symmetries and introduction to molecules and artificial atoms. Selected experiments. The first of a two-term subject sequence that provides the foundations for contemporary research.

**Class Notes:**  

No attendance requirements, synchronous class, traditionally taught. Another interactive session might be offered if there are students.
interested to participate but not able to make the class time because of timezone issues

Recommended Prep: One course in quantum mechanics (143a and b, or equivalent).

### Physics 287A

**Introduction to String Theory (111191)**

**Xi Yin**

2020 Fall (4 Credits)  
**Schedule:** TR 0300 PM - 0415 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Introduction to the perturbative formulation of string theories and dualities. Quantization of bosonic and superstrings, perturbative aspects of scattering amplitudes, supergravity, D-branes, T-duality and mirror symmetry. Also a brief overview of recent developments in string theory.

**Class Notes:** 287a will be taught through Zoom lectures at listed times, and an additional discussion session with the Teaching Fellow at a time to be determined. Attendance is required.

**Recommended Prep:** Physics 253a, b or equivalent.

### Physics 289R

**Topics in Mathematical Physics (118733)**

**Arthur Jaffe**

2021 Spring (4 Credits)  
**Schedule:** TR 0130 PM - 0245 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Over the past few years, the development of new mathematical picture languages led to insights in several fields, including quantum information, entanglement, entropy, error correction, uncertainty principles, Fourier analysis, and fusion algebras. This course will overview a number of these directions and develop several of these topics from scratch and in depth, relating them to statistical mechanics models and to quantum field theory.

**Recommended Prep:** Physics 253a.
**Physics 295A**

Introduction to Quantum Theory of Solids (127980)

*Prineha Narang*

2020 Fall (4 Credits)  

**Schedule:**  
MW 0900 AM - 1015 AM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This is an introductory graduate level course in solid-state physics. Lattices and symmetries. Phonons. Electronic Structure of Crystals. Metals, semiconductors, and insulators will be covered. Electrical, optical, and thermal properties of solids will be treated based on an atomic scale picture and using the independent electron approximation. Additional topics from the theory of interacting electrons, including introduction to magnetism and superconductivity, and an introduction to topological insulators.

**Class Notes:**  
We will meet at the lecture times listed (MW 9-10:15am). Additional times for sections and seminal paper discussions will be based on student polls during the first week. Some (not all) lecture content will be recorded and made available to make class time more interactive and to better accommodate time zone differences. Recorded lecture content is not a replacement for in-class work. We will hold expanded office hours and Q&A sessions this Fall.

**Recommended Prep:**  
Physics 181 or equivalent, Applied Physics 195 or equivalent, and a graduate level quantum mechanics course similar to Physics 251a. (Physics 251b would be helpful and may be taken concurrently.)

**Additional Course Attributes:**

**Physics 295B**

Quantum Theory of Solids (127979)

*Subir Sachdev*

2021 Spring (4 Credits)  

**Schedule:**  
MW 1200 PM - 0115 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

A course on the application of the principles of many-particle quantum mechanics to the properties of solids. The objective is to make students familiar with the tools of second quantization and diagrammatic perturbation theory, while describing the theory of the electron liquid, the BCS theory of superconductivity, and theory of magnetism in metals and insulators. Modern topics on correlated electron systems will occupy the latter part of the course.
Course Notes: Physics 295b is also offered as Applied Physics 295b. Students may not take both for credit.

Recommended Prep: Physics 251a,b, an introductory course in solid state physics, or permission of instructor.

Additional Course Attributes:

**Physics 297**

Professional Writing for Scientists and Engineers (217830)

*Jenny Hoffman*

2021 Spring (4 Credits)  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 15

This class leads students to develop their skills in the critical reading and writing of science and engineering. Genres will include research articles, grant proposals, school/fellowship/job applications, or lay abstracts & press releases for the non-scientific public. Crucially, students will be empowered not only to achieve their own writing goals, but also to break down these learned skills and impart them to others, as effective collaborators and mentors of younger students.

**Course Notes:** Also offered as Eng-Sci 297. We welcome graduate students and senior undergraduates! Enrollment is limited to 15 students. Tentative meeting time is 3-5pm on Weds, but may be updated based on student preference.

Instructional Training for New Teaching Fellows (205610)

Jacob Barandes

2020 Fall (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Through this course, first-time teaching fellows in the Physics graduate program engage in supervised training through practice microteaching, video review, evaluation and feedback, development of instructional materials, and follow-up meetings with teaching consultants.

Additional Course Attributes:

Subject: Physical Sciences

Physical Sciences 2
Mechanics, Elasticity, Fluids, and Diffusion (122575)
Louis Deslauriers
Gregory Kestin
2020 Fall (4 Credits)  Schedule:  TR 1200 PM - 0115 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

An introduction to classical mechanics, with special emphasis on the motion of organisms in fluids. Topics covered include: kinematics, Newton's laws of motion, oscillations, elasticity, random walks, diffusion, and fluids. Examples and problem set questions will be drawn from the life sciences and medicine.

Class Notes:  Required primary class time will be 12:00 - 1:15pm, but with permission from the instructor students may instead attend the "interactive lecture viewing" 7:30pm -8:45pm, run by the head TF.

Recommended Prep:  Physical Sciences 1 (or Chemistry 7), Mathematics 1b, or the equivalent.

Additional Course Attributes:
<table>
<thead>

Physical Sciences  3
Electromagnetism, Circuits, Waves, Optics, and Imaging (122576)

Louis Deslauriers
Roxanne Guenette

2021 Spring (4 Credits)  Schedule: TR 0900 AM - 1015 AM
Instructor Permissions: None  Enrollment Cap: n/a

This course is an introduction to electromagnetism, digital information, waves, optics and sound. Topics covered include: electric and magnetic fields, electrical potential, circuits, simple digital circuits, wave propagation in various media, microscopy, sound and hearing. The course will draw upon a variety of applications to the biological sciences and will use real-world examples to illustrate many of the physical principles described. There are six laboratories.

Course Notes: This course is part of an integrated introduction to the physical sciences intended for students who plan to pursue a concentration in the life sciences and/or satisfy pre-medical requirements in Physics. May not ordinarily be taken for credit in addition to Physics 1b, 11b, or 15b.

Recommended Prep: Physical Sciences 2 (or Physics 1a or 11a), Mathematics 1b, or equivalent.

Additional Course Attributes:

Physical Sciences  12A
Mechanics and Statistical Physics from an Analytic, Numerical and Experimental Perspective (109274)

Efthimios Kaxiras
Camille Gomez-Laberge
Anna Klales

2021 Spring (4 Credits)  Schedule: MWF 0900 AM - 1015 AM
Instructor Permissions: None  Enrollment Cap: n/a

This is the first term of a two-semester course sequence of introductory physical science and engineering. The focus is on quantitative scientific reasoning, with the first term exploring Newtonian mechanics. Topics include kinematics, linear and rotational motion, forces, energy, momentum, collisions, gravitation, oscillations, waves, and a brief introduction to statistical physics. Examples are drawn from across the physical sciences and engineering.

Students will gain competence in both analytic (using pencil, paper, and single-variable calculus) and numerical methods (using the Python programming language) to model simple physical systems and to analyze experimental data. Students with no computing background are strongly encouraged to take Applied Mathematics 10 in the Fall Term prior to taking this course.
The course is aimed at first year students who have an interest in pursuing a concentration in the sciences or engineering. The course includes lecture, laboratory, and discussion components.

Course Notes: Physical Sciences 12a may not be taken for credit by students who have passed Physics 15a or 16.

Recommended Prep: Applied Mathematics 10

Physical Sciences 12B

Electromagnetism and Quantum Physics from an Analytic, Numerical and Experimental Perspective (109457)

Susanne Yelin
Camille Gomez-Laberge

2020 Fall (4 Credits) Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

This is the second term of a two-semester course sequence of introductory physical science and engineering. The focus is on quantitative scientific reasoning, with the second term exploring classical electricity and magnetism. Topics include electrostatics and magnetostatics, analog circuits, electromagnetic fields, optics, and a brief introduction to quantum physics and its applications. Examples are drawn from across the physical sciences and engineering.

The course assumes familiarity with mechanics, statistical physics, and computational techniques covered in Physical Sciences 12a offered during Spring Term (see course description). Students will further develop competence in both analytic (using pencil, paper, and multi-variable calculus) and numerical methods (using the Python programming language) to model simple physical systems and to analyze experimental data.

The course is aimed at second year students who have an interest in pursuing a concentration in the sciences or engineering. The course includes lecture, laboratory, and discussion components.

Course Notes: May not be taken for credit by students who have passed Physics 15b or Physics 15c.

Class Notes: Physical Sciences 12b will follow a flexible live lecture model - lectures will be held at times shown, but attendance is not mandatory, and lectures will be recorded. Students have to attend mandatory laboratory sections and are expected to participate in sections / homework sessions led by Teaching Fellows. Labs and sections will be scheduled once we know in which time zones our students live. Please see syllabus cover page on Canvas for more details.

Recommended Prep: Physical Sciences 12a, Applied Mathematics 10

Physical Sciences  70

Introduction to Digital Fabrication (215717)

Nathan Melenbrink

2021 Spring (4 Credits)  

Schedule:  
TR 0300 PM - 0415 PM  

Instructor Permissions: Instructor  
Enrollment Cap: 15

A hands-on introduction to rapid prototyping, integrating physics and engineering, design, computer science and art. Students will learn to safely use software and hardware to fabricate programmable projects. Tools and topics will include electronic circuit design, 3D CAD, programmable microcontrollers, and wireless networking (Internet of Things). Additionally, students will learn operational principles for techniques such as laser cutting, 3D printing, and computer-controlled milling. Students will work with course staff to prepare their design files and remotely operate machines, after which the fabricated components will be mailed to them. Applications may include personal fabrication, product prototyping, fine arts and the creation of scientific research tools. The course will culminate with an individual final project, integrating as many of the weekly topics as possible. Each student will document work on each weekly topic in a personal website, thereby finishing the course with an online portfolio that not only illustrates their new skill sets, but also contributes to a collective repository of knowledge that serves as a foundation for continued learning.

Course website: https://tinyurl.com/tasr7b6

Related Sections: In addition to class times, the course staff will be available for lab sections scheduled throughout the week. Students are required to attend at least one lab section per week to check in with course staff on their progress, and are otherwise free to attend as many additional sections as they like.

Course Notes:  
Attendance is mandatory since safety training will occur during class times. Class will meet twice each week. The first meeting will consist of a brief discussion of the previous week’s assignment in Breakout Rooms, followed by a short introduction to the current week’s topic and assignment. The second meeting may include a short lecture but will primarily focus on a hands-on training session for the accompanying assignment. Meetings may also include appearances by guest presenters or experts on a particular topic.

Recommended Prep:  
There are no formal prerequisites for this course. Students are expected to provide their own laptop computer (tablets and Chromebooks are not sufficient for some of the software required for this course, but workarounds may be available -- please contact course staff with concerns). This course is accessible to those with no prior experience. For students already familiar with some of the topics, it will be an opportunity to explore further.

Population Health Sciences 2000A
Quantitative Research Methods in Population Health Sciences I (203329)

Jarvis Chen
Michael Hughes

2020 Fall (4 Credits) Schedule: TR 1130 AM - 0100 PM
Instructor Permissions: Instructor Enrollment Cap: 50
This is part one of a two part core year-long quantitative methods course for the Population Health Science PhD students at the School of Public Health. The course integrates methods and concepts from the various disciplines represented by Population Health Sciences to equip students with the methodological tools to conduct their own research as well as collaborate across fields of study and areas of specialization. PHS2000A covers foundational statistical methods including linear and logistic regression, generalized linear models, survival analysis, longitudinal data analysis, and multilevel modeling. Discussion will be given to important concepts including sampling, measurement, model specification, interpretation, estimation, and diagnostics. Coursework will consist of two weekly lectures and a weekly lab session, problem sets, and exams. R is the main statistical computing software that will be used in the course.

Course Notes: This course is reserved for first-year PhD students in Population Health Sciences. Population Health Sciences PhD students are required to register for both semesters of this course and to achieve a final average grade of B or higher.

Requirements: Requisite: Course open to First Year GSAS (G1) Students Only

Population Health Sciences 2000B
Quantitative Research Methods in Population Health Sciences II (203330)

Tyler VanderWeele
Jarvis Chen
David Canning

2021 Spring (4 Credits)  Schedule:  TR 1130 AM - 0100 PM
Instructor Permissions:  Instructor  Enrollment Cap:  50

This is part two of a two part core year-long quantitative methods course for the Population Health Science PhD students at the School of Public Health. The course integrates methods and concepts from the various disciplines represented by Population Health Sciences to equip students with the methodological tools to conduct their own research as well as collaborate across fields of study and areas of specialization. Part two of the course focuses on scientific inference and causal reasoning in the population health sciences and will provide an overview of methods for sensitivity analysis, interaction, mediation, propensity scores, time-varying exposures, measurement and correction for measurement error, instrumental variables, regression discontinuity designs, difference-in-difference methods, time series, missing data, multiple testing, replication, and meta-analysis. Emphasis will be placed on understanding the basic definitions, assumptions, and methodology. Students will be referred to further readings and courses to gain more detailed understanding. Coursework will consist of two weekly lectures and a weekly lab session, problem sets, and exams. Various software resources will be used throughout the course, with R being the main statistical computing platform used. The course will prepare students to critically read through the empirical population health science literature, and to implement a number of different methods in their own research.

Course Notes: This course is reserved for first-year PhD students in Population Health Sciences. Population Health Sciences PhD students are required to register for both semesters of this course and to achieve a final average grade of B or higher.

Requirements: Requisite: Course open to First Year GSAS (G1) Students Only

Psychology
Subject: Psychology

Psychology 1
Introduction to Psychological Science (123941)

Daniel Gilbert
2020 Fall (4 Credits)
Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None
Enrollment Cap: n/a

An introduction to the scientific study of human psychology, covering topics such as neuroscience, perception, learning, memory, emotion, decision-making, consciousness, sleep, cognitive development, psychopathology, language, mating, violence, cooperation, altruism, stereotyping, and prejudice. This course has been entirely re-designed for 2020 to optimize online learning. Students will watch pre-recorded lectures off-line. During the twice-weekly on-line sessions, students will interact with the professor, the teaching fellows, and a weekly celebrity guest.

Requirements: Anti-Req: Cannot be taken for credit if SLS 20 already complete.

Psychology 1
Introduction to Psychological Science (123941)

Steven Pinker
2021 Spring (4 Credits)
Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None
Enrollment Cap: n/a

Surveys the scientific study of human psychology. Introduces students to topics such as perception, consciousness, development, cognition, emotion, motivation, psychopathology, decision making, and social behavior. The course has been redesigned for 2021 to optimize online learning. Students will watch recorded lectures offline, and will interact with the professor twice a week to ask questions and explore controversies.

Requirements: Anti-Req: Cannot be taken for credit if SLS 20 already complete.

Psychology 14
Cognitive Neuroscience (126551)
Daniel Schacter
Elizabeth Phelps
2020 Fall (4 Credits) Schedule: MW 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a

How do our brains give rise to our minds? Specifically, how are mental processes related to neural activity? This course will explore these questions, as well as the methods by which cognitive neuroscience seeks to answer them. We will focus on processes within perception, attention, memory, language, action, emotion, and social cognition, and methods including neuroimaging, neuropsychology, and electrophysiology.

Course Notes: This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1

Psychology 15
Social Psychology (114178)
Fiery Cushman
2021 Spring (4 Credits) Schedule: MW 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a

An introduction to social psychological research and theory regarding everyday behavior, incorporating methods from the life sciences (neuroscience, genetics, evolutionary biology). Topics include: attitudes and social influence; obedience to authority; stereotyping, prejudice, and intergroup relations; emotion; interpersonal attraction; morality and prosocial behavior; and errors of everyday human judgment

Course Notes: This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB=7 or Psyc S-1) before enrolling in this course for all freshmen and sophomores and for all students completing a concentration or secondary field in psychology.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1
Psychology 16
Developmental Psychology (110776)
Jesse Snedeker
2021 Spring (4 Credits)  Schedule:  MW 1200 PM - 0115 PM
Instructor Permissions:  None   Enrollment Cap:  n/a
An introduction to theories and findings in developmental psychology. The course will cover brain development, perception, language, the origins of individual differences, theory of mind autism, moral development, emotion and understanding emotion, friendship, parenting and cross-cultural variation.

Course Notes:  This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep:  The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB = 7) before enrolling in this course; or permission of instructor. Not open to students who have taken SciLivSys 15.

Requirements:  SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1. Cannot be taken for credit if SCILIVSY 15 (SLS 15) already complete

Psychology 18
Abnormal Psychology (123973)
Joshua Buckholtz
2020 Fall (4 Credits)  Schedule:  MW 0600 PM - 0715 PM
Instructor Permissions:  None   Enrollment Cap:  n/a
Introduction to the study of psychological dysfunction. Focuses on abnormal behavior as it relates to the definition, etiology, and treatment of major symptom domains. This course will emphasize critical evaluation of the causes and mechanisms of mental illness, with special attention paid to recent neuroscientific and genetic research on the neurobiology of psychopathology.

Course Notes:  This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep:  The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB = 7) before enrolling in this course; or permission of instructor. Not open to students who have taken SciLivSys 15.

Psychology 971

Contemporary Issues in Psychology: Intensive Cross-level Analyses (113094)

Jill Hooley
Katherine Powers

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: n/a

Examines selected issues and phenomena in contemporary psychological research. Special attention to examining topics from a variety of perspectives, to reading primary sources in the field, and to developing thinking, writing, research, and discussion skills. This tutorial, or Psychology 975, is required of concentrators upon entering the concentration, normally in the sophomore year. Letter graded.

Course Notes: Students may take this course before formally declaring Psychology as their concentration. PSY 971 and PSY 975 are interchangeable for Psychology requirements.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1

Habits and Habit Change (212741)

*Jill Hooley*

*Katherine Powers*

2020 Fall (4 Credits) **Schedule:** R 1200 PM - 0200 PM

**Instructor Permissions:** Instructor **Enrollment Cap:** 16

This course will examine habits, habit formation, and habit change at several levels of analysis, including the biological (neurobiological and endocrine), psychological (emotional, cognitive, and behavioral), and socio-cultural levels. We will examine several different models of how habits are formed and look at different approaches for behavioral change that can either moderate or overwrite old habits and replace them with either more adaptive habits or with more mindful, less automatic (habitual) behavior.

**Class Notes:** The instructor is Shelley Carson, shcarson@live.com

**Recommended Prep:** The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

**Psychology 980AC**

Mood Disorders (212742)

*Jill Hooley*
Most of us feel sad or down from time to time, yet some of us experience clinical depression that can last months or years. Why are some people more vulnerable to developing depression than others? This course will draw on classic and cutting-edge empirical research to examine the etiology, symptom presentation, course, and treatment of mood disorders including depression, bipolar and related disorders.

Course Notes: Students who have taken PSY 1855/PSY 980JK Mood Disorders cannot enroll in this course.

Class Notes: The instructor is Stephanie Roberts, drstephanieroberts@gmail.com

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Psychology 980AD

Psychopathology and the Family (212743)

Jill Hooley
Katherine Powers

In this course, we will explore how the family impacts psychopathology, including relapse, recovery, and resilience, for a member with a mental disorder. We will examine the relationship between the family and mental health conditions like anxiety, autism, depression, personality disorders, and schizophrenia from a life course and a family systems perspective. We will also examine these relationships by discussing the biopsychosocial features of the family that impact child and adolescent psychopathology. The course will focus on contemporary approaches to family life (e.g., dual-earner families, gender equality, LGBTQ+ families, etc.), and the role these approaches play in family functioning. The course will also examine the impact the current COVID-19 pandemic is having on family systems, as well as the increased need for telehealth services.

Class Notes: The instructor is John Knutsen, john_knutsen@g.harvard.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and and one of PSY
Psychology 980AE

Intergroup Conflict (212744)

Jill Hooley
Katherine Powers

2021 Spring (4 Credits) Schedule: T 0600 PM - 0800 PM

Instructor Permissions: Instructor Enrollment Cap: 16

This course will review the psychological theories and research regarding intergroup conflict, ranging from the thought processes that contribute to prejudice and discrimination, to interpersonal processes that occur within a group to encourage conflict with other groups, to behavioral manifestations of bias and prejudice. Students will read original research on concepts such as implicit bias, obedience, and conformity and apply these concepts to real-world conflicts, including those centered on sex, race, ethnicity, religion, and sexual orientation. While social psychological theories are the focus of this course, implications for clinical, forensic, organizational, political, and peace psychology will be explored. Students will be encouraged to consider how the research can be applied to reduce intergroup conflict.

Course Notes: The instructor is Lindsey Davis, Lindsey_Davis@williamjames.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology 980AH

Psychology of Cults (214498)

Jill Hooley
Katherine Powers

2021 Spring (4 Credits) Schedule: F 0300 PM - 0500 PM

HARVARD UNIVERSITY Page 3016 of 3771 12/26/2020 0:22 AM
In November of 1978, 909 members of The People’s Temple perished in Jonestown, Guyana after drinking Kool Aid laced with cyanide. David Berg of the Children of God convinced his followers to abandon their monogamous marriages, encourage pedophilia, and allow their children to be sex trafficked. How do certain groups convince people to harm and even kill themselves and their children? This course will explore the psychological mechanisms that enable cults to form and to take human belief and behavior to such extremes. What do cults share with other groups (mainstream religions, nations, everyday social interactions, etc.), and what makes them stand apart? In what ways are cults an environment in which many of our psychological tendencies (toward ingroup conformity, heuristic decision making, rationalization, etc.) are magnified? And what do cults reveal about the profound power of our social environment? We will examine case studies through the lens of empirical psychological science to uncover how psychological research can shed light on cult behavior, and how cult behavior can shed light on our everyday psychology.

Course Notes: The instructor is Bethany Burum, bethanyburum@gmail.com.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or PSY 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB=7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology 980JL

Clinical Psychology in Everyday Life (110203)

Jill Hooley
Katherine Powers

2020 Fall (4 Credits) Schedule: M 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 16

The goal of this course is to give you exposure to the types of evidence-based psychological interventions available for many clinical and non-clinical conditions, such as sadness, anxiety, substance use, and arguments with your significant other, with an emphasis this year on taking effective action in times of stress. Through this seminar, you will learn to notice and apply principles of psychological intervention to the world around you, not only in theory but also in practice. The seminar is not a self-help program or a training program for providing therapeutic services to others. Instead, the weekly discussions, exercises, and assignments will help you view the world through the lens of a scientist-practitioner – and apply those insights to everyday life in a scientific manner.

Course Notes: This is the same course as PSY 1852 Clinical Psychology in Everyday Life, which has been offered previously. Students who have taken 1852 cannot enroll in this course.
Understanding Autism (207681)

Jill Hooley
Katherine Powers

2021 Spring (4 Credits)          Schedule: W 0945 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 16

One in 50 children is currently diagnosed with autism spectrum disorder (ASD), yet we still do not know what causes it, or how best to treat it. This course provides students with a broad, interdisciplinary exploration of ASD from infancy through adulthood. We explore three major themes: 1) the psychological and neurological drivers of ASD, including deficits in social cognition, executive function and perception; 2) the epidemiology and clinical practice of ASD, including diagnosis and treatment modalities, and individual and sex/gender differences; and 3) the personal and societal impact of ASD, including discussion of quality of life, neurodiversity, policy and advocacy.

Course Notes: The instructor is John Knutsen, john_knutsen@g.harvard.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Social psychology has documented many surprising features of the human mind, providing robust evidence that people deceive themselves, are systematically overconfident, believe implausible things to avoid inconsistency, and so on. Explanations often focus on proximate psychological mechanisms (e.g., we avoid inconsistency because we find it uncomfortable). But behind every proximate mechanism is an ultimate explanation (why is inconsistency uncomfortable?)—why did evolution or learning lead us to be this way? This course will examine proximate and ultimate explanations for classic social psychological phenomena and the insight that ultimate level explanations add, with a focus on how to test ultimate explanations convincingly.

Course Notes: This is the same course as PSY 1576 But Why? Ultimate Explanations for the Quirks of the Mind, which has been offered previously. Students who have taken 1576 cannot enroll in this course.

Class Notes: The instructor is Bethany Burum, bethanyburum@gmail.com.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or PSY 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

How Hidden Incentives Shape the Mind: The Origins of Our Beliefs and Ideologies (207824)

Jill Hooley
Katherine Powers

2021 Spring (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 16

Why do our ideologies change when we are put in positions of power (e.g., victim dehumanization), or subordination (e.g., Stockholm Syndrome), or with peers with a different opinion (e.g., conformity)? Why are our moral and political ideologies so different across time and culture (e.g., the ideologies of ISIS members compared to Americans)? Why do we claim that our morals are logically justifiable when we cannot justify them (e.g., moral dumbfounding)? This course will explore the hidden incentives that can explain these and many other puzzling features of our beliefs and ideologies. Evidence from psychology, as well as philosophy, economics, history, and current events (including the election cycle), will demonstrate the crucial way that incentives outside of our awareness shape our beliefs and ideologies.

Course Notes: The instructor is Bethany Burum, bethanyburum@gmail.com.

This is the same course as PSY 1575 How Hidden Incentives Shape the Mind: The Origins of Our Beliefs and Ideologies, which has been offered previously. Students who have taken 1575 cannot enroll in this course.

Psychological Resilience (217606)

Jill Hooley
Katherine Powers

2021 Spring (4 Credits)  
Schedule:  
W 0300 PM - 0500 PM

Instructor Permissions:  
Instructor
Enrollment Cap:  
16

This course examines the field of resilience research, paying close attention to evidence-based cognitive, emotional, interpersonal, and self-care skills that have been demonstrated to reduce risk of major psychological disorders, and promote psychological growth, in the face of adversity. We will examine resilience from different levels of analysis, including biological, psychological, and social levels. We will use two different approaches in our examinations: first, we will examine empirical research; second, we will employ the case study approach to learn from the lives of history's most resilient individuals. Some of the topics we will cover include personality and cognitive variables that promote resilience, coping styles, the role of family and social networks in resilience, brain mechanisms, gender differences, and resilience in families, organizations, and communities. We will conclude the course with an evidence-based resiliency toolkit of trainable skills to enhance resilience.

Course Notes:  
The instructor is Shelley Carson, shcarson@live.com.

Recommended Prep:  
The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

The goal of this course is to provide a comprehensive overview of DSM-5 feeding and eating disorders (EDs) with a primary focus on anorexia nervosa, bulimia nervosa, and binge eating disorder. We will explore the etiology (i.e., biological and environmental factors), symptom presentation, and empirically supported treatments across these EDs. Additional topics will include cultural considerations, gender and EDs, medical complications, impact of media/social media, and novel directions and treatments for these disorders.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18, PSY 1861 or Psyc S-1240 before enrolling in this course; or permission of instructor.

Psychology 1005
Health: A Positive Psychology Perspective (126556)
Ellen Langer
2020 Fall (4 Credits)  
Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None  
Enrollment Cap: n/a
Why does it seem that some people are so resilient and content? This course looks at psychological and physical health from the perspective of Positive Psychology. The major focus will be on mindfulness theory and its relationship to stress/coping; illness/wellness; decision-making; and placebos. The medical model, the biosocial model, and a unified mind-body model will be compared to examine their role in becoming mindful and thus healthier, happier and less stressed.

Recommended Prep: The Psychology Department requires completion of Science of Living...
Psychology 1009

Psychology of Women (110216)

Nicole Noll

2021 Spring (4 Credits)

Schedule: TR 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 16

How does being a woman affect our behavior, our evaluations of ourselves, and our interactions with others? This course examines psychological science on women and girls in western industrialized societies, addressing such topics as gender stereotypes, girlhood, women and work, relationships, pregnancy and motherhood, mental health, violence against women, and women in later adulthood. We will consider these topics through an understanding of gender as a social construction, being mindful of the intersections of gender, sexuality, class, and race. Although focused on women's lives and experiences, this course is highly relevant to people of all genders.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology of Music (213334)

Natasha Parikh

2020 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 40
Why do we turn to Adele when sad? Play classical music to help focus? Go sing karaoke on a night out with friends? Music has the ability to influence our emotions, spark creativity, and influence relationships with people around us. But what makes music so universal? In this course, we will examine how listening to music, playing an instrument, and composing new music affect and are affected by a person's psychology. We will cover topics such as what makes music sounds happy vs. sad, how music can be used for therapy, and whether animals can actually dance along to music, through the lens of psychological science.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology of Sleep (216078)

Garth Coombs

2020 Fall (4 Credits) Schedule: R 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 20

Sleep is arguably one of the most evolutionarily conserved behaviors across the animal kingdom. The average human will spend one third of their life sleeping (not to mention an average of 7 years spent in bed just trying to get to sleep). We all sleep, but what exactly is sleep and why do we spend so much time asleep? What happens when we don’t get enough sleep? What factors influence quality of sleep? Scientific evidence increasingly indicates the importance of sleep for cognitive performance and physical and mental health, and points to disrupted sleep as both a cause and consequence of mental illness. This course will delve into these scientific findings to address the "what" and "why" of sleep by drawing on key advances from psychological and neuroscientific perspectives.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1016
Quarantine blues? Pandemic Life and Mental Health (216791)

Rebecca Shingleton
Natasha Parikh

2021 Spring (4 Credits) Schedule: MW 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 40

The COVID-19 pandemic has hit our world in unprecedented and unexpected ways. In this course, we will study the impact of COVID-19 on mental health and well-being through a clinical, social, and neuroscience lens. We will explore how pandemics affect our thoughts, behaviors, emotions, and physiology as well as discuss evidence-based tools for coping. Additionally, we will look at different stressors (e.g., work from home challenges, social isolation) and how their impact may vary across groups (e.g., health care workers, racial/ethnic groups, SES groups).

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1017
Nature can nurture: Fostering an ecological worldview (217526)

Jacob Rode

2021 Spring (4 Credits) Schedule: R 0600 PM - 0800 PM
Instructor Permissions: Instructor Enrollment Cap: 18

Ever wonder why taking a walk on the beach, or in a park, or through trees, makes you feel restored and renewed? Does a short trip outside improve your mood? Although popular media encourages people to get outside and explore nature, it is unclear how many of these claims about nature are actually backed by research. Students taking this course will review research on these topics through the lens of conservation psychology, a field that focuses on the relationship between humans and nature and applies traditional psychological principles to issues of environmental degradation. Students will explore the history of conservation psychology as well as its various subfields and current approaches within the field. Additionally, students will apply principles of conservation psychology to their everyday lives and engage with emerging research in the field to find ways of improving and pushing the field forward. From recycling to energy efficiency to habitat preservation, conservation will be a key theme in this course. As climate change continues to threaten ecological health, we will explore how to leverage psychological insights to enrich the human-nature relationship.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before

Psychology 1025

Masterclass on Mindfulness (216436)

Ellen Langer

2020 Fall (4 Credits) Schedule: W 0900 AM - 1100 AM

Instructor Permissions: Instructor Enrollment Cap: 5

After taking a deep dive into what we already know about mindfulness without meditation, we'll explore student generated topics of interest that might include areas like sports, leadership, relationship success, best approaches to learning, innovation, ways to extend our senses, nonmedical healing, etc. No matter what we are doing, we are doing it mindfully or mindlessly. Thus the potential range of topics to be considered is great. Inspired by the Oxford tutorial system, enrollment for this special seminar will be limited to five students.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1201

Your Brain on Drugs: Psychopharmacology (122224)

Scott Lukas

2020 Fall (4 Credits) Schedule: MW 0430 PM - 0545 PM

Instructor Permissions: None Enrollment Cap: n/a

An introduction to how drugs affect mood, sensation, consciousness, and other psychological and behavioral functions in both healthy and disease states. Introduces concepts in neuroscience and pharmacology to understand how drugs are used to treat drug abuse, psychiatric disorders and why individuals use recreational drugs. Covers all CNS drugs, including antidepressants, antipsychotics, alcohol, and both licit and illicit drugs of abuse. Debates controversial topics such as research with psychiatric populations, diagnosing ADHD, teenage suicide, marijuana legalization, and needle exchange programs.
Psychology 1304
Brain Damage as a Window into the Mind: Cognitive Neuropsychology (116622)

Alfonso Caramazza
2020 Fall (4 Credits) Schedule: T 1200 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

Examines the patterns of perceptual, motor, cognitive, and linguistic impairments resulting from brain damage. The focus is on the implications of the various types of neuropsychological deficits (such as visual neglect, dyslexia, and aphasia) for theories of the mind and the functional organization of the brain.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB=7 or Psyc S-1) and at least one foundational course from PSY 14, MCB 80, or MCB 81 before enrolling in this course; or permission of instructor.

Psychology 1305
Evolutionary Psychology (156054)

Max Krasnow
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

Why are humans the way we are? What explains why we get angry, who we find attractive, and why we think the way we do? How are we different than other species, how are we the same, and why? In this
course, students will master the foundational logic of evolutionary psychology and come away able to answer these questions and more. We will cover topics across the range of human experience including: cooperation, mating, friendship, aggression, warfare, collective action, kinship, parenting, social learning, dietary choice, spatial cognition, reasoning, emotions, morality, personality and individual differences, and culture. We will close by considering how our new understanding of human nature can help us solve problems in our world (for example, how understanding human coalitional psychology offers solutions to modern day political polarization).

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1309

Essentials of fMRI for Cognitive Neuroscientists (207573)

Talia Konkle

2020 Fall (4 Credits)  
Schedule: W 0300 PM - 0530 PM

Instructor Permissions: None  
Enrollment Cap: n/a

With functional magnetic resonance imaging (fMRI), we can now see into the human brain and map activity across different regions. If you are using fMRI in your research, or think you may want to in the future, this course will cover the critical aspects of neuroimaging with the goal of making you an informed practitioner. In the first part of the course, we will cover content including signal acquisition, experimental protocol design and power, and the general linear modeling framework for data analysis. In the second part of the course, we will survey the recent advances in fMRI data analysis, e.g. multivariate analyses, voxel-wise encoding models, functional connectivity analyses. Depending on your level of experience, you will complete a project that employs one of these techniques, either on your own dataset, or from datasets available online.

Course Notes: This course is intended for both advanced undergraduates and graduate students.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, MCB/NEURO 80, or MCB 81 before enrolling in this course; or permission of instructor.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or MCB80 or NEURO80 or MCB81

Psychology 1311

Precision Cognitive Neuroscience: Opportunities Afforded by Deep, Intensive Study Within Individuals (217604)

Randy Buckner

2021 Spring (4 Credits) Schedule: M 0345 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 20

What are the opportunities afforded by doing experimental work fully within an individual rather than the more traditional approach of seeking central tendencies in groups? The field of cognitive neuroscience, like many others, confronts a tension between questions and experimental approaches that seek to generalize across individuals versus those that seek to describe detailed characterization within the individual. In this seminar historical perspectives and recent technological advances will be surveyed to showcase the opportunities, limitations, and unmet challenges of precision exploration within the individual. Discussions will begin from a historical perspective, then survey examples where breakthroughs were made from case studies (neuropsychology) and small N samples (neurophysiology), and then progress into approaches that allow precision neuroscientific exploration (including intensive repeat scanning as in the MyConnectome project) and dynamic behavioral phenotyping using wearables and new remote testing technologies. Challenges including how to frame hypotheses, considerations of the goals toward generalization, and discussion of new statistical approaches will be included in the readings. At the end of this seminar students will achieve practical knowledge of how within-individual experimental designs can complement the more commonly implemented group-based studies and ways to think about combining the strengths of both approaches.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1315

Special Seminar: Sex, Gender & Evolution (216435)

Max Krasnow

2020 Fall (4 Credits) Schedule: M 0900 AM - 1100 AM
Instructor Permissions: Instructor Enrollment Cap: 5

Why did so many species evolve to have two sexes? Why is sex dichotomous in our gametes, but continuous in our bodies and behavior? Did we evolve to have a sense of our own gender identity, and if
so, why? In this special seminar we will take a deep dive into these questions and more. We will meet weekly for small group discussion. After mastering the foundational material, students will collaboratively decide the direction the course takes, bringing in their outside interests and expertise. Inspired by the Oxford tutorial system, enrollment for this course will be limited to five students.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

**Psychology 1322**

Tomer Ullman

2021 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Life is full of decisions, but not all decisions are made equal. Choices can be big and consequential (should I focus on my success, family, or passion), or small and everyday (going out, or staying in). This course will introduce you to the cognitive science of judging and choosing. You will learn about 1) Rational planning, the kind a perfect intelligence might carry out 2) Common simplifications and shortcuts that non-perfect humans use, and how these may actually be appealing approximations for any decision-making system 3) Regret over choices taken and not taken 4) Making decisions with others 5) Transformative decisions, the ones that change who you are as a person. As we cover these topics, we will consider how to apply the insights from the psychology of decision making to your own ordinary and extraordinary choices.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

Emotions color our lives, and even everyday variation in emotional experience can influence how we think, perceive and decide. Many of our emotions stem from our experiences with others. In this seminar we will examine the science behind the influence of emotion and social interaction on human brain function and behavior. We will examine questions such as: How does the brain process threats, and how do we learn about potential threats from others? How, and why, do our memories for emotional events differ from memories for mundane events? How does the brain process rewards, and respond to social rewards such as trust? What can we learn about implicit social biases from understanding their representation in the brain? What can we learn about the brain systems of human emotion and social interactions from studying other animals? Building on this foundational knowledge, we will explore how advances in human brain science might inform larger societal issues, including legal decisions, clinical interventions for the treatment of anxiety, and racial bias.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1
Psychology 1352
Foundations of Cognitive Neuroscience Research (121887)

Randy Buckner
2020 Fall (4 Credits)  
Schedule: TBD  
Instructor Permissions: Instructor  
Enrollment Cap: 12

Intended for undergraduates or those with limited background in cognitive neuroscience. Students will attend and participate in laboratory research and in a seminar that includes discussion of active scientific projects, recent important journal articles, and didactic lecture on technical aspects of methods central to cognitive neuroscience research. Readings will be assigned that survey basic principles of system neuroscience, cognitive science, and methods including functional MRI, MEG, and single unit physiology.

Course Notes: Limited to students involved in research.

Recommended Prep: Psychology concentrators should have taken SLS 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, Science of Living Systems 15, or MCB 80 before enrolling in this course; or permission of instructor.

Requirements: Pre-Requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18 or SLS15 or MCB80 or NEURO80

Psychology 1401
Computational Cognitive Neuroscience: Building Models of the Brain (160656)

Samuel Gershman
2021 Spring (4 Credits)  
Schedule: WF 0130 PM - 0245 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 48

"What I cannot create, I do not understand." This course applies Richard Feynman's dictum to the brain, by teaching students how to simulate brain function with computer programs. Special emphasis will be placed on how neurobiological mechanisms give rise to cognitive processes like learning, memory, attention, decision-making, and object perception. Students will learn how to understand experimental data through
the lens of computational models, and ultimately how to build their own models.

Course Notes: Anti-Requisite: Cannot be taken for credit if Neuro 1401 already complete.

Class Notes: PSY 1401 is also offered as Neuro 1401. Students may not enroll in both.

Recommended Prep: Students be comfortable with a numerical programming language (e.g., Python, Matlab, R). Psychology concentrators should have taken Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, MCB/NEURO 80 or MCB 81 before enrolling in this course; or permission of instructor.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18 or MCB80 or NEURO80 or MCB81

Anti-requisite: Cannot be taken for credit if NEURO 1401 already completed

Psychology 1406

George Alvarez

2021 Spring (4 Credits) Schedule: R 0300 PM - 0545 PM

Instructor Permissions: None Enrollment Cap: n/a

Someday, perhaps very soon, artificial intelligence will enable machines to perceive the world around us better than humans do. Whether AI systems will do so by emulating human perception, or by becoming supra-human and circumventing biological constraints entirely, is yet unknown. In this course, we will survey research on human and machine perception, with an emphasis on vision: How do humans and machines represent the visual world? What does human vision do that artificial neural networks don't (yet)? How can we understand human perception better by focusing on artificial neural networks, and vice versa? By focusing on this intersection between biological and artificial visual systems, we will learn what makes humans fundamentally unique and special, while simultaneously learning about cutting edge discoveries in both fields.

Class Notes: Discussion section pending course enrollment.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.
Psychology 1454

Neuroscience Fiction: An Introduction to Cutting Edge Neuroscience through the Lens of Film and Tele (156569)

George Alvarez

2020 Fall (4 Credits)

Schedule: R 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Film and television shows often capture the cutting edge of science, and they sometimes even anticipate future scientific advances. We'll use examples from film and television as an introduction to several hot topics in the field of neuroscience, such as Mind Control, Mind Reading, Smart Pills, and Brain Machine Interfaces, which are all getting closer to reality. Will neuroscientists ever be able to control a person's thoughts, or to know what a person is thinking? Can taking a pill really awaken untapped brain power? Will you ever be able to drive a car without touching a steering wheel? In this course, we will cover the state of the art and the future of these exciting areas of neuroscience (and entertainment). Because these are not textbook topics, this is an advanced course that will focus on reading and discussing the primary literature.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14 or MCB/NEURO 80 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

Psychology 1503

Psychology of Close Relationships (107602)

Holly Parker

2021 Spring (4 Credits)

Schedule: W 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap: 150

This course is an in-depth exploration of close relationships. Examples of topics to be covered include the biological bases of attraction; relationship formation; the end of relationships through break-up, divorce, or death; relationship satisfaction; deception; gender roles; same-sex relationships; loneliness; relationships and well-being; and public perceptions about relationships. You will have an opportunity to explore these
topics primarily through critical examination of the empirical literature as well as through popular press.

Class Notes: This course has been entirely re-designed for 2020 to optimize online learning. Students will watch pre-recorded lectures at their convenience, and there will be three weekly, synchronous online sessions (lasting one hour each) to help build a sense of community and explore the world of close relationships. One session will involve section presentations and interaction with a teaching fellow, a second optional meeting will involve a dedicated hour for students to connect with each other and explore what they’re learning about close relationships, and another optional third meeting will involve conversations with the instructor. In addition, the instructor will be available for office hours to connect, explore the field of close relationships, and answer questions.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

**Psychology 1518**

Defectors, Cheaters, and Thieves: Why Cooperation is Hard and Why Humans are Good at It (213254)

Regan Bernhard

2020 Fall (4 Credits) Schedule: T 0345 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 40

On January 2nd, 2007, Wesley Autrey was waiting for the subway in Manhattan with his two young daughters when he saw a man have a seizure and fall onto the subway tracks. As a train approached, Autrey dove onto the tracks, and threw his body over the other man, shielding him from the train as it passed over them. This act of heroism could have cost Autrey his life, leaving his two daughters without a father, and he had nothing to gain from saving the other man. Yet humans from all cultures around the world are willing to pay personal costs to provide benefits for other individuals or for the greater good. In this class we will seek to understand why humans engage in cooperative behavior, covering topics such as altruism, punishment, reputation, and moral emotions. We will do this in two ways: First by learning about the empirical research on the psychology of cooperation, and second, by examining the psychology of cooperation in movies, literature, history, and the news.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.
Psychology 1519

Psychology of Competition and Peak Performance (213353)

Emily Hangen

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 40

Competition is ubiquitous: athletes compete on the sports field, dancers and actors audition for coveted roles, candidates vie for employment or political positions, businesses compete for profit, and students compete for scholarships and program admission. Why do some individuals choke under the pressure of competition, while others thrive? How does having an audience or competitor watching you affect how well you perform? In this course we will elucidate the relation between competition and performance in discussions of social comparison theory, social facilitation, goal adoption, the opposing process model of competition, performance under stress, deliberate practice, how individuals react to failure, and more. You will develop a scientifically-grounded understanding of how competition affects motivation and performance and learn practical, evidence-based tips for how to reach your own peak performance.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

Psychology 1520

Responsibility (215852)

Fiery Cushman

2020 Fall (4 Credits) Schedule: F 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 20

People effortlessly assign responsibility. Who blew the lead in the 4th quarter? Which state cost our candidate the election? Should this cop go to prison because her bullet hit a bystander? Why was this January the warmest of the century? We will study current psychological theories of how people assign
responsibility, why they do it like that, and why it matters. Central topics include moral judgment, causal reasoning and mental state attribution.

Course Notes: Advanced undergrad seminar open to grad students if interested

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from MCB 80, MCB 81, PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology 1521

Political Polarization and Misinformation (216446)

Jacob Rode

2021 Spring (4 Credits) Schedule: M 0645 PM - 0845 PM

Instructor Permissions: Instructor Enrollment Cap: 16

Uncertain times call for trusted facts. How can facts be verified? What happens when scientific information becomes politicized? Are some people especially susceptible to believing fake news? Bringing together perspectives from political psychology, social psychology, moral psychology, and intergroup relations, this course will explore the psychology behind political polarization, especially in relation to facts and the public understanding of scientific information. We will consider the role of individual psychology (e.g., conspiratorial thinking) and group processes (e.g., partisan bias) in delivering and perpetuating the politicization of facts. There will be particular focus on the politicization of facts within current events such as COVID19, climate change, vaccines, and elections. Students will have the opportunity to evaluate and design evidence-based interventions for bridging polarization and combating misinformation.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1525
Psychology for a Sustainable Future (216386)
Jacob Rode
2020 Fall (4 Credits) Schedule: TR 0730 PM - 0845 PM
Instructor Permissions: Instructor Enrollment Cap: 40

The ongoing rise of the average global temperature has led to—and will continue to lead to—more frequent and severe flooding, droughts, habitat loss, and societal impacts such as wars, famine, and clean water scarcity. How did this happen? What can we do? This course focuses on the role that human psychology has played in ecological destruction and, in turn, highlights how psychological science can help solve the global environmental crisis. We will combine research from social, behavioral, and personality psychology to understand the individual and group-level psychological processes that hinder or bolster green behaviors. A central goal of this course is to equip students with the tools and scientific expertise to increase their own sustainable behaviors and to evaluate and promote sustainability efforts in society at large.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Inequality and Intergroup Relations (216447)
Jennifer Perry
2021 Spring (4 Credits) Schedule: M 0945 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 16

What happens in the shift from self-identity to collective identity? In this course we will discuss the psychological processes that affect how thinking in terms of "us and them" gives rise to and perpetuates inequality between certain individuals and groups in our society, with special focus on current events and social movements (e.g., Black Lives Matter). We will take an interdisciplinary approach to studying these topics, drawing from literatures in psychology, sociology, anthropology, and political science. Students will be challenged to design an applied intervention to reduce societal inequity in a relevant domain of interest, such as criminal justice, education, or medicine.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology of Social Connection and Belonging (216434)

Jennifer Perry

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 35

We are living under extraordinary psychological circumstances. As we fumble through Zoom goodbyes, we are constantly reminded that human interaction informs much of how we think, feel, and behave. In this course, we will discuss humans’ fundamental drive to form social connections, ranging from casual interactions, to building and maintaining relationships, to the loss or total absence of social contact. In doing so, we’ll identify factors that can facilitate or challenge the ability to form social connections and will explore parallels and differences in online interactions. This course will incorporate weekly practicum activities rooted in psychological science that encourage students to build strong social connections through direct experience.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

**Psychology 1540**

*Implicit Bias: Science and Society (217787)*

**Mahzarin Banaji**

2021 Spring (4 Credits)  
**Schedule:** M 1200 PM - 0200 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 16

The term implicit bias was coined in 1995 to capture the idea that bias, defined as a deviation from truth or from one’s values can be implicit, or occur without conscious awareness or control. Over time, the term left the confines of academic psychology and entered contemporary culture to bring attention to unintended actions that create disparities in treatment based on social group membership, e.g., age, gender, race, ethnicity, social class, religion, political affiliation, language, nationality and culture. The course will provide an introduction to the science: origins, basic concepts, method (Implicit Association Test, IAT), and prominent results. In parallel, the course will offer the opportunity to explore the societal impact of implicit bias in domains such as employment, healthcare, education, law and law enforcement. Assignments will include contributing short weekly entries that will be re-worked to be of sufficiently high quality to be uploaded to Wikipedia as well as writing two papers that will propose original experiments.

**Recommended Prep:** The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1556R
Research Seminar in Implicit Social Cognition (127489)

Mahzarin Banaji

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

An introduction to research on implicit social cognition, with special focus on attitudes, beliefs, and identity and in some cases its applications to law, business, medicine, and government. Students will be paired with individual researchers to work on ongoing projects that can turn into more independent projects. In addition to weekly work in the laboratory, students are expected to attend biweekly discussion groups focusing on current issues and directions in the laboratory as a whole.

Class Notes: To express interest in enrollment, please email the instructor at mahzarin_banaji@harvard.edu prior to the first class meeting.

Psychology 1556R
Research Seminar in Implicit Social Cognition (127489)

Mahzarin Banaji

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

An introduction to research on implicit social cognition, with special focus on attitudes, beliefs, and identity and in some cases its applications to law, business, medicine, and government. Students will be paired with individual researchers to work on ongoing projects that can turn into more independent projects. In addition to weekly work in the laboratory, students are expected to attend biweekly discussion groups focusing on current issues and directions in the laboratory as a whole.

Class Notes: To express interest in enrollment, please email the instructor at mahzarin_banaji@harvard.edu prior to the first class meeting.

Psychology 1584
Leadership Decision Making (205646)

Jennifer Lerner

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM
Organizational leaders make decisions involving risk and uncertainty every day. Whom should our organization hire? Should we choose the gamble or the sure thing? How should we structure accountability systems? How do we avoid operating out of fear? But a leader’s impact only goes so far unless s/he takes steps to engineer optimal decision environments for the organization as a whole. By gaining an understanding of fundamental mind-brain-behavior relationships in judgment and decision making, you will become better able to design decision environments that make everyone smarter - i.e., less susceptible to common errors and biases. Taking this course will not tell you what to choose but it will give you frameworks that reveal how to choose and how to structure optimal decision environments. Specifically, course topics will include (a) fundamental mental processes in perception, memory and context dependence; (b) how questions affect answers; (c) models of decision making; (d) heuristics and biases; (e) social and group influences; (f) common traps; and (g) debiasing techniques. We will also discuss emotional influences on decision making. The lectures and discussions will be coordinated to complement weekly readings, which draw from psychology, behavioral economics, and neuroscience. Throughout the course, the overarching goals are to: (1) Learn about the academic field of behavioral decision making, its major theories, results, and debates. (2) Become a critical consumer of research findings, learning methodological standards for evaluating the soundness of empirical studies. (3) Develop the ability to effectively write and speak about behavioral science theories, results, and debates. (4) Acquire practical skills for improving your own judgments and decisions. (5) Acquire knowledge of which biases individuals can fix with training/knowledge and which biases individuals cannot fix unless leaders engage in institutional design (e.g., nudges). (6) Develop a capstone project in which you apply the material in a way that will improve professional decision making processes. Possible applications to legal process, government institutions, medical settings, public health, education, finance and other domains abound.

Course Notes: Also offered by the Harvard Kennedy School as MLD 301. Doctoral students will have customized assignments and an additional meeting time in order to receive credit.

Recommended Prep: For undergraduates, the Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.
punished. What explains this discrepancy? In this course we will explore the science of social development focusing specifically on what aspects of social cognition might be innate and which likely develop through childhood. Topics include the development of fairness, morality, theory of mind, empathy, cooperation and punishment, and harm aversion.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Driven to Succeed: Understanding Student Motivation (213354)

Emily Hangen

2020 Fall (4 Credits) Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 16

What motivates people to give their best efforts? Are you driven by awards, curiosity, challenges? Is all motivation created equal or do some types of motivation lead to burnout while others fuel long-term success? To understand the complexities of human motivation, we will discuss a variety of motivation frameworks such as self-determination theory, expectancy-value theory, and achievement goal adoption. This course will focus on student motivation in particular, but motivational principles discussed are broadly applicable. We will also consider how emotions, grit, relationships with others, and stress affect motivation. With an understanding of what affects motivation, students will explore practical implications by evaluating motivation interventions and by formulating individualized motivational plans.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1591
The Power of Others: Social Influence and Persuasion (213355)

Emily Hangen

2021 Spring (4 Credits)  Schedule:  TR 0300 PM - 0500 PM

Instructor Permissions:  Instructor  Enrollment Cap:  20

This is an intensive, half-term seminar that runs during the first 7 weeks of the semester (from Jan. 25-Mar. 12). How does social psychological research contribute to our understanding of courtroom decisions, shopping habits, and guide effective leadership? What are the key ingredients of effective persuasion? This intensive, half term seminar explores the powerful impact other people have on our thoughts, attitudes, and behaviors. Students will gain familiarity with a breadth of scientific findings on influence such as framing, reciprocity, social proof, and commitment. Students will create a podcast utilizing or describing how to apply two of these techniques as their capstone assessment. In addition to developing a deeper understanding of the science of persuasion, students will use this empirical basis to deliberate on how to leverage and resist social influences in their everyday lives.

Course Notes:  This is a full credit, half term course.

Recommended Prep:  The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

What Infants Know, How Children Learn (125979)

Elizabeth Spelke
2021 Spring (4 Credits)
Instructor Permissions: Instructor
Enrollment Cap: 16

Schedule: W 0300 PM - 0545 PM

Despite recent advances in computer science and machine learning, human infants remain the most prodigious learners on the planet. This seminar considers the origins and nature of human cognitive development in four broad domains: knowledge of objects and their physical relationships, knowledge of people and social relationships, knowledge of geometry and the larger spatial layout, and knowledge of numbers and mathematics. We will discuss how these foundational cognitive building blocks support humans' ability to explain, understand, and generalize, skills that are critical for successfully navigating our surroundings. Understanding these core psychological competencies has become essential to progress in many areas of society, including efforts to improve education, to create digital "cognitive assistants" who help us navigate, plan, and remember things, and to develop human-like artificial intelligence. Building on findings from basic research, we will consider how each of these efforts can be advanced.
Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1

Special Seminar: Clinical Psychological Science (216440)

Matthew Nock

2020 Fall (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 5

In this course we will study foundational questions in clinical psychological science, such as: What is mental illness? How does it develop and change over time? How is it best treated and how do our most effective treatments actually work? What can be learned from basic and applied research and what are the limitations of each? After covering key readings on these and related topics, the direction of the course will be driven by student interests and input. Inspired by the Oxford tutorial system, enrollment for this course will be limited to five students.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18
or PSY 1861 before enrolling in this course; or permission of instructor.

Psychology 1845
Stigma, Discrimination, and Health (216272)

Mark Hatzenbuehler
2021 Spring (4 Credits)
Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None
Enrollment Cap: n/a

What is stigma? How do stigmatized identities and conditions differ from each other? Why do we stigmatize? What are the consequences of stigma for cognitions and emotions, for social relationships, and for health? Through what mechanisms—individual, interpersonal, and structural—does stigma operate to produce adverse health outcomes? How do stigmatized individuals cope with and resist stigma? How can we reduce stigma and its negative effects? In this course we will consider stigma as a fundamental cause of health inequalities across a broad range of phenomena, including (but not limited to) mental illness, sexual and gender diversity, weight, disability, aging, poverty, and immigration status. Students can expect to examine stigma as a predicament that affects nearly all individuals at some point in the life course, and to develop expertise in an individual stigma that is relevant to their personal, academic, and professional interests through a series of focused course assignments.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Psychology 1857
Psychotherapy: Science and Practice (160646)

John Weisz
2020 Fall (4 Credits)
Schedule: T 1200 PM - 0200 PM
Instructor Permissions: Instructor
Enrollment Cap: 15
Would you pay someone to help you change? Millions of people do, every week. Psychotherapy is a healing art, a subject of scientific inquiry, and—for many—a business venture. In this course we will bring these strands together, focusing on how psychotherapy is practiced in the real world and how clinical science is used to test claims of success. We will examine competing models of therapy, evaluate their scientific status, and dig into case examples of each. We will also explore hot topics in the field, including whether all therapies have about the same effect (the "dodo bird" hypothesis), whether internet-based therapies actually work, and how to get effective therapies to traumatized people in war-ravaged and low-resource countries.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course.

Methods of Behavioral Research (127078)

Regan Bernhard  
Mina Cikara

2021 Spring (4 Credits)  
Schedule: M 0300 PM - 0415 PM

Instructor Permissions: None  
Enrollment Cap: n/a

This is a lecture, discussion, and laboratory course. Our goal is for you to master the essentials of behavioral experimentation through a succession of projects, starting with a small number of fundamental paradigms that can be used in many areas of psychology, culminating with a larger final project. Emphasis will be on understanding causal inference and acquiring practical laboratory skills and more abstract conceptual tools. Basic aspects of data exploration and analysis will be covered. A high value will be placed on discussion participation and the communication of results through effective visual graphics in oral and written reports. Note that lectures will be pre-recorded, class discussion will take place during the time listed above, and lab time slots (TBD) will be selected to accommodate as many students as possible.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB=7 or Psyc S-1) before enrolling in this course.

16

Modern psychology labs look similar to tech offices and startups, filled with researchers sitting behind computers writing code. In this course, we will cover fundamental coding practices and computational tools used frequently in psychology research. We will go over the basics of coding, how to run experiments in PsychoPy (Python), how to keep a digital lab notebook, univariate data analyses in R and/or Python, and how to make graphs in R with ggplot. Through this process, students will have the opportunity to develop and run a simple experiment from start to finish. This course is ideal for students considering or beginning a thesis, students interested in graduate school, or students who want more experience in data science or programming.

**Course Notes:**  
This course is open to all students who have completed the prerequisite coursework; no background in programming or coding is assumed or required.

**Recommended Prep:**  
The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and PSY 1900 or the equivalent of introductory statistics before enrolling in this course; or permission of instructor.

**Requirements:**  
SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY1900 or STAT100 or STAT101 or STAT102 or STAT104

Psychology 1950

Intermediate Statistical Analysis in Psychology (121738)

_Patrick Mair_

2020 Fall (4 Credits)  
**Schedule:**  
MW 0130 PM - 0245 PM

**Enrollment Cap:**  
24
This course offers intense, foundational exposure to psychological statistics, focusing heavily on analysis of variance (one-way, factorial, repeated-measures, mixed-model). Other topics include: exploratory data analysis, sampling distributions, null hypothesis significance testing, t-tests, fixed versus random effects, post hoc and planned comparisons, correlation, simple regression, the general linear model, chi-square tests, nonparametric statistics, confidence intervals, and meta-analysis.

Course Notes: Required of doctoral students in Psychology.

Class Notes: Lecture Time: Mon & Wed 1:30-2:15pm
Supplemental Lecture Time (not mandatory): Wed 7:30-8:30pm
Lab Time: Thurs 9-10:30pm and Fri 1-2:30pm

Recommended Prep: One of Psychology 1900, Statistics 100, 101, 102, 104, or the equivalent.

Requirements: PSY1900 or STAT100 or STAT101 or STAT102 or STAT104

Multivariate Analysis in Psychology (117879)

*Thomas Rusch*

2021 Spring (4 Credits)  
**Schedule:** MW 0900 AM - 1015 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This course introduces advanced statistical methods for the empirical measurement of abstract constructs and multivariate analysis. Topics include: Bayesian statistics, non- and semiparametric regression models, conditional process models, reliability and validity, exploratory and confirmatory factor analyses, structural equation modeling and growth curve modeling.

**Recommended Prep:** The Psychology Department requires completion of PSY 1950 or equivalent.

**Requirements:** Prerequisite: PSY 1950 or equivalent

Psychology 2050

History of Psychology: Seminar (118993)

Richard McNally

Covers major issues, theories, schools of thought, and controversies integral to the development of psychology from the late 19th century to the middle of the 20th century. Readings include classic articles exemplifying these themes.

Course Notes: Open to undergraduates with permission of instructor.

Recommended Prep: For undergraduates: completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from
PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18 or SLS15

Additional Course Attributes:

Psychology 2080

Statistical Learning (110487)

*Patrick Mair*

2020 Fall (4 Credits)  Schedule: R 0945 AM - 1145 AM

Instructor Permissions: Instructor  Enrollment Cap: 24

This course is all about Statistical Learning techniques in Psychology and related fields. Statistical Learning is a modern discipline of Statistics which involves developments from the fields of Statistics (obviously), Machine Learning, Computer Science, and Data Science. Overall it refers to a vast set of tools for understanding complex data. More details on the contents can be found in the Syllabus.

Recommended Prep: It is required that students completed Psych 1950 or an equivalent class. Students need to be solid in multiple regression analysis including mixed-effects models. R knowledge is absolutely necessary

Laboratory on Reinforcement Learning and Decision Making (160657)
Samuel Gershman
2021 Spring (4 Credits) Schedule: F 0945 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

This lab course provides instruction and experience in conducting research on reinforcement learning and decision making, using a combination of computational, behavioral and neural techniques. Students will learn how to fit models of reinforcement learning and decision making to behavioral data, collect and analyze functional MRI data, and develop algorithms for artificial intelligence. Undergraduates are required to write a research report at the end of the semester on the studies conducted in the lab.

Course Notes: Open to graduate and undergraduate students working in the instructor's laboratory.

Psychology 2410R

Laboratory Research on Emotional Disorders (107706)

Richard McNally

2021 Spring (4 Credits)

Schedule: M 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Involves readings, seminar discussion, and research on emotional disorders conducted in the instructor’s laboratory (e.g., social anxiety disorder, complicated grief, obsessive-compulsive disorder).

Course Notes: Open to graduate and undergraduate students working in the instructor’s laboratory.

Class Notes: To express interest in enrollment, please email the instructor at rjm@wjh.harvard.edu.

Psychology 2420

Cognitive-Behavioral Treatment of Psychological Disorders (144980)

Rebecca Shingleton
Jill Hooley

2020 Fall (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Covers current cognitive-behavioral approaches to the treatment of common psychological disorders in adults. Emphasis is on the practical aspects of treatment, and on treatment outcome research. Includes theoretical underpinnings of cognitive-behavioral therapy.

Course Notes: Limited to Harvard Psychology graduate students in clinical psychology.

Laboratory in Development and Psychopathology (207568)

Katie McLaughlin

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: n/a

Provides instruction and experience conducting clinical research in laboratory settings with children and adolescents, with a particular focus on understanding the role that experiences of stress and adversity play in shaping children's emotional, cognitive, and brain development in ways that place them at risk for experiencing psychopathology.

Class Notes: To express interest in enrollment, please email the instructor at kmclaughlin@fas.harvard.edu prior to the first meeting. Interested students should also take the survey at https://harvard.az1.qualtrics.com/jfe/form/SV_6JY0wjescHXovpr.

Laboratory Research on the Biopsychosocial Effects of Stigma (216182)

Mark Hatzenbuehler

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 30

Our lab uses a range of methods to examine the biological, psychological, and social consequences of stigma as applied to a broad range of phenomena, including (but not limited to) mental illness and addiction, sexual and gender diversity, weight, race, and immigration status. The course involves readings, seminar discussion, and research on these topics.

This course is designed to give you exposure to the concepts, as well as the nuts and bolts, of research in clinical psychology of childhood and adolescence. There is a special emphasis in this course (as in the lab) on intervention research addressing youth depression, anxiety, and conduct-related problems and disorders. If you are a psychology concentrator at Harvard, you may have already taken classroom-based courses covering theories and methods that guide research in clinical psychology, such as Abnormal Psychology and Developmental Psychopathology. You may also have taken courses that introduced you to the types of statistical analyses (Psych 1900) and research methods (Psych 1901) used in psychological research. In this course, we will build on the foundation you received in such courses by applying what you have learned to the conduct of specific research projects.

In this class, you will participate in several aspects of the clinical research process via your active involvement in the research of our psychology laboratory. More specifically, through attending weekly class/lab meetings and participating in one or more research projects, you will learn how specific research ideas take shape; how research questions and hypotheses are generated; how studies are designed to address these research questions and hypotheses; how data are collected, cleaned, entered into study datasets, then analyzed; and how findings are interpreted and organized for presentation at professional meetings and in scientific publications.

The main goals of research in our lab are to build an understanding of which interventions for child and adolescent mental health problems are effective, and to promote use of the best evidence-based assessment and intervention in everyday clinical practice for youths and families. In pursuing these goals, we and our colleagues develop ways of structuring evidence-based practices to make them user-friendly and tailored to the settings in which youngsters typically receive mental health care—e.g., community mental health clinics and schools. Much of our work focuses on developing and testing these tailored approaches. We also conduct meta-analyses of the youth psychotherapy research literature, to sum up what has been learned from all the treatment studies with children and adolescents.

This course is designed to be useful to students who plan to pursue a career in child and adolescent mental health, particularly those with an interest in psychological research. However, the skills conveyed (e.g., critical thinking, research design, science writing) may be useful in a variety of ways and relevant to a number of different career paths.

Class Notes:
Class will meet on Tuesdays, 5:30-6:45pm.

To express interest in enrollment, please email Rachel Horn, rachelhorn@g.harvard.edu. An interview with the instructors is required.

Psychology 2485

Bad Genes, Bad Parents, Bad Behaviors (159711)

Joshua Buckholtz

2021 Spring (4 Credits) Schedule: T 0600 PM - 0845 PM
Instructor Permissions: Instructor Enrollment Cap: 20

This class will explore the biology of criminal behavior and violence. We will examine the construct of "antisociality" and unpack clinical and diagnostic issues surrounding its diverse manifestations, such as psychopathy. A strong emphasis will be placed on biological mechanisms. A particular focus will be on understanding how genes and environments act and interact to predispose antisocial behavior by shaping brain function and development.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and either PSY 18
or PSY 1861 before enrolling in this course.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY18 or PSY1861

Laboratory on Complex Thought and Cooperation (123308)

Joshua Greene
2021 Spring (4 Credits) Schedule: R 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

In this hands-on lab course, students have the opportunity to participate in all aspects of psychological research, including experimental design, data collection, and data analysis. Each student will work closely with a graduate student or post-doctoral mentor. Topics of research are divided across cognitive and social psychology. Cognitive projects focus on the neuroscience of complex thought: Humans can understand and reason about an effectively infinite number of different ideas. How do our brains accomplish this? Social projects are applied work focused on promoting cooperation, conflict resolution, and improved social decision-making. Methods include fMRI, neural network modeling, and online and in-lab behavioral experiments.

Class Notes: To express interest in enrollment, please email the lab manager, Kirstan Brodie, at kirstan_brodie@fas.harvard.edu.

Lab in Intergroup Neuroscience (156624)

Mina Cikara

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: n/a
Year-long lab course exploring how cognition, affect, neural responses, and behavior change when social
relations shift from "me and you" to "us and them." Students will participate in experiment development and
data collection employing methods ranging from standard laboratory experiments, implicit and explicit
self-reports, and behavioral measures, to fMRI and psychophysiology. Students will also read and discuss
papers on intergroup relations in our weekly meetings.

Class Notes: To express interest in enrollment, please mail the instructor at mcikara@fas.harvard.edu

Recommended Prep: For undergraduates, Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from MCB/NEURO 80, MCB 81, PSY 14, PSY 15, PSY 16, or PSY 18.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND MCB80 or NEURO80 or MCB81 or PSY14 or PSY15 or PSY16 or PSY18

Psychology 2640R
The Understand Seminar (116417)
Mahzarin Banaji
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a
Topics can include all aspects of implicit social cognition, primarily questions of methodology, attitude and belief change, attitude and belief development, the accuracy and inaccuracy of stereotypic knowledge, and evaluation of organizational programs that teach about implicit associations.

Course Notes: Open to graduate students involved in research in the instructor's laboratory, and to select juniors and seniors.

Class Notes: To express interest in enrollment, please email the instructor at mahzarin_banaji@harvard.edu prior to the first class meeting.

**Psychology 3520**

Writing Workshop (216439)

**Susan Carey**

2021 Spring (4 Credits) \[ Schedule: \] TBD

**Instructor Permissions:** Instructor \[ Enrollment Cap: \] 15

The Writing Workshop is the ultimate professional development course. It was developed by Barbara Sarnecka at UC Irvine, and involves working through her witty, moving, and extremely effective book. Basically, if one cannot write effectively, and publish, one cannot succeed in academia. As Sarnecka puts in in the opening paragraph of the book, "Research is writing. No one gets a fellowship, a PhD, a postdoc, a job, a grant, or a promotion except by writing, which means that professional researchers are by definition professional writers." Sarnecka has run writing workshops as graduate classes with great success for several years now and the book distills what she has found to work. She documents increased productivity and happiness among the workshop participants. Classes will each involve some time doing actual writing, in parallel, but all at once, a feedback forum where at least once a semester a participant gets feedback on a page or two of writing, and in class exercises and discussion about the mechanics of writing, managing time, dealing with anxiety and rejections, among many other topics.

What’s required: Participation in one 2 hour 50 minute seminar meeting a week which will be a workshop on academic writing. One semester commitment, but option to continue in the workshop for a second semester, and perhaps beyond. There will be a small amount of reading in advance of each class, mainly from Barbara Sarnecka’s book, *The Writing Workshop: Write More, Write Better, Be Happier in Academia*, sometimes supplemented by readings from other books, such as Pinker’s *The Sense of Style*.

**Course Notes:** Open to G3+ graduate students and postdocs in Psychology.

Religion, The Study of

Subject: Religion

Religion 22

Interpreting Humanity, Interpreting Religion (208140)

Nicholas Boylston

2021 Spring (4 Credits) Schedule: T 0300 PM - 0500 PM
Instructor Permissions: Instructor Enrollment Cap: 24

This course is a gateway to the Study of Religion, presented against the backdrop of a larger question: What is the purpose of the humanities in the 21st century?

Based on the premise that solely Eurocentric approaches to what it means to be human are shortsighted at best, we seek to think through new ways of engaging with global sources that shed light on our common humanity. The course develops around a critical engagement with the concept 'transcendence', which will help us to approach alternative worldviews without eliminating difference.

After thinking about the stakes involved in cultivating the life of the mind in a crisis point for human existence, we begin with an extended reflection on the intellectual and cultural moment in which we find ourselves, investigating how this conditions the way we frame questions of what it means to be human. Next, we take an honest look at the ways in which the dominant modes of knowledge and culture in the North Atlantic have been responsible for cultural, material and epistemic violence. Our exploration of diverse approaches to the human condition begins here, as we think through a range of responses to human-caused suffering. We then approach a range of questions of universal concern: What is ultimately real and how do we know what we know? What is the good, and how is it to be attained? How are we to relate to our fellow human beings, particularly when they seem deeply antagonistic?

This course is designed for freshmen and sophomores who are interested in exploring a vocation in the humanities. Throughout we will draw out the implications of the readings for our own intellectual and practical lives. Readings will include primary texts in translation drawn from traditions across the globe, as well as selected secondary literature.

Religion 47 Section: 01

Christian Ethics and Modern Society (156433)

Charles Lockwood

2020 Fall (4 Credits) Schedule: R 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This course provides an introduction to Christian conceptions of conduct, character, and community, as well as contemporary disputes over their interpretation and application. What do Christian ideals imply for issues related to race, gender, religious pluralism, and
secularism? How are Christian principles related to the ethos of liberal democracy and modern ideals of rights, equality, and autonomy? Readings and discussions will highlight a variety of contemporary perspectives and approaches to Christian ethics, and special emphasis will be given to moral and political concerns including race and racism; love, sexuality, and marriage; the environment; capitalism and consumption; abortion and euthanasia; and war and peace.

Religion  48 Section: 01

Roman Catholic Christianity and Contemporary Crises (109983)

Francis Fiorenza  
Courtney Lamberth

2021 Spring (4 Credits)  
Schedule:  
R 0300 PM - 0545 PM

Instructor Permissions:  None  
Enrollment Cap:  
n/a

In the face of political and social change, and demands for racial, gender and economic justice, religious traditions struggle to respond while maintaining identity. As an example, the Second Vatican Council of the early 1960s brought the Roman Catholic Church to a deeper engagement with modern academic scholarship such as historical critical methods of interpreting texts, environmental and evolutionary sciences' relation to the Church, and the fundamental importance of modern philosophical and political thought to the institution's self-understanding. Reforms that followed the Council--which convened in the midst of global cultural upheaval and radical change--continue to ignite discord and intense division among Roman Catholic teaching authorities, and church communities. This course takes up several of these debates, including abortion and sexuality, divorce and marriage, racism and colonialism, the role of women in church leadership, evolution and the environment, and the nature of human rights. Controversies and debates will be considered in the context of their historical, political and cultural development and context. Readings will include council documents, theological texts, treatises and encyclicals, as well as texts relevant to the academic study of religion, including social theory, modern philosophical texts, and scientific articles.

Religion  60 Section: 01

Narratives of Religious Conversion in American Literatures (216414)
Narratives of grace, lament, and conversion appear in multiple forms of American literature rooted in Christianity including fiction, sermons, first-person accounts, poetry, autobiography, and essays. Violence and suffering are often central to depicting, describing, and imagining experiences of divine grace and conversion. Through close reading of text in several genres, this course addresses these issues and considers, among other questions, the ambivalent and often paradoxical relationship between "freedom" and "slavery" in relation to divine agency and community in accounts of religious transformation. Authors will include Jonathan Edwards, Emily Dickinson, Herman Melville, William James, W. E. B. DuBois, Howard Thurman, Flannery O’Conner, Toni Morrison, and Annie Dillard, as well as selected secondary sources from the study of religion.

Religion  64  Section: 01

Krishna and Christ: Does it Matter? (208033)

Francis Clooney

2021 Spring (4 Credits)  Schedule:  TR 1030 AM - 1145 AM

Instructor Permissions:  None  Enrollment Cap:  n/a

Krishna, a supreme deity of Hindu tradition, and Jesus Christ, the central figure of Christian faith, have been compared and contrasted for well over two centuries. They been understood as similar divine persons, who descend into this world and are embodied here, gather followers, offer wise instructions, save their devotees, and are best approached by love and devotion. But differences have often been emphasized. For centuries, missionaries, scholars, and many ordinary believers have seen Krishna and Christ as competitors, pushing similarities and differences in contexts (most often in India but not only) where true religion, salvation, and conversion were at stake. Questions arose such as these: Are Krishna and Christ mythical or historical figures? The former mythical and the latter historical? Is either divine? Both? Did they truly come into this world, by incarnation or avatara? If they save, how does that happen – and save from what? Are they moral role models? Can a Hindu love Christ, and a Christian love Krishna?

Such were "hot" questions for a very long time, and even today for some. But for many, such questions have lost their urgency in the 21st century. It is good that competition is largely a thing of the past, but it may not be good that the urgency of the comparison — Krishna and Christ, Christ or Krishna? — no longer matters to most people. Do we have something to gain by taking both Krishna and Christ seriously? Facing this question sheds light on many larger questions regarding spirituality, religion, and cross-cultural learning.

The course proceeds by key readings, discussed vigorously in class, but experience, practices, and images are important as well. Course requirements include brief weekly written responses to readings, and two 12-page course papers, but no final examination. Jointly offered with the Divinity School as HDS 3070.
Religion 91R

Supervised Reading and Research (122928)

Courtney Lamberth

Matthew Potts

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

Religion 91R is a course of supervised reading and research on a special topic in the Study of Religion. The course involves close reading and written work, both of which are evaluated by the faculty director with a letter grade and written comments. Students who wish to enroll in a 91R must receive the approval of the Director of Undergraduate Studies. 91R is ordinarily open only to concentrators. The instructor of the course must be a member of the Harvard faculty.

Course Notes: May not be taken Pass/Fail. Normally open only to concentrators. Permission by Director of Undergraduate Studies required.

Animals and the Unseen (217840)

Teren Sevea

2021 Spring (4 Credits) Schedule: R 1200 PM - 0200 PM

Instructor Permissions: None Enrollment Cap: n/a

This course considers how we can write histories of religious animals and the Unseen. Students will be introduced to academic literature that has criticized scholarly and popular conceptions of humans having a special status, and assumptions that the religious sentience of non-human animals and the materiality of spirits cannot be studied academically. Students will then be introduced to a variety of sources containing rich information on religious animals and the supernatural from Islamic societies of the globe. In doing so, the course pays particular attention to how human and non-human animals were understood to be religious beings whose bodies and activities were always tethered to the Unseen. Students will be encouraged to explore how the divide between human and non-human animals might not have been evident in societies of the past and the present. Students will moreover be encouraged to engage how these sources may prompt us to remember, or rather realize, that all aspects of material life, including animals’ bodies, physical resources and technologies, were inextricably linked to the imagined non-material realms of the Unseen. On the whole, this seminar class takes steps towards recounting histories of religious animals and the Unseen.

Jointly offered with Harvard Divinity School as HDS3117.

The Shock of the New (108501)

Michael Jackson

2021 Spring (4 Credits) Schedule: T 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 20

This course will explore the impact of new worldviews, traumatic experiences, and radical technological innovations on both human lives and lifeworlds. It will cover some of the epistemological, ethical, social and existential quandaries that constitute what Robert Hughes calls 'the shock of the new', as well as the religious and ritual strategies whereby people struggle to avert, accommodate, cope with and comprehend massive changes to their lives. Interpretive perspectives will be drawn from psychology, philosophy, ethnography, ethology and biomedicine, while specific empirical cases will cover new media of communications and information processing, new genetic technologies, medical crises (disabilities, organ transplantation, trauma and epidemic disease), as well as culture contact and culture shock. Jointly offered with the Divinity School as HDS 3256.

Religion, Values, and the Future of Democracy (216807)

E. J. Dionne

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 10

G. K. Chesterton described the United States as "a nation with the soul of a church," but America's religious institutions have increasingly taken on the souls of political parties. At the same time, liberal democracy finds itself under stress and the core values of liberalism are being challenged by nationalism, authoritarian forms of populism, and a backlash against rising economic inequality. And embedded racism has come under vigorous challenge – in the US especially, but throughout the democracies. This course will explore the religious and secular values that under-gird democracy. It will examine both political and religious institutions, and explore the thinking of theologians and philosophers on the challenge of self-rule.

Course Notes: Although the 2020 election will not be the subject of any particular
session, it will no doubt be a discussion topic throughout the fall.

Jointly offered with HKS DPI 227 as and with the Divinity School as HDS 2042.

Recommended Prep: Follow news about the relationship of religion to politics, and discussions of the values underlying political debates, even more closely than you normally might.

**Religion 1059 Section: 01**

*Francis Clooney*

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

This course reflects on God — the idea, the reality, the significance — in light of Hindu and Christian scriptures, from philosophical and theological perspectives, and with reference to spiritual paths to union with God — all re-read in light of modern theological questions and doubts about the very idea of "God."

Issues include: the meaning of "God" and knowledge of God; reasons to believe (or not) in God's existence; God's relationship to the world, humans, all living beings; divine embodiment and salvation by God; theism and polytheism before and after secularism and atheism. Knowing both Hindu and Christian traditions on God clarifies each tradition, as we learn from their great similarities and great differences. And: how might studying God comparatively change our God-talk, God-practice, God-love here and now? Quiet course for noisy times. Weekly written responses, plus two 10-12 page papers.

Course Notes: Offered jointly with the Divinity School as 3751.

Religion and Family (208128)

*Todne Thomas*

2020 Fall (4 Credits) Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 25

Religion and family are contested concepts that become politicized as they are mobilized and debated in the public sphere. Religion and family are also often depicted as separate forms of social organization. This course explores the ways in which religious and familial concepts, institutions, and relationships intersect to shape the lived experiences of religious participants who create and imbue their relationships
with social and sacred significance. In particular, we will examine how rituals, practices, and meanings surrounding sexuality, marriage, parenthood, siblinghood, and genealogy become important signifiers of religious identity and membership. Our discussion of these case studies will also open up broader conversations about the politics ethnicity/race, gender, sexuality, fundamentalism, and trans-nationalism and their imprint on modes of religious and spiritual belonging. Jointly offered with the Divinity School as HDS 2126.

Child Sacrifice, Pros and Cons: The Binding of Isaac in Jewish, Christian, and Islamic Tradition (217581)

David Stern

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

Child Sacrifice-- specifically, the story of the parent's sacrifice of the first-born child-- lies at the heart of Western religion and culture. The Biblical narrative in Genesis 22, known as the Binding of Isaac, is one of the most famous and problematic tales in the Bible. The same narrative is foundational to Christianity. Later Jewish tradition has interpreted the Biblical text in countless ways from the ancient period down to the present day. The narrative figures prominently in Islam from the Qur'an on. And the Biblical story has been criticized and critiqued since the Middle Ages as a barbaric narrative. Recent works have blamed it for the ubiquity of child abuse in Western society, and it has become a
ubiquitous motif of anti-war and protest poetry all over the world. This course will use the interpretive career and literary history of Genesis 22 as a lens through which to study the place of this foundational narrative in Western culture. Readings will include Biblical texts, Euripides' Iphigeneia in Aulis, Philo of Alexandria, ancient Jewish sources, the New Testament, St. Augustine and other Christian exegetes, the Qur'an and later Islamic traditions, Kierkegaard's Fear and Trembling, Martin Buber, Kafka, Bob Dylan, Yehuda Amichai, and Leonard Cohen, among many other modern writers and poets.

Judaism: Text and Tradition (205396)

Jon Levenson

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 15

A general and wide-ranging exploration of the Jewish religious tradition, from its inception in biblical Israel though its rabbinic, medieval, and modern iterations. The central focus lies on the literary meanings and existential questions of the classical tradition, as well as on the relationships between texts, religious claims, and practices. We shall also consider some of the restatements, reformulations, and challenges to tradition that have arisen in modern times. Open to undergraduates, including first year students, by permission.

Course Notes: Jointly offered with Divinity as 3036.

Gender and Judaism in Modern America (214625)

Ann Braude

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 12

Both demographic and cultural reproduction pose critical challenges to minority religions, placing pressure on personal decisions, group dynamics, religious practices, and intergroup relations. This course follows the navigation of these pressures by American Jews, and explores the formations of gender and sexuality that result. Topics include marriage, dating and family formation, synagogue life and Jewish ritual, as well as social and political movements that have become vehicles of American Jewish identity: civil rights,
second-wave feminism, and Zionism. Readings include works by Riv-Ellen Prell, Lynn Davidman, Joyce Antler and Sarah Imhoff as well as fiction by Philip Roth and Anita Diamant. Jointly offered with Harvard Divinity School as HDS 2050.

The Book of Daniel (216806)

Andrew Teeter

2020 Fall (4 Credits) Schedule: T 0300 PM - 0500 PM

Instructor Permissions: None Enrollment Cap: n/a

A critical and exegetical study of Book of Daniel, based on a close reading of the text in Hebrew and Aramaic. Special attention will be given to large-scale compositional strategies and principles of literary organization, to textual logic, to analogical patterns, to inner-scriptural relationships, and to the nature and function of allusion within this book, with a view toward understanding the overall expectations made of readers, both ancient and modern. The text of Daniel and its underlying principles of design will be considered in the context of major critical debates within the current state of the field. The course presumes basic proficiency with Biblical Hebrew. Minimum of one year of Hebrew required. No previous knowledge of Aramaic required.

Jointly offered in the Divinity School as HDS 1630.

Emerging Topics in Ancient Greek Religion: Seminar (116532)

Kimberley Patton

2021 Spring (4 Credits) Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 15

Recent research has highlighted dimensions in the religious history of Greece long overlooked or understudied: e.g., magic and necromancy; curse tablets and binding spells; rituals of childbirth; healing sanctuaries and dream incubation; talismans and apotropaic practices; miasma and catharsis; weaving, dance, lamentation, and other women's cultural production; "heroic" female self-sacrifice in male wars; autonomous cult images and "talking objects"; and animal metamorphosis. The seminar will offer an intensive survey of important work on these "new" topics in ancient Greece.
Students will have an opportunity to develop their own research projects. No language prerequisite; some background in ancient Greek religion preferred.

Course Notes: Offered jointly with the Divinity School as 3815. Application for enrollment must be completed at first class meeting.

Recommended Prep: No language prerequisite; some background in ancient Greek religion preferred.

Early Christian Thought 3: The Syriac Tradition (109686)

Charles Stang

2020 Fall (4 Credits)  

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor  

Enrollment Cap: 20

The aim of this course is to introduce students to the Syriac Christian tradition in the late antique and medieval periods. Syriac-speaking Christians constitute an ancient community that stretched from the Eastern Mediterranean to China, a community diverse in its beliefs and practices, prolific and accomplished in its literary output, and bound by a common language (Syriac, a dialect of Aramaic). This course will cover the early, diverse period of Syriac literature (2nd and 3rd centuries); the subsequent "golden" age of Syriac literature, associated with such authors as Ephrem and Jacob of Serug; some forms of asceticism and spirituality peculiar to Syriac Christianity; and finally, the stretch of Syriac Christianity eastward, to India and China.

Course Notes: Offered jointly with the Divinity School as 1751.

The Ethical and Religious Thought of Martin Luther King, Jr. (124313)

Preston Williams

2021 Spring (4 Credits)  

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: None  

Enrollment Cap: n/a

A study of the life, thought, and actions of Martin Luther King, Jr. An ethical analysis of his primary concepts, ideas, and strategies based upon a reading and discussion of his writings and their sources.

Course Notes: Offered jointly with the Divinity School as 2721.
Religion 1499 Section: 01

The Sacramental Imagination (122197)

Matthew Potts

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 24

How do communities set apart the sacred from the everyday? In what ways might the holy and quotidian overlap? How can we recognize holiness? Using the Christian ritual of eucharist or communion as a primary lens, this interdisciplinary course will investigate the sacramental imagination through a study of both historical theology and contemporary literary fiction. In studying the various tropes and images that have been used to characterize Christian eucharist, we will seek to generate a broadly construed sacramental theology that might prove useful for both theological study and practical ministry.

Religion 1512 Section: 01

Cities on a Hill: Images of America as a Redeemer Nation, 1630-present (156249)

Catherine Brekus

2021 Spring (4 Credits) Schedule: T 0900 AM - 1100 AM

Instructor Permissions: Instructor Enrollment Cap: 12

Beginning with John Winthrop’s 1630 speech, “A Model of Christian Charity,” and ending with the 2012 presidential election, we will examine images of America as a city on a hill. We will ask several questions: How and why have Americans conceived of the nation in sacred terms? How have religious images of the nation developed and changed over time? What are the implications of America’s “civil religion”? We will discuss the Puritan idea of a national covenant, the millennial rhetoric of the American Revolution, defenses of manifest destiny, the sacrificial theology of the Civil War, religious and political rationales for global missions, the rise of the Christian Right, and presidential invocations of America as a city on a hill. We will also examine how women’s rights leaders, abolitionists, and civil rights activists both critiqued and appropriated the image of America as a city on a hill. Jointly offered with the Divinity School as HDS 2180.
Religion 1521A Section: 01
The Man of Light: The Philosophy and Spirituality of Henry Corbin (216334)

Charles Stang
2020 Fall (2 Credits) Schedule: F 1200 PM - 0300 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This seminar will focus on the writings of Henry Corbin (1903-1978), the philosopher of religion and scholar of Islam, especially the Persian tradition. The aim of the seminar will be to read Corbin's major works; to understand his controversial place in the history of the study of religion in general, and of Islam in particular; to appreciate him as a creative and constructive philosopher and theologian in his own right; and to assess his legacy for the 21st century.

Students must complete both terms of this course (parts A and B) within the same academic year to receive credit

The Holocaust and the Churches, 1933-45 (124910)
Kevin Madigan
2021 Spring (4 Credits) Schedule: M 0300 PM - 0500 PM
Instructor Permissions: Instructor Enrollment Cap: 12
This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce students to the critical use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. The seminar will conclude with an assessment of the role played by the Holocaust in today's world, specifically in the United States. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.

This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce students to the critical use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. The seminar will conclude with an assessment of the role played by the Holocaust in today's world, specifically in the United States. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.
Religion 1537 Section: 01
Justice, Human Rights, and Religion (107394)
Francis Fiorenza
2020 Fall (4 Credits) Schedule: R 1200 PM - 0200 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This seminar course introduces some current interpretations of justice, human rights, and religion. It explores some implications of different conceptions of justice for an understanding of human freedom, identity, dignity, and equality. It will discuss contemporary economics, cultural, and societal challenges to traditional conceptions of justice. Attention will be given to the work of Rawls, Fraser, Habermas, Pogge, West, Sen & Nussbaum, Derrida, Butler, Benhabib, Young, Wolterstorff, Cohen, and Kasper.

Course Notes: Offered jointly with the Divinity School as HDS 2632.

Religion 1538 Section: 01
Liberal and Liberation Theologies in Dialogue (126762)
Dan McKanan
2020 Fall (4 Credits) Schedule: MW 0900 AM - 1000 AM
Instructor Permissions: None Enrollment Cap: n/a

This course will explore the possibilities for fruitful interchange between classic liberal theologies and contemporary theologies of liberation. We will begin with major texts of American liberal theology (Channing, Emerson, Bushnell, Rauschenbusch), then turn to the defining liberationist texts (Gutierrez, Cone, Daly), and conclude with several attempts to integrate the traditions.

Course Notes: Offered jointly with the Divinity School as 2415.
Religion 1573 Section: 01
Sex, Gender, and Sexuality II (204026)
Amy Hollywood
2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 30

The second of two parts, the course will continue to explore the theoretical articulation of sex, gender, and sexuality in feminist and queer theory, with attention to the role of other differences – racial, ethnic, religious, and differences in physical ability – in contemporary work. Prerequisite: REL 1572 or consent of the instructor.

Course Notes: Jointly offered with Divinity as 2693
Additional hour to be arranged.
Recommended Prep: Prerequisite: Religion 1572 or consent of the instructor

Religion 1577 Section: 01
Ecotheology (213595)
Dan McKanan
2021 Spring (4 Credits) Schedule: MW 0900 AM - 1000 AM
Instructor Permissions: None Enrollment Cap: n/a

This course will survey constructive religious reflection that is informed by an ecological worldview and accountable to various forms of environmental activism. Readings will be drawn from a variety of religious and spiritual traditions, among them Christianity, Judaism, Islam, Buddhism, Paganism, Unitarian Universalism, religious naturalism, and metaphysical spirituality. We will pay special attention to the interplay between ecotheology and various theologies of liberation. Students will be invited to develop their own constructive theological or atheological proposals in dialogue with the assigned readings. Jointly offered in the Divinity School as HDS 3166.

Course Notes: Jointly offered with the Divinity School as HDS 3166.
Religion 1587 Section: 01
Religion and Race in the United States (207215)
Todne Thomas
2021 Spring (4 Credits) Schedule: M 0900 AM - 1100 AM
Instructor Permissions: Instructor Enrollment Cap: 12

Religion and race mediate contested social memberships. Religious imaginaries often possess power through their association with eternal and transcendent truths. Racial identities have existed as powerful social taxonomies because they are believed to be fixed, innate, and biologically-determined. Thus, religious and racial phenomena are powerfully imagined as somehow existing beyond the realm of the social. When set in the context of the United States—a society that is self-referentially exceptional and multicultural but that is informed by hegemonic and colonial white Anglo-Saxon Protestant cultural norms—the critical, deconstructive study of religion and race emerges as a complex yet significant intellectual project. This new intermediate class examines how religion and race intersect in the United States from the nineteenth century until the present. Through our shared analysis of texts that straddle a number of disciplines and genres, we will explore how religion and race mutually inform shared understandings of socio-political belonging, hierarchy and boundaries, recuperative institutional projects, and structural and personal identities. Jointly offered with the Divinity School as HDS 2127.

Religion 1661 Section: 01
The Yoga Sutras: Text, Meaning, Purpose (126783)
Francis Clooney
2020 Fall (4 Credits) Schedule: T 0300 PM - 0530 PM
Instructor Permissions: Instructor Enrollment Cap: 20

The brief Yoga Sutras (only 195 sutras) of Patanjali (c 100 BCE-100 CE) is a vastly influential and fundamental text of yoga. It is the focus of the course, along with its primary commentary (Vyasa's Bhasya), notes on other commentaries, and with some attention to BKS Iyengar's famous Light on the Yoga Sutras. What was Patanjali up to? What are the Sutras for? What do the Sutras tell us about the meaning and purpose of yoga then and now? Though not a course about the practice of yoga or yoga in the modern world, it is always attentive to the implications for practice. Thus potentially of great use for practitioners and teachers today. Apt comparisons will be made with ancient Hindu and Buddhist parallels, Al-Biruni's 11th c. Arabic translation, and modern Christian interpretations of the Sutras. Given our stressful situation, possibly some optional yoga practice together at start or end of class. Weekly written responses, plus two twelve-page course papers.

Offered jointly with the Divinity School as HDS 3931

Course Notes: Offered jointly with the Divinity School as 3931.

Recommended Prep: No language prerequisite, but students who know Sanskrit will be encouraged to make use of their expertise.
Religion 1701 Section: 01
Introduction to Buddhist Scriptures and Their Critical Interpretation (124399)
Charles Hallisey
2020 Fall (4 Credits) Schedule: T 1200 PM - 0200 PM
Instructor Permissions: Instructor Enrollment Cap: n/a
An introduction to basic issues in the contemporary understanding of textuality, psychology, reading, and interpretation and their relevance to engaging Buddhist texts as scriptures. Examples of Buddhist scriptures will be drawn primarily from the Mahayana traditions. In accommodation to the necessity of remote learning in the fall term, 2020, class format will be of three types: 1 hour in lecture and large group discussion (Tuesdays 12-1); one hour in small group discussion (Tuesdays, 1-2); and one hour in tutorial format (one hour to be arranged for two students to meet weekly via Zoom with instructor).
Course Notes: Course has additional section hour to be arranged.
Offered jointly with the Divinity School as 3836.

Religion 1707 Section: 01
Introduction to Buddhist Commentaries and their Critical Interpretations (124701)
Charles Hallisey
2021 Spring (4 Credits) Schedule: T 1200 PM - 0300 PM
Instructor Permissions: None Enrollment Cap: n/a
An introduction to the study of Buddhist commentaries, their textual and hermeneutic services, as well as their history and their places in Buddhist scholastic cultures. Examples of Buddhist commentaries will be drawn from across the Buddhist world.
Course Notes: Offered jointly with the Divinity School as 3779.
Religion 1722 Section: 01

Buddhist Ethics (125677)

Charles Hallisey

2021 Spring (4 Credits)          Schedule:       W 0300 PM - 0600 PM
Instructor Permissions:   Instructor Enrollment Cap:  30

A systematic exploration of Buddhist views of moral anthropology and the place of moral reflection in Buddhist thought and practice. The scope of the course is wide, with examples drawn from the whole Buddhist world, but the emphasis will be given to the particularity of different Buddhist visions of human flourishing. Attention will also be given to the challenges and promises of describing Buddhist ethics in a comparative perspective.

Course Notes: Offered jointly with the Divinity School as 3576.

Women, Gender, and the Quest for Social Justice: Cases in Buddhism (216456)

Janet Gyatso

2020 Fall (4 Credits)          Schedule:       TR 0300 PM - 0415 PM
Instructor Permissions:   Instructor Enrollment Cap:  15

We will do two things in this course: take in the history, literature, visual imagery, and theoretical pronouncements around the nature of women and gender in Buddhist materials; and cultivate the critical and hermeneutical skills for processing these materials and contributing to a just and woke future. We will read together a variety of Theravada, Mahayana, and Tantric Buddhist texts, displaying repressive, subversive, and liberative visions alike. We will study autobiographical writing of historical women, images of female divinity, and notions of non-binary genders as well as as the third sex. Significant attention will be paid to the contemporary female ordination movement, and to other modern Buddhist efforts for social justice and environmental protection. Lectures may be taped and viewed before class, and small breakout discussion groups will be an important part of the in-class pedagogy. Prior knowledge of Buddhism helpful but not required.

Introduction to Islamic Mystical Traditions (113442)

Ali Asani

2020 Fall (4 Credits)  Schedule:  T 1200 PM - 0200 PM

Instructor Permissions: None  Enrollment Cap: n/a

This course offers an introductory survey of mystical traditions of Islam, popularly labelled as "Sufism." It explores the fundamental concepts, practices, and institutions associated with these traditions, their historical development and their influence on the devotional, cultural and social lives of Muslim communities through the centuries. Through case studies drawn from the Middle East, South Asia, West Africa and North America, the course examines ways in which these traditions have developed and promoted alternative perspectives on what it means to be Muslim, challenging in recent times sectarian, legalistic and politicized understandings of Islam such as Wahhabi, Islamism and jihadism. The course assumes no prior knowledge of Islam.

Course Notes: Offered jointly with the Divinity School as 3620.

Religion 1804  Section: 01

Persian Sufi Literature (208141)

Nicholas Boylston

2021 Spring (4 Credits)  Schedule:  R 0300 PM - 0500 PM

Instructor Permissions: None  Enrollment Cap: n/a

In this course we will explore the major genres of classical Persian Sufi poetry and prose. In addition to
examining the formation of these genres and their contexts of composition, we will pursue a range of broader questions, including: What is Sufism, and how do we discern 'Sufi' from 'non-Sufi' literature? What have the purposes and functions of literature been in Persianate Islamic contexts? What is the relationship between language, realization and experience in Persian Sufi literature, and how do authors in the Sufi tradition deal with the problem of ineffability? What is the place of love in Persian Sufi literature and how is it conceptualized? And, how do Persian Sufi authors deal with the diversity inherent in human experience?

Readings will include Baba Tahir, Umar Khayyam, Sana'i, Attar, Rumi, Ahmad and Abu Hamid al-Ghazali, Sa'di, Hafez, Fakhr al-Din Iraqi, Shabistari, and Jami. All readings will be in English translation, but there will be an extra section for students with advanced Persian to read texts in the original. Jointly offered with the Divinity School as HDS_______.

Islam and Religious Diversity (207014)

*Nicholas Boylston*

2020 Fall (4 Credits)  

**Schedule:**  
M 0300 PM - 0500 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
12

The problem of religious diversity recurs in all of the major branches of Islamic thought and appears in complex permutations in diverse cultural contexts. Focusing primarily on pre-modern Islam, this course invites students to investigate perspectives on the religious other in the Quran, Islamic law, theology, philosophy and Sufism. In the final portion of the course we will look at Muslim Spain, Mughal India, and the Muslim-Confucian of late imperial China as examples of how these complex dynamics played out on the ground. The larger aim of this course is for students to develop interpretive skill in dealing with the internal complexity of a number of Islamic discourses and contexts by pursuing a single problematic across them. To this end the course will be taught in seminar format and participants will be encouraged to engage creatively with primary and secondary sources to develop their own scholarly points of view.

**Recommended Prep:**  
One course dealing with Islam or Instructor's Permission.

Being Muslim in South Asia: Religion, Culture and Identity (111918)

*Ali Asani*

2020 Fall (4 Credits)  

**Schedule:**  
W 1245 PM - 0245 PM
South Asia is home to the largest population of Muslims in the world. And yet, within South Asia, Muslims are a minority. What is Islam and what does it mean to be Muslim in South Asia? After briefly examining the historical development of Islamic institutions in the subcontinent, this course will focus on how ideas about Islam are shaped by evolving literary, linguistic, social and political landscapes. Special attention will be given to the effects of colonial and nationalist ideologies on Muslim experiences in India, Pakistan, and Bangladesh, as well as the disputed territory of Kashmir. We will also explore the impact of reform and revivalist movements and state-enforced policies of "Islamization" and "Hinduization" on women and minorities. The course is appropriate for those who want a bird's eye view of the Islamic tradition in South Asia, as well as those interested in exploring issues facing contemporary Muslim societies beyond the Middle East. Jointly offered as Religion 1820 and HDS 3625.

Course Notes: Offered jointly with Divinity School as 3625.

Islamic Missions: Reforming Muslim South and Southeast Asia (217841)

Teren Sevea

2021 Spring (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: None Enrollment Cap: n/a

How did Islamic missions and missionaries reform Muslim South and Southeast Asia? What Islamic missionary idioms, orientations and movements emerged in the nineteenth and twentieth centuries? Were South and Southeast Asia global centers of Islamic missionary activity? What kinds of Islamic educational institutions developed in modernity? How did Muslim reformists appropriate technologies? What materials were printed by Muslim missionaries and scholars in South and Southeast Asia? What jihad did Islamic missionaries and reformists call for in modernity? How did Muslim 'modernists' and 'traditionalists' respond to the challenges of colonialism and modernity? What was the nature of Sufism in modern South and Southeast Asia? What was the nature of Islamism in these regions? How has the history of Islamic missions been remembered in India, Indonesia, Malaysia and Pakistan? This discussion-based, lecture class answers these questions, and more. It is an introductory course and requires no background knowledge of the subjects.

Jointly offered with Harvard Divinity School as HDS 3174.

Religion and Neoliberalism (208110)

*Todne Thomas*

2020 Fall (4 Credits)  
**Schedule:** T 1200 PM - 0200 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 25

As it is popularly conceptualized, neoliberalism is a political and economic system that calls for the deregulation of capitalist enterprises, the increasing privatization of government services, and the application of market rationalities in the operation of social institutions. Yet, how does neoliberalism interface with religion? What religious sensibilities are encoded in and spread amidst neoliberal formations? Through our review of theoretical texts and anthropological monographs, this course investigates religion and neoliberalism around some of the following loci: Christian temporal reckonings that shape renditions of millennial capitalism and late liberalism, moral orders, co-constitutive discourses and institutions of prosperity and accumulation, and conflicting paradigms of selfhood and belonging. Offered jointly with the Divinity School as HDS 2125.

Religion 2427 Section: 01
The Book of Revelation: Text, History, and Interpretation (216371)

Giovanni Bazzana

2020 Fall (4 Credits)
Instructor Permissions: Instructor

Schedule: R 1200 PM - 0200 PM
Enrollment Cap: 15

The course will be focused primarily on the Greek text of the Apocalypse of John, devoting time to the observation and discussion of issues relating to textual transmission, translation, interpretation, and theological hermeneutics. Through the additional reading of other ancient, modern, and contemporary texts the course will also approach the colorful and contested history of interpretation of this puzzling biblical book. Revelation will be posed within the ancient historical context of Jewish and Christian apocalypticism, but discussion in the course will range through the many facets of Revelation’s history of interpretation, from antiquity to today, addressing contested issues such as its stance towards violence, its ambiguous treatment of empire and gender, or its controversial canonicity. Two semesters of Greek are required. If HDS courses will be offered online, the seminar will be split in two parts, one synchronous and one asynchronous. Jointly offered in the Divinity School as HDS 1560.

Course Notes: Jointly offered in the Divinity School as HDS 1560.
Recommended Prep: Two semesters of Greek are required.

Coloniality, Race and Catastrophe (213294)

Mayra Rivera

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 12

This course explores the relationship between coloniality, race and ecology through the lens of "catastrophe." We will examine a variety of theoretical sources that deploy or refute tropes of the "end of the world". We will study different uses of "catastrophe"—to denounce the destruction of a particular world, re-imagine the past, or proclaim the impossibilities of the present. Through the readings and discussions, we will analyze the aims, effectiveness and limitations of talk of catastrophe in the contemporary context.

Women, Religion, and the Problem of Historical Agency (113871)

Catherine Brekus
Ann Braude

2020 Fall (4 Credits) Schedule: T 1200 PM - 0200 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This course examines recent scholarship on women in American religious history, focusing particularly on questions of narration, agency and power. We will ask several interrelated questions: How have historians integrated women into narratives of American religious history? Whose stories have they highlighted, and why? How have they conceptualized women as historical agents? We will read major interpretive works as well as theoretical accounts of gender, social structure, and power. Readings will explore the diversity of religious traditions in America, including Puritanism, Judaism, Mormonism, Catholicism, African-American Christianity, evangelicalism, and Islam. Jointly offered in the Divinity School as HDS 2186

Course Notes: Offered jointly with the Divinity School as HDS 2186.

Ethnographic Methods in the Study of Religion (215754)

*Michael Jackson*

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

This course provides a general introduction to ethnography - an approach to understanding life-worlds through a double perspective in which active participation and immersion (with a goal of seeing the world from another’s point of view) is coupled with systematic observation and documentation (recording life-stories, filming critical or ritual events, and keeping fieldwork journals). Rather than reduce ethnographic practice to scientific protocols for data-gathering, we will approach it by reflecting on the shared elements of our humanity (sensus communis) that make it possible to interact with, understand, and write about others empathically, insightfully, and ethically. Accordingly, this course will not rely on textbooks in ethnographic method, but on readings and films that actually show ethnographers in the field and afford us glimpses into some of the research strategies, vital relationships, emotional stresses, and moral dilemmas associated with doing fieldwork 'outside our comfort zones'. We will also explore the tension between studying others contextually rather than through texts, and ask how first-hand experience of life-as-lived can be reconciled with the demands of theory-building and knowledge production in the academy.

A Poetics of Difficulty (216354)

*Amy Hollywood*

2020 Fall (4 Credits) Schedule: T 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 12
Through the careful reading of and exploratory writing about selected works of contemporary poetry, together with some key pieces of criticism and philosophy, the seminar will explore different modalities of difficulty. The hypothesis driving the course is that in difficult times, reading difficult writing can be a vital and affectively powerful task. Readings will likely include work by Susan Howe, Nathaniel Mackay, Rae Armantrout, Dan Beachy-Quick, Myung Mi Kim, Claudia Rankine, Dawn Lundy Martin, Harryette Mullen, Elizabeth Robinson, Lisa Robertson, TC Tolbert, and Cameron Awkward-Rich.

Course Notes: Offered jointly with Harvard Divinity School as HDS 2063

Seminar for Advanced New Testament and Religions of the Ancient Mediterranean (213513)

*Giovanni Bazzana*  
*Rachel Love*

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 12

Schedule: R 0300 PM - 0545 PM

This graduate seminar will focus on oracles and divination in the ancient world in their capacity as a widespread phenomenon. The course will deal with texts and material artifacts pulled from a broad range of epochs and regions across the ancient Mediterranean. We will explore the historical, literary, and artistic significance of this evidence in order to understand more adequately, for example, ancient concepts of divine-human communication, integration of divinatory practices into literatures, and authorization in religious and political discourses. This is an interdisciplinary course that focuses on developing research and communication skills across classics, religious studies, and ancient history.

Participation in the seminar is encouraged for those thinking about academic work and for those interested in deepening their familiarity with the fields of New Testament studies and/or Religions of the Ancient
Mediterranean. A basic acquaintance with the fields is required. Jointly offered as Ancient Studies 201 and with Harvard Divinity School as HDS 1981.

Romance Languages and Literatures
Subject: Portuguese

Portuguese 10
Beginning Portuguese I: From Cambridge to Copacabana (120398)

Benedict Cruz

2020 Fall (4 Credits)  
Schedule: MWF 1030 AM - 1145 AM

Instructor Permissions: None  
Enrollment Cap: n/a

Intended for those with no prior experience in the target language, this course emphasizes interpersonal communication as well as the interpretation and production of written and spoken language. Students take their first steps on the journey from speaking English to carrying conversations with Portuguese speakers over the course of one semester, thanks to immersion activities and dynamic, interactive learning. Students will experience contextualized Luso-Afro-Brazilian culture through music, film, and social media.

Course Notes: Conducted in Portuguese. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have previously studied Portuguese must take a placement exam. Students with a solid knowledge of Spanish should enroll in PORTUG 10s instead of PORTUG 10. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Portuguese 10S
Beginning Portuguese for Spanish Speakers: Portuñol Beyond Portuñol (113806)

Viviane Gontijo

2020 Fall (4 Credits)  
Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: None  
Enrollment Cap: n/a

Designed specifically for students with a sound knowledge of Spanish. This course presents linguistic and cultural structures necessary for basic communication, emphasizing the features of Portuguese most challenging for Spanish Speakers: pronunciation, idioms, and grammatical structures peculiar to Brazilian Portuguese. Over the course of the semester, students learn to express themselves effectively using their Brazilian voice, distinct from their Spanish voice. Students experience contextualized Lusophone culture through music, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes: Conducted entirely in Portuguese. Requires a solid knowledge of but not necessarily native proficiency in Spanish. May not be taken
Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

PLEASE NOTE: Class time, Teletandem and Recitation Sessions may be subject to change based on students’ time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Class Notes:
This course requires 3.15 hours of synchronous instruction weekly, which includes Recitation session (45-minute discussion session) and one-hour Teletandem session (Lab) TBD.

Recommended Prep:
Prerequisite: 720 on the Spanish SAT II or the Harvard Placement test; 5 on the Spanish AP test; a 30s level Spanish course; or permission of Course Head.

**Portuguese 11S**

Beginning Portuguese for Spanish Speakers II: More SAMBA, less Salsa! (110641)

*Benedict Cruz*

2020 Fall (4 Credits)  
**Schedule:** MWF 0900 AM - 1015 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Portuguese 11S is a continuation of Portuguese 10S. This course guides students to continue the work of confronting features of the Portuguese phonological system that are most challenging for Spanish speakers. It helps solidify the student's foundation in Brazilian Portuguese, and pushes them to go deeper by engaging with literary readings, examining unique cultural aspects in addition to practical points of the language. Students will continue to experience contextualized Lusophone culture through music, film, literature, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

**Course Notes:** Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Portuguese 15

Intensive Beginning Portuguese: A Pathway to Luso-Brazilian Cultures (156944)

Viviane Gontijo

2021 Spring (8 Credits) Schedule: MWF 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This intensive Beginning Portuguese course provides an accelerated introduction to Portuguese with emphasis on interpersonal communication and interpreting and producing language in written and oral forms. Goals include building students’ vocabulary, fluency, proficiency, and confidence. Students are exposed to Brazilian Portuguese and culture through music, cinema, and various media sources. The course covers the equivalent of a full first-year of Portuguese language study.

Course Notes: This course requires an average seven contact hours per week. To supplement the scheduled 6.25 hours, a weekly online component will be arranged. May not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the Portuguese 15 course head and receive permission to enroll in the course. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: An advanced knowledge of at least one other foreign language but no knowledge of Portuguese.

An intermediate course for students interested in expanding and strengthening their Portuguese language skills. Reading, writing, and conversational competencies are emphasized through a panoramic study of Luso-Afro-Brazilian Theater. The course will continue to promote cross-cultural understanding by introducing learners to different textual genres such as screenplays, critical review as well as a selection of literary work that represents the Lusophone arts. The weekly online Teletandem interaction with college students in Brazil, unique to the Portuguese Program, allows learners to discuss readings, and engage in peer-review of writing completed for this course.

Course Notes: Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department. Portuguese 30

Upper-Level Portuguese: Lusophone Culture in Bits and Pieces (114944)

Viviane Gontijo

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

This course engages in a systematic review of grammar, along with writing practice and vocabulary enrichment, while examining contemporary society as presented in the Portuguese-language press, television and film. PORTUGUESE 30 analyzes the ways in which Luso-Afro-Brazilians construct different and conflicting images of Angola, Brazil, Cape Verde, Portugal, and Mozambique. Class discussions are based on a variety of content, including advertisements, documentaries, and current periodicals.

Course Notes: Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department.

Class Notes: This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, asynchronous tasks or workshop will be arranged each week.

Recommended Prep: PORT 20 OR permission of Undergraduate Advisor in Portuguese and Brazilian Studies.

Requirements: Prerequisite: Portuguese CREQ; PORTUG 30

Portuguese and the Community (118080)
Viviane Gontijo
2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: n/a
This is an advanced language course examining the Luso-African-Brazilian experience in the United States.
This course promotes community engagement as a vehicle for greater linguistic fluency and cultural
understanding. Students are placed with community organizations within the Boston area and volunteer for four hours a week. Class work will focus on expanding students' oral and written proficiency through discussing and analyzing readings, arts, and films by and about Luso-African-Brazilians in the US.

Course Notes: Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

Recommended Prep: Prerequisite: PORTUG 40 or 50 or permission of the Undergraduate Advisor in Portuguese and Brazilian Studies

Requirements: Prerequisite: Portuguese C OR Portuguese 30

Women's Voices in the Brazilian Literary Tradition (216399)

Viviane Gontijo

2020 Fall (4 Credits)

Schedule: W 0515 PM - 0600 PM
          M 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Historically, among the most noteworthy yet underrepresented contributions to literature have been those made by women. In this course we will explore a range of Brazilian Literature created by women. Students will approach works by Clarice Lispector, Lygia Fagundes Telles, Cecilia Meireles, Luisa Geisler among other Brazilian women, with particular consideration given to both social context and literary craft. Major topics for discussion and analysis will include power relations and poverty, family structures and dynamics, identity and gender construction, and the intersection of gender with race and ethnicity. Readings will encompass short stories, poetry, and novels by and about these notable Brazilian writers spanning the last century. By closely examining the voices of such significant authors, participants will develop and strengthen their skills in critical and analytical reading and writing, as well as improve their overall academic discourse in Portuguese.

Course Notes: Course will be taught in Portuguese. Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Class Notes: This course will meet synchronously 2 hours per week.

Recommended Prep: PORTUG 50, 59 OR permission of Course Head.

Writing and Urban Life (207683)
Bruno Carvalho
2020 Fall (4 Credits)  Schedule: TBD
Instructor Permissions: Instructor  Enrollment Cap: 12
In this seminar we will explore literary representations of urban experience, and how the evolution of cities has been shaped by writing. Topics include the impact of technology on cities as lived and imagined spaces; interfaces between literacy, orality, and visual cultures; intersections between fiction, poetry, and social history; porous boundaries between built and natural environments; relationships between modernity, writing, and urban planning. Focus will be placed on major cities of the Portuguese-speaking world and authors like Machado de Assis, Fernando Pessoa, Patricia Galvão, and Clarice Lispector.

Course Notes: The seminar will be conducted in Portuguese.
Class Notes: Course schedule will be determined in consultation with students, based on enrollment.

Subject: Spanish

Spanish  10  
Beginning Spanish I (124982)

Jorge Mendez Seijas  
2021 Spring (4 Credits)  
**Schedule:** MWF 0900 AM - 1015 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

A basic beginning semester course for students with no previous study of Spanish. Emphasis on speaking, writing, reading, and listening, as the basis for the development of all three Communication Modes (Interpersonal, Interpretive, and Presentational). Hispanic cultures will be introduced through a variety of texts, including readings, music, art, and film.

**Course Notes:** Conducted in Spanish. Open to students who have not previously studied Spanish or who have scored below 300 on the Harvard placement test. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher.  PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.
This course is taught by members of the Department.

Instructor Permissions: None Enrollment Cap: n/a

For students with the equivalent of one semester previous study of Spanish. Emphasis on strengthening students' interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and newspaper articles. Music, art, and film are also included. After Spanish 10 and 11, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head,
students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students’ time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.

Spanish  20 Section: 003

Intermediate Spanish: Language and Culture in the Hispanic World (125011)

Adriana Gutierrez

2020 Fall (4 Credits) Schedule: MWF 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

An intermediate language and culture class that aims to consolidate and expand the skills of listening comprehension, speaking, reading and writing in Spanish. Includes a comprehensive review of the grammar and reinforces linguistic acquisition through texts, movies, art and multi-media projects to acquaint students with cultural issues relevant to the Spanish-speaking world.

Course Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: Spanish Ab, Acd, 451-600 on the SAT II test or on the Harvard Placement Test, or permission of course head.

Spanish  40

Advanced Spanish Language I: Viewing the Hispanic World (125014)

Johanna Damgaard Liander

2020 Fall (4 Credits) Schedule: MWF 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

An advanced language and culture class that further develops linguistic competence using a region or regions of the Hispanic world as a focus for class discussion, grammar review, and an introduction to Hispanic social contexts and texts. Course materials may also include films, interviews, paintings, photography, music, selections from the press, as well as literary or historical readings. Frequent written and oral assignments, and a thorough review of grammar. Consult course website for current semester topics.

Course Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: A score between 681-720 on the SAT II test or on the Harvard Placement Test, AP 5, Spanish 30, or permission of course head.

Spanish 49H

Language and the Latinx identities (109820)

Maria Parra-Velasco

2020 Fall (4 Credits)  Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Instructor  Enrollment Cap: 15

This course builds on students' knowledge of Spanish to explore the relationship between their languaging practices and their Latinx identities. Understanding languages as a way of knowing and meaning making, we use a variety of texts, genres, music, videos, films and visual arts to engage in discussions about family heritage, migration, and Latinx cultural and linguistic traditions and innovations. Students will strengthen their oral and written abilities, expand their interpersonal, interpretive and performative resources for languaging in informal and academic contexts.

Course Notes: Spanish 49h was formerly Spanish 35; therefore, students cannot take 49h if they've already taken 35. Spanish 49h should be a prerequisite for 59h (or permission of the instructor). PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Spanish 50

Advanced Spanish II: Creative Writing and Performance (115920)

Adriana Gutierrez

2020 Fall (4 Credits)  Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None  Enrollment Cap: n/a
An advanced language course designed to strengthen and develop competence in written expression. Close reading of texts in literary and non-literary genres will help students refine personal style. The performance of short excerpts of plays, combined with advanced work on oral expression and phonetics, will help students increase their fluency and ease of expression.

Course Notes: Conducted in Spanish. Recommended for concentrators. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: A score between 721-750 on the SAT II test or on the Harvard Placement Test, Spanish 40, or permission of course head.

Spanish for Latino Students II: Connecting with Communities (159938)

*Maria Parra-Velasco*

2021 Spring (4 Credits)  
**Schedule:** TR 1200 PM - 0115 PM

**Instructor Permissions:**  
Instructor  
Enrollment Cap: 15

An advanced language course for Spanish heritage learners that aims to: strengthen students' oral and written linguistic range, with emphasis on Spanish use for academic contexts; and to further develop students' critical language and social awareness around important issues for Latinos in our globalized era: Spanish as global language, identity, language rights, global migration and labor, U.S.-Latino America relations, food and environment, the 'war on drugs'. Students explore these topics through various genres (newspapers and academic articles, debates, literary essays, short novels, poetry, visual art, film and music) and through 4 hours a week of community service.

The Ethics of Business in Latin America (127573)

*Adriana Gutierrez*

2021 Spring (4 Credits)  
**Schedule:** TR 0130 PM - 0245 PM

**Instructor Permissions:**  
Instructor  
Enrollment Cap: 30
An advanced language and culture class that examines literature and films portraying the political, sociological, financial and environmental impact of multinational companies doing business in Latin America. Students’ linguistic competency is developed through discussion of the ethics of business, grammar reviews, and weekly writing assignments. Students will also choose a specific project for a business in Latin America and research its possible outcome and social, political, and environmental consequences.

Course Notes: Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Recommended Prep: A score between 751 and 780 on the SAT II test or Harvard Placement test, a Spanish 50-level course, or permission of course head. Students are allowed to take a maximum of two courses at the 60-level in Spanish, not including Spanish 60.

Introduction to Latin American Studies: Modernity, Culture and Politics (116263)

*Mariano Siskind*

2020 Fall (4 Credits)  
**Schedule:** M 0600 PM - 0800 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Introduces students to central debates and problems that have shaped Latin American culture. We address questions of cultural identity, gender, race, politics, economics and aesthetics by looking at historical and literary texts, films, visual arts and urban development from an interdisciplinary perspective. We analyze colonial encounters; revolutions; US-Latin American relations; popular cultures from tango and samba to football and *carnaval*; Latin American cities and slums; and memory, trauma and traces of the region's dictatorships.

**Course Notes:** Conducted in Spanish. Readings in Spanish and English.

Spanish 72

Introduction to Contemporary Spanish Literature and Culture (207836)

*Raquel Vega-Duran*

2021 Spring (4 Credits)  
**Schedule:** W 0945 AM - 1145 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

This course introduces students to the literature, history, and visual culture of contemporary Spain (from the 18th century through the first twenty years of the 21st century). We will study representative short stories, poems, plays, novellas, essays, paintings, photographs, and films from the Spanish War of Independence, the "disaster" of 1898, the Surrealist movement, the Spanish Civil War and the Republican Exile, Franco's Dictatorship and the Transition to Democracy, the "Movida Madrileña," and the literature of immigrants and "new" Spaniards. Through visual and written works by Goya, Galdós, Campoamor, Bécquer, Pardo Bazán, Azorín, Unamuno, Lorca, Machado, Buñuel, Laforet, Matute, Almodóvar, Martín Gaite, Puértolas, and others, students will gain a general knowledge and appreciation for main works, periods, and authors of contemporary Spain, and will appreciate the uniqueness and diversity of Spanish culture by establishing transnational relations between Spain and Latin America, North Africa, Asia, and Europe. All readings will be in Spanish, although we will look at texts originally written in Spanish, Catalan, Galician, and Basque.

**Course Notes:** Taught in Spanish.

Words of Which History is Made: Translation Workshop on Modern Spain (126860)

*Daniel Aguirre-Oteiza*

2020 Fall (4 Credits)  
**Schedule:**  
W 1245 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

Through close readings and translations centering on Spanish history and society from the late 19th to the 21st century, students hone their linguistic, grammatical, and stylistic skills, and acquire the interpretive tools required to analyze increasingly complex literary and cultural texts. Course materials include short fiction, newspaper articles, memoirs, and historical essays.

**Course Notes:** Conducted in Spanish. Recommended for concentrators.

**Recommended Prep:** A score of 800 on the SAT II test or on the Harvard Placement test, a previous course in Spanish at the 70-level, or permission of course head.

Table Talk and Food Writing (205164)

Johanna Damgaard Liander

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 15

From classroom to kitchen, picnic or café, this advanced language and food culture course will examine the Spanish table, its history and origins, expansions and innovations, from medieval times to present-day molecular gastronomy. Frequent reading, viewing and writing assignments and classroom discussion are all designed to reinforce language skills and academic literacy in the target language. The course, along with all materials and assignments, is entirely in Spanish, primarily focusing on literary, historical, linguistic and sociological texts and topics from Spain—selections ranging from Harvard’s vast culinary collection to the most current media—with reference to Latin America and the Latino community in the United States, as well.

Course Notes: This course is taught in Spanish.

Recommended Prep: A score of 750 or beyond on SAT II or Harvard Placement; previous enrollment in Spanish 50 or higher; or permission of the instructor.

Inspiring Women: The History of Women in Spain in Dialogue with Hispanic America (211120)

Raquel Vega-Duran

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 12

In this course we will examine the significant role of women in society, politics, history, and culture from the Middle Ages to the 21st century on both sides of the Hispanic Atlantic. Through films, political speeches, manuscripts, short stories, novels, newspaper articles, memoirs, and visual art, we'll study women's history, voices, and experiences in Spain, and we will often put them in dialogue with women who lived at the same time on the American side of the Atlantic. We will examine medieval beguines, witches, healers, and the Inquisition; heroines, queens, adventurers, and explorers in the Spanish empire; depictions of women at war; the relevance of age, maternity, body, and education for women; suffragettes, women politicians, and feminist movements; the "visible invisibility" of women during the early dictatorship; women in the works of male authors such as Federico García Lorca and Pedro Almodóvar; women painters, imagined, and imaged in Spain and Latin America; the concept of "third gender"; and the feminization of immigration in the twenty-first century; among other topics.

Course Notes: Conducted in Spanish.

Culture and Development in Reciprocity: Paraguay (217638)

Doris Sommer

2021 Spring (4 Credits) Schedule: F 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 20

This seminar is an interdisciplinary approach to research about Paraguay that takes Reciprocity, a core practice in Latin American cultures, as the pedagogical structure for studying the region. Harvard students will work in reciprocal collaboration with students in Paraguay.

The first half of the semester will introduce a range of topics that include arts, social mobilization, ways of learning, environment, and public policy. By mid-semester students form pairs based on shared interests and choose a question to develop together. Harvard offers important resources for the team and Paraguay offers other important resources. Student-to-student interchanges will allow for ongoing and reciprocal social and scholarly development.

The seminar has two fundamental objectives: 1) to foster intercultural research through collaborations that combine perspectives on readings and inquiries; and 2) enhance capacity in English and in Spanish, reciprocally, as students read closely together and write persuasively. Pre-Texts will be the pedagogy for achieving language proficiency. Our institutional partner is Paraguay’s Instituto Desarrollo, directed by José Molinas. It will serve as co-mentor for the student teams and will provide guidance for accessing resources and convening relevant scholars in Paraguay.

The co-written final paper for the course will be a "Case for Culture." This is a hybrid essay that combines humanities with social and/or natural sciences to develop the kinds of interdisciplinary collaborations made possible by reciprocity.

Course Notes: This course in Spanish with readings and advising in both languages.

Class Notes: This course is co-taught with José Molinas, Instituto Desarrollo, Paraguay

Immigration and the Globalization of Borders (206816)
Raquel Vega-Duran
2021 Spring (4 Credits) Schedule: M 1200 PM - 0200 PM
Instructor Permissions: Instructor Enrollment Cap: 12
This course explores how film, painting, photography, literature, and multimedia projects relate to and narrate contemporary borders such as those between Mexico and the USA; Spain and Morocco; Haiti and Dominican Republic; the five borders of Manipur; other "border spaces" such as the enclosed migrant detention centers in Ceuta (Spain), Lampedusa (Italy), and California; the emergence of "new" identities such as "New Europeans," "Latinoles," the Mei Ming generation, and the perception of Roma in Europe; and the patrolled waters that separate Cuba from the US, West Africa from the Canary Islands, and North Africa from Southern Europe; among others. We will pay particular attention to the history of these walls, fences, and controlled spaces, and the stories they tell us, and consider border-crossing experiences of migrants from a variety of perspectives. We will look in depth at the role of art in relation to these walls, both on the actual walls (artists who use the fences as canvases, such as the project "Borrando la frontera" in the San Diego/Tijuana border, and Ulises, a graphic novel written on the wall of the North African city of Melilla), as well as the ways in which these walls are chronicled in literature, film, photography, and painting (including Danticat's novel The Farming of Bones; Spottorno's graphic novel on refugees La grieta; the online project Poets on Borders; Sebastiao Salgado's photographic cycle Migrations; and movies such as Sin nombre and Balseros; among other works).

Course Notes: Conducted in Spanish.

Narratives of Identity about 19th- and 20th-Century Spain (207918)
Daniel Aguirre-Oteiza

2020 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 12

What are the connections between narrative and identity? To what extent are our personal and collective identities shaped by received ideas of "others"? How does questioning "others" help us understand our ideas of culture, nation, and polity? In what ways are fear, hate, pain, and identity narratively related? What's the value of asking these questions when we read modern fiction about Spain? Texts by Cercas, Clarin, Laforet, Ndongo, Saer, Semprun, among others.

Barcelona and the Catalan Culture (109775)
Aina Obis Monne

2021 Spring (4 Credits)  
Schedule: MW 0300 PM - 0415 PM  
Instructor Permissions: None  
Enrollment Cap: n/a

The course offers an interdisciplinary approach to Barcelona, a multilayered space furnished by Roman, French, Muslim, and Spanish legacies that shaped a singular culture and language. Developing from periods of egalitarian social and political institutions in the Middle Ages to strong socioeconomic industrial development in the 19th century and later tourism, Spain's most European city is inscribed by a deep sense of civic and industrious society permanently seeking innovation and modernity, yet facing the consequences of its complex past. Through readings of historians, art critics, urban designers, and writers, and supported by visual materials, the course offers an integrated perspective which opens questions in every field of the Humanities and the Social Sciences on Catalan and Hispanic Cultures.

Course Notes: The course will be conducted in Spanish. The readings will be in English & Spanish.

The Borges Machine (108752)
Between 1923 and 1970, Jorge Luis Borges wrote some of the most original poems, short stories, essays and film scripts in Latin America and anywhere in the world, and he redefined the meaning and scope of literature. In this course, we will examine the signifying power of Borges' short stories, essays and poems, and we will consider his work as a literary machine whose output radically transforms aesthetic formations and imaginaries beyond Argentina and Latin America. Rather than thinking about what his literature means, we will concentrate on what it produces as a fictional-poetic machine: cities and worlds, love and treason, popular and high culture, politics and death, institutions of knowledge and traditions, and new ways of reading and thinking about aesthetic and social relations.

Class Notes: This course will be taught in Spanish for Spring 2021.

Subject: French

French 10

Beginning French I: Cross-Cultural Encounters in French (126933)

Nicole Mills

2021 Spring (4 Credits) Schedule: MTWR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

This beginning French course addresses the theme of cross-cultural encounters in French through engagement in the discussion and interpretation of texts, art, images, and film. You will gain an introduction to the French language with emphasis on interpersonal communication and the interpretation and production of language in written and oral forms. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the French language and francophone culture(s). Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms.

Course Notes: French 10 is an elementary French course for students with little or no knowledge of French. French 10 may count toward the language requirement. Open to students who have not previously studied French or who have scored below 300 on the Harvard placement exam. Students who have studied French for two years or more in secondary school must begin at French 11 or higher. May not be taken Pass/Fail. Not open to auditors. Graduate students may take the course SAT/UNSAT with permission of course head. French 10 is taught by members of the Department.

Beginning French II: Paris in Virtual Reality (126935)
Nicole Mills
2021 Spring (4 Credits) Schedule: MWF 0900 AM - 1015 AM
Instructor Permissions: None Enrollment Cap: n/a

In the second course in the Beginning French sequence, you will engage in a virtual simulation of life in Paris. The course will immerse you in the French language and Parisian life through virtual reality experiences, social networking platforms, and interactive discussions with native French speakers. Topics explored in the class include surrealism at the Centre Pompidou museum, Harlem musicians in Paris, the quarters of Paris, and current events (i.e., yellow vest movement, Covid19, etc.) As a result of this exploration, you will begin to be able to speak and write in the past, present, and future tenses, make
In the second course in the Beginning French sequence, you will engage in a virtual simulation of life in Paris. French 16
Reading, Understanding and Translating Written French for Research (111933)

Nicole Mills

2020 Fall (4 Credits) Schedule: TR 0900 AM - 1015 AM
Instructor Permissions: None Enrollment Cap: n/a

French 16 offers an introduction to reading and translating academic French texts for students who require a basic knowledge of French for research purposes. The course presents vocabulary and the principal structures of French grammar in a systematic and coherent order. The course begins with simple texts and advertisements, then moves to academic texts with more complex structures, and ends with the translation and analysis of literary works and philosophical texts. The assignments are discipline-specific to accommodate students' research needs. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and discussion.

Course Notes: Conducted in English. Not open to students with a score of 500 or above on the Harvard Placement Test or the SAT II French test, to those with more than one year of undergraduate French, or to auditors. May not be used to fulfill the language requirement and may not be taken Pass/Fail, but may be taken Sat/Unsat by graduate students with permission from the course head. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

French 20

Intermediate French: Francophone Culture in Local Communities (126938)

Karen Turman

2021 Spring (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a

Schedule: MWF 1200 PM - 0115 PM

Recommended Prep: Some previous study of a Romance language helpful but not necessary. Fluency in English required.
In this intermediate-level language course, you will review your knowledge of various grammatical structures by exploring cultural topics such as music, dance, and cuisine in French-speaking communities. Themes such as family life in West Africa, immigrant communities from Haiti, and cuisine in Morocco will be broached through communicative activities to further develop proficiency in reading, listening, speaking, and writing. You will discover francophone cultures through conversations with online language partners abroad, guest visitors via Zoom, and course materials including film, music, and texts. The course will be conducted through synchronous Zoom sessions as well as asynchronous activities using Voice Thread, Slack, and Canvas. Course assignments include contextualized grammar activities, creative writing compositions, oral presentations, video projects, and online discussions.

Course Notes: Conducted in French. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

In order to accommodate the shift to the online course format, the four contact hours per week that were previously required will now be a combination of online synchronous Zoom sessions with the full class and/or small groups in addition to asynchronous Voice Thread activities and online partner conversations through the Talk Abroad platform. To this end, students will be required to purchase an access code for Talk Abroad ($40-50) as part of the course materials.

Class Notes: This course requires an average of four contact hours per week. To supplement the scheduled 3.75 hours, a 30-minute online component will be arranged every other week. To this end, students will be required to purchase an access code for the online conversation program, Talk Abroad ($40-50).

Recommended Prep: A score no lower than 451 and no higher than 600 on the SAT II test or the Harvard Placement Test; 3 years of French in high school; French 11 or 15; or permission of course head.

**French 30**

Upper level French : Current Events and Media in the Francophone World (126942)

_Ericka Knudson_

2021 Spring (4 Credits)  

**Schedule:** TR 0300 PM - 0415 PM  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a  

In this advanced intermediate course, you will explore current events in French-speaking countries through a variety of media. Engaging in interactive communicative activities, both synchronously and asynchronously, you will cover topics associated with politics, art, sports, literature, and scandal. From the written press to social media, you will interpret and analyze authentic texts, including newspaper articles, music, images, film, and advertisements. You will also refine your speaking skills through class discussion as well as in conversations with native speakers abroad. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class, in small groups and with online guest speakers. Asynchronous online activities will develop your interpretive and presentational skills in French on various platforms. Course assignments include a collectively developed online newspaper and a news broadcast or cultural program. This course will be conducted entirely in French.

**Course Notes:** Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details on the French 30 Canvas site. This course is taught by members of the Department.

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, a 30-minute online activity or workshop will be arranged each week. To this end, students will be required to purchase an access code for the online conversation program, Boomalang ($30).

**Recommended Prep:** A score no lower than 601 and no higher than 680 on the SAT II test or the Harvard Placement test; French 20; or permission of course head.

Advanced French I: The Contemporary Francophone World Through Cinema (126997)

*Ericka Knudson*

2021 Spring (4 Credits)  
**Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: Instructor  
Enrollment Cap: n/a

In this advanced French language and culture course, you will explore francophone culture(s) through contemporary films. The course is designed to strengthen language proficiency, explore different registers of language, and further refine your grammatical understanding while offering an introduction to film analysis. You will engage in interactive communicative activities, both synchronously and asynchronously, exploring themes such as regional differences, Paris and the banlieue, immigration, post-colonialism, cinematic self-portraits, and gender through readings such as film reviews, interviews with directors, and script excerpts. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class and in small groups. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms. Course work also includes creative interactive writing assignments, short compositions, scripts, and a short film. No previous familiarity with film study is necessary. This course is conducted entirely in French.

Course Notes: Conducted in French. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, a 30-minute online activity or workshop will be arranged each week.
Recommended Prep: French 30, 681-720 on the SAT II test or the Harvard Placement test; or permission of course head.

French  50

Advanced French II: Écrivons droit(s)/ Writing Right(s): Justice, Equity, Rights, and Writing (126998)

Karen Turman

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Through the lens of social justice issues in France and the Francophone world, this class will focus on writing as a means of civic engagement. You will interrogate topics such as colonialism, islamophobia, immigration, and sexism by studying a range of creative, analytical, and polemical texts, images, and film. This course builds on the communicative competence acquired in French 40, with a particular emphasis on developing your writing proficiency through creative and analytical writing projects such as description, portrait, film review, and polemical essays. This course will be conducted through synchronous Zoom sessions and scheduled Talk Abroad conversation meetings as well as asynchronous activities using Voice Thread, Slack, and Canvas.

Course Notes: Conducted in French. Students may take no more than two courses numbered in the 50s. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

In order to accommodate the shift to the online course format, the four contact hours per week that were previously required will now be a
combination of online synchronous Zoom sessions with the full class and/or small groups in addition to asynchronous Voice Thread activities and online partner conversations through the Talk Abroad platform. To this end, students will be required to purchase an access code for Talk Abroad ($40-50) as part of the course materials. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: French 40; a score of 721-750 on the SAT II test or the Harvard Placement test; or permission of course head.

French 61C
The New Wave: Reinventing French Cinema (109320)

Ericka Knudson

2021 Spring (4 Credits) Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

- This advanced language and culture course explores a unique perspective on French society and culture through New Wave films from the late 1950s and 1960s. Through synchronous and asynchronous communicative activities, and weekly film screenings, you will engage in interactive discussions and debates on topics associated with gender, aesthetics, and literary influences. You will interpret and analyze different registers of language in film scripts and literary texts and further develop your writing proficiency for academic contexts through written film analysis (begun in French 40) and theoretical papers designed to prepare you for 70-100 level courses. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication as a full class and in small groups. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms. For the final project, you will write a script and develop it into a short film.

Course Notes: Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Students may take no more than one course at the 60-level.

Recommended Prep: French 50 or another French course at the 50-level; 751-780 on the SAT II or the Harvard placement test; or permission of the course head.

This advanced language and culture course examines modern narratives, in a mosaic of perspectives, set in and around Paris. Through synchronous and asynchronous communicative activities centered on the interpretation and analysis of texts, films, songs, and interviews, as well as interactive online discussions with guest speakers from Paris, you will discover diverse stories about the Parisian experience. By reading, watching and listening to these stories, you will gain insight into various forms of narration and refine your knowledge of written and spoken French grammar and vocabulary. The course will focus on typical gaps found in advanced learners' linguistic repertoires, such as contemporary slang, and refine your ability to distinguish different registers of language. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class and in small groups. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms. Course work also includes creative writing assignments and a final project that will solidify your ability to imagine, summarize, interpret, critique, and substantiate arguments about the Parisian experience.

Course Notes: Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by graduate students. Students may take no more than one course at the 60 level.

Recommended Prep: French 50 or another French course at the 50 level; 751-780 on the SAT II or the Harvard placement test; or permission of course head.

Exploring French Language and Culture Through Industry: Fashion, Cabarets, and les Grands Magasins (148202)

Karen Turman

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

In this advanced French language and culture course, you will refine your communicative competence by navigating the cultural landscape of French industry. Through the analysis of articles, images, literary texts and discussions with classmates and invited guest speakers, you will explore topics such as the invention of the department store in Paris and the commercialization of art and entertainment in Montmartre during the Industrial Revolution. Course assignments include weekly essays, in-class debates, exams, an oral presentation, and a final project.

Course Notes: Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details and section on-line on the French 61N website.

Recommended Prep: A score of 721-750 on the SAT II test or the Harvard Placement test; French 40 or 50; or permission of course head.

Exploring French Language and Culture Through Industry: Fashion, Cuisine, and Cabarets (217619)
Karen Turman
2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  None  Enrollment Cap:  n/a
In this advanced French language and culture course we will interrogate themes such as class, space, and cultural appropriation through the lens of marketing, sustainability, and business ethics in France. By contextualizing examples ranging from the department stores on Boulevard Haussmann to the commercialization of art and entertainment in Paris during the 19th century, we will explore the evolution of major French industries and their cultural legacy today. To this end, we will analyze videos, articles, literary texts, and images as well as engage with guest speakers from France as well as the Harvard community. Course work will include daily readings and exercises, in-class and online written and oral assessments, compositions, a video presentation, and a final written project.

Recommended Prep:  A score of 750-780 on the SAT II test or the Harvard Placement test; French 50; or permission of course head.

French 75
Text and Image: Novels & their Film Adaptations (216059)
Annabel Kim
2020 Fall (4 Credits)  Schedule:  TBD
M 1030 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  10
This course is an introduction to French literature spanning from the seventeenth century (Madame de Lafayette) to the contemporary moment (Virginie Despentes) that reads French classics against and alongside their cinematic adaptations. What can a text do that an image cannot? What can the image do that language cannot? By reading these novels in relation to the adaptations they inspired, we will explore the limits and possibilities of narrative and see how reading and interpreting become a way to make new narratives.

Course Notes:  Conducted in French.

Class Notes:  Conducted as a tutorial (modeled after the intense, two-on-one tutorials taught at Williams College, themselves modeled after the Oxford tutorial), this course places great emphasis on student participation and engagement, and will offer students the opportunity to get to know and engage with each other and the professor in ways that even a small seminar cannot offer. Please see course Canvas site for more detailed information.

Class Notes:  This course will meet 2x/week, 75 minutes each session. The first session will meet on Mondays, 10:30-11:45, but this can be modified in
order to accommodate time zones. The second meeting session will be determined based on students' schedules.

French Theater Across Time and Media: An Introduction to Performance, or Why Theater Matters (109826)

Sylvaine Guyot

2020 Fall (4 Credits)  

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor  

Enrollment Cap: 12

Aims to help students, including those who are genuine novices in acting, to understand and experience theater as a form of physical expression that evolve as aesthetic and ideological contexts change across time. Readings include the most famous French playwrights of both the early modern age (Molière, Corneille, Racine) and the later 20th / early 21st centuries. We explore how theater is used to interrogate questions such as sexual taboos, social injustices, or political engagement. Special emphasis paid to the power of performance through practical workshops and videos of recent productions. The final project consists of an excerpt to be performed in French.

Course Notes: Conducted in French. May not be taken for credit by students who have previously taken French 71a or FRSEMR 30r.

Class Notes: Additional discussion section to be determined based on student enrollment.
Recommended Prep: A 60- or 70-level course in French; a score above 780 on the SAT II test or the Harvard Placement test, equivalent preparation, or permission of course head.

Crimes of Passion: Balzac's Short Stories (161239)

Janet Beizer

2020 Fall (4 Credits) Schedule: W 0300 PM - 0500 PM

Instructor Permissions: None Enrollment Cap: n/a

Readings of Balzac’s turbulent short stories will be complemented by consideration of the culture of crimes of passion, and the influence of the developing media in France as we work with newspapers, film, and art for a broad-based historico-cultural background.

French 136

A La Francaise: French Feminisms Today (108716)

Alice Jardine

2021 Spring (4 Credits) Schedule: M 1200 PM - 0200 PM

Instructor Permissions: None Enrollment Cap: n/a

Close readings of postwar French fiction and theory with emphasis on what is called "the feminine" in key psychoanalytic, philosophical, and literary writings of the French poststructuralist tradition. In particular, we will focus on fifty years of dialogue between postwar theory in France and feminist practice in the United States. Writers considered include Cixous, Duras, Irigaray, Kristeva, and Wittig as well as Deleuze, Derrida, and Lacan.
French 143
Vision and Violence: Face-to-Face Encounters, Affects, and Politics in Early Modern France (127874)

Sylvaine Guyot

2021 Spring (4 Credits) Schedule: W 0945 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

Explores early modern ways of depicting and showing violence (physical, political, domestic, supernatural). The spectacle of violence represents a site of cultural conflict during the 17th century, since it implies both the pleasure taken by the viewer and the risk of imitation. Readings include plays, tragic histories, utopian and travel literature, historical and theoretical texts (Foucault, Rancière, Marin, Elias, Lyotard), and the analysis of images (paintings, frontispieces).

Course Notes: Conducted entirely in French.

French 147
Inventions of Liberty: Day, Night, and Geography of the Enlightenment (216090)

Tom Conley

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

Building on Starobinski’s The Invention of Liberty, this course aims to follow an itinerary that goes from the reign of the Sun King (1714) to the tribulations of the Terror (1793) and Napoleon’s rise to power, from "subject" to "citizen". The starting question will be: how did the great Enlightenment writers «invent» the concept of 'liberty'? For what reasons and to what ends? An unavoidable question: if the century celebrates the «day», where does that leave the «night»? Following Starobinski, the course will cover spaces urban and rural, public and private, in Europe and in the colonies, as well as human geography. We will examine the socio-political changes that lead to the Revolution of 1789, as well as what follows: modernity.

Course Notes: This course will be taught in French.

Class Notes: First class meeting will be Thursday, September 3rd at 3:00. Remaining course schedule will be determined based on student enrollment.

French 149
Queer Fictions (205160)
Annabel Kim
2021 Spring (4 Credits) Schedule: F 1200 PM - 0200 PM
Instructor Permissions: None Enrollment Cap: n/a
A survey of modern and contemporary twentieth- and twenty-first-century queer French literature. We will begin first with an introduction to some canonical texts in queer theory (e.g. Sedgwick, Butler, Bersani, Warner) and proceed to the fictions (Genet, Guibert, Louis, Leduc, Wittig, Best, Garréta) to see the ways in which literature itself theorizes and does the work of deconstructing identity and desire.
Course Notes: Conducted in French, except for the first two weeks, which will be conducted in English.

"The Words to Say It": 20th-century Women Writing in French, From Colette to Satrapi (126038)
Alice Jardine
2020 Fall (4 Credits) Schedule: M 1200 PM - 0200 PM
Instructor Permissions: None Enrollment Cap: n/a
Motherhood, romantic love, independence, sexuality, citizenship, fantasy, death: these are just some of the themes explored in women’s novels, written in French, during the twentieth century. Students will read four exemplary novels, exploring how they have finally become classics, even given what they say about life
and what it means for women to write about it. At the same time, the advent and development of feminist and/or queer literary criticism over the course of the 20th century will be explored. Finally, we will consider what this 20th-century trajectory means for women writers today, culminating our study in a discussion of a 2016 novel that took the Francophone world by storm. The seminar has been modified to reflect distance learning requirements leading to a lively and successful seminar experience while ensuring everyone’s safety.

France-North Africa, Encounters in Literature and Film: Cultures of Protest and Violence (211119)

Verena Conley

2021 Spring (4 Credits)  
Schedule: R 0300 PM - 0500 PM  
Instructor Permissions: None  
Enrollment Cap: n/a  

Focusing on fiction, film and other media, this course deals primarily with encounters between North Africa, Algeria, Morocco, Tunisia and France; but also, with Italy and Spain, from independence to today. Through the lens of protest cultures and violence, we will study and compare political, social and media entanglements among countries joined and separated by the Mediterranean, from colonial uprisings to the "Black decade" of terror, the Arab Spring, disenchantment with nationalisms, and today's forced migrations. Special attention will be paid to the ties between violence, protest and artistic forms.

French 245
Against Difference: Monique Wittig's Trojan Horse Writing and Theory (216060)

Annabel Kim
2021 Spring (4 Credits)  Schedule: F 0300 PM - 0500 PM
Instructor Permissions: None  Enrollment Cap: n/a

French feminism, as it is studied and taught in the Anglo-American academy, is most often associated with
the three names that constitute the "Holy Trinity" of Hélène Cixous, Luce Irigaray, and Julia Kristeva—thinkers whose various theorizations of sexual difference permitted the convergence of an emergent feminist literary criticism with high theory and all its cachet. The dominance of this differentialist vein of what is described as French feminism has effaced or obscured the rich but understudied tradition of anti-difference French feminism, which unequivocally rejects the notion of any kind of essential sexual difference.

This graduate seminar, which is open to advanced undergraduates, will explore the anti-differentialist strand of French feminism, taking Monique Wittig as our primary author and an exemplary figure of both feminist thought and literature—a figure for whom the literary is political and the political, literary. We will explore Wittig’s entire corpus, reading it alongside the major anti-differentialist French feminist thinkers with whom Wittig was in conversation—Nicole-Claude Mathieu, Christine Delphy, Colette Guillaumin, Paola Tabet—to chart out a different account of French feminism than we get with the more familiar history and poetics of differentialist French feminism. In doing so, we will explore how the story we tell of feminist theory is as essential to feminist projects as the theory itself.

Course Notes: Readings in French, discussions and written work conducted in English. Wittig’s fiction is available in inferior/questionable English translations. Students are welcome to read the English translations if they wish, and we can discuss how Wittig gets (mis)translated and what a difference translation makes.

Subject: Italian

Italian  10

Beginning Italian I - Parliamo Italiano! Pathways to Italy (113814)

Chiara Trebaiocchi

2020 Fall (4 Credits)  

Schedule:  

MTWR 1030 AM - 1145 AM

Instructor Permissions:  None  

Enrollment Cap:  n/a

This is a first semester beginning course designed for students with little or no knowledge of Italian. The course aims at achieving basic communication skills and vocabulary. Emphasis is on oral expression and listening comprehension. Listening/Speaking/Writing/Reading about what is, what has been, what will be (Indicative). The cultural component examines everyday life through a comparative perspective with emphasis on topics such as school, families, shopping, sports, and food culture. This course will give you the language you need to communicate effectively in Italian and to get ready for future adventures all'italiana. Course materials include workbook, audio-lab, video and other materials provided by instructor on Canvas. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

Course Notes:  Conducted in Italian. Students whose placement score does not entitle
them to enter a more advanced course are assigned to Italian 10. Students who have studied Italian for two years or more in secondary school must begin at Italian 11 or higher. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Italian 11

Beginning Italian II - Parliamo Italiano! The Art & Craft of Italy (125061)

Chiara Trebaiocchi

2021 Spring (4 Credits) Schedule: MWF 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

Picking up where Ital 10 left off, this is a second semester beginning level course. The course aims to consolidate reading and writing skills in Italian. Speaking/Listening/Writing/Reading about what would be, what might be (Conditional & Subjunctive). Cultural component includes units on fashion, music, literature and film, as well as capsules on the history of modern Italy through the movie La meglio gioventù. Course materials include workbook, audio-lab, video and other materials provided by instructor on Canvas. Class time will be supplemented with "TalkABroad" conversations. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the
course and outside of it).

Course Notes: May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students’ time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: Italian 10, or a score of 301-450 on the SAT II test or the Harvard Placement test, or a score below 3 on the Italian AP exam, or two years of high school Italian, or permission of course head.

Italian 11

Beginning Italian II - Parliamo Italiano! The Art & Craft of Italy (125061)

Chiara Trebaiocchi

2020 Fall (4 Credits)  Schedule: MWF 1030 AM - 1145 AM

Instructor Permissions: None  Enrollment Cap: n/a

Picking up where Ital 10 left off, this is a second semester beginning level course. The course aims to consolidate reading and writing skills in Italian. Speaking/Listening/Writing/Reading about what would be, what might be (Conditional & Subjunctive). Cultural component includes units on fashion, music, literature and film, as well as capsules on the history of modern Italy through the movie La meglio gioventù. Course materials include workbook, audio-lab, video and other materials provided by instructor on Canvas. Class time will be supplemented with "TalkAbroad" conversations. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

Course Notes: May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. Intensive Beginning Italian: Gateway to Italy (112340)

*Chiara Trebaiocchi*

2020 Fall (8 Credits) **Schedule:** MTWRF 0130 PM - 0245 PM

**Instructor Permissions:** Instructor **Enrollment Cap:** 15

This is an intensive and complete first-year course in one term for students with no knowledge of Italian, focused on developing all four communicative skills. Students are introduced to contemporary Italian culture through a variety of topics from everyday life (family, shopping, food, fashion) to the arts (music, literature, cinema). Materials include films and cultural readings that present capsules on the history of modern Italy (in particular through the movie La meglio gioventù). Course materials include workbook, audio-lab, video and other materials provided by instructor on Canvas. Class time will be supplemented with "TalkAbroad" conversations. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. **Italian 16**

Reading, Understanding and Translating Written Italian for Research (113582)

Chiara Trebaiocchi

2020 Fall (4 Credits)  

Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: None  
Enrollment Cap: n/a
This is a single-skill course for students (both undergraduate and graduate) with little or no knowledge of Italian. It aims at the rapid development of rapid comprehension skills as a tool for research and independent reading of both academic and literary texts. Materials will be selected in accordance with the needs and interests of enrolled students. Students will develop individual, semester-long reading/research "goals" in a field or on a topic of their choosing, which will become the primary focus of their work during the second half of the course. Past students have set (and met!) a wide variety of reading goals, such as: a Divinity School student investigating the life of an early 20th-century Tuscan saint and stigmatic; a Design School student tackling a 16th-century treatise on architecture; an undergraduate reading a novel of Elena Ferrante in the original Italian.

The course will have synchronous group zoom sessions to consider specific reading strategies and facilitate discussion among students. There will also be one on one zoom meetings with the instructor to best respond to each student individual needs.

Course Notes: Taught in English. Not open to auditors. May not be used to fulfill the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: Some previous study of a Romance language helpful but not necessary. Fluency in English required.

Italian  20

Intermediate Italian: Romance! Mystery? Noir...L'Italiano in Rosa, Giallo e Nero (128265)

Chiara Trebaiocchi

2020 Fall (4 Credits) Schedule: F 1200 PM - 0115 PM
                                 MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Using popular literary genres (from romance to crime stories to graphic novels: the rosa, the giallo, and the nero of Italian pop lit), this course aims to build reading skills and includes a structured review of grammar. By the end of this course you will read with more fluency, write with more accuracy, and talk about Italian pop lit through a colorful spectrum of oral and written expressiveness. Course materials include multi-media projects that increase language proficiency and cultural awareness (no textbook is required). Class time is supplemented with "TalkAbroad" conversations. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

Course Notes: Conducted in Italian. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the
Using popular literary genres (from romance to crime stories to graphic novels: the *rosa*, the *giallo*, and the *nero* of Italian pop lit), this course aims to build reading skills and includes a structured review of grammar. **Course Notes:** Conducted in Italian. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

**Recommended Prep:** A score of 451-600 on the SAT II test or the Harvard Placement test, or a score of 3 on the Italian AP Exam; Italian 11 or 15; or permission of course head.
This course revisits structures and refines speaking and writing skills through media and arts interface. This course is structured around what is happening in Italy, as reported in the news (print and multimedia), and as represented through pop culture (talk shows, song, social media). Assignments are built to strengthen receptive and productive communicative skills. Course materials may include news, films, popular music, podcasts, and literary texts, among others. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Short asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

Course Notes: Conducted in Italian. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students’ time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: Italian 20; a score of 601-680 on the SAT II test or the Harvard Placement test, or a score of 4 on the Italian AP exam; or permission of course head.

**Italian  40**

**Advanced Italian I: Oral Expression and Performance (116233)**

*Chiara Trebaiocchi*

2020 Fall (4 Credits)  
Schedule: TR 1200 PM - 0115 PM  
Instructor Permissions: None  
Enrollment Cap: n/a

This course aims to build interpretive, interpersonal, and presentational modes of communication, while engaging analytical and creative thinking. Students develop oral expression and communication skills through the close reading of texts that are meant for performance, such as plays, film scripts, poetry, music, and games. At the end of the course you will find yourself more confident about speaking in Italian in front of an audience and about expressing your opinions on a variety of topics (formal and colloquial expressions). Variation in diction and presentation techniques culminates in the adaptation and production of one or more of these texts for a public performance at the end of the term. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Short asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it). Consult course website for current semester topics.

Course Notes: Conducted in Italian. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Appropriate for concentrators electing the Italian Studies or Romance Studies track. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.
Advanced Italian II: Written Expression. Italy in Other Words (127889)

Chiara Trebaiocchi

2021 Spring (4 Credits)  Schedule:  TR 1200 PM - 0115 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

A theme-based course designed to develop advanced competence in written expression through guided examination of stylistics and pragmatics. The course includes readings from a variety of literary genres, films, workshops, and it might include a series of guest lectures by our faculty on design, women and society, cinema, fiction, and other subjects.

You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with many opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Short asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it). Consult course website for current semester topics (Spring 2021: Scrivere per descrivere, raccontare, argomentare e riflettere).

Course Notes:  Conducted in Italian. Appropriate for concentrators electing the Italian Studies or Romance Studies track. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

Class Notes:  NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep:  A score between 721-750 on the SAT II or on the Harvard Placement Test; Italian 40; or permission of course head.

Instructor Permissions: None        Enrollment Cap: n/a

An advanced research seminar devoted to Dante's poem on the occasion of 700th anniversary of his death. The course will combine close attention to Dante's text with nuanced attention to strategies of literary allusion, cross-reference, and reworking, and a series of in-depth explorations of the material culture of Dante's era. Among the latter themes will be: pathways and travel, the materiality of the page, the voice, the life of plants, the geology of the landscape.

Romance Studies   97
Sophomore Tutorial: Poetics, Practice, and Politics in Romance Societies (114941)

Kathy Richman

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

This course introduces students to a range of analytical and theoretical approaches to "reading" fiction, poetry, film, and essays. We will pair critical writings and creative texts of importance to the Romance world to help students develop their own voice and analytical stance. Prepares students for advanced work in literary and cultural studies in Romance Languages and Literatures and related fields.

Course Notes: Language of instruction to be decided upon by student in consultation with the Undergraduate Adviser in Romance Studies. Successful completion of one term of Romance Studies 97 (or equivalent) is required of all concentrators in their sophomore year.

Romance Studies  110
Haiti, Cuba, Martinique: Plotting Resistance in Fiction and Film (161274)

Kathy Richman

2020 Fall (4 Credits)  
**Schedule:**  TR 1200 PM - 0115 PM

**Instructor Permissions:**  Instructor  
**Enrollment Cap:**  20

What makes a novel moving, a film disturbing? How does humor work, even in the grimmest context? “Haiti, Cuba, Martinique” explores these aesthetic questions in works that engage slavery and its legacies, resistance and revolution, and paths to "development." We will consider historical context and discuss categories like "genre" fiction, didactic writing, realism, romanticism, and la littérature engagée, or "committed" literature. Includes works by Alejo Carpentier, Chamoiseau, Condé, Guillén, Gutiérrez Alea, Lahens, and Roumain.

**Course Notes:**  Taught in English. For concentration and secondary credit in Romance Languages and Literatures, readings and written work must be done in French or Spanish.

**Class Notes:**  In the unlikely event that students need accommodation for time zone differences, course meeting times may change.
Romance Studies  138

Literature and Urban History: Views from Brazil and the United States (217625)

Bruno Carvalho
Sidney Chalhoub

2021 Spring (4 Credits)

Schedule:   M 0300 PM - 0500 PM

Instructor Permissions: Instructor
Enrollment Cap:  15

In this seminar we will focus on novels about urban experience, paying particular attention to how they represent what subordinate peoples do with what is done to them (the enslaved and their descendants, migrants, dependents, women, workers). We will study major authors and works of late 19th- and early 20th-century fiction in Brazil and the United States, attentive to points of contact between cities in both countries during a period of intensive urbanization. Questions of class, gender and identity-formation in the general context of defining and setting new limits of citizenship rights will be emphasized.

Course Notes: This course is also offered through the History Department as HIST 1933. Credit may be earned for either ROM-STD 138 or HIST 1933, but not both.

Romance Studies  168

Futurisms (a comparative history) (205157)

Jeffrey Schnapp

2020 Fall (4 Credits)

Schedule:   W 1200 PM - 0200 PM

Instructor Permissions: None
Enrollment Cap:  n/a

From its foundation in 1909 through WWII, futurism developed into the first international cultural-political avant-garde. Its aim was the revolutionary transformation of all spheres of life and its influence extended from Europe to the Americas to Asia. The seminar adopts a cross-disciplinary and comparative focus; and includes such topics as humans and machines; experimental poetics; futurism’s ties to anarchism, bolshevism and fascism. Media surveyed include poetry, performance, music, painting, photography, radio, and film.
Romance Studies 201

Questions of Theory (205260)

Doris Sommer
Nicole Suetterlin

2020 Fall (4 Credits)

Schedule: T 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

To explore key literary, cultural and critical theories, we pose questions through readings of classic and contemporary theorists, from Aristotle to Kant, Schiller, Arendt, Barthes, Foucault, Glissant, Ortiz, Kittler, and Butler, among others. Their approaches include aesthetics, (post)structuralism, (post)colonialism, media theory, gender theory, ecocriticism. Each seminar addresses a core reading and a cluster of variations. Weekly writing assignments will formulate a question that addresses the core texts to prepare for in-class discussions and interpretive activities.

Course Notes: Conducted in English. This course is also offered as Romance Studies 201 and German 291. Credit may be earned for Romance Studies 201 or German 291, but not both.

Romance Studies 290

Migration and the Humanities (205269)

Homi Bhabha
Mariano Siskind

2021 Spring (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

By focusing on literary narratives, cultural representations, and critical theories, this course explores ways in which issues related to migration create rich and complex interdisciplinary conversations. How do humanistic disciplines address these issues—human rights, cultural translation, global justice, security, citizenship, social discrimination, biopolitics—and what contributions do they make to the "home" disciplines of migration studies such as law, political science, and sociology? How do migration narratives compel us to revise our concepts of culture, polity, neighborliness, and community? We will explore diverse aspects of migration from existential, ethical, and philosophical perspectives while engaging with specific regional and political histories.

Subject: Catalan

Catalan  10
Introduction to Catalan (114279)

Aina Obis Monne

2020 Fall (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a

Schedule: TR 0300 PM - 0430 PM

This course offers a set of units that, while introducing critical topics of contemporary social, political, territorial, and artistic debates, teach the basics of Catalan language and culture. Students will engage in interactive communicative activities and strengthen their interpretive and presentational skills through the practice of written and oral discourse, both synchronously and asynchronously. By the end of the course students will be able to interact in daily situations with native speakers, read and write messages about themselves and other topics, and interpret cultural expressions and products.

Course Notes: Conducted in Catalan. Knowledge of another Romance language is useful but not essential. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

**Romance Languages  210**

Language Pedagogy: Theories, Approaches, and Practices (136717)

*Nicole Mills*

2020 Fall (4 Credits)  
**Schedule:** W 0300 PM - 0500 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a  

This course is designed for TFs and TAs in the department of Romance Languages and Literatures who are teaching a Romance language at Harvard for the first time, or those who are interested in foreign language learning and teaching. It introduces TAs and TFs to theories of second language acquisition (SLA) and explores their implications for the teaching of foreign language, culture, and literature. The course provides opportunities for students to learn to enact the specific pedagogical practices deemed essential to foreign language teaching. The intensive week before the start of classes includes reports on and discussion of general SLA theories and demonstrations and analysis of varied instructional approaches.

**Course Notes:**  
Students are required to attend the pre-service seminar before classes begin. Students who do not attend the pre-service seminar will not be permitted to enroll in the course. For details and further information, please contact the Course Heads. May be taken SAT/UNS. Permission of Course Head required.
Romance Languages 230
Teaching Languages, Cultures and Literatures (216381)

Virginie Greene

2021 Spring (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course is addressed to experienced TFs and TAs who are currently teaching foreign languages, literatures and cultures at Harvard. It will present and use theories coming from the disciplines of language pedagogy, relevant applied linguistic research, socio-linguistics, anthropology, and literary criticism, applied to classroom experience whether online or in situ.

The course is conceived as a space of open and structured discussion among humanists and social scientists specializing in different fields, teachers at different stages of their careers, and individuals coming from diverse linguistic, cultural and social backgrounds. We will learn from each other through comparing theories, practices, and stories.

Course Notes: This course fulfills one of the requirements of the Bok Certificate in Teaching Language and Culture (in collaboration with the Bok Center for Teaching and Learning).

Class Notes: This class will be taught by Prof. Virginie Greene with the collaboration of guests Dr. Nicole Mills and Dr. Maria Luisa Parra.

Romance Languages 300
Graduate Seminar: Writing in the Romance Literatures (117638)

Jeffrey Schnapp

2021 Spring (2 Credits)

Schedule: TBD

Article Publication Workshop (212926)

*Annabel Kim*

2020 Fall (4 Credits)  

Instructor Permissions: None  

Enrollment Cap: n/a  

A reading and writing intensive workshop aimed at doctoral students done with coursework, and postdocs affiliated with the department. Through workshopping (both as a class and in smaller groups), participants will go through two intensive rounds of revision to produce an article ready to submit to peer-reviewed journals at the end of the semester. We will begin with preliminary discussions of the nuts and bolts of writing and publication: reading essays and articles on how to write well; identifying journals that are a good fit for publication; reading sample abstracts and writing and revising one's own; analyzing sample readers' reports (from the generous and intelligent to the brutish and mean) to think through how to respond to feedback; etc.

Class Notes: The first class will meet on Monday, September 7, 3-5 pm, with the schedule to be determined thereafter.

Polish AA

Elementary Polish I (123076)

Anna Baranczak

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

Part one of a two part introductory course in modern Polish language and culture, designed for students without previous knowledge who would like to speak Polish or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Polish culture through reading of prose and poetry as they learn to use the language both as a means of communication and as a tool for reading and research.

Polish AA: Elementary Polish I together with Polish AB: Elementary Polish II satisfy the foreign language requirement and prepare students for continued study of Polish in intermediate-level courses and for study or travel abroad in Poland.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Polish AA in the fall and Polish AB in the spring within the same academic year. - - -

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Polish BA
Intermediate Polish I (124971)

Anna Baranczak

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor
Enrollment Cap: n/a

Part one of a two part intermediate course in modern Polish language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Polish grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Introduction to Polish literature through fiction and poetry, history and contemporary events, including readings from literary masterpieces from Polish literature from the era of the Renaissance to contemporary times including Jan Kochanowski, Wisiawa.
Szymborska, Zbigniew Herbert, Czesław Miłosz and others. Film clips and newspaper articles will introduce students to a variety of styles of contemporary Polish. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading.

Intermediate Polish I and Intermediate Polish II together prepare students for continued study of Polish in advanced-level courses and for study or travel abroad in Poland.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Polish BA in the fall and Polish BB in the spring within the same academic year. - - -

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Recommended Prep: Polish AB or placement at the B-level. Familiarity with fundamentals of Polish grammar, particularly case endings and elementary competence in spoken Polish.

Subject: Russian

Russian AA
Elementary Russian I (122907)

Steven Clancy
Natalia Chirkov

2020 Fall (4 Credits)

Instructor Permissions: None
Enrollment Cap: n/a

Schedule: MWF 0900 AM - 1000 AM

Part one of a two part introductory course in modern Russian language and culture, designed for students without previous knowledge of Russian who would like to speak Russian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are introduced to Russian culture and the etiquette of social exchanges, and expand their knowledge of grammar and vocabulary through readings (including stories, biography, and poetry), videos, and class discussions.

Course Notes: Part one of a two-part series. Students are strongly encouraged to enroll in Russian AA in the fall and Russian AB in the spring within the same academic year.

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students’ availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Russian AA together with Russian AB or Russian ATB (Elementary Russian through Authentic Texts II) satisfy the foreign language
requirement. Any of the elementary (A-level) level Russian courses (A, AAB, and AT) prepare students for continued study of Russian in intermediate (B-level) courses (B, BAB, or BTA) and for study or travel abroad in Russian-speaking countries.

**Recommended Prep:** No prior knowledge of Russian is required.

Part two of a two part introductory course in modern Russian language and culture, designed for students without previous knowledge of Russian who would like to speak Russian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are introduced to Russian culture and the etiquette of social exchanges, and expand their knowledge of grammar and vocabulary through readings (including stories, biography, and poetry), videos, and class discussions.

**Course Notes:** Part two of a two-part series. Students are strongly encouraged to enroll in Russian AA in the fall and Russian AB in the spring within the same academic year.

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students’ availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Russian AA together with Russian AB or Russian ATB (Elementary Russian through Authentic Texts II) satisfy the foreign language requirement. Any of the elementary (A-level) level Russian courses (A, AAB, and AT) prepare students for continued study of Russian in intermediate (B-level) courses (B, BAB, or BTA) and for study or travel abroad in Russian-speaking countries.
Russian AB Section: 002

Elementary Russian II (159620)

Steven Clancy

2021 Spring (4 Credits) Schedule: MWF 0130 PM - 0230 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Russian BA

Intermediate Russian I (112823)

Veronika Egorova

2020 Fall (4 Credits) Schedule: MWF 1030 AM - 1130 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

Part one of a two part intermediate course in modern Russian language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Russian grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Vocabulary is thematically organized to include such topics as self and family, education, work, human relationships, politics, and national attitudes and is reinforced through film and the reading of classical and contemporary fiction and history. Practice in the etiquette of common social situations (sociolinguistic competence). Computer exercises on selected topics.

Course Notes: Interested students should contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions regarding scheduling conflicts. With sufficient enrollments it is possible that this course will be offered in an additional section on MWF in a different time slot. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Russian BA in the fall and Russian BB in the spring within the same academic year. - - -

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students’ availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes. - - -

Any full course in Russian at the B-level (Russian Ba-Bb, Russian BTA-BTB, or Intensive Russian BAB) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Recommended Prep: Russian AA-AB, AAB, ATA-ATB, AH, or placement at the B-level. Familiarity with fundamentals of Russian grammar, particularly case endings, verb conjugation, and elementary competence in spoken Russian.

Intermediate Russian (Intensive) (110903)

Natalia Chirkov

2021 Spring (8 Credits) Schedule: MTWRF 1030 AM - 1130 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

An intensive version of Russian Ba and Russian Bb, covering the same material in a single semester. Class meets five days per week with five hours of the main section and three hours of small group speaking practice each week. Readings may vary.

Course Notes: This course will meet five days a week from 9am to 10am. In addition, students will be required to attend three additional one-hour speaking practice sections each week on Mondays, Wednesdays, and Fridays. Meeting times for the small group sections will be determined at the start of term based on students’ availability.

Any full course in Russian at the B-level (Russian Ba-Bb, Russian BTA-BTB, or Intensive Russian BAB) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Subject: Czech

---

Czech AA

Elementary Czech I (111301)

Veronika Tuckerova

2020 Fall (4 Credits)  

Schedule: TBD  

Instructor Permissions: None  

Enrollment Cap: n/a

Part one of a two-part introductory course in modern Czech language and culture, designed for students without previous knowledge who would like to speak Czech or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Czech culture through work with film and literature and gain some familiarity with the major differences between literary and spoken Czech as they learn to use the language both as a means of communication and as a tool for reading and research.

Czech AA: Elementary Czech I (in the fall) and Czech AB: Elementary Czech II (in the spring) satisfy the foreign language requirement and prepare students for continued study of Czech in intermediate-level courses and for study or travel abroad in the Czech Republic.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses.

Part one of a two-part series. Students are strongly encouraged to enroll in Czech AA in the fall and Czech AB in the spring within the same academic year.

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Part two of a two-part introductory course in modern Czech language and culture, designed for students without previous knowledge who would like to speak Czech or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Czech culture through work with film and literature and gain some familiarity with the major differences between literary and spoken Czech as they learn to use the language both as a means of communication and as a tool for reading and research.

Czech AA: Elementary Czech I (in the fall) and Czech AB: Elementary Czech II (in the spring) satisfy the foreign language requirement and prepare students for continued study of Czech in intermediate-level courses and for study or travel abroad in the Czech Republic.

Course Notes:  This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. • • •

Part two of a two-part series. Students are strongly encouraged to enroll in Czech AA in the fall and Czech AB in the spring within the same academic year. • • •

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Requirements:  Prerequisite CZCH AA

Czech BA
Intermediate Czech I (121469)
Veronika Tuckerova
2020 Fall (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  n/a
Part one of a two part intermediate course in modern Czech language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Czech grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Increased exposure to the differing registers of Czech in its literary and spoken forms.

The two part course prepares students for continued study of Czech in advanced-level courses and for study or travel abroad in the Czech Republic.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses.

Part one of a two-part series. Students are strongly encouraged to enroll in Czech BA in the fall and Czech BB in the spring within the same academic year.

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Recommended Prep: Completed Czech AB, or placement at the B-level. Familiarity with fundamentals of Czech grammar, particularly case endings and elementary competence in spoken Czech.

Slavic 98
Junior Tutorial (159853)

Philip Redko

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

In this course, we will read Pushkin's beloved novel in verse, Evgenii Onegin in its entirety—in the original!—paying special attention to its cultural and historical contexts, its play with poetic form and
genre, and its innovative approach to plot and characterization. Together we will revel in its wit, virtuosity, and sheer linguistic brilliance, and find out for ourselves why this work has never lost its popular appeal. In addition to Onegin, we will read some of Pushkin's most celebrated lyric poems, watch Tchaikovsky's opera based on the novel, and take a virtual trip to Houghton to look at first editions. We will supplement our close reading of the text with articles by renowned Pushkin scholars, and will refer to the two most important commentaries on the novel, by Yuri Lotman and Vladimir Nabokov. This course is open to anyone currently in third-year Russian or above. Onegin and other poetry will be read in Russian; supplemental readings and class discussions will be in English. The course meeting time will be determined on the basis of student availability.

Course Notes: Required of junior concentrators in Slavic Literatures and Cultures. Course open to non-concentrators by permission of the instructor.

Readings will be in Russian.

Recommended Prep: Students must be able to read in Russian.

Wherever an avant-garde movement sprang up, its artists would announce they were there to change the world. Nowhere did this promise come closer to fruition than in Russia of the 1920s. This course explores Russian and Soviet avant-garde art and its most radical manifestations in literature and dance, on stage and screen, in visual arts and in the ways of life. We will examine the way art and political revolution impact each other and focus on the many "isms," avant-garde and otherwise, that shaped society and the arts during a period of rapid modernization and experimentation: Futurism, Suprematism, Constructivism, Productivism and others. We will look at works by Malevich and Meyerhold, Tatlin and Mayakovsky, Rodchenko and Stepanova, Nijinsky and Meyerhold, Vertov and Eisenstein.

Course Notes: No prerequisites. All readings in English.

This course is cross-listed as SLAVIC 114 and TDM 114K.

Russian Novel (216024)

Julie A. Buckler

2020 Fall (4 Credits)  Schedule: MW 0130 PM - 0245 PM
Instructor Permissions: None  Enrollment Cap: n/a

Explores the distinctive tradition of the modern Russian novel beginning in the late eighteenth century and emphasizing works from the nineteenth century, with a sampling of twentieth-century works that continue the tradition. Compares and contrasts this Russian tradition with its Western counterparts (England, France, America). What is "Russian" about the Russian novel? Works by Karamzin, Pushkin, Lermontov, Gogol, Goncharov, Turgenev, Dostoevsky, Tolstoy, Saltykov-Shchedrin, Chekhov, and others.

Course Notes: No knowledge of Russian required.

Modern Russian: The Back Story (160167)

Michael Flier

2021 Spring (4 Credits)  Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None  Enrollment Cap: n/a

Russian has a fascinating history that reveals explanations for the irregularities and mysteries presented in textbooks but often unexplained. Why does g sound like [g] in mnogo 'many', but like [v] in segodnia 'today'? How is moloko 'milk' related to mlechnyi put 'the Milky Way'? Why pet'/ poliu 'sing' and not pet'/
Why do the numbers 2, 3, and 4 govern the genitive singular rather than nominative plural? How can nachalo ‘beginning’ and konets ‘end’ come from the same root? A historical knowledge of Russian is not only enlightening; it will help improve your skills in the modern language.

Course Notes: No knowledge of linguistics is required. Lectures will be supplemented with problem sets available from the course website. Intermediate college-level Russian (= RUSS BAB or its equivalent) required.

Recommended Prep: Russian A, "Elementary Russian" (parts I and II), or Russian AAB, "Intensive Elementary Russian"

Hacking Russia: Technological Dreams and Nightmares of Russian Culture (216025)

Nariman Skakov
2020 Fall (4 Credits) Schedule: MW 0300 PM - 0415 PM
Instructor Permissions: None Enrollment Cap: n/a

The course explores the role of technology in constructing the social and ideological fabric, as well as the material reality, of Soviet and Russian society. From the early Soviet period, when technological progress was linked to humanistic utopia, through dystopian critiques of a totalitarian machine of conformity and constraint, we proceed along the assembly line of communist production, avant-garde and constructivist artisitic utopia, socialist realism, the space race, and information technology, using examples from Russian
literature, film, art, visual arts, performance, and current events. With the media’s concern for fake news and Russian hacking today, it is our course’s goal to "hack Russia": to understand the politics and technology shaping Russia, and the creative responses that have made its society a site of both dreamlike promise and nightmarish threat, through its history and today.

Course Notes: All readings in English.

Modernist Journeys (216030)

Nariman Skakov

2021 Spring (4 Credits) Schedule: MW 0430 PM - 0545 PM

Instructor Permissions: None Enrollment Cap: n/a

In the years following the Russian Revolution, the Soviet Union emerged as a major political power and underwent sweeping social changes. This course will explore the radical displacements that took place in this, the first socialist society—immigration, war, forced relocation, labor camps, and, in very rare cases, travel for leisure. In parallel with these sweeping movements of dislocation, this was the time when a modernist aesthetic tradition was flourishing and key precepts of the emerging Soviet identity were formed. Modernist Journeys explores accounts of travel, displacement, and migration as a window into the diversity of perspectives that contributed to the formation (or disintegration) of the new "Soviet man." We will consider memoirs, travelogues, films, and theoretical texts by major Soviet authors and film-makers as they traveled to Mongolia, Central Asia, Armenia and China as well as Paris and "the West": Sergei Tretyakov, Osip Mandelstam, Isaac Babel', Andrei Platonov, Aleksandr Rodchenko, Dziga Vertov, Ilya Ilf and Evgeny Petrov among others.

Note: All readings in English. No previous knowledge of Russian literature or history is necessary.

Tolstoy's development as a writer and thinker, beginning with his early diaries and progressing through the novels to the late stories and plays, also sampling Tolstoy's non-fictional writing and correspondence. Examines Tolstoy's work in light of recent critical approaches to authorship, artistic biography, literary canon, ethics, gender, sexuality, and affect. How has Tolstoy been variously interpreted in Russian, Soviet, post-Soviet, and Western-humanistic contexts? How did Tolstoy view his own work at various points in his life?

Course Notes: Reading knowledge of Russian (equivalent to three or more years of study) is required.
We will consider classic narratives that incorporate real written documents or personal testimonies into works of fiction, film, and journalism. How do such works blur the line between fiction and reality, between individual testimony and collective experience, in order to construct larger narratives about political repression and political history? We will explore why some testimonies, images, or documentary details feel more "authentic" or "truthful," inspiring a strong response in readers and viewers, while others recede into the background. What is gained or lost when facts are folded into a narrative that does not just inform but also entertains? Why do works of fiction and film create such persuasive versions of the past, and how do these stories shape our sense of political life and state power? We will examine diverse historical documents, individual and collective testimonies, stories, novels, photos, and films from Russia, Eastern Europe, and other regions in order to investigate these questions. Course readings will range from Defoe, Melville, Tolstoy, Dostoevsky, and Babel to Nobel Prize winners Alexander Solzhenitsyn and Svetlana Alexievich, as well as non-fiction from Elena Poniatowska, Ryszard Kapuściński, Javier Cercas, Liao Yiwu, Carlo Ginzburg, and others; we will also discuss films from Errol Morris and Andrei Tarkovsky.

**Slavic 182**

The Political Novel (205018)

*Jonathan Bolton*

2021 Spring (4 Credits)  
**Schedule:**  
TR 1030 AM - 1145 AM

**Instructor Permissions:**  
Instructor  
Enrollment Cap:  15

No novel can be reduced to a set of political beliefs, and yet we often feel that novels speak to our political theories and practices. What makes a novel “political”? Can the novel make a contribution to political theory? How does our understanding of political power change when we imagine detailed and dramatic confrontations between individuals and the state, individuals and empire, or individuals and global ideologies? How does narrative form reinforce or undermine ideology? What archetypal dramas—protest against authority, the loss of political innocence, the battle between tolerance and conviction—have shaped the political novel in its various traditions from the nineteenth century to the present?

For spring 2021, our readings will include works by Pushkin, Dostoevsky, Ivan Olbracht, Koestler, Kundera, Le Guin, Gordimer, and Colson Whitehead.

Course Notes:  
All readings in English.

Seminar in Polish Literature (216032)

Aleksandra Kremer

2020 Fall (4 Credits)  

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Polish literature in a nutshell. A survey of Polish literature and culture from the Middle Ages to contemporary times, discussed in the light of the recent scholarship and debates about the Polish canon. Readings in Polish will include Kochanowski and Mickiewicz.

Course Notes: Readings in Polish. Instructor consent required. Interested students should contact Prof. Kremer during Shopping Week to discuss scheduling.

Moscow Conceptualism/Russian Postmodernism (216053)

Nariman Skakov

2020 Fall (4 Credits)  

Schedule: F 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap: n/a

What makes Russian postmodernist cultural output special? Or is there anything special about Russian postmodernism? The course aims to answer these questions by engaging with theories of postmodernism and through close readings of literary and visual works by Venedikt Erofeev, Sasha Sokolov, Vladimir Sorokin, Dmitrii Prigov, Ilya Kabakov, Andrei Monastyrsky, Erik Bulatov, Timur Novikov and Petersburg Neo-Academism.
Course Notes: Texts read in Russian. Primarily for graduate students. Advanced undergraduates permitted with instructor's permission.

Readings in Poetry and Theory (216051)

Aleksandra Kremer

2021 Spring (4 Credits) Schedule: R 0300 PM - 0500 PM

Instructor Permissions: None Enrollment Cap: n/a

An introduction to different ways of reading modern and contemporary poetry, with a special emphasis on Europe's less-known traditions, minor languages, and small nations (including Austrian, Czech, Polish, and Yiddish texts). From this perspective we will revisit big, age-old questions – what is lyric poetry? how is it made? how can we read it? – and explore the relations between poetry and nation, tradition, and translation, as well as the boundaries of language, speech, and writing. In each class, we will focus on a few poems (texts, books, recordings), which we will examine in the light of classic theories of literature and recent literary criticism. Each time, the commentaries will illustrate at least two different approaches to the same question, familiarizing us with a wide range of literary methodologies and allowing us to problematize their usefulness.

Course Notes: Readings in English.

**Slavic 399A**

Slavic Graduate Proseminar (213534)

*Daria Khitrova*

2020 Fall (2 Credits)  **Schedule:** W 1200 PM - 0200 PM

**Instructor Permissions:** Instructor  **Enrollment Cap:** n/a

This course offers an introduction to graduate study in Slavic Languages and Literatures. Students are instructed on selected topics in literary analysis, history, and theory. Focus is placed on developing the essential skills required for graduate study in Slavic.

**Course Notes:**

Required of all Slavic graduate students in their first year of study. Part one of a two-part, year-long course that meets 6-7 times per term. Students are required to enroll in Slavic 399A and Slavic 399B to receive credit.

**Class Notes:**

This course will meet biweekly on Tuesdays from 3pm to 5pm. Exact course meeting dates TBA.

Subject: Bosnian, Croatian & Serbian

Bosnian, Croatian & Serbian     AA

Elementary Bosnian, Croatian, and Serbian I (110073)

Tatiana Kuzmic

2020 Fall (4 Credits)        Schedule:        TBD

Instructor Permissions: None          Enrollment Cap: n/a

Part one of a two-part introductory course in modern Bosnian, Croatian, and Serbian (BCS) language and culture, designed for students without previous knowledge who would like to speak BCS or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to BCS culture through excerpts from poetry, prose, and newspaper articles, as well as video and popular music clips as they learn to use the language both as a means of communication and as a tool for reading and research.

BCS AA: Elementary BCS I (in the fall) and BCS AB: Elementary BCS II (in the spring) satisfy the foreign language requirement and prepare students for continued study of BCS in intermediate-level courses and for study or travel abroad.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses.

Part one of a two-part series. Students are strongly encouraged to enroll in BCS AA in the fall and BCS AB in the spring within the same academic year.

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Bosnian, Croatian & Serbian  BA

Intermediate Bosnian, Croatian, and Serbian I (110074)

Tatiana Kuzmic

2020 Fall (4 Credits)  Schedule: TBD

Instructor Permissions: Instructor  Enrollment Cap: n/a

Part one of a two-part intermediate course in modern Bosnian, Croatian, and Serbian (BCS) language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of BCS grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading.
The two-part course prepares students for continued study of BCS in advanced-level courses and for study or travel abroad.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses.

Part one of a two-part series. Students are strongly encouraged to enroll in BCS BA in the fall and BCS BB in the spring within the same academic year.

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

This course offers an introduction to the foundations of modern social theory from the seventeenth to the nineteenth century. Our focus will be on the rise of democratic, capitalist societies and the concomitant development of modern moral, political, and economic ideas, with special emphasis on empire, race, and inequality. Authors we will examine include among others, Thomas Hobbes, Jean-Jacques Rousseau, Adam Smith, Mary Wollstonecraft, Alexis de Tocqueville, Frederick Douglass, Charles Darwin, and Karl Marx.

**Course Notes:** This course is limited to sophomores and Social Studies concentrators. This course is a prerequisite for sophomores applying to Social Studies. Students planning to take this class must attend the first lecture to be admitted.

**Class Notes:** Students who are in time zones in Asia and Australia will be able to watch a recording of the weekly lecture online but will also need (as with all students in this course) to attend a two-hour synchronous discussion section later in the week. Weekly evening (drop-in) office hours will be provided for all students, but those unable to attend lectures synchronously will be especially encouraged to attend.

Introduction to Social Studies (123964)

*Brandon Terry*

*Katrina Forrester*

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

This class continues the introduction to the classic texts of social theory begun in Social Studies 10a through the twentieth century. Authors include Friedrich Nietzsche, Max Weber, Emile Durkheim, W.E.B. Du Bois, Sigmund Freud, Simone de Beauvoir, Frantz Fanon, and Michel Foucault.

**Course Notes:** This course is limited to sophomores and Social Studies concentrators. This course is a prerequisite for sophomores applying...
to Social Studies. Students planning to take this class must attend the first lecture to be admitted.

Requirements: Prerequisite: Social Studies 10a AND Social Studies Concentrators

Social Studies  50

Foundations of Social Science Research (213384)

Adaner Usmani

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 50

This course has two goals. First, to introduce students to the diversity of methods that social scientists use to answer questions about the social world. Second, to prepare thesis writers to conduct original research. We will survey both qualitative and quantitative approaches, reading a combination of methodological texts and exemplary empirical work. For their final project, students will write a research proposal that will anchor their future thesis work.

Methods Training for Social and Political Theorists (213383)

Don Tontiplaphol

2020 Fall (4 Credits) Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Is social-scientific knowledge possible? How does empirical research depend on conceptual analysis? What is the relationship between normative theory and empirical reality? This course investigates different modes of theorizing and integrates them into the philosophical foundations of the social sciences. Units include "Epistemology and Social Explanation"; "Conceptual Analysis and the Human Sciences"; "Political Theory and Historiography"; "Normativity, Critique, and Political Realism." Recommended preparation for senior-thesis research in social and political theory, including the epistemology of social science. Continuation of the methodological themes of Social Studies 10b; intended for first-term juniors and first-term seniors.

Course Notes: This course will be lottered.

Social Studies  68EA

Engaged Philosophy: The Theory and Practice of Altruism (213258)

Bonnie Talbert

2021 Spring (4 Credits)  Schedule:  M 1245 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

In the wake of a global pandemic and the George Floyd protests, many are searching for ways to take action, to improve our communities and the world, and to help others. This altruistic mission is a noble goal, but like all missions, it requires thoughtful planning and reflection. The main question this course will address is "What is altruism?" We will approach this question from a variety of interdisciplinary perspectives: biology, psychology, political theory, and moral philosophy. Are we naturally altruistic, or are all actions in some sense selfish? How do we know when we are helping others? What is charity, or philanthropy, and what role does it play in a functioning democracy? We will spend a good portion of the course on the "effective altruism" movement, which aims to maximize the amount of good that each of us can do. How are calculations about "effectiveness" made? How do we identify the causes that are most important to prioritize? How does the EA movement relate to activism? More importantly, who are effective altruists, and how do they live their lives? We will read stories of people who have risked their lives to provide healthcare in the midst of war, people who have donated kidneys to strangers, people who adopted over 20 children, and many other examples that illustrate (or not!) different ways of being altruistic. The ultimate goal of this course is to think about what it means to help not just theoretically, but also in practice.

Course Notes:  This course will be lotteried.

Politics: Theory and Practice (216186)

P. MacKenzie Bok

2021 Spring (4 Credits)  Schedule:  R 0300 PM - 0500 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

As both the U.S. presidential election and a national state of emergency cast long shadows over Fall 2020, this course seeks to connect political theory to practice by asking how conceptual arguments about politics are reflected, transformed, or rejected in the experience of political practitioners. The class is structured as a series of two-week modules: one week focused on understanding the arguments of political theorists about a topic, then a second week focused on a relevant case at the state or local level, with political actors participating as guest speakers. Final papers will connect theory to practical politics in which students are engaged.

Course Notes:  This course will be lotteried.

Elections in a Time of Democratic Stress: America’s 2020 Choice in Comparative Perspective (216265)

E. J. Dionne

2020 Fall (4 Credits)  Schedule:  M 0300 PM - 0500 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15
It’s rare to be certain that a given election will be seen as historic. The 2020 contest in the United States is that rare election. This seminar will focus on the choice in 2020, the meaning of the Trump presidency, the nature of polarization in the United States, the proper understanding of populism, and the coronavirus pandemic as a transformative event. It will also place the American election in a comparative context, examining the democratic distemper in other nations. We’ll be discussing politics in Britain, France, Germany, the Iberian Peninsula, and Eastern Europe. This class is open to all students, but a preference will be given to Social Studies concentrators.

Course Notes: This course will be lotteried.

Development and Modernization: A Critical Perspective (116329)

Stephen Marglin

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 10

What assumptions about human beings underlie the conviction that development and modernization constitute progress, that the developed West points the way for the rest of the world? Does economic growth involve a package that necessarily changes the society, the polity, and the culture along with the economy? This tutorial provides a framework for thinking about these questions, both in the context of the West, and in the context of the Third World. This is a junior tutorial.

Course Notes: This course will be lotteried.

Social Studies 98CL

Law and American Society (121345)

Terry Aladjem

2021 Spring (4 Credits) Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 10

The course examines law as a defining force in American culture and society in four dimensions: as it establishes individual rights, liberties, and limits of toleration; as it attempts to resolve differences among competing constituencies; as it sets out terms of punishment and social control, and as a source of informing images and ideological consistency. We will take up issues at the level of jurisprudence or political theory, but also at the level of legal cases and public controversy in which these questions arise—cases in which racial or gender equality are at stake, religious or sexual freedom, cases in which the claims
of religious communities seem irreconcilable, cases in which the nature and extent of punishment have been debated and the question of who deserves to be punished decided, and notorious public trials in which the national self-understanding has been shaped. Our aim is to bring theory to bear, and down to earth, in each consideration, (we will read Foucault and also visit a prison) and since this is an inaugural presidential year, the issues being debated publicly concerning the law and U.S. Constitution will be much on our minds. This is a junior tutorial.

Course Notes: A prison trip is planned, subject to approval. April date to be determined. This course will be lotteried.

Art, Political Culture, and Civic Life (116288)

Kiku Adatto

2020 Fall (4 Credits) Schedule: T 0345 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 10

The seminar explores the interplay of the arts, political culture, and civic life. It will draw on studies in art, history, political philosophy, literature, sociology, and photography. Among the questions we will address are: How is historical memory constructed, and what are the competing forces that shape it? What is the significance of public apologies, and does solidarity create moral responsibilities for historical injustices? How is cultural domination exerted, and how is it resisted? In what ways does rhetoric shape politics, and what role does it play in national narratives? Why does the contest to control images loom so large in politics, the media, and in our everyday lives? This is a junior tutorial.

Course Notes: This course will be lotteried.

Globalization and the Nation State (125982)

Nicolas Prevelakis

2020 Fall (4 Credits) Schedule: W 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 10

Despite globalization, the nation is still a major actor in today's world. This course tries to understand why this is so by examining the role that nationalism plays in peoples' identities and the effects of globalization on nations and nation-states. It includes theoretical texts, but also case studies from the recent rise of populism and authoritarianism, the role of supranational entities such as the European Union, and the
urgency of global issues such as climate change, inequality, and migration. Examples from the United States, Europe, Latin America, China, and the Middle East. This is a junior tutorial.

Course Notes: This course will be lotteried.

Migration in Theory and Practice (127021)

Nicole Newendorp

2020 Fall (4 Credits) Schedule: W 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 10

In this course, we will examine how and why people migrate from one location to another, focusing both on the theoretical paradigms scholars use to explain migration processes as well as on the individual experiences of migrants. Topics include transnationalism, diaspora, identity formation, integration and assimilation, citizenship claims, and the feminization of migration. Ethnographic readings focus primarily on migration to the US, but also include cases from other world areas, most notably Asia. This is a junior tutorial.

Course Notes: This course will be lotteried.

Social Studies  98ND

Justice and Reconciliation after Mass Violence (128057)

Jonathan Hansen

2021 Spring (4 Credits) Schedule: M 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 10

This seminar examines the problem of justice and reconciliation after mass violence: How does a nation sundered by genocide, civil war, or gross human rights violations reestablish the social trust and civic consciousness required of individual and collective flourishing? What is the proper balance between individual and collective responsibility? What is the role of trials, truth commissions, and apology in civil reconciliation? How do specific types of mass violence influence outcomes? What makes some reconciliations successful, others less so? The course engages these and other questions from historical and contemporary perspectives, exploring the legacy of mass violence going back centuries, while examining reconciliation projects across cultures, countries, and continents.
This course comprises three units: 1) a typology of mass violence (civil war, genocide, state repression, for instance) and historical responses; 2) case studies of the U.S. Civil War (and its continuing legacy), the Spanish Civil War, and the Rwandan genocide; and 3) a research and writing workshop emphasizing students own work. The goal of the course is to introduce students to the literature of mass violence from an interdisciplinary perspective (including but not limited to historical, sociological, and anthropological approaches), ultimately launching students on their own research projects. This is a junior tutorial.

Course Notes: This course will be lottered.

Global East Asia (108761)

Nicole Newendorp

2021 Spring (4 Credits) Schedule: W 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 10

In this course, we will explore how social life in contemporary East Asia is both influenced by and contributes to processes of globalization. Ethnographic readings on China, Korea, and Japan focus on migration, gender roles, consumption, media, and markets as we trace the role of the global in everyday life for rural and urban inhabitants of a variety of East Asian locations. For these individuals, engagement with the global structures how they make sense of the world and creates desires for future life change. This is a junior tutorial.

The Critical Theory of the Frankfurt School (156263)

Charles Clavey

2021 Spring (4 Credits) Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 10

This course examines the distinctive critical theory created by members of the Institute for Social Research—better known as the Frankfurt School—from its origins in the interwar era to the present day. Over these decades, critical theory has used tools from philosophy, psychology, and sociology to grasp the pathologies of the present and to chart a path towards emancipation in the future. We will reconstruct the Frankfurt School's evolving theory through its connections to the most important themes of twentieth-century thought: capitalism, authoritarianism, individuality, bureaucracy, and alienation. Our goal is not
only to gain a deep understanding of critical theory but also to assess its continued relevance to modern social and political thought. This is a junior tutorial.

Media, Power, and Resistance (205458)

*Ieva Jusionyte*

2020 Fall (4 Credits)  

**Schedule:** W 0900 AM - 1145 AM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 10

Media and power are inextricably linked. On the one hand, mass forms of communication, such as national television and mainstream dailies, have long been circulating hegemonic discourses and given legitimacy to state projects and official ideologies. On the other hand, nicknamed the "Fourth Estate," news organizations have also acted as watchdogs, monitoring the performance of the government and holding it accountable to the people. Today's diversified and loosely regulated media landscape has destabilized and complicated this dual role of news organizations in reproducing existing power relations and providing a forum in which citizens can critically discuss public matters. The course draws on social theory and ethnographic research with various forms of media (from print newspapers to online memes, from public radio to "deep fakes") to raise questions about political agency and trace its limits as well as possibilities through multiple public spheres that are both more participatory and more fractured than ever before. This is a junior tutorial.

Reimagining Populism (205480)

*Angela Maione*

2020 Fall (4 Credits)  

**Schedule:** M 1245 PM - 0245 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 10

Who represents the people and on what basis? What role do the people play in creating, sustaining, or destroying democracy? Who is the most appropriate agent for democratic change: the masses, the working class, the peasantry, or the citizens of a representative democratic state? These questions are currently vibrantly debated by contemporary scholars who issue warnings that come out of fear of mob rule (ochlocracy), expert rule, or fear of the people themselves. Is some form of populism necessary to
democracy or is it always a sign of its demise?

This class will first explore different contemporary views, including anti-democratic, democratic, and left populisms. We will give attention to the increasing place of socio-economics in these discussions. In order to deepen our understanding of the questions these current positions raise, we will then return to key texts in the history of social and political thought. Readings include selections from Hannah Arendt, Niccolò Machiavelli, Jean-Jacques Rousseau, Karl Marx, Rosa Luxemburg, and Franz Fanon. This is a junior tutorial.

Social Studies  98RC

Language, Culture, Power and the Making of Europe (207902)

Andrew Brandel

2021 Spring (4 Credits) Schedule: T 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 10

How do the languages we use shape our thinking? And how do our ideas about how language works intersect with issues of race, gender, and class? This course is an introduction to key debates in the social scientific study of language as a social, cultural, and political phenomenon.

Our readings focus on a range of contexts and issues unfolding across Europe – from colonial practices of language documentation and translation to discourses of bilingualism and code-switching, from "migrant" literature to public debates about the roots of national identity. At the same time, we will explore how the study of language itself has historically contributed to the creation and maintenance of the idea of "Europe" in the first place, both in the way it narrates the history of and relationships between languages, and in describing their differing capacities. Tracing this story will in turn require that we ask how European ideas about language have been naturalized in the social sciences, and what kinds of alternatives have emerged to challenge this hegemony. Instead of treating language as a separate domain of research, therefore, we will see how language helps constitute the social and political worlds in which we live, as well as how our ideas about language reflect and produce a variety of normative assumptions. This is a junior tutorial.

Aesthetics and Politics (211214)

Ana Isabel Keilson

2021 Spring (4 Credits) Schedule: R 0945 AM - 1145 AM
Since Ancient Greece, individuals have considered aesthetics, defined alternately as the appreciation of art and beauty and the felt (sensible, embodied) experience of the world, as a way to theorize society and politics. This course examines the history of ideas about aesthetics by major modern political thinkers (Kant, Burke, Nietzsche, the Frankfurt School, Chantal Mouffe) alongside some of their cultural contemporaries in the literary, visual, musical and performing arts. This is a junior tutorial.

Caste, Race, and Democracy (213297)

Hari Ramesh

2021 Spring (4 Credits) Schedule: W 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 10

Drawing on the resources of social and intellectual history, political theory, and social science, this tutorial will explore the intimacies and differences between two forms of social differentiation: caste in India and race in the United States. We will focus, in particular, on the relationships between caste, race, and imperial power; the diagnoses of and forms of democratic resistance to caste and race subjugation that were articulated in the 19th and 20th centuries; and the place of contemporary social science in documenting both the persistence of oppression along caste and racial lines and the success of efforts to combat such oppression. This is a junior tutorial.

Race and Ethnicity in the United States (213256)

Christina Ciocca Eller

2021 Spring (4 Credits) Schedule: T 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 10

The United States is more racially and ethnically diverse than at any point in its history. Yet racial and ethnic social categories remain persistent sources of inequality in American society. This tutorial will interrogate the relationships between race, ethnicity, and inequality, examining theoretical and empirical approaches across multiple social domains. It particularly will emphasize how race and ethnicity structure experiences, opportunities, and outcomes in important social contexts such as neighborhoods, educational
institutions, and the labor market, among others. This is a junior tutorial.

The Many Faces of Tyranny (213280)

Rosemarie Wagner

2020 Fall (4 Credits) Schedule: F 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 10

This course explores the way tyranny has been presented in different times and places and the many ways tyranny can create unfreedom. From a wild man out of control, to a carefully orchestrated system of control, tyranny wears many faces. This course begins with Plato’s tyrant who rises from the rubble of a failed democracy, through early modern defenses of Regicide, to modern accounts of the tyranny of the majority, empire, and structural oppression. Through this course we will examine what a tyrannical nature is, what makes it rise to power, and what can be done to stop it. This is a junior tutorial.

Capitalism, Time, and Value (213266)

Tracey Rosen

2021 Spring (4 Credits) Schedule: R 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 10

College students are often counseled to "make the most valuable use of their time." The "budgeting" of hours, days, and weeks of a semester often rests on an evaluation of how much time an activity is worth. In this tutorial we will explore how capitalism might shape the way we perceive, understand, and value time. We start from the premise that economic systems do more than organize the production and distribution of goods; they also help organize how we experience the world as well as the meanings and values that shape our actions within it. In order to ground the dynamics of time and value within capitalism, we begin by drawing from anthropological and historical examples to consider the relationship of time and value in a variety of pre-capitalist contexts. The course then considers the way in which capitalist transformations coordinate new forms of value and perceptions of time. We end with an examination of our everyday, contemporary experience of time against the backdrop of "neoliberal" capitalism and the rise of "futures" markets. This is a junior tutorial.

Course Notes: This course will be lotteried.

What's the Matter with Inequality? Normative and Empirical Perspectives (216070)

Glory Liu

2020 Fall (4 Credits) Schedule: T 0345 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 10

This course investigates the diverse ways in which we theorize, study, and talk about economic inequality today. Is inequality wrong because some people have too much, or because others have too little? Or is it wrong simply because some people have more than others? To answer these questions, this course explores prominent social science explanations of the nature, causes, and consequences of economic inequality in the United States alongside normative theories of equality and inequality. We will also investigate the theory and practice of different "solutions" to inequality such as redistribution and "predistribution", philanthropy, and universal basic income. This is a junior tutorial.

The Theory and Practice of Democracy in Developing Countries (216073)

Julie Weaver

2020 Fall (4 Credits)  Schedule:  R 1245 PM - 0245 PM

Instructor Permissions:  Instructor  Enrollment Cap:  10

What does the practice of democracy look like in developing countries today? How does that practice map on to democratic ideals like representation, participation and accountability? The course will explore these questions through both theoretical and empirical social science research, with cases drawn primarily from Latin America and Sub-Saharan Africa. Topics will include political accountability, state and institutional strength, corruption and clientelism, participatory democracy, managing diversity, and activism and civil society engagement. This is a junior tutorial.

Democracy and Education in America (216172)

Rob Willison

2020 Fall (4 Credits)  Schedule:  W 0300 PM - 0500 PM

Instructor Permissions:  Instructor  Enrollment Cap:  10

This course is organized around three crucial questions: (1) What does a truly democratic society require of its educational institutions? (2) How well do our current educational institutions—especially our K-12 schools—live up to the standard set by question 1? (3) What approaches, at the level of both pedagogy and policy, should we take to make our school system more democratic? We'll address these questions in conversation with philosophers (like John Dewey, Paolo Freire, and Danielle Allen), cognitive psychologists (like Susan Carey), jurists (like Earl Warren and Thurgood Marshall), and social scientists (like Raj Chetty and Daniel Koretz). This is a junior tutorial.

Course Notes:  This course will be lotteried.

Innovating Democracy: Designing Public Engagement for the 21st Century (216173)
This course explores the exciting field of participatory innovations in democratic governance and public policy. Our goal will be to identify proposals that generate effective citizen participation and engagement while addressing pressing public problems. A number of challenges for democracy reform will be considered, including the role of expertise, inattention and misinformation, the tyranny of powerful minorities, political polarization, and rising public distrust and disaffection. Throughout, our discussions will be grounded in an analysis of real-world cases, from elections and criminal justice, to international development and urban planning. This is a junior tutorial.

Sociology
Subject: Sociology

Sociology  90EQ
Research Lab: Equity through Inquiry: Pedagogy, Research, and Capacity Building Strategy Lab (216133)

Flavia Perea
2020 Fall (4 Credits)       Schedule:       T 1245 PM - 0245 PM
Instructor Permissions:     Instructor
Enrollment Cap: 8

This course will examine the principles and methods of community based, participatory, action, and
decolonizing approaches to inquiry. In addition to developing this knowledge and skill-set among students
in the course, the purpose of this lab is to design a curriculum to teach this content to undergraduates in
tandem with creating a strategy to increase public knowledge and usage of equitable approaches for
knowledge generation, meaning making, and social transformation through inquiry.

Together we will engage with various frameworks and systems of knowing and meaning making; how they
are centered on, or the extent they intersect with the pursuit of equity and justice; and pragmatic
approaches for moving from theory to practice. We will discuss power and privilege, identity and location in
the context of research; the promise and limitations of engaged inquiry to help advance social change; and
the ethics of inquiry with historically and systemically oppressed people and communities. We will discuss
epistemology, research paradigms, and explore a variety of approaches, including Participatory Action
Research/PAR, Community Based Participatory Research/CBPR, citizen science, and indigenous
approaches to research. We will examine how different approaches for asking questions, methods for
gathering and analyzing information, and sharing knowledge, as well as the principles, truths, and
worldviews that undergird different approaches, can be applied in diverse contexts. Learning from and
critical engagement with voices and perspectives from beyond the academy, in particular those excluded
from academic scholarship, will be central to our work. Ultimately, we will critically examine how inquiry
that emphasizes equity, collaboration, and reciprocity in the uncovering, integration, application and
dissemination of knowledge can be a tool of liberation and certain methods a strategy for responding to
oppression, colonization, and systems of domination.

Research Lab: Immigration (207118)

Leah Muse-Orlinoff
2021 Spring (4 Credits)       Schedule:       R 1200 PM - 0200 PM
Instructor Permissions:     Instructor
Enrollment Cap: 8

What does it mean to be a "good" immigrant? Is current media attention on immigration perpetuating an
image of "deserving" and "undeserving" immigrants? How is coverage of immigrants’ race, gender and
sexuality, and human capital evolving in the current political context? And what implications for immigrant
integration – the two-way process by which immigrants and their communities of settlement interact and adjust to one another – might be emerging from the media’s depiction of immigrants and immigration policy?

In this research lab students will learn data collection and analysis skills that will help them answer these and related questions. Course content will include a robust research design and methodology component through its focus on media coverage of immigration and integration in mainstream and ethnic media. Course participants will develop qualitative research projects that analyze key sociological themes including race and ethnicity, gender and sexuality, and human capital. Students will learn how to formulate sociological research questions and hypotheses, collect and analyze data, and articulate findings in a formal academic proposal. This course is limited to sociology concentrators; bilingual students are encouraged to enroll.

Course Notes: Limited to Sociology concentrators. Preference given to those who have taken Sociology 128.

Sociology 90Z

Research Lab: Inequality (214610)

Xiang Zhou

2021 Spring (4 Credits) Schedule: R 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 8

This course introduces students to both classical and frontier research on social and economic inequalities. By analyzing data from the Current Population Survey (CPS) and National Longitudinal Surveys of Youth (NLSY), we investigate educational inequality, labor market inequality, and intergenerational mobility in the United States. In the context of these topics, students will build skills in data analysis and data visualization in R and learn a variety of quantitative methods including regression, path analysis, causal inference, and machine learning.

Class Notes: A basic course in statistics such as Sociology 156, Stat 100/102/104, or an equivalent.

Sociology 92R

Faculty Research Assistant (160534)

Hilary Holbrow

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 30

Students gain research skills along with an understanding of the production of sociological knowledge through work on faculty research projects. Work is arranged and directed by faculty members, who supervise and meet with students regularly (every 1-2 weeks). The specifics of the intellectual goals for the student and the research tasks involved will vary. The student and faculty member will consult on this in advance and will outline the following on the 92r Registration Form: 1) the specific skills to be learned, 2)
Students gain research skills along with an understanding of the production of sociological knowledge through work on faculty research projects. Work is arranged and directed by faculty members, who supervise and meet with students regularly (every 1-2 weeks). The specifics of the intellectual goals for the student and the research tasks involved will vary. The student and faculty member will consult on this in advance and will outline the following on the 92r Registration Form: 1) the specific skills to be learned, 2) how the course will engage students with the discipline, and 3) the specific work product. What students produce will depend on the kind of research involved. It is expected that students will work 8 to 10 hours per week on the course. Students may engage with data collection, data analysis, literature reviews, or other aspects of a faculty project.

**Sociology 97**

Tutorial in Sociological Theory (115130)

*Shai Dromi*

2021 Spring (4 Credits)  

**Schedule:** T 0300 PM - 0415 PM

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

This course introduces students to the complicated, conflictual, and often contradictory theoretical origins of sociology as a discipline. We begin by reading the standard sociological “canon”—Marx, Weber, and Durkheim—and interrogating why their ideas were canonized over others. We then read scholars who have
been historically “written out” of the social sciences to evaluate their important, yet historically underappreciated, contributions. By the end of the course, students should (1) master key concepts in classical sociological thought, (2) understand what it means to theorize, and what makes for good theory, and (3) learn to critically interrogate the relationship between power, standpoint, and the production of knowledge.

Course Notes: Required of concentrators, ordinarily sophomores, and secondary concentrators.

Junior Tutorial: The Future of Work (215924)  
*Hilary Holbrow*

2020 Fall (4 Credits)  
**Schedule:** T -

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 10
The 21st century has brought dramatic changes to the world of work. The traditional, full-time employment relationship is in decline. New ways of organizing work are on the rise, with more people working as independent contractors or using gigs to get by. Technology is changing the nature of jobs, as workers can collaborate remotely and delegate complex tasks to computers. And employers face growing demand for diversity, inclusion, and accountability when it comes to discrimination and harassment. In the midst of the major transitions already taking place, Covid-19 has forced organizations—from corporations to schools to healthcare providers—to radically rethink when, where, and how work is performed.

These changes bring new challenges, both for individual workers and for social policy. How does a single mother manage childcare when an algorithm assigns her to shifts that change weekly? How do gig workers juggle multiple jobs across digital platforms to make ends meet? How can we provide benefits to people who work 40 hours a week but do not have a regular employer? How can employers control their workers from a distance—and should they?

The tutorial will guide students in the development of an empirical research paper on a topic of their choosing that addresses the changing world of work. Topics may include gender and race in the workplace, automation and the machine-human interface, experiences of empowerment or precarity in gig work, new labor movements, and policy responses such as universal basic income. Through in-class workshops, we will develop research questions and formulate practical research designs. We will explore qualitative research methods, including interviews and observation, and learn to conduct online survey experiments. Throughout, we will refine our understanding of the world of work and how workers, employers, social movements, and policymakers are responding to new challenges.

Course Notes: Required of and limited to Sociology concentrators.
Class Notes: Course taught by Laura Adler; time TBD

Sociology   98SE
Junior Tutorial: Ethnography of Social Movements in a Digital World (212755)

Vivian Shaw

2021 Spring (4 Credits)  
Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor  
Enrollment Cap: 10

How do activists organize during a pandemic when social distancing is paramount? How have social movements changed alongside the evolution of social media? This tutorial explores the craft of digital ethnography through the theme of social movements. The COVID-19 pandemic has fundamentally altered the terrain of immersive research, forcing researchers to rapidly adjust to digital methods for collecting and analyzing data. In this course, we will read "traditional" ethnographies on social movements and related topics alongside more recent and experimental digital ethnographies, using these as models for understanding ethnographic fieldwork and analysis. As a junior tutorial, your research interests will serve as a foundation for the class. You will each complete an independent research project on some aspect of social movements, employing in-depth interviews and/or ethnographic methods. Through in-class workshops, we will formulate research questions and practical research design. The goal of this course is to provide you with the opportunity to conduct original research and to better understand the insights and
challenges of ethnographic fieldwork.

The course will begin with a review of some of the key debates on social movements within sociology. You will then design and complete your own ethnographic research projects, engaging with the key methodological questions raised throughout the course. The course will cover the various steps of the research process, from formulating a research question through collecting and analyzing data and reviewing existing literature, to constructing the final paper. As we compare “traditional” and digital ethnographies, we will explore the opportunities and limits of conducting fieldwork online. We will also discuss the logistics of conducting ethnographic fieldwork, including contacting groups, gaining access, and recording data.

Course Notes: Required of and limited to Sociology concentrators. Junior Tutorials are by lottery only.

Recommended Prep: Prerequisite: Sociology 97 AND Sociology Concentrators

Sociology 98SF

Junior Tutorial: Visual Culture and the Sociological Imagination (216107)

Hilary Holbrow

2020 Fall (4 Credits) Schedule: R -

Instructor Permissions: Instructor Enrollment Cap: 10

As we buy groceries, peruse social media platforms, participate in protests, relax at home, travel, and otherwise go about our lives, we are bombarded with images. Billboards, family photographs, TikTok videos, feature-length films, graffiti, murals, monuments, architecture, street signs, protest posters, masks, MAGA hats, and graphic T-shirts, among many other visual stimuli, communicate diverse and potentially conflicting messages to us about what our society values, what it abhors, who constitute its heroes and enemies, what binds its members together, what they have been through, and to what they aspire. "Visual culture" refers to these various types of images that express shared meanings in a society. In this tutorial, we will examine visual culture from a sociological perspective. Who produces visual culture, how, and why? How do images become icons, taking on symbolic meaning for large groups of people? To what extent and how do those meanings change over time? How do relations of power and inequality shape the production and dissemination of visual culture? Why do people perceive bodies and spaces in the ways that they do, and with what consequences? How do relations of seeing and being seen (re)produce power asymmetries?

In class, we will cover a range of topics pertaining to visual culture, including the making of cultural icons, their dismantling through acts of iconoclasm, the surveillance of people and spaces through visual technologies, racialized and gendered politics of representation, modes of producing and distributing visual culture, and more. Students will also learn the fundamentals of sociological research, and over the course of the tutorial, they will develop an independent research project about a topic of their choice that pertains to visual culture. Through a series of assignments and workshops, they will choose a research question, situate it in scholarly literature, develop a research design, and use either ethnographic, interview-based, or archival methods to gather original data. Those who choose ethnographic projects will have the option of supplementing traditional hand-written textual fieldnotes with alternative visual note-taking strategies, such as photography and sketching. Ethnographic projects involving participation in the
production of visual culture are also welcomed. Students will present their research findings in oral and written form.

Sociology  98WE

Junior Tutorial: Poverty (213641)

Danilo Mandic

2021 Spring (4 Credits)  

Schedule: W 0945 AM - 1145 AM  

Instructor Permissions: Instructor  

Enrollment Cap: 10  

Nearly one in three residents of the United States lives close to the poverty line, and a growing number of us live in deep poverty, subsisting on less than $2 per day. This course examines the social world of poverty in the United States today. It pays particular attention to the lived experiences of low-income people. It also examines the parallel set of institutions low-income people must navigate— institutions that often perpetuate poverty: low-wage jobs, systems of policing and surveillance, substandard schools and colleges, exploitative housing, and predatory financial services. During the semester, students will conduct an extended research project about some aspect of poverty in the United States. The project will be a chance to hone important research skills, including conducting interviews and taking ethnographic fieldnotes, analyzing and presenting qualitative data, figuring out the “so what?” behind empirical findings, and thoughtfully giving and receiving peer feedback.

Course Notes: Required of and limited to Sociology concentrators. Junior tutorials are by lottery only.

Models of Social Science Research (117560)

David Pedulla

2021 Spring (4 Credits)

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course introduces students to core methodological concepts and strategies used in social science research including: research design, sampling and measurement, experiments, survey analysis, content analysis, network analysis, ethnography, and interviewing. Throughout the course we will develop the analytical skills necessary to interrogate epistemological assumptions in published social science research specifically and truth-claims generally. In addition to critically evaluating previous research, students will
collect and analyze data using the different methods discussed in class. By the end of the course, students should have acquired valuable research skills widely applicable in academic and professional settings.

Course Notes: Required of concentrators, ordinarily sophomores, and secondary concentrators.

Sociology 1024
Social Inequality (117584)
Jonathan Mijs
2021 Spring (4 Credits)  
Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None  
Enrollment Cap: n/a

This course is an introduction into the sociological study of Social Inequality. Students will learn about sociological theories and read empirical research describing how social inequality is produced and reproduced in various institutions (e.g. the family, neighborhood and labor market) and through different mechanisms (e.g. socialization, segregation, discrimination). We will explore what it would take to address these different sources of social inequality in America, and learn from comparisons with other countries and historical moments.

Course Notes: May be counted for introductory concentration requirement, if letter-graded.
Sociology 1025

The Sociology of Organizations (113256)

Frank Dobbin

2021 Spring (4 Credits)  Schedule:  TR 1030 AM - 1145 AM

Instructor Permissions:  None  Enrollment Cap:  n/a

This course examines the evolution of the modern organization, focusing on changing approaches to corporate strategy and to managing employees. We read both social scientific analyses and Harvard Business School cases to trace the history of management, from the harsh principles of the "drive system" to the latest theories of how "work teams" improve productivity and how focusing on a firm's "core competence" improves the bottom line. The course covers research examining the efficiency and the equity of current corporate practice.

Sociology 1026

Global Social Change (109657)

Rachel Meyer

2020 Fall (4 Credits)  Schedule:  MW 1200 PM - 0115 PM

Instructor Permissions:  Instructor  Enrollment Cap:  36

This course explores the development of global capitalism with a focus on changing relationships between markets, states, and civil societies. Questions of power and inequality will be central to our approach. We will begin from a macro political economy perspective, exploring global social change through the lens of world-system theory, neoliberalism, deindustrialization, and "flexible accumulation." We will then examine resistance to global capitalism in local contexts around the globe. We will explore a variety of mobilizations in civil society, including transnational activism, student movements, and precarious workers' mobilizations. The course will culminate with a unit on contemporary social movements and social change where we will pay particular attention to recent events: the Black Lives Matter movement, COVID-19 and essential workers, and teacher strikes. Finally, we will take up the question of the relevance of social media to protests and social change. Throughout the course we will ask: How are social relations shaped by capitalist development in different contexts? Under what circumstances does civil society resist markets and states? And how can we conceptualize the different forms of resistance and their significance? We will explore the possibilities for and limitations on social change around the globe through a variety of cases of transnational and community-based activism.
Sociology 1067

Sociology of Law (212660)

Yael Berda
Talia Shiff

2020 Fall (4 Credits) Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

Law has a social life. Actually, it has multiple social lives. First, law is itself the product of social forces. It is shaped by what people fight about, what is taken for granted, and what can and cannot be said. But law is also an institution that makes other social institutions possible. From contracts to borders, citizenship to marriage, law consists of concepts and categories, institutions and processes that create social forms and enforce the rules of multiple games. As we will see this semester, law is both the outcome and the starting point of many social processes, it tells us both the history and the perceived future of a social phenomenon. Even before its inception within the legal structure of mandate Palestine in 1948, Israeli law, broadly defined, has been a site for social controversy and contestation. Issues of citizenship and land ownership, geographical borders and international law, the role of the religion in private and public life, questions of historical legacies from the Ottoman and British empires as well as Hebrew and Muslim law all provide powerful case studies for sociologists of law. We will use these issues in Israel as a comparative vantage point to learn to use our sociological imagination to identify, analyze and explain these social phenomena using law and society scholarship.

Course Notes: Counts for introductory credit when taken for letter grade.

Sociology 1103

Environment and Inequality (212756)

Vivian Shaw

2021 Spring (4 Credits) Schedule: W 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 15

How does your zip code affect your health? What are the social and political consequences to building a dam? How do natural disasters exacerbate racial inequalities? This seminar explores environmental issues through the lens of inequality, focusing particularly on race, indigeneity, gender, and (dis)ability. We will borrow from case studies across the globe: from toxic disasters in Bhopal, India, to the Grenfell Tower fire in London, UK, to Standing Rock, in the United States. While learning about the transnational and comparative-historical scope of environmental issues, students will apply key theoretical tools to situate course topics within broader themes, including cultural memory, popular culture, violence, and
governmentality. Students will also develop an expertise in a course-related topic of their choice.

**Sociology 1104**

Sociology of Higher Education (203333)

*Manja Klemencic*

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM

**Instructor Permissions:** Instructor

Enrollment Cap: 12

This undergraduate seminar explores modern higher education systems, institutions and student experiences of higher education through sociological lenses. We read the seminal works and concepts from the seven domains of inquiry in sociology of higher education: college impact, study of inequalities, universities and colleges as organizations, academic profession, higher education politics, higher education culture and student agency and impact in higher education. We analyze some of the major questions and controversies in contemporary higher education – What are the implications of COVID-19 pandemic for higher education? Is college worth the cost? Why does higher education cost so much? How is higher education industry changing globally? Is higher education the Great Equalizer? We also look backstage to student experiences at Harvard. This is a research-intensive seminar. With personalized advising from the instructor each student conducts independent (conceptual or empirical) research leading to a capstone paper. This course offers opportunities to gain perspectives into established and emerging areas of research into higher education and insights into today’s changing higher education landscape at Harvard, in the United States and across the world.

Humanitarian Activism and Civil Society (203440)

*Shai Dromi*  
*Cristina Lacomba*

2020 Fall (4 Credits) Schedule: TR 1200 PM - 0115 PM

**Instructor Permissions:** None

Enrollment Cap: n/a

When global crises strike, humanitarian nongovernmental organizations – NGOs – spring to action, offering emergency medical services, basic necessities, expertise, and innovation to affected communities around the world. Yet COVID-19 brings unprecedented challenges—and unprecedented opportunities—to humanitarian endeavors. Humanitarian workers are now working globally to distribute personal protection equipment in disadvantaged communities, trace the spread of coronavirus in countries with sparse public health resources, support countries with weakened hospital systems, and advocate for an equitable
distribution of a future vaccine.

This course provides a comprehensive view of humanitarian organizations and activism from a sociological perspective. We will examine the origins of organized humanitarian activism and the dilemmas and challenges that NGOs face. We will investigate the consequences, justifications, and limitations of humanitarian work. COVID-19 will be a central study case for us, and we will also look at case studies from the Kosovo War, the Nigerian Civil War, and the 2004 Indian Ocean Tsunami. Students will be assigned specific regions to research over the course, and will create visual representations of the conditions and humanitarian activities in their assigned region. The course will include a virtual "hackathon" with the Bok Center's Learning Lab Studio where students will learn visual media skills for this purpose.

Sociology 1113

Latinx Identity and Mobilization (211161)

Cristina Lacomba

2021 Spring (4 Credits)  

Schedule: W 0300 PM - 0500 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 15

This course examines Latinx identity and mobilization from a sociological perspective. It begins by investigating the complexity of the Latinx identity in the United States. Does Latinx refer to a culture that encompasses many cultures, a common geographical origin, a shared linguistic identification, some or all the former? How does the use of pan-ethnic identities, of which Latinx is a representation, shape power, representation, and inequalities within and between social groups? The course will first focus on sociological theory of ethnic identity construction. Students are then asked to apply their newfound understanding of the Latinx identity to an analysis of Latinxs' mobilization and social movement activism. What socio-political issues undergird Latinxs' mobilization in modern times? How well does social movement theory explain Latinx mobilization? The course discusses the formation of Latinx identities and mobilizations of Caribbean, Northern, Central, and South American people/s in the United States.

Sociology 1121

Understanding Meritocracy (212827)

Jonathan Mijs

2020 Fall (4 Credits)  

Schedule: R 0945 AM - 1145 AM  
Instructor Permissions: Instructor  
Enrollment Cap: 10

Some hold inequalities to be the result of a fair "meritocratic" race that is decided by hard work and effort alone. Others believe the race is fixed: some of us, because of their gender, color of skin, or their parents'
resources have a much better shot at winning than do others. This course challenges students to critically evaluate the concept of meritocracy, its origins and contemporary adoption as an ideal worth striving for. Taking a sociological perspective, we ask what a true meritocracy would look like, what its societal implications would be, and what social processes may stand in its way. We then review the empirical record describing people’s various perceptions and explanations of social inequality, and we explore the factors underlying their beliefs. Specifically, what are the psychological underpinnings of people’s beliefs about inequality and what role does culture play? Are people’s beliefs most impacted by news reporting, by facts or by experience? We conclude by exploring how beliefs about inequality are mobilized in class and racial conflict, and explore in what ways people’s beliefs are or aren’t likely to change.

**Sociology 1124**

Immigration and Gender (213351)

*Talia Shiff*

2020 Fall (4 Credits)  Schedule:  M 1200 PM - 0200 PM

Instructor Permissions:  Instructor  Enrollment Cap:  15

The study of immigration and the study of gender often do not intersect. This is despite the fact that scholars in both fields of study focus on questions concerning cultural membership and equal citizenship and the processes that produce social inequality. The goal of this course is to reinvigorate the linkages between gender and immigration. We will interrogate how gender, as it intersects with race, shapes practices and policies of im/migration and migrants’ lived experiences: what is the gendered character of migration patterns, and policies? How does migration occur on a voluntary and involuntary basis in ways that disproportionately disadvantage marginalized groups along lines of gender and race? And conversely, in what ways do the practices and consequences of immigration and transnationalism shape and constitute gender relations? The course will combine discussions of current issues on public media and news articles with academic analyses to encourage students to think about the complex interrelations between immigration, sexuality, gender and race, and the ways these shape our social world.

Media and Society (215910)

*Cristina Lacomba*

2021 Spring (4 Credits)  Schedule:  TR 1200 PM - 0115 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

What are the virtuous capacities of mass-delivery information technologies? How do they help the world
become a better place? Do they present potential threats to individuals and the societies in which they live? Through select theoretical work in sociology, we will reflect upon those questions and apply that knowledge to the world we know. To illustrate these theories, we will resort to past and current examples of the use of the media and new technologies. The course will explore how the media helps uncover injustices, such as police brutality, and generates social mobilization. It will also cover how the media produces political propaganda and provides space for virtual (online) communities. For instance, the course will explore both top-down and ground-up approaches, examples of which are how the United Nations uses new technologies to promote its political agenda or how individuals join online blogs in search of identity and community. The semester will begin with the study of older media outlets, such as newspapers, televisions, and the internet, and move onto newer social media technologies such as Facebook, Twitter, and Instagram. The class will include the topics of gender, race and ethnicity, inequality, and collective identity in the socio-political and cultural terrains.

This course is apt for undergraduates interested in communication, culture, and politics.

Student Leadership and Service in Higher Education (205039)

*Manja Klemencic*

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 30

This Undergraduate Engaged Scholarship Course specifically targets students in service and leadership roles at Harvard (e.g. student leaders in student organizations, students serving on University committees or as interns in University offices or programs, PAFs, HOCOs, UC members, Crimson, etc.). To these students it offers an opportunity to engage with scholarship from sociology of higher education to better understand and explore student agency in college contexts. Through hands-on student leadership development workshops built into the course, students will also develop skills that will help them in their roles. Students’ grasp of concepts, such as university citizenship, mattering, belonging, community-building, and self-formation, is reinforced through their experiential learning in existing service and leadership roles on campus. Based on their campus role, students work on participatory action research and develop blueprint to change practice or policy. This course challenges the traditional line of inquiry in sociology of higher education which focuses primarily on the effects of college on students. Instead, student action research projects demonstrate student agency and the impact students have on higher education communities.

**Sociology 1131**

Philanthropy and the Nonprofit Sector (203368)
When crises strike, nonprofit organizations spring to action, offering their resources, expertise, and innovation to affected communities. Yet COVID-19 brings unprecedented challenges—and unprecedented opportunities—to philanthropic endeavors. Indeed, aside from supporting medical research on COVID-19, nonprofit organizations have been providing medical care, distributing personal protective equipment (PPE), helping address loss of employment and food insecurity, and advocating for global equity in vaccine distribution, among other tasks.

This course partners with the Lemann Program on Creativity and Entrepreneurship (LPCE) in order to provide students with a unique opportunity to experience first-hand how philanthropists and nonprofit organizations are helping address the global effects of this global pandemic. On the theoretical side, the course will examine the workings of philanthropy and of nonprofit organizations, using different sociological perspectives and a series of case studies. Alongside the theoretical content, students will form groups and will develop their own nonprofit ventures to address the social impact of COVID-19. Student ventures will receive startup seed funding and, at the end of the course, will compete over additional seed money. The course will include a series of guest lectures and workshops on entrepreneurship to support student venture development.

Talia Shiff

2021 Spring (4 Credits) Schedule: M 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This course explores the production of social inequality from a global and transnational lens. The course is based on the premise that we have to think about core issues concerning unequal access to rights, resources and cultural membership globally while at the same time not denying the importance and centrality of the unit of the nation state. In this course, students will not only compare differences across countries but will also develop tools by which to critically think about what it means to see the world as a unit that is populated by markets, movements and networks that transcend national boundaries. We will ask how the national and transnational are interrelated and mutually constitutive of each other. Students will have the opportunity to explore questions concerning borders and boundaries, forced migration, and changes in the relations between civil societies, states and markets. Through considering these topics of global social change, students will critically investigate the limits and potential of establishing a global sociology for understanding social relations at local, national, and international scales.

Sociology 1133
War, Revolution, and Organized Crime: In Film, and in Reality (159926)
Danilo Mandic
2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a
This course explores war, revolution and organized crime as interrelated social phenomena. Students will read sociologists, historians, political scientists and philosophers addressing the nature, causes and consequences of these phenomena in different national and historical contexts. The course will combine influential theoretical frameworks (by Karl Marx, Max Weber, Sigmund Freud, Hannah Arendt), middle-range social scientific approaches (by Anthony Giddens, Charles Tilly, Michael Mann, Theda Skocpol), and empirical and historical analyses (by Eric Hobsbawm, Benedict Anderson, James C. Scott, Eugen Weber). The three phenomena will further be scrutinized through their (mis)representation in movies by Mike Nichols, Milos Forman, Bernardo Bertolucci and others.

Sociology 1137
Political Sociology (215965)
Rachel Meyer
2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a
This course is about political power: who has it, how it is used, and how it can change over time. The course begins by outlining key concepts and theories along with an examination of political power in the neoliberal state. What does democracy, public policy, and political participation look like in this neoliberal context? We will then move on to explore how power operates through state institutions with an analysis of both the welfare state and the carceral state. Should the welfare state be understood as a method of redistribution or of social control? How can we think about the relationship between the carceral state and power in civil society? What can we learn from a comparison of the welfare state and the carceral state? We will compare policies and practices in different contexts while focusing on surveillance of civil society via state institutions. Our final unit is about contesting state policies, institutions, and structures. We will take up the cases of welfare rights organizing and the Black Lives Matter movement, along with the contemporary emergence of both 'right' and 'left' populist movements. We will end with attention to the particularities and possibilities of local-level politics in terms contestation, civil society, and grassroots political power. The focus of the course is on the United States while at the same time using a comparative sociological perspective to examine political power in a variety of national, historical, and cultural contexts. Underlying our analyses will be comparisons with "real utopias" (Wright 2010)—alternative, prefigurative models of state institutions and political power.

Sociology 1138
The Israeli/Palestinian Conflict: Contemporary Socio-Legal Aspects (212817)

Tally Amir

2021 Spring (4 Credits)  Schedule:  R 0600 PM - 0800 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

The decades-long Israeli-Palestinian conflict has attracted significant international attention and is perceived as an international threat. This seminar offers a nuanced and safe discussion of the conflict’s socio-legal context and its implications for Palestinian and Israeli society, through exploring the works of scholars from diverse backgrounds and views. We will take a closer look at some of the main controversies, and how these impact the lived experiences of people in both societies, including Israel's control over and settlements in the West Bank; the separation wall and policy; concepts of citizenship, migration and refugeehood; Palestinian and Israeli statehood; and more. Readings for the course include court decisions, international law instruments, and domestic legislation, as well as sociological analyses.

Sociology 1141
Contemporary Chinese Society (116219)

Ning-Er Lei

2020 Fall (4 Credits)  Schedule:  TR 1030 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  48

Situating China in the context of the transition from socialism, this seminar provides an overview of contemporary Chinese society. We will explore recent structural changes in China's economy, political system, legal institutions, media, family forms, education, stratification and inequality, and contests over space—as well as how all these various changes interact with one another. We will begin with the Chinese Communist Revolution and then the Cultural Revolution as crucial historical context, and then move on to examine the profound social transformations of the post-1978 reform period. The course will examine how these changes have impacted social relations, how they have been experienced and understood by individuals, and how, in turn, the responses of individuals have also shaped the trajectory of reforms.

Sociology 1142
Sociology of Asian America (212728)
Today, over 22 million people living in the United States identify as Asian. Asian Americans and Pacific Islanders (AAPI) are one of the fastest growing populations in the US. What are the social, cultural, and political structures that shape the lives of AAPI? How have the experiences of AAPI changed from the nineteenth century to the present? This course takes a sociological view to examine "Asian America." Rather than analyzing AAPI as a monolithic group, this course explores the diversity of experiences and histories within Asian America. Through readings on a range of case studies, we will examine Asian America through important historical and social phenomena such as colonialism, environmental racism, war, migration, and social movements. We will look at the ways that AAPI have been socially and politically constructed as a racial group and the ways that such categorizations continue to shift. Finally, we will consider contemporary debates about AAPI that are particularly alive here at Harvard, such as affirmative action, socioeconomic mobility, and social justice.

Sociology 1152
Conflict, Justice, and Healing (212659)

Matthew Lee

Serious crime and other forms of conflict are experienced as a traumatic violation. This is to be avoided at all costs. And yet… some survivors experience surprising levels of resilience, a renewed sense of meaning and purpose, empowerment, and post-traumatic growth. Some offenders turn towards a deeper sense of truth and existential responsibility. Some communities transcend institutionalized patterns of dehumanization and violence to embrace the challenging path of forgiveness, reconciliation, healing, and inclusive flourishing. When and how do individuals and communities heal after conflict? We engage with these issues through a series of diverse case studies, including contemporary examples drawn from the international Black Lives Matter movement, prisoner reintegration efforts in the U.S., victim/offender dialog in the Middle East, and embodied emancipation in post-apartheid South Africa, as well as classic cases such as the Cuban Missile Crisis. A critical engagement with the emerging fields of conflict transformation and positive criminology reveals potential restorative pathways to individual and communal well-being, and ultimately harm prevention. A growing body of empirical research on the social conditions and processes that give rise to these outcomes will also help us explore such timeless questions as: What is justice? How can "enemies" reconcile? What is the good life?

What does subculture mean? Who participates in subcultures and why? What is society's reaction to subcultural mobilization? How do new technologies and the media shape subcultures? This course will mainly draw from sociological theory of culture to examine a variety of national and international subcultural movements around the world. The course also draws from literature on media and cultural studies to provide a further understanding of how subcultural movements arise and evolve. We will analyze different types of subcultures under the lens of class, gender, and race in music, arts, and style movements. Examples include but are not limited to hippies and hipsters, mods, pin-ups, lolitas, or French zazous, rastafarians, pachucos, and hip-hop. The course will explore these forms of identity through theories of resistance, stigma, deviance, fandom and participatory culture among others. The course is of interest to students who want to further their understanding of the relationship between culture, identity, and power.

This class offers an introduction to the relationship between race, gender and social institutions. We will interrogate how gendered and racial classifications contribute to the making of law and other core social institutions at the same time that these very institutions reflect and create distinctions on the basis of gender and race. The first part of the course will provide students with a set of sociological tools and approaches by which to critically analyze and breakdown the interrelations between race, gender and law in American society and globally. In the second part of the course, we will examine how core concepts and approaches concerning the interrelations between race, gender and social institutions come to play in the context of immigration and asylum policy, both historically and currently. We will discuss contemporary immigration and human rights issues—such as asylum, "illegal" immigration, reproductive labor, and sex trafficking—with the goal of interrogating how our cultural framings of these issues are shaped by gender, race, and the social and political aspects of law.

Ideas about crime and social order have generated debates about cities for over a century. After briefly discussing classic theories, we will evaluate contemporary arguments on topics such as racial segregation and neighborhood inequality, immigration, interactions in public space, policing, the great crime decline, and mass incarceration. We will also reflect on how the pandemic of 2020 and protests over criminal justice have changed cities. Students will conduct neighborhood observations both virtually and in person.

This course explores the tensions, contradictions, and mutual appropriations that characterize the relationship between law, science, and technology in America. It examines how ideas of evidence, expertise, and public reason have changed over the past half-century in response to such phenomena as the rise of the risk society, environmentalism, patient advocacy, and the information revolution. Law is broadly construed to include the activities of legislatures, regulatory agencies, and courts. The course seeks to contextualize the interactions of law, science, and technology in relation to wider transformations in US culture and society.

Course Notes: Offered jointly with the Kennedy School as IGA-516.

Class Notes: Also offered through HKS as IGA516

The recent arrival of refugees at the U.S.’s southern border and into Europe has caught citizens and policymakers off guard. Yet such forced migration will continue to rock our globalized world in coming decades. Why are there so many refugees? How are they displaced? Where do they travel, and why? This course will inquire into the nature, causes and consequences of contemporary refugee waves. Students will survey regional dynamics in the Middle East, Africa, Southeast Asia, Eastern Europe and North America. We will examine the particularities of refugees (compared to other migrants) and the changing nature of forced migration since the Second World War. Students will explore historical precedents to contemporary waves, learn about different host society approaches to asylum, compare government and criminal mechanisms of forced migration, and examine the reasons refugees are the object of increasing suspicion and hostility around the world. Particular attention will be paid to Central American migration into the U.S., the recent EU crisis, the role of refugee camps in the 21st century, and alternative strategies for global asylum management by bridge and destination countries.

Sociology 1193 Section: SEM

What's Wrong with Mass Incarceration (217829)

Adaner Usmani

Most academics who think and write about Mass Incarceration do so because we believe it to be wrong. But what exactly is wrong with it? This course canvases the range of answers that social scientists, lawyers, philosophers, and activists have given to that question. It is motivated by our view (to be developed in a forthcoming book) that the most common answers make both logical and empirical errors, and that better answers will require more clarity about facts and more explicit normative reasoning. Our view is still developing, and students will be strongly encouraged to argue against us. The ambition of this course is to help us and to help students—whether aspiring social scientists or budding lawyers—to think more carefully about the relationship between facts and values in discussions of race, class, crime, and punishment.

Course Notes: This course is capped at 22, with 11 slots reserved for FAS advanced undergrads, preferably those with some background in both philosophy and social science.

This course will be co-taught with Christopher Lews, Assistant Professor of Law at HLS, and will include 11 students from HLS.

Sociology 1198
Social Network Analysis (207219)

*Peter Marsden*

2021 Spring (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

This course covers foundations for studying networks comprised of social relationships, stressing underlying concepts together with quantitative approaches to representing and understanding patterns in network data. Among the topics treated are visualization, centrality, homophily, identification of subgroups or "communities", "egocentric" or "personal" networks, networks based on individual-group relationships, and the "small world" phenomenon. Students will develop familiarity with software for undertaking basic analyses of network data.

**Course Notes:** Priority given to Sociology concentrators and Grad Students

Sociology 2175
Sociology of Immigration (207599)

*Mary Waters*

2020 Fall (4 Credits)  
**Schedule:** T 1245 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This course examines theories and empirical research on international migration. We concentrate on recent research in sociology, but we also include readings from across the social sciences. We examine immigration policy, and the integration of immigrants and later generations, paying particular attention to legal status and race and ethnicity. Limited to graduate students in sociology and related social sciences.

Sociology 2202
Intermediate Quantitative Research Methods (119985)

*Peter Marsden*

2020 Fall (4 Credits)  
**Schedule:** TR 0900 AM - 1100 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a
Descriptive and inferential techniques used in quantitative sociological research. Emphasis is on the fundamentals of the linear regression model for continuous response variables, focusing on assumptions and interpretation. Motivation, application, and presentation are stressed; topics include categorical covariates, interactions, and diagnostics. Because the linear regression model is the foundation for more specialized models that are often applied in sociological research, the aim of this course is to develop the skills necessary to (a) understand quantitative sociological research, (b) produce convincing analysis, (c) evaluate quantitative analysis, and (d) learn more specialized techniques as needed.

Course Notes: Required of, and limited to, first-year graduate students in Sociology

Recommended Prep: Familiarity with basic statistics.

Sociology 2203
Advanced Quantitative Research Methods (112874)

Christopher Winship

2020 Fall (4 Credits) Schedule: TR 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

Matrix approach to regression analysis with an emphasis on the assumptions behind OLS. Instrumental variables, generalized least squares, probit and logit models, survival analysis, hierarchical linear models, and systems of equations are studied.

Course Notes: Required of, and ordinarily limited to, second-year graduate students in Sociology. Previously offered as 203a and 203.

Class Notes: Limited to Sociology, SP, and OB grad students.

Recommended Prep: Sociology 2202 (formerly 202) or basic course in regression analysis.

Sociology 2204
Classical Social Theory (117877)

Adaner Usmani

2020 Fall (4 Credits) Schedule: W 0900 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: n/a
Introduction to the formative ideas and socio-intellectual contexts of 19th and early 20th century sociological theory. Course will explore social thought from the perspective provided by the problem of social order - and the roles different thinkers attributed to such factors as solidarity, power, and meaning as solutions to this problem. Consideration of the continuing significance of these ideas for contemporary social thought.

Course Notes: Required of and limited to first-year graduate students in Sociology, OB, and Sociology/Social Policy students.

Sociological Research Design (125089)

David Pedulla

2021 Spring (4 Credits) Schedule: R 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

This course covers the fundamentals of sociological research design. Emphasis is placed on principles that are applicable in all kinds of sociological research, including surveys, participant observation, comparative historical study, interviews, and quantitative analysis of existing data. The course also delves into current methodological controversies in several arenas.

Course Notes: Required of, and ordinarily limited to, first-year graduate students in Sociology.

Sociology 2209
Qualitative Social Analysis: Seminar (110551)
Ning-Er Lei
2021 Spring (4 Credits)
Schedule: T 0900 AM - 1145 AM
Instructor Permissions: Instructor
Enrollment Cap: n/a
This course covers basic techniques for collecting, interpreting, analyzing, and reporting interview and observational data. Focused on both theory and practice, the course aims to expose students to many different kinds of qualitative research to provide students a vehicle to produce a compelling paper based on qualitative data.

Course Notes: This course is required of and limited to first-year students in Sociology or in the joint Ph.D. programs between Sociology and other departments.

Sociology 2225

Hist Sociology: Approaches to the Emergence of Capitalism in Europe and the Late Developing World (118599)

Orlando Patterson

2021 Spring (4 Credits)  
Schedule: R 0300 PM - 0500 PM  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

Examines the main approaches to the interface of history and sociology. Major theoretical traditions and methodological strategies (both quantitative and qualitative) are appraised mainly through the exploration of exemplary studies. Our focus will be on the institutional approach to the study of socio-economic change and development. Half of the case studies will concern the rise of capitalism and the modern West, including the role of slavery and colonialism in that development; the other half will be devoted to the late-developing, Non-western world, especially Latin-American, the Caribbean, South Korea and China.

Sociology 2234

Ethnographic Fieldwork (213557)

Roberto Gonzales

2021 Spring (4 Credits)  
Schedule: R 1200 PM - 0200 PM  
Instructor Permissions: None  
Enrollment Cap: n/a

This seminar explores the practice, politics, and poetics of ethnographic fieldwork—the method of immersing oneself into people's daily routines and systematically recording social processes as they unfold in real time. Along with engaging several classic and contemporary texts, seminar members will collect, analyze, and wrestle with ethnographic data. In service to the seminar's broad goals, members will engage in various stages of the ethnographic process: gaining access to a research site or population, taking field notes, conducting and transcribing interviews, and engaging in preliminary analyses of their data. We will also discuss the challenges of entering, being in, and leaving the field. The seminar is therefore designed for students who are willing to engage in focused, hands-on training on ethnographic theory and practice. To best take advantage of what this seminar has to offer, members are urged to come...
in with a preliminary sketch of a research plan that they would be ready to either directly study in the field or explore through field exercises. This will be a working seminar with members sharing field notes and experiences from the field as well as offering advice and constructive criticism at various stages of the process. This course structure requires a high level of responsibility, respect, and risk-taking among all members.

Course Notes: Jointly offered with EDU S527
Class Notes: Course held at HGSE

Sociology 2245

Causal Inference for the Social Sciences (216192)

Xiang Zhou

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

It is an adage that association does not imply causation, yet causality is at the center of most social science inquiries. This course introduces a set of concepts, assumptions, and methods that allow students to rigorously assess causal relationships from experimental and observational data. Drawing on applications from sociology, economics, and political science, we discuss a variety of research designs and statistical methods, including randomized experiments, regression adjustment, matching and weighting, instrumental variables, regression discontinuity designs, panel data models (including difference in differences), causal mediation analysis, and nonparametric/machine learning methods. The class will be a mixture of lectures, discussions, and computer work.

Recommended Prep: Two graduate-level courses in quantitative methods, such as Sociology 2202 and 2203 or their equivalents. Prior experience with R is encouraged but not required.

Sociology 2247

Nationalism and Citizenship in Comparative Perspective (212764)

Elke Winter

2021 Spring (4 Credits) Schedule: T 0300 PM - 0500 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This course focuses on the structural and discursive conditions of membership in the nation. It examines
how immigration and citizenship policies emphasize specific dimensions of national identity, and how they operate as means of nation-building under the conditions of neoliberalism and globalization. The course introduces students to key sociological issues, concepts, and theories on both nationalism and citizenship, two bodies of literature that cross-fertilize but do not fully overlap. Drawing primarily on recent debates and empirical cases from Europe and North America, the course also highlights how (im)migration and different forms of citizenship acquisition (e.g. birthright versus naturalization) interact with some of the “new nationalisms” (e.g. Brexit, the rise of Trump, new nationalist/identity movements in Europe).

Overall, this course has two principal goals: First, it offers an overview of the interdisciplinary debates that have shaped the field(s) in recent years. Second, it invites students to ask new questions and provides them with the sociological tools to address them.

Course Notes: Designed as a graduate seminar, relying heavily on student presentations, case studies and class discussions; ideally, enrollment restricted to graduate students from sociology and related disciplines (social sciences and arts), however advanced undergraduate students and/or interested graduate students from other disciplines may be accepted upon request.

Sociology 2276

Seminar on Networks and Decision-Making (216780)

Mario Small

2021 Spring (4 Credits) Schedule: T 1000 AM - 1200 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Recent years have seen a growth in research on decision-making under uncertainty. Much of this research, originally in psychology and now also in economics, has been devoted to understand how actors make decisions in practice, which is often inconsistent with the standard assumptions that rational actor theory has relied on. Yet one of the most important ways people manage uncertainty in practice is by turning to their social networks, and little of the new research on decision-making under uncertainty has taken this fact into account. At the same time, the large body of work in sociology and other fields examining how networks affect people’s actions has not generally adopted a behavioral or decision-making perspective. Prioritizing the social network over the individual as the unit of analysis, it has had far more to say about network structure than about how

This workshop is devoted to examining and understanding the limits of what we know about how networks shape decision-making. We will examine research in sociology, organizations, economics, psychology, and anthropology concerned with the relationship between networks and decision-making. We will study experimental, survey-based, and qualitative work. We will cover theoretical, methodological, and substantive issues, with the topics likely involving financial decisions, poverty, inequality, health, and management. The workshop will be experimental in nature, and will involve scholarly papers, possible visitors, and sharing of one another’s work and ideas. Students will be encouraged to think creatively, to experiment with ideas and methods, and to push their work beyond the comfort zones of traditional disciplinary thinking. Students must register for credit, and the course is pass/fail. Priority will be given to HBS students.
**Course Notes:** Offered at HBS as HBS 4912.

**Class Notes:** Offered through HBS as HBS 4912

Teaching Practicum (111781)

*Mary Waters*

2020 Fall (4 Credits)

**Schedule:**

TBD

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

This course is intended to enhance the teaching skills of graduate students in the Sociology Department. Through a combination of classroom discussions and teaching simulations, the seminar challenges students to discover and hone their teaching styles, to develop a personal philosophy about teaching and learning, to develop self-confidence leading and facilitating small and large group discussions, to learn about the teaching resources that are available to them throughout the university, to experiment with designing engaging courses of study, and to discover that teaching can be a rewarding and stimulating element of an academic career.

**Course Notes:** Required of and limited to graduate students in Sociology. Attendance at first meeting is required. Not repeatable for credit.

**Class Notes:** Time TBD

**Additional Course Attributes:**

Sociology 3307
Proseminar on Inequality and Social Policy III (112355)

Christopher Winship

2021 Spring (4 Credits)

Schedule: M 0130 PM - 0330 PM

Instructor Permissions: Instructor
Enrollment Cap: 18

Students develop previously completed papers from Proseminar I and II into professional presentations and publishable articles, critique peer papers across disciplines, and discuss presentations of national experts.

Course Notes: Offered jointly with the Kennedy School as SUP-923.

Recommended Prep: Open to doctoral students in the Multidisciplinary Program in Inequality and Social Policy or the joint PhD Program in Social Policy. Prerequisites: Sociology 296a/Gov 2340a and Government 2340b/Soc 296b (or SUP-921 and SUP-922 at the Kennedy School).

Urban Theory and Data Lab (203599)

Robert Sampson
Mario Small

2021 Spring (4 Credits) Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 30

Professors Robert Sampson and Mario Small are organizing the "Urban Theory and Data Lab" to support research by students and postdocs examining the urban condition in the 21st century. The emphasis is on the active discussion of theoretical and empirical research that is in progress, in addition to occasional discussion sessions on selected readings to be determined by the group.

Course Notes: Meets sporadically.

2020 Fall (4 Credits) Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 40

Professors Robert Sampson and Mario Small are organizing the "Urban Theory and Data Lab" to support research by students and postdocs examining the urban condition in the 21st century. The emphasis is on the active discussion of theoretical and empirical research that is in progress, in addition to occasional discussion sessions on selected readings to be determined by the group.

Course Notes: Meets sporadically.

Culture, History and Society (128274)

Ning-Er Lei

2020 Fall (4 Credits) Schedule: F 1200 PM - 0200 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

The Workshop in History, Culture, and Society is a forum for the exploration of new developments in historical social science, especially in the fields of Anthropology, Economics, History, Political Science, Psychology, and Sociology. The workshop's primary methodological goal is to initiate a discussion of what constitutes acceptable historical evidence in each of the social sciences. Its main substantive goal is to understand how the past influences the present.

Contemporary Ethnography and Inequality Workshop (216443)

Roberto Gonzales

2021 Spring (4 Credits) Schedule: R 1200 PM - 0200 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

The Contemporary Ethnography and Inequality Workshop advances cutting-edge, socially significant, and
novel ethnographic work addressing social, economic, and political inequality. The workshop circulates, appraises, and critically evaluates research presented by leading scholars as well as works-in-progress by graduate students rigorously pursuing ethnographic inquiry and methods. The workshop is open to students and faculty from across the University as well as faculty and students from nearby Boston and Cambridge universities. While regular attendance is the norm, visitors are welcome. In the Fall Semester, we will meet approximately once a month on Thursdays from noon to 1:30 pm.

Course Notes: Workshop typically meets once per month.

Elementary Sanskrit (123045)

*Nell Hawley*

2020 Fall (4 Credits)  

**Schedule:**  

MWF 1200 PM - 0115 PM

**Instructor Permissions:**  

Instructor  

**Enrollment Cap:**  

n/a

Students learn fundamental skills in Classical Sanskrit, the language that was, for many hundreds of years, the most prestigious and broadly-deployed medium of intellectual and literary expression across South Asia. In the first year of study, students develop capabilities in analytical reading (and, secondarily, in writing, speaking, and listening) that will enable them to interpret Sanskrit texts on a foundational level. Participation in this course lays the groundwork for students to engage with Sanskrit texts in a wide array of styles and genres-- poetry, narrative, philosophy, and beyond-. Most lessons and assignments involve students collaborating with their peers. Please note that the "Related Section" for this course will be a weekly review session led by the course's Teaching Fellow.

Enrollment information: Enrollment will be by permission of the instructor. After reading through the syllabus, which is available on Canvas, students who intend to enroll in this course should email the instructor (Nell Hawley, nshawley@fas.harvard.edu) introducing themselves and requesting permission to enroll. Those students should simultaneously petition for enrollment in this course through my.harvard. No auditors will be permitted. Enrolled students must take the course for a letter grade.

**Sanskrit 102AR**

Intermediate Sanskrit I (114270)

*Nell Hawley*

2020 Fall (4 Credits)  
**Schedule:** MWF 0130 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

The intermediate-level Sanskrit course enables students to interpret Sanskrit texts in several major categories: epic, poetry, and commentary. Students expand and strengthen the skills in reading comprehension, grammatical analysis, and vocabulary retention that they developed during the first year of study. Students will be able to dissect and describe nominal compounds, verbal forms, poetic meters, and morphological and syntactical features of Sanskrit words, sentences, and verses in greater detail. As a whole, the course prepares students to participate in Sanskrit language and reading courses at the advanced level.

Students achieve these objectives through focused study of three different texts. In the fall, students read a story from one of the two great Sanskrit epics, the Mahābhārata or the Rāmāyaṇa. In the first half of the spring term, students study a work of poetry (kāvya) that portrays the same story. In the second half of the spring term, students read select portions of a Sanskrit commentary on that kāvya composition.
In Fall 2020, students will read a story from the Mahābhārata that describes an extraordinary encounter between Arjuna (one of the epic's protagonists) and the god Śiva, who is disguised as a hunter. This leads students to the first sarga (chapter, canto) of Bāravi's celebrated sixth-century poem Kirātarjuniya ("Arjuna and the Hunter") in the Spring, and eventually to a commentary on the poem by the fifteenth-century scholar Mallinātha.

Please note that the "Related Section" for this course will be a weekly review session led by the Teaching Fellow.

Enrollment information: Enrollment will be by permission of the instructor. After reading through the syllabus, which is available on Canvas, students who intend to enroll in this course should email the instructor (Nell Hawley, nshawley@fas.harvard.edu) requesting permission to enroll. Those students should simultaneously petition for enrollment in this course through my.harvard. Students are required to have successfully completed an elementary-level Sanskrit course at the college level. No auditors will be permitted. Enrolled students must take the course for a letter grade.

Sanskrit 201AR

Advanced Philosophical Sanskrit (117524)

*Parimal Patil*
An advanced Sanskrit reading course focusing on the development of skills in either classical belles lettres (kāvyā) or scholastic, commentarial prose (śāstra). In the former, emphasis is on the ability to re-arrange complex poetic forms into digestible prose word order. In the latter, students learn both the stylistic conventions of scholastic Sanskrit and the technical vocabulary of the relevant intellectual discipline.

Course Notes: Please note that this course is a prerequisite for Advanced Sanskrit in the Spring.

Hindi-Urdu 101A
Introductory Hindi-Urdu (113639)
Richard Delacy
2020 Fall (4 Credits) Schedule: MTWR 0300 PM - 0415 PM
Instructor Permissions: None Enrollment Cap: n/a
An Introduction to the modern standard form of the most widely spoken language in South Asia, Hindi-Urdu. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The course also draws from the modern medium of film, in particular recent Bollywood songs, to reinforce structures and vocabulary. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: Not open to auditors.

Hindi-Urdu 123

Bollywood and Beyond: Commercial Cinema, Language and Culture in South Asia (123790)
This course examines concepts of personhood, community and culture in South Asia as expressed in contemporary film and literature. Works in Hindi-Urdu and in translation will be examined with emphasis on language as an index of cultural difference and of broad social shifts, notably the transformation of audiences from citizens to culture-consumers. Knowledge of Hindi-Urdu is not required. However, there will be a section for students with intermediate proficiency utilizing language materials.

Course Notes: Students who enroll in the language section of this course may count it towards a citation in Hindi-Urdu.

Tamil 101A
Elementary Tamil (127491)
Jonathan Ripley
2020 Fall (4 Credits) Schedule: MWF 0900 AM - 1015 AM
Instructor Permissions: None Enrollment Cap: n/a
An interactive introduction to Tamil, the oldest of the Dravidian languages of South India with a literary tradition that spans millennia. It is designed for students with no previous background in Tamil and progressively introduces speaking, listening, reading and writing using textual and audio-visual materials. After taking the TAM 101 series, students
will have a working knowledge of the fundamental grammatical structures necessary to navigate colloquial and literary modern Tamil and to begin reading older Tamil literature as well.

Course Notes: Not open to auditors.

**Tibetan 101A**
Elementary Classical Tibetan (113685)

*Leonard van der Kuijp*

2020 Fall (4 Credits)  
**Schedule:** WF 0900 AM - 1015 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

An introductory course designed for students with no background in classical Tibetan. Students begin with the Tibetan script, its standard transliteration into Roman characters, and pronunciation before proceeding to the basics of Tibetan grammar. After mastering a foundational vocabulary, students begin translating simple Tibetan texts.

**Course Notes:** Not open to auditors; cannot be taken Pass/Fail.

**Class Notes:** The First Meeting of this course will be held at 1 Bow St., Room 317. Subsequent meetings will be posted when finalized.

Intermediate Classical Tibetan (116075)

*Leonard van der Kuijp*

2020 Fall (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** Department  
**Enrollment Cap:** n/a
An intermediate classical Tibetan reading course focusing on the development of translation skills through attention to grammatical and philological analysis. This course will also provide training in the research skills required to work with the Buddhist canonical texts of the Bka’ ’gyur and Bstan ’gyur. Readings will be selected from a variety of Tibetan literary genres, including Buddhist philosophy and path literature, as well as historical and biographical narrative texts.

**Course Notes:** Not open to auditors; cannot be taken Pass/Fail.

**Requirements:** Prerequisite: Tibetan 101a AND 101b

**Tibetan 213**

Introduction to the Literature of the Bka’ gdamgs pa School and the Monastery of Gsang phu ne’u thog (216725)

*Leonard van der Kuijp*

2020 Fall (4 Credits)  

**Schedule:** T 1200 PM - 0245 PM
This course will examine the history and literature of the Bka' gdams pa school using the chronicles of Tshal pa Kun dga' rdo rje, Shākya rin chen sde, and the Rgya bod yig tshang. Special attention will be paid to the scholarly traditions of Gsang phu sne'u thog monastery and the vast collection of Bka’ dams pa texts that were published in China.

Prerequisite: At least one year of classical Tibetan.

### Tibetan 214

Readings in 'Ba' ra ba Rgyal mtshan dpal bzang po's (1310-1391) Minor Writings on Buddhist Practice (216726)

*Leonard van der Kuijp*

2020 Fall (4 Credits)  
**Schedule:**  
R 1200 PM - 0245 PM

Instructor Permissions: None  
Enrollment Cap: n/a

'Ba' ra ba, a master of the 'Brug pa sect of the Bka' brgyud pa school, was a versatile author and wrote on a large number of subjects, both esoteric and exoteric. This course will concentrate on reading a select number of his more accessible writings or portions thereof.

Prerequisite: At least one year of classical Tibetan.

**Subject: Nepali**

**Nepali  101A**

Introductory Nepali (118665)  
*Richard Delacy*

2020 Fall (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** Department  
**Enrollment Cap:** n/a

This course introduces the basic grammatical structures of modern Nepali, enabling students to read and produce simple, standard prose as well as engage in basic conversation by the end of the first year. Nepali is taught with a concern for the cultural context in which this language is spoken and written.

**Course Notes:** Not open to auditors.

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies’ website in shortly before the term begins: sas.fas.harvard.edu

South Asian Studies 183
The Vernacular in South Asia: Language, Culture and Politics (213521)

Sravanthi Kollu

2020 Fall (4 Credits) Schedule: R 0945 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

Language has long been a gateway to South Asia, a region famed for its linguistic diversity and multilingual populations. Language has also been of perennial interest for historians, literary scholars and philosophers. This introductory course will enable you to connect the region with these broader concerns by examining how and why language became significant for comprehending the modern world and how this changed the relationship of individuals, cultures and societies to language. The course makes South Asia the center of its enquiry and will focus on the region’s significance for contemporary analyses of language, such as language’s links to colonialism, the public sphere, political representation, modern theology and subalternity. It is also designed to deepen your understanding of language and its uses in your life and writing. To that end, we will explore how texts in a variety of genres (literature, history, political tracts and non-academic writing) by diverse writers (academics, public intellectuals and political figures) have made claims about language and its relationship to the self and the world. You will use these readings to produce a mix of academic and non-academic writing through the semester, including a semester long translation project that will relate to your interests outside this course.
All texts will be made available in English or English translation. No prior knowledge of South Asia or South Asian languages required but you will be encouraged to draw on any existing proficiency in languages other than English.

Class Notes: For more information about the course, see https://sites.google.com/g.harvard.edu/thevernacularinsouthasia/home.

South Asian Studies 184

The Census and Its Uncountables (214502)

Sravanthi Kollu

2021 Spring (4 Credits) Schedule: T 0945 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Every 10 years we participate in the United States census by filling out a questionnaire that includes questions about our gender, race, ethnic origin, etc. The categories mentioned here are all concepts we otherwise associate with individual, social and political identity. This course will begin with a simple question – why does the census count us along these lines? What do these categories have to do with modern governance? We will quickly see that the categories recorded on the census have evolved over the decades; categories such as ‘race’ and ‘ethnic origin’ have undergone particularly incredible shifts in whom they count.

To understand why these concepts have shifted and how they transform populations and identities requires a longer engagement with the census, its history and its contemporary manifestations. The Census and Its Uncountables offers you the opportunity for such engagement by focusing on the counting of one particular set of populations in the United States (South Asians) and the counting of South Asians by colonial governments in British India. We will compare the early census in the United States with the census and similar surveys in colonial South Asia which used categories such as language, race, etc. to count populations to understand the social and political ramifications of such counting. The course is designed to offer you a conceptually nuanced engagement with identity and to that end we will also read some key texts (literary and otherwise) that explore what identity means.

By the end of the course, you will have a historically rich understanding of key concepts such as population, governmentality, colonialism and identity. You will end the course with a group project where you will use the knowledge and analytical skills gained in the course to write about the census of the future.

South Asian Studies 185
Writing Modern South Asia (214528)

Sravanthi Kollu

2021 Spring (4 Credits)  Schedule:  R 0945 AM - 1145 AM
Instructor Permissions:  None  Enrollment Cap:  n/a

What does South Asian literature mean? What does a literary text have to be about and whom does it have to be written by to count as South Asian literature? These questions determine how publishers and readers relate to South Asian writing; they also reveal the concerns with location, identity, tradition and literary canon that determine how we read world literature. Building on these two questions, this course offers a semester-long exploration of modern South Asian writing, both mainland and diasporic. Each module is built on an author or text you might have encountered outside this course - for instance, Salman Rushdie’s *Midnight’s Children*, Arundhati Roy’s *The God of Small Things*, Mohsin Hamid, *The Reluctant Fundamentalist*, etc. We will place these popular English-language authors in conversation with other key literary and non-literary texts that constitute South Asian writing, including texts in translation. The novels, poems, stories and essays we read in this course serve two purposes: one, they illuminate South Asian literature by offering contexts for writers who have come to represent the region for a global audience. Two, these texts will introduce you to the literary histories and concepts that have determined how modern South Asian writers understand their craft and their legacies.

A key aim of the course is to help you cultivate reading and writing skills that equip you to work with diversity and contradiction in literary texts, skills that can be applied more broadly to other texts and courses. In keeping with this broader aim, the writing assignments through the semester will culminate at the end of the course in a longform essay you will write for a non-specialist audience. This essay will be your opportunity to historicize, compare, and reflect on authors from the course that spoke to you.

Thai 101A
Introductory Thai I (107892)

Richard Delacy

2020 Fall (4 Credits)       Schedule:       TBD
Instructor Permissions:  Department     Enrollment Cap:  n/a

This course introduces the basic grammatical structures of modern Thai, enabling students to read and produce simple, standard prose as well as engage in basic conversation by the end of the first year. Thai is taught with a concern for the cultural context in which this language is spoken and written.

Course Notes: Not open to auditors.

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies’ website in shortly before the term begins: sas.fas.harvard.edu

Enrollment Cap: n/a  

A two-term continuation of the study of Thai at the intermediate level. Students build on acquired proficiency at the elementary level (or its equivalent) towards achieving more fluency in reading, speaking, writing, and listening comprehension of standard Thai, as well as in cultural-social skills. Introduces new vocabulary and grammar through communicative tasks and text readings, mainly using the situational-communicative methodology.

Course Notes: Not open to auditors.

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies’ website in shortly before the term begins: sas.fas.harvard.edu

Requirements: Prerequisite: Tibetan 101a AND Tibetan 101b

Thai 103AR

Readings in Thai I (121497)

Richard Delacy

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Department

Enrollment Cap: n/a

This course is designed to focus on reading and comprehension. Selected readings will be both for academic purposes and for pleasure. Students will read newspaper and magazine articles; short stories; and passages covering topics such as history, science, politics, medicine, technology and more. This reading course will help students become more proficient with nuanced/implied meanings, bolster vocabulary and acquire familiarity with various professional jargon.

Course Notes: Not open to auditors.

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

Subject: Indo-Persian

Indo-Persian 101
Readings in Indo-Persian Literature I (207944)
Hajnalka Kovacs
2020 Fall (4 Credits) Schedule: TR 0300 PM - 0415 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

The course introduces students to Persian literature composed in the Indian Subcontinent from the 11th through the 20th century. We will combine close reading of texts in the original Persian with a discussion of grammar and prosody as well as secondary readings in English. Texts include excerpts from chronicles, discourses and letters of Sufis, hagiographies, biographical dictionaries, travelogues, collections of tales, as well as epic, lyric, and panegyric poetry.

Recommended Prep: Two years of Persian or equivalent; one year experience with Classical Persian preferred.

Statistics 10

Elements of Data Science (213330)

Xiao-Li Meng

Hanspeter Pfister

2021 Spring (4 Credits)

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap: 60

Data science combines data, statistical analysis, and computation to gain insights and make useful inferences and predictions. This course will take a holistic approach to helping students understand the key factors involved, from data collection and exploratory data analysis to modeling, evaluation, and communication of results. Working on case studies and a final project in teams will provide students with hands-on experience with the data science process using state-of-the-art tools. Emphasis will be given to the strengths, trade-offs, and limitations of each method to highlight the importance of merging analytical skills with critical quantitative thinking.

Class Notes: Also offered as COMPSCI 10. Students may not take both for credit.

Please note that the enrollment cap is a combined total for both STAT 10 and COMPSCI 10.

Requirements: Anti-requisite: Cannot be taken for credit if AC 209A or CS 109A or CS 10 or STAT 121A is already complete.

Statistics 102

Introduction to Statistics for Life Sciences (110094)

Kevin A. Rader

Introduces the basic concepts of probability, statistics and statistical computing used in medical and biological research. The emphasis is on data analysis and visualization instead of theory. Designed for students who intend to concentrate in a discipline from the life sciences.

Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104.
Statistics 104

Introduction to Quantitative Methods for Economics (114027)

Katy McKeough

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

In a world where data is growing larger and more complex, it can be a challenge to turn an abundance of information into the knowledge from which sound decisions can be made. As a discipline, statistics aims to bridge the gap between knowledge and information. This course will motivate statistical methods through data analysis and visualization, in addition to discussing the underlying theory. We will discuss topics such as study design, descriptive statistics, probability, sampling distributions, hypothesis testing, linear regression, and Bayesian inference. A wide variety of applications from the economic and social sciences will be highlighted along with examples from biology, sports, politics, and more. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques. This course makes use of the statistical programming language R, but no prior knowledge of computer science is required.

Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104.

Requirements: Anti-Req: may not be taken for credit if STAT 109 or STAT 139 already complete.

Additional Course Attributes:

Statistics 104

Introduction to Quantitative Methods for Economics (114027)

Katy McKeough

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

A rigorous introduction to statistics for students intending to study economics. Examples drawn from finance, decision analysis and economic decision-making. In addition to descriptive statistics, probability, inference and regression modeling, also covers portfolio optimization, decision analysis, and time series analysis. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques.
Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104.

Requirements: Anti-Req: may not be taken for credit if STAT 109 or STAT 139 already complete.

Statistics 111

Introduction to Statistical Inference (111036)

Joseph Blitzstein

Neil Shephard

2021 Spring (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

The course is designed for undergraduates as their first introduction to rigorous statistical inference. Understanding the foundations will allow you to see more deeply into individual methods and applications, placing them in context and able to learn new ones (and invent new ones!) much faster having understood broad principles of inference.

Recommended Prep: Mathematics 19a and 19b or equivalent and Statistics 110.
Statistics 115

Introduction to Computational Biology and Bioinformatics (122304)

Xiaole (Shirley) Liu

2021 Spring (4 Credits)  Schedule:  TR 1200 PM - 0115 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

The course will cover basic technology platforms, data analysis problems and algorithms in computational biology. Topics include sequence alignment and search, high throughput experiments for gene expression, transcription factor binding and epigenetic profiling, motif finding, RNA/protein structure prediction, proteomics and genome-wide association studies. Computational algorithms covered include hidden Markov model, Gibbs sampler, clustering and classification methods.

Recommended Prep:  Good quantitative skills, strong interest in biology, willingness and diligence to learn programming.

Statistics 117

Data Analysis in Modern Biostatistics (203104)

Giovanni Parmigiani

2021 Spring (4 Credits)  Schedule:  TR 0900 AM - 1015 AM

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

An Introduction to applied biostatistics via case studies. The course is based on four practical problems, and methodology relevant for each. Students will apply the concepts from the methodology to the data analysis or modeling task, and carry out four mini projects, with ample opportunities for peer-to-peer discussion.

Course Notes:  There is a cap of 30 students for this course. Preference is given to Statistics concentrators; all other students wishing to take the course must send a request along with a list of statistics/computer science courses already completed to the professor at gp@jimmy.harvard.edu. Please put Stat 117 in the subject line of the email.

Recommended Prep:  Prerequisites: Stat 110 and Stat 102/111/139. Recommended: 112
Statistics 120

Introduction to Bayesian Inference and Applications (156425)

S. C. Samuel Kou

2020 Fall (4 Credits)

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None  Enrollment Cap: n/a

Provides students a comprehensive understanding to the questions as of what is, how and why Bayesian. Introduction to classic Bayesian models, basic computational algorithms/methods for Bayesian inference, as well as their applications in various domain fields, and comparisons with classic Frequentist methods. As Bayesian inference finds its roots and merits particularly in application, this course puts great emphasis on enhancing students’ hands-on skills in statistical computation (mostly with R) and data analysis.

Recommended Prep: STAT110, STAT111 and basics of R programming are required.

Kevin A. Rader
Pavlos Protopapas
Christopher Tanner

2020 Fall (4 Credits)

Schedule: MWF 0900 AM - 1015 AM

Instructor Permissions: None  Enrollment Cap: n/a

Data Science 1 is the first half of a one-year introduction to data science. The course will focus on the analysis of messy, real life data to perform predictions using statistical and machine learning methods. Material covered will integrate the five key facets of an investigation using data: (1) data collection - data wrangling, cleaning, and sampling to get a suitable data set; (2) data management - accessing data quickly and reliably; (3) exploratory data analysis – generating hypotheses and building intuition; (4) prediction or statistical learning; and (5) communication – summarizing results through visualization, stories, and interpretable summaries. Part one of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: Only one of CS 109a, AC 209a, or Stat 121a can be taken for credit. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109a, AC 209a, or Stat 121a for credit.
Data Science 1: Introduction to Data Science (203101)

Kevin A. Rader
Pavlos Protopapas
Christopher Tanner

2020 Fall (4 Credits)  Schedule: MWF 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 30

Data Science 1 is the first half of a one-year introduction to data science. The course will focus on the analysis of messy, real life data to perform predictions using statistical and machine learning methods. Material covered will integrate the five key facets of an investigation using data: (1) data collection - data wrangling, cleaning, and sampling to get a suitable data set; (2) data management - accessing data quickly and reliably; (3) exploratory data analysis – generating hypotheses and building intuition; (4) prediction or statistical learning; and (5) communication – summarizing results through visualization, stories, and interpretable summaries. Data Science 2: Advanced Topics in Data Science (203102)

Pavlos Protopapas
Mark Glickman
Christopher Tanner

2021 Spring (4 Credits) Schedule: MWF 0900 AM - 1015 AM
Instructor Permissions: None Enrollment Cap: n/a

Data Science 2 is the second half of a one-year introduction to data science. Building upon the material in Data Science 1, the course introduces advanced methods for data wrangling, data visualization, and statistical modeling and prediction. Topics include big data and database management, interactive visualizations, nonlinear statistical models, and deep learning. Part two of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: Can only be taken after successful completion of CS 109a, AC 209a, Stat 121a, or equivalent. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109b, AC 209b, or Stat 121b for credit.

Recommended Prep: : CS 109a, AC 209a, or Stat 121a required.

Requirements: Requisite: (Must take CS 109A OR APCOMP 209A OR STAT 121A before taking STAT 121B) AND (Cannot take STAT 121B, if already taken STAT 121 OR CS 109 OR CS 109B OR APCOMP 209 OR APCOMP 209B)

Statistics 123
Quantitative Finance (126048)

Stephen Blyth

2020 Fall (4 Credits) Schedule: MW 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a

Introduction to financial derivatives and the probabilistic techniques used to analyze them. Topics include: forwards, swaps and options; replication, no-arbitrage and risk-neutrality; martingales, numeraires and the fundamental theorem of asset pricing; and an introduction to interest-rate derivatives and their valuation. Provides a rigorous but accessible treatment of the elegant theory underpinning quantitative finance, motivated by real problems from the financial industry.

Course Notes: Designed for those seeking an understanding of the quantitative challenges on Wall Street and the probabilistic tool-kit developed to address them.
Recommended Prep: Statistics 110 or equivalent.

Linear Models (110751)

Kevin A. Rader

2020 Fall (4 Credits)  
Schedule: MWF 0130 PM - 0245 PM  
Instructor Permissions: None  
Enrollment Cap: n/a

An in-depth introduction to statistical methods with linear models and related methods. Topics include group comparisons (t-based methods, non-parametric methods, bootstrapping, analysis of variance), linear regression models and their extensions (ordinary least squares, ridge, LASSO, weighted least squares, multi-level models), model checking and refinement, model selection, cross-validation. The probabilistic basis of all methods will be emphasized.

Class Notes: This Course has a Friday Lab.

Recommended Prep: Statistics 110 and Math 21a and 21b or equivalent

Statistics 141
Spatial Statistics (217516)
Alex Young
2021 Spring (4 Credits)  Schedule: MW 1200 PM - 0115 PM
Instructor Permissions: Instructor  Enrollment Cap: n/a

Spatial data – which is prevalent in climatology, meteorology, geology, oceanography, ecology and many other fields – requires specialized statistical tools for analysis due to the inherent dependence which exists between samples taken at nearby locations (or times). In this introductory course in spatial statistics, we’ll cover central topics including spatial point processes, lattice models, and geostatistics. Theory (mathematical models and background) will be presented in concert with inference and prediction (statistics and estimation) with an emphasis on numerical examples to provide intuition and identify commonly used tools for EDA including visualization and important summary statistics. Students should take this course if they are interested in learning more about tools to handle the complex datasets where each datum depends in some part upon all others.

Recommended Prep: Required courses: Stat 110; Math 21A/B; Stat 111 (may be taken concurrently)

Recommended courses: Stat 139

Statistics 143
Sports Analytics (217523)
Laurie Shaw
2021 Spring (4 Credits)  Schedule: WF 0300 PM - 0415 PM
Instructor Permissions: None  Enrollment Cap: n/a

The amount of data collected during games and tournaments has increased enormously over the last few decades, as has demand for new techniques for analysing this data. This course will cover a wide variety of quantitative topics in sports analytics, including: player evaluation; measuring team strength and predicting outcomes; situational analysis; working with tracking data; and special topics. It will be hands-on, including live data analysis in class and an emphasis on project work (group and individual).

Recommended Prep: Prerequisites include STAT110, STAT111 and STAT139. Experience using python or R is strongly recommended.

Generalized Linear Models (118974)
Mark Glickman
2021 Spring (4 Credits)  Schedule: MW 0130 PM - 0300 PM
Instructor Permissions: None  Enrollment Cap: n/a
Sequel to Statistics 139, emphasizing common methods for analyzing continuous non-normal and
categorical data. Topics include logistic regression, log-linear models, multinomial logit models,
proportional odds models for ordinal data, Gamma and inverse-Gaussian models, over-dispersion, analysis
of deviance, model selection and criticism, model diagnostics, and an introduction to non-parametric
regression methods.
Course Notes: Examples will be drawn from several fields, particularly from biology
and social sciences.
Recommended Prep: Statistics 139 or with permission of instructor.

Statistics 151
Multilevel and Longitudinal Models (160736)
Luke Miratrix
2020 Fall (4 Credits)  Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: Instructor  Enrollment Cap: n/a
Data often have structure that needs to be modeled explicitly. For example, when investigating students’
outcomes we need to account for the fact that students are nested inside classes that are in turn nested
inside schools. If we are watching students develop over time, we need to account for the dependence of
measurements across time. If we do not, our inferences will tend to be overly optimistic and wrong. The
course provides an overall framework, the multilevel and generalized multilevel (hierarchical) model, for
thinking about and analyzing these forms of data. We will focus on specific versions of these tools for the
most common forms of longitudinal and clustered data. This course will focus on applied work, using real
data sets and the statistical software R. R will be specifically taught and supported. While the primary focus
will be on the linear model with continuous outcomes (i.e., the classic regression framework) we will also
discuss binary, categorical, and ordinal outcomes. We will emphasize how to think about the applicability
of these methods, how they might fail, and what one might do to protect oneself in such circumstances.
Applications of hierarchical (multi-level) models will include the canonical specific cases of random-slope,
random-intercept, mixed effect, crossed effect, marginal, and growth-curve models.
Recommended Prep: Permission of instructor required. Prerequisite: S-052, Stat 139, or an
equivalent. Jointly-offered in the Graduate School of Education.
Statistics 171

Introduction to Stochastic Processes (113721)

Subhabrata Sen

2021 Spring (4 Credits)  
Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None  
Enrollment Cap: n/a

An introductory course in stochastic processes. Topics include Markov chains, branching processes, Poisson processes, birth and death processes, Brownian motion, martingales, introduction to stochastic integrals, and their applications.

Recommended Prep: Statistics 110 and Mathematics 21a and 21b, or equivalent

Statistics 185

Introduction to Dimension Reduction (213478)

Alex Young

2020 Fall (4 Credits)  
Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: None  
Enrollment Cap: n/a

An introductory course in dimension reduction. Topics include principal component analysis, nonnegative matrix factorization, clustering and their applications with an emphasis on unsupervised learning, high-dimensional geometry, and insights provided by linear algebra.

Requirements:  
Prerequisite: STAT 110 AND MATH 21A AND MATH 21B

Statistics 186

Introduction to Causal Inference (110022)

Susan Murphy
2021 Spring (4 Credits)  Schedule:  TR 0130 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  30

Causal inference concerns the very difficult, challenging problem of addressing questions such as, "Would vaccinating children 16 and younger against COVID 19 lead to fewer deaths among public school teachers?" and "Would providing Harvard students access to a mobile health application designed to help them manage school stress, lead to improved school performance?" This class will include 4 modules. The first module introduces the nuanced world of causal inference along with a fundamental tool: the language of potential outcomes. The second module covers randomized experiments and how data from randomized experiments can be used to make causal statements. The third module introduces the rather tricky problem of using observational (non-randomized) data to attempt to make causal statements. The final module introduces a new and challenging area in which the goal is to make causal inference about the effect of sequences of treatments.

Recommended Prep:  Probability, Statistical theory, Linear models
Requirements:  Prerequisite: STAT 110 AND STAT 111 AND STAT 139 or Gov 2000 AND Gov 2001

Statistics 195

Statistical Machine Learning (207703)

Lucas Janson

2020 Fall (4 Credits)  Schedule:  TR 0130 PM - 0245 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

This course is designed to follow CS 181 and will dive deeper into the statistical properties of various machine learning methods. The goal of the course is to introduce and prepare students for theoretical and methodological research in statistical machine learning. Methods include linear methods for regression and classification, splines, kernel smoothing, additive models, trees, boosting, bagging, and random forests. Statistical principles covered include no-free-lunch theorems, generalization error, degrees of freedom, shrinkage, smoothing, and model selection. The latter part of the course will be devoted to introducing some emerging statistical topics at the cutting edge of statistical machine learning such as using machine learning for statistical inference, conformal inference, using machine learning for causal inference, implicit regularization, algorithmic fairness, differentially-private machine learning, and transfer learning. **different this year** In addition to problem sets but instead of exams or a course project, students will work in groups to synthesize and give short presentations on recent applied and theoretical machine learning papers.

Course Notes:  Textbook Information: Elements of Statistical Learning by Hastie, Tibshirani, and Friedman is a required text and is available for free at https://web.stanford.edu/~hastie/ElemStatLearn/printings/ESLII_print12.pdf

Recommended Prep:  Statistics 111 and Computer Science 181, or equivalents

Statistics 234

Sequential Decision Making (205213)

Susan Murphy

2021 Spring (4 Credits) Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 25

This graduate course will focus on reinforcement learning algorithms and sequential decision making methods with special attention to how these methods can be used in mobile health. Reinforcement learning is the area of machine learning which is concerned with sequential decision making. We will focus on the areas of sequential decision making that concern both how to select optimal actions as well as how to evaluate the impact of these actions. The choice of action is operationalized via a policy. A policy is a (stochastic) deterministic mapping from the available data at each time t into (a probability space over) the set of actions. We will consider both off-line and on-line methods for learning good policies.

Mobile health is an area that lies within multiple scientific disciplines including: statistical science, computer science, behavioral science and cognitive neuroscience. This makes for very exciting interdisciplinary science! Smartphones and wearable devices have remarkable sensing capabilities allowing us to understand the context in which a person is at a given moment. These devices also have the ability to deliver treatment actions tailored to the specific needs of users in a given location at a given time.
Figuring out when and in which context, which treatment actions to deliver can assist people in achieving their longer term health goals. In the last 15-20 minutes of many of the classes we will brainstorm about how the methods we discussed during that class might be useful in mobile health.

This course will cover the following topics: Markov Decision Processes, on-policy and off-policy RL, least squares methods in RL and Bayesian RL, namely posterior sampling. Most of the course will focus on Bayesian RL via posterior sampling. This is particularly useful in mobile health as posterior sampling facilitates off-policy and continual learning. Also the Bayesian paradigm facilitates use of prior data in initializing an RL algorithm. Other topics from statistics, machine learning and RL that I think are potentially important in mobile health but that we won't cover are (you could consider in your class project) include: 1) transfer learning (using data on other similar users to enable faster learning); 2) non-stationarity (dealing with slowly changing or abrupt changes in user behavior); 3) interpretability of policies (enabling communication with behavioral scientists by making connections to behavioral theories); 4) using approximate system dynamic models to speed up learning, 5) hierarchical RL, 6) experience replay and 7) multi-task learning.

Statistics 236
Modern Statistical Learning (211175)
Zheng Ke
2020 Fall (4 Credits) Schedule: WF 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

High dimensional data analysis is a recent interdisciplinary research area of Statistics, Genetics and Genomics, Engineering, and several other scientific areas. It addresses an array of challenging problems that of contemporary interest, and research in this area has been very active in the past decade.

This course aims to provide a systematic introduction to various topics in high dimensional data analysis, focusing on large-scale sparse learning, and network and text data analysis. Large-scale sparse learning: Sparsity is a universal phenomenon in modern high dimensional data. Sparse structures are observed in many application settings and have many different forms, such as parameter sparsity, graph sparsity, eigenvalue sparsity, and so on. Exploring sparsity has become a common strategy in data analysis and has largely reshaped classical multivariate statistics problems. This course will investigate classical problems such as multiple testing, linear regression, classification and clustering, under the modern sparse settings. For each problem, the course discusses recent statistical methods for taking advantage of sparsity, and introduces the theoretical framework for analyzing these methods.

Network and text data analysis: Social networks and text documents are unconventional data types. This course introduces statistical models and methods for analyzing such type of data. Topics for network data analysis include community detection, mixed membership estimation, link prediction, and dynamic network modeling. Topics for text data analysis include topic modeling, word embedding, information retrieval, and sentiment analysis.

Recommended Prep: This course is mainly designed for graduate students in Statistics. The prerequisites are Statistical Inference 1&2 (students can take the
prerequisites simultaneously with this course). Graduate students from other departments (CS, Biostatistics, Economics, etc.) can also take this course, if they have taken statistics-related courses which have a significant amount of content in mathematical statistics. Undergraduate students please consult the instructor before enrolling.

Linear and Generalized Linear Models (127856)

Mark Glickman

2020 Fall (4 Credits) Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

The theory and application of linear and generalized linear models, including linear models for normal responses, logistic models for binary and multinomial data, log-linear models for count data, overdispersion and quasi-likelihood methods, random effects models, model selection, and computational issues.

Recommended Prep: Strong statistics background required (at the second-year graduate level), Statistics 210 may be taken concurrently, Statistics 211 desirable.

Couplings and Monte Carlo (217522)

Pierre Jacob

2021 Spring (4 Credits) Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

The course is about the method of coupling in probability and its use in Monte Carlo methods. These methods are algorithms that generate samples distributed according to probability distributions of interest, and have found countless applications in physics, chemistry, statistics, machine learning to name a few fields. The course includes an introduction to Monte Carlo methods, followed by an in-depth coverage of the coupling method for both theoretical and practical purposes. On the theoretical side, the course covers the celebrated “coupling inequality” and its ramifications, and coupling interpretations of different notions of distances between probability distributions, with connections to optimal transport. On the methodological side, the course covers Markov chain methods and couplings to monitor their convergence, to enable parallel computation and for variance reduction. Examples of methods covered in
the course include Coupling From The Past and recent debiasing techniques. The course is intended for
students interested in learning about applied probability, numerical methods, and algorithms that are
routinely used to compute probabilities, volumes and integrals across many scientific fields.

Recommended Prep: Basic notions of mathematics, probability and algorithms. For example Stat 210 or at least 110, and in any case a good motivation to learn
more. Prospective students can reach out to instructor to discuss. Stat 221 is not required. Lecture notes can be found at this address: sites.
google.com/site/pierrejacob/cmclectures. Prospective students are invited to have a look at the first two chapters available there, before
registering for this course.

Statistics 286
Causal Inference with Applications (156925)

Kosuke Imai

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Substantive questions in empirical scientific and policy research are often causal. Does voter outreach increase turnout? Are job training programs effective? Can a universal health insurance program improve people’s health? This class will introduce students to both statistical theory and applications of causal inference. As theoretical frameworks, we will discuss potential outcomes, causal graphs, randomization and model-based inference, sensitivity analysis, and partial identification. We will also cover various methodological tools including randomized experiments, regression discontinuity designs, matching, regression, instrumental variables, difference-in-differences, and dynamic causal models. The course will draw upon examples from political science, economics, education, public health, and other disciplines.

Recommended Prep: Stat 110, 111, and 139 or equivalent (probability, statistical theory, and linear models). Students who took Stat 186 in 2018 Fall and 2019 Fall should not enroll in this course.

Statistics 333
Individual Risk (216523)

Joseph Blitzstein
Cynthia Dwork
2020 Fall (4 Credits)  Schedule:  F 1245 PM - 0245 PM
Instructor Permissions:  None  Enrollment Cap:  n/a
Risk assessment tools are increasingly deployed in high-stakes settings: What is the probability that the tumor will metastasize? What is the chance that this individual will commit a violent crime in the next two years? What is the probability that the student will graduate within 4 years? But what is the probability of a non-repeatable event? What is the mathematical meaning of "individual risk" and what should we require of a risk assessment algorithm? This reading course will explore different notions of risk, based on different notions of probability, and will connect this literature to notions of regret and indistinguishability from computer science.

Course Notes:  Also offered as COMPSCI 333. Only one of COMPSCI 333 or STAT 333 can be taken for credit.

Recommended Prep:  Familiarity with probability (e.g., Stat 110 and/or exposure through theoretical computer science). Exposure to theoretical computer science will be helpful but is not mandatory.

Statistics 364
Scalable Statistical Inference for Big Data with Applications (214539)

Xihong Lin

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 15

Unprecedented advances in digital technology have produced a revolution that is transforming science and society. Big data have been rapidly generated in many disciplines, such as genomics, health, physical and social sciences. The value of big data lies in effective analysis using statistical inference and machine learning methods that are computationally scalable and efficient. In this course, we will discuss several ongoing research areas on scalable statistical inference for big data, including several current research activities, challenges and open problems. Examples include dense and sparse signal detection, feature selection, boosting, high-dimensional prediction and testing, sparse and low-rank matrix estimation, general tensor methods, fast PCA, post PC inference and eigenvector theory, efficient concave and non-concave penalized likelihood maximization and inference, nonparametric function estimation, network analysis, convolutional neural networks, random projection, sketching, distributed computing, cloud computing, variational Bayesian methods, and estimating (possibly) low dimensional functionals in high dimensional models (e.g. average treatment effects in the presence of high dimensional covariates, signal to noise ratio, genetic relatedness). Applications of these methods in various areas will be discussed.

Subject: Stem Cell & Regenerative Biol

Stem Cell & Regenerative Biol   10
Human Developmental and Regenerative Biology (125800)
William Anderson
2020 Fall (4 Credits) Schedule: MWF 0300 PM - 0415 PM
Instructor Permissions: None Enrollment Cap: n/a
Fundamental concepts in developmental biology will be presented within the framework of the developing
and regenerating mammal. Where possible, lectures will focus on humans.
Recommended Prep: Life and Physical Sciences A or Life Sciences 1a is required either
prior to or concurrently with enrollment in SCRB 10.

Building a Human Body: From Gene to Cell to Organism (212882)
Amie Holmes
Fei Chen
Richard Lee
Jessica Whited
Jason Buenrostro
Paola Arlotta
2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a
Through a series of lectures, application exercises and laboratory experiments, we will explore how the
human body develops on a molecular level from gene to cell to organ. Ever wonder how you can make
heart cells beat in a dish? Why can axolotls regenerate their limbs but humans cannot? How do neurites
grow? Can we grow a brain in a cell culture dish? Come join us to discover the answers to these questions
and more.
Recommended Prep: LS1a/LPSA is required; SCRB 10 is recommended

Stem Cell & Regenerative Biol  91R

Introduction to Research (125804)

Amie Holmes
Amy Wagers

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

Laboratory research in topics related to the Human Developmental and Regenerative Biology Concentration under the direction of, or approved by, members of the Department of Stem Cell and Regenerative Biology, Principal Faculty of the Harvard Stem Cell Institute, or others with permission. A paper must be submitted to the laboratory sponsor and to the HDRB Concentration Office for review by the Course Director and Head Tutors.

Course Notes: Students must have joined a laboratory by the course registration deadline (i.e., "study card day") to be able to enroll in SCRB 91.

Limited to Human Developmental and Regenerative Biology Concentrators; written permission of the laboratory sponsor must be submitted to the HDRB Concentration Office prior to enrolling in the course. This introductory research course is intended to prepare students for SCRB 99 and may ordinarily be repeated no more than once. Ordinarily may not be taken as a fifth course. Laboratory safety session required.

Stem Cell & Regenerative Biol 111

Regeneration: Phenomena to Mechanisms (212688)

Jessica Whited

2020 Fall (4 Credits) Schedule: MW 0430 PM - 0545 PM

Instructor Permissions: None Enrollment Cap: n/a

How can some animals regenerate large pieces of their bodies following injury? This course will use both classical and current primary literature to explore the fascinating process of regeneration across phyla, covering both invertebrates and vertebrates. Through a combination of minimalist lectures, robust discussion, and student-led presentations, students will learn to distill questions into specific, key experiments; to design experiments with meaningful controls; and to use data to refine, reformulate, and develop new hypotheses.

Course Notes: Students will be engaged in group work throughout the semester. They will develop new Wikipedia pages about specific topics related to regeneration. As a final project, they will write and produce short videos centered on student-selected topics, and the course will culminate with a class-wide viewing event.

Stem Cell & Regenerative Biol 140

Developmental and Molecular Basis of Growth and Regeneration (126744)

Fernando Camargo

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

This course will focus on the biology of organ growth and regeneration from a developmental perspective.
How is the size and symmetry of our organs set? How does a regenerating animal sense that something is missing and eventually stop the regenerative process when tissues reform? We will learn about conserved developmental pathways that are necessary for adult regeneration and discuss how the aberrant activation of these pathways can lead to overgrowth disorders such as cancer.

**Recommended Prep:** Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or permission of the instructor.

**Stem Cell & Regenerative Biol 145**

From Cells to Tissues, in Sickness and in Health (161207)

*Ya-chieh Hsu*

2021 Spring (4 Credits)  
**Schedule:** MW 0130 PM - 0245 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 18

Every cell is a part of a larger "community", working together to enable tissue function. This course will explore the principles of building complex tissues from cells. How do cells know what tissues to make and when to make them? How do cells communicate with one another? What diseases can arise when these principles go awry? How can we build tissues in the lab? In addition to lectures, students will engage deeply in primary literature.

**Additional Course Attributes:**

**Stem Cell & Regenerative Biol 155** Section: 01

Epigenetics and Gene Regulation of Human Development and Disease (215900)

*Jason Buenrostro*

2021 Spring (4 Credits)  
**Schedule:** MWF 0300 PM - 0415 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Are we destined to be our parents? In this course we will study topics in epigenetics and gene regulation to challenge some of Mendel's ideas on genetic inheritance. To do this, we will learn about the biochemical processes that control the expression of genes as cells change across human development, aging and disease. Together with genetics, we'll use science to discuss whether "nature or nurture" defines who we are. Finally, the human genome is huge, employing diverse mechanisms of epigenetic regulation, we'll learn about data rich experimental tools and work together to use computational methods to study epigenetic processes within cells.

**Recommended Prep:** LS1a or LPSA, LS1b, and SCRB 10.
Stem Cell & Regenerative Biol 167 Section: 01

Stem Cell Therapeutics: Exploring the science and the patient experience (125200)

Leonard Zon

2021 Spring (4 Credits) Schedule: W 0900 AM - 1130 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

Stem cells are the basis for tissue maintenance and repair, thus, are essential elements of normal organ and tissue physiology. Stem cells are also targets for disease processes and through transplantation are important therapeutic agents. This course will allow advanced undergraduates to explore how stem cells and tissue regeneration impact human disease pathogenesis and how stem cells might be exploited to advance new therapies for disease.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10.

Stem Cell & Regenerative Biol 175

Glucose: From Molecule to Society (128041)

Richard Lee

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

We will explore the biochemistry, cell biology, and physiology that make glucose our main source of energy. How did humans depend on and crave this molecule? What consequences does it hold for normal metabolism and disease? Students will integrate evolution, endocrinology, biostatistics, bioengineering, and regenerative biology approaches in considering sugar and all its consequences. Finally, we will evaluate legal and business issues necessary to move scientific and technical innovations from the laboratory to the patient.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or permission of the instructor.
Stem Cell & Regenerative Biol 177 Section: 01
Inflammation & Immunity (217489)

Ruth Franklin

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

What happens during an infection? This course will follow the progression of an immune response while exploring the following questions: What is inflammation? How can it both protect us and contribute to disease? Which physiologic processes are regulated by immune cells? In addition to participation in lectures, discussions, and analysis of primary literature, each student will create an original piece of science communication to engage with the general public.

Course Notes: Weekly section meeting time to be determined, will likely be on Thursday or Friday.

Recommended Prep: Prerequisite: Molecular biology

Stem Cell & Regenerative Biol 180 Section: 01
Development, Plasticity, and Regeneration in the Mammalian Brain (125803)

Jeffrey Macklis

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

Why do nerves in limbs regenerate after traumatic or combat injuries, but nerves in the spinal cord and brain do not? Why do diseases often have mutations in every cell in the body, and every neuron type in the brain, but only 1 or 2 neuron types out of thousands degenerate or fail? How does often remarkable recovery from brain surgery or injury occur in young children, but not so much in later life? How is the brain set up to sense the world, integrate incoming sensory information, and lead to movement and behavior, and how is that organized during development? Might we overcome lack of spinal cord regeneration? Might we reverse or repair neuron degeneration in ALS, e.g.? How might advanced brain-computer interface prosthetic devices add value? What’s up with stem cell biology— including hope, hype, and reality?

We will highly interactively study regenerative biology of the mammalian central nervous system (CNS), motivated by a focused and related set of human CNS disorders: This course will discuss molecular and cellular mechanisms of regeneration and repair in the mammalian central nervous system (CNS), motivated by prototypical examples in the motor control systems and circuitry of the cerebral cortex and spinal cord centrally relevant to spinal cord injury, ALS / Lou Gehrig's disease ("amyotrophic lateral sclerosis", and related disorders), and spinal muscular atrophy (SMA). We will take an approach integrating developmental and regenerative biology: we will compare and contrast aspects of embryonic neural development (molecular and cellular) with adult neural plasticity; discuss limitations to neuronal and axonal regeneration in the mature mammalian CNS following degeneration or injury; examine CNS regeneration approaches directed at overcoming intrinsic limitations; explore developmental controls, gene manipulation, and cellular reprogramming to promote neurogenesis (birth of new neurons), axonal regeneration, and directed
differentiation of progenitors and stem cells in diseased adult mammalian brain; and consider technology such as "brain-computer interfaces". This course has always functioned as an interactive seminar rather than a lecture course, and includes the trajectory of knowledge and thinking over the past century, plus the state-of-the-art in these fields, emphasising the need for a healthy measure of skepticism in some fields. Sections cover advanced experimental approaches, critical reading of the literature, and conceptual thinking.

Course Notes: Expected to be offered in alternating fall terms in even years.

Recommended Prep: Waived for Fall Term 2020. (standardly, Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; MCB 80 or equivalent "Introduction to Neuroscience" course, or permission of the instructor)

Stem Cell & Regenerative Biol 195

The Translational Science of Stem Cells (204006)

Lee Rubin

2020 Fall (4 Credits) Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: 16

Through a series of lectures, given by Professor Rubin and Dr. Nayara, as well as some outstanding international speakers, students will be introduced to a broad view of the ways in which stem cell biology can be used in translational research. Topics to be discussed include precision medicine-oriented human disease modeling, discovering drugs that target endogenous stem cells or otherwise promote tissue repair, reprogramming endogenous cells to adopt new identities as treatments for degenerative disorders, and regenerative medicine (cell-based therapies). The goal of the course is to provide a very up-to-date view of where stem cell-associated therapies stand now and, most of all, are heading in the future. The course relies on active participation and will include reading primary research articles. Students will also have the opportunity to act as hosts for outside lecturers. A key objective of the course is to help the students acquire the knowledge to design new ways of treating disease in the form of a term-long paper project.

Course Notes: Permission of the instructor required to enroll. Ability to work in a less structured environment will be essential.

Recommended Prep: Life Sciences 1a or Life and Physical Sciences A, Life Sciences 1b, and preferably SCRB 10.

The bedrock foundation of quantitative biology is controlling assumptions and errors in empirical measurement. This course focuses on developing "street-fighting" capabilities in quantitative analysis: statistical concepts that every biologist needs to ensure that they can interpret their data correctly. The course introduces estimators, the origin and consequences of key distributions in biology, error propagation, hypothesis testing, multiple hypothesis correction and the perils of p-hacking. Concepts are reinforced through problem sets, and team-based analysis of new experimental methods.

Recommended Prep: This course is required for all Systems, Synthetic, and Quantitative Biology students. Knowledge of programming, statistics, physics and chemistry.
fascinating world of high-dimensional spaces and build the intuition required for interpreting data that live in these spaces. We will cover linear and non-linear dimensionality reduction, statistical learning and inference in high-dimensional spaces, and relevant machine learning tools such as autoencoders. Finally, we ask how biological systems themselves solve high-dimensional inference problems, subject to severe measurement constraints in the form of thermal noise and limited energy resources. We will cover relevant ideas from statistical physics such as kinetic proof reading. To join the first five weeks of this course (on "street-fighting" statistics) enroll in SB220qc.

Timothy Mitchison
Sean Megason
Ashwini Jambhekar
Catherine Dubreuil

2020 Fall (4 Credits) Schedule: WF 0215 PM - 0330 PM

Instructor Permissions: Instructor Enrollment Cap: 13

This course will cover the principles of selecting a topic and hypothesis for scientific investigation, developing a research plan to address the hypothesis, and communicating the significance and details of the research plan to other scientists. The course will cover writing different types of project proposals. Students will learn about project development and presentation in various areas of systems, molecular, and cellular biology. They will practice developing and writing their own project proposals, and giving and receiving peer feedback.

Course Notes: This course is required for all Systems, Synthetic, and Quantitative Biology PhD first year students.

Additional Course Attributes:

#### Systems Biology 300HFA

**Introduction to Systems Biology Research** (120829)

*Timothy Mitchison*

2020 Fall (2 Credits)  
**Schedule:** M -

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

Series of lectures to introduce the research areas of current program faculty in systems biology. Students must complete both parts of this course (parts A and B) within the same academic year in order to receive credit.

### Additional Course Attributes:

Driven by challenges such as the COVID-19 pandemic, racial injustice, and climate change, many have come to fear the "new normal" that we are all facing. But must this new normal necessarily be a diminished or broken version of reality that simply happens to us? The StudioLab pursues the creation of a "better normal" using an interdisciplinary exploration of how transformative ideas from the liberal arts developed by Harvard students can be applied to today's societal challenges.

You will work to develop actionable solutions to pressing issues, using the starting framework of the UN Sustainable Development Goals. You will learn to identify and properly analyze a problem; work collaboratively to ideate and create an actionable approach; build an organizational strategy and business plan; network with expertise to pressure-test your ideas; and persuasively communicate your ideas to build the requisite human capital and funding relationships to launch a venture. The term will culminate in a Festival of Ideas, where individuals and teams will have opportunities to seek support to move their projects along. Through your efforts, you will reimagine a better normal for society and take meaningful action to make it a reality.

Theater, Dance, and Media
Subject: Theater, Dance & Media

Theater, Dance & Media CAMR
Advanced Playwriting: Workshop (203500)
Sam Marks
2021 Spring (4 Credits) Schedule: T 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This workshop is a continued exploration of writing for the stage. Students will be encouraged to excavate their own voice in playwriting. They will examine and attempt multiple narrative strategies and dialogue techniques. They will bolster their craft of playwriting through generating short scripts and a completed one act. Readings will include significant contributors to the theatrical form such as Ibsen and Beckett as well as contemporary dramatists such as Annie Baker, Caryl Churchill and Sam Shepard.

Course Notes: TDM CAMR is the same course as ENGLISH CAMR. Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Theater, Dance & Media CKR
Introduction to Playwriting: Workshop (205632)
Sam Marks
2020 Fall (4 Credits) Schedule: M 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

This workshop is an introduction to writing for the stage through intensive reading and in-depth written exercises. Each student will explore the fundamentals and possibilities of playwriting by generating short scripts and completing a one act play with an eye towards both experimental and traditional narrative styles. Readings will examine various ways of creating dramatic art and include work from contemporary playwrights such as Clare Barron, Aleshea Harris, Jeremy O. Harris, Taylor Mac, Suzan Lori-Parks, as well as work from Edward Albee, Caryl Churchill, and Harold Pinter.

Course Notes: TDM CKR is the same course as ENGLISH CKR. Admission is based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

This workshop teaches the practices and politics surrounding what has been defined variously as "non-fiction," "documentary," "interview-based," or "investigative" theater. We call this theater "horizontal" because its text, source material, and process are multivariate, self-consciously non-hierarchical, and aspirationally democratic: generated by and with communities through interviews.

In this workshop students will build and perform a full-length piece of horizontal theater. They will collectively choose the topic and scope of the production, study existing models, and interrogate the design of live theater on digital platforms in order to develop an original aesthetic sensibility for an online presentation. Students will determine whom to interview and about what subject of interest; they will conduct those interviews, record them, and transcribe them; and they will use verbatim language from those interviews to build lyrics, write songs, monologues, and dialogue, ultimately constructing a full-length play with music and/or a musical.

In addition, students will examine existing models of horizontal theater and discuss the politics of representation and risks of appropriation that surface in this kind of work. Models of meaningful horizontal theater include: Lynn Nottage’s Sweat, the Tectonic theater Company’s The Laramie Project, Anna Deavere Smith’s Fires in the Mirror, The Civilians’ In the Footprint, and Pearl/D’Amour’s 5 Miltons.

Horizontal theater is a document of the present moment - its content informed by the context in which it is made - and this semester our production will inevitably be shaped by the challenges and opportunities of pandemic time. We will explore the paradoxes streaming video platforms offer for live performance - intimacy and alienation, a virtual-near and a tangible-far - and how these platforms recommend performative approaches that unify process and execution.

This workshop has the spirit of a lab, wherein the aesthetics of horizontal theater are modeled, deconstructed, questioned, and ideally re-invented, where students think seriously about the identities of their subjects as well as their own, and where conversations about art-making, performance, and politics are courageous, generous, and daring.

Course Notes: TDM production studios (TDM 90AR/BR/CR/DR) frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar discussions and studio work at designated times (TBD) to examine the entire performance process through a creative lens. Additional rehearsal dates and times are TBD.

Class Notes: The fall 2020 production will focus on Horizontal Theater. The
production will be led by Jay Stull and EllaRose Chary.

Class Notes: Instructors will conduct interviews with students to gauge course interest.

TDM 90AR Info Sessions for Course Presentation Period will take place on Tuesday, August 18 at 10-11am ET and Thursday, August 20 from 6-7pm ET. Please visit the Canvas course website for more info and Zoom links.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Theater, Dance & Media 90BR

New Species: A Hybrid Studio (205031)

Phillip Howze

2021 Spring (4 Credits) Schedule: R 0300 PM - 0545 PM

Instructor Permissions: Department Enrollment Cap: 15

Co-taught by multidisciplinary artists Phillip Howze and Tara Ahmadinejad, New Species: A Hybrid Studio, is a research and production-centered studio course designed especially for students who are interested in rewilding their curiosities and engaging new skills. Working individually and collectively, students will generate interdisciplinary performance works that defy definition, and take advantage of remote engagement and collaboration. Riffing off of themes in Howze's latest interdisciplinary play—which examines our relationship to community and the contemporary moment through the lens of land, artifact, burial rites, and the poetry of personhood—students will create their own original works that will culminate in an end-of-semester production, directed by Ahmadinejad.

TDM production studios frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar discussions at designated times (TBD) to examine the entire performance process through a dramaturgical lens.

No previous theater experience is required. Students from other concentrations are strongly encouraged to participate.

Course Notes: TDM 90BR is required of concentrators and open to other students involved in the TDM spring production (as actors or apprentices on the production team). Participation is limited to students involved with the production, either as performers or as members of the production team. Students who wish to be part of the production team should contact Artistic Producer James Stanley, jamesstanley@fas.harvard.edu.

Harvard Dance Project (160653)

Jill Johnson  
Laura Rodriguez

2021 Spring (4 Credits)  

Schedule:  
R 0300 PM - 0545 PM

Instructor Permissions:  
Instructor  
Enrollment Cap:  12

The Harvard Dance Project cultivates invention and fosters the courage of artistry. This faculty-led, performance ensemble gives students the opportunity to be original cast members and collaborators in wide-ranging dance works created by preeminent professional choreographers. This spring 2021, the project will be a remote studio-based course that project focuses on collaborative performance research, choreographic composition, curation and camera dances, and links choreographic thinking to other fields.

Course Notes:  
Some dance experience required. Students concentrating in Theater, Dance & Media or interested in developing a performance practice encouraged to enroll.

Enrollment determined by audition during shopping week. Fulfills a TDM Production Studio requirement.

Recommended Prep:  
Previous dance experience required.

Theater, Dance & Media 97

Theater, Dance & Media: See it. Do it. Make Theory. (160648)

Julia Smeliansky

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 30

What are theater and dance? What is at stake when a performance is live or recorded? How do performers use space, time, and bodies to make meaning? What is the relationship between a performance and a script? Why do performers and audiences gravitate to live arts? How do economic and political circumstances shape live performances? This sophomore tutorial in Theater, Dance & Media provides students with an intellectual and practical foundation to the concentration by exploring these questions and more. Readings will include theoretical texts from Schechner, Phelan, and Chaudhuri, alongside scripts and other performance materials by Kennedy, Bausch, Kaprow, and Smith. Assessments emphasize how to write about performance and how performance serves as a form of criticism.

Course Notes: Required of all, and limited to, concentrators.

Theater, Dance & Media 109

Beginning Acting Through Scene Study and Monologue Work (207571)

Marcus Stern

2020 Fall (4 Credits) Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This is a beginning acting class designed both for students who have had no previous acting, performance or arts class experience at all, as well as for students who have had a fair amount of acting experience. The focus is on scene and monologue work using contemporary texts from theater, television and film. Core components of the class include the idea of simply working from yourself, "action-based acting" (how one person is trying to change/affect another person in a scene), and how to read a scene or monologue to figure out what your character might want from that situation. Students learn how to rehearse outside of class with a long-distance scene partner, and how to present that work both live and in a pre-recorded format. This class can also be helpful for directors, writers, designers, dramaturgs, stage managers, choreographers and dancers interested in learning more about acting techniques in performance. It is important to note that while the class is intentionally designed to be as unintimidating and accessible as possible, created with the absolute beginner in mind, the class does require a great deal of outside work. Students should expect to spend 4-6 hours per week on class work, including time for analyzing texts and rehearsal time for the scenes and monologues.

Course Notes: Enrollment will be determined by submitted audition videos:
Please prepare a 1-2 minute contemporary monologue. Choose any piece of text (1990's to the present) from any theater, television or film script. Choose a text you can relate to in some way, that feels comfortable and real to you when you say the words out loud. Please memorize the text and practice saying those lines until they feel natural to say.
Then, please record your monologue (using your phone, or whatever device you want) and email the recording or a link to the video to both marcus_stern@harvard.edu and ashleigh.d.reade@gmail.com no later than 1pm ET, Friday August 21st. If videos are sent by Google Drive link, make sure your permissions are set such that we can immediately watch the video without requesting access.

Please feel free to email us if you have any questions about the class, or about preparing and sending in an audition monologue.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 109 Info Sessions for Course Presentation Period will take place on Monday, August 17 at 9-10am and 5-6pm ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media  110

Foundations in Acting: Pathways (112880)

John Kuntz

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 12

A beginning acting class that explores the basic techniques of acting, including the various entry points to building a character as well as various techniques to rehearsing a scene or speech. Beginning with exercises that flex the imagination and heighten observation; the course will then move towards work on an actor's instincts, rhythm, focus, trust, concentration, text analysis, language and other techniques, with an ongoing emphasis on improvisation and the actor's imagination. Students will select, edit (if necessary), memorize and perform two contrasting monologues of their choice during the course. Speeches will receive in-class feedback and coaching. Especially suitable for first-year and sophomore students as well as for directors, writers, designers, dramaturgs, stage managers, choreographers and dancers interested in learning more about acting techniques in performance.

Course Notes: Enrollment determined by audition. Students will audition for the course with a short improvisation described by the professor during the course shopping/pre-registration period.

Theater, Dance & Media  112R

Advanced Acting: Contemporary Texts (122906)

Marcus Stern

2021 Spring (4 Credits) Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Using contemporary text from TV, film, and theater, this course introduces advanced acting techniques through scene and monologue work. Core components of the class include the idea of "simply working from yourself" and action-based acting, which explores how one person is trying to change/affect another person in a scene. In addition, students will learn how to read a scene or monologue to figure out what your character might want from that situation, audition techniques, how to choose material that best suits the individual actor for auditions and scene work, text analysis, and personalization of a character. All of the concepts are aimed at the creation and refinement of an acting process that can be specifically tailored to the individual actor. This course has been adapted for the online classroom, and we're excited about the concrete results we're seeing from the student actors who have been working with us virtually!

Course Notes: Enrollment determined by audition.

Class Notes: Enrollment will be determined by submitted audition videos: Please prepare a 1-2 minute contemporary monologue. Choose any piece of text (1990's to the present) from any theater, television or film script. Choose a text you can relate to in some way, that feels comfortable and real to you when you say the words out loud. Please memorize the text and practice saying those lines until they feel natural to say. Then,
please record your monologue (using your phone, or whatever device you want) and email the recording or a link to the video to both marcus_stern@harvard.edu and ashleigh.d.reade@gmail.com no later than Date TBA. If videos are sent by Google Drive link, make sure your permissions are set such that we can immediately watch the video without requesting access. Please feel free to email us if you have any questions about the class, or about preparing and sending in an audition monologue.

Squaring the Circle: Russia, Art, Revolution (208135)

Daria Khitrova

2020 Fall (4 Credits)  Schedule:  TR 0130 PM - 0245 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

Wherever an avant-garde movement sprang up, its artists would announce they were there to change the world. Nowhere did this promise come closer to fruition than in Russia of the 1920s. This course explores Russian and Soviet avant-garde art and its most radical manifestations in literature and dance, on stage and screen, in visual arts and in the ways of life. We will examine the way art and political revolution impact each other and focus on the many "isms," avant-garde and otherwise, that shaped society and the arts during a period of rapid modernization and experimentation: Futurism, Suprematism, Constructivism, Productivism and others. We will look at works by Malevich and Meyerhold, Tatlin and Mayakovsky, Rodchenko and Stepanova, Nijinsky and Meyerhold, Vertov and Eisenstein.

Course Notes:  No prerequisites. All readings in English.

This course is cross-listed as SLAVIC 114 and TDM 114K.

Class Notes:  Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes:  SLAVIC 114/TDM 114K Info Sessions for Course Presentation Period will take place on Tuesday, August 18 at 1:30-2:45pm ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media  115

Acting Shakespeare (119020)
This course is an intensive study of Shakespeare’s dramatic works from the point of view of the actor. It is important to remember that Shakespeare’s verse dramas were written to be performed and that only when they are approached this way - as playable, theatrical texts - that they have their maximum impact. Through text analysis, scene study, vocal work, and acting exercises we attempt to find not only the meaning, but the music and theatrical power of Shakespeare’s words.

Course Notes: Enrollment will be determined by an audition during the first class meeting.

### Theater, Dance & Media  118

**Acting Alone: Voice, Speech, and the Monologue (108799)**

*Remo Airaldi*

*Erika Bailey*

2020 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

**Instructor Permissions:** Instructor **Enrollment Cap:** 12

This course will explore the rehearsal and performance of theatrical monologues with a particular focus on voice and speech training. The ability to work on a monologue--whether in the context of a play or as an audition piece--is a foundational skill for all actors. We will explore various warm-up techniques to allow greater vocal and physical expressiveness in both classical and contemporary material. We'll study specific approaches to help students "act alone" creatively, honestly, and spontaneously. Students will also work on the presentation of a monologue in the context of an audition and will learn to create an effective self-tape.

Course Notes: Enrollment determined by short interview/audition.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: During the Presentation Period the instructors will meet individually with everyone who is interested in enrolling to discuss the class and answer questions. Students should also be prepared to read a short monologue during these sessions, which will take place on Mon 8/17 at 12-2pm ET, Wed 8/19 at 12-2pm ET, and Thurs 8/20 at 3-5pm ET. If students cannot attend one of these sessions please email the course instructors to arrange for an alternate time. More details are on the Canvas course website.
Theater, Dance & Media 119
Vocal Production for the Stage (118497)

_Erika Bailey_

2021 Spring (4 Credits)  
**Schedule:** MW 1030 AM - 1145 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

Whether one is performing in a play, pitching an idea, presenting research or leading a group, the ability to use one's voice effectively is a primary element in the success of the performance. Using several major techniques of speaking training, students will learn the possibilities, nuances and power of the human voice. The class will explore anatomically, experientially and theoretically, exploring different ways to use the voice to meet specific performance challenges.

**Course Notes:** Enrollment determined by short interviews to be conducted on the first day of class.

Theater, Dance & Media 125X
Performing Criticism (216430)

_David Levine_

2020 Fall (4 Credits)  
**Schedule:** W 0300 PM - 0545 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

What makes "Great Criticism?" Analytic clarity? A surfeit of objectivity? Dedication to art and artists? Or is great criticism more like great art, relying on a strong point of view and deep personal investment? This course tests the latter view, by treating works of criticism as dramatic monologues to be analyzed, invested with desire, and performed. We will use techniques of script analysis to pay closer attention to how arguments are constructed, and acting techniques to listen closely for the ways that criticism is always, to quote Nietzsche, "the confession of its originator, and a species of involuntary and unconscious autobiography."

This course will range through the history of English criticism from Philip Sidney to Zadie Smith. Students will also learn basic techniques of script analysis, acting, and public speech, and apply these techniques to works of criticism, culminating in a final recorded performance of an essay-as-monologue.

**Class Notes:** Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if
the meeting day/time is challenging due to your residing time zone.

**Class Notes:**
TDM 125X Info Sessions for Course Presentation Period will take place on Monday, August 17 at 4-5pm ET and Thursday, August 20 from 10-11am ET. Please visit the Canvas course website for more info and Zoom links.

**Theater, Dance & Media  130R**

Directing (123080)

*Marcus Stern*

2020 Fall (4 Credits)  

**Schedule:**  
R 1200 PM - 0245 PM

**Instructor Permissions:**  
Instructor  
Enrollment Cap: 9

Redesigned in response to the pandemic, this is a directing class for storytelling and some of the various forms it can take online. It's a class for directors, actors, writers, choreographers, dancers and any others interested in exploring online vocabularies, refining their voice as storytellers and artists. The course accommodates all levels of directing, from beginners with no experience, to advanced directors who are interested in a career of directing in theater and/or film. The emphasis is on telling stories that are of personal interest to you, defining your story points and desired visceral impact, and learning techniques to help you accomplish your vision. Each student directs 5 very short pieces in the first 8 classes and then 3 longer pieces over the rest of the term. Directors learn how to work with long-distance actors in terms of staging and acting values and how to assess actors' spaces for directorial possibilities. Students usually pre-record their work for presentation but have the chance to present stories live online during class time. Students may direct their own writing (however, feedback and focus will primarily be on the directorial choices), and direct themselves as actors if that's of interest to them. Students will use free basic video editing software to create their video work, but no previous video experience is necessary. While we'll look at how the camera and editing are used in some of the storytelling, this is not a technical filmmaking class. The central focus is on how a director’s personal experiences and/or passions can creatively and concretely shape their story telling.

**Course Notes:**  
Enrollment determined by the instructor after viewing student Introduction Videos. For those interested in taking the course, please submit a short 2-5 minute Introduction Video. Please include the following:

1) Your name, year, and concentration if you have one.
2) Why you’re interested in taking the course. What do you hope to get out of this course?
3) If you've had any directing, theater, film or other kind of storytelling experience. No previous experience in any of these areas is needed to take this course.
4) Please tell us two things that feel personally important to you in life. We want to encourage students to make work that they feel personally connected to.

Please email these introduction videos or a link to the video to BOTH marcus_stern@harvard.edu and annabeth_lucas@g.harvard.edu no
later than 12pm ET, Friday, August 21st. If videos are sent by Google Drive link, make sure your permissions are set such that we can immediately watch the video without requesting access.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 130R Info Sessions for Course Presentation Period will take place on Tuesday, August 18 at 9-10am and 5-6pm ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media  131  

Directing Lab (126812)  

Shira Milikowsky  

2021 Spring (4 Credits)  

Schedule: M 1200 PM - 0245 PM  

Instructor Permissions: Instructor  

Enrollment Cap: 12  

This class is designed for students interested in expanding and exploding their understanding of theater and performance studies. Directing lab is actually a laboratory: a place for hypothesis, experimentation, and practice. Over the course of American theater history thus far, who have been the great experimenters? Which directors have broken the rules and re-defined the game? Does innovation come from a single auteur, a tightly woven ensemble, a well-funded institution or a band of rogue outsiders? This class will tackle these and other questions, weaving together theory and practice to provide students with a holistic understanding of the American avant-garde and a set of practical tools with which they can tackle their own, burning artistic questions.

At the root of experimentation are questions of power and oppression. As we examine the innovators of American theater in the 20th and 21st century, course materials inherently probe questions of access and inclusion. Who is invited in? Who is left out? Which creators truly held the tools to challenge the status quo? Was their work allowed to be seen, heard, and felt? In this course students will engage in these questions not only by reading the history, but by creating and directing their own work, inspired by the artists and productions studied.

Convention tells us that 'you have to know the rules to break them,' but Directing Lab isn't a course about convention. This class is open to students with all ranges of directing experience - including none. The only prerequisite is curiosity.

Course Notes: Enrollment determined by short interview during course shopping/pre-registration period.

The poet Askia Muhammad Tore asked whether Black music could become "a potent weapon in the Black freedom struggle." Can we ask the same of theater and performance that we might identify as what playwright Naomi Wallace calls, "engaged"? Wallace offers the term up through example rather than definition: "Engaged, for example, with questions of power and its myriad forms; questions of who has it and who doesn't, and the reasons why. Questions of what happens to those who struggle with their disempowerment; who we are allowed to touch, what colour of skin articulates which desire; what orifices are worthy of worship; which of us is beaten to death for not following the rule book on acceptable sexual conduct - all these are questions intimately connected to our social contracts."

If this is a moment when what we formerly believed were necessary qualities of of theater and performance—including: presence, simultaneity, buildings, proximity, liveness, actors, and audiences—are not fully operative, how can we use this aesthetic disruption to rethink the ethical possibilities and priorities of the practice and the field? What now can be done as theater? What now can be performance?

This research-based class will develop a partial snapshot of this historical moment in contemporary theater and performance. Together we will sift through the overwhelming numbers of performance works, talks, TikTok manifestos, chats, debates, panels and archival materials accessed on the internet after CoVID restrictions shut down face-to-face assembly in theatrical venues and we will identify what we think is both aesthetically compelling and "engaged." Class participants will be responsible for deconstructing the aesthetics and ethics of those works and performance-based initiatives, teaching what they learn to one another throughout the semester using the format of "teach-ins" (practical, participatory learning sessions that are action oriented). The final results of our research will be recorded in a collectively authored digital book, a platform that allows for different formats of critical analysis to be staged alongside the rich media that served as our research archive. The book will document our collective reflection on the significance of each of the projects we have identified and the hope is that the act of bringing each individual project together might reveal some commonalities, some new possibilities of aesthetic and political solidarity.

Students will collaborate to research and identify which artists and institutions, (both insiders and outliers) across the globe who are using this moment to radically reconceive theater and performance that we might call "engaged." We will debate our own understanding of how that term that can be pertinent for this political moment or whether there need to be better aesthetic and theoretical descriptors. Then our task is to discover who is using the instability of theater and performance in this moment to challenge the
terms of the how the practice can be thought, done and the ways in which it is in concert with social justice initiatives and movements. We will become researchers of the present and future of the art form, seekers of those who are experimenting with liberating artistic practice, as Robin D.G. Kelly writes, in order to "build community, establish fellowship, play and laugh, and plant seed for"

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 134R Info Sessions for Course Presentation Period will take place on Tuesday, August 18 at 3-4pm ET, Thursday, August 20 from 12-1pm ET, and Friday, August 21 from 10-11am ET. Please visit the Canvas course website for more info and Zoom links.

Anti-Theater (217584)

*David Levine*

2021 Spring (4 Credits)  
Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor  
Enrollment Cap: 12

What if the classics offer us nothing? What if catharsis is BS? What if the "power of stories" is just marketing, and theater is inherently reactionary, elitist, out-of-date, and steeped in white supremacy? What then?

This studio class takes these positions as givens, and tries to create something faster, slyer, less prone to institutional capture. Students will create new works, rip apart old ones, and process the structural conditions of "American Theater".

Actors, directors, designers, and aspiring dramaturgs welcome.

Koteba Performance: Traditions of the Bamana (217582)

*Jeffrey Page*

2021 Spring (4 Credits)  
Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor  
Enrollment Cap: 12
Koteba is a Bamana ethnic dance and theatrical practice from Mali. The practice of Koteba has also traveled throughout the African diaspora. Traces of this festival masquerade tradition have been integrated into Carnival and Mardi Gras as practiced in the Caribbean and in the US. This class will study the performative structure of Koteba—how it carries the ideologies and cosmologies of the Bamana people and how its theatrical structures employ physical satire to resist and confront social injustice. The students in this class will engage with Koteba as a practice of kinesthetic knowledge.

Latinx Movement Practice (217446)

2020 Fall (4 Credits) Schedule: T 0600 PM - 0845 PM

Instructor Permissions: Instructor Enrollment Cap: 12

A warm invitation to get up, connect with our bodies, and move together after a long day of zooming. Latinx Movement Practice rigorously explores the social and communal Latin Diaspora of movement, migration, and music from Mexico, the Caribbean, South America, and the United States. The course is taught with a blend of English, Spanish, and Spanglish.

Together we will investigate and deepen our use of horizontal and vertical weight, isolations, polycentric movements, and hip whining techniques. We will weave a survey of the history, art, and literature from the Latinx experience through an embodied experience while fostering our virtual community. LROD (el rod) will facilitate Latinx Movement Practice with radical tenderness to embrace deeper states of power, awareness, and energetic alignment during movement rituals for heightened connectivity, and restorative power. ¡Vamos a Bailar!

Key Questions:
How do we foster a sense of community in movement during the era of zoom and isolation?
Can we deepen our movement intentions and embrace our artistic voices, while simultaneously creating space for joy and empowerment?
What are the ways we share and celebrate each other’s movement investigations each week.

Course Notes: No previous Latin movement experience is needed to enroll.

Class Notes: This course is taught by Theater, Dance & Media Lecturer in Dance, Laura Rodríguez.

Theater, Dance & Media  150

Directorial Concepts and Set Design of the 20th and 21st Centuries (110319)

Julia Smeliansky
What are the similarities between Las Vegas pop diva concert design and performances at the Theater of Dionysus in 5th Century BCE Athens? How do theater architecture and design reflect changes in society? What is the process of designing an opera or a musical? This course will introduce students to some of the most influential 20th and 21st-century directors, designers, and performance artists. We will explore a range of artistic movements that cross-pollinated the visual arts and theater over the past century, and trace the artistic heritage of current theatrical experiments to their avant-garde roots. Examining how meaning in the theater is derived not only from text but also from spatial composition, light, and overall design concept, we will study a variety of approaches to storytelling in theater, dance, and opera. Working with primary sources in the Harvard Theatre Collection, students will develop and present short creative projects based on a wide range of theatrical texts. Students will also meet with guest artists to engage in a dialogue about contemporary design practices.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 150 Info Sessions for Course Presentation Period will take place on Monday, August 17 at 12-1pm ET, Wednesday August 19 from 2-3pm ET, Thursday, August 20 from 12-1pm ET, and Friday, August 21 from 12-1pm ET. Please visit the Canvas course website for more info and Zoom links.

Design Foundations: Scenography 1 (109545)

Dede Ayite

2021 Spring (4 Credits) Schedule: T 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 12

Great design for live performance requires synergy between all the key elements to unlock the visual power of a play. This course explores the fundamentals of set, costume, lighting and sound through critical texts and applied projects.

Students will be taught the fundamentals of design with an emphasis on script analysis, research and the articulation of a design concept through rendering, collage, model building with an introduction to basic drafting principles. The goal is for students to develop key skills for conceiving and designing visual elements for live performance. Students should not expect a technical survey, but rather an exploration of how visual elements shape a given performance.

If all that is truly needed to tell a great story is an actor and an audience then what is design for the stage and what can it do?

This class explores the design of visual and material elements for the stage. How it can amplify, interpret and extend the message of the production to the viewer through delight, astonishment and provocation. Together we will explore how costume design can even assist in changing a cultural narrative.

Transformative Design is rooted in the principles of theatrical design practice as a process to explore the breadth of these questions. The professor will first demonstrate the design process that a costume designer undertakes, from start to finish. Students will learn how to read and research an existing dramatic text as a designer and how to manifest the vision of the designer’s other collaborative artists – director, choreographer, dramaturg and actors – in visual terms.

Design (whether a designer creates a costume, a prosthetic, a material prop or piece of scenery) can also transform the performer and shift the very terms of representational embodiment. For the actor, design can change one’s understanding of the physicality, the intellectual and emotional life of the character they are engaged to portray. Students will learn how to sketch and design costumes that assist in transforming the performer’s body, and how to collaborate with everyone involved in a theatrical production.

After carefully following the steps of a professional costume designer preparing for theatrical work, students in the class undertake an individual design project, from start to finish, under the supervision of the professor.

This course is taught by TDM Lecturer on Design and Obie and Lortel Award-winning costume and scenic designer Dede Ayite.

Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

TDM 158A Info Sessions for Course Presentation Period to be announced. Please visit the Canvas course website for more info and Zoom links.
How can vinyl records, legal transcripts, classic movies, home recordings, 19th century burlesque routines, archival objects and old photographs become the raw materials for some of today’s most compelling theater? And how do these works ask audiences to reconsider our inheritance of the past, creating a dialogue between the past and the present? This course focuses on theater-makers and processes of production that turn objects, archives and cultural data from the past into vibrant forms of contemporary performance. In the first half of the course, we will explore works by Tina Satter, Alison S. M. Kobayashi, the Wooster Group, Joshua Gelb and Nehemiah Luckett (among others), meet with these artists to discuss their processes, and take a deep dive into our own archives at the Harvard Libraries. Moving from theory to practice, we will then devise our own solo and collaborative works based on objects and artifacts of our choosing. This course is for writers, directors, designers and performers willing to work across disciplines.

Theater, Dance & Media 164H

Playwriting: Ritual Practice and Curious Worlds (207819)

Phillip Howze

A play is a new world in and of itself. What sorts of strange, curious worlds are theater makers crafting today? What approaches are they taking to create these worlds?

In this new playwriting course we will explore both text and non-texts, the wild (as well as the conventional) to discover what drives contemporary plays, devised works, and performance today.

We will discuss the practices employed by various playwrights and directors—particularly women and artists of color—and try our own hand at some of these approaches. In addition, we will see live performances in realtime; engage special guest/visiting artists; collaborate with fellow classmates; and expand our curiosities.

Most importantly, we will write. This is an exploratory writing workshop with a focus on generating new material. By the end of the semester, you will have created a portfolio of new works, ideas, processes and rituals.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 164H Info Sessions for Course Presentation Period will take place on Monday, August 17 at 3-4pm ET and Thursday, August 20 from 3-4pm ET. Please visit the Canvas course website for more info and Zoom links.
Where do you see yourself in 5 years? On Broadway or in a bunker? As we find ourselves gearing more toward the latter, this course will help students unthink what they know about theatrical performance and strip it down to its most mobile and visceral parts. Theater 000 considers dramatic performance an essential human activity: an interpretive skill that can serve as entertainment, information sharing, or escape strategy. Under our unusual circumstances in an ambient disaster, we will delve into the creative process with a search for raw, poetic, and comedic experiences, to “touch reality” at a time when we need it the most.

Using a variety of techniques and prompts, we will devise theater from its most elemental parts – vocalization, light, and movement. Beginning with a piece made completely in darkness, students will progressively build toward a piece with light, sound, movement, music, set, etc. Our texts will be technical, philosophical, and art historical, with subjects ranging from light, sound, physics and color, to surveillance and identity politics. Our goal is to find the impact of the subtle gesture; develop specificity in word choice, movement, and timing; develop the storytelling voice; and build basic skills in performance documentation. Naturally we will be partnering with the camera as the conduit for live action.

Students of all concentrations are welcome, with no requirement for prior experience in acting, performance, or movement. For students with theater experience, this will be an opportunity to reconfigure your toolbag. All students must be ready to be open-minded, non-judgemental of their peers, and desire to find the goodies that are just beyond their comfort zone.

Course Notes: An additional individual/group working time will be determined after enrollment is determined.

This course is taught by Harvard College Media Fellow Lex Brown.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 169B Info Sessions for Course Presentation Period will be announced. Please visit the Canvas course website for more info and Zoom links.
Theater, Dance & Media 169S

Singer + Song = Story (215988)

Stew Stewart

2020 Fall (4 Credits)  Schedule:  W 1200 PM - 0245 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

This course is an immersive, songwriting-based introduction to Stew's musical theater-making practice, a process which views the nexus of writer and song as the seed out of which a more personal, visceral musical theater can emerge. Singer + Song = Story believes in a theater that seeks, via a respect for the inherent dramatic potential of song itself, to capture the intensity of personal testimony that characterizes the best rock, pop, rap, blues and folk songs of our country and the world, with the goal of bringing that testimonial fire to the American theater stage, screen, and street.

Course Notes: Those with no songwriting experience are welcome.

Class Notes: This course is taught by singer-songwriter and Tony and Obie-Award winning playwright Stew.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 169S Info Session for Course Presentation Period will take place on Wednesday, August 19 from 12-1pm ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media 169SC

This is a show tune, but the show hasn't been written for it yet. (217583)

E. Jane

chukwumaa --

2021 Spring (4 Credits)  Schedule:  M 1200 PM - 0245 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

This course is a sound studio/workshop exploring the way sound communicates narrative, examining the way sound aids narrative in drama and beyond as well instances where artists and musicians have created music for imagined dramas or conceptualized a song or album as a drama, which is what Nina Simone is describing in the line from the song "Mississippi Goddam" from which the course title is derived. Students will listen to Orson Welles' 1938 teleplay "The War of the Worlds"; watch films, listen to songs, albums and soundtracks, and create stand-alone compositions that function or are conceptualized as teleplays and soundtracks. Students should be prepared to think critically and experimentally about sound and the work they produce and be able to articulate their process and goals for their work. This class will include projects, readings, screenings, listening sessions, discussions, and critiques.

Nonprofit Producing: Resourcing Creativity and Innovation (216360)

*Diane Borger*

2020 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

**Instructor Permissions:**  Instructor **Enrollment Cap:** 15

This course will explore theater-producing models in the nonprofit sector and imagine ways to break boundaries and produce work in new ways. Nonprofit theater in the United States has historically been a predominately white institution that has been built on and benefited from racist policies. Working to dismantle those structures and build anti-racist practices into producing theater will be at the core of this course. The course will be undertaken with guest collaborators Dayron J. Miles (A.R.T.) and Maria Manuela Goyanes (Woolly Mammoth Theater, Washington D.C.), in addition to five professional theater-makers who will work directly with students in small groups with particular attention to new models of producing that embed anti-racist practices.

Students will learn about the history of theatrical producing and the evolution of the job of the producer. The course will examine the role of the producer in facilitating creative development and providing dramaturgical support, as well as resource allocation, budgeting, and contract negotiation and writing. Additional units will focus on labor negotiations and collective bargaining agreements, financial analysis, artistic mission and vision, commercial vs. nonprofit producing, and the role of the audience in performance - and how all of these must change going forward.

As a culminating project, students will apply what they’ve learned over the course of the semester and work with the professional artists to develop producing plans and strategies for a range of theatrical performances and experiences, centering anti-racist practices.

**Class Notes:** This course is taught by American Repertory Theater Executive Producer Diane Borger.

**Class Notes:** Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Street Dance Activism: Embodying Liberation Through Somatic Practices and Rituals of Breath (217409)

*Shamell Bell*
In this participatory hybrid course, we explore the creation and implementation of Street Dance Activism as a Co-choreographic somatic[1] healing modality, and form of spiritual transcendence, through participating in the Global Dance Meditation for Black Liberation and deeply engaging with The Ritual of Breath is the Rite to Resist[2]. Street Dance Activism's 28 Day Global Dance Meditation features embodied meditation & movement sessions led by Black, Indigenous, People of Color + Queer guides from multiple wisdom traditions and healing practices. It takes 28 days to change a habit, so imagine if we took 28 days to focus on our liberation. Liberation not only as a single entity, but as a global, collective consciousness. Black liberation is your liberation, and your liberation is Black liberation.

This interdisciplinarian course uses somatic practices to engage with the historical context and legacy of public rituals of extreme violence against Black people as both sites of anti-Black state, and non-state sanctioned disciplinary projects, as well as time-spaces of radical resistance. At the center of these forms of violence are the control of breath as life force, and as a sign of freedom. We discuss the past, present, and future all occurring in the now as we examine the murder of George Floyd in May 2020 as an officer pressed his knee against Floyd's neck for nearly eight minutes as Floyd repeatedly lamented that he could not breathe.

We explore theories of ritual and performance to understand how artists and communities come together as collectives to contextualize and re-present impossible terrors. Artists and grassroots organizers use aesthetics and collective action to transform the horror of being subject to violence at any moment into rituals of breath and potential social transformation. This course then teaches students theories of ritual and performance as ways that communities have historically engaged and confronted histories of anti-Black violence in order to conceive of new future possibilities to embody liberation in the face of disciplinary actions meant to contain and choke Black people. It is my intent for us to become guides to bring social activists into the classroom and the pedagogy out into the streets.

Black Arts Movement to #blacklivesmatter (217585)

Shamell Bell

2021 Spring (4 Credits) Schedule: T 0300 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This course situates the "Black Arts Movement"(1965-1975) in its historical context, but also places our explorations in this present moment where artists continue to light the torch of art reflecting the times, as our ancestor Nina Simone so eloquently asserts as "our duty". Scholar Larry Neal writes in his seminal piece:

"The Black Arts Movement is radically opposed to any concept of the artist that alienates him from his community. This movement is the aesthetic and spiritual sister of the Black Power concept. As such, it envisions an art that speaks directly to the needs and aspirations of Black America."

As this course begins during the celebration of Dr. Martin Luther King Jr.’s birthday, let’s place MLK in the
context of the material conditions in Black communities during the Black Arts Movement, which Larry Neal coined as the “aesthetic and spiritual sister of Black Power.” This act is often seen as the starting point of the Black Arts Movement. In a Time article, "A Riot Started in Newark 50 Years Ago. It Shouldn't Have Been a Surprise," Arica L. Coleman writes, "Martin Luther King Jr. aptly predicted just such a riot in a speech titled "The Other America," which he delivered at Stanford University on April 14, 1967, three months prior to the unrest. "All of our cities are potentially powder kegs," he said. While King maintained his commitment to nonviolent civil disobedience, he also recognized the psychology of oppression.

In this course, we will explore the legacy of the Black Arts Movement and its manifestations in today's Black liberation movement. In addition to required and suggested readings, we will supplement course lectures with selected films and musical selections. This course takes an ethnographic and interdisciplinary approach to mapping the historical, geographical, and socio-political trajectory of the Black Arts Movement to #blacklivesmatter by highlighting the motivations, strategies, and experiences of community organizers on the ground. The narratives of grassroots organizers from groups such as Justice 4 Trayvon Martin and those organizing for #blacklivesmatter across the United States, will provide nuance to our understanding of an international movement that we now know as Black Lives Matter. Students will be encouraged to explore their own foundations and personal stories connecting them to the Black liberation struggle past, present, and future. The course culminates with a "Community Gathering" that will feature short student documentaries of their group projects. The gathering will include a collaboration with Dartmouth Students, activists on the ground, and community members to continue to move the work of the people on the ground forward, and the work of the students outside of the classroom, and into the community.

The Power and Relevance of the American Musical: 1776 and Other Musicals (205365)

*Ryan McKìttrick*

*Diane Paulus*

*Jeffrey Page*

2021 Spring (4 Credits) Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 12

With a focus on the American Repertory Theater's upcoming revival production of the musical 1776 co-directed by Jeffrey L. Page and Diane Paulus, this course examines how the musical theater can uniquely and powerfully inspire audiences to reflect on history, politics, race, and identity.

Analyzing scenes and songs from 1776 and other musicals including West Side Story, Cabaret, Hair, The Wiz, and Hamilton, students will explore the multiple layers of meaning created by the combination of music, lyrics, choreography, staging, book scenes and design.

Students will read works by theorists, historians and practitioners, examining the cultural significance of these shows in the years they opened on Broadway, how they have evolved in revivals and adaptations over time, and how they resonate today. In addition, students will engage directly with guest artists who will share their practical experience creating work in the musical theater.

Topics in Advanced Performance Theory: Gender and Sexuality (126954)

Robin Bernstein
Debra Levine

2021 Spring (4 Credits)  Schedule:  R 1200 PM - 0245 PM

Instructor Permissions:  Instructor  Enrollment Cap:  24

In this seminar, we will listen to and participate in current conversations in Performance Theory about gender and sexuality, especially as both these categories intersect with race. Topics include coloniality, intimacy, pleasure, antisociality, affect, and utopia. Reading includes works by Eve Kosofsky Sedgwick, E. Patrick Johnson, José Esteban Muñoz, Amber Jamilla Musser, and Joshua Chambers-Letson. This is an advanced course intended for graduate students and upper-level undergraduates.

Course Notes:  Note: This course may count for the WGS Theory foundation requirement or the 1400 level requirement, but not both.

Synchronous attendance required. Class meetings will not be recorded.

This course is co-taught with Debra Levine.

The course is organized to support student success in writing a junior research paper. We will read a variety of texts and interrogate closely how topics are approached in literary and cultural studies, in social and historical studies, and in life-sciences, in order to become prepared to discuss critically different methodological approaches and theoretical frameworks. Students will also work in small groups with a tutor, who will guide them through their research and writing on the particular topic of their interest.

Course Notes: WGS Juniors are expected to take 98s in the spring term. This course is only open to students planning to be on leave in the spring term of the junior year. Permission from the DUS in WGS and updated plan of study required.

Women, Gender & Sexuality 1204
Power, Knowledge, Identity: Critical Approaches to Race and Ethnicity (208114)

Eleanor Craig
2021 Spring (4 Credits)  Schedule:  MW 0130 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  20

How might critical attention to race and ethnicity as they intersect with gender and sexuality—and also frameworks of indigeneity and class—shape how we study? How do these lenses shift the questions we ask, the information that counts as data, and the genres of work that we recognize as 'academic'?

For those newer to studies of race and ethnicity, this course provides intersectional frameworks for recognizing what assumptions undergird academic projects and fields of study. For those familiar with ethnic studies, it aims to serve as a 'Theories and Methods' course, providing tools and strategies for refining one's own interdisciplinary inquiries.

Course Notes:  Weekly lectures and a one hour section to be arranged.
Synchronous attendance is expected. The class will not be recorded.

Women, Gender & Sexuality 1210FT  Section: 01
Feminist Theory as Critique (142819)

Afsaneh Najmabadi
2020 Fall (4 Credits)  Schedule:  W 1245 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

This course begins with feminist critical engagements with other theories and practices, including Marxism, psychoanalysis, and Foucault. It will then move on to debates and discussions within feminism, as well as intersections of feminist theory with other theories including sexualities studies, post-colonial/trans-
national studies, transgender studies. One of the major concerns of the course is the relationship between
feminism, theory, and politics. Throughout the course, we will discuss the contemporaneous movements
that intersected with emergence of these theoretical concerns.

Course Notes: Synchronous attendance is required; class meetings will not be recorded.

This course fulfills the theory requirement for the undergraduate concentration in Studies of Women, Gender, and Sexuality.

Psychology of the Gendered Body (205489)

*Nicole Noll*

2020 Fall (4 Credits) Schedule: R 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 14

Our perceptions of gender—our own and others’—powerfully shape our embodied experiences and behaviors. This course examines the embodiment of gender via the lens of psychological science. We will begin by exploring recent research related to gender and the body, and then study the underlying psychological mechanisms that influence our self-perceptions about gender. Our disciplinary foundation in psychological science will allow us to complicate current understandings of gender and embodiment by considering factors such as sex, race, sexuality, experience, intention, and awareness.

Course Notes: Synchronous attendance required. Class meetings will not be recorded.

Domestic Witness: “At Home” for Better or Worse (216398)

*Phyllis Thompson*

2020 Fall (4 Credits) Schedule: W 0300 PM - 0515 PM

Instructor Permissions: Instructor Enrollment Cap: 24

In the spring of 2020 many Americans were sent home by the state, to shelter in place and learn new ways of working "safely". Others were deemed “essential workers” and forced to labor under conditions of risk. Some faced homelessness while others fled to second homes. This collision of work and home, public and private, exposed multiple fault lines across the axes of race, gender, class, and sexuality. Our current
moment is rooted in a long history in which the home becomes a charged site for racialized, classed, and
gendered performances of cleaning, cooking, childcare, and schooling. Topics to include: the division of
labor, domestic workers, queer and feminist revisions of home, clutter, homelessness, food and nutrition,
home makeovers, and efficiency.

Course Notes: Weekly lecture plus an additional one hour section to be arranged.
Synchronous attendance required. Class meetings will not be recorded.

Leaning In, Hooking Up: Visions of Feminism and Femininity in the 21st Century (159887)

Phyllis Thompson

2021 Spring (4 Credits) Schedule: W 0300 PM - 0515 PM

Instructor Permissions: Instructor Enrollment Cap: 48

What does it mean to "do" feminism, or to "be" a feminist in the 21st-century United States? What can we
make of the dominant social expectations for a woman's life? This course explores contemporary ideals of
feminine success, including their physical, familial, professional, and political manifestations. We will
engage with highly-contested topics—including sexual violence and Title 9; work-life balance; the
imperatives of self-care and presentation; and new models for sexuality, reproduction, family, motherhood,
and domestic life—using the tools of theory and cultural studies to interrogate their framing within popular
discourse. Throughout, we will critique ideological formations of gender, particularly as bounded by race,
class, and sexuality.

Course Notes: Weekly lecture plus an additional one hour section to be arranged.
Synchronous attendance required. Class meetings will not be recorded.

A Voice of One's Own: Creative Writing in Women, Gender, and Sexuality (108569)

Linda Schlossberg

2021 Spring (4 Credits) Schedule: T 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 12
How does one balance the demands of "politics" with the subtleties of "artistry?" In this course, we'll write and analyze short stories, paying close attention to key writing concepts such as characterization, voice, point of view, dialogue, and setting, while also investigating thematic issues related to women, gender, and sexuality studies. In addition, we'll read secondary readings by authors such as Audre Lorde, Dorothy Allison, and Adrienne Rich that illuminate the ways in which issues of power, agency, and voice have emerged as key themes in feminist writing. Frequent writing assignments, including written evaluations of peers' stories.

Gender and Sexuality in Asian-American Writing and Film (110080)

Rani Neutill

2021 Spring (4 Credits) Schedule: R 0300 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This course examines works across a range of genres by Asian-American writers, focusing on the intersection of race, gender formation, and sexuality. We will put conceptions of feminism, queerness, and LGBT identity in conversation with ideas about ethnicity, citizenship, power, activism, art, and politics. Selections from film, memoir, novels, and short stories, with an eye to thinking critically about genre, representation, and collective histories. Texts to include Nicole Chung's *All You Can Ever Know*, Deepa Mehta's *Fire*, R. Zamora Linmark's *Rolling the R's*, Ruth Ozeki's *A Tale for the Time Being*, Rakesh Satyal's *Blue Boy*, Kai Cheng Thom's *Fierce Femmes and Notorious Liars: A Dangerous Trans Girls Confabulous Memoir*, Ocean Vuong's *On Earth We're Briefly Gorgeous*, and Alice Wu's *The Half of It*.

Gender, Race, and Poverty in the United States (207786)

Marya Mtshali

2021 Spring (4 Credits) Schedule: T 0300 PM - 0530 PM

Instructor Permissions: Instructor Enrollment Cap: 24

This course investigates the realities of poverty through an intersectional lens, meaning that we will
consider the simultaneous impact of race, gender, sexuality (and other identities) on economic insecurity. In what ways are conversations about poverty and its causes infused with assumptions and stereotypes related to gender, race, and sexuality? We hear so much in the media about what causes poverty – what is reality and what is myth? How do these myths operate to reinforce and sustain economic inequality? Who and what gets left out of the conversation about poverty? Topics in the course include historical understandings of poverty; intergenerational class mobility; depictions of poverty in pop culture; and bringing attention to populations that often get left out of mainstream conversations about poverty.

Course Notes: Weekly lecture plus an additional one hour section to be arranged.
Synchronous attendance required. Class meetings will not be recorded.

Interracial Intimacy: Sex, Race, and Romance in the U.S. (215756)

Marya Mtshali

2020 Fall (4 Credits)  Schedule: T 0300 PM - 0530 PM
Instructor Permissions: Instructor Enrollment Cap: 24

What assumptions about race and sex are embedded in the term "interracial," and why are different types of interracial relationships viewed differently? How did White fears of relationships between Black men and White women influence the creation of the Ku Klux Klan? How did the story of Pocahontas influence the development of a settler colonial state? This course investigates the significance of interracial intimate relations throughout United States history and through the lens of race, class, gender, and sexual orientation. Although interracial intimate relations (consensual and non-consensual) predate the nation's founding, they have been considered taboo throughout most of American history. From Sally Hemings and Thomas Jefferson to Meghan Markle and Prince Harry, we will analyze how social perceptions of these relationships shift over time, as well as the economic and legal implications of interracial intimacy in the construction of the U.S. as a nation-state.

Course Notes: Weekly lecture plus an additional one hour section to be arranged.
Synchronous attendance required. Class meetings will not be recorded.

How does American law treat transgender, genderfluid, nonbinary, agender, and gender-nonconforming people? What assumptions about gender operate in legal doctrines, and how do these assumptions interact with the lives of transgender people, especially those at the intersection of multiple axes of oppression?

This seminar will discuss contemporary cases involving transgender rights, as well as historical cases where the rights of transgender people were directly or indirectly contested. Readings will incorporate case law, sociological perspectives, critical race studies, feminist theory, and direct first-person narratives. By looking at law through the lens of transgender experiences, the class will critique legal assumptions about gender and reflect upon how law as a whole could be made less cis-normative. No prior legal experience or education is required.

Women, Gender & Sexuality 1413

Friendship as Way of Life (212892)

Afsaneh Najmabadi

2021 Spring (4 Credits)  

Schedule:  

W 1245 PM - 0245 PM  

Instructor Permissions:  

Instructor  

Enrollment Cap: 15  

This course will begin with Foucault's essay, "Friendship as a Way of Life." It will discuss the contemporary context of new engagements with and interests in friendship. We will then look at differing concepts and practices of friendship, and their work in shaping social sentiments and political affects in Euro-American context. Readings will include Plato, Montaigne, Bray, Marcus, Foucault, and Miller.

Course Notes:  

Synchronous attendance required. Class meetings will not be recorded.

Women, Gender & Sexuality 1433  
Topics in Advanced Performance Theory: Gender and Sexuality (126954)  
Robin Bernstein  
2021 Spring (4 Credits)  
**Schedule:**  
R 1245 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 24  
In this seminar, we will listen to and participate in current conversations in Performance Theory about gender and sexuality, especially as both these categories intersect with race. Topics include coloniality, intimacy, pleasure, antisociality, affect, and utopia. Reading includes works by Eve Kosofsky Sedgwick, E. Patrick Johnson, José Esteban Muñoz, Amber Jamilla Musser, and Joshua Chambers-Letson. This is an advanced course intended for graduate students and upper-level undergraduates.  
**Course Notes:**  
Note: This course may count for the WGS Theory foundation requirement or the 1400 level requirement, but not both.  
Synchronous attendance required. Class meetings will not be recorded.  
This course is co-taught with Debra Levine.

Women, Gender & Sexuality 1469  
Luxury and Commodity Pleasures: Histories of Gender, Sex, and Racial Capitalism (216397)  
Bradley Craig  
2020 Fall (4 Credits)  
**Schedule:**  
T 0600 PM - 0800 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15  
This upper-level seminar explores the relationship between the gendered history of luxury—as commodity, aesthetic, and affect—and the history of racial capitalism from slavery to the hip-hop era. Many scholars have increasingly drawn attention to the phenomenon of racial capitalism, or the ways that slavery and anti-black racism were central to the emergence of the modern global economy, while others have interrogated the feminized, sensual, and exotic pleasures of luxury consumption. This course asks what we might learn from thinking about the history of gendered consumer cultures alongside the history and afterlives of slavery, in which black people seem to figure most persistently through the categories of labor and (re)production. This course instead contemplates the relationship between race, gender, and consumption, identifying the particularly fraught and contested entanglements of blackness and luxury as a constituent element of modern racial capitalism. We will consider how notions of taste, refinement, leisure, style, pleasure, and beauty have shaped and been shaped by blackness globally through representation, performance, fashion, and material and visual culture. Focusing on contested forms of conspicuous consumption during and after the period of slavery, we will interrogate the politics and moral economy of consumer culture through readings that consider black people as both discerning consumers of luxuries and other goods, and also as consumed by processes of commodification and objectification that produce racial and gendered hierarchies.  
**Course Notes:**  
Synchronous attendance required. Class meetings will not be recorded.
Women, Gender & Sexuality 2000

Live Theory (and Practice): A Graduate Proseminar in WGS Studies (122276)

Alice Jardine

2021 Spring (4 Credits)

Schedule: T 1200 PM - 0200 PM

Enrollment Cap: 15

This WGS Graduate Proseminar will emphasize in-depth, lively conversations with WGS faculty about the interdisciplinary innovations of WGS Studies today, with singular attention to current debates in feminist and queer theories and practices. Each week, one member of the WGS faculty will guide the seminar in wide-ranging conversation about their own intellectual formation, about their own field of expertise, and about where and how their own writing fits into the larger intellectual itinerary of WGS Studies. Discussions focused on the intellectual history of WGS Studies as well as on matters of writing, teaching, and professional development will frame the course. Visiting faculty members may include Robin Bernstein, Michael Bronski, Caroline Light, Durba Mitra, Sarah Richardson, and Linda Schlossberg.

Course Notes: Open to advanced undergraduates and to graduate students from all schools and disciplines.

Is required for the WGS graduate secondary field.

Synchronous attendance is required. This course will not be recorded.

Women, Gender & Sexuality 3010A

Supervised Reading and Research-GenderSci Lab. Part one of a two-part series. (213359)

Sarah Richardson

2020 Fall (4 Credits)  
Schedule: TBD

Instructor Permissions: Instructor  
Enrollment Cap: n/a

The GenderSci Lab supports graduate students working at the intersection of the sciences and gender studies. The lab offers interdisciplinary training in theories and methods for the critical intersectional study of sex/gender in biology, medicine, public health, and the social sciences. Students participate in collaborative research, contribute to peer-reviewed publications, and engage in public outreach.

Course Notes: Contact the WGS Director of Graduate Studies for application information. Approval is required prior to registration.

The GenderSci Lab is a year-long commitment. Students are expected to enroll in 3010a and 3010b in the same academic year.
