Instructor Permissions: Instructor Enrollment Cap: 6

Analysis of south Indian classical composition and improvisational forms as performed in the world today. Students will learn the basics of south Indian singing and hands-on methods of active listening. Students who wish to will have the opportunity to play this music on instruments with which they are already familiar.

Course Notes: By permission of instructor.

Music 160R
Composition Proseminar: Composing Theatre (119811)

Yvette Jackson
2020 Fall (4 Credits) Schedule: R 0300 PM - 0500 PM
Instructor Permissions: Instructor Enrollment Cap: 12

Radio Opera. This semester the course focuses on a form of composed theatre known as radio opera. We begin with an historical survey examining Clément Ader's 1881 Théâtrophone invention, which transmitted live performances into the homes of subscribers, and the 1939 broadcast of Gian Carlo Menotti's The Old Maid and the Thief, the "first" opera to be commissioned specifically for radio. We build upon this foundation by analyzing contemporary practices of radio opera which stray from its historical predecessors, influenced by radio drama, Fluxus, and other experimental movements; they often bear no resemblance to traditional opera nor are they limited to radio as a means of performance. An introduction to digital audio workstations (DAW) and audiovisual streaming systems will help students develop skills essential for engaging technologies that assist in the creation and distribution of fixed media and live performance. Throughout the semester, students will compose short original radio operas that will result in a final composition project and public class concert. Students with experience in different genres of music and performance are encouraged to enroll.

Recommended Prep: One course in music theory, composition, or consent of the instructor.

Advanced Composition (119812)

Chaya Czernowin

2021 Spring (4 Credits) Schedule: T 0945 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 15

In this course, students will challenge modes of composition and methods of creation through a series of projects, listening, and score study. Creative projects will encourage students to zero in on harmonic language, rhythm, pitch, text, texture, and orchestration through exploration and experimentation. The class offers space for students to create within their own aesthetic preferences, while also challenging them to grow by trying out new approaches and techniques. The majority of meetings will be set for regularly scheduled lectures and sections, except for approximately four weeks where each student will have an individual session of 30 minutes each. The final project will be a TBD trio; these musicians will come to our class once during the semester to workshop works-in-progress, and return at the end of the course for a final concert.

Recommended Prep: One course in theory/composition or permission of the instructor.

Songwriter’s Apothecary Lab (206929)

Esperanza Spalding

2021 Spring (4 Credits)  

Schedule:  

R 1200 PM - 0245 PM

Instructor Permissions:  Instructor  

Enrollment Cap:  12

Songwriter’s Apothecary Lab.

‘If one of my friends is ill, I’d like to play a certain song and he will be cured’  -John Coltrane

Half songwriting workshop, and half guided-research practice, the Songwrighters’ Apothecary Lab (SAL), offers a structure for the collaborative development of new compositions designed to offer enhanced therapeutic benefit to listeners. The course is rooted in a transdisciplinary station, orienting itself towards archives and literature that study healing strategies drawn from a diverse range of music-based creative and therapeutic practices.

SAL asks that students come prepared to (a) identify particular ailments that they seek to understand and address (b) delve into literature that studies music-based healing methodologies that would be applicable to the particular ailment, and (c) participate each week in the creation of songs and sonic structures that incorporate the research reviewed.

As members of the lab, students will alternate each week between the roles of researcher (surveying fields related to psychology, music, neuroscience, and health; identifying repeatable musical phenomena
associated with specific therapeutic benefits), and songwrighter (where the aforementioned findings will be synthesized into new musical works, compositional/performance practice). Guest lecturers and senior scholars from the fields of neuroscience, music therapy and music, will regularly review our process and work, to offer feedback and guidance.

Class Notes: Applicants are invited to apply: [here](#). Deadline is January 15. Please include a digital recording or link(s) for a video of yourself performing up to two (2) of your original compositions. Audio and video examples should be at least two minutes, and no more than 5 minutes in length. Applicants are welcome to include an optional writing sample.

* wright (noun): a maker or builder // I use this spelling intentionally to emphasize our creative work through song, as the practice of constructing effective compositional structures, able to support and carry each creator’s poetry, story and melody.

Creative Music: Composer-Pianists (121897)

*Vijay Iyer*

2020 Fall (4 Credits)  
**Schedule:** W 0630 PM - 0900 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

This new course focuses on the work of innovative composer-pianists. The six artists surveyed in fall 2020 will include Lil Hardin Armstrong, Hazel Scott, Mary Lou Williams, Nina Simone, Alice Coltrane-Turiyasangitananda, and Geri Allen. Through listening, reading, transcription, analysis, and performance, we will cultivate a detailed appreciation for this legacy of Black women's musical inventions of the twentieth century.

**Course Notes:** This course is ideally suited for pianists with some background in improvisation or composition, but others may apply. Permission of the instructor is required.

Instructor Permissions: Instructor Enrollment Cap: 20

*Singing Love and Horror Stories: Opera and Greek Mythology.* This course explores the centrality of Greek and Roman mythology in Western opera. We will engage with a broad range of myths to see how they not only informed and transformed opera, from its beginnings in ca. 1600 to the 20th century, but truly shaped opera as a new musical language. Our central interest will be the complex, and yet fascinating, tension between feelings of love and hate—toward a partner or a family member. Myths we will focus on include: Orpheus, Apollo and Daphne, Psyche, Hercules, Oedipus, Electra, Iphigenia in Aulis, and Dido and Aeneas. Composers include Monteverdi, Cavalli, Lully, Purcell, Handel, Gluck, Vivaldi, Rameau, Berlioz, Strauss, Stravinsky, and Enesco.

**Topic:** Singing Love & Horror Stories

*Improvisation with Live-Electronics.* This course is aimed towards improvising musicians and composers working with electronics. We will explore different existing improvisation strategies from the 20th century and develop new pieces. Composers and interpreters alike will contribute to the concepts from solo to small ensemble works. Section time will be used to further our tools for live sound processing in Max/MSP.

**Class Notes:** Section scheduled for Thursday 3:00 - 5:30 pm

**Recommended Prep:** Prerequisites for interpreters: Interest or experience in improvisation. For composers: previous course at HUSEAC or permission by instructor.

Music 183R
Gospel Music (131078)

Braxton Shelley

2021 Spring (4 Credits) Schedule: T 1245 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

This course studies the black gospel tradition, focusing on the genre’s distinctive combination of sound and belief. Music, movement, and conviction, the three expressions gospel holds together, will be explored through three interpretive lenses: exemplary performers, pivotal periods, and formal processes. This semester’s work will bring material and approaches from the fields of musicology, music theory, ethnomusicology, black studies, homiletics, and theology to bear on two questions: 1) What work—musical, cultural, and spiritual—does gospel do for its various audiences? 2) How does the function of the gospel song shape its form? Through a combination of weekly reading, listening and writing assignments, students will immerse themselves in “the gospel imagination,” the network of belief, performance, and reception that sustains many expressions of African American Christian worship. Alongside these assignments, students will undertake composition in the gospel style, culminating in a virtual performance of their musical creation.

Music 186R
Music & Mockumentary Lab (125864)

Esperanza Spalding

2021 Spring (4 Credits) Schedule: R 0500 PM - 0700 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Music and Mockumentary Lab (visibilising and vibrational-experiencing the yet to be).

“For the mind must know it first in order to compose it.”

-Hazrat Inayat Khan

“"all organizing is science fiction', by which we mean that social justice work is about creating systems of justice and equity in the future, creating conditions that we have never experienced"

-Adrienne Maree Brown, quoting Walidah Imanisha

"It’s as much an image, as it is reality"

-Mark Oswald (on developing operatic technique)

This lab-style course explores mockumentary film, coupled with live score, as a method for creating works of socially engaged fiction. Our engaged-learning approach will be rooted at the intersection of film, speculative-fiction, music, performance, and activism. Students enrolled in this course will be invited to learn and create alongside a professional creative team, lead by artists esperanza spalding and bronté velez, in collaboration with engineers Anukool Lakhina and Viet Tran, and the San Francisco Symphony. Over the course of the semester, this creative team will be developing and producing a music-
driven mockumentary. The film, titled "SOMATONGLEN", will be accompanied by a live-score of improvised music, as well as pre-existing classical works. "SOMATONGLEN" was originally conceived in response to the prompt offered at Theaster Gates' Black Artists Retreat: "what human-made sound could render firearms inoperable?". The mockumentary follows a speculative journey from the discovery, development, and application of a sung vibration which disrupts the trajectory of a fired bullet.

Students will be invited to shadow and engage with the creative team’s week-by-week process, from story-devising, to treatment, to production. In addition to real-time learning alongside the creative team, students will research, develop, and produce their own original mockumentary (with accompanying live-score concept). Each student will co-create these short mockumentaries over the course of the semester, guided by feedback from the creative team. Each student-produced mockumentary (along with "SOMATONGLEN") will be developed in conversation with individuals, community leaders, and organizations working toward dismantling systemic oppression. The student-produced mockumentaries will be released via publicly-accessible platforms, as a tool for embodied-imagining of a mutually sought yet to be.

Some of the questions guiding this course, and the creation of the mockumentary "SOMATONGLEN" are:

- How do speculative visual/sonic narratives serve, and inspire radical re-imaginings of our relationships to social-systems, and the diverse humans who comprise them?
- How may existing musical works be utilized as narrative driving force, within the speculative visual story?
- How do artists working at the intersection of activism and organizing

Course Notes: Students from other departments welcome.

Composer-Performers of the African Diaspora (000188)

Vijay Iyer
Yosvany Terry

2021 Spring (4 Credits) Schedule: T 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 25

Composer-Performers of the African Diaspora.

This course surveys the work of six living music-makers of the African diaspora. In two-week-long units devoted to each artist, we will study examples of their music in depth, and we will spend time in conversation with each of them. The composer-performers studied will include Henry Threadgill, Nicole Mitchell, Gonzalo Rubalcaba, Esperanza Spalding, Tyshawn Sorey, and Cécile McLorin Salvant. (Participating artists subject to change.) Students will be responsible for short weekly responses, engaged participation, and a final project (analytical, comparative, historical/cultural, or creative) drawing on the work of one or more of our surveyed artists.

Course Notes: Open to students from other departments.

Class Notes: Open to graduate students with faculty permission.
Music 189R
Chamber Music Performance (153042)

Jessica Bodner
Daniel Chong
Kee-Hyun Kim
Ken Hamao

2021 Spring (4 Credits)  Schedule:  F 1200 PM - 0100 PM
                                        T 1200 PM - 0100 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Through auditions, students will be divided into chamber music ensembles by the Parker Quartet, and have weekly group meetings with members of the Parker Quartet and pianist Katherine Chi, as well as a number of individual lessons. Instrumentalists and vocalists are welcome to audition; however, vocal-only ensembles are not allowed. The course will cover various aspects of chamber music -- such as score study, rehearsal techniques, historical context, interpretation, intonation, and balance -- while students work towards group recording projects throughout the semester. The course will culminate in final public performances, to be held sometime during Reading Period; all students are required to be available. Students who do not meet the requirements in the Course Notes below may take the course for Pass/Fail credit. Please check audition dates and other mandatory meetings/classes on the Canvas Music 189R home page. https://canvas.harvard.edu/courses/84331

Course Notes:  ALL students must fill out the questionnaire and submit this through Canvas: https://canvas.harvard.edu/courses/84331/pages/mandatory-questionnaire. Students enrolled in Music 189 during the Fall 2020 semester, are currently in the NEC/Harvard dual program, or have been a past winner of the Parker Quartet Guest Artist Award do not need to audition, but must submit a questionnaire to be considered. Any other students who have enrolled in the course in past school years are required to re-audition. Students intending to enroll in both Harvard-Radcliffe Orchestra and Music 189R must audition for each course separately. While students may request to be placed with certain peers, final group assignments will ultimately be at the discretion of the instructors. This course is offered for letter-grade credit only when students are involved in one or more of the following: a Concentrator in Music; enrollment in a Department of Music course concurrently or in a previous semester (other than 189R); a member of a faculty-led music ensemble in the same semester; a student of the NEC/Harvard dual program. Students who do not meet one of these requirements may take the course for Pass/Fail credit, which must be done by petition after the first week of class. Limited capacity, at the discretion
of the instructors.

Class Notes: Course Notes: Students who are currently in the NEC/Harvard dual program, were enrolled in Music 189R in Fall 2019, or have been a past winner of the Parker Quartet Guest Award do not need to re-audition for the Spring 2020 semester. However, ALL students must fill out the questionnaire and submit this through Canvas: https://canvas.harvard.edu/courses/67376/assignments/329053. Any other students who have enrolled in the course in past school years are required to re-audition. Music 193R

Topics in Music from 1800 to the Present: Proseminar (113383)

Loren Kajikawa

2020 Fall (4 Credits)

Schedule: F 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This year marks the twenty-sixth anniversary of Tricia Rose’s groundbreaking book *Black Noise: Rap Music and Black Culture in Contemporary America*. Although Rose’s monograph is widely regarded as the "Big Bang" that set hip hop studies in motion, it is also somewhat of an outlier. Written before rap was an accepted topic of academic study, *Black Noise* shouldered the burden of contextualizing rap historically, musically, and culturally, while simultaneously addressing its powerful expressions of Blackness in the midst of the Culture Wars. *Black Noise'*s level of interdisciplinary engagement and political awareness make it one of the best book's written about rap and one that continues to serve a generative role for scholars. In fact, Rose's book, which 1) sought to explore the relationship between hip hop and the urban environment from which it came, 2) theorize rap's musical and technological interventions, 3) examine rap's racial politics, institutional critiques, and media responses, and 4) highlight rap's sexual politics, particularly female rappers' critiques of male hegemony, remains entirely relevant to our current moment.

This seminar returns to Rose's original text in order to trace the relationship between *Black Noise* and subsequent writing about hip hop, especially work engaging current issues and ongoing debates in the field. Reading the original text of *Black Noise* and using each of its chapters as an organizing framework, this course introduces students to a wide variety of work on hip hop and rap, focusing primarily on written scholarship but also on podcasts, videos, and music as ways of knowing. The goals of this seminar are threefold: first, to familiarize students with key topics and debates through readings that span the last three decades and represent a wide variety of methodologies; second, to critically assess the relationship
between hip hop culture and the academy in order to understand how the institutionalization of hip hop has shaped writing and research; and third, to give students the opportunity to develop their own relationship to the field by conducting their own research on a topic of interest.

**Topic:** Hip-Hop Studies

**Course Notes:** Note: open to graduate students with permission of instructor.

**Class Notes:** Open to graduate students with instructor’s permission.

*Peter Gordon*

2021 Spring (4 Credits) 

**Schedule:** W 0945 AM - 1145 AM 

**Instructor Permissions:** None 

**Enrollment Cap:** n/a 

*Adorno and Music.* The philosopher, composer, and sociologist Theodor W. Adorno counts as one of the most important musical thinkers of the twentieth century. While the range of musical figures he approved of was extraordinarily focused (going barely beyond Beethoven, Mahler, Wagner, and Schoenberg), he created a central role for music in his philosophy. The very abstraction and remoteness of absolute music, he argued, allowed it to offer critical insights on the state of modern society. In this seminar we will discuss key texts by Adorno and his circle, and work through a number of key musical works in his orbit. No discussion of Adorno would be complete without consideration of his controversial views on jazz and sound media. A background in music may be advantageous but is not a requirement.

**Course Notes:** Note: open to graduate students with permission of instructor.

*Braxton Shelley*
Aretha Franklin. This course investigates Aretha Franklin's amazing grace—not the song or the album, but the peculiar charm that animated her musical life. In pursuit of a deeper, more musical understanding of one of the 20th and 21st century's most celebrated performers, students will attend to Franklin's biography, multi-instrumentality, and to the movements that were fueled by her voice, even as the same cultural forces influenced the shape of her life. This semester's work will be guided by the following question: when performers, audiences, and scholars refer to Aretha Franklin as "the Queen of Soul," what do they seek to name? What energy, both palpable and ungraspable, both immediate and inscrutable, is denoted by that pervasive honorific? As we search for vocabulary with which to express the nearly indescribable, we will repeatedly return to an assertion made by Franklin's father, Rev. C. L. Franklin, on the second night of her 1972 live recording Amazing Grace: “Aretha has that ineffable something.” Through a combination of weekly reading, listening and writing assignments, students will locate this sonorous force, bringing together literature and methods from black studies, music studies, philosophy, and voice studies to investigate the material facts of Franklin's singular vocality.

Course Notes: Undergraduates and graduate students from all fields are welcome.
• Readings on historiography and canon building.
• History of the discipline: every week, we will read and discuss one "classic" article in musicology.
• Your final project, which you will develop on your own and in collaboration over the whole semester.

Course Notes: Graduate students only. May be taken independently by students from other departments with permission of instructor.

Current Methods in Ethnomusicology (118078)

Richard Wolf

2021 Spring (4 Credits) Schedule: W 0300 PM - 0500 PM

Instructor Permissions: None Enrollment Cap: n/a

Focuses on introduction to scholarly study of music with emphasis on the history and methodologies of ethnomusicology. Theories of music in culture, field methods, analytical and notational strategies, and critical tools for scholarship.

Course Notes: May be taken by students from other departments with permission of instructor.

Ethnomusicology: Seminar (115680)

Ingrid Monson

2020 Fall (4 Credits) Schedule: W 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 15

Music, Emotion and Social Justice. The course explores connections between Black American Musics
(BAM) and themes of social justice and liberation historically, theoretically, and in our current historical moment. The power of music to inspire activism, assuage grief, manage fear, create spiritual connection, celebrate victory, and find joy has been an especially strong theme of African American music and history. We begin with reading what African American writers (DuBois, J.W. Johnson, Ellison, Baraka and more) have had to say about music and its connections to African American life and the struggle for racial justice. We then examine how sounds, rhythms, timbral inflections, voice, acquire affective, associational, and symbolic meanings over time. Recent theories of emotion, affect, and embodiment when placed in dialogue with Michael Silverstein's metapragmatic conception of anthropological semiotics offer rich possibilities for developing a theory of relational listening that bridges sensory and meaning-based approaches to the relationship between music and politics. To this must be added a sociological understanding of systemic racism. The final segment asks students to look closely at how music has been deployed in the movement arising from the murder of George Floyd and the reality of COVID-19's disparate impact on African Americans and other Non-Black People of Color. What new meanings, associations, and anthems have arisen? What has remained the same? How are new connections between music and social being formed?

Class Notes: Open to undergraduates with permission of instructor.

Music 217R

19th Century Music (111385)

Carolyn Abbate

2020 Fall (4 Credits)

Schedule: R 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 8

This graduate seminar is centered on Richard Wagner's Der Ring des Nibelungen, written between 1848 and 1874, a tetralogy that aspired to world-building in operatic form. It took Wagner six years to write four libretti, then twenty years to write the music for four operas, whose runtime is sixteen to seventeen hours over four nights. Performances involve a dozen alpha opera singers, an orchestra of over a hundred (with quadruple brass scoring and several newly-invented instruments). The Ring has been demolished by philosophers and deconstructed by directors, amplified by crazed devotees. So why the Ring in fall 2020? Given the anticipated long-term closure of opera houses worldwide, as well as ongoing prohibitions against singing in public, given the immense financial resources necessary to perform a behemoth like the Ring, it will not return soon. Yet although the Ring is one hundred forty-five years old, originating in a long-distant European past whose culture now appears estranging or incommensurable, it is far from being a relic or artifact. The work brings exquisite pressure to bear on the idea that music bears moral or ethical burdens, that music acquires social meanings, and that its sensory force is not unambiguous. Is the cumulative effect of the musical sound to drown out thought and skepticism? What part do staging and production play in sculpting your interpretation of these issues?

The Ring offers a narrative and an acoustic flight into lost time, which is not insignificant. Yet it also offers an elaborate and rich multimedia experience through which existence in the here-and-now can be read. Race and racism, power, gender, capitalism, cultural pessimism, eschatology: only a sample of the territory that is traversed. Thus, while the Ring is the center for the seminar, we will also be considering myth and folklore, media theory, ecocriticism, and semiotics. What we will be doing is exploring how to navigate, as
thinkers, between escape and encounter, consolation and resistance.

Course Notes: Permission of instructor required.

Music 218R

20th-Century Music: Seminar (117766)

Anne Shreffler

2021 Spring (4 Credits) Schedule: M 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

Music of the Last Ten Years. The seminar will focus on how musicians and performing organizations dedicated to contemporary music have been coping with the pandemic, which has ended live concerts and brought economic devastation to most arts organizations. At the same time, musicians have developed imaginative new ways to reach audiences online, and it seems safe to say that many of these new approaches will continue to change the concert experience even after live concerts resume. We will have visits (on Zoom) from a diverse and international group of composers, performers, and arts leaders to talk about their strategies for reaching audiences, fostering new work, and supporting musicians during this time.

Students will research the organizations and interview the visitors. We will record the sessions and post the videos (edited, with the permission of all participants) on the Music Department's YouTube site. Students may choose to “follow” a new music group and write about how they’re coping with the pandemic for their final projects.

We will focus on the newest music from an international and diverse range of styles and genres, with particular attention to music composed (or improvised or designed) by people of color as well as by women or non-binary creators. We will also think about how new music circulates within and across cultural and media “ecosystems.” Finally, we’ll consider the methodological and practical challenges of writing about very recent music in a rapidly changing world. This course is not intended to be a survey or overview, and the selection of music will be necessarily limited.

Concerts and visitors: We will go to concerts if it is safe to do so, including the Fromm concerts at Harvard planned for April 2021. Otherwise we will take advantage of the plentiful streaming resources available. I will invite 8-9 expert visitors to share their experiences with the class, including composers, performers, conductors, improvisers, and arts administrators. An up-to-date list of confirmed visitors will be posted on the course website. (I am grateful for the support from the Harvard Provostial Fund for the Arts and Humanities and the Department of Music.)

Assignments and final project: Students will prepare for the weekly visits by listening to the relevant music, researching the organizations, and preparing interview questions. Other listening and reading assignments with provide context and illustrate current issues and controversies. Students will also collaborate in preparing the interview videos for upload and do occasional informal presentations on the music to be discussed. We will also collaboratively provide program notes or brief audio segments for the streamed Fromm 2021 concert. The final project can be a paper (7-10 pp.) on a specific work or genre, a new music ensemble, composers collective, venue, or other related topic. Students may choose to “follow” a new music group and write about how they’re coping with the pandemic. You may also do a video, website, Wordpress blog, podcast, or some other non-print medium (with permission of the instructor).
Meeting times and technology. We will meet for 2 hours every week on Zoom (synchronously). The course website on Canvas will be our central hub of information. Students will be encouraged to participate in discussions and form project groups on Slack.

Class Notes: The seminar is open to graduate students in Music (all programs), as well as to undergraduates (with permission of instructor) and graduate students from other departments.

19th and 20th Century Music: Seminar (118450)

Eduardo Herrera

2021 Spring (4 Credits) Schedule: R 0945 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

This reading-intensive seminar is intended to give you a fundamental knowledge of contemporary intellectual currents engaged with the study of musical practices in Latin America. We will examine major areas that have informed scholarship on Latin American music, including queer studies, performance studies, decolonization/decoloniality project, cultural diplomacy, critical race theory, disability studies, actor-network theory, and Latinx studies. The goal of this course is to gain a better understanding of the web of disciplinary discourses surrounding Latin American music scholarship both in their socio-political context and in dialogue with contemporary research in musicology and the humanities at large.

Upon successful completion of this class students will be able to:

- Demonstrate an awareness of the diversity and complexity of musical practices across Latin America
- Develop the ability to recognize and differentiate contemporary intellectual trends in Latin American music studies and their relation to broader questions in the humanities
- Develop the ability to recognize and differentiate musical genres from the region
- Understand the place of music and dance as expressive culture and its relation to other aspects of social life within the Latin American context

Course Notes: Open to undergraduates with permission of instructor.

Class Notes: Course taught by Professor Eduardo Herrera (Rutgers University)

Approaches to Analysis (134274)

Alexander Rehding

2021 Spring (4 Credits)

Schedule: T 0945 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

**Dialectics of the Sonata Form.** Sonata form has long been a central element of musical thought. Specifically, it has been held up as a kind of dialectical thinking in music. Why? How? We will delve into the vast literature and the Classical repertoire to understand what this is all about. The first part of the semester will take a whistle stop tour of sonata form, from historical models from the early nineteenth century to contemporary American theories. The second part explores particularly the connections between sonata form and dialectics, a style of thought that is particularly associated with the philosopher G. W. F. Hegel. The philosopher-musician Th. W. Adorno was particularly interested in the nexus between the two, and we will explore some of the recent critical literature than engages with the philosophical implications of this musical form.

Topics in Music Theory (116618)

Robert Morrison

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 20

Timbre at the Crossroads. This seminar explores how the idea of timbre is constructed across diverse disciplinary frames, investigating its associated materialities, sonic effects, and cultural techniques. We will look at the big picture, considering 18th-century organological treatises alongside 21st-century software for computer-assisted orchestration, while we also attend to the micro-temporal aspects of timbre as a multi-dimensional psychoacoustic phenomenon and expressive musical element. Throughout, we will couch specific approaches to timbre in terms of larger historical debates over the nature of sound and auditory perception, examining how this knowledge is entangled with a wide range of epistemic instruments and sonic practices. There will be a special emphasis on acquiring practical skills and hands-on experience with spectrograms and other digital tools, which we will use to analytically and creatively engage timbre in all of its microsonic details. Graduate students from all departments are welcome to join as we approach the question of timbre with an interdisciplinary mindset.

Course Notes: Open to undergraduates with permission of instructor.

Repetition and Novelty. Together, these two terms pose a question or problem – how can something can be the same and also change? If we wish to address the question of Repetition from a fully temporal perspective, the question of Novelty (newness, nowness) can't be denied.

We begin with a set of readings (among which, Repetition and Difference by Deleuze) to lay groundwork for asking how repetition is used in music and music-like activities.
There are many ways, and these ways can bring up interesting questions of style, fashion, craft and work. Portions of Bach’s *Goldberg Variations* and Lachenmann’s *Serynade* for piano will provide illuminating instances as we explore these works, their craft, their style and fashion.

How are contemporary expressive cultures shaped by the virtual venues in which they circulate—Twitter, Instagram, TikTok, YouTube, WhatsApp, and Facebook, among many others? What force sustains the constant flurry of images and videos, hashtags and challenges? In pursuit of these questions, this seminar grapples with the musicality of internet culture, attending to the ever-expanding virtual archive of memes, GIFs, and other digital media. Our examination of the production, modification, and distribution of these contagious, and frequently-humorous, items will advance two queries: 1) What modes of creativity do these digital artifacts reveal? 2) What ways of listening do these potentially-viral objects solicit? Drawing together resources from musicology, ethnomusicology, music theory, media studies, visual culture, and philosophy, we will evaluate antiphony as a rubric for digital culture. Can the phrase “digital antiphony” elucidate the emphatically intertextual and intermusical product and process of meme culture, the rich, emergent conversation that simultaneously materializes and refigures social categories of race and gender, concepts of belief and authorship? If antiphony is the logic of contemporary internet culture, then the meme is its animating force. With its generative interpenetration of call and response, the meme evidences a distinctly digital preoccupation with form, offering one sense of what it means to be musical in the 21st century.

Music 270R

Special Topics (113372)

Chaya Czernowin
The 270 Analysis course is an important and essential component of the graduate curriculum for composers. It is essential for composers to be able to figure out how various contemporary pieces work, what is at stake and what is at the base of their specific approaches, languages, and aspirations. Analysis helps a composer to do the reverse of what we usually do: while analysing we go from the finished piece to figuring out a concept or a part of a concept whereby the composer's work is usually to make a concept or an idea or a feeling/sensation into a piece. Analysis is also the most substantial component of the department generals. By the time the generals come, at the end of the second year, composers should be able to approach any kind of work articulating something about the work which speaks not only about the said work but moreover testifies to the special and individual approach of the composer as they decipher the work in question. The students will hear lectures about various pieces from guests and from Prof. Czernowin and will each have to analyze one piece at the end of the course.

Soundscape Composition and Social Justice (000284)

Yvette Jackson

2021 Spring (4 Credits)  Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor  Enrollment Cap: 12

Soundscape composition emerged in the late 1960s as a practice rooted in acoustic ecology. Through independent and collaborative sound-making, critical listening and inquiry, we will explore the potential to bring about change in issues related to social justice, food and water rights, and climate change. We will push the boundaries of soundscape composition, radio opera, and other sonic arts in order to educate, instigate, and motivate transformation in our communities.

Course Notes: Undergraduates may enroll with permission of instructor.

Music and Migration (000291)

Kay Shelemay

Kate van Orden
Mediterranean Mobilities, Past and Present. This course will provide insight into music's powerful role in human mobility, seeking to break down barriers between historical and ethnographic methods in a study of musical border crossing. The course will focus on migration in and from the eastern and central Mediterranean with particular attention to regions part of and/or influenced by the Ottoman Empire, which incorporated a confluence of Jewish, Christian, and Muslim worlds. Today modern Turkey and surrounding areas are sites of a massive refugee crisis. There are no prerequisites for the course and we hope to have an interdisciplinary enrollment. Undergraduates can take the course by permission; it fulfills the secondary concentration in Ethnicity, Migration, Rights [EMR]. A final research project/paper is required on a topic related to music and migration approved by the instructors; the topic is not restricted to the Mediterranean region.

Course Notes: Undergraduates can take the course by permission; it fulfills the secondary concentration in Ethnicity, Migration, Rights [EMR].

Recommended Prep: There are no prerequisites for the course and we hope to have an interdisciplinary enrollment.

Elementary Arabic I (116746)

Muhammad Habib

2020 Fall (4 Credits)

Schedule: MTWRF 0130 PM - 0230 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Introduces students to the phonology and script of classical/modern standard Arabic and covers the basic morphology and syntax of the written language. Emphasis on the development of the four skills (reading, speaking, listening, and writing). Samples of modern (contemporary) and classical styles of writing introduced into basic syllabus, and audio-visual material from the contemporary Arabic media. Required textbooks: (1) *Alif Baa* (with multimedia), 3rd edition. (2) *Al-Kitaab fii Ta'allum al-'Arabiyya*, Part I, 3rd edition. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: Offered jointly with the Divinity School as 4345A. Each section is limited to 12 enrollment.

Not open to auditors. Cannot be taken pass/fail. Arabic AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Subject: Akkadian

Akkadian  AA

Introductory Akkadian I (114320)

Gojko Barjamovic

2020 Fall (4 Credits)  Schedule:  MW 1200 PM - 0115 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

An introduction to the Semitic language of Akkadian, primarily through the Old Babylonian dialect and cuneiform writing system as used during the time of Hammurabi (c. 1750 BCE). Students learn the fundamentals of grammar and the writing system, as well as the most common cuneiform signs in official and cursive script. Readings span a variety of genres, including private letters, judicial documents, literary and religious texts, divinatory compendia, legal code, and royal inscriptions. The course also briefly introduces students to examples of texts from other periods and dialects of the Akkadian language for
cultural and comparative purposes. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: Akkadian AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

#### Akkadian 144

Akkadian Divination Texts (107741)
The course offers a survey of Babylonian divination literature and the manifold divinatory techniques used in ancient Mesopotamia. While its focus will be the Old Babylonian and selected later sources dealing with extispicy (prediction from the entrails of animals), we will also read a number of sources concerned with other forms of divination, such as augury (the observed behavior of birds), celestial omens, and dream interpretation. The course will also consider the "scientific" dimension of divination and its relationship to other Babylonian "sciences."

Class Notes: Class time will be determined according to enrolled students' availability.

Akkadian 148
Old Babylonian Letters of Mari (119450)
Mark Weeden
Gojko Barjamovic

Recommended Prep: Akkadian A.

Akkadian 156
Neo-Babylonian Inscriptions (123205)
The course provides a broad overview of the late Babylonian dialects of the Akkadian language and key resources for studying them. Readings in all genres are represented, including private and state letters, laws, legal and administrative records, literature, historiography, royal and display inscriptions, science, magical and religious texts.

Recommended Prep: Akkadian grammar, basic vocabulary, knowledge of cuneiform script.

Armenian AA

Elementary Modern Western Armenian I (205906)

Lisa Gulessarian

2020 Fall (4 Credits) Schedule: R 0730 AM - 0845 AM
Introduction to Western Armenian language, literature, and culture. Over the course of one year, students will acquire a thorough grounding in Western Armenian grammar and will develop foundational reading, writing, speaking, and comprehension skills. Students will be introduced to centuries of culture produced by the global Armenian diaspora. Readings will include modern and classical Western Armenian literature, drama, film, music, radio, periodicals, and historical documents.

Topic: Elementary Modern Armenian

Course Notes: Armenian AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Class Notes: Class time will be determined according to enrolled students' availability.

Ancient Near East 102
Introduction to Mesopotamian Religion (114298)

Piotr Steinkeller

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

A survey of the history and major concerns of ancient Mesopotamian religion from prehistoric times down to the reign of Alexander the Great. Among the topics treated are the key figures of the Sumero-Babylonian pantheon, the major mythological compositions (read in translation), personal religion, cosmogonies and theogonies, magic and divination, Mesopotamian temples, and cult and ritual. The course makes rich use of ancient iconography.

Course Notes: Offered jointly with the Divinity School as 3661.
Class Notes: Class time will be determined according to enrolled students' availability.

Ancient Mesopotamian Literature: 2000 Years of Early Storytelling (211195)

Laura Hawkins

2020 Fall (4 Credits) Schedule: R 1245 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 15

This course will present an overview of literature from ancient Mesopotamia, the world's earliest civilization and the birthplace of the first writing system. We will be exploring themes of creation and origins, myths and epics, death and the afterlife, religion, lamentation, humor, and more, as a way to understand some of the fundamental aspects of Mesopotamian society. Comparative texts from other regions or time periods will be brought in to add richness and depth to our discussions. Class sessions are structured heavily around weekly readings and discussions. All texts will be read in translation so no knowledge of Akkadian or Sumerian is required.

Advanced Old Assyrian (215964)
Gojko Barjamovic
2021 Spring (4 Credits) Schedule: R 1200 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

A weekly seminar for graduate students (advanced undergraduates can apply) in which we read and discuss a selection of old and new key monographs (and a few key articles) relevant to the field of Ancient Studies. The seminar targets students in Assyriology, Classics, Divinity, Egyptology, Hebrew Bible and Religion, but others might also find it interesting and relevant. We rehearse skills in critical reading, writing scholarly reviews, debating, and (of course) engage with a massive amount of relevant literature that we would not otherwise find the time to read.

Gender and Ritual in Ancient Egyptian Funerary Practices (217403)

Mariam Ayad

2020 Fall (4 Credits)  Schedule:  M 1200 PM - 0159 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

Ancient Egyptian men and women constructed enduring mortuary monuments, compiled funerary texts, and created elaborate myths & intricate rituals to deal with death. This course explores how women feature in ancient Egyptian conceptions of death, salvation, and the afterlife and whether the Egyptians conceived of gendered pathways to the afterlife.

Egyptian 300

Egyptian Text-Reading (205970)
Peter Manuelian

2020 Fall (4 Credits)  Schedule: TBD
Instructor Permissions: Instructor  Enrollment Cap: 30

This focuses on diverse topics in Egyptology, from text-reading to individual research projects. The topics may change from year to year, and students may take several iterations of the same course. Students meet with the instructor on a regular basis, and either read texts throughout the semester, or produce a final project or paper at the end of the course.

Course Notes: Reading course

Historical Background to the Contemporary Middle East: Religion, Literature and Politics (110914)

Gojko Barjamovic

2021 Spring (4 Credits)            Schedule:    TR 1200 PM - 0115 PM
Instructor Permissions:    Instructor    Enrollment Cap:    n/a

What defines the Middle East? What long-term historical and cultural developments can we trace in the region? How do these affect contemporary global order and policy? This team-taught course in the NELC department will address these three fundamental questions of great present relevance by introducing students to the ancient and modern peoples, languages, cultures, and societies of Western Asia and North Africa. The study of this diverse region is uniquely aided by a deep-time perspective afforded by thousands of years of vibrant art, writing and cultural artefacts. Relying on the classic expertise integral to area studies, the course brings together faculty from a variety of disciplines – from history and archaeology to literature and philology, and from sociology and economy to the political sciences – in a common endeavour to explore the rich cultural complex of the region through four key topics: history, religion, literature and politics.

Course Notes: Formerly NEC 97r, this course satisfies the NELC Sophomore Tutorial requirements.

**Near Eastern Civilizations 299A**

NELC Doctoral Colloquium: Research, Resources and Pedagogy (203473)

**Justine Landau**

2020 Fall (2 Credits)  

**Schedule:** T 0130 PM - 0245 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 30

This practical colloquium addresses major issues of research and teaching competence. Designed to introduce G-1 students to the Ph.D. requirements, to methodological issues and examples of ongoing scholarship in NELC, it further offers opportunity for reflection on the art of teaching (leading discussion sections, designing syllabi, giving lectures, etc.). Questions covered will include: How to choose coursework? How to prepare for qualifying and general exams? What are the challenges of language training? How does one prepare and write a prospectus? How to use the library resources most efficiently? What type of investment does recourse to digital and quantitative methodology require? How best to prepare for professional life after the Ph.D., both inside and outside of academia? In addition, NELC faculty will informally present their respective fields (main issues and methods), in broad strokes through their current research, and advanced Ph.D. students will present their prospectus for discussion and feedback before submitting it to the faculty.

NELC Doctoral Colloquium: Research, Resources and Pedagogy (204053)

**Justine Landau**

2021 Spring (2 Credits)  

**Schedule:** T 1030 AM - 1145 AM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 30

This course consists of a series of workshops in which NELC doctoral students in their G3-year will develop a strong foundation of skills to prepare them for their first teaching at Harvard and to enhance the effectiveness of their teaching in the long term. Each session will inculcate best practices for major Teaching Fellow roles and introduce key topics in pedagogy, such as teaching languages (ancient and modern), communicating with students, and grading and providing feedback on student work. In addition, a few sessions throughout the semester will be devoted to workshopping the dissertation prospectuses of NELC PhD students prior to their presentations to the faculty; these sessions afford a chance to share feedback and to learn about the research of other NELC doctoral students.

Jewish Studies 106
Mainstream Jews (215966)

Saul Zaritt

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: None  Enrollment Cap: n/a

Why is it that Jews and discussions of Jewishness appear with such frequency and with such prominence in American culture of the twentieth and the twenty-first century? One can often hear the claim that Hollywood is "owned by Jews." Many call attention to the number of Jews involved in comics and graphic novels. The State of Israel, and its definition of Judaism, has become an important touchstone in American politics, while antisemitic dog whistles have become commonplace in contemporary political discourse. Contemporary left-wing activists often refer to the legacies—contested or otherwise—of Jewish American labor politics of the nineteenth and early twentieth century. What can we make of these intersecting and surprising references to Jews/Judaism/Jewishness in the current American moment? This seminar discusses the ways that images of the Jew—philosemitic, antisemitic, and everything in between—recur in the American mainstream. Through analysis of film, television, music, comics, and other mass media, we will track the multiple and contradictory portrayals of Jewishness in the popular American imagination.

Topics in the Dead Sea Scrolls: Exegesis at Qumran (126339)

Andrew Teeter

2021 Spring (4 Credits) Schedule: T 0300 PM - 0459 PM
Instructor Permissions: None Enrollment Cap: n/a

This course explores the diverse functions of scripture within the literature of the Dead Sea Scrolls, focusing in particular on the forms and methods of interpretation attested, considered in light of other varieties of interpretation in early Judaism. Sessions will be devoted to reading, translation and discussion of primary sources in Hebrew, as well as to discussion of relevant secondary literature.

Course Notes: Offered jointly with the Divinity School as 1309.
Recommended Prep: Two years of Biblical Hebrew strongly recommended.

Jewish Studies 186
Comparative Love: The Song of Songs in Western Tradition (216646)

David Stern

2020 Fall (4 Credits) Schedule: W 0300 PM - 0500 PM
Instructor Permissions: None Enrollment Cap: n/a

The Song of Songs is, arguably, the greatest love poem in Western literature, but the nature of the love depicted in its verses has been disputed since the time the poem was committed to writing until today. Virtually every type of interpretation has been applied to the poem, from literalist to Jewish and Christian allegorical readings, philosophical and mystical exegeses, and nationalist and political interpretations, not to mention the innumerable implicit meanings underlying the many poems and prose works that have imaginatively recreated the Song through allusion and intertextuality. This course will trace the interpretive career of this unique poem, and in the process explore such basic literary questions as the relation between literalism and allegoresis, the exploitation of literature by religion and other ideologies and its consequences, eros and gender as principles of desire, and the role of influence and appropriation in the history of the poem’s interpretation. Readings will include, in addition to the Song itself and select modern scholarship about it, selections from the Old Greek translation, classical Jewish interpretation (midrash and Targum), Origen, medieval Jewish commentaries and secular love poetry, Bernard of Clairvaux and other medieval Christian exegetes, the Zohar and Christian mystics, S.Y. Agnon, and Toni Morrison. All readings will be in translation. No previous knowledge of love required.

Jewish Studies 224
Jew Theory (215968)

Saul Zaritt

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

This seminar will discuss the possibility of "Jew theory" as a method for theorizing the modern. Beginning with a survey of the history of Jewish studies and its place in the academy, the course will then examine how the figure of the Jew, as symbol and stereotype, enters the work of important thinkers of the nineteenth, twentieth, and twenty-first century—from Marx to Slezkine, from Rosezweig to Blanchot, Derrida, and Agamben. In parallel we explore the potential of new modes of "Jewish cultural studies" emerging over the last decades in Jewish studies.

Hebrew 113
Halakhah and Aggadah (Law and Lore) in Classical Judaism (216075)

David Stern
2020 Fall (4 Credits)  Schedule:  T 0600 PM - 0845 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

Halakhah and Aggadah are typically considered the two main categories of classical Jewish thought and literature. Usually, but inadequately, translated as "law" and "lore," the two categories have been understood in the course of Jewish history in various ways: as the prescriptive vs. the descriptive; as law vs. narrative; as the letter of the law vs. its animating spirit; as the serious vs. the playful sides of Judaism, or the rigorous vs. the comforting and consoling. Sometimes the two have been seen as rivals (with Aggadah usually treated as the less important), at other times as complimentary. This course will explore
the two categories, their complicated relationship, and their intertwined existence, by studying their presence in a variety of classical Jewish texts from the Rabbinic period: Mishnah, Midrash Halakhah (Sifra) and Midrash Aggadah (Vayikra Rabba), the Palestinian and Babylonian Talmudim, and (if time permits) the medieval Jewish works, the Midrash on the Ten Commandments and the Story of the Jerusalemite. Our study of these texts will be framed by readings from Rabbinic, medieval, modern, and contemporaneous conceptualizations of Halakhah and Aggadah. Readings of primary sources will be in the original language, and students should have at least two years of Hebrew language study. Provisions will be made for different levels of language skills. No previous experience studying Rabbinic literature is required, and for students who have not previously studied Rabbinic texts, this course will also serve as an introduction to their modern critical study.

Class Notes: Class time will be determined according to enrolled students' availability.

Recommended Prep: At least 2 years of Hebrew language study.

Child Sacrifice, Pros and Cons: The Binding of Isaac in Jewish, Christian, Islamic, and Modern Lit (211072)

David Stern

2021 Spring (4 Credits) Schedule: T 1200 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

Child Sacrifice-- specifically, the story of the parent's sacrifice of the first-born child-- lies at the heart of Western religion and culture. The Biblical narrative in Genesis 22, known as the Binding of Isaac, is one of the most famous and problematic tales in the Bible. The same narrative is foundational to Christianity. Later Jewish tradition has interpreted the Biblical text in countless ways from the ancient period down to the present day. The narrative figures prominently in Islam from the Qur'an on. And the Biblical story has been criticized and critiqued since the Middle Ages as a barbaric narrative. Recent works have blamed it for the ubiquity of child abuse in Western society, and it has become a ubiquitous motif of anti-war and protest poetry all over the world. This course will use the interpretive career and literary history of Genesis 22 as a lens through which to study the place of this foundational narrative in Western culture.

Readings will include Biblical texts, Euripides' Iphigeneia in Aulis, Philo of Alexandria, ancient Jewish sources, the New Testament, St. Augustine and other Christian exegetes, the Qur'an and later Islamic traditions, Kierkegaard's Fear and Trembling, Martin Buber, Kafka, Bob Dylan, Yehuda Amichai, and Leonard Cohen, among many other modern writers and poets.

Course Notes: Offered jointly with the Divinity School as HDS 1134.

The Passover Haggadah (210972)
David Stern

2021 Spring (4 Credits) Schedule: W 0600 PM - 0845 PM
Instructor Permissions: None Enrollment Cap: n/a

The Passover Haggadah is the Jewish book of redemption par excellence. As the script for the seder (the ritual banquet on the first night(s) of Passover), the Haggadah has changed and developed as the Jews have moved from one diasporic center to another from Late Antiquity until the present day. In this course we will study the history and development of both the seder and the Haggadah-- as a ritual, as a text, and as a physical book. Readings will be drawn from the Bible, Mishnah, the Jerusalem and Babylonian Talmuds, the New Testament and early Christian writers, medieval Haggadah manuscripts and early printed editions, as well as more recent versions of the Haggadah from both Israel and America (including non-traditional haggadot). We will deal extensively with the tradition of Haggadah illustration, and will utilize Harvard’s extensive collection of Haggadah in both Widener and Houghton Library. The focus of the course will be on the reading and analysis of primary sources. No previous experience with Passover is required, but students should have at least two years of Hebrew (Biblical or modern) and be prepared to read texts in Hebrew. Any student with questions about their Hebrew competence should contact Professor Stern.
Course Notes: Offered jointly with the Divinity School as HDS 1641.

Recommended Prep: Two years of Hebrew.

The Book of Proverbs: Seminar (215969)

Jon Levenson

2020 Fall (4 Credits) Schedule: R 0300 PM - 0459 PM

Instructor Permissions: None Enrollment Cap: n/a

A critical discussion of the Book of Proverbs in its entirety and a close reading of (at least) major sections of it in Hebrew. Among the topics considered are questions of worldview, literary design, poetic technique, ancient Near Eastern antecedents and parallels, and the relationship of the theologies in Proverbs to those of other currents in ancient Israel. Prerequisites: an introductory course in the critical study of the Hebrew Bible and a very solid command of Hebrew grammar (any period).

Course Notes: Jointly offered in the Divinity School as HDS XXXX

Modern Middle East  158B
Modern Arabic Literature Seminar: Lebanese Civil War: Histories and Fictions (121372)

William Granara
2021 Spring (4 Credits)
Instructor Permissions:  None
Enrollment Cap:  n/a
Schedule:  W 1245 PM - 0245 PM

Examines the roots and issues of the Lebanese Civil War (1975-90) and its continuing impact on modern Arabic fiction. The syllabus pairs realistic and romanticized representations of family, sectarianism, and gender binaries against the destruction and fantasy of the urban landscape. Themes include nostalgia and memory, exile and return. Films and documentaries will also be viewed.

Course Notes: Arabic helpful but not required. Open to both undergraduates and graduates.

Modern Middle East  200A
Approaches to Middle Eastern Studies: Seminar: Middle Eastern Lives (117327)

William Granara
2020 Fall (4 Credits)
Schedule:  M 0300 PM - 0500 PM
Middle Eastern Lives: Narratives of the Self in Middle Eastern Studies.

The seminar aims to study the lives of individuals who shaped the modern Middle East. Emphasis will be placed on major political and cultural figures who played a key role in the making of the nation-state and national identity formation. Figures include: Herzl, Ataturk, Muhammad Abdu, Nasser, N. Sadawi, and S. Ebadi, etc. Course will include discussion on self-narrative genres such as [auto]biographies, memoirs, and diaries/journals.

Course Notes: Required for students pursuing the AM in Middle Eastern Studies. Open to graduate students and upper-level undergraduates concentrating in the Modern Middle East.

Enrollment: limited to 15

Persian 130AR

Introduction to Modern Persian Literature (109546)

Sheida Dayani
This course is a survey of Persian literature in Persian with a focus on the 19th and the 20th centuries. We begin with methods of reading literary Persian texts and continue to classical poetry, folk literature, travelogues, letters, political satire, drama, fiction, and modern poetry. There is occasional incorporation of film depending on interest. Knowledge of Persian is required. Students must have successfully completed Intermediate Persian BB at Harvard or passed the placement test for the equivalent. Instructor’s permission is required if former Persian studies are outside Harvard.

Course Notes: Formerly Persian 131r and Persian 132r.

Recommended Prep: Persian BA/BB sequence, or equivalent, or permission of the instructor.

Persian 130BR

Literary and Historical Texts in Persian (109547)

Sheida Dayani

This course explores classical and modern Persian literature for literary texts with historical significance and historical texts with literary value. Genres include travelogues, journals, classical and modern poetry, essays, satire, fiction, plays, letters, court documents, film, music, and other audio-visual material. Students are expected to reflect on the weekly readings with one-page response papers in Persian, plus a midterm paper and a final paper. Class is conducted in Persian.

Course Notes: Formerly Persian 131r and Persian 132r.

Recommended Prep: Persian 130AR or permission of the instructor.

This seminar explores the porous boundaries between fiction and science in premodern Persian literature, with readings selected from major prose and poetic texts from the 10th to the 16th century. Students will engage in the close reading of chosen passages spanning across genres, from works on logic and ethics to histories and travelogues, and from treatises on rhyme and agriculture to narrative verse, and manuals of Sufism. Discussed in conversation with relevant secondary literature, these texts invite us to interrogate the diversity of forms and strategies involved in the transmission of knowledge, at the intersection of belles-lettres and discourses of truth. Authors will include: Avicenna, Ferdowsi, Hojviri, Beyhaqi, Nâser Khosrow, Nezâmi Ganjavi, Nasir al-Din Tusi, Qâsem b. Yusof Abunasri and others, to be agreed upon depending on student interest.

Recommended Prep: Prerequisites: Three years of Persian or equivalent.

Subject: Islamic Civilizations

Islamic Civilizations  163

Introduction to Islamic Mystical Traditions (216321)

Ali Asani

2020 Fall (4 Credits)  Schedule:  T 1200 PM - 0200 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

This course offers an introductory survey of mystical traditions of Islam, popularly labelled as "Sufism." It explores the fundamental concepts, practices, and institutions associated with these traditions, their historical development and their influence on the devotional, cultural and social lives of Muslim communities through the centuries. Through case studies drawn from the Middle East, South Asia, West Africa and North America, the course examines ways in which these traditions have developed and promoted alternative perspectives on what it means to be Muslim, challenging in recent times sectarian, legalistic and politicized understandings of Islam such as Wahhabi, Islamism and jihadism. The course assumes no prior knowledge of Islam.

Course Notes:  Offered jointly with the Divinity School as 3620.
Islamic Civilizations 165

Sufi Masters of Persian Poetry: ‘Attâr, Rumi, Hâfez (203470)

Justine Landau

2020 Fall (4 Credits) Schedule: W 0300 PM - 0500 PM

Instructor Permissions: None Enrollment Cap: n/a

This course offers an overview of the development of classical Persian Sufi poetry through the works of three major Persian poets from the 12th (Farid al-Din ‘Attâr of Nishapur), 13th (Mowlânâ Jalâl al-Din Rumi) and 14th century (Hâfez of Shiraz). Students will become acquainted with the key notions and beliefs at work in pre-modern Persian Sufism, and with the variety of forms, images and rhythms designed to convey their subtleties to the heart, as much as to the mind of the listener.

Course Notes: Offered jointly with the Divinity School as 3026. Knowledge of Persian not required. Lectures and readings will be in English, and a separate section will be arranged for students with adequate reading knowledge of Persian.

Class Notes: Class time will be determined according to enrolled students' availability.

Islamic Civilizations 170

Islam, Modernity and Politics (109243)

Ousmane Oumar Kane

2020 Fall (4 Credits) Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 18

The aim of this seminar is to study the evolution of Islamic thought and political practices in Muslim societies from the 19th to the early 21st centuries. Attention will be devoted to the patterns of interaction between the Muslim World and the West because it is our assumption that these patterns contribute to influence ideological formations and modes of religious/political mobilizations in the Muslim World. By the end of the eighteenth century, much of the Muslim World was in "decline" whereas European imperial powers, mainly France and Great Britain, were on the rise. The course will explore the response of Muslim societies and intellectuals to the rise of European prominence. The major 19th century reformist movements that appeared in the Muslim World will be discussed, ranging from movements advocating mild
reform to those rejecting all influence of "Western civilization" and advocating a return to the Tradition of Muhammad. In the twentieth century, virtually all the Muslim World came under European colonial domination. During colonial rule and after, the Muslim world experienced major transformations which affected the nature and administration of law, politics and society. It is in this context, that the new Islamic revival that some have called "Islamism" was articulated as an alternative to Westernization. The course will address the rise of contemporary "Islamism," as an alternative to Western domination and modernization/Westernization. The major theorists of political Islam as well as the different trajectories of "Islamism" in diverse Muslim societies will be covered. The impact of political Islam in the West will also be addressed. The final part of the course will assess the trajectories of political Islam and address the ongoing debates on post-Islamism, secularism and modernity.

Course Notes: Offered jointly with the Divinity School as 3368.

Islamic Civilizations 178

Being Muslim in South Asia: Religion, Culture and Identity (111918)

Ali Asani

2020 Fall (4 Credits) Schedule: W 1245 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

South Asia is home to the largest population of Muslims in the world. And yet, within South Asia, Muslims are a minority. What is Islam and what does it mean to be Muslim in South Asia? After briefly examining the historical development of Islamic institutions in the subcontinent, this course will focus on how ideas about Islam are shaped by evolving literary, linguistic, social and political landscapes. Special attention will be given to the effects of colonial and nationalist ideologies on Muslim experiences in India, Pakistan, and Bangladesh, as well as the disputed territory of Kashmir. We will also explore the impact of reform and revivalist movements and state-enforced policies of "Islamization" and "Hinduization" on women and minorities. The course is appropriate for those who want a bird's eye view of the Islamic tradition in South Asia, as well as those interested in exploring issues facing contemporary Muslim societies beyond the Middle East. Jointly offered as Religion 1820 and HDS 3625.

Course Notes: Offered jointly with Divinity School as 3625.

Islamic Civilizations 218

Islamic Institutions - Middle East & Beyond: Modern Transformations & Debates (19th-21st centuries) (211155)

Malika Zeghal
This graduate seminar explores the transformation of Islamic institutions in the modern period, such as religious endowments (Awqaf), sharia courts, and Islamic education. We will engage with the historiography of these institutions and with primary sources in Arabic that will help us open new paths for research.

Recommended Prep: Arabic reading proficiency preferable.

Requirements: Anti-Req: Cannot be taken for credit if RELIGION 2810 already complete

Schedule: W 0900 AM - 1015 AM
TRF 1030 AM - 1145 AM

Instructor Permissions: Instructor
Enrollment Cap: 12

Introduction to Yiddish language, literature, and culture. In the course of the year, students will acquire a thorough grounding in Yiddish grammar and will develop strong foundational reading, writing, speaking, and comprehension skills. The course will introduce students to the 1000-year history of Yiddish culture in Eastern Europe, the United States, and around the world. Students will learn about the past and present of this culture through exposure to Yiddish literature, music, theater, film, radio, oral history, and the Yiddish internet—an introduction to the dynamic world of Yiddish culture and scholarship that exists today. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: For students with little or no knowledge of Yiddish. Additional sections at different times may be added as needed. Contact instructor if you have a scheduling conflict. Yiddish AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.
Class Notes: Class time may be adjusted to take into account enrolled students’ availability.

Recommended Prep: No prerequisites; knowledge of Yiddish not assumed.

**Yiddish BA**

Elementary Yiddish II (159871)
Building on the skills gained in Yiddish AA/AB, students will further develop their Yiddish reading, writing, speaking, and oral comprehension skills. Focus will be on working with a wide variety of textual and cultural materials spanning the Yiddish-speaking world in the modern era. Course materials include selections from Yiddish fiction, poetry, drama, film, music, the press, and historical documents. Students will become familiar with the language's dialects, writing conventions, and historical development. Course activities will introduce students to the latest developments in online Yiddish publishing and digital humanities scholarship.

Course Notes: Additional sections at different times may be added as needed. Contact instructor if you have a scheduling conflict.

Class Notes: Class time will be determined according to enrolled students' availability.

Recommended Prep: Yiddish AA/AB sequence, or equivalent.

Yiddish 107

The Politics of Yiddish (207574)

*Saul Zaritt*

2020 Fall (4 Credits)  Schedule:  F 0130 PM - 0245 PM  M 1200 PM - 0115 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

A bastardized German, a jargon, a woman’s vernacular, an old world language, a dying and ghostly tongue, a Hasidic language, a queer language, a radical language—these are just a few of the ways that Yiddish has
been labeled over its one-thousand-year history. This course will trace the shifting politics attached to
Yiddish from its early modern beginnings as a language of translation between Jewish and non-Jewish
cultures to its postwar vacillation between a language of mourning and nostalgia, Jewish American humor,
Hasidic isolation, and contemporary Jewish radicalism. Through poetry, fiction, essays, and film, we will
discuss what it might mean to discover “the secret” language of the Jews” at the origins of Jewish
socialism and at the foundations of diaspora nationalism. All texts will be read in translation.

Class Notes: Course timing will be determined in consultation with those enrolled in
the course.

Old Yiddish (217859)

Marion Aptroot

2021 Spring (4 Credits) Schedule: R 0900 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Literary histories use genre definitions to discuss Old Yiddish literature: they mention epic poems,
romances, historical songs, ethical works, supplicative prayers etc. In this course, we'll discuss the use of
genre definitions applied to medieval and early modern Yiddish literature and also how Yiddish culture is
situated in European and Jewish contexts in select secondary literature. Primary texts are read in the
original in order to develop reading skills in Older Yiddish. They are made available in reproductions of
manuscripts and early printed editions, allowing us to identify aspects of the material culture of Old Yiddish
Literature.

Yiddish 118

Yiddish Cinema (211187)

Sara Feldman
From love-sick demons (“The Dybbuk”) to crossdressing fiddlers (“Yidl mitn fidl”), the Yiddish “talkie” of the 1930s and 40s was a dynamic medium for both preservation and innovation in Jewish culture. This “golden age” of Yiddish film was short but wide-ranging, with films produced in Soviet, US, and Polish contexts that explored themes of class struggle, immigration, tradition versus modernity, generational conflict, queerness, Jewish persecution, and the fate of Yiddish culture. This course will delve into the diversity of this tradition while also exploring its impact on later Yiddish films, from Israeli confrontations with the Holocaust to the rise of the Yiddish YouTube video and contemporary filmic depictions of the Hasidic world.

Course Notes: No prior knowledge of Yiddish or film studies required.

Modern Hebrew 241R
Advanced Seminar in Modern Hebrew: Israeli Culture: Cinema & Literature (127670)
Irit Aharony
2020 Fall (4 Credits) Schedule: MR 1200 PM - 0130 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This course constitutes the final level of Modern Hebrew language studies. The course offers representative readings and screenings from contemporary Israeli literature and cinema, and it forms bases of discussion on major cultural and linguistic themes through academic readings.

Course Notes: Offered jointly with the Divinity School as 4045. Not open to auditors. Discussions, papers, movies and texts presented only in Hebrew. Course sessions are 1 hour and 30 minutes long, with half an hour of conversation (personal and in group).

Class Notes: Class time will be determined according to enrolled students' availability. Course meets 3 hours a week plus 1 hour of conversation section.

Recommended Prep: Modern Hebrew 130b or equivalent.

Subject: Syriac

Syriac  AA

Elementary Syriac I (216669)

_Ute Possekel_

2020 Fall (4 Credits)  
Instructor Permissions:  Instructor  
Enrollment Cap:  9

_Schedule:_  
MWF 1030 AM - 1129 AM  

_Syllabus:_  
Syriac is the Aramaic dialect that became the principal language of Near Eastern Christians in antiquity. It was widely spoken and written in Mesopotamia, Persia, and beyond, and a vast corpus of Syriac Christian literature survives. This full-year course offers a thorough introduction to Classical Syriac. Readings will include passages from the New Testament and early Christian literature. The course will also introduce important themes and figures from the Syriac tradition. Syllabus and instructional techniques have been updated to optimize the online learning experience.

This is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit. Limited enrollment course.

Syriac  AB

Elementary Syriac II (216670)

_Ute Possekel_

2021 Spring (4 Credits)  
Instructor Permissions:  None  
Enrollment Cap:  9

_Schedule:_  
MWF 1030 AM - 1129 AM  

_Syllabus:_  
A thorough introduction to classical Syriac, a Christian dialectic of Aramaic. The first semester will cover the basics of grammar, and the second will introduce students to texts from the Syriac tradition. Daily preparation and active class participation mandatory. This is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit. Limited enrollment course. Enrollment priority given to HDS students and other Harvard faculty cross-registrants.

Requirements:  
Pre-requisite: SYRIAC AA

Subject: Sumerian

Sumerian AA

Introductory Sumerian I (115449)

Piotr Steinkeller

2020 Fall (4 Credits)                        Schedule:        MW 0300 PM - 0415 PM
Instructor Permissions: None                Enrollment Cap:  n/a

The course provides an introduction to the Sumerian language, a language isolate spoken in ancient Mesopotamia and probably the world's first written language. Although several aspects of Sumerian remain debatable, students learn the fundamentals of the grammar and writing system as well as the most common cuneiform signs in a variety of lapidary and cursive contexts. Many of the texts that are covered are a variety of dedicatory inscriptions from the time of Gudea (ca. mid-twenty-second century BCE) and the subsequent Ur III dynasty (ca. twenty-first century BCE), but other genres and time periods are sampled as well. This study of the Sumerian language also includes some background on the culture and history of the Sumerians.

Course Notes: Sumerian AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Sumerian AB

Introductory Sumerian II (159864)

Gojko Barjamovic

2021 Spring (4 Credits)                        Schedule:        MW 0300 PM - 0415 PM
Instructor Permissions: None                Enrollment Cap:  n/a

Students are further familiarized with a variety of genres, including economic texts, incantations, legal texts, letters, and literary works. This familiarization with more difficult texts highlights many of the debatable and challenging features about Sumerian while also providing important insights into the history...
and culture of the Sumerians. Students also strengthen their familiarity with the cuneiform system, enabling further study in Sumerian as well as in Akkadian and other cuneiform-based languages.

Course Notes: Sumerian AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Requirements: Pre-requisite: SUMERIAN AA

Neuroscience - Undergraduate  57
Animal Behavior (207534)
Bence Olveczky
Naomi Pierce
2021 Spring (4 Credits)  Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None  Enrollment Cap: n/a
A review of the behavior of animals under natural conditions, with emphasis on both mechanistic and evolutionary approaches. Topics include classical ethology; behavioral endocrinology; behavioral genetics; learning and memory; communication; orientation, migration and biological rhythms; optimal foraging; evolutionary stable strategies; sexual selection; parental investment and mating systems; selfishness, altruism, and reciprocity; and sociality in vertebrates and invertebrates.
Class Notes: Neuro 57 is also offered as OEB 57. Students may not enroll in both.
Requirements: Anti-Requisite: Cannot be taken for credit if OEB 57 already complete.

Neuroscience - Undergraduate  80
Neurobiology of Behavior (207476)
Jeff W. Lichtman
Kathleen Quast
2020 Fall (4 Credits)  Schedule: F 1030 AM - 1145 AM
Instructor Permissions: None  Enrollment Cap: n/a
An introduction to the ways in which the brain controls mental activities. The course covers the cells and signals that process and transmit information, and the ways in which neurons form circuits that change with experience. Topics include the neurobiology of perception, learning, memory, emotion, and neurologic disorders. This year we are combining interactive, didactic videos with "live" Friday sessions, group projects, and small discussion sections.
Requirements: Anti-Requisite: Cannot be taken for credit if MCB 80 already complete.

Synaptic and Non-Synaptic Plasticity: How the Brain Learns (203851)
2020 Fall (2 Credits) Schedule: T 0730 PM - 0845 PM
Instructor Permissions: Instructor Enrollment Cap: 15
The course will start with a brief introduction aimed at reviewing general neurophysiological concepts on
neurons, synapses, plasticity, as well as experimental techniques. We will then spend the major part of the year studying three main aspects of learning and its underlying plastic mechanisms: developmental, non-synaptic and sensory plasticity. The final weeks of the course will be devoted to developing a research proposal building upon knowledge acquired throughout the year.

Requirements: Prerequisite: (LPS A OR LS 1A ) AND (MCB 80 OR MCB 81)

Maps of the Brain - How the Brain Organizes the World (207610)

2020 Fall (2 Credits) Schedule: R 0430 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Neurons close to each other in the brain often get activated by parts of the world that are also close to each other: connected body parts, similar sounds, words with related meaning. This organized pattern of activity gives rise to brain maps of our surroundings. In this course, we will explore how the brain creates, uses, and updates such maps to make sense of the world around us.
Each week, we will take a look at neuronal circuits in different parts of the brain (eg, somatosensory cortex, olfactory system, hippocampus) to see how scientists discover new neuronal maps, how these maps function and develop, and how they evolve with experience.

Requirements: Prerequisite: (LIFESCI 1A OR LPS A) AND (MCB 80 OR NEURO 80)

The scientific study of sleep is both highly interdisciplinary and among the most unifying of topics in psychology and the neurosciences. In the past several decades, exciting new discoveries on the neurobiology of sleep have been facilitated by technologies such as functional neuroimaging and molecular genetics. Sleep science exemplifies the translational approach in biomedical science whereby investigators in human and animal research work together to continually advance the field of sleep medicine. Scientific findings increasingly point to the importance of sleep for mental health and optimum performance, as well as to sleep disruption as both a result and potential cause of mental illness. In psychiatric neuroscience, sleep is an area in which many fundamental questions remain unanswered due to the unique challenges of studying human sleep.

Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Pleasure, Pain and Everything Between: How Touch Encodes the World Around Us (216045)

2020 Fall (2 Credits) Schedule: T 0600 PM - 0715 PM
Instructor Permissions: Instructor Enrollment Cap: 15

We rely on our sense of touch for essential tasks and behaviors, including feeding, object recognition, avoiding physical harm, mating behaviors, and child rearing. This course covers the neural components and circuitry that underlie our sense of touch. From skin to the cortex, we will explore touch and its role in development, diseases, and most importantly, in our everyday life.

Schedule: MW 0300 PM - 0415 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 99

The neuronal basis of sensory processing and animal behavior will be explored in many different model systems as diverse as honeybees, weakly electric fish, and humans. Special emphasis is placed on the role of activity dependent modulation of neuronal connections in the context of learning, memory, and development of the nervous system.

Class Notes: Neuro 105 is also offered as MCB 105. Students may not enroll in both.

Requirements: Pre-requisite: MCB/NEURO 80 or Instructor Approval.  
Anti-requisite: Cannot be taken for credit if MCB 105 is already complete

Neuroscience - Undergraduate 115

Cellular Basis of Neuronal Function (207530)

Ryan W. Draft  
Kathleen Quast

2021 Spring (4 Credits)  
Schedule: MW 0300 PM - 0415 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 60

The essential function of a neuron is to processes complex signals derived from the external world. In doing so, neurons employ diverse mechanisms that respond to chemical and electrical signals with incredible sensitivity and plasticity. In this course, we will study these electrical, molecular, and cellular processes using biophysical and biological approaches. Specifically, we will explore topics on excitable membranes, neurotransmission, ion channels, dendritic integration, intracellular signaling, and synaptic plasticity in the context of real cells and brain circuits.

Laboratory section (75 minutes) will be scheduled ad hoc after enrollment on either Weds, Thurs, or Friday.

Class Notes: Neuro 115 is also offered as MCB 115. Students may not enroll in both.

Requirements: Pre-requisite: MCB/NEURO 80 or Instructor Approval.  
Anti-requisite: Cannot be taken for credit if MCB 115 is already complete

Neuroscience - Undergraduate  125

Molecular Basis of Behavior (207533)

Catherine Dulac

2021 Spring (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

Modern molecular genetic approaches are teaching us a great deal on how the brain controls behaviors. This course will cover newly developed experimental strategies of molecular neuroscience, and how they have helped uncover the nature and identity of behavior circuit components. How genes and molecules affect behaviors will be investigated through key examples of mammalian behaviors with an emphasis on instinctive and social behaviors, their expression, development, and associated mental disorders.

Class Notes: Neuro 125 is also offered as MCB 125. Students may not enroll in both.

Requirements: Anti-Req: Students who have taken MCB 125 cannot take this course for credit.

Neuroscience - Undergraduate  129

The Brain: Development, Plasticity and Decline (212829)

Sam Kunes

2020 Fall (4 Credits)

Schedule: MWF 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

A lecture and discussion course on how the brain develops, employs plasticity to adapt to its environment and undergoes functional decline with aging. Topics include the birth, death and identity of neurons, axon guidance and synaptic specificity, adult neurogenesis, developmental disorders of synaptic function and memory, including autism and Alzheimer's Disease. We explore how the brain loses function with aging. Course assignments emphasize critical evaluation of the primary literature, experimental design and scientific writing.

Requirements: Anti-Requisite: Cannot be taken for credit if MCB 129 already complete.

Neuroscience - Undergraduate 130

Visual Recognition: Computational and Biophysical Perspective (160750)

Gabriel Kreiman

2020 Fall (4 Credits)  

Schedule: M 0300 PM - 0545 PM

Instructor Permissions: Instructor  

Enrollment Cap: 50

Examines how neuronal circuits represent information and how those circuits are implemented in artificial intelligence algorithms. Topics: architecture of visual cortex, neurophysiology, visual consciousness, computational neuroscience, models of pattern recognition and computer vision.

Course Notes:  

Neuro 130 cannot be taken if Neuro 230 has been taken. Neuro 130 cannot be taken concurrently with Neuro 230.

Recommended Prep: Math (Maa/Mab, Math 1A,1B, Math 19 a or equivalent). Physical Sciences 1. MCB 80.

Requirements: Prerequisite: ((LifeSci 1A OR LPS A) AND (LifeSci 1B)) AND may not be taken at the same time with NEURO 230

Neuroscience - Undergraduate 131

Computational Neuroscience (207731)

Haim Sompolinsky

2021 Spring (4 Credits)  

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None  

Enrollment Cap: n/a

Follows trends in modern brain theory, focusing on local neuronal circuits as basic computational modules. Explores the relation between network architecture, dynamics, and function. Introduces tools from information theory, statistical inference, and the learning theory for the study of experience-dependent neural codes. Specific topics: computational principles of early sensory systems; adaptation and gain control in vision, dynamics of recurrent networks; feature selectivity in cortical circuits; memory; learning and synaptic plasticity; noise and chaos in neuronal systems.

Recommended Prep: Basic knowledge of multivariate calculus, differential equations, linear algebra, and elementary probability theory.

Requirements: Anti-Requisite: Cannot be taken for credit if MCB 131 already complete.
**Neuroscience - Undergraduate 140**

Biological and Artificial Intelligence (207645)

*Gabriel Kreiman*

2021 Spring (4 Credits)  
**Schedule:** T 0300 PM - 0500 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course provides a foundational overview of the fundamental ideas in computational neuroscience and the study of Biological Intelligence. At the same time, the course will connect the study of brains to the blossoming and rapid development of ideas in Artificial Intelligence. Topics covered include the biophysics of computation, neural networks, machine learning, Bayesian models, theory of learning, deep convolutional networks, generative adversarial networks, neural coding, control and dynamics of neural activity, applications to brain-machine interfaces, connectomics, among others.

**Recommended Prep:** Basic knowledge of multivariate calculus, differential equations, linear algebra, and elementary probability theory

**Neuroscience - Undergraduate 141**

The Physics of Sensory Systems in Biology (207730)

*Aravinthan Samuel*

2020 Fall (4 Credits)  
**Schedule:** TR 0900 AM - 1015 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 30

Living organisms use sensory systems to inform themselves of the sights, sounds, and smells of their surrounding environments. Sensory systems are physical measuring devices, and are therefore subject to certain limits imposed by physics. Here we will consider the physics of sensory measurement and perception, and study ways that biological systems have solved their underlying physical problems. We will discuss specific cases in vision, olfaction, and hearing from a physicist’s point of view.

**Class Notes:** The scheduled class meetings (Tu, Th 9-10:15 EST) will be discussions
of the material presented in the pre-recorded lectures and reading assignments. If any students are unable to attend at 9 AM (e.g., because of time zone), Prof. Samuel will hold a second class meeting later on Tuesdays and Thursdays (which will be regularly scheduled based on a student poll at the start of class). Attendance at either the 9 AM or later meeting is mandatory. Students are free to join both. All zoom meetings will be recorded and made available on the website. Class participation is expected either live during these class meetings or through online discussions on Slack.

Requirements:  Prerequisite: MATH 21A and MATH 21B and cannot be taken for credit if PHYSICS 141 already complete.

**Neuroscience - Undergraduate 143**

Neurobiology of Vision and Blindness (207773)

*Joshua Sanes*

2021 Spring (4 Credits)  Schedule:  TR 0130 PM - 0245 PM

Instructor Permissions:  Instructor  Enrollment Cap:  20

Vision system fascinates biologists, in part because we are such visual animals. In fact, Americans regard blindness as the worst ailment they could get, fearing it more than Alzheimer’s or AIDS. For these reasons, as well as because of its relative accessibility, the visual system is a favored model for studying neural circuitry, as well as for testing novel therapeutic approaches, such as gene therapy. This course will cover key topics in visual development, structure and function, and then use them as a basis for considering causes of blindness and potential cures.

Class Notes:  Neuro 143 is also offered as MCB 143. Students may not enroll in both.

Recommended Prep:  MCB 80 or NEURO 80 is recommended.

Requirements:  Pre-requisite: MCB/NEURO 80 or Instructor Approval.

Anti-requisite: Cannot be taken for credit if MCB 143 is already complete.

Neuroscience - Undergraduate 145

Neurobiology of Perception and Decision Making (212830)

Naoshige Uchida

2020 Fall (4 Credits)  Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor  Enrollment Cap: 30

One of the current goals of neuroscience is to understand neuronal circuits underlying perception and behavior. Recent advances in neuroscience have allowed us to glimpse neuronal processes that link perception and decision making. How is sensory information processed in the brain? How does an animal choose its action? How does an animal learn from ever-changing environments and adjust their behavior? The course will examine neurophysiological studies in perception and decision-making.

Requirements: Anti-Requisite: Cannot be taken for credit if MCB 145 already complete.

Neuroscience - Undergraduate 146

Experience-Based Brain Development: Causes and Consequences (212831)

Takao Hensch

2021 Spring (4 Credits)  Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

At no time in life does the surrounding environment so potently shape brain function as in infancy and early childhood. This course integrates molecular/cellular biology with systems neuroscience to explore biological mechanisms underlying critical periods in brain development. Understanding how neuronal circuits are sculpted by experience will motivate further consideration of the social impact on therapy, education, policy, and ethics.

Requirements: Anti-Requisite: Cannot be taken for credit if MCB 146 already complete.

The Neurobiology of Pain (207607)

Ryan W. Draft
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 24

This course will explore the neurobiological systems and mechanisms underlying both acute and chronic pain. Topics will include nociceptive/sensory systems, molecular basis and modulation of pain, neuroanatomy of peripheral and central pain circuits, pain pathologies, pharmacological and non pharmacological treatments. The emphasis will be on understanding basic neurobiological concepts underlying pain systems and reading/discussing the primary scientific research in the field.

Class Notes: Course time will be agreed upon by the enrolled students and instructor during shopping period.

Requirements: Pre-requisite: MCB/NEURO 80 or Instructor Approval.
Anti-requisite: Cannot be taken for credit if MCB 148 is already complete

Neuroscience - Undergraduate 170

Brain Invaders: Building and Breaking Barriers in the Nervous System (207770)

Laura Magnotti

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 24

The brain has evolved a unique but very effective system to protect itself from invaders. In this course, we will explore the specific defenses that the nervous system uses to protect itself. We will also examine how some pathogens evade or breach those defenses and the impact of those invasions. Finally, we will explore how scientists have been able to translate their understanding of these pathogenic mechanisms into technologies for research and therapeutic applications.

Class Notes: Neuro 170 is also offered as MCB 170. Students may not enroll in both.

Requirements: Prerequisite: (LPS A OR LS 1a) AND MCB/NEURO 80 or Instructor Approval.
Anti-requisite: Cannot be taken for credit if MCB 170 is already complete

Computational Cognitive Neuroscience: Building Models of the Brain (207732)

Samuel Gershman

2021 Spring (4 Credits) Schedule: WF 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 48

"What I cannot create, I do not understand." This course applies Richard Feynman's dictum to the brain, by teaching students how to simulate brain function with computer programs. Special emphasis will be placed on how neurobiological mechanisms give rise to cognitive processes like learning, memory, attention, decision-making, and object perception. Students will learn how to understand experimental data through the lens of computational models, and ultimately how to build their own models.

Class Notes: Neuro 1401 is also offered as PSY 1401. Students may not enroll in both.

Recommended Prep: Students be comfortable with a numerical programming language (e.g., Python, Matlab, R). Psychology concentrators should have taken Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, Science of Living Systems 15, MCB 80 or MCB 81 before enrolling in this course; or permission of instructor.

Requirements: Anti-Requisite: Cannot be taken for credit if PSY 1401 already complete.

Independent Study    1

Independent Study (150200)

Soha Bayoumi

2020 Fall (4 Credits)  Schedule:  TBD

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Independent Study is designed to provide credit for field research, academic study not available in regular course work, or practice or performance in the arts. What distinguishes a suitable project is the application of analytical skills to the object of Independent Study. Any sophomore, junior, or senior whose previous record is satisfactory may petition to undertake Independent Study for non-letter-graded credit. Students may access the petition for Independent Study on the Office of Undergraduate Education website.

Course Notes:  A student may petition to take up to a total of four, four-credit courses of Independent Study. Independent Study courses are subject to the same rules for dropping and withdrawing as any other course. The petition requires the signatures of a qualified adviser and the student's resident dean, as well as an outline of the student's proposed project. It must be submitted to the Allston Burr Resident Dean for approval, ordinarily in the first week of the term.

Independent Study 1 Section: 005

Independent Study (150200)

Laura Hawkins

Independent Study is designed to provide credit for field research, academic study not available in regular course work, or practice or performance in the arts. What distinguishes a suitable project is the application of analytical skills to the object of Independent Study. Any sophomore, junior, or senior whose previous record is satisfactory may petition to undertake Independent Study for non-letter-graded credit. Students may access the petition for Independent Study on the Office of Undergraduate Education website.

Course Notes: A student may petition to take up to a total of four, four-credit courses of Independent Study. Independent Study courses are subject to the same rules for dropping and withdrawing as any other course. The petition requires the signatures of a qualified adviser and the student’s resident dean, as well as an outline of the student’s proposed project. It must be submitted to the Allston Burr Resident Dean for approval, ordinarily in the first week of the term.

TIME: Research Related Work for Exchange Scholars and Visiting Fellows (149447)

2020 Fall (2 Credits)  Schedule:
Instructor Permissions:  None  Enrollment Cap:  n/a

TIME-R may be used to indicate that research work is being undertaken that is not directly related to the student's dissertation work (i.e., additional laboratory research for a faculty member). This course is intended for exclusive use by GSAS Exchange Scholars, Visiting Fellows, and Special Students. Other students should contact their home departments for directions on how to enroll in department-specific versions of TIME research.

Requirements:  Course Open  to GSAS Non-Degree students only

Organismic & Evolutionary Biology 10

Foundations of Biological Diversity (144594)

Brian Farrell
Collin Johnson
Elena Kramer
Ann Pearson
Mansi Srivastava

2020 Fall (4 Credits)  Schedule: TR 0900 AM - 1000 AM
Instructor Permissions: None  Enrollment Cap: n/a

An integrated approach to the diversity of life, emphasizing how chemical, physical, genetic, ecological and geologic processes contribute to the origin and maintenance of biological diversity. Topics to be covered include the evolution of metabolic pathways, multicellularity and structural complexity; causes and consequences of differences in diversity over space and time; the role of species interactions (including symbioses) as an evolutionary force; and the evolution of humans and their impact on the environment.

Class Notes:

• Two 60-minute synchronous meetings per week, 001 and 002. Students should register for the one they foresee attending most regularly.

• Two 45-minute asynchronous lectures (pre-recorded videos) per week are required to be watched before the synchronous meetings.

• One 90-minute lab/section per week is required.

Recommended Prep: Knowledge of introductory molecular, cellular biology, and genetics is recommended.

Organismic & Evolutionary Biol 10  Section: 002

Foundations of Biological Diversity (144594)

Brian Farrell
Elena Kramer
Ann Pearson
Mansi Srivastava
Collin Johnson

2020 Fall (4 Credits)  Schedule: TR 0430 PM - 0530 PM
An integrated approach to the diversity of life, emphasizing how chemical, physical, genetic, ecological and geologic processes contribute to the origin and maintenance of biological diversity. Topics to be covered include the evolution of metabolic pathways, multicellularity and structural complexity; causes and consequences of differences in diversity over space and time; the role of species interactions (including symbioses) as an evolutionary force; and the evolution of humans and their impact on the environment.

Class Notes:
- Two 60-minute synchronous meetings per week, 001 and 002. Students should register for the one they foresee attending most regularly.
- Two 45-minute asynchronous lectures (pre-recorded videos) per week are required to be watched before the synchronous meetings.
- One 90-minute lab/section per week is required.

Recommended Prep: Knowledge of introductory molecular, cellular biology, and genetics is recommended.

Organismic & Evolutionary Biol 50

Genetics and Genomics (130236)

Daniel Hartl
Robin Hopkins

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

Fundamental concepts in genetics and genomics forming a critical foundation for biology approached from two perspectives: (1) as a body of knowledge pertaining to genetic transmission, function, mutation, and evolution in eukaryotes and prokaryotes; and (2) as an experimental approach providing a toolkit for the study of biological processes such as development and behavior. Topics include structure, function, transmission, linkage, mutation, and manipulation of genes; genetic approaches in experimental studies of biological processes; and analysis of genomes in individuals and populations. Related ethical issues also discussed include genetically modified organisms, gene therapy, genetic testing, personalized medicine, and genetic privacy.

Organismic & Evolutionary Biol  52

Biology of Plants (131579)

Elena Kramer
Noel Holbrook

2021 Spring (4 Credits)  Schedule:  TR 0130 PM - 0245 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

Introduction to the structure, diversity, and physiology of plants with an emphasis on evolutionary relationships and adaptations to life on land. Topics include growth, resource acquisition, interactions with other organisms (i.e., fungi, bacteria, insects), reproduction, and survival in extreme environments. Laboratory sessions provide an overview of plant and diversity and an introduction to basic physiological processes.

Evolutionary Biology (142224)

Andrew Berry

2021 Spring (4 Credits)  Schedule:  MWF 1030 AM - 1145 AM
Instructor Permissions:  None  Enrollment Cap:  n/a

The course covers micro- and macro-evolution, ranging in its focus from population genetics through molecular evolution to the grand patterns of the fossil record. Topics emphasized include both natural and sexual selection, the ecological context of adaptation, genomic and developmental mechanisms of evolutionary innovation, speciation, phylogenetics, and evolutionary approaches to human problems.

Recommended Prep:  Life Sciences 1B or permission of the instructor..

This course explores the fascinating diversity of the kingdom fungi, including evolution, ecology and morphology. All of the major groups of fungi, from smuts to molds, will be included. Students use a variety of techniques to learn about these organisms and their activities.

Class Notes:

- Tuesday lectures will be followed by a lab/discussion session.
- Because we are working away from the lab the course has been modified to allow for the study of fungi wherever you may be. We will provide a laboratory kit for you to use at home. This will not be the same as working in the lab at Harvard but it is intended to offer you the chance to experiment and observe what is around you. You will attempt to grow some fungi. You will learn about identification and most of all you will realize that the organisms in the kingdom Fungi are all around us and perform many functions in the ecosystem and in our lives. They cause diseases of plants and animals but they also are critical to plant growth, they cycle nutrients to support ecosystem health, they are critical to industrial processes and to the activities in our kitchens. Fungi are highly complex in their morphology and this contributes to their beauty and fascination. I hope you will join us in studying fungi at home. Throughout the course we will have special guest presentations to bring these topics into focus, for example, the biology of sourdough and of making ginger beer. We will support you in this endeavor by by having weekly sessions to discuss and observe together.

Recommended Prep: Life Sciences 1a and 1b or permission of instructor. Lab section will be held on Tuesdays from 2:30pm-4:00pm during Fall 2016.
This course examines the relationships of organisms to their environment at the individual, population, and community level. The course covers topics in both pure and applied ecology including: adaptations to the physical environment, population dynamics, competition, predator-prey interactions, community ecology, ecosystem structure, stability, and function, the ecology of infectious diseases, and natural resource management.

Recommended Prep: Mathematics 1a or 1b.

Organismic & Evolutionary Biol   56

Geobiology and the History of Life (130331)

Andrew Knoll
David Johnston

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

Within our solar system, Earth is distinguished as the planet with life. Life was born of planetary processes, has been sustained for some four billion years by planetary processes, and through time has emerged as a set of planetary processes that is important in its own right. In this course we will investigate the ways that Earth and life interact, focusing in particular on the biogeochemical cycles of major elements. This will provide a framework for interpreting the history of life reconstructed from fossils and phylogeny.

Course Notes: OEB 56 is also offered as E-PSCI 56. Students may not take both OEB 56 and E-PSCI 56 for credit.

Recommended Prep: EPS 21, 22, or Life Sciences 1b; or permission of instructor.

Animal Behavior (131446)

Bence Olveczky
Naomi Pierce
2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

A review of the behavior of animals under natural conditions, with emphasis on both mechanistic and evolutionary approaches. Topics include classical ethology; behavioral endocrinology; behavioral genetics; learning and memory; communication; orientation, migration and biological rhythms; optimal foraging; evolutionary stable strategies; sexual selection; parental investment and mating systems; selfishness, altruism, and reciprocity; and sociality in vertebrates and invertebrates.

Requirements: Anti-Requisite: Cannot be taken for credit if NEURO 57 already complete.

Plants and Human Affairs (143445)

Charles Davis
2021 Spring (4 Credits) Schedule: MW 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

The lives of humans and plants are deeply intertwined: in fact, many plants have arguably coevolved symbiotically with our species. These often unappreciated plant-human connections are the subject of this course. It will focus on several economically important plant groups, exploring how their biology predisposed them to playing an essential role in the human success story. Plant form, structure, ecology, evolution, biogeography, and underlying genetics have all contributed to their utility as sources of food, shelter, and medicine. More contemporary themes include aspects of climate and energy, large-scale agriculture, food security, genetic engineering, ethnobotany, and conservation. The course involves two weekly lectures via Zoom, topical readings including primary scientific papers and popular articles, scientific writing, and a weekly lab/discussion.

Class Notes: Required Lab section on Fridays, 12:45-2:45 PM.

Recommended Prep: OEB 10 or permission of the instructor.

Fundamentals of Marine Biology (217833)

Aaron Hartmann

2021 Spring (4 Credits)            Schedule:                  TR 1200 PM - 0115 PM

Instructor Permissions: None  Enrollment Cap: n/a

We will explore the fundamentals of marine biology, and in doing so, learn about the complex lifestyles of organisms whose home spans three quarters of our planet. We will take a process-driven approach, focusing first on the fundamentals: the interrelated processes of marine physiology, ecology, and evolution. What biological processes help organisms succeed in the marine environment? How do species traits vary throughout the different environments in the world's oceans? How do gradual and rapid changes in the ocean environment alter the "rules of life" for marine species? As we build our understanding of these fundamentals throughout the course, we will use them as lenses to view, disentangle, and understand larger patterns in the oceans. In particular, we will focus on the diversity and distributions of biological functions, patterns of biodiversity, and the growing threats to marine life. Learning will be assessed via a first-third exam, a short paper, and a final presentation and paper. Ultimately, you will come away with a new understanding of the unique challenges and incredible opportunities that arise from life in saltwater.

Conservation Ecology and Practice (208260)

David Foster

2021 Spring (4 Credits)  Schedule:  TR 1030 AM - 1145 AM

Instructor Permissions:  Instructor  Enrollment Cap:  30

The conservation of land and waters has become a major tool in determining the patterns of land use, conserving biodiversity, combating global change, and ensuring that the benefits of nature are secured for society. With a focus on the U.S., this course will examine the history and changes in conservation rationale and approach, the ecological theory and research that helps guide conservation planning and execution, and the policies, finances, and practice that enable land conservation to be a powerful agent of landscape change. In place of weekend field trips we will host a series of regional and national experts in diverse aspects of conservation theory and practice—ecology, policy, finance, planning, and economics—from academia and the public and private sectors, to explore the approaches, challenges, successes and future of land conservation.

Arthropod biology: Arachnids and myriapods, their biology and evolution (216472)
This course aims to introduce the evolutionary history and biology of arachnids, myriapods and related groups via a combination of learning their taxonomy and anatomy as well as their role as model organisms to understand phenomena such as segmentation or appendage specification. We aim to then use the knowledge acquired to study aspects related to web evolution, sociality, parental care, use of defensive secretions, and other behaviors that have made arthropods the most successful group of terrestrial organisms.

Recommended Prep: OEB10 (for undergraduates)

Molecular Ecology and Evolution (144180)

Scott Edwards

2020 Fall (4 Credits) Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

A survey of theory and applications of DNA technologies to the study of evolutionary, ecological and behavioral processes in natural populations. Topics to be covered will span a variety of hierarchical levels, timescales, and taxonomic groups, and will include the evolution of genes, genomes and proteins; the neutral theory of molecular evolution and molecular clocks; population genomics and phylogenetic principles of speciation and phylogeography; metagenomics of microbial communities; relatedness and behavioral ecology; molecular ecology of infectious disease; and conservation genetics.

Course Notes: Weekly computer laboratories will introduce the use of the internet and computational software in DNA sequence alignment and phylogenetic and population genetic analysis.

Recommended Prep: Life Sciences 1b, OEB 10, OEB 53 or MCB 52.

From Darwin to Derrida: The Evolution of Meaning and Purpose (216473)

David Haig

2020 Fall (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 12

The seminar will read my recent book (of the same name as the course) intended for a general educated readership. The seminar would be suitable both for science students and for non-science students who wish to learn some evolutionary biology. Natural selection is a purposeless process that has evolved purposive creatures. The key innovation in the evolution of life was the origin of a textual record of past choices of natural selection contained within genetic sequences. The information in genes comes from the
environment that selects. The textual record evolves as organisms are judged by the performance of the text in environmental context.

Class Notes: This semester-long course will be offered each semester in 2020-2021. It cannot be repeated for credit.

Biology of Fishes (140830)

George Lauder

2021 Spring (4 Credits) Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: 40

Fishes inhabit diverse aquatic environments including deep seas, intertidal zones, coral reefs, polar waters, the vast Amazonian basin, and great East African lakes. A single fish species may occupy diverse
environments through extraordinary long distance horizontal and vertical migrations. To explore this unparalleled diversity, the course emphasizes bridging traditional academic boundaries with integrative analyses of the biology underlying rapid evolutionary radiations and stasis.

Organismic & Evolutionary Biol 137

Experimental Design and Statistics for Ecology (216474)

Benton Taylor

2020 Fall (4 Credits)  Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor  Enrollment Cap: 30

Experimental Design and Statistics for Ecology provides a practical "how to" introduction to conducting ecological research. Students gain hands-on experience forming testable questions and hypotheses, designing experiments to test these questions, implementing experimental designs, taking and managing data, and conducting an array of statistical analyses in R statistical software.

Course Notes: This course is geared toward senior undergrads and early graduate students.

Class Notes: Instructor: Professor Benton Taylor

Recommended Prep: OEB 55

Organismic & Evolutionary Biol 141

Biogeography (145864)

Gonzalo Giribet

2021 Spring (4 Credits)  Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: None  Enrollment Cap: n/a

Biogeography aims to explain distributions of organisms through historical and ecological factors. This course will focus on the history of biogeographic research, developments in the area of historical biogeography, and on ecological processes that affect distributions of whole clades. Topics include plate tectonics and earth history, vicariance and dispersal, areas of endemism, phylogenetic niche conservatism,
latitudinal gradients in species richness, and the theory of island biogeography. Software for biogeographical analysis will be discussed and evaluated.

Recommended Prep: Two following courses: Life Sciences 1b, OEB 10, OEB 51, OEB 52, OEB 53, OEB 54, OEB 55, OEB 181, or permission of the instructor. There will also be a lab component in addition to the lecture component of the course.

Genes and Behavior (145857)

Yun Zhang

2020 Fall (4 Credits) Schedule: MR -

Instructor Permissions: Instructor Enrollment Cap: n/a

Behavior is inheritable and regulated by genes. This lecture course explores causal links between genes and behavioral traits, aiming to provide mechanistic understanding of how gene products control and influence behavioral outputs. The course will start with discoveries of genes whose mutations contribute to neurological diseases and psychiatric disorders, followed by main research approaches used to investigate genetic basis of behavior and brain function. The class will then have in-depth lectures and discussion on genes that regulate several behavioral traits including olfaction, itch and pain, circadian rhythm, sexual behavior, sleep, learning and memory.

Class Notes: One lecture and one discussion session per week via Zoom. Meeting times will be based on the needs of students enrolled.

Recommended Prep: Life Sciences 1a or permission of the instructor

Organismic & Evolutionary Biol 150

Exceptional Paleobiological Insights into Animal Evolution (215692)

Javier Ortega-Hernandez
In this course we will explore the importance of soft-tissue preservation in the rock record through an overview of major exceptional fossiliferous sites around the world and throughout the Precambrian to Mid-Phanerozoic, with particular emphasis on the evolutionary history of invertebrate animals. Our aim is to produce a thorough understanding of the inherent biases of the fossil record, how exceptional deposits break with these limitations, and the contribution of exceptional paleontological data towards reconstructing the origin and early evolution of the major animal groups. In addition, the course offers an optional week-long field trip during spring break.

Course Notes: OEB 150 is also offered as E-PSCI 150. Students may not take both OEB 150 and E-PSCI 150 for credit.

Organismic & Evolutionary Biol  155R

Biology of Insects (142688)

Naomi Pierce

An introduction to the major groups of insects. The life history, morphology, physiology, and ecology of the main taxa are examined through a combination of lecture, lab, and field exercises. Topics include the phylogeny of terrestrial arthropods with a review of the extant orders, an analysis of abiotic and biotic factors regulating populations, including water balance, temperature, migration, parasitism, mutualism, sociality, insect/plant interactions, medical entomology, and the use of insects in biological control.

Class Notes: The lab and field exercises will be offered as part of the "remote" version of the course, but modified to accommodate students who are working in different locations.

Organismic & Evolutionary Biol  177

Microbial Symbioses & Microbiomes (146387)

Colleen Cavanaugh
Symbioses, intimate associations involving two or more species, are ubiquitous in nature. All organisms live in partnership with microbes, and microbial symbiosis has gained recognition as one of the most important evolutionary processes shaping biodiversity throughout the history of life on Earth. This course will explore microbial symbioses ranging from intimate associations, e.g., intracellular microbes (including your own mitochondria!), to the human microbiome in the context of ecology and evolution.

Diverse microbial associations with bacteria, archaea, protists, fungi, plants, and animals will be studied. Topics will include the origin of the eukaryotic cell, molecular communication between partners, evolution of unusual host structures, unique ecological advantages symbioses confer, and the role of the human microbiome in sickness and in health.

The course will have a combination of lectures, group discussions, student presentations, and critical review of primary literature. Symbioses will be complemented by firsthand observations via microscopy and field trips (according to your ability) to local environs, such as Harvard campus/dorm room or your home/neighborhood. Every student will have their own microscope!

Recommended Prep: Life Sciences 1a, 1b, OEB 10 or equivalent, course(s) in microbial science, or permission of instructor.

Organismic & Evolutionary Biol  203R

Advanced Community and Ecosystem Ecology: New Developments in Ecological Remote Sensing (207216)

Paul Moorcroft

A critical discussion of recent advances in the application of remote sensing measurement technologies in ecological research.

Course Notes: Course Requirements: An undergraduate course in ecology and/or global change biology, or permission of the instructor.
Organismic & Evolutionary Biol 207

The Fishy Aspects of the Human Body (211177)

Stephanie Pierce

2021 Spring (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 20

Explore how the human body evolved through an analysis of the award-winning non-fiction book, Your Inner Fish: A Journey into the 3.5 Billion-Year History of the Human Body, by evolutionary biologist Neil Shubin. We will read and discuss each chapter in turn and discover how different parts of the human body can be traced back to creatures that lived eons ago. By the end of the course students will gain a better appreciation for how all life on Earth is interrelated and how our own bodies are a result of millions of years of evolutionary history.

Course Notes: Undergraduates are particularly encouraged to consider this course. It provides a basic foundation in anatomy that would be applicable for many concentrations and career paths, such as IB, HEB, MCB, and human and veterinary medicine.

Organismic & Evolutionary Biol 213

Evolutionary Convergence, Mass Extinctions, and the Shape of Life (213310)

Javier Ortega-Hernandez

2020 Fall (4 Credits) Schedule: R 0945 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Understanding the origin of major animal groups and the composition of the biosphere represents a core objective of evolutionary biology. While molecular techniques allow us to reconstruct phylogenetic relationships between living animal phyla, as well as track the developmental mechanisms behind their morphology, extant diversity offers an incomplete view of the evolution of these organisms. We will examine how processes acting through deep time affect fundamental biodiversity patterns, including topics such as the origin of animals, the rapid diversification of major clades, and the impact of extinction. Our aim is to convey a sense of how evolutionary thinking has changed over the past few decades thanks to a combination of conceptual and technical advances, and to instill a sense of the importance of the animal fossil record as a source of data with a uniquely historical component among the biological sciences.

Recommended Prep: At least one of the following courses, or their equivalent, are
encouraged: OEB 51, OEB 53, OEB 56, OEB 181.

Organismic & Evolutionary Biol 218

Ecosystem Restoration (215786)

David Moreno Mateos

2021 Spring (4 Credits)  Schedule: TBD

Instructor Permissions: Instructor  Enrollment Cap: 10

Given the current speed of habitat and species loss caused by human development, the restoration of degraded ecosystem is one of the greatest challenges humankind is facing. For this reason, the United Nations declared the current decade (2021-2030) as the UN Decade on Ecosystem Restoration. This global effort will need from experts on ecosystem science, management and design to have a deep understanding of how ecosystems recover from human disturbance and how we can use this knowledge to increase the currently limited performance of restoration practice. This course is particularly suited for students with interests in nature conservation, the natural component of landscape architecture, or ecosystem management in a broad sense. This course is cross-listed with the Department of Organismic and Evolutionary Biology, which will allow students from both disciplines to exchange their knowledge in a multidirectional learning environment where we all will address real world restoration cases. In this year's edition, we will focus on the restoration of New England's ecosystems. We will work in parallel to an ongoing research project to understand the recovery of New England's ecosystem over the last 300 years since the abandonment of most of the farms created by the original settlers. Through research, we will learn how forests and other ecosystems have changed during this time to apply that knowledge to a real restoration project that students will develop. We will have key inputs from guest lectures coming from restoration companies with many years of experience restoring ecosystems worldwide. They will help us find targeted tools to support and design ecosystems both in urban and natural environments in the New England context. We will increase our understanding of what nature is for humans and the Earth system and will increase our connection to it through self-guided field trips. At least, one previous course in ecology or a similar topic is required. This course will arm you with one of the most important tools to work with and for nature in the coming decades.

Course Notes: This course is jointly listed with the GSD as SCI 6481.

Course structure: We will meet once a week on Friday at 8:00 AM for two hours. The main structure of the course is divided into two main parts. The first part will be a discussion about the readings that will be assigned, which will focus on gaining a scientific and practical understanding of restoration. The second part will focus on case study analysis and a restoration project developed by students' teams. Additionally, we will have guest lecturers from restoration companies and the academia and self-guided field trips to local restoration efforts in students' residence areas.

Organismic & Evolutionary Biol 223

Topics in Neurogenetics (145012)

Yun Zhang

2021 Spring (4 Credits) Schedule: W 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

The goal of the class is to achieve an advanced understanding of the molecular and cellular mechanisms that regulate behavior. We will discuss key findings in the field, as well as the cutting-edge techniques used in these studies. The topics include decision-making, human olfaction, memory formation, inheritance of learned behavior, and mental illnesses, etc.

Course Notes: The course is primarily planned for new graduate students, but it is also open to interested senior undergraduates who have taken OEB 57 or MCB 80 and obtained permission from the instructor.

Phylogenetics and Phylogeography in the Era of Genomics (143845)

Scott Edwards

2021 Spring (4 Credits) Schedule: W 1200 PM - 0245 PM
Instructor Permissions: None
Enrollment Cap: n/a

The course will review the recent literature on methods of analysis in phylogenomics and phylogeography, with particular attention to analysis of large-scale data sets; accommodating gene tree heterogeneity; adequacy of models at the level of DNA sequence evolution and demographic history; and estimation of critical parameters of population history, such as phylogenetic relationships, reticulate evolutionary histories, rates of gene flow and species boundaries. Beginning with introductory lectures on neutral theory and coalescent theory as background, later weekly sessions will consist of presentations led by students and by local experts, including hands-on sessions working with state-of-the-art software.

Course Notes: Participants should have an account on the FAS Research Computing Odyssey cluster prior to course beginning.

Recommended Prep: OEB 53, OEB 181, OEB 125 or equivalent, or permission of the instructor.

Microbial Sciences: Chemistry, Ecology and Evolution (124109)

Michael Gilmore

2021 Spring (4 Credits)

Schedule: F 0945 AM - 1145 AM

Instructor Permissions: Instructor
Enrollment Cap: 20

This is an interdisciplinary graduate-level and advanced undergraduate-level course in which students explore topics in molecular microbiology, microbial diversity, and microbially-mediated geochemistry in depth. This course will be taught by faculty from the Microbial Sciences Initiative. Topics include the origins of life, biogeochemical cycles, microbial diversity, and ecology. Course will limit enrollment to 20 students.

Course Notes: Also offered as Microbiology 210.

Recommended Prep: For advanced undergraduates, Life Sciences 1a and 1b are required, or permission of instructor. MCB 52 is recommended.

**Enrollment Cap:** 15

Presents the research interests and experiences of scientists in organismic and evolutionary biology. Specific topics treated vary from year to year.

**Course Notes:** Required of all first-year graduate students in Organismic and Evolutionary Biology.

Subject: Life Sciences

Life Sciences 2

Evolutionary Human Physiology and Anatomy (123674)

*Daniel Lieberman*  
*George Lauder*  
*Andrew Biewener*  
*Joanne Clark Matott*

2020 Fall (4 Credits)  
**Schedule:**  
MWF 1200 PM - 0115 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 160

Why is the human body the way that it is? This course explores human anatomy and physiology from an integrated framework, combining functional, comparative, and evolutionary perspectives on how organisms work. Major topics, which follow a life-course framework, include embryogenesis, metabolism and energetics, growth and development, movement and locomotion, food and digestion, stress and disease, and reproduction. Also considered is the relevance of human biology to contemporary issues in human health and biology.

**Course Notes:** This course includes a weekly 3-hour lab. This course may not be taken Pass/Fail.

Philosophy

The True and the Good (111175)

Bernhard Nickel

2020 Fall (4 Credits)  Schedule:  TBD
Instructor Permissions:  None  Enrollment Cap:  n/a

The basic outlook of value and perspective that each of us adopts as we make decisions large and small are more than mere opinion. They are commitments that are open to deeper understanding and critique. Philosophy is the pursuit of such understanding and critique, and this course will introduce you to the practice of philosophy. The course has a two-fold focus: we will look at some of the central figures and problems of the Western philosophical tradition, including Socrates, Plato, Descartes, Locke, Kant, and Mill. We'll also look at how contemporary writers have responded to this tradition, especially from a feminist and anti-racist perspective. These include Charles Mills, Helen Longino, bell hooks, and Paul Taylor. This course has no prerequisites. Students need not have taken or be enrolled in Expos before taking this course: the course will introduce you to the mechanics and practice of philosophical writing.

Course Notes: In 2020-21, the course will have a hybrid structure. Lecture materials and recordings will be made available online for asynchronous study, and students will attend live classes in small groups for one hour twice a week with the instructors. To accommodate an appropriate variety of time zones, the meeting times of the live classes will be scheduled after students express interest in enrollment.

Ancient Ethics and Modern Morality (133181)

James Doyle

2021 Spring (4 Credits)  Schedule:  TR 1200 PM - 0115 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

An historical introduction to ethics, from the Greeks to, roughly, now. We begin with the concept of virtue in Homer and trace its development through Socrates, Plato, Aristotle, the Stoics and Aquinas. In the modern period we look, in a somewhat skeptical spirit, at the rise of the 'moral' as a supposedly sui generis category of reasons, traits, obligations etc., as this is found in Hume, Kant, Mill and others.
Philosophy 11

Philosophy of Law (156186)

Emilio Mora

2021 Spring (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a

Is there a moral obligation to obey the law? What is the relation between law and morality? How should judges interpret the constitution? Does the practice of judicial review compromise democratic values? When and in what manner may the state interfere with the conduct of its citizens? We will discuss these and other questions in this survey course on the philosophy of law. Significant attention will be devoted to questions that lie at the intersection of legal and political philosophy. The final part of the course will be determined in consultation with course participants and will be devoted to philosophical puzzles arising in the law.

Philosophy 18

Human Ethics: A Brief History (141608)

Seth Robertson

2020 Fall (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a

Does might make right? Should a person focus on achieving immortality or on living a simple, happy mortal life? Is morality simply a matter of convention? Why be moral when being immoral could provide access to more wealth, fame, and power? What is the relationship between etiquette and morality? What do people owe a society that has failed in its obligations to its people? How can we identify and resist oppression, marginalization, and injustice? Human beings all over the world have been thinking about, discussing, and debating questions like these for thousands of years. This course aims to look at this history of ethics and moral philosophy from a genuinely inclusive perspective by focusing on ethical thought both from all over the world, with special emphasis on that of members of traditionally marginalized groups and from areas of the world that typically receive much less attention in academic philosophy and ethics.
Philosophy 20

Happiness (205077)

Susanna Rinard

2021 Spring (4 Credits)  

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Instructor  

Enrollment Cap: 50

Should we pursue happiness, and if so, what is the best way to do it? This course will critically assess the answers to these questions given by thinkers from a wide variety of different places, cultures, and times, including Stoicism, Epicureanism, Buddhism, Daoism, and contemporary philosophy, psychology, and economics.

Philosophy 34

Existentialism in Literature and Film (109600)

Sean Kelly

2020 Fall (4 Credits)  

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Instructor  

Enrollment Cap: 30

What is it to be a human being? How can human beings live meaningful lives? These questions will guide our discussion of theistic and atheistic existentialism and their manifestations in literature and film. Material will include philosophical texts from Pascal, Kierkegaard, Nietzsche, Sartre, Camus, Beauvoir, Fanon; literature from Dostoevsky, Beckett; films from Jean-Luc Godard, Alain Resnais, Carol Reed.

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

An examination of a range of Plato's dialogues, from shorter 'Socratic' conversations to 'Platonic' expositions of ambitious metaphysical theories and 'critical' reworkings of those theories. Topics will include the personality and philosophical activity of Socrates, Socrates' identification of virtue with a kind of knowledge and his related doctrine that everyone desires the good, his encounters with Sophists and teachers of rhetoric, Platonic theorizing about knowledge as a kind of recollection, the soul as structured and as immortal, and the famous Forms.

Philosophy 109

Early Chinese Ethics (213581)

Seth Robertson

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a
Early (Pre-Qin era) China was a hotbed of philosophical activity: scholars developed careful and fascinating ethical views in the context of serious philosophical debates between major schools of thought. This course focuses on some of these ethical debates between Confucian, Mohist, Daoist, and Legalist philosophers in early China. We'll read both classical texts such as the Analects of Confucius, Mengzi, Xunzi, Mozi, and Zhuangzi and important contemporary scholarship on these texts. Several moral questions will be of particular importance: What is the relationship between etiquette and morality? What are the most important virtues to acquire? Should we think of morality and moral development as something natural or artificial? Are we justified in caring more about some people (our closest friends and family) than others? We will have a special focus on three important interpretive themes for the course: (1) How can understanding the particular contours of the debates each scholar is engaged in help us understand their overall views? (2) How does each philosopher's view of human psychology and epistemology constrain, guide, and support their moral theorizing? (3) How can an understanding of early Chinese ethical thought, theory, and debate help enrich contemporary discussions in ethics and moral philosophy? No previous experience or coursework in Chinese philosophy is required for this course.

**Philosophy 122**

British Empiricism (114331)

*Jeffrey McDonough*

2021 Spring (4 Credits)  

**Schedule:** TR 0900 AM - 1015 AM  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

The seventeenth and eighteenth centuries were among the most exciting and revolutionary periods in the history of western philosophy. Among the most prominent philosophers working in that period, Locke, Berkeley and Hume have traditionally been grouped together under the label "British Empiricists" in virtue of their rejection of innate ideas and emphasis on experience as a source of knowledge. This undergraduate level course aims to provide an overview of the development of early modern empiricism while exploring in detail a number of central issues, arguments and controversies. Optional readings will place our three central figures in the larger context of philosophical developments in the early modern era. Topics will include the theory of ideas, the nature of body, personal identity, human agency, skepticism, and naturalism.

Philosophy 125
Beyond Dualism: Descartes and His Critics (121954)

Alison Simmons

2021 Spring (4 Credits)

**Schedule:**
- W 0300 PM - 0415 PM
- M 0300 PM - 0545 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 18

We will explore Descartes' dualism in its historical context. After examining the transformation that Descartes brought about in our conceptions of body and mind (and ourselves), we will consider some of the notorious metaphysical problems his dualism gives rise to and some 17th- and 18th-century attempts to push back against it in the figures of Princess Elizabeth of Bohemia, Henry More, Margaret Cavendish, Anne Conway, and Anton Amo.

**Class Notes:** Students also have to enroll in a mandatory section with the course head, Wednesdays 3:00pm-4:15pm

Fundamentals of Logic (111424)

W. Hugh Woodin

2021 Spring (4 Credits)

**Schedule:**
- MW 0600 PM - 0715 PM

**Instructor Permissions:** None

**Enrollment Cap:** n/a
Introduction to the principles of mathematical logic, from the fundamental notions (language, axioms, validity) to the fundamental results (completeness, compactness, Lowenheim-Skolem). Familiar structures from mathematics will be examined through the lens of formal logic. There will be additional selected topics from model theory as time permits.

Text: Mathematical Logic (The Berkeley-Harvard undergraduate course)

Carnap and Quine (113545)

*Warren Goldfarb*

2020 Fall (4 Credits)  
Schedule: W 1200 PM - 0245 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 25

Rudolf Carnap (1891-1970) was the preeminent figure in the logical positivist movement, later known as logical empiricism. We investigate its leading themes: meaning and verification, the foundations of logic and mathematics, the logical analysis of empirical knowledge, and the role of philosophy in framing criteria for ontology and objectivity. We then turn to W. V. Quine (1908-2000), starting with his criticisms of Carnap and analyzing his development of a post-positivist naturalism, which reshapes the approach to all these issues.

**Philosophy 145**

Modal Logic (156023)

*Mark Richard*

2020 Fall (4 Credits)  
Schedule: MW 0130 PM - 0245 PM  
Instructor Permissions: None  
Enrollment Cap: n/a

Modal logic in the first instance is the study of the logical properties of modal words like 'must', 'may', 'necessarily', and 'possibly'. The standard way of explaining the meanings of modal idioms like 'necessarily' --in terms of "truth at a possible world" --has been taken over by many linguists as a tool to
analyze meaning in natural language (so-called 'possible worlds semantics'). It has also been used to study the nature of provability in formal systems, to analyze programs in computer science, and to model temporal processes. The standard way of explaining the meanings of modal idioms like 'necessarily' --in terms of "truth at a possible world" --has been taken over by many linguists as a tool to analyze meaning in natural language (so-called 'possible worlds semantics').

This course is first and foremost a course in logic, but one that attends to modal logic's uses in philosophy and the study of language. One of the goals of the course is to introduce you to doing metatheory --proving things like completeness and soundness for logical systems. We also look in some detail some applications of modal logic and its semantics, discussing such things as: semantics for counterfactual conditions; such things as mutual knowledge and conversational context; the use of modal logic to model such things as computer programs and non-standard (e.g., intuitionistic) mathematical systems.

The course does not suppose that you know any logic. We do move pretty fast through elementary logic; you may find the course challenging unless you have taken and remember some of an elementary logic course like EMR17. Grades will be determined by: class attendance, four to six problem sets, a take home final. The primary text for the course is Hughes and Cresswell, Hughes and Cresswell, A New Introduction to Modal Logic (Routledge).

Class Notes: In addition to the lectures, students also have to sign up for a mandatory section with the Course Head on Thursdays, 1:30-2:30pm

Philosophy 146

Philosophy and Mathematics: Exploring the Infinite (119554)

Peter Koellner

2021 Spring (4 Credits) Schedule: WF 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Infinity captures the imagination. A child stands between two mirrors and sees herself reflected over and over again, smaller and smaller, trailing off to infinity. Does it go on forever? … Does anything go on forever? Does life go on forever? Does time go on forever? Does the universe go on forever? Is there anything that we can be certain goes on forever? … It would seem that the counting numbers go on forever, since given any number one can always add one. But is that the extent of forever? Or are there numbers that go beyond that? Are there higher and higher levels of infinity? And, if so, does the totality of all of these levels of infinity itself constitute the highest, most ultimate, level of infinity, the absolutely infinite?

This course will involve an in-depth investigation of the infinite in mathematics. Topics include: Logicism, Hilbert's Program, Intuitionism, the Incompleteness Theorems, and the Search for New Axioms.

Throughout the course we shall address the classic philosophical questions concerning the nature of mathematics and our knowledge our knowledge of mathematics, questions which appear in their most pressing form in the context of the incompleteness phenomenon and the infinite.

Philosophy 147

Philosophy of Language (146883)

Bernhard Nickel

2021 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Language is of two-fold philosophical interest: intrinsically, it is a complex tool that mediates our relationships with the natural world and with each other. It is also a nexus which reflects metaphysics, epistemology, ethics, and pretty much every other aspect of philosophy. This course will introduce students to theories of language that seek to shed light both on how language works, and what we can learn about other matters from a closer investigation of language. We'll read many of the classic discussions that have given rise to theories of meaning and whole fields, such as linguistics: Frege, Russell, Strawson, Grice, Kaplan, and Kripke, among others. We'll also look at how more recent writers have applied the tools that philosophers of language of past generations have developed, with special attention to feminist concerns. This course has no formal pre-requisites, but students should have taken at least one philosophy course before enrolling in this course so that they have some experience reading and writing philosophy.

Course Notes:

Students will receive comprehensive lecture materials for asynchronous study, and class time will be spent reviewing, deepening, and expanding on these lecture notes through seminar style discussion.

Philosophy 155

Topics in Philosophy of Religion (121705)

Parimal Patil

2020 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a
In this course, we will discuss the work of contemporary philosophers whose treatment of problems in philosophy of language (Dummett), epistemology and metaphysics (Johnston), and mind (Strawson) have a direct bearing on issues in the philosophy of religion.

Course Notes: Prerequisites: Previous course-work in Philosophy or permission of the instructor.

Class Notes: For students who cannot attend the regularly scheduled class meeting due to differences in timezone, recordings of the meetings will be made available and the instructor will meet with these students separately at a time to be determined.

Philosophy 157Z

Anscombe's Intention (205353)

James Doyle

2020 Fall (4 Credits)

Schedule: W 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap: 8

A close reading of G. E. M. Anscombe's 94-page monograph Intention (1957), a founding text of modern philosophy of action. Prominent topics will include: what it means to classify (e.g.) a bodily movement as intentional, the nature of the relation (e.g., is it causal?) between psychological states and the actions they are invoked to explain, philosophical difficulties generated by a broadly Cartesian conception of mind as a
separate, sui generis realm of being, and the bearing of the analysis of our psychological idioms on our understanding of psychological phenomena. Other readings will include selections from Aristotle, Aquinas, Descartes, Wittgenstein and Davidson.

Class Notes: In a remote version of the Anscombe proseminar, I'd be nervous about taking on more than eight students. I would want to be providing detailed written responses every week to questions submitted to the 'Discussions' section of the Canvas site (this is something I already do to an extent but I would be beefing it up considerably). I might want to replace half of the seminar time (in the regular residential version) with, say, a half-hour one-on one session with each student, and add a compulsory 75-minute discussion section for the whole class each week (attendance at these has been optional in the past). And I would want to offer two versions of the remaining 75-minute seminar at different times, to accommodate different time zones.

Philosophy 175T
The Ethics of Technology and Design: Autonomy, Community, Virtue, and Vice (116995)

Seth Robertson
Meica Magnani

2021 Spring (4 Credits) Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 25

As human interactions, choices, and relationships are increasingly mediated by computing and information technologies, we find ourselves facing new variations of age-old philosophical questions. This course examines how certain technologies force us to engage with and sometimes rethink classic questions in moral and political philosophy. This course examines these issues from two popular perspectives in contemporary moral philosophy: the perspectives of Kantian ethics and of virtue ethics. On the technology side, we will examine: the widespread replacement of human decision-making with algorithms; how recommender systems shape information flow and user choice; the proliferation and uses of personal data; and the human impact of interface design. On the philosophy side, we consider philosophical questions such as: What does it mean for our technologies to respect the autonomy of persons? What does it mean for our technologies to respect and promote a moral community of equals? When might our technologies undermine or promote autonomous choice, preference, and action? How might our technologies undermine or promote moral relations? How can technology contribute to or impede human flourishing? What personal traits or skills are needed to interact healthily with technology? How do our everyday interactions with technology influence our lives and our values for better or worse? How can we be at our intellectual best despite widespread propaganda, fake news, disinformation campaigns, and epistemic filter bubbles and echo chambers?

Philosophy 177

Educational Justice: Proseminar (203447)

Regina Schouten

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 18

This course will explore the kinds of experiences children should have in schools and how those experiences should be distributed. We'll proceed by examining key topics pertaining to educational justice, including competing principles of justice in the distribution of education (egalitarian principles, sufficientarian principles, prioritarian principles, etc.); competing reform agendas; the justifiability and relative priority of different educational aims (education for citizenship, education for career preparation, education for social justice, etc.); the family and its role in educational inequality; and higher education access. In addition to the philosophical contributions to these conversations, we'll read enough of the relevant empirical literature to provide a working understanding of the structure and consequences of schooling in the US. Finally, we'll explore some case studies that look at specific choices that arise in real time for educational decision-makers. These case studies highlight the moral dimensions of decisions about discipline, charter schools, special education, and school districting.

Course Notes: The proseminar will be taught in two independent sections, Wednesdays 12pm-2:45pm and Thursdays 12pm-2:45pm. Students should indicate which time(s) they are available when submitting their application to enroll, and they will be assigned to one of the two sections as part of the enrollment process. Both sections are led by Professor Schouten.

Philosophy 177I

Historical Injustice: Proseminar (218177)

Emilio Mora

2020 Fall (4 Credits)

Schedule: F 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

What is the moral and political significance of past injustice in the history of a political community? In a variety of national contexts, the redress of historical injustice has struck many as both a legitimate and urgent political cause. Others argue that, since both the original victims and perpetrators of historical injustices are dead, there are no persons who have valid claims against these historical episodes nor, at any rate, are there any individuals who can be rightly held responsible for injustices that predate their existence. This course examines the underlying philosophical questions that underpin and sustain these
disagreements, focusing on the issues of 'injury', responsibility, and justice. In the first topic, we examine a number of accounts characterizing the nature, and defending the legitimacy, of historical injustice claimants as well as the main lines of objection to these claims. In the second topic we examine questions of responsibility. Which contemporary parties, if any, can be held responsible for the effects of historical injustice, and what is the basis and nature of their responsibility? In the final topic, we examine some of the questions and difficulties regarding the administration of a scheme of historical rectification, and we will seek to understand the relation of historical rectification to the project of social justice more generally. Would historical injustice claims be made redundant or otherwise be addressed by the implementation of an egalitarian scheme of distributive justice for all? Conversely, do historical injustices give rise to social and political complaints that must be specifically addressed by a scheme of historical rectification?

### Philosophy 178Z

Inequality (205060)

*Lucas Stanczyk*

2020 Fall (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a  

Growing economic inequality is said to be one of the defining challenges of our time. In this class, we will examine some of the most important problems thought to be raised by inequality through the lens of several systematic ways of thinking about social justice. Topics to be addressed include inequality of income and wealth, inequality of opportunity, gender and racial inequality, unemployment and poverty, unauthorized migration, authority in the workplace, threats to democratic institutions and various forms of political inequality. Special attention will be paid to Rawls's liberal theory of justice and its influential critics.

**Course Notes:** In 2020-21, the course will have a hybrid structure. Lecture materials and recordings will be made available online for asynchronous study, and students will attend live classes in small groups for one hour twice a week with the instructors. To accommodate an appropriate variety of time zones, the meeting times of the live classes will be scheduled after students express interest in enrollment.

### Philosophy 180

Justice and the Politics of Cultural Memory and Representation (110657)

*Emilio Mora*
In this course we will examine a range of issues which we might, very loosely, term ethical questions of social, cultural, and artistic representation. We will be examining three principal issues. Our focus will begin with questions of historical representation. In a range of national and social contexts questions of historical representation have become increasingly prominent and divisive political issues. How should a national community regard, relate to, and represent histories and historical figures implicated in past injustice? What are the ethical constraints and imperatives relating to the representation of these national histories? How do these injunctions relate to present political norms of equality and inclusivity and the demands of social cohesion? We will examine these questions in relation to some of the recent political controversies that have arisen over these issues, particularly in the American debate over confederate monuments. Secondly, we will examine questions regarding cultural appropriation. What is cultural appropriation, and what, if anything, is wrong with cultural appropriation? What are the ethical norms and constraints regarding cultural appropriation? Our treatment of this topic will range from discussions of particular controversial cases of cultural appropriation to an examination of the philosophical questions regarding the nature of culture and identity that lie at the heart of these practical controversies. Finally, we will consider ethical controversies relating to our engagement with (construed broadly) artistic representations. How can we ethically enjoy tragedy? On the face of things it would appear paradoxical or else the mark of a sadist. Are pornographic representations of immoral acts wrong to consume and enjoy? Can we continue to consume and enjoy the products of artists who have engaged in grossly immoral actions? Although we should not expect a set of master principles to govern this range of topics, we might realistically hope that the answers we give, and the philosophical difficulties we encounter in any one topic will help illuminate our treatment and investigation of the others.

Course Notes: For 2020/21, the course will be organized as small-group tutorials. Students will meet singly or in pairs with the instructor every week. At the beginning of the semester, students will work the instructor to create a reading list around the course topic that is specific to the students' individual interests.

**Philosophy 188**

Philosophy and Literature: Proust (113962)

*Richard Moran*

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a
The course will attempt to achieve a sense of Proust's great novel, *In Search of Lost Time*, as a whole, necessarily in an abbreviated form, but with the aim of tracing the plan that Proust worked out when he began the project. The bulk of the reading will be in Proust's text, but there will be regular secondary readings in philosophy and in the critical literature on Proust. Philosophical themes to be emphasized will include: the nature of subjectivity and the problem of other minds, the strategies of solipsistic desire, freedom and dependence, amour-propre and the desire for approbation, the nature and limits of the will (including 'involuntary memory'), personal identity and artistic vocation, the will to knowledge and self-deception.

**Philosophy 189**

Film and Philosophy (121780)

*Richard Moran*

2021 Spring (4 Credits)  

**Schedule:**  
MW 1200 PM - 0115 PM

**Instructor Permissions:**  
None

**Enrollment Cap:**  
n/a

Motion pictures have attracted philosophical attention since their invention, both as a distinctive form of experience or representation, as a new medium of art, and in the philosophical themes explored by individual films. In this course we will take up such themes as the nature of photography, the relation of image to reality, spectatorship and point of view, fiction and documentary, and film and skepticism (about the external world, about other minds). We will also consider questions specific to film storytelling: the temporality of life and action, emotional engagement with fictions, empathy and identification; the contrast of film and text, narration with and without a narrator, narration both reliable and unreliable, and the question of what 'authorship' can mean in the case of film.  
We will be discussing films from the 'classic' Hollywood period, as well as more contemporary films from Europe and elsewhere. There will be regular screenings and attendance will be mandatory.  
Readings will be drawn from philosophy and philosophically oriented film criticism, likely including André Bazin, Stanley Cavell, V. F. Perkins, George Wilson, Susan Sontag, Robert Warshow, Robert Pippin, Gregory Currie, Noel Carroll, Laura Mulvey.

**Philosophy 192B**

Buddhist Philosophers and their Critics (159688)
Buddhist theories in epistemology, metaphysics, and mind were contested by a broad range of philosophers, both Buddhist and non-Buddhist. In this course, we will read three short monographs in which the epistemology of perception, the metaphysics of momentariness, and the nature of consciousness are debated. We will situate these debates in their historical contexts and ask what we can learn from them today.

Philosophy 222

British Empiricism (114435)

Jeffrey McDonough

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

The seventeenth and eighteenth centuries were among the most exciting and revolutionary periods in the history of western philosophy. Among the most prominent philosophers working in that period, Locke, Berkeley and Hume have traditionally been grouped together under the label "British Empiricists" in virtue of their rejection of innate ideas and emphasis on experience as a source of knowledge. This graduate level course aims to provide an overview of the development of early modern empiricism and its context while exploring in detail a number of central issues, arguments and controversies. Topics will include the theory of ideas, the nature of body, personal identity, human agency, skepticism, and naturalism. Students will emerge from the course with a foundational understanding of a crucial period of philosophical development and be positioned to contribute to current research. This course should also put them in a position to teach British Empiricism as an area of competence.

Alison Simmons  
2021 Spring (4 Credits)  
Schedule: W 1200 PM - 0245 PM  
Instructor Permissions: Instructor  
Enrollment Cap: n/a  

We will explore Descartes’ dualism in its historical context. After examining the transformation that Descartes brought about in our conceptions of body and mind (and ourselves), we will consider some of the notorious metaphysical problems his dualism gives rise to and some 17th- and 18th-century attempts to push back against it in the figures of Princess Elizabeth of Bohemia, Henry More, Margaret Cavendish, Anne Conway, and Anton Amo.

Philosophy 238
Philosophy, History, Genealogy (124587)

Sean Kelly  
Michael Rosen  
2020 Fall (4 Credits)  
Schedule: M 1200 PM - 0200 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 20  

In what sense, if at all, does Philosophy depend essentially upon its history? We approach this question in three phases. First, we compare the engagement with history found in the philosophical work of Hegel and Heidegger. Next, we address the meta-philosophical question itself through the work of figures like Bernard Williams, Michael Rosen, and Eileen O'Neill, among others. Finally, we explore the particular engagement with history manifest in the genealogical method, especially as it has been pursued recently by feminist philosophers such as Rahel Jaeggi, Sally Haslanger, and Amia Srinivasan.

Course Notes: The course enrollment will be capped at 20 with priority for Philosophy and Gov. G1s and G2s

Rawls and his Critics (120528)

*Regina Schouten*

*Tommie Shelby*

2021 Spring (4 Credits) Schedule: M 0300 PM - 0530 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

To mark the 50th anniversary of *A Theory of Justice*, we'll do a close reading of John Rawls's classic text and consider the most significant critical responses it inspired. In addition to engagement from other liberal thinkers, we'll read critiques from the perspective of libertarianism, Marxism, communitarianism, feminism, and black radicalism.

**Philosophy 279A**

Political Morality of Social Reproduction (216501)

*Lucas Stanczyk*

2020 Fall (2 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 20
This is a graduate seminar in political philosophy. The topic is how to think about justice in the processes of social reproduction. In every society that persists over time and does not simply collapse or disband, there are processes in place whereby its continued existence is reproduced from one day to the next. Food is grown, children are raised, streets are policed, and so on. These processes together are responsible for whatever benefits that life in the society brings, as well as for the social disadvantages that the persons living in the society are liable to experience. Among the most important ways that social reproduction in this sense can fall short of what morality demands is by exhibiting or depending on injustices of various kinds. This possibility gives rise to one of the more complex questions that can be asked about the content of political morality. How are we to conceive of justice in the ongoing production, or reproduction, of a whole society? The seminar will seek insight into this question by examining it from several more discrete directions. Topics to be addressed include the interdependence of rights and duties in a theory of social justice, how the state should define appropriate economic contributions, the role of the family in reproducing the system of social cooperation, and approaches to thinking about intergenerational justice.

Course Notes: In 2020-21, the seminar will have a hybrid structure. Seminar materials and presentations will be made available online for asynchronous study, and participants will be asked to share questions and comments. The seminar will then meet live for two hours once a week. To accommodate participants in a variety of time zones, the seminar will be scheduled after students express interest in enrolment.

Qualified undergraduates may enroll with the permission of the instructor.

The State and Violence (216502)

Lucas Stanczyk

2020 Fall (2 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 20

An inquiry into the political morality of violence. Topics to be addressed include the role of violence and the threat of violence in delimiting conventional rights and freedoms, the morality of responding to state violence with civil and uncivil forms of disobedience, the moral distinction between disobedience and revolutionary aims and actions, approaches to thinking about prison reform and abolition, standards for the use of deadly force by the military and in policing, the difficulty of tolerance in the aftermath of widespread violence.

Course Notes: "In 2020-21, the seminar will have a hybrid structure. Seminar materials and presentations will be made available online for asynchronous study, and participants will be asked to share questions and comments. The seminar will then meet live for two hours once a week. To accommodate participants in a variety of time zones, the meeting time of the weekly seminar will be scheduled after students express interest in enrolment."
Qualified undergraduates may enroll with the permission of the instructor."

Ned Hall
Alison Simmons

2020 Fall (4 Credits)  Schedule:  R 0300 PM - 0500 PM

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Our topic this year is epistemic agency: What is it? How do you exercise it? What gets in the way of it? In the first half of the term, we'll be looking at historical discussions of epistemic agency and its discontents. In the second half of the term, we'll be looking at contemporary discussions of it from a variety of angles. Along the way, we will work on developing a variety of philosophical skills. And we will be talking about how to "do" graduate school.

Course Notes:  Limited to first-year graduate students in the Department.

Newtonian mechanics and special relativity. Topics include vectors; kinematics in three dimensions; Newton's laws; force, work, power; conservative forces, potential energy; momentum, collisions; rotational motion, angular momentum, torque; static equilibrium, simple harmonic motion, damped and driven oscillations; gravitation; fictitious forces; fluids; special relativity.

Course Notes: Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15a. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester.

Class Notes: Students who are unable to attend the T/Th 12:00pm-1:15pm lecture time due to incompatible time zones will be able to watch the lecture videos at other scheduled times (to be determined). These viewings will take place in groups where students will periodically work together on short problems, as they would do in the main lecture. Please note we will only offer this accommodation due to an incompatible time zone, not for a conflict with another course. We anticipate offering three lab sections: one morning, one afternoon, and one evening time EST.

Recommended Prep: Mathematics preparation at least at the level of Mathematics 1b concurrently is required. However, some elementary ideas from multivariable calculus may be used and students are encouraged to take Mathematics 21a concurrently.

Physics 15B

Introductory Electromagnetism and Statistical Physics (111896)

Girma Hailu
Robert Westervelt
Keith Zengel

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

Electricity and magnetism. Topics include electrostatics, electric currents, magnetic field, electromagnetic induction, Maxwell's equations, electromagnetic radiation, magnetic fields in materials, and some basic notions in kinetic theory, entropy, temperature, and phase transition associated with electricity and magnetism.

Course Notes: Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15b. Students use creative problem-solving in applying theoretical topics to explore physical phenomena and design real life applications. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester.
analysis, basic programming, introductory circuit analysis, and practical applications of electromagnetism. PSI will meet weekly throughout the semester.

Class Notes: The instructors of the course will survey the students enrolled in the course to find out the best times for lectures and labs.

Recommended Prep: Physics 15a, Physics 16, or written permission of the Head Tutor in Physics. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Vector calculus, (div, grad and curl) are used extensively—in principle, this is taught in the course. Students taking Mathematics 21a concurrently will likely find that some concepts are introduced in Physics 15b before they have seen them in Mathematics 21a. Some students may wish to postpone Physics 15b until they have completed Mathematics 21a.

Physics 15C

Wave Phenomena (124154)

Matteo Mitrano

Markus Greiner

2020 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Forced oscillation and resonance; coupled oscillators and normal modes; Fourier series; Electromagnetic waves, radiation, longitudinal oscillations, sound; traveling waves; signals, wave packets and group velocity; two- and three-dimensional waves; polarization; geometrical and physical optics; interference and diffraction. Optional topics: Water waves, holography, x-ray crystallography, solitons, music, quantum mechanics, and waves in the early universe.

Course Notes: Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15c. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester.

Class Notes: Links to the lectures will be provided on Canvas and all lectures will be recorded. Students who are unable to attend the lecture time due to incompatible time zones will be able to watch the lecture videos at other scheduled times (to be determined). These viewings will take place in groups where students will periodically work together on short problems, as they would do in the main lecture. Sections (1.5 hours) meet once each week, and attendance is required and part of your grade. The course has an interactive lab component, taught by Prof. Greiner with weekly lab sessions.

Recommended Prep: Physics 15a and 15b or Physical Science 12a-b or equivalent. Mathematics at least at the level of Math 21b. Mathematical topics introduced during lectures will include matrix calculus, complex numbers, differential equations, and Fourier analysis.

Physics 16

Mechanics and Special Relativity (111197)

Howard Georgi
Keith Zengel

2020 Fall (4 Credits) Schedule: TR 0430 PM - 0545 PM

Instructor Permissions: None Enrollment Cap: n/a

Newtonian mechanics and special relativity for students with good preparation in physics and mathematics
at the level of the advanced placement curriculum. Topics include oscillators damped and driven and resonance (how to rock your car out of a snow bank or use a swing), an introduction to Lagrangian mechanics and optimization, symmetries and Noether's theorem, special relativity, collisions and scattering, rotational motion, angular momentum, torque, the inertia tensor (dynamic balance), gravitation, planetary motion and a little glimpse of quantum mechanics.

Course Notes: Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 16. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester. Emphasis is placed on collaborative teaching and learning. Many class materials are Mathematics notebooks.

Class Notes: Prof Georgi will go over the same material at both class times listed. Both sessions will be recorded and students are free to attend both but students MUST attend the time for which they sign up because the sessions will have pre-assigned breakout rooms and interactive polls. In-class interactions will contribute to student grades. It is likely that the morning class will be smaller than the afternoon class. See the SCHEDULE link in Canvas for more details.

Recommended Prep: Score of 5 on the mechanics section of the Physics C Advanced Placement exam, or equivalent. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Thorough knowledge of calculus of one variable and vectors plus some mathematical sophistication. The mathematical level will be significantly higher than that of Physics 15a. If in doubt, check the Canvas site ahead of time, or email the professor at hgeorgi@fas.harvard.edu, or just shop.

Primarily for selected concentrators in Physics, or in Chemistry and Physics, who have obtained honor grades in Physics 15 and a number of intermediate-level courses. The student must be accepted by some member of the faculty doing research in the student's field of interest. The form of the research depends on the student's interest and experience, the nature of the particular field of physics, and facilities and support available. Students wishing to write a senior thesis can do so by arranging for a sponsor and enrolling in this course.

A list of possible faculty sponsors and their fields is available in Lyman 238 and on the Physics Department Web page. Course enrollment forms may be obtained from Lyman 238.

Physics 91R

Supervised Reading Course for Undergraduates (110569)

David Morin

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

Open to selected concentrators in Physics, Chemistry and Physics, and other fields who wish to do supervised reading and studying of special topics in physics. Ordinarily such topics do not include those covered in a regular course of the Department. Honor grades in Physics 15 and a number of intermediate-level courses are ordinarily required. The student must be accepted by a member of the faculty.

Course Notes: A list of possible faculty sponsors and their fields is available in Lyman 238 and on the Physics Department's website. Course enrollment forms may be obtained from Lyman 238.

Physics  95
Topics in Current Research (111967)

Isaac Silvera

2020 Fall (4 Credits)  Schedule:  W 0430 PM - 0545 PM  M 0300 PM - 0415 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

Prior to taking this tutorial course, most juniors and seniors have learned physics by topics: Classical Mechanics, E&M, Quantum Mechanics, Particle Theory, Statistical Mechanics, etc. This tutorial is built around the Wednesday Night Seminar (WNS): every Wednesday two Harvard Faculty members give accessible presentations on their research to entering or interested graduate students (Gs), joined by the P95 students. Modern research uses all of the topics learned in physics courses, thus UGs are introduced to current research, including old and new developments and burning problems; they will learn from the Harvard experts as well as each other. The WNS is preceded by assigned reading and student presentations to the class on the basic underlying physics. Students develop critical skills in oral presentations, writing about research topics, and engaging in self and peer evaluation.

Course Notes:  Primarily for junior and senior concentrators, however interested sophomores are welcome.

Class Notes:  All students and Gs are welcome to the WNS. During Covid, faculty presentations will be recorded and videos are watched prior to the
WNS. Students prepare at least one Monday introductory presentation on Zoom and these are recorded. At the WNS the faculty describes their career trajectory and attending students ask questions on their career, physics research, and research opportunities. To accommodate students who may be in different time zones the WNS will be held on Wednesday at 4:30pm; Mondays will be at 3 pm.

Physics 123B

Laboratory Electronics (124108)

David Abrams

2020 Fall (4 Credits)  

Schedule:  TR 0130 PM - 0530 PM
A lab-intensive introduction to digital electronic circuit design. Develops circuit intuition and debugging skills through hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. After a short introduction to the basics of electronic circuits and MOSFET switches, we move onto digital devices including logic families, Boolean arithmetic, combinatorial and sequential circuits including finite state machines. We continue with analog-digital interfacing, the use of microcontrollers at the assembly and machine code level and programmable logic devices (FPGAs). We will also discuss data conversion techniques.

Course Notes: Physics 123b is the same course as Physics 223b; students may not take both for credit. If you are a graduate student, please enroll in 223b. Limited to 10 students. If you would like to take the course including the analog material, you should wait until it is offered as Physics 123 or ES153.

Class Notes: The course will consist of a combination of pre-recorded and live lectures. We will meet virtually twice a week for the live lectures or a review of the pre-recorded material, followed by the course lab. Students will work in breakout rooms in groups of two on the lab exercises. The instructor and course TFs will be available during the lab session to help students debug and understand their circuits.

David Abrams

2021 Spring (4 Credits)  Schedule:  TR 0130 PM - 0530 PM

Instructor Permissions:  Instructor  Enrollment Cap:  10

A lab-intensive introduction to digital electronic circuit design. Develops circuit intuition and debugging skills through hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. After a short introduction to the basics of electronic circuits and MOSFET switches, we move onto digital devices including logic families, Boolean arithmetic, combinatorial and sequential circuits including finite state machines. We continue with analog-digital interfacing, the use of microcontrollers in embedded systems and programmable logic devices (FPGAs). We will also discuss data conversion techniques.

Course Notes: Physics 123b is the same course as Physics 223b; students may not take both for credit. If you are a graduate student, please enroll in 223b. Limited to 10 students. The analog material will be offered as a separate course at a later date.

Class Notes: The course will consist of a combination of pre-recorded and live lectures. We will meet virtually twice a week for the live lectures or a review of the pre-recorded material, followed by the course lab. The instructor and course TFs will be available during the lab session to
help students debug and understand their circuits. Some familiarity with the C programming language or Arduino programming will be helpful in the microcontroller portion of the course but is not a requirement.

**Physics 125**

Widely Applied Physics (120167)

*David Morin*

2021 Spring (4 Credits)  

Instructor Permissions: None  

Enrollment Cap: n/a

Schedule: WF 1200 PM - 0115 PM

Uses physics to analyze important technologies and real-world systems. Stresses estimation and "back of the envelope" calculations, as are commonly used by research physicists. New physical concepts are introduced as necessary. Example topics: energy production and storage, nuclear physics, nuclear power and weapons, health effects of radiation, risk analysis, airplanes, spy satellites, rockets, fluids, water waves, mechanical design and failure, global warming, and cosmology. Emphasis is on developing physical intuition and the ability to do order-of-magnitude calculations.

Class Notes: Students who are unable to attend the W/F 12:00-1:15 lecture time due to incompatible time zones will be able to watch the lecture videos at other scheduled times (to be determined). These viewings will take place in groups where students will periodically work together on short problems, as they would do in the main lecture.

Recommended Prep: Physics 15a, b, c, and mathematics at the level of Mathematics 21a. Physics 143a and 181 are very helpful, and may be taken concurrently.

**Physics 131**

Computational Neuroscience (217838)  

*Haim Sompolinsky*
Follows trends in modern brain theory, focusing on local neuronal circuits as basic computational modules. Explores the relation between network architecture, dynamics, and function. Introduces tools from information theory, statistical inference, and the learning theory for the study of experience-dependent neural codes. Specific topics: computational principles of early sensory systems; adaptation and gain control in vision, dynamics of recurrent networks; feature selectivity in cortical circuits; memory; learning and synaptic plasticity; noise and chaos in neuronal systems.

Course Notes: Also offered this semester as Neuro 131, and in other semesters as MCB 131. Cannot be taken for credit as Physics 131 if Neuro 131 or MCB 131 is already complete.

Recommended Prep: Basic knowledge of multivariate calculus, differential equations, linear algebra, and elementary probability theory.

Requirements: Anti-Req: PHY131 and NEURO131

Physics 141

The Physics of Sensory Systems in Biology (121885)

Aravinthan Samuel

Living organisms use sensory systems to inform themselves of the sights, sounds, and smells of their surrounding environments. Sensory systems are physical measuring devices, and are therefore subject to certain limits imposed by physics. Here we will consider the physics of sensory measurement and perception, and study ways that biological systems have solved their underlying physical problems. We will discuss specific cases in vision, olfaction, and hearing from a physicist's point of view.

Class Notes: The scheduled class meetings (Tu, Th 9-10:15 EST) will be discussions of the material presented in the pre-recorded lectures and reading assignments. If any students are unable to attend at 9 AM (e.g., because of time zone), Prof. Samuel will hold a second class meeting later on Tuesdays and Thursdays (which will be regularly scheduled based on a student poll at the start of class). Attendance at either the 9 AM or later meeting is mandatory. Students are free to join both. All zoom meetings will be recorded and made available on the website. Class participation is expected either live during these class meetings or through online discussions on Slack. For more information about the course and the schedule, please see the Canvas site.

Recommended Prep: Math 21a,b, Physics 15, or by permission of the instructor.
Requirements: Anti-Requisite: Cannot be taken for credit if NEURO 141 already complete.

**Physics 143A**

Quantum Mechanics I (108465)

*Masahiro Morii*

2021 Spring (4 Credits)

Instructor Permissions: None

Enrollment Cap: n/a

Schedule: TR 1030 AM - 1145 AM

Introduction to nonrelativistic quantum mechanics: uncertainty relations; Schrödinger equation; Dirac notation; matrix mechanics; one-dimensional problems including particle in box, tunneling, and harmonic oscillator; angular momentum, hydrogen atom, spin, Pauli principle; and if time allows: time-independent perturbation theory; and scattering.

Class Notes: There will be a viewing session at a later hour, with a TF present to address questions, for those who cannot attend the 10:30 lecture due to their time zones.

Recommended Prep: Linear algebra including matrix diagonalization; Physics 15c or written permission of the Head Tutor.

**Physics 143A**

Quantum Mechanics I (108465)

*John Doyle*

2020 Fall (4 Credits)

Instructor Permissions: None

Enrollment Cap: n/a

Schedule: TBD

Introduction to nonrelativistic quantum mechanics: uncertainty relations; Schrödinger equation; Dirac notation; matrix mechanics; one-dimensional problems including particle in box, tunneling, and harmonic oscillator; angular momentum, hydrogen atom, spin, Pauli principle; and if time allows: time-independent
perturbation theory; and scattering.

Class Notes: Class times will be determined to maximize the overlap with students in different time zones.

Recommended Prep: Linear algebra including matrix diagonalization; Physics 15c or written permission of the Head Tutor.

Physics 143B
Quantum Mechanics II (111731)
Lisa Randall
2020 Fall (4 Credits) Schedule: WF 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

Introduction to path integrals, identical particles, many-electron theory, WKB approximation, time-dependent perturbation theory, scattering theory, relativistic quantum mechanics, and basics of quantum information.

Class Notes: Students who are unable to attend the WF 1:30pm - 2:45pm lecture time due to incompatible time zones will be able to watch the lecture videos at other scheduled times to be determined at the beginning of the semester. These viewings will take place in groups where students will periodically work together on short problems, as they would do in the main lecture.

Recommended Prep: Physics 143a.

Physics 145

Elementary Particle Physics (117719)

Melissa Franklin

2020 Fall (4 Credits) Schedule: WF 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Introduction to elementary particle physics. Emphasis on concepts and phenomenology rather than on detailed calculational development of theories. Starts with the discovery of the electron in 1897 and ends with the theoretical motivations for the Higgs boson, and attempts to cover everything important in between. Students will also have a brief experience of particle physics research using Atlas experiment open data.

Recommended Prep: Physics 143a. Physics 143b or equivalent is useful.

Physics 151

Mechanics (111231)

Arthur Jaffe

2020 Fall (4 Credits) Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

One can consider this course as a general introduction and overview to theoretical physics, even though it centers on the theoretical aspects of classical mechanics. We will study problems in the mechanics of
particle motion and also problems in continuum mechanics, including classical field theory. We will consider linear systems and non-linear ones. We stress the role of conserved quantities in studying the laws of physics, and emphasize the relation between conserved quantities and symmetry. We study Langrangian and Hamiltonian mechanics from the point of view of their relation to different fields of physics, including quantum theory. We discuss soliton solutions to some non-linear classical equations. Time permitting, we will discuss other non-linear phenomena that are important in physics.

Recommended Prep: Physics 15a, 15b or written permission of the Head Tutor; Mathematics 21a, b or equivalent.

Physics 153

Electrodynamics (111822)

Philip Kim

2021 Spring (4 Credits)

Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

Aimed at advanced undergraduates. Emphasis on the properties and sources of the electromagnetic fields and on the wave aspects of the fields. Course starts with electrostatics and subsequently develops the Maxwell equations. Topics: electrostatics, dielectrics, magnetostatics, electrodynamics, radiation, wave propagation in various media, wave optics, diffraction and interference. A number of applications of electrodynamics and optics in modern physics are discussed.

Class Notes: Prof. Kim will hold lectures for Physics 153 on Mondays and Wednesdays, noon - 1:15pm. Students who are unable to attend the main lecture due to incompatible time zones will be able to watch the recorded lecture videos (times to be determined at the beginning of the semester), together with a Teaching Fellow who will be able to answer any questions.

Recommended Prep: Physics 15a, b, and c, or written permission of the Head Tutor; Mathematics 21a, b or equivalent.

Physics 175

Laser Physics and Modern Optical Physics (121941)
Markus Greiner

2021 Spring (4 Credits) Schedule: WF 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

Class Notes: In 2021 students enrolling will get a lab/demo kit shipped home to carry out experiments and follow along with lecture demos (laser, diffraction, interference, polarization, geometrical optics etc. - fun!); Most likely the class will not be offered in 2022 but again in 2023.

Recommended Prep: Physics 15b, 15c, 143a, or permission of the instructor.

Physics 181

Statistical Mechanics and Thermodynamics (143450)

Matthew Schwartz

2021 Spring (4 Credits) Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

This course provides an introduction to statistical mechanics and thermal physics. It surveys the fundamental elements of classical and quantum statistical mechanics (ensembles and partition functions) and thermodynamics (temperature, heat, work, free energy) and their application to a variety of physical systems. Topics covered may include heat engines, solid-state physics, blackbody radiation, phase transitions, physical chemistry, stellar physics, quantum information, Bose-Einstein condensation, and transport phenomena.

Course Notes: May not be taken for credit in addition to Engineering Sciences 181.

Recommended Prep: Physics 143a or equivalent.

Physics 195

Introduction to Solid State Physics (112107)

*Julia Mundy*

2020 Fall (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a

Schedule: MW 0300 PM - 0415 PM

The physics of crystalline solids and their electric, magnetic, optical, and thermal properties. Designed as a first course in solid-state physics. Topics: free electron model; Drude model; the physics of crystal binding; crystal structure and vibration (phonons); x-ray diffraction; electrons in solids (Bloch theorem) and electronic band structures; metals and insulators; semiconductors (and their applications in pn junctions and transistors); magnetism; superconductivity.

Course Notes: Physics 195 is also offered as Applied Physics 195. Students may not take both for credit.

Class Notes: If 3-4:15 PM EST falls outside of 7 AM - 10:15 PM in a student's local time zone, we will provide an alternative viewing of the lecture with the TF. This will likely be held at 8 AM EST although exact time subject to enrollment. Please note, we not not anticipate being able to offer lecture time accommodations based on conflicts with other courses, commitments or preferences.

Recommended Prep: Physics 15a, 15b and 15c or the equivalent. Physics 143a. Physics 181 and Physics 143b (taken concurrently) helpful but not required.

Physics 201

Data Analysis for Physicists (161201)

*Vinothan Manoharan*

2021 Spring (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a

Schedule: MWF 1030 AM - 1145 AM

This course covers methods for analyzing experimental data. Students will learn both frequentist and Bayesian frameworks for statistical inference, modern computational methods such as Markov-chain Monte Carlo techniques, and the application to problems in particle physics, biophysics, condensed matter, applied physics, astrophysics, and other fields. The course emphasizes an intuitive, principled approach to data analysis and will involve discussions of ethics and reproducible research.

Course Notes: This course is suitable for students with limited or rusty programming skills. Students with more advanced programming skills may wish to take APMTH 207 or ENG-SCI 255.
Class Notes: Attendance is required on Monday and Wednesday lectures. The Friday course time is reserved for section.

Recommended Prep: Research experience commensurate with that of a first-year (or higher) PhD student in experimental physics. Students without such experimental experience must have taken Physics 191 or Physics 247 (or equivalent) first.

General Theory of Relativity (114266)

Jacob Barandes

2021 Spring (4 Credits) Schedule: MWF 0300 PM - 0415 PM

Instructor Permissions: None Enrollment Cap: n/a

An introduction to general relativity: the principle of equivalence, Riemannian geometry, Einstein's field equation, the Schwarzschild solution, the Newtonian limit, experimental tests, black holes.

Class Notes: Students who are unable to attend the M/W/F 3:00-4:15 lecture time due to incompatible time zones will be able to watch the lecture videos in groups at other scheduled times (to be determined).

Recommended Prep: Physics 143a (quantum mechanics), 151 (mechanics) and 153 (electromagnetism), and Mathematics 21 (multivariable calculus) or equivalents.

Physics 212

Cosmology (203431)

Cora Dvorkin
Graduate course on Physical Cosmology. Topics will include: the physics of Inflation, Cosmic Microwave Background anisotropies, evidence for Dark Matter, discovery of the accelerated expansion of the Universe, primordial gravitational waves, gravitational lensing, likelihood analysis, structure formation.

Class Notes: Lectures will be held live on Tuesdays and Thursdays 10:30am - 11:45am EST. Meeting times for sections (providing 2-4 hours of synchronous interaction) will be determined together with students enrolled in the class. Lectures will be based on a Flexible Live Lecture model. Lectures and sessions will be recorded.

Physics 223B
Electronics for Scientists (109346)

David Abrams

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0530 PM
Instructor Permissions: Instructor Enrollment Cap: 10

A lab-intensive introduction to digital electronic circuit design. Develops circuit intuition and debugging skills through hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. After a short introduction to the basics of electronic circuits and MOSFET switches, we move onto digital devices including logic families, Boolean arithmetic, combinatorial and sequential circuits including finite state machines. We continue with analog-digital interfacing, the use of microcontrollers at the assembly and machine code level and programmable logic devices (FPGAs). We will also discuss data conversion techniques.

Course Notes: Physics 223b is the same course as Physics 123b; if you are an undergraduate student, please enroll in 123b. Limited to 10 students. If you would like to take the course including the analog material, you should wait until it is offered as Physics 223.

Class Notes: The course will consist of a combination of pre-recorded and live lectures. We will meet virtually twice a week for the live lectures or a review of the pre-recorded material, followed by the course lab. Students will work in breakout rooms in groups of two on the lab exercises. The instructor and course TFs will be available during the lab session to help students debug and understand their circuits.

Advanced Electromagnetism (112263)

Girma Hailu

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

Maxwell's equations in macroscopic media, conservation laws, Green's functions, time-dependent solutions and radiation, scattering and diffraction, and gauge invariance. Time permitting: geometrical optics and caustics, negative refractive index materials and radiation from rapidly accelerating charges.

Class Notes: The lectures involve interactive discussions and quizzes, and attendance is required. Time will be chosen after surveying the students enrolled in the course.

Recommended Prep: Physics 153 and Applied Mathematics 105a, 105b, or equivalent.

Physics 248R

Topics in Experimental Particle Physics (109993)

Masahiro Morii

2020 Fall (4 Credits) Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a
Topics in the elementary particle physics, focusing on experimental studies of the Standard Model and new physics beyond the Standard Model in the past 20 years. Half of the course will review ongoing experimental research in particle physics, with or without accelerators. The other half will cover particle detector technologies and data analysis methods.

Class Notes: Class will meet at the listed time (Mon/Wed 9:00-10:15 AM). The lectures will be recorded, but students are strongly encouraged to attend in real time. The section time (or times) will be determined after the enrollment.

Recommended Prep: Physics 145 or equivalent, i.e. a course at the level of Griffiths, Introduction to Elementary Particles.

Physics 251A
Advanced Quantum Mechanics I (111314)

C. Vafa

2020 Fall (4 Credits) Schedule: MW 0300 PM - 0415 PM
Instructor Permissions: None Enrollment Cap: n/a

Basic course in nonrelativistic quantum mechanics. Review of wave functions and the Schrödinger Equation; Hilbert space; the WKB approximation; central forces and angular momentum; spins and their addition, measurement theory; the density matrix; perturbation theory.

Class Notes: Prof. Vafa will hold lectures for Physics 251a on Mondays and Wednesdays, 3:00pm - 4:15pm. The lectures will be recorded, and students who cannot attend the main lecture will have the opportunity to watch the lectures the following morning - Tuesdays and Thursdays, 8:00am - 9:15am, together with a Teaching Fellow who will be able to answer any questions. In addition, there will be two sections where TFs will go over the material.

Recommended Prep: Physics 143a, b or equivalent, or permission of instructor.

Quantum Field Theory I (122930)

Matthew Schwartz

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Introduction to relativistic quantum field theory. This course covers quantum electrodynamics. Topics include canonical quantization, Feynman diagrams, spinors, gauge invariance, path integrals, ultraviolet and infrared divergences, renormalization and applications to the quantum theory of the weak and gravitational forces.

Class Notes: Times listed are preliminary. Please fill out the survey under quizzes so we can get a better sense of the course needs. Prof. Schwartz will give live lectures twice a week, Tuesday and Thursday from 10:30-12pm EST. Lectures will be recorded. Attendance at live lecture is not mandatory but encouraged. The lectures will be reviewed the same days at 8-9:30pm EST by the head TF Arindam. Sections are Monday at 10:30am and 8pm EST.

Recommended Prep: Physics 143a, b or equivalents.

Physics 253B
Quantum Field Theory II (115442)
Xi Yin
2021 Spring (4 Credits)  Schedule:  WF 0130 PM - 0245 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

A continuation of Physics 253a. Topics include: states and local operators, the analytic S-matrix, IR divergence, effective action, non-Abelian gauge theories, renormalization group, spontaneous symmetry breaking and effective field theory, anomalies, and non-perturbative aspects of quantum field theories.

Class Notes:  The class will be taught through Zoom. Attendance of the lectures are required to allow for interaction between the students and the instructor. The course will include weekly discussion sessions with the TF at a time to be determined later.

Recommended Prep:  Physics 253a.

Physics 253CR
Quantum Field Theory III (118459)
Daniel Jafferis
2020 Fall (4 Credits)  Schedule:  TR 0130 PM - 0245 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

This course will cover a variety of topics related to conformal field theories, including: an introduction to conformal field theories and the conformal bootstrap with an emphasis on greater than two dimensions; large N expansions; the a-theorem; analytic bootstrap methods; a self-contained introduction to the AdS/CFT correspondence.

Class Notes:  The format of the class will be lectures at the set times via Zoom whiteboard with discussion strongly encouraged and attendance required, and an optional TF led section.

Recommended Prep:  Quantum field theory at the level of Physics 253a.

Physics 254
The Standard Model (109328)
Matthew Reece
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a
The Standard Model of particle physics: theory and experimental implications. Topics include nonabelian
gauge theory, spontaneous symmetry breaking, anomalies, the chiral Lagrangian, QCD and jets, collider
physics and simulation, the Higgs at the LHC.
Class Notes: Lectures and meetings providing 2-4 hours of synchronous interaction
will be determined together with students enrolled in the class.
Recommended Prep: Introductory relativistic field theory, at the level of Physics 253a.

Physics 262
Statistical Mechanics (110526)
Eugene Demler
2020 Fall (4 Credits) Schedule: MWF 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a
Basic principles of statistical physics and thermodynamics, with applications including: the equilibrium
properties of classical and quantum gases; phase diagrams, phase transitions and critical phenomena, as
illustrated by the liquid-gas transition and simple magnetic models. Time permitting, introduction to
nonequilibrium phenomena including Langevin dynamics and Boltzmann equation.
Course Notes: Also offered as Applied Physics 284. Either course can be used to satisfy the statistical mechanics requirement in the Physics PhD program or the Applied Physics model PhD program.
Recommended Prep: Physics 143a and Physics 181 or Engineering Sciences 181.

Physics 271
Topics in the Physics of Quantum Information (121970)
Mikhail Lukin
2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a
Introduction to physics of quantum information, with emphasis on ideas and experiments ranging from quantum optics to condensed matter physics. Background and theoretical tools will be introduced. The format is a combination of lectures and class presentations.
Class Notes: Students who are unable to attend the M/W 10:30 – 11:45 lecture time due to incompatible time zones will be able to watch the lecture videos at other times, attend sections and office hours. They will work in groups to solve homework problems and to prepare and deliver the class presentations during the class time and sections, which will also be recorded.
Recommended Prep: Quantum mechanics at the level of introductory graduate courses.

Physics 285A

Modern Atomic and Optical Physics I (118734)

Susanne Yelin

2021 Spring (4 Credits)  Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: None  Enrollment Cap: n/a

Introduction to modern atomic physics. The fundamental concepts and modern experimental techniques will be introduced. Topics will include: Two-state systems, magnetic resonance, interaction of radiation with atoms, transition probabilities, spontaneous and stimulated emission, dressed atoms, trapping, laser cooling. Structure of simple atoms, coupling to fields, light scattering. Fundamental symmetries and introduction to molecules and artificial atoms. Selected experiments. The first of a two-term subject sequence that provides the foundations for contemporary research.

Class Notes: No attendance requirements, synchronous class, traditionally taught. There will be various possibilities to interact with course personnel, the lectures will be recorded.

Recommended Prep: One course in quantum mechanics (143a and b, or equivalent).

Physics 287A

Introduction to String Theory (111191)

Xi Yin

2020 Fall (4 Credits)  Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: None  Enrollment Cap: n/a

Introduction to the perturbative formulation of string theories and dualities. Quantization of bosonic and superstrings, perturbative aspects of scattering amplitudes, supergravity, D-branes, T-duality and mirror symmetry. Also a brief overview of recent developments in string theory.

Class Notes: 287a will be taught through Zoom lectures at listed times, and an additional discussion session with the Teaching Fellow at a time to be determined. Attendance is required.

Recommended Prep: Physics 253a, b or equivalent.
Physics 289R

Topics in Mathematical Physics (118733)

Arthur Jaffe

2021 Spring (4 Credits)  
Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None  
Enrollment Cap: n/a

Over the past few years, the development of new mathematical picture languages led to insights in several fields, including quantum information, entanglement, entropy, error correction, uncertainty principles, Fourier analysis, and fusion algebras. This course will overview a number of these directions and develop several of these topics from scratch and in depth, relating them to statistical mechanics models and to quantum field theory.

Recommended Prep: Physics 253a.

Physics 295A

Introduction to Quantum Theory of Solids (127980)

Prineha Narang

2020 Fall (4 Credits)  
Schedule: MW 0900 AM - 1015 AM
Instructor Permissions: None  
Enrollment Cap: n/a

This is an introductory graduate level course in solid-state physics. Lattices and symmetries. Phonons. Electronic Structure of Crystals. Metals, semiconductors, and insulators will be covered. Electrical, optical, and thermal properties of solids will be treated based on an atomic scale picture and using the independent electron approximation. Additional topics from the theory of interacting electrons, including introduction to magnetism and superconductivity, and an introduction to topological insulators.

Class Notes:  
We will meet at the lecture times listed (MW 9-10:15am). Additional times for sections and seminal paper discussions will be based on student polls during the first week. Some (not all) lecture content will be recorded and made available to make class time more interactive and to better accommodate time zone differences. Recorded lecture content is not a replacement for in-class work. We will hold expanded
office hours and Q&A sessions this Fall.

Recommended Prep: Physics 181 or equivalent, Applied Physics 195 or equivalent, and a graduate level quantum mechanics course similar to Physics 251a. (Physics 251b would be helpful and may be taken concurrently.)

**Physics 295B**

Quantum Theory of Solids (127979)

*Subir Sachdev*

2021 Spring (4 Credits)  
Schedule: MWF 1200 PM - 0100 PM

Instructor Permissions: None  
Enrollment Cap: n/a

A course on the application of the principles of many-particle quantum mechanics to the properties of solids. The objective is to make students familiar with the tools of second quantization and diagrammatic perturbation theory, while describing the theory of the electron liquid, the BCS theory of superconductivity, and theory of magnetism in metals and insulators. Modern topics on correlated electron systems will occupy the latter part of the course.

Course Notes: Physics 295b is also offered as Applied Physics 295b. Students may not take both for credit.

Recommended Prep: Physics 251a,b, an introductory course in solid state physics, or permission of instructor.

Professional Writing for Scientists and Engineers (217830)

*Jenny Hoffman*  
*Suzanne Smith*

2021 Spring (4 Credits)  
Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor  
Enrollment Cap: 15

This class leads students to develop their skills in the critical reading and writing of science and
engineering. Genres will include research articles, grant proposals, school/fellowship/job applications, or lay abstracts & press releases for the non-scientific public. Crucially, students will be empowered not only to achieve their own writing goals, but also to break down these learned skills and impart them to others, as effective collaborators and mentors of younger students.

Course Notes: Also offered as Eng-Sci 297. We welcome graduate students and senior undergraduates! Enrollment is limited to 15 students. Tentative meeting time is 3-5pm on Weds, but may be updated based on student preference.

Subject: Physical Sciences

Physical Sciences 2

Mechanics, Elasticity, Fluids, and Diffusion (122575)

Louis Deslauriers  Gregory Kestin

2020 Fall (4 Credits)  Schedule:  TR 1200 PM - 0115 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

An introduction to classical mechanics, with special emphasis on the motion of organisms in fluids. Topics covered include: kinematics, Newton’s laws of motion, oscillations, elasticity, random walks, diffusion, and fluids. Examples and problem set questions will be drawn from the life sciences and medicine.

Class Notes:  Required primary class time will be 12:00 - 1:15pm, but with permission from the instructor students may instead attend the "interactive lecture viewing" 7:30pm -8:45pm, run by the head TF.

Recommended Prep:  Physical Sciences 1 (or Chemistry 7), Mathematics 1b, or the equivalent.

Physical Sciences 3

Electromagnetism, Circuits, Waves, Optics, and Imaging (122576)

Louis Deslauriers  Roxanne Guenette
This course is an introduction to electromagnetism, digital information, waves, optics and sound. Topics covered include: electric and magnetic fields, electrical potential, circuits, simple digital circuits, wave propagation in various media, microscopy, sound and hearing. The course will draw upon a variety of applications to the biological sciences and will use real-world examples to illustrate many of the physical principles described. There are six laboratories.

Course Notes: This course is part of an integrated introduction to the physical sciences intended for students who plan to pursue a concentration in the life sciences and/or satisfy pre-medical requirements in Physics. May not ordinarily be taken for credit in addition to Physics 1b, 11b, or 15b.

Recommended Prep: Physical Sciences 2 (or Physics 1a or 11a), Mathematics 1b, or equivalent.

Physical Sciences 12A

Mechanics and Statistical Physics from an Analytic, Numerical and Experimental Perspective (109274)

_Eftimios Kaxiras_
_Camille Gomez-Laberge_
_Anna Klales_

2021 Spring (4 Credits) Schedule: MWF 0900 AM - 1015 AM
Instructor Permissions: None Enrollment Cap: n/a

This is the first term of a two-semester introductory course in physics. The focus is on quantitative scientific reasoning, with the first term exploring Newtonian mechanics. Topics include kinematics, linear and rotational motion, forces, energy, momentum, collisions, gravitation, oscillations, waves, and a brief introduction to statistical physics. Examples are drawn from across the physical sciences and engineering.

Students will gain competence in both analytic (using pencil, paper, and single-variable calculus) and numerical methods (using the python programming language) to model simple physical systems and to analyze experimental data.

The course is aimed at first year students who have an interest in pursuing a concentration in the sciences or engineering. The course includes lecture, laboratory, and discussion components.

Course Notes: Physical Sciences 12a may not be taken for credit by students who have passed Physics 15a or 16.

Recommended Prep: This course presumes no prior experience with calculus-based
Students should be fluent in single-variable calculus at the level of Mathematics 1b.

This course presumes no prior experience with programming; however, we do expect students will regularly attend our Friday seminars to become proficient in Python, which will be used extensively throughout the course.

**Instructor Permissions:** None

**Enrollment Cap:** n/a

This is the second term of a two-semester course sequence of introductory physical science and engineering. The focus is on quantitative scientific reasoning, with the second term exploring classical electricity and magnetism. Topics include electrostatics and magnetostatics, analog circuits, electromagnetic fields, optics, and a brief introduction to quantum physics and its applications. Examples are drawn from across the physical sciences and engineering.

The course assumes familiarity with mechanics, statistical physics, and computational techniques covered in Physical Sciences 12a offered during Spring Term (see course description). Students will further develop competence in both analytic (using pencil, paper, and multi-variable calculus) and numerical methods (using the Python programming language) to model simple physical systems and to analyze experimental data.

The course is aimed at second year students who have an interest in pursuing a concentration in the sciences or engineering. The course includes lecture, laboratory, and discussion components.

**Course Notes:** May not be taken for credit by students who have passed Physics 15b or Physics 15c.

**Class Notes:** Physical Sciences 12b will follow a flexible live lecture model - lectures will be held at times shown, but attendance is not mandatory, and lectures will be recorded. Students have to attend mandatory laboratory sections and are expected to participate in sections / homework sessions led by Teaching Fellows. Labs and sections will be scheduled once we know in which time zones our students
live. Please see syllabus cover page on Canvas for more details.

Recommended Prep: Physical Sciences 12a, Applied Mathematics 10

**Physical Sciences  70**

Introduction to Digital Fabrication (215717)

*Nathan Melenbrink*

2021 Spring (4 Credits) Schedule: TR 0300 PM - 0415 PM

**Instructor Permissions:** Instructor Enrollment Cap: 15

A hands-on introduction to rapid prototyping, integrating physics and engineering, design, computer science and art. Students will learn to safely use software and hardware to fabricate programmable projects. Tools and topics will include electronic circuit design, 3D CAD, programmable microcontrollers, and wireless networking (Internet of Things). Additionally, students will learn operational principles for techniques such as laser cutting, 3D printing, and computer-controlled milling. Students will work with course staff to prepare their design files and remotely operate machines, after which the fabricated components will be mailed to them. Applications may include personal fabrication, product prototyping, fine arts and the creation of scientific research tools. The course will culminate with an individual final project, integrating as many of the weekly topics as possible. Each student will document work on each weekly topic in a personal website, thereby finishing the course with an online portfolio that not only illustrates their new skill sets, but also contributes to a collective repository of knowledge that serves as a foundation for continued learning.

Course website: [https://tinyurl.com/tasr7b6](https://tinyurl.com/tasr7b6)

Related Sections: In addition to class times, the course staff will be available for lab sections scheduled throughout the week. Students are required to attend at least one lab section per week to check in with course staff on their progress, and are otherwise free to attend as many additional sections as they like.

**Course Notes:**

Attendance is mandatory since safety training will occur during class times. Class will meet twice each week. The first meeting will consist of a brief discussion of the previous week's assignment in Breakout Rooms, followed by a short introduction to the current week's topic and assignment. The second meeting may include a short lecture but will primarily focus on a hands-on training session for the accompanying assignment. Meetings may also include appearances by guest presenters or experts on a particular topic.

**Recommended Prep:** There are no formal prerequisites for this course. Students are expected to provide their own laptop computer (tablets and Chromebooks are not sufficient for some of the software required for this course, but workarounds may be available -- please contact course staff with concerns). This course is accessible to those with no prior experience. For students already familiar with some of the topics, it will be an opportunity to explore further.

### Population Health Sciences 2000A

Quantitative Research Methods in Population Health Sciences I (203329)

Jarvis Chen  
Michael Hughes

2020 Fall (4 Credits)  
Schedule: TR 1130 AM - 0100 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 50  
This is part one of a two part core year-long quantitative methods course for the Population Health Science PhD students at the School of Public Health. The course integrates methods and concepts from the various disciplines represented by Population Health Sciences to equip students with the methodological tools to conduct their own research as well as collaborate across fields of study and areas of specialization. PHS2000A covers foundational statistical methods including linear and logistic regression, generalized linear models, survival analysis, longitudinal data analysis, and multilevel modeling. Discussion will be given to important concepts including sampling, measurement, model specification, interpretation, estimation, and diagnostics. Coursework will consist of two weekly lectures and a weekly lab session, problem sets, and exams. R is the main statistical computing software that will be used in the course.

Course Notes: This course is reserved for first-year PhD students in Population Health Sciences. Population Health Sciences PhD students are required to register for both semesters of this course and to achieve a final average grade of B or higher.

Requirements: Requisite: Course open to First Year GSAS (G1) Students Only
Population Health Sciences 2000B

Quantitative Research Methods in Population Health Sciences II (203330)

*Tyler VanderWeele*

*Jarvis Chen*

*David Canning*

2021 Spring (4 Credits)  

**Schedule:** TR 1130 AM - 0100 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 50

This is part two of a two part core year-long quantitative methods course for the Population Health Science PhD students at the School of Public Health. The course integrates methods and concepts from the various disciplines represented by Population Health Sciences to equip students with the methodological tools to conduct their own research as well as collaborate across fields of study and areas of specialization. Part two of the course focuses on scientific inference and causal reasoning in the population health sciences and will provide an overview of methods for sensitivity analysis, interaction, mediation, propensity scores, time-varying exposures, measurement and correction for measurement error, instrumental variables, regression discontinuity designs, difference-in-difference methods, time series, missing data, multiple testing, replication, and meta-analysis. Emphasis will be placed on understanding the basic definitions, assumptions, and methodology. Students will be referred to further readings and courses to gain more detailed understanding. Coursework will consist of two weekly lectures and a weekly lab session, problem sets, and exams. Various software resources will be used throughout the course, with R being the main statistical computing platform used. The course will prepare students to critically read through the empirical population health science literature, and to implement a number of different methods in their own research.

**Course Notes:** This course is reserved for first-year PhD students in Population Health Sciences. Population Health Sciences PhD students are required to register for both semesters of this course and to achieve a final average grade of B or higher.

**Requirements:** Requisite: Course open to First Year GSAS (G1) Students Only

Psychology
Subject: Psychology

Psychology 1
Introduction to Psychological Science (123941)

Steven Pinker
2021 Spring (4 Credits)
Instructor Permissions: None
Enrollment Cap: n/a
Schedule: TR 0130 PM - 0245 PM

Surveys the scientific study of human psychology. Introduces students to topics such as perception, consciousness, development, cognition, emotion, motivation, psychopathology, decision making, and social behavior. The course has been redesigned for 2021 to optimize online learning. Students will watch recorded lectures offline, and will interact with the professor twice a week to ask questions and explore controversies.

Requirements: Anti-Req: Cannot be taken for credit if SLS 20 already complete.

Psychology 1
Introduction to Psychological Science (123941)

Daniel Gilbert
2020 Fall (4 Credits)
Instructor Permissions: None
Enrollment Cap: n/a
Schedule: TR 0130 PM - 0245 PM

An introduction to the scientific study of human psychology, covering topics such as neuroscience, perception, learning, memory, emotion, decision-making, consciousness, sleep, cognitive development, psychopathology, language, mating, violence, cooperation, altruism, stereotyping, and prejudice. This course has been entirely re-designed for 2020 to optimize online learning. Students will watch pre-recorded lectures off-line. During the twice-weekly on-line sessions, students will interact with the professor, the teaching fellows, and a weekly celebrity guest.

Requirements: Anti-Req: Cannot be taken for credit if SLS 20 already complete.

Cognitive Neuroscience (126551)
Daniel Schacter
Elizabeth Phelps
2020 Fall (4 Credits) Schedule: MW 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a
How do our brains give rise to our minds? Specifically, how are mental processes related to neural activity? This course will explore these questions, as well as the methods by which cognitive neuroscience seeks to answer them. We will focus on processes within perception, attention, memory, language, action, emotion, and social cognition, and methods including neuroimaging, neuropsychology, and electrophysiology.
Course Notes: This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.
Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.
Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1

Psychology 971
Contemporary Issues in Psychology: Intensive Cross-level Analyses (113094)

Jill Hooley
Katherine Powers

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

Examines selected issues and phenomena in contemporary psychological research. Special attention to examining topics from a variety of perspectives, to reading primary sources in the field, and to developing thinking, writing, research, and discussion skills. This tutorial, or Psychology 975, is required of concentrators upon entering the concentration, normally in the sophomore year. Letter graded.

Course Notes: Students may take this course before formally declaring Psychology as their concentration. PSY 971 and PSY 975 are interchangeable for Psychology requirements.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

**Psychology 980AB**

Habits and Habit Change (212741)

*Jill Hooley*

*Katherine Powers*

2020 Fall (4 Credits) Schedule: R 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 16

This course will examine habits, habit formation, and habit change at several levels of analysis, including the biological (neurobiological and endocrine), psychological (emotional, cognitive, and behavioral), and socio-cultural levels. We will examine several different models of how habits are formed and look at different approaches for behavioral change that can either moderate or overwrite old habits and replace them with either more adaptive habits or with more mindful, less automatic (habitual) behavior.

Class Notes: The instructor is Shelley Carson, shcarson@live.com

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18
Psychology 980AC
Mood Disorders (212742)

Jill Hooley

Katherine Powers

2020 Fall (4 Credits)  Schedule:  TR 1030 AM - 1145 AM

Instructor Permissions: Instructor  Enrollment Cap: 16

Most of us feel sad or down from time to time, yet some of us experience clinical depression that can last months or years. Why are some people more vulnerable to developing depression than others? This course will draw on classic and cutting-edge empirical research to examine the etiology, symptom presentation, course, and treatment of mood disorders including depression, bipolar and related disorders.

Course Notes: Students who have taken PSY 1855/PSY 980JK Mood Disorders cannot enroll in this course.

Class Notes: The instructor is Stephanie Roberts, drstephanieroberts@gmail.com

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Jill Hooley

Katherine Powers

2020 Fall (4 Credits)  Schedule:  W 0945 AM - 1145 AM

Instructor Permissions: Instructor  Enrollment Cap: 16
In this course, we will explore how the family impacts psychopathology, including relapse, recovery, and resilience, for a member with a mental disorder. We will examine the relationship between the family and mental health conditions like anxiety, autism, depression, personality disorders, and schizophrenia from a life course and a family systems perspective. We will also examine these relationships by discussing the biopsychosocial features of the family that impact child and adolescent psychopathology. The course will focus on contemporary approaches to family life (e.g., dual-earner families, gender equality, LGBTQ+ families, etc.), and the role these approaches play in family functioning. The course will also examine the impact the current COVID-19 pandemic is having on family systems, as well as the increased need for telehealth services.

Class Notes: The instructor is John Knutsen, john_knutsen@g.harvard.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY18 or PSY1861

Psychology 980AH

Psychology of Cults (214498)

Jill Hooley

Katherine Powers

2021 Spring (4 Credits) Schedule: F 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 16

In November of 1978, 909 members of The People's Temple perished in Jonestown, Guyana after drinking Kool Aid laced with cyanide. David Berg of the Children of God convinced his followers to abandon their monogamous marriages, encourage pedophilia, and allow their children to be sex trafficked. How do certain groups convince people to harm and even kill themselves and their children? This course will explore the psychological mechanisms that enable cults to form and to take human belief and behavior to such extremes. What do cults share with other groups (mainstream religions, nations, everyday social interactions, etc.), and what makes them stand apart? In what ways are cults an environment in which many of our psychological tendencies (toward ingroup conformity, heuristic decision making, rationalization, etc.) are magnified? And what do cults reveal about the profound power of our social environment? We will examine case studies through the lens of empirical psychological science to uncover how psychological research can shed light on cult behavior, and how cult behavior can shed light on our everyday psychology.

Course Notes: The instructor is Bethany Burum, bethanyburum@gmail.com.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or PSY 1 or the equivalent of introductory psychology (e.g.
Psych AP=5 or IB=7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology 980JL

Clinical Psychology in Everyday Life (110203)

Jill Hooley
Katherine Powers

2020 Fall (4 Credits) Schedule: M 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 16

The goal of this course is to give you exposure to the types of evidence-based psychological interventions available for many clinical and non-clinical conditions, such as sadness, anxiety, substance use, and arguments with your significant other, with an emphasis this year on taking effective action in times of stress. Through this seminar, you will learn to notice and apply principles of psychological intervention to the world around you, not only in theory but also in practice. The seminar is not a self-help program or a training program for providing therapeutic services to others. Instead, the weekly discussions, exercises, and assignments will help you view the world through the lens of a scientist-practitioner – and apply those insights to everyday life in a scientific manner.

Course Notes: This is the same course as PSY 1852 Clinical Psychology in Everyday Life, which has been offered previously. Students who have taken 1852 cannot enroll in this course.

Class Notes: The instructor is Lauren Santucci, lsantucci@fas.harvard.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

One in 50 children is currently diagnosed with autism spectrum disorder (ASD), yet we still do not know what causes it, or how best to treat it. This course provides students with a broad, interdisciplinary exploration of ASD from infancy through adulthood. We explore three major themes: 1) the psychological and neurological drivers of ASD, including deficits in social cognition, executive function and perception; 2) the epidemiology and clinical practice of ASD, including diagnosis and treatment modalities, and individual and sex/gender differences; and 3) the personal and societal impact of ASD, including discussion of quality of life, neurodiversity, policy and advocacy. We will also explore the impact of the current COVID-19 pandemic for individuals with ASD and their families.

Course Notes: The instructor is John Knutsen, john_knutsen@g.harvard.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18
ultimate explanation (why is inconsistency uncomfortable?)—why did evolution or learning lead us to be this way? This course will examine proximate and ultimate explanations for classic social psychological phenomena and the insight that ultimate level explanations add, with a focus on how to test ultimate explanations convincingly.

Course Notes: This is the same course as PSY 1576 But Why? Ultimate Explanations for the Quirks of the Mind, which has been offered previously. Students who have taken 1576 cannot enroll in this course.

Class Notes: The instructor is Bethany Burum, bethanyburum@gmail.com.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or PSY 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology 980JT

How Hidden Incentives Shape the Mind: The Origins of Our Beliefs and Ideologies (207824)

Jill Hooley
Katherine Powers

2021 Spring (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 16

Why do our ideologies change when we are put in positions of power (e.g., victim dehumanization), or subordination (e.g., Stockholm Syndrome), or with peers with a different opinion (e.g., conformity)? Why are our moral and political ideologies so different across time and culture (e.g., the ideologies of ISIS members compared to Americans)? Why do we claim that our morals are logically justifiable when we cannot justify them (e.g., moral dumbfounding)? This course will explore the hidden incentives that can explain these and many other puzzling features of our beliefs and ideologies. Evidence from psychology, as well as philosophy, economics, history, and current events (including the election cycle), will demonstrate the crucial way that incentives outside of our awareness shape our beliefs and ideologies.

Course Notes: The instructor is Bethany Burum, bethanyburum@gmail.com.

This is the same course as PSY 1575 How Hidden Incentives Shape the Mind: The Origins of Our Beliefs and Ideologies, which has been offered previously. Students who have taken 1575 cannot enroll in this course.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.
Psychology 980RE

Psychological Resilience (217606)

Jill Hooley

Katherine Powers

2021 Spring (4 Credits)

Instructor Permissions: Instructor

Enrollment Cap: 16

Schedule: W 0300 PM - 0500 PM

This course examines the field of resilience research, paying close attention to evidence-based cognitive, emotional, interpersonal, and self-care skills that have been demonstrated to reduce risk of major psychological disorders, and promote psychological growth, in the face of adversity. We will examine resilience from different levels of analysis, including biological, psychological, and social levels. We will use two different approaches in our examinations: first, we will examine empirical research; second, we will employ the case study approach to learn from the lives of history's most resilient individuals. Some of the topics we will cover include personality and cognitive variables that promote resilience, coping styles, the role of family and social networks in resilience, brain mechanisms, gender differences, and resilience in families, organizations, and communities. We will conclude the course with an evidence-based resiliency toolkit of trainable skills to enhance resilience.

Course Notes: The instructor is Shelley Carson, shcarson@live.com.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology 980T

Eating Disorders (119717)

Rebecca Shingleton

2020 Fall (4 Credits)

Instructor Permissions: Instructor

Enrollment Cap: 16

Schedule: TR 0300 PM - 0415 PM
The goal of this course is to provide a comprehensive overview of DSM-5 feeding and eating disorders (EDs) with a primary focus on anorexia nervosa, bulimia nervosa, and binge eating disorder. We will explore the etiology (i.e., biological and environmental factors), symptom presentation, and empirically supported treatments across these EDs. Additional topics will include cultural considerations, gender and EDs, medical complications, impact of media/social media, and novel directions and treatments for these disorders.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18, PSY 1861 or Psyc S-1240 before enrolling in this course; or permission of instructor.

Psychology 1005

Health: A Positive Psychology Perspective (126556)

Ellen Langer
Why does it seem that some people are so resilient and content? This course looks at psychological and physical health from the perspective of Positive Psychology. The major focus will be on mindfulness theory and its relationship to stress/coping; illness/wellness; decision-making; and placebos. The medical model, the biosocial model, and a unified mind-body model will be compared to examine their role in becoming mindful and thus healthier, happier and less stressed.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1009
Psychology of Women (110216)

Nicole Noll

How does being a woman affect our behavior, our evaluations of ourselves, and our interactions with others? This course examines psychological science on women and girls in western industrialized societies, addressing such topics as gender stereotypes, girlhood, women and work, relationships, pregnancy and motherhood, mental health, violence against women, and women in later adulthood. We will consider these topics through an understanding of gender as a social construction, being mindful of the intersections of gender, sexuality, class, and race. Although focused on women’s lives and experiences, this course is highly relevant to people of all genders.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

Psychology 1012
Psychology of Music (213334)
Natasha Parikh

2020 Fall (4 Credits)  Schedule:  MW 1030 AM - 1145 AM
Instructor Permissions:  Instructor
Enrollment Cap:  40

Why do we turn to Adele when sad? Play classical music to help focus? Go sing karaoke on a night out with friends? Music has the ability to influence our emotions, spark creativity, and influence relationships with people around us. But what makes music so universal? In this course, we will examine how listening to music, playing an instrument, and composing new music affect and are affected by a person’s psychology. We will cover topics such as what makes music sounds happy vs. sad, how music can be used for therapy, and whether animals can actually dance along to music, through the lens of psychological science.

Recommended Prep:  The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Requirements:  SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

Psychology 1015
Psychology of Sleep (216078)
Garth Coombs

2020 Fall (4 Credits)  Schedule:  R 1200 PM - 0200 PM
Instructor Permissions:  Instructor
Enrollment Cap:  20

Sleep is arguably one of the most evolutionarily conserved behaviors across the animal kingdom. The average human will spend one third of their life sleeping (not to mention an average of 7 years spent in bed just trying to get to sleep). We all sleep, but what exactly is sleep and why do we spend so much time asleep? What happens when we don’t get enough sleep? What factors influence quality of sleep? Scientific evidence increasingly indicates the importance of sleep for cognitive performance and physical and mental health, and points to disrupted sleep as both a cause and consequence of mental illness. This course will delve into these scientific findings to address the "what" and "why" of sleep by drawing on key advances from psychological and neuroscientific perspectives.
Psychology 1016
Quarantine blues? Pandemic Life and Mental Health (216791)

Rebecca Shingleton
Natasha Parikh
2021 Spring (4 Credits)

Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Instructor
Enrollment Cap: 40

The COVID-19 pandemic has hit our world in unprecedented and unexpected ways. In this course, we will study the impact of COVID-19 on mental health and well-being through a clinical, social, and neuroscience lens. We will explore how pandemics affect our thoughts, behaviors, emotions, and physiology as well as discuss evidence-based tools for coping. Additionally, we will look at different stressors (e.g., work from home challenges, social isolation) and how their impact may vary across groups (e.g., health care workers, racial/ethnic groups, SES groups).

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1017
Nature Can Nurture: Fostering an Ecological Worldview (217526)

Jacob Rode
2021 Spring (4 Credits)

Schedule: R 0600 PM - 0800 PM
Instructor Permissions: Instructor  Enrollment Cap: 18

Ever wonder why taking a walk on the beach, or in a park, or through trees, makes you feel restored and renewed? Does a short trip outside improve your mood? Although popular media encourages people to get outside and explore nature, it is unclear how many of these claims about nature are actually backed by research. Students taking this course will review research on these topics through the lens of conservation psychology, a field that focuses on the relationship between humans and nature and applies traditional psychological principles to issues of environmental degradation. Students will explore the history of conservation psychology as well as its various subfields and current approaches within the field. Additionally, students will apply principles of conservation psychology to their everyday lives and engage with emerging research in the field to find ways of improving and pushing the field forward. From recycling to energy efficiency to habitat preservation, conservation will be a key theme in this course. As climate change continues to threaten ecological health, we will explore how to leverage psychological insights to enrich the human-nature relationship.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

**Psychology 1025**

Masterclass on Mindfulness (216436)

Ellen Langer

2020 Fall (4 Credits)  Schedule:  W 0900 AM - 1100 AM

Instructor Permissions: Instructor  Enrollment Cap: 5

After taking a deep dive into what we already know about mindfulness without meditation, we'll explore student generated topics of interest that might include areas like sports, leadership, relationship success, best approaches to learning, innovation, ways to extend our senses, nonmedical healing, etc. No matter what we are doing, we are doing it mindfully or mindlessly. Thus the potential range of topics to be considered is great. Inspired by the Oxford tutorial system, enrollment for this special seminar will be limited to five students.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Requirements:  SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18
Psychology 1201
Your Brain on Drugs: Psychopharmacology (122224)

Scott Lukas
2020 Fall (4 Credits) Schedule: MW 0430 PM - 0545 PM
Instructor Permissions: None Enrollment Cap: n/a

An introduction to how drugs affect mood, sensation, consciousness, and other psychological and behavioral functions in both healthy and disease states. Introduces concepts in neuroscience and pharmacology to understand how drugs are used to treat drug abuse, psychiatric disorders and why individuals use recreational drugs. Covers all CNS drugs, including antidepressants, antipsychotics, alcohol, and both licit and illicit drugs of abuse. Debates controversial topics such as research with psychiatric populations, diagnosing ADHD, teenage suicide, marijuana legalization, and needle exchange programs.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 18, MCB/NEURO 80, MCB 81 or Psyc S-1240 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY18 or MCB80 or NEURO80 or MCB81 or Psyc S-1240

Psychology 1304
Brain Damage as a Window into the Mind: Cognitive Neuropsychology (116622)

Alfonso Caramazza
2020 Fall (4 Credits) Schedule: T 1200 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

Examines the patterns of perceptual, motor, cognitive, and linguistic impairments resulting from brain damage. The focus is on the implications of the various types of neuropsychological deficits (such as visual neglect, dyslexia, and aphasia) for theories of the mind and the functional organization of the brain.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 18, MCB/NEURO 80, MCB 81 or Psyc S-1240 before enrolling in this course; or permission of instructor.
Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, MCB 80, or MCB 81 before enrolling in this course; or permission of instructor.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or MCB80 or NEURO80 or MCB81

Psychology 1305

Evolutionary Psychology (156054)

Max Krasnow

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

Why are humans the way we are? What explains why we get angry, who we find attractive, and why we think the way we do? How are we different than other species, how are we the same, and why? In this course, students will master the foundational logic of evolutionary psychology and come away able to answer these questions and more. We will cover topics across the range of human experience including: cooperation, mating, friendship, aggression, warfare, collective action, kinship, parenting, social learning, dietary choice, spatial cognition, reasoning, emotions, morality, personality and individual differences, and culture. We will close by considering how our new understanding of human nature can help us solve problems in our world (for example, how understanding human coalitional psychology offers solutions to modern day political polarization).

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

Psychology 1309

Essentials of fMRI for Cognitive Neuroscientists (207573)

Talia Konkle
With functional magnetic resonance imaging (fMRI), we can now see into the human brain and map activity across different regions. If you are using fMRI in your research, or think you may want to in the future, this course will cover the critical aspects of neuroimaging with the goal of making you an informed practitioner. In the first part of the course, we will cover content including signal acquisition, experimental protocol design and power, and the general linear modeling framework for data analysis. In the second part of the course, we will survey the recent advances in fMRI data analysis, e.g. multivariate analyses, voxel-wise encoding models, functional connectivity analyses. Depending on your level of experience, you will complete a project that employs one of these techniques, either on your own dataset, or from datasets available online.

Course Notes: This course is intended for both advanced undergraduates and graduate students.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, MCB/NEURO 80, or MCB 81 before enrolling in this course; or permission of instructor.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or MCB80 or NEURO80 or MCB81

Psychology 1311

Precision Cognitive Neuroscience: Opportunities Afforded by Deep, Intensive Study Within Individuals (217604)

Randy Buckner

What are the opportunities afforded by doing experimental work fully within an individual rather than the more traditional approach of seeking central tendencies in groups? The field of cognitive neuroscience, like many others, confronts a tension between questions and experimental approaches that seek to generalize across individuals versus those that seek to describe detailed characterization within the individual. In this seminar historical perspectives and recent technological advances will be surveyed to showcase the opportunities, limitations, and unmet challenges of precision exploration within the individual. Discussions will begin from a historical perspective, then survey examples where breakthroughs were made from case studies (neuropsychology) and small N samples (neurophysiology), and then progress into approaches that allow precision neuroscientific exploration (including intensive repeat scanning as in the MyConnectome project) and dynamic behavioral phenotyping using wearables and new remote testing technologies. Challenges including how to frame hypotheses, considerations of the goals toward generalization, and discussion of new statistical approaches will be included in the readings. At the end of this seminar students will achieve practical knowledge of how within-individual experimental designs can
complement the more commonly implemented group-based studies and ways to think about combining the strengths of both approaches.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1315

Special Seminar: Sex, Gender & Evolution (216435)

Max Krasnow

2020 Fall (4 Credits) Schedule: M 0900 AM - 1100 AM

Instructor Permissions: Instructor Enrollment Cap: 5

Why did so many species evolve to have two sexes? Why is sex dichotomous in our gametes, but continuous in our bodies and behavior? Did we evolve to have a sense of our own gender identity, and if so, why? In this special seminar we will take a deep dive into these questions and more. We will meet weekly for small group discussion. After mastering the foundational material, students will collaboratively decide the direction the course takes, bringing in their outside interests and expertise. Inspired by the Oxford tutorial system, enrollment for this course will be limited to five students.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1322

Tomer Ullman
Life is full of decisions, but not all decisions are made equal. Choices can be big and consequential (should I focus on my success, family, or passion), or small and everyday (going out, or staying in). This course will introduce you to the cognitive science of judging and choosing. You will learn about 1) Rational planning, the kind a perfect intelligence might carry out 2) Common simplifications and shortcuts that non-perfect humans use, and how these may actually be appealing approximations for any decision-making system 3) Regret over choices taken and not taken 4) Making decisions with others 5) Transformative decisions, the ones that change who you are as a person. As we cover these topics, we will consider how to apply the insights from the psychology of decision making to your own ordinary and extraordinary choices.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

Psychology 1325

The Emotional, Social Brain (216792)

Elizabeth Phelps

Emotions color our lives, and even everyday variation in emotional experience can influence how we think, perceive and decide. Many of our emotions stem from our experiences with others. In this seminar we will examine the science behind the influence of emotion and social interaction on human brain function and behavior. We will examine questions such as: How does the brain process threats, and how do we learn about potential threats from others? How, and why, do our memories for emotional events differ from memories for mundane events? How does the brain process rewards, and respond to social rewards such as trust? What can we learn about implicit social biases from understanding their representation in the brain? What can we learn about the brain systems of human emotion and social interactions from studying other animals? Building on this foundational knowledge, we will explore how advances in human brain science might inform larger societal issues, including legal decisions, clinical interventions for the treatment of anxiety, and racial bias.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one
People spend much of their time in make-believe worlds: children pretend, adults daydream, and both immerse themselves in movies and novels. The imagination plays a large role in our mental lives, different from perception and memory. This seminar will examine imagination, simulation, and pretense from the perspective of modern psychology and cognitive science. We will consider imagination from its infancy in children's play, through its use and abuse in adulthood, up to recent attempts to give machines the ability to imagine and dream.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

Psychology 1352

Foundations of Cognitive Neuroscience Research (121887)

Randy Buckner

2020 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 12

Schedule: TBD

---

Harvard University

Page 3224 of 4008

3/13/2021 0:22 AM
Intended for undergraduates or those with limited background in cognitive neuroscience. Students will attend and participate in laboratory research and in a seminar that includes discussion of active scientific projects, recent important journal articles, and didactic lecture on technical aspects of methods central to cognitive neuroscience research. Readings will be assigned that survey basic principles of system neuroscience, cognitive science, and methods including functional MRI, MEG, and single unit physiology.

Course Notes: Limited to students involved in research.

Recommended Prep: Psychology concentrators should have taken SLS 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, Science of Living Systems 15, or MCB 80 before enrolling in this course; or permission of instructor.

Requirements: Pre-Requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18 or SLS15 or MCB80 or NEURO80

Psychology 1401
Computational Cognitive Neuroscience: Building Models of the Brain (160656)

Samuel Gershman

2021 Spring (4 Credits)  Schedule:  WF 0130 PM - 0245 PM

Instructor Permissions: Instructor  Enrollment Cap:  48

"What I cannot create, I do not understand." This course applies Richard Feynman's dictum to the brain, by teaching students how to simulate brain function with computer programs. Special emphasis will be placed on how neurobiological mechanisms give rise to cognitive processes like learning, memory, attention, decision-making, and object perception. Students will learn how to understand experimental data through the lens of computational models, and ultimately how to build their own models.

Course Notes: Anti-Requisite: Cannot be taken for credit if Neuro 1401 already complete.

Class Notes: PSY 1401 is also offered as Neuro 1401. Students may not enroll in both.

Recommended Prep: Students be comfortable with a numerical programming language (e.g., Python, Matlab, R). Psychology concentrators should have taken Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, MCB/NEURO 80 or MCB 81 before enrolling in this course; or permission of instructor.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18 or MCB80 or
Psychology 1410
Masterclass on Artificial Intelligence and Deep Learning (217872)

George Alvarez

2021 Spring (4 Credits)  Schedule: R 0300 PM - 0530 PM
Instructor Permissions: Instructor  Enrollment Cap: 5

For decades, the field of artificial intelligence had a relatively modest impact on the world (the so-called AI Winter), but recent advances in deep learning are revolutionizing fields of science, technology, medicine, and neuroscience. Now, more than ever, it's important to distinguish between hype and true scientific breakthroughs, and to understand the nature of this technology that promises to change how we solve the biggest puzzles and address the biggest problems facing humanity. In this course, you'll learn how deep learning enables machines to perform complex tasks, from visual perception, to language processing, to playing strategic games, with a focus on understanding the ways in which these systems achieve human-like, sometimes supra-human, and sometimes (embarrassingly) sub-human levels of performance. You will learn about these topics by doing a deep-dive into primary readings from the fields of artificial intelligence and cognitive science, and by doing hands-on deep learning workshops (no coding experience required). Inspired by the Oxford tutorial system, enrollment for this course will be limited to five students.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Film and television shows often capture the cutting edge of science, and they sometimes even anticipate future scientific advances. We'll use examples from film and television as an introduction to several hot topics in the field of neuroscience, such as Mind Control, Mind Reading, Smart Pills, and Brain Machine Interfaces, which are all getting closer to reality. Will neuroscientists ever be able to control a person's thoughts, or to know what a person is thinking? Can taking a pill really awaken untapped brain power? Will you ever be able to drive a car without touching a steering wheel? In this course, we will cover the state of the art and the future of these exciting areas of neuroscience (and entertainment). Because these are not textbook topics, this is an advanced course that will focus on reading and discussing the primary literature.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14 or MCB/NEURO 80 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or MCB80 or NEURO80

Psychology 1503

Psychology of Close Relationships (107602)

Holly Parker

This course is an in-depth exploration of close relationships. Examples of topics to be covered include the biological bases of attraction; relationship formation; the end of relationships through break-up, divorce, or death; relationship satisfaction; deception; gender roles; same-sex relationships; loneliness; relationships and well-being; and public perceptions about relationships. You will have an opportunity to explore these topics primarily through critical examination of the empirical literature as well as through popular press.

Class Notes: This course has been entirely re-designed for 2020 to optimize online learning. Students will watch pre-recorded lectures at their convenience, and there will be three weekly, synchronous online sessions (lasting one hour each) to help build a sense of community and explore the world of close relationships. One session will involve section presentations and interaction with a teaching fellow, a second optional meeting will involve a dedicated hour for students to connect with each other and explore what they're learning about close relationships, and another optional third meeting will involve conversations with the instructor. In addition, the instructor will be available for office hours to connect, explore the field of close relationships, and answer questions.
Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

**Psychology 1518**
Defectors, Cheaters, and Thieves: Why Cooperation is Hard and Why Humans are Good at It (213254)

Regan Bernhard

2020 Fall (4 Credits) Schedule: T 0345 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 40

On January 2nd, 2007, Wesley Autrey was waiting for the subway in Manhattan with his two young daughters when he saw a man have a seizure and fall onto the subway tracks. As a train approached, Autrey dove onto the tracks, and threw his body over the other man, shielding him from the train as it passed over them. This act of heroism could have cost Autrey his life, leaving his two daughters without a father, and he had nothing to gain from saving the other man. Yet humans from all cultures around the world are willing to pay personal costs to provide benefits for other individuals or for the greater good. In this class we will seek to understand why humans engage in cooperative behavior, covering topics such as altruism, punishment, reputation, and moral emotions. We will do this in two ways: First by learning about the empirical research on the psychology of cooperation, and second, by examining the psychology of cooperation in movies, literature, history, and the news.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

Psychology 1519
Psychology of Competition and Peak Performance (213353)

Emily Hangen

2020 Fall (4 Credits)  Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: Instructor  Enrollment Cap: 40

Competition is ubiquitous: athletes compete on the sports field, dancers and actors audition for coveted roles, candidates vie for employment or political positions, businesses compete for profit, and students compete for scholarships and program admission. Why do some individuals choke under the pressure of competition, while others thrive? How does having an audience or competitor watching you affect how well you perform? In this course we will elucidate the relation between competition and performance in discussions of social comparison theory, social facilitation, goal adoption, the opposing process model of competition, performance under stress, deliberate practice, how individuals react to failure, and more. You will develop a scientifically-grounded understanding of how competition affects motivation and performance and learn practical, evidence-based tips for how to reach your own peak performance.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

Psychology 1520
Responsibility (215852)

Fiery Cushman

2020 Fall (4 Credits)  Schedule: F 0900 AM - 1145 AM
Instructor Permissions: Instructor  Enrollment Cap: 20

People effortlessly assign responsibility. Who blew the lead in the 4th quarter? Which state cost our candidate the election? Should this cop go to prison because her bullet hit a bystander? Why was this January the warmest of the century? We will study current psychological theories of how people assign responsibility, why they do it like that, and why it matters. Central topics include moral judgment, causal reasoning and mental state attribution.

Course Notes: Advanced undergrad seminar open to grad students if interested

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from MCB 80, MCB 81, PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course;
Psychology 1521
Political Polarization and Misinformation (216446)

Jacob Rode

2021 Spring (4 Credits)

Schedule:  M 0645 PM - 0845 PM

Instructor Permissions:  Instructor
Enrollment Cap:  16

Uncertain times call for trusted facts. How can facts be verified? What happens when scientific information becomes politicized? Are some people especially susceptible to believing fake news? Bringing together perspectives from political psychology, social psychology, moral psychology, and intergroup relations, this course will explore the psychology behind political polarization, especially in relation to facts and the public understanding of scientific information. We will consider the role of individual psychology (e.g., conspiratorial thinking) and group processes (e.g., partisan bias) in delivering and perpetuating the politicization of facts. There will be particular focus on the politicization of facts within current events such as COVID19, climate change, vaccines, and elections. Students will have the opportunity to evaluate and design evidence-based interventions for bridging polarization and combating misinformation.

Recommended Prep:  The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Requirements:  SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18

Psychology 1525
Psychology for a Sustainable Future (216386)

Jacob Rode
The ongoing rise of the average global temperature has led to—and will continue to lead to—more frequent and severe flooding, droughts, habitat loss, and societal impacts such as wars, famine, and clean water scarcity. How did this happen? What can we do? This course focuses on the role that human psychology has played in ecological destruction and, in turn, highlights how psychological science can help solve the global environmental crisis. We will combine research from social, behavioral, and personality psychology to understand the individual and group-level psychological processes that hinder or bolster green behaviors. A central goal of this course is to equip students with the tools and scientific expertise to increase their own sustainable behaviors and to evaluate and promote sustainability efforts in society at large.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

**Psychology 1531**  
Inequality and Intergroup Relations (216447)  
Jennifer Perry

What happens in the shift from a self-identity to a collective identity? In this course we will discuss the psychological processes that affect how thinking in terms of "us and them" gives rise to and perpetuates systems of power and inequality in our society, with special focus on current events and social movements (e.g., Black Lives Matter). We will take an interdisciplinary approach to studying these topics, drawing from literature in psychology, sociology, and political science. Students will be challenged to design an applied intervention to reduce societal inequality in their own communities, and in a relevant domain of interest (e. g., criminal justice, voting, education, or healthcare).

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18
Psychology 1535

Psychology of Social Connection and Belonging (216434)

Jennifer Perry

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 35

We are living under extraordinary psychological circumstances. As we fumble through Zoom goodbyes, we are constantly reminded that human interaction informs much of how we think, feel, and behave. In this course, we will discuss humans' fundamental drive to form social connections, ranging from casual interactions, to building and maintaining relationships, to the loss or total absence of social contact. In doing so, we'll identify factors that can facilitate or challenge the ability to form social connections and will explore parallels and differences in online interactions. This course will incorporate weekly practicum activities rooted in psychological science that encourage students to build strong social connections through direct experience.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Implicit Bias: Science and Society (217787)

*Mahzarin Banaji*

2021 Spring (4 Credits)  

Schedule: M 1200 PM - 0200 PM

The term implicit bias was coined in 1995 to capture the idea that bias, i.e., a deviation from truth or shared values can be implicit, i.e., occur without conscious awareness and/or conscious control. It belongs to an area of scientific psychology named implicit social cognition (ISC), dedicated to exploring the hidden aspects of the mental representation of social groups. Today, 25 years later, the term implicit bias has transcended academic psychology and permeated contemporary culture (set your Google Alert to "implicit bias" to see the daily entries that arrive) to refer to unintended actions that nevertheless create harm and lead to disparities along the lines of social group membership, e.g., age, gender, sexuality, race, ethnicity, socioeconomic class, physical attributes, religion, politics, language and culture, geographic region and nationality. The course will provide an introduction to the science of implicit bias: its origin and break from previous ways of thinking about the human mind, basic theoretical concepts, dominant methods, and noteworthy discoveries. In parallel, the course will offer students the opportunity to explore the societal impact of implicit bias in domains such as employment, healthcare, education, law and law enforcement, and the daily task of living. The requirements of the course are geared toward achieving these goals: (a) sharpening analytic and ethical thinking with a focus on the science itself, (b) regular writing and speaking exercises, and (c) creating products of social value such as entries for Wikipedia and teaching modules for outsmartinghumanminds.org.

**Recommended Prep:** The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one
foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1556R
Research Seminar in Implicit Social Cognition (127489)

Mahzarin Banaji

2020 Fall (4 Credits)  Schedule:  TBD

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

An introduction to research on implicit social cognition, with special focus on attitudes, beliefs, and identity and in some cases its applications to law, business, medicine, and government. Students will be paired with individual researchers to work on ongoing projects that can turn into more independent projects. In addition to weekly work in the laboratory, students are expected to attend biweekly discussion groups focusing on current issues and directions in the laboratory as a whole.

Class Notes:  To express interest in enrollment, please email the instructor at mahzarin_banaji@harvard.edu prior to the first class meeting.

Psychology 1584

Leadership Decision Making (205646)

Jennifer Lerner

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 25

Organizational leaders make decisions involving risk and uncertainty every day. Whom should our organization hire? Should we choose the gamble or the sure thing? How should we structure accountability systems? How do we avoid operating out of fear? But a leader’s impact only goes so far unless s/he takes steps to engineer optimal decision environments for the organization as a whole. By gaining an understanding of fundamental mind-brain-behavior relationships in judgment and decision making, you will become better able to design decision environments that make everyone smarter - i.e., less susceptible to common errors and biases. Taking this course will not tell you what to choose but it will give you frameworks that reveal how to choose and how to structure optimal decision environments. Specifically, course topics will include (a) fundamental mental processes in perception, memory and context dependence; (b) how questions affect answers; (c) models of decision making; (d) heuristics and biases; (e) social and group influences; (f) common traps; and (g) debiasing techniques. We will also discuss emotional influences on decision making. The lectures and discussions will be coordinated to complement weekly readings, which draw from psychology, behavioral economics, and neuroscience. Throughout the course, the overarching goals are to: (1) Learn about the academic field of behavioral decision making, its major theories, results, and debates. (2) Become a critical consumer of research findings, learning methodological standards for evaluating the soundness of empirical studies. (3) Develop the ability to effectively write and speak about behavioral science theories, results, and debates. (4) Acquire practical skills for improving your own judgments and decisions. (5) Acquire knowledge of which biases individuals can fix with training/knowledge and which biases individuals cannot fix unless leaders engage in institutional design (e.g., nudges). (6) Develop a capstone project in which you apply the material in a way that will improve professional decision making processes. Possible applications to legal process, government institutions, medical settings, public health, education, finance and other domains abound.

Course Notes: Also offered by the Harvard Kennedy School as MLD 301. Doctoral students will have customized assignments and an additional meeting time in order to receive credit.

Recommended Prep: For undergraduates, the Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Two-year-olds are among the most anti-social people on earth. They respond to the smallest slight with screaming, thrashing, kicking, and spitting. They take what they want, when they want it without concern for others. They hit and bite other children just to see what will happen. Yet, psychological research also shows that even very young babies prefer those who help to those who harm, suffer when they see others in pain, favor equal allocations of resources, and expect good actions to be rewarded and bad actions to be punished. What explains this discrepancy? In this course we will explore the science of social development focusing specifically on what aspects of social cognition might be innate and which likely develop through childhood. Topics include the development of fairness, morality, theory of mind, empathy, cooperation and punishment, and harm aversion.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1591

The Power of Others: Social Influence and Persuasion (213355)

Emily Hangen

2021 Spring (4 Credits) Schedule: TR 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 20

This is an intensive, half-term seminar that runs during the first 7 weeks of the semester (from Jan. 25-Mar. 12). How does social psychological research contribute to our understanding of courtroom decisions, shopping habits, and guide effective leadership? What are the key ingredients of effective persuasion? This intensive, half term seminar explores the powerful impact other people have on our thoughts, attitudes, and behaviors. Students will gain familiarity with a breadth of scientific findings on influence such as framing, reciprocity, social proof, and commitment. Students will create a podcast utilizing or describing how to apply two of these techniques as their capstone assessment. In addition to developing a deeper understanding of the science of persuasion, students will use this empirical basis to deliberate on how to leverage and resist social influences in their everyday lives.

Course Notes: This is a full credit, half term course.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

What Infants Know, How Children Learn (125979)

Elizabeth Spelke

2021 Spring (4 Credits)  Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor  Enrollment Cap: 16

Despite recent advances in computer science and machine learning, human infants remain the most prodigious learners on the planet. This seminar considers the origins and nature of human cognitive development in four broad domains: knowledge of objects and their physical relationships, knowledge of people and social relationships, knowledge of geometry and the larger spatial layout, and knowledge of numbers and mathematics. We will discuss how these foundational cognitive building blocks support humans' ability to explain, understand, and generalize, skills that are critical for successfully navigating our surroundings. Understanding these core psychological competencies has become essential to progress in many areas of society, including efforts to improve education, to create digital "cognitive assistants" who help us navigate, plan, and remember things, and to develop human-like artificial intelligence. Building on findings from basic research, we will consider how each of these efforts can be advanced.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1

Psychology 1815

Special Seminar: Clinical Psychological Science (216440)

Matthew Nock

2020 Fall (4 Credits)  
Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor  
Enrollment Cap: 5

In this course we will study foundational questions in clinical psychological science, such as: What is mental illness? How does it develop and change over time? How is it best treated and how do our most effective treatments actually work? What can be learned from basic and applied research and what are the limitations of each? After covering key readings on these and related topics, the direction of the course will be driven by student interests and input. Inspired by the Oxford tutorial system, enrollment for this course will be limited to five students.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY18 or PSY1861

Psychology 1845

Stigma, Discrimination, and Health (216272)

Mark Hatzenbuehler

2021 Spring (4 Credits)  
Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None  
Enrollment Cap: n/a

What is stigma? How do stigmatized identities and conditions differ from each other? Why do we stigmatize? What are the consequences of stigma for cognitions and emotions, for social relationships, and for health? Through what mechanisms—individual, interpersonal, and structural—does stigma operate to produce adverse health outcomes? How do stigmatized individuals cope with and resist stigma? How can we reduce stigma and its negative effects? In this course we will consider stigma as a fundamental cause
of health inequalities across a broad range of phenomena, including (but not limited to) mental illness, sexual and gender diversity, weight, disability, aging, poverty, and immigration status. Students can expect to examine stigma as a predicament that affects nearly all individuals at some point in the life course, and to develop expertise in an individual stigma that is relevant to their personal, academic, and professional interests through a series of focused course assignments.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1

Psychology 1857

Psychotherapy: Science and Practice (160646)

John Weisz

2020 Fall (4 Credits) Schedule: T 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 15

Would you pay someone to help you change? Millions of people do, every week. Psychotherapy is a healing art, a subject of scientific inquiry, and—for many—a business venture. In this course we will bring these strands together, focusing on how psychotherapy is practiced in the real world and how clinical science is used to test claims of success. We will examine competing models of therapy, evaluate their scientific status, and dig into case examples of each. We will also explore hot topics in the field, including whether all therapies have about the same effect (the “dodo bird” hypothesis), whether internet-based therapies actually work, and how to get effective therapies to traumatized people in war-ravaged and low-resource countries.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY18 or PSY1861

Developmental Psychopathology (116095)

John Weisz

2021 Spring (4 Credits)  Schedule: TR 1200 PM - 0115 PM
Instructor Permissions: None  Enrollment Cap: n/a

We all have richly complex personalities that blend strengths with anomalies. This course examines the nature and origins of psychological anomalies, problems, and disorders that emerge during childhood, adolescence, and youth. Topics include anxiety, OCD, depression, conduct disorders, ADHD, eating disorders, autism, and responses to maltreatment and trauma. Coverage of each topic includes characteristics, causes and correlates, and effective treatments. Personal application of the concepts and findings is encouraged and supported.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1), or permission of instructor, before enrolling in this course.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1

Psychology 1900
Introduction to Statistics for the Behavioral Sciences (118254)

Thomas Rusch

2021 Spring (4 Credits)  Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: None  Enrollment Cap: n/a

Provides a conceptual and practical introduction to statistics used in psychology and other behavioral sciences. Covers basic topics in statistics including: measures of central tendency and variability; probability and distributions, correlations and regression, hypothesis testing, t-tests, analysis of variance, and chi-square tests. Includes a lab section with instruction in statistical analysis using a computer program.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB=7) before enrolling in this course.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1
Psychology 1900

Introduction to Statistics for the Behavioral Sciences (118254)

Patrick Mair

2020 Fall (4 Credits)  

Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: None  
Enrollment Cap: n/a

Methods of Behavioral Research (127078)

Regan Bernhard  
Mina Cikara

2021 Spring (4 Credits)  

Schedule: M 0300 PM - 0415 PM

Instructor Permissions: None  
Enrollment Cap: n/a

This is a lecture, discussion, and laboratory course. Our goal is for you to master the essentials of behavioral experimentation through a succession of projects, starting with a small number of fundamental paradigms that can be used in many areas of psychology, culminating with a larger final project. Emphasis
will be on understanding causal inference and acquiring practical laboratory skills and more abstract conceptual tools. Basic aspects of data exploration and analysis will be covered. A high value will be placed on discussion participation and the communication of results through effective visual graphics in oral and written reports. Note that lectures will be pre-recorded, class discussion will take place during the time listed above, and lab time slots (TBD) will be selected to accommodate as many students as possible.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB=7 or Psyc S-1) before enrolling in this course.

Modern psychology labs look similar to tech offices and startups, filled with researchers sitting behind computers writing code. In this course, we will cover fundamental coding practices and computational tools used frequently in psychology research. We will go over the basics of coding, how to run experiments in PsychoPy (Python), how to keep a digital lab notebook, univariate data analyses in R and/or Python, and how to make graphs in R with ggplot. Through this process, students will have the opportunity to develop and run a simple experiment from start to finish. This course is ideal for students considering or beginning a thesis, students interested in graduate school, or students who want more experience in data science or programming.

Course Notes: This course is open to all students who have completed the prerequisite coursework; no background in programming or coding is assumed or required.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and PSY 1900 or the equivalent of introductory statistics before enrolling in this course; or permission of instructor.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY1900 or STAT100 or STAT101 or STAT102 or STAT104

Psychology 1950

Intermediate Statistical Analysis in Psychology (121738)

Patrick Mair

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 24

This course offers intense, foundational exposure to psychological statistics, focusing heavily on analysis of variance (one-way, factorial, repeated-measures, mixed-model). Other topics include: exploratory data analysis, sampling distributions, null hypothesis significance testing, t-tests, fixed versus random effects, post hoc and planned comparisons, correlation, simple regression, the general linear model, chi-square tests, nonparametric statistics, confidence intervals, and meta-analysis.

Course Notes: Required of doctoral students in Psychology.

Class Notes: Lecture Time: Mon & Wed 1:30-2:15pm
Supplemental Lecture Time (not mandatory): Wed 7:30-8:30pm
Lab Time: Thurs 9-10:30pm and Fri 1-2:30pm

Recommended Prep: One of Psychology 1900, Statistics 100, 101, 102, 104, or the equivalent.

Requirements: PSY1900 or STAT100 or STAT101 or STAT102 or STAT104

Multivariate Analysis in Psychology (117879)

Thomas Rusch
2021 Spring (4 Credits) Schedule: MW 0900 AM - 1015 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

This course introduces advanced statistical methods for the empirical measurement of abstract constructs and multivariate analysis. Topics include: Bayesian statistics, non- and semiparametric regression models, conditional process models, reliability and validity, exploratory and confirmatory factor analyses, structural equation modeling and growth curve modeling.

Recommended Prep: The Psychology Department requires completion of PSY 1950 or equivalent.

Requirements: Prerequisite: PSY 1950 or equivalent

History of Psychology: Seminar (118993)

*Richard McNally*

2020 Fall (4 Credits) Schedule: M 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Covers major issues, theories, schools of thought, and controversies integral to the development of psychology from the late 19th century to the middle of the 20th century. Readings include classic articles exemplifying these themes.
Course Notes: Open to undergraduates with permission of instructor.

Recommended Prep: For undergraduates: completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Requirements: Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18 or SLS15

Additional Course Attributes: | Attribute                          | Value(s)                                      |

Statistical Learning (110487)

*Patrick Mair*

2020 Fall (4 Credits)  
**Schedule:** R 0945 AM - 1145 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 24

This course is all about Statistical Learning techniques in Psychology and related fields. Statistical Learning is a modern discipline of Statistics which involves developments from the fields of Statistics (obviously), Machine Learning, Computer Science, and Data Science. Overall it refers to a vast set of tools for understanding complex data. More details on the contents can be found in the Syllabus.

Recommended Prep: It is required that students completed Psych 1950 or an equivalent class. Students need to be solid in multiple regression analysis including mixed-effects models. R knowledge is absolutely necessary

Additional Course Attributes: | Attribute                          | Value(s)                                      |

Laboratory on Reinforcement Learning and Decision Making (160657)
Samuel Gershman
2020 Fall (4 Credits)  Schedule:  F 0945 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a
This lab course provides instruction and experience in conducting research on reinforcement learning and
decision making, using a combination of computational, behavioral and neural techniques. Students will
learn how to fit models of reinforcement learning and decision making to behavioral data, collect and
analyze functional MRI data, and develop algorithms for artificial intelligence. Undergraduates are required
to write a research report at the end of the semester on the studies conducted in the lab.

Course Notes:  Open to graduate and undergraduate students working in the
instructor's laboratory.
Class Notes:  To express interest in enrollment, please email the instructor at

Samuel Gershman
This lab course provides instruction and experience in conducting research on reinforcement learning and decision making, using a combination of computational, behavioral and neural techniques. Students will learn how to fit models of reinforcement learning and decision making to behavioral data, collect and analyze functional MRI data, and develop algorithms for artificial intelligence. Undergraduates are required to write a research report at the end of the semester on the studies conducted in the lab.

Course Notes: Open to graduate and undergraduate students working in the instructor's laboratory.

Class Notes: To express interest in enrollment, please email the instructor at gershman@fas.harvard.edu.

Laboratory for Social Cognitive Neuroscience (122871)

Jason Mitchell

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: n/a

Provides instruction and experience in conducting research on social cognition via the methods of cognitive neuroscience. Special focus on issues of mental state inference, stereotyping, and the self.

Course Notes: Open to graduate and undergraduate students working in the instructor's laboratory.

Class Notes: To express interest in enrollment, please email the instructor at jason_mitchell@harvard.edu prior to the first class meeting.

Psychology 2354R
Advanced Laboratory in Cognitive Neuroscience (123319)

Randy Buckner

Students work directly on a research project and get hands-on experience with neuroimaging and cognitive neuroscience techniques, including functional MRI. MRI laboratory training consists of safety, instruction on running the scanner, and paradigm design. In addition to laboratory work, students attend a weekly research seminar where ongoing and proposed research projects are discussed.

Course Notes: Open to graduate and undergraduate students working in the instructor's laboratory.

Class Notes: To express interest in enrollment, please email the instructor at randy.buckner@harvard.edu prior to the first class meeting.

Laboratory on Cognitive and Neural Organization (109597)

Talia Konkle

2021 Spring (4 Credits)  

Schedule: F 0900 AM - 1145 AM

Instructor Permissions:   Instructor   Enrollment Cap:   n/a

This lab course provides instruction and experience in conducting research on cognitive architecture and neural organization, via the methods of visual cognition and cognitive neuroscience. Special focus on issues of high-level visual representation and the corresponding structure in neural response profiles. Open to graduate and undergraduate students working in the instructor's laboratory. Undergraduates are required to write research report at the end of the semester on the studies conducted in the lab.

Course Notes: Open to graduate and undergraduate students working in the instructor's laboratory.

Psychology 2464R
Research Methods in Child & Adolescent Clinical Psychology (124970)

John Weisz

2020 Fall (4 Credits)  Schedule: TBD
Instructor Permissions: Instructor  Enrollment Cap: 30

This course is designed to give you exposure to the concepts, as well as the nuts and bolts, of research in clinical psychology of childhood and adolescence. There is a special emphasis in this course (as in the lab) on intervention research addressing youth depression, anxiety, and conduct-related problems and disorders. If you are a psychology concentrator at Harvard, you may have already taken classroom-based courses covering theories and methods that guide research in clinical psychology, such as Abnormal Psychology and Developmental Psychopathology. You may also have taken courses that introduced you to the types of statistical analyses (Psych 1900) and research methods (Psych 1901) used in psychological research. In this course, we will build on the foundation you received in such courses by applying what you have learned to the conduct of specific research projects.

In this class, you will participate in several aspects of the clinical research process via your active involvement in the research of our psychology laboratory. More specifically, through attending weekly class/lab meetings and participating in one or more research projects, you will learn how specific research ideas take shape; how research questions and hypotheses are generated; how studies are designed to address these research questions and hypotheses; how data are collected, cleaned, entered into study datasets, then analyzed; and how findings are interpreted and organized for presentation at professional meetings and in scientific publications.

The main goals of research in our lab are to build an understanding of which interventions for child and adolescent mental health problems are effective, and to promote use of the best evidence-based assessment and intervention in everyday clinical practice for youths and families. In pursuing these goals, we and our colleagues develop ways of structuring evidence-based practices to make them user-friendly and tailored to the settings in which youngsters typically receive mental health care—e.g., community mental health clinics and schools. Much of our work focuses on developing and testing these tailored approaches. We also conduct meta-analyses of the youth psychotherapy research literature, to sum up what has been learned from all the treatment studies with children and adolescents.
This course is designed to be useful to students who plan to pursue a career in child and adolescent mental health, particularly those with an interest in psychological research. However, the skills conveyed (e.g., critical thinking, research design, science writing) may be useful in a variety of ways and relevant to a number of different career paths.

Class Notes: Class will meet on Tuesdays, 5:30-6:45pm.
To express interest in enrollment, please email Rachel Horn, rachelhorn@g.harvard.edu. An interview with the instructors is required.

Much of our work focuses on developing and testing these tailored approaches. We also conduct meta-analyses of the youth psychotherapy research literature, to sum up what has been learned from all the treatment studies with children and adolescents.

This course is designed to be useful to students who plan to pursue a career in child and adolescent mental health, particularly those with an interest in psychological research. However, the skills conveyed (e.g., critical thinking, research design, science writing) may be useful in a variety of ways and relevant to a
number of different career paths.

Class Notes: To express interest in enrollment, please email Rachel Horn, rachelhorn@g.harvard.edu. An interview with the instructors is required.

Psychology 2475R

Laboratory for the Systems Neuroscience of Psychopathology (128307)

Joshua Buckholtz

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: n/a

Research seminar examines the neurobiology of disinhibitory psychopathology (aggression, antisocial behavior, substance abuse). Students participate first-hand in personality/behavioral testing and brain imaging, and in weekly discussions of the genetics and cellular/systems/cognitive neuroscience of disinhibitory psychopathology.

Class Notes: To express interest in enrollment, please email the instructor at jwb@wjh.harvard.edu prior to the first class meeting.

Psychology 2485
Bad Genes, Bad Parents, Bad Behaviors (159711)
Joshua Buckholtz
2021 Spring (4 Credits) Schedule: T 0600 PM - 0845 PM
Instructor Permissions: Instructor Enrollment Cap: 20

This class will explore the biology of criminal behavior and violence. We will examine the construct of "antisociality" and unpack clinical and diagnostic issues surrounding its diverse manifestations, such as psychopathy. A strong emphasis will be placed on biological mechanisms. A particular focus will be on understanding how genes and environments act and interact to predispose antisocial behavior by shaping brain function and development.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and either PSY 18 or PSY 1861 before enrolling in this course.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY18 or PSY1861

Psychology 2553R
Behavioral Insights Group Research Seminar (120559)
Francesca Gino
2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

This seminar provides lab experience in behavioral approaches to decision making and negotiation.

Course Notes: Open to students working on research in the instructors' laboratories. Offered jointly with the Business School as 4425.
Psychology 2553R

Psychology 2554R
Laboratory on Complex Thought and Cooperation (123308)

Joshua Greene

2021 Spring (4 Credits) Schedule: R 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

In this hands-on lab course, students have the opportunity to participate in all aspects of psychological research, including experimental design, data collection, and data analysis. Each student will work closely with a graduate student or post-doctoral mentor. Topics of research are divided across cognitive and social psychology. Cognitive projects focus on the neuroscience of complex thought: Humans can understand and reason about an effectively infinite number of different ideas. How do our brains accomplish this? Social projects are applied work focused on promoting cooperation, conflict resolution, and improved social decision-making. Methods include fMRI, neural network modeling, and online and in-lab behavioral experiments.

Class Notes: To express interest in enrollment, please email the lab manager, Kirstan Brodie, at kirstan_brodie@fas.harvard.edu.

Psychology 2620R

Lab in Intergroup Neuroscience (156624)

Mina Cikara

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: n/a

Year-long lab course exploring how cognition, affect, neural responses, and behavior change when social relations shift from "me and you" to "us and them." Students will participate in experiment development and data collection employing methods ranging from standard laboratory experiments, implicit and explicit self-reports, and behavioral measures, to fMRI and psychophysiology. Students will also read and discuss papers on intergroup relations in our weekly meetings.

Class Notes: To express interest in enrollment, please mail the instructor at mcikara@fas.harvard.edu

Recommended Prep: For undergraduates, Science of Living Systems 20 or Psychology 1 or

Psychological Science: Talking Points (118609)

Steven Pinker

2021 Spring (4 Credits)  
Instructor: Instructor
Enrollment Cap: n/a

Schedule: R 0300 PM - 0500 PM

A graduate companion course to "Psychological Science," which explores the theories and controversies in greater depth. Topics include genetics, evolution, cognitive neuroscience, perception, development, consciousness, social psychology, personality, psychopathology, violence, sex, and morality.

Course Notes: Enrollment is limited to teaching fellows for "Intro. to Psychological Science" and graduate students who have obtained the permission of the instructor.

Psychology 3515

Graduate Seminar in Social Psychology (207211)

Fiery Cushman

2021 Spring (4 Credits)  
Instructor: Instructor
Enrollment Cap: 15

Schedule: MW 1200 PM - 0115 PM

Graduate seminar in the field of Social Psychology. Topics include: attitudes and social influence; obedience to authority; stereotyping, prejudice, and intergroup relations; emotion; interpersonal attraction; morality and prosocial behavior; and errors of everyday human judgment.

Course Notes: Open only to Harvard doctoral students in clinical psychology. Students will attend the lectures for Psychology 15 Social Psychology and complete additional graduate-level assignments.
The Writing Workshop is the ultimate professional development course. It was developed by Barbara Sarnecka at UC Irvine, and involves working through her witty, moving, and extremely effective book. Basically, if one cannot write effectively, and publish, one cannot succeed in academia. As Sarnecka puts in in the opening paragraph of the book, "Research is writing. No one gets a fellowship, a PhD, a postdoc, a job, a grant, or a promotion except by writing, which means that professional researchers are by definition professional writers." Sarnecka has run writing workshops as graduate classes with great success for several years now and the book distills what she has found to work. She documents increased productivity and happiness among the workshop participants. Classes will each involve some time doing actual writing, in parallel, but all at once, a feedback forum where at least once a semester a participant gets feedback on a page or two of writing, and in class exercises and discussion about the mechanics of writing, managing time, dealing with anxiety and rejections, among many other topics.

What’s required: Participation in one 2 hour 50 minute seminar meeting a week which will be a workshop on academic writing. One semester commitment, but option to continue in the workshop for a second semester, and perhaps beyond. There will be a small amount of reading in advance of each class, mainly from Barbara Sarnecka’s book, The Writing Workshop: Write More, Write Better, Be Happier in Academia, sometimes supplemented by readings from other books, such as Pinker’s The Sense of Style.

Course Notes: Open to G3+ graduate students and postdocs in Psychology.

Regional Studies - East Asia 350 Section: 1

Topics in Regional Studies East Asia: Proseminar (208031)

Alexander Zahlten

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 30

This proseminar will introduce students to the various fields of research in East Asian Studies. Every week will feature a different member of the faculty to discuss their work and its disciplinary and methodological frameworks.

This course is limited to first-year RSEA students.

Not available for cross-registration.

This course is a gateway to the Study of Religion, presented against the backdrop of a larger question: What is the purpose of the humanities in the 21st century?

Based on the premise that solely Eurocentric approaches to what it means to be human are shortsighted at best, we seek to think through new ways of engaging with global sources that shed light on our common humanity. The course develops around a critical engagement with the concept ‘transcendence’, which will help us to approach alternative worldviews without eliminating difference.

After thinking about the stakes involved in cultivating the life of the mind in a crisis point for human existence, we begin with an extended reflection on the intellectual and cultural moment in which we find ourselves, investigating how this conditions the way we frame questions of what it means to be human. Next, we take an honest look at the ways in which the dominant modes of knowledge and culture in the North Atlantic have been responsible for cultural, material and epistemic violence. Our exploration of diverse approaches to the human condition begins here, as we think through a range of responses to human-caused suffering. We then approach a range of questions of universal concern: What is ultimately real and how do we know what we know? What is the good, and how is it to be attained? How are we to relate to our fellow human beings, particularly when they seem deeply antagonistic?

This course is designed for freshmen and sophomores who are interested in exploring a vocation in the humanities. Throughout we will draw out the implications of the readings for our own intellectual and practical lives. Readings will include primary texts in translation drawn from traditions across the globe, as well as selected secondary literature.

This course provides an introduction to Christian conceptions of conduct, character, and
community, as well as contemporary disputes over their interpretation and application. What do Christian ideals imply for issues related to race, gender, religious pluralism, and secularism? How are Christian principles related to the ethos of liberal democracy and modern ideals of rights, equality, and autonomy? Readings and discussions will highlight a variety of contemporary perspectives and approaches to Christian ethics, and special emphasis will be given to moral and political concerns including race and racism; love, sexuality, and marriage; the environment; capitalism and consumption; abortion and euthanasia; and war and peace.

Religion  48  Section: 01

Roman Catholic Christianity and Contemporary Crises (109983)

Francis Fiorenza
Courtney Lamberth

2021 Spring (4 Credits)  Schedule:  R 0300 PM - 0545 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

In the face of political change and sustained demands for social justice, religious traditions across the globe struggle to respond to these challenges while maintaining their identities. For example, the Second Vatican Council of the early 1960s brought the Roman Catholic Church to a deeper engagement with modern academic scholarship such as historical-critical methods of interpreting texts, environmental and evolutionary sciences' relation to the Church, and the fundamental importance of modern philosophical and political thought to the institution's self-understanding. Reforms that emerged from the Council--which convened during a period of global cultural upheaval and radical change--continue to ignite discord and intense division among Roman Catholic teaching authorities, and church communities. This course takes up selected debates in the context of their historical, political, and cultural development, with attention to their current relevance: diverse Catholic responses to modernity in the Vatican Councils, religious freedom and toleration, the nature of human rights, the role of women in church leadership, evolution and the environment, and sexual ethics. Readings will include council documents, theological texts, treatises, and encyclicals, as well as texts relevant to the academic study of religion.

Narratives of grace, lament, and conversion appear in multiple forms of American literature rooted in Christianity including fiction, sermons, first-person accounts, poetry, autobiography, and essays. Violence and suffering are often central to depicting, describing, and imagining experiences of divine grace and conversion. Through close reading of text in several genres, this course addresses these issues and considers, among other questions, the ambivalent and often paradoxical relationship between "freedom" and "slavery" in relation to divine agency and community in accounts of religious transformation. Authors will include Jonathan Edwards, Emily Dickinson, Herman Melville, William James, W. E. B. DuBois, Howard Thurman, Flannery O'Connor, Toni Morrison, and Annie Dillard, as well as selected secondary sources from the study of religion.

Krishna, a supreme deity of Hindu tradition, and Jesus Christ, the central figure of Christian faith, have been compared and contrasted for well over two centuries. They been understood as similar divine persons, who descend into this world and are embodied here, gather followers, offer wise instructions, save their devotees, and are best approached by love and devotion. But differences have often been emphasized. For centuries, missionaries, scholars, and many ordinary believers have seen Krishna and Christ as competitors, pushing similarities and differences in contexts (most often in India but not only) where true religion, salvation, and conversion were at stake. Questions arose such as these: Are Krishna and Christ mythical or historical figures? The former mythical and the latter historical? Is either divine? Both? Did they truly come into this world, by incarnation or avatara? If they save, how does that happen – and save from what? Are they moral role models? Can a Hindu love Christ, and a Christian love Krishna?

Such were "hot" questions for a very long time, and even today for some. But for many, such questions have
lost their urgency in the 21st century. It is good that competition is largely a thing of the past, but it may not be good that the urgency of the comparison — Krishna and Christ, Christ or Krishna? — no longer matters to most people. Do we have something to gain by taking both Krishna and Christ seriously? Facing this question sheds light on many larger questions regarding spirituality, religion, and cross-cultural learning.

The course proceeds by key readings, discussed vigorously in class, but experience, practices, and images are important as well. Course requirements include brief weekly written responses to readings, and two 12-page course papers, but no final examination. Jointly offered with the Divinity School as HDS 3070.

Religion 91R

Supervised Reading and Research (122928)

Courtney Lamberth

Matthew Potts

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

Religion 91R is a course of supervised reading and research on a special topic in the Study of Religion. The course involves close reading and written work, both of which are evaluated by the faculty director with a letter grade and written comments. Students who wish to enroll in a 91R must receive the approval of the Director of Undergraduate Studies. 91R is ordinarily open only to concentrators. The instructor of the course must be a member of the Harvard faculty.

Course Notes: May not be taken Pass/Fail. Normally open only to concentrators. Permission by Director of Undergraduate Studies required.

Religion 97
Tutorial - Sophomore Year (117043)
Charles Lockwood

The course introduces students to theories and methods in the academic study of religion, including
significant themes and arguments that have defined the field over time. Students will examine some key works that helped to shape the discipline as it emerged in the nineteenth and twentieth centuries, and also consider recent work drawing on various disciplines that scholars have used in the study of religion, including philosophy, psychology, sociology, anthropology, and history. The course will take up questions such as these: What does it mean to call something "religious"? Is the category of "religion" a universal feature in human life, or more historically specific? What is at stake in defining this category in one way or another? How do claims about religion relate to claims about politics, economics, culture, and society? The course will also enable students to evaluate the choices that scholars make about what to privilege in their investigations. The course emphasizes critical reading and thinking skills, as well as thoughtful participation in discussion and the refinement of students’ academic writing.

Course Notes: Required of all concentrators, and recommended for Secondary Field students. Enrollment open to other students with instructors’ permission.

Religion 1014TS Section: 01
Animals and the Unseen (217840)

Teren Sevea

2021 Spring (4 Credits) Schedule: R 1200 PM - 0200 PM
Instructor Permissions: None Enrollment Cap: n/a

This course considers how we can write histories of religious animals and the Unseen. Students will be introduced to academic literature that has criticized scholarly and popular conceptions of humans having a special status, and assumptions that the religious sentience of non-human animals and the materiality of spirits cannot be studied academically. Students will then be introduced to a variety of sources containing rich information on religious animals and the supernatural from Islamic societies of the globe. In doing so, the course pays particular attention to how human and non-human animals were understood to be religious beings whose bodies and activities were always tethered to the Unseen. Students will be encouraged to explore how the divide between human and non-human animals might not have been evident in societies of the past and the present. Students will moreover be encouraged to engage how these sources may prompt us to remember, or rather realize, that all aspects of material life, including animals' bodies, physical resources and technologies, were inextricably linked to the imagined non-material realms of the Unseen. On the whole, this seminar class takes steps towards recounting histories of religious animals and the Unseen.

Jointly offered with Harvard Divinity School as HDS3117.

Angels: Messengers of God (127677)

Kimberley Patton

2021 Spring (4 Credits) Schedule: R 0300 PM - 0500 PM
Instructor Permissions: None Enrollment Cap: n/a

The angel or "messenger" is a spectacular focus for the religious imagination, linking immortal and mortal worlds. This course explores the historical theology, iconography, and liminal function of angels and angelology in Judaism, Christianity, Mazdayasna (Zoroastrianism), and Islam, as well as the widespread revival of interest in these mysterious beings. For both undergraduate and graduate students.

Course Notes: Offered jointly with the Divinity School as 3651.

The Shock of the New (108501)
Michael Jackson

2021 Spring (4 Credits) Schedule: T 1200 PM - 0200 PM
Instructor Permissions: Instructor Enrollment Cap: 20

This course will explore the impact of new worldviews, traumatic experiences, and radical technological innovations on both human lives and lifeworlds. It will cover some of the epistemological, ethical, social and existential quandaries that constitute what Robert Hughes calls 'the shock of the new', as well as the religious and ritual strategies whereby people struggle to avert, accommodate, cope with and comprehend massive changes to their lives. Interpretive perspectives will be drawn from psychology, philosophy, ethnography, ethology and biomedicine, while specific empirical cases will cover new media of communications and information processing, new genetic technologies, medical crises (disabilities, organ transplantation, trauma and epidemic disease), as well as culture contact and culture shock. Jointly offered with the Divinity School as HDS 3256.

Religion 1049 Section: 01
Religion, Values, and the Future of Democracy (216807)
E. J. Dionne

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 10

G. K. Chesterton described the United States as "a nation with the soul of a church," but America's religious institutions have increasingly taken on the souls of political parties. At the same time, liberal democracy finds itself under stress and the core values of liberalism are being challenged by nationalism, authoritarian forms of populism, and a backlash against rising economic inequality. And embedded racism has come under vigorous challenge – in the US especially, but throughout the democracies. This course will explore the religious and secular values that under-gird democracy. It will examine both political and religious institutions, and explore the thinking of theologians and philosophers on the challenge of self-rule.

Course Notes: Although the 2020 election will not be the subject of any particular session, it will no doubt be a discussion topic throughout the fall.

Jointly offered with HKS DPI 227 as and with the Divinity School as HDS 2042.

Recommended Prep: Follow news about the relationship of religion to politics, and discussions of the values underlying political debates, even more closely than you normally might.
Religion 1059 Section: 01
Francis Clooney
2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a
This course reflects on God — the idea, the reality, the significance — in light of Hindu and Christian scriptures, from philosophical and theological perspectives, and with reference to spiritual paths to union with God — all re-read in light of modern theological questions and doubts about the very idea of "God." Issues include: the meaning of "God" and knowledge of God; reasons to believe (or not) in God's existence; God's relationship to the world, humans, all living beings; divine embodiment and salvation by God; theism and polytheism before and after secularism and atheism. Knowing both Hindu and Christian traditions on God clarifies each tradition, as we learn from their great similarities and great differences. And: how might studying God comparatively change our God-talk, God-practice, God-love here and now? Quiet course for noisy times. Weekly written responses, plus two 10-12 page papers.
Course Notes: Offered jointly with the Divinity School as 3751.

Religion 1083 Section: 01
Religion and Family (208128)
Todne Thomas
2020 Fall (4 Credits) Schedule: W 0300 PM - 0500 PM
Instructor Permissions: Instructor Enrollment Cap: 25
Religion and family are contested concepts that become politicized as they are mobilized and debated in the public sphere. Religion and family are also often depicted as separate forms of social organization. This course explores the ways in which religious and familial concepts, institutions, and relationships intersect to shape the lived experiences of religious participants who create and imbue their relationships with social and sacred significance. In particular, we will examine how rituals, practices, and meanings surrounding sexuality, marriage, parenthood, siblinghood, and genealogy become important signifiers of religious identity and membership. Our discussion of these case studies will also open up broader conversations about the politics ethnicity/race, gender, sexuality, fundamentalism, and trans/nationalism and their imprint on modes of religious and spiritual belonging. Jointly offered with the Divinity School as HDS 2126.
Religion 1134 Section: 01

Genesis: Narrative Artistry and Theological Meanings (112855)

Jon Levenson

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

A close critical reading in English of the book of Genesis with an eye both to the storytellers' techniques and to the moral and theological dimensions of the text. Emphasis will be given to literary and religious rather than historical and editorial issues.

Course Notes: Offered jointly with the Divinity School as 1417.

Religion 1150 Section: 01

Child Sacrifice, Pros and Cons: The Binding of Isaac in Jewish, Christian, and Islamic Tradition (217581)

David Stern

2021 Spring (4 Credits) Schedule: T 1200 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

Child Sacrifice-- specifically, the story of the parent's sacrifice of the first-born child-- lies at the heart of Western religion and culture. The Biblical narrative in Genesis 22, known as the Binding of Isaac, is one of the most famous and problematic tales in the Bible. The same narrative is foundational to Christianity. Later Jewish tradition has interpreted the Biblical text in countless ways from the ancient period down to the present day. The narrative figures prominently in Islam from the Qur'an on. And the Biblical story has been criticized and critiqued since the Middle Ages as a barbaric narrative. Recent works have blamed it for the ubiquity of child abuse in Western society, and it has become a ubiquitous motif of anti-war and protest poetry all over the world. This course will use the interpretive career and literary history of Genesis 22 as a lens through which to study the place of this foundational narrative in Western culture.

Readings will include Biblical texts, Euripides' Iphigeneia in Aulis, Philo of Alexandria, ancient Jewish sources, the New Testament, St. Augustine and other Christian exegetes,
the Qur’an and later Islamic traditions, Kierkegaard's Fear and Trembling, Martin Buber, Kafka, Bob Dylan, Yehuda Amichai, and Leonard Cohen, among many other modern writers and poets.

Judaism: Text and Tradition (205396)

Jon Levenson

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 15

A general and wide-ranging exploration of the Jewish religious tradition, from its inception in biblical Israel though its rabbinic, medieval, and modern iterations. The central focus lies on the literary meanings and existential questions of the classical tradition, as well as on the relationships between texts, religious claims, and practices. We shall also consider some of the restatements, reformulations, and challenges to tradition that have arisen in modern times. Open to undergraduates, including first year students, by permission.

Course Notes: Jointly offered with Divinity as 3036.

Gender and Judaism in Modern America (214625)

Ann Braude

2021 Spring (4 Credits) Schedule: W 0400 PM - 0600 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Contemporary Jews are as likely to view their tradition as inherently oppressive to women as they are to see it as an inspiration to activism for feminism and civil rights. This course follows the construction of
Jewish gender identities beyond the stereotypes, sometimes in collision with modern gender norms, sometimes in accommodation, and sometimes in open rebellion. It considers challenges to both demographic and cultural reproduction that place pressure on personal decisions, group dynamics, identity, and intergroup relations for members of minority religions. The instructor, an historian, and the guest interlocutor, Yakir Englander, will bring together historical accounts of the anxieties and opportunities that accompanied the construction of modern Jewish gender identities with halachic textual traditions opening alternative possibilities. Gender as a key marker of group identity forms a central axis of inquiry through three case studies: Jewish masculinities from Talmud study to military service and comic book superheroes; Ultra-orthodox communities, in which the rejection of modern gender roles is a defining marker; and, Jews as critics of gender and sexuality, including feminist and trans engagement with Jewish tradition. Guest interlocutor Yakir Englander will visit the class 3 times to introduce the project of reading classical Jewish texts in modern perspectives and the practice of havruta (text study in pairs or groups). A product of both a traditional yeshivah education and a doctorate in feminist theory, Englander combines these approaches to open the topic of gender and Judaism beyond Western academic approaches. Jointly offered with Harvard Divinity School as HDS 2050.

The Book of Daniel (216806)

Andrew Teeter

2020 Fall (4 Credits)  
Schedule: T 0300 PM - 0500 PM

Instructor Permissions: None  
Enrollment Cap: n/a

A critical and exegetical study of Book of Daniel, based on a close reading of the text in Hebrew and Aramaic. Special attention will be given to large-scale compositional strategies and principles of literary organization, to textual logic, to analogical patterns, to inner-scriptural relationships, and to the nature and function of allusion within this book, with a view toward understanding the overall expectations made of readers, both ancient and modern. The text of Daniel and its underlying principles of design will be considered in the context of major critical debates within the current state of the field.

The course presumes basic proficiency with Biblical Hebrew. Minimum of one year of Hebrew required. No previous knowledge of Aramaic required.

Jointly offered in the Divinity School as HDS 1630.

Emerging Topics in Ancient Greek Religion: Seminar (116532)
Recent research has highlighted dimensions in the religious history of Greece long overlooked or understudied: e.g., magic and necromancy; curse tablets and binding spells; rituals of childbirth; healing sanctuaries and dream incubation; talismans and apotropaic practices; miasma and catharsis; weaving, dance, lamentation, and other women's cultural production; "heroic" female self-sacrifice in male wars; autonomous cult images and "talking objects"; and animal metamorphosis. The seminar will offer an intensive survey of important work on these "new" topics in ancient Greece.

Students will have an opportunity to develop their own research projects. No language prerequisite; some background in ancient Greek religion preferred.

Course Notes: Offered jointly with the Divinity School as 3815. Application for enrollment must be completed at first class meeting.

Recommended Prep: No language prerequisite; some background in ancient Greek religion preferred.

Early Christian Thought 3: The Syriac Tradition (109686)

Charles Stang

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 20

The aim of this course is to introduce students to the Syriac Christian tradition in the late antique and medieval periods. Syriac-speaking Christians constitute an ancient community that stretched from the Eastern Mediterranean to China, a community diverse in its beliefs and practices, prolific and accomplished in its literary output, and bound by a common language (Syriac, a dialect of Aramaic). This course will cover the early, diverse period of Syriac literature (2nd and 3rd centuries); the subsequent "golden" age of Syriac literature, associated with such authors as Ephrem and Jacob of Serug; some forms of asceticism and spirituality peculiar to Syriac Christianity; and finally, the stretch of Syriac Christianity eastward, to India and China.

Course Notes: Offered jointly with the Divinity School as 1751.

The Sacramental Imagination (122197)

Matthew Potts
2021 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor
Enrollment Cap: 24

How do communities set apart the sacred from the everyday? In what ways might the holy and quotidian overlap? How can we recognize holiness? Using the Christian ritual of eucharist or communion as a primary lens, this interdisciplinary course will investigate the sacramental imagination through a study of both historical theology and contemporary literary fiction. In studying the various tropes and images that have been used to characterize Christian eucharist, we will seek to generate a broadly construed sacramental theology that might prove useful for both theological study and practical ministry.

Cities on a Hill: Images of America as a Redeemer Nation, 1630-present (156249)

Catherine Brekus
2021 Spring (4 Credits)  Schedule:  T 0900 AM - 1100 AM
Instructor Permissions:  Instructor  Enrollment Cap:  12

Beginning with John Winthrop's 1630 speech, "A Model of Christian Charity," and ending with the 2012 presidential election, we will examine images of America as a city on a hill. We will ask several questions: How and why have Americans conceived of the nation in sacred terms? How have religious images of the nation developed and changed over time? What are the implications of America's "civil religion"? We will discuss the Puritan idea of a national covenant, the millennial rhetoric of the American Revolution, defenses of manifest destiny, the sacrificial theology of the Civil War, religious and political rationales for global missions, the rise of the Christian Right, and presidential invocations of America as a city on a hill. We will also examine how women's rights leaders, abolitionists, and civil rights activists both critiqued and appropriated the image of America as a city on a hill. Jointly offered with the Divinity School as HDS 2180.

The Man of Light: The Philosophy and Spirituality of Henry Corbin (216334)

Charles Stang
2020 Fall (2 Credits)  Schedule:  F 1200 PM - 0300 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

This seminar will focus on the writings of Henry Corbin (1903-1978), the philosopher of religion and scholar of Islam, especially the Persian tradition. The aim of the seminar will be to read Corbin's major works; to understand his controversial place in the history of the study of religion in general, and of Islam in particular; to appreciate him as a creative and constructive philosopher and theologian in his own right; and to assess his legacy for the 21st century.

Students must complete both terms of this course (parts A and B) within the same academic year to receive credit

The Holocaust and the Churches, 1933-45 (124910)

Kevin Madigan

2021 Spring (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce students to the critical use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. The seminar will conclude...
with an assessment of the role played by the Holocaust in today's world, specifically in the United States. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.

The Yoga Sutras: Text, Meaning, Purpose (126783)

Francis Clooney

2020 Fall (4 Credits) Schedule: T 0300 PM - 0530 PM

Instructor Permissions: Instructor Enrollment Cap: 20

The brief Yoga Sutras (only 195 sutras) of Patanjali (c 100 BCE-100 CE) is a vastly influential and fundamental text of yoga. It is the focus of the course, along with its primary commentary (Vyasa's Bhasya), notes on other commentaries, and with some attention to BKS Iyengar's famous Light on the Yoga Sutras. What was Patanjali up to? What are the Sutras for? What do the Sutras tell us about the meaning and purpose of yoga then and now? Though not a course about the practice of yoga or yoga in the modern world, it is always attentive to the implications for practice. Thus potentially of great use for practitioners and teachers today. Apt comparisons will be made with ancient Hindu and Buddhist parallels, Al-Biruni's 11th c. Arabic translation, and modern Christian interpretations of the Sutras. Given our stressful situation, possibly some optional yoga practice together at start or end of class. Weekly written responses, plus two twelve-page course papers.

Offered jointly with the Divinity School as HDS 3931

Course Notes: Offered jointly with the Divinity School as 3931.

Recommended Prep: No language prerequisite, but students who know Sanskrit will be encouraged to make use of their expertise.

Introduction to Buddhist Scriptures and Their Critical Interpretation (124399)

*Charles Hallisey*

2020 Fall (4 Credits)  
**Schedule:** T 1200 PM - 0200 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a  

An introduction to basic issues in the contemporary understanding of textuality, psychology, reading, and interpretation and their relevance to engaging Buddhist texts as scriptures. Examples of Buddhist scriptures will be drawn primarily from the Mahayana traditions. In accommodation to the necessity of remote learning in the fall term, 2020, class format will be of three types: 1 hour in lecture and large group discussion (Tuesdays 12-1); one hour in small group discussion (Tuesdays, 1-2); and one hour in tutorial format (one hour to be arranged for two students to meet weekly via Zoom with instructor).

**Course Notes:** Course has additional section hour to be arranged.

Offered jointly with the Divinity School as 3836.

Buddhist Ethics (125677)
A systematic exploration of Buddhist views of moral anthropology and the place of moral reflection in Buddhist thought and practice. The scope of the course is wide, with examples drawn from the whole Buddhist world, but the emphasis will be given to the particularity of different Buddhist visions of human flourishing. Attention will also be given to the challenges and promises of describing Buddhist ethics in a comparative perspective.

Course Notes: Offered jointly with the Divinity School as 3576.

Women, Gender, and the Quest for Social Justice: Cases in Buddhism (216456)

Janet Gyatso

2020 Fall (4 Credits) Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 15

We will do two things in this course: take in the history, literature, visual imagery, and theoretical pronouncements around the nature of women and gender in Buddhist materials; and cultivate the critical and hermeneutical skills for processing these materials and contributing to a just and woke future. We will read together a variety of Theravada, Mahayana, and Tantric Buddhist texts, displaying repressive, subversive, and liberative visions alike. We will study autobiographical writing of historical women, images of female divinity, and notions of non-binary genders as well as as the third sex. Significant attention will be paid to the contemporary female ordination movement, and to other modern Buddhist efforts for social justice and environmental protection. Lectures may be taped and viewed before class, and small breakout discussion groups will be an important part of the in-class pedagogy. Prior knowledge of Buddhism helpful but not required.

Modern Buddhism and Fiction (125675)

Charles Hallisey
An examination of how fiction is a vehicle for religious imagination and reflection in the modern Buddhist world. The genres of fiction will include both the novel and the short story, with examples drawn widely from across the Buddhist world and beyond. In accommodation to the necessity of remote learning in the fall term, 2020, class format will be of three types: 1 hour in lecture (Wednesdays 3-4); one hour in small group discussion (Wednesdays, 4-5); and one hour in tutorial format (one hour to be arranged for two students to meet weekly via Zoom with instructor). Enrollment is limited.

Course Notes: Course has additional section hour to be arranged.
Offered jointly with the Divinity School as 3777.

Introduction to Islamic Mystical Traditions (113442)
Ali Asani
2020 Fall (4 Credits) Schedule: T 1200 PM - 0200 PM
Instructor Permissions: None Enrollment Cap: n/a
This course offers an introductory survey of mystical traditions of Islam, popularly labelled as "Sufism." It explores the fundamental concepts, practices, and institutions associated with these traditions, their historical development and their influence on the devotional, cultural and social lives of Muslim communities through the centuries. Through case studies drawn from the Middle East, South Asia, West Africa and North America, the course examines ways in which these traditions have developed and promoted alternative perspectives on what it means to be Muslim, challenging in recent times sectarian, legalistic and politicized understandings of Islam such as Wahhabi, Islamism and jihadism. The course assumes no prior knowledge of Islam.

Course Notes: Offered jointly with the Divinity School as 3620.

Persian Sufi Literature (208141)
Nicholas Boylston
2021 Spring (4 Credits) Schedule: R 0300 PM - 0500 PM
In this course we will explore the major genres of classical Persian Sufi poetry and prose. In addition to examining the formation of these genres and their contexts of composition, we will pursue a range of broader questions, including: What is Sufism, and how do we discern ‘Sufi’ from ‘non-Sufi’ literature? What have the purposes and functions of literature been in Persianate Islamic contexts? What is the relationship between language, realization and experience Is Persian Sufi literature, and how do authors in the Sufi tradition deal with the problem of ineffability? What is the place of love in Persian Sufi literature and how is it conceptualized? And, how do Persian Sufi authors deal with the diversity inherent in human experience? 

Readings will include Baba Tahir, Umar Khayyam, Sana‘i, Attar, Rumi, Ahmad and Abu Hamid al-Ghazali, Sa‘di, Hafez, Fakhr al-Din Iraqi, Shabistari, and Jami. All readings will be in English translation, but there will be an extra section for students with advanced Persian to read texts in the original. Jointly offered with the Divinity School as HDS______.

Islam and Religious Diversity (207014)

Nicholas Boylston

2020 Fall (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 12

The problem of religious diversity recurs in all of the major branches of Islamic thought and appears in complex permutations in diverse cultural contexts. Focusing primarily on pre-modern Islam, this course invites students to investigate perspectives on the religious other in the Quran, Islamic law, theology, philosophy and Sufism. In the final portion of the course we will look at Muslim Spain, Mughal India, and the Muslim-Confucians of late imperial China as examples of how these complex dynamics played out on the ground. The larger aim of this course is for students to develop interpretive skill in dealing with the internal complexity of a number of Islamic discourses and contexts by pursuing a single problematic across them. To this end the course will be taught in seminar format and participants will be encouraged to engage creatively with primary and secondary sources to develop their own scholarly points of view.

Recommended Prep: One course dealing with Islam or Instructor’s Permission.

Being Muslim in South Asia: Religion, Culture and Identity (111918)

Ali Asani

2020 Fall (4 Credits) Schedule: W 1245 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

South Asia is home to the largest population of Muslims in the world. And yet, within South Asia, Muslims are a minority. What is Islam and what does it mean to be Muslim in South Asia? After briefly examining the historical development of Islamic institutions in the subcontinent, this course will focus on how ideas about Islam are shaped by evolving literary, linguistic, social and political landscapes. Special attention will be given to the effects of colonial and nationalist ideologies on Muslim experiences in India, Pakistan, and Bangladesh, as well as the disputed territory of Kashmir. We will also explore the impact of reform and revivalist movements and state-enforced policies of "Islamization" and "Hinduization" on women and minorities. The course is appropriate for those who want a bird's eye view of the Islamic tradition in South Asia, as well as those interested in exploring issues facing contemporary Muslim societies beyond the Middle East. Jointly offered as Religion 1820 and HDS 3625.

Course Notes: Offered jointly with Divinity School as 3625.

Islamic Missions: Reforming Muslim South and Southeast Asia (217841)

Teren Sevea

2021 Spring (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: None Enrollment Cap: n/a

How did Islamic missions and missionaries reform Muslim South and Southeast Asia? What Islamic missionary idioms, orientations and movements emerged in the nineteenth and twentieth centuries? Were South and Southeast Asia global centers of Islamic missionary activity? What kinds of Islamic educational institutions developed in modernity? How did Muslim reformists appropriate technologies? What materials were printed by Muslim missionaries and scholars in South and Southeast Asia? What jihad did Islamic missionaries and reformists call for in modernity? How did Muslim 'modernists' and 'traditionalists' respond to the challenges of colonialism and modernity? What was the nature of Sufism in modern South and Southeast Asia? What was the nature of Islamism in these regions? How has the history of Islamic missions been remembered in India, Indonesia, Malaysia and Pakistan? This discussion-based, lecture class answers these questions, and more. It is an introductory course and requires no background knowledge of the subjects.

Jointly offered with Harvard Divinity School as HDS 3174.

Religion and Neoliberalism (208110)

Todne Thomas

2020 Fall (4 Credits)  
Schedule:  
T 1200 PM - 0200 PM

Instructor Permissions:  
Instructor

Enrollment Cap: 25
As it is popularly conceptualized, neoliberalism is a political and economic system that calls for the
deregulation of capitalist enterprises, the increasing privatization of government services, and the
application of market rationalities in the operation of social institutions. Yet, how does neoliberalism
interface with religion? What religious sensibilities are encoded in and spread amidst neoliberal
formations? Through our review of theoretical texts and anthropological monographs, this course
investigates religion and neoliberalism around some of the following loci: Christian temporal reckonings
that shape renditions of millennial capitalism and late liberalism, moral orders, co-constitutive discourses
and institutions of prosperity and accumulation, and conflicting paradigms of selfhood and belonging.
Offered jointly with the Divinity School as HDS 2125.

The Book of Revelation: Text, History, and Interpretation (216371)

Giovanni Bazzana

2020 Fall (4 Credits) Schedule: R 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 15

The course will be focused primarily on the Greek text of the Apocalypse of John, devoting time to the
observation and discussion of issues relating to textual transmission, translation, interpretation, and
theological hermeneutics. Through the additional reading of other ancient, modern, and contemporary texts
the course will also approach the colorful and contested history of interpretation of this puzzling biblical
book. Revelation will be posed within the ancient historical context of Jewish and Christian apocalypticism,
but discussion in the course will range through the many facets of Revelation's history of interpretation,
from antiquity to today, addressing contested issues such as its stance towards violence, its ambiguous
treatment of empire and gender, or its controversial canonicity. Two semesters of Greek are required. If
HDS courses will be offered online, the seminar will be split in two parts, one synchronous and one
asynchronous. Jointly offered in the Divinity School as HDS 1560.

Course Notes: Jointly offered in the Divinity School as HDS 1560.

Recommended Prep: Two semesters of Greek are required.

Coloniality, Race and Catastrophe (213294)

Mayra Rivera

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM
This course explores the relationship between coloniality, race and ecology through the lens of "catastrophe." We will examine a variety of theoretical sources that deploy or refute tropes of the "end of the world". We will study different uses of "catastrophe"—to denounce the destruction of a particular world, re-imagine the past, or proclaim the impossibilities of the present. Through the readings and discussions, we will analyze the aims, effectiveness and limitations of talk of catastrophe in the contemporary context.

Women, Religion, and the Problem of Historical Agency (113871)

Catherine Brekus
Ann Braude

2020 Fall (4 Credits) Schedule: T 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This course examines recent scholarship on women in American religious history, focusing particularly on questions of narration, agency and power. We will ask several interrelated questions: How have historians integrated women into narratives of American religious history? Whose stories have they highlighted, and why? How have they conceptualized women as historical agents? We will read major interpretive works as well as theoretical accounts of gender, social structure, and power. Readings will explore the diversity of religious traditions in America, including Puritanism, Judaism, Mormonism, Catholicism, African-American Christianity, evangelicalism, and Islam. Jointly offered in the Divinity School as HDS 2186

Course Notes: Offered jointly with the Divinity School as HDS 2186.

Religion 3421 Section: 01

Seminar for Advanced New Testament and Religions of the Ancient Mediterranean (213513)

Giovanni Bazzana
Rachel Love

2021 Spring (4 Credits) Schedule: R 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This graduate seminar will focus on oracles and divination in the ancient world in their capacity as a widespread phenomenon. The course will deal with texts and material artifacts pulled from a broad range of epochs and regions across the ancient Mediterranean. We will explore the historical, literary, and artistic significance of this evidence in order to understand more adequately, for example, ancient concepts of divine-human communication, integration of divinatory practices into literatures, and authorization in religious and political discourses. This is an interdisciplinary course that focuses on developing research and communication skills across classics, religious studies, and ancient history.

Participation in the seminar is encouraged for those thinking about academic work and for those interested in deepening their familiarity with the fields of New Testament studies and/or Religions of the Ancient Mediterranean. A basic acquaintance with the fields is required. Jointly offered as Ancient Studies 201 and with Harvard Divinity School as HDS 1981.
Religion 3425A Section: 01

New Testament Seminar for Doctoral Dissertations (125389)

Giovanni Bazzana

2020 Fall (2 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 30

Biweekly presentation of research projects. May be taken on a Sat/Unsat basis only. This is an indivisible course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit. Jointly offered with the Divinity School as HDS 1995A.

Course Notes: Offered jointly with the Divinity School as 1995A. Meets biweekly.

Romance Languages and Literatures
Subject: Catalan

Catalan 10
Introduction to Catalan (114279)
Aina Obis Monne
2020 Fall (4 Credits) Schedule: TR 0300 PM - 0430 PM
Instructor Permissions: None Enrollment Cap: n/a

This course offers a set of units that, while introducing critical topics of contemporary social, political, territorial, and artistic debates, teach the basics of Catalan language and culture. Students will engage in interactive communicative activities and strengthen their interpretive and presentational skills through the practice of written and oral discourse, both synchronously and asynchronously. By the end of the course students will be able to interact in daily situations with native speakers, read and write messages about themselves and other topics, and interpret cultural expressions and products.

Course Notes: Conducted in Catalan. Knowledge of another Romance language is useful but not essential. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Class Notes: NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the instructor if you have a time zone or other scheduling conflict.

French 10

Beginning French I: Cross-Cultural Encounters in French (126933)

Nicole Mills

2021 Spring (4 Credits)

Schedule: MTWR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap: n/a

This beginning French course addresses the theme of cross-cultural encounters in French through engagement in the discussion and interpretation of texts, art, images, and film. You will gain an introduction to the French language with emphasis on interpersonal communication and the interpretation and production of language in written and oral forms. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the French language and francophone culture(s). Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms.

Course Notes: French 10 is an elementary French course for students with little or no knowledge of French. French 10 may count toward the language requirement. Open to students who have not previously studied French or who have scored below 300 on the Harvard placement exam. Students who have studied French for two years or more in secondary school must begin at French 11 or higher. May not be taken Pass/Fail. Not open to auditors. Graduate students may take the course SAT/UNSAT with permission of course head. French 10 is taught by members of the Department.

PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

**Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap: n/a

In the second course in the Beginning French sequence, you will engage in a virtual simulation of life in Paris. The course will immerse you in the French language and Parisian life through virtual reality experiences, social networking platforms, and interactive discussions with native French speakers. Topics explored in the class include surrealism at the Centre Pompidou museum, Harlem musicians in Paris, the quarters of Paris, and current events (i.e., yellow vest movement, Covid19, etc.) As a result of this exploration, you will begin to be able to speak and write in the past, present, and future tenses, make suggestions, express emotions, express opinions, extend, accept, and refuse invitations, give advice, and express hypothetical situations. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. Asynchronous online assignments will develop your interpretive and presentational skills in French.

Course Notes: French 11 may count towards the language requirement. May not be taken Pass/Fail. Not open to auditors. Graduate students may take the course SAT/UNSAT with the permission of course head. This course is taught by members of the Department. Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

Recommended Prep: Completion of French Aa/10, or a score no lower than 301 and no higher than 450 on the SAT II test or the Harvard Placement test.

French 16

Reading, Understanding and Translating Written French for Research (111933)

Nicole Mills

2020 Fall (4 Credits) Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

French 16 offers an introduction to reading and translating academic French texts for students who require a basic knowledge of French for research purposes. The course presents vocabulary and the principal structures of French grammar in a systematic and coherent order. The course begins with simple texts and advertisements, then moves to academic texts with more complex structures, and ends with the translation and analysis of literary works and philosophical texts. The assignments are discipline-specific to accommodate students' research needs. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and discussion.

Course Notes: Conducted in English. Not open to students with a score of 500 or above on the Harvard Placement Test or the SAT II French test, to those with more than one year of undergraduate French, or to auditors. May not be used to fulfill the language requirement and may not be taken Pass/Fail, but may be taken Sat/Unsat by graduate students with permission from the course head. This course is taught by members of
the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: Some previous study of a Romance language helpful but not necessary. Fluency in English required.

French   20

Intermediate French: Francophone Culture in Local Communities (126938)

Karen Turman

2020 Fall (4 Credits)   Schedule:   MWF 1030 AM - 1145 AM

Instructor Permissions:   None   Enrollment Cap:   n/a

In this intermediate-level language course, you will review your knowledge of various grammatical structures by exploring cultural topics such as music, dance, and cuisine in French-speaking communities. Themes such as family life in West Africa, immigrant communities from Haiti, and cuisine in Morocco will be broached through communicative activities to further develop proficiency in reading, listening, speaking, and writing. You will discover francophone cultures through conversations with online language partners abroad, guest visitors via Zoom, and course materials including film, music, and texts. The course will be conducted through synchronous Zoom sessions as well as asynchronous activities using Voice Thread, Slack, and Canvas. Course assignments include contextualized grammar activities, creative writing compositions, oral presentations, video projects, and online discussions.

Course Notes: Conducted in French. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

In order to accommodate the shift to the online course format, the four contact hours per week that were previously required will now be a combination of online synchronous Zoom sessions with the full class and/or small groups in addition to asynchronous Voice Thread activities and online partner conversations through the Talk Abroad platform. To this end, students will be required to purchase an access code for Talk Abroad ($40-50) as part of the course materials.

Class Notes: This course requires an average of four contact hours per week. To supplement the scheduled 3.75 hours, a 30-minute online component will be arranged every other week. To this end, students will be required to purchase an access code for the online conversation program, Talk Abroad ($40-50).

Recommended Prep: A score no lower than 451 and no higher than 600 on the SAT II test or the Harvard Placement Test; 3 years of French in high school; French 11 or 15; or permission of course head.

Intermediate French: Francophone Culture in Local Communities (126938)

Karen Turman

2021 Spring (4 Credits)  Schedule: MWF 1030 AM - 1145 AM
Instructor Permissions: None  Enrollment Cap: n/a

In this intermediate-level language course we will explore cultural topics such as music, dance, and cuisine in France and other French-speaking countries. We will in turn expand our discovery of Francophone cultures through conversations with online language partners, interactive discussions with French-speaking guests during synchronous Zoom sessions, and virtual exploration of local French-speaking communities through remote learning. Themes such as family life in West Africa, sustainability in the French-speaking Pacific, and First Nation dancers in Quebec will be broached through communicative activities in order to build on oral, written, and intercultural competences. Using various texts, films, and multimedia resources as a basis for discussion, we will also build vocabulary and review and refine various grammatical structures. This course will be taught synchronously via Zoom during your scheduled section time on Monday/Wednesday/Friday. Asynchronous components to be completed outside of the Zoom sessions will include Voice Thread activities, Canvas Assignments, and Talk Abroad online partner conversations.

Course Notes: Conducted in French. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

**French 30**

Upper level French: Current Events and Media in the Francophone World (126942)

_Ericka Knudson_

2021 Spring (4 Credits) Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: None Enrollment Cap: n/a
In this advanced intermediate course, you will explore current events in French-speaking countries through a variety of media. Engaging in interactive communicative activities, both synchronously and asynchronously, you will cover topics associated with politics, art, sports, literature, and scandal. From the written press to social media, you will interpret and analyze authentic texts, including newspaper articles, music, images, film, and advertisements. You will also refine your speaking skills through class discussion as well as in conversations with native speakers abroad. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class, in small groups and with online guest speakers. Asynchronous online activities will develop your interpretive and presentational skills in French on various platforms. Course assignments include a collectively developed online newspaper and a news broadcast or cultural program. This course will be conducted entirely in French.

Course Notes: Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details on the French 30 Canvas site. This course is taught by members of the Department.

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, a 30-minute online activity or workshop will be arranged each week. To this end, students will be required to purchase an access code for the online conversation program, Boomalang ($30).

PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

Recommended Prep: A score no lower than 601 and no higher than 680 on the SAT II test or the Harvard Placement test; French 20; or permission of course head.

Engaging in interactive communicative activities, both synchronously and asynchronously, you will cover topics associated with politics, art, sports, literature, and scandal. From the written press to social media, you will interpret and analyze authentic texts, including newspaper articles, music, images, film, and advertisements. You will also refine your speaking skills through class discussion as well as in conversations with native speakers abroad. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together.
as a class, in small groups and with online guest speakers. Asynchronous online activities will develop your interpretive and presentational skills in French on various platforms. Course assignments include a collectively developed online newspaper and a news broadcast or cultural program. This course will be conducted entirely in French.

Course Notes: Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details on the French 30 Canvas site. This course is taught by members of the Department.

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, a 30-minute online activity or workshop will be arranged each week. To this end, students will be required to purchase an access code for the online conversation program, Boomalang ($30).

Recommended Prep: A score no lower than 601 and no higher than 680 on the SAT II test or the Harvard Placement test; French 20; or permission of course head.

**French 40**

Advanced French I: The Contemporary Francophone World Through Cinema (126997)

*Ericka Knudson*

2021 Spring (4 Credits)

**Schedule:** TR 0300 PM - 0415 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

In this advanced French language and culture course, you will explore francophone culture(s) through contemporary films. The course is designed to strengthen language proficiency, explore different registers of language, and further refine your grammatical understanding while offering an introduction to film analysis. You will engage in interactive communicative activities, both synchronously and asynchronously, exploring themes such as regional differences, Paris and the banlieue, immigration, post-colonialism, cinematic self-portraits, and gender through readings such as film reviews, interviews with directors, and script excerpts. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class and in small groups. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms. Course work also includes creative interactive writing assignments, short compositions, scripts, and a short film. No previous familiarity with film study is necessary. This course is conducted entirely in French.

**Course Notes:** Conducted in French. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, a 30-minute online activity or workshop will be arranged each week.

**PLEASE NOTE:** Students must complete online information survey on Canvas before registering for the course.

**Recommended Prep:** French 30, 681-720 on the SAT II test or the Harvard Placement test; or permission of course head.

Advanced French II: Écrivons droit(s)/ Writing Right(s): Justice, Equity, Rights, and Writing (126998)

Karen Turman

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Through the lens of social justice issues in France and the Francophone world, this class will focus on writing as a means of civic engagement. You will interrogate topics such as colonialism, islamophobia, immigration, and sexism by studying a range of creative, analytical, and polemical texts, images, and film. This course builds on the communicative competence acquired in French 40, with a particular emphasis on developing your writing proficiency through creative and analytical writing projects such as description, portrait, film review, and polemical essays. This course will be conducted through synchronous Zoom sessions and scheduled Talk Abroad conversation meetings.
as well as asynchronous activities using Voice Thread, Slack, and Canvas.

Course Notes: Conducted in French. Students must complete online information survey on Canvas before registering for the course. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. In order to accommodate the shift to the online course format, the four contact hours per week that were previously required will now be a combination of online synchronous Zoom sessions with the full class and/or small groups in addition to asynchronous Voice Thread activities and online partner conversations through the Talk Abroad platform. To this end, students will be required to purchase an access code for Talk Abroad ($40-50) as part of the course materials. PLEASE NOTE: Class time may be subject to change based on students’ time zone constraints. Please be in touch with the course head if you have a time zone conflict. ALSO: Students must complete online information survey on Canvas before registering for the course.

Recommended Prep: French 40; a score of 721-750 on the SAT II test or the Harvard Placement test; or permission of course head.

The New Wave: Reinventing French Cinema (109320)

Ericka Knudson

2021 Spring (4 Credits)  Schedule: TR 1200 PM - 0115 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This advanced language and culture course explores a unique perspective on French society and culture through New Wave films from the late 1950s and 1960s. Through synchronous and asynchronous communicative activities, and weekly film screenings, you will engage in interactive discussions and debates on topics associated with gender, aesthetics, and literary influences. You will interpret and analyze different registers of language in film scripts and literary texts and further develop your writing proficiency for academic contexts through written film analysis (begun in French 40) and theoretical papers designed to prepare you for 70-100 level courses. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication as a full class and in small groups. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms. For the final project, you will write a script and develop it into a short film.

Course Notes: Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Students may take no more than one course at the 60-level.

PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

Recommended Prep: French 50 or another French course at the 50-level; 751-780 on the SAT II or the Harvard placement test; or permission of the course head.
Modern Stories about Paris (116673)

Ericka Knudson

2020 Fall (4 Credits)  Schedule:  TR 1030 AM - 1145 AM

Instructor Permissions:  Instructor
Enrollment Cap:  n/a

This advanced language and culture course examines modern narratives, in a mosaic of perspectives, set in and around Paris. Through synchronous and asynchronous communicative activities centered on the interpretation and analysis of texts, films, songs, and interviews, as well as interactive online discussions with guest speakers from Paris, you will discover diverse stories about the Parisian experience. By reading, watching and listening to these stories, you will gain insight into various forms of narration and refine your knowledge of written and spoken French grammar and vocabulary. The course will focus on typical gaps found in advanced learners' linguistic repertoires, such as contemporary slang, and refine your ability to distinguish different registers of language. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class and in small groups. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms. Course work also includes creative writing assignments and a final project that will solidify your ability to imagine, summarize, interpret, critique, and substantiate arguments about the Parisian experience.

Course Notes: Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by graduate students. Students may take no more than one course at the 60 level.

Recommended Prep: French 50 or another French course at the 50 level; 751-780 on the SAT II or the Harvard placement test; or permission of course head.

Exploring French Language and Culture Through Industry: Fashion, Cuisine, and Cabarets (217619)

Karen Turman

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

In this advanced French language and culture course we will interrogate themes such as class, space, and cultural appropriation through the lens of marketing, sustainability, and business ethics in France. By contextualizing examples ranging from the department stores on Boulevard Haussmann to the commercialization of art and entertainment in Paris during the 19th century, we will explore the evolution of major French industries and their cultural legacy today. To this end, we will analyze videos, articles, literary texts, and images as well as engage with guest speakers from France as well as the Harvard community. Course work will include daily readings and exercises, in-class and online written and oral assessments, compositions, a video presentation, and a final written project.

Course Notes: Conducted in French. Students must complete online information survey on Canvas before registering for the course. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. In order to accommodate the shift to the online course
format, the four contact hours per week that were previously required will now be a combination of online synchronous Zoom sessions with the full class and/or small groups in addition to asynchronous Voice Thread activities and online partner conversations with university students in France. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict. ALSO: Students must complete online information survey on Canvas before registering for the course.

Recommended Prep: A score of 750-780 on the SAT II test or the Harvard Placement test; French 50; or permission of course head.

Text and Image: Novels & their Film Adaptations (216059)

Annabel Kim

2020 Fall (4 Credits)  

Schedule:  

M 1030 AM - 1145 AM

Instructor Permissions:  

Enrollment Cap: 10

This course is an introduction to French literature spanning from the seventeenth century (Madame de Lafayette) to the contemporary moment (Virginie Despentes) that reads French classics against and alongside their cinematic adaptations. What can a text do that an image cannot? What can the image do that language cannot? By reading these novels in relation to the adaptations they inspired, we will explore the limits and possibilities of narrative and see how reading and interpreting become a way to make new narratives.

Course Notes: Conducted in French.

Class Notes: Conducted as a tutorial (modeled after the intense, two-on-one tutorials taught at Williams College, themselves modeled after the Oxford tutorial), this course places great emphasis on student participation and engagement, and will offer students the opportunity to get to know and engage with each other and the professor in ways that even a small seminar cannot offer. Please see course Canvas site for more detailed information.

Class Notes: This course will meet 2x/week, 75 minutes each session. The first session will meet on Mondays, 10:30-11:45, but this can be modified in order to accommodate time zones. The second meeting session will be determined based on students' schedules.
French 76
Protest, Dissent, and Resistance in French Literature (207990)

Virginie Greene

2021 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

A broad survey of French literature starting in the Middle Ages and ending today, focusing on various forms and expressions of dissensus in French cultures, past and present.

Course Notes: Conducted in French

Recommended Prep: Recommended Prep: a 50-or 60-level course in French; a score above 780 on the SAT II test or the Harvard placement test, equivalent preparation, or permission of course head.

French 80
French Theater Across Time and Media: An Introduction to Performance, or Why Theater Matters (109826)

Sylvaine Guyot

2020 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

Aims to help students, including those who are genuine novices in acting, to understand and experience theater as a form of physical expression that evolve as aesthetic and ideological contexts change across time. Readings include the most famous French playwrights of both the early modern age (Molière, Corneille, Racine) and the later 20th / early 21st centuries. We explore how theater is used to interrogate questions such as sexual taboos, social injustices, or political engagement. Special emphasis paid to the power of performance through practical workshops and videos of recent productions. The final project consists of an excerpt to be performed in French.

Course Notes: Conducted in French. May not be taken for credit by students who have previously taken French 71a or FRSEMR 30r.
Class Notes: Additional discussion section to be determined based on student enrollment.

Recommended Prep: A 60- or 70-level course in French; a score above 780 on the SAT II test or the Harvard Placement test, equivalent preparation, or permission of course head.

Supervised Reading and Research (113533)

Annabel Kim

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

Tutorial supervision of research on subjects not treated in regular courses.

Course Notes: Limited to juniors and seniors. Students wishing to enroll must petition the Undergraduate Adviser in French for approval, stating the proposed project, and must have the consent of the proposed instructor. Ordinarily, students are required to have taken some coursework in the area as background for their project. May not be taken more than twice, and only once for concentration credit.

This course is taught by members of the Department.

French 91R

Supervised Reading and Research (113533)

Annabel Kim

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

Tutorial supervision of research on subjects not treated in regular courses.
Course Notes: Limited to juniors and seniors. Students wishing to enroll must petition the Undergraduate Adviser in French for approval, stating the proposed project, and must have the consent of the proposed instructor. Ordinarily, students are required to have taken some coursework in the area as background for their project. May not be taken more than twice, and only once for concentration credit.

This course is taught by members of the Department.

French 99A
Tutorial - Senior Year (111988)
Annabel Kim
2020 Fall (4 Credits)  Schedule: TBD
Instructor Permissions: Instructor  Enrollment Cap: n/a
Weekly individual instruction for students writing a senior thesis. Part one of a two part series.

Course Notes: For honors seniors writing a thesis. Successful completion of two terms of French 99 is required of all thesis-track honors concentrators. Students who do not complete a thesis are required to submit a substantial paper in order to receive either half course or full course credit.

This course is taught by members of the Department.

Recommended Prep: Satisfactory completion of a junior tutorial and prior faculty approval of proposed thesis topic.

Requirements: Prerequisite: French 98 OR Italian 98 OR Portuguese 98 OR Spanish 98 OR Romance Studies 98 OR Latin American Studies 98

Crimes of Passion: Balzac's Short Stories (161239)
Janet Beizer
2020 Fall (4 Credits) Schedule: W 0300 PM - 0500 PM
Instructor Permissions: None Enrollment Cap: n/a

Readings of Balzac's turbulent short stories will be complemented by consideration of the culture of crimes of passion, and the influence of the developing media in France as we work with newspapers, film, and art for a broad-based historico-cultural background.

A La Francaise: French Feminisms Today (108716)
Alice Jardine
2021 Spring (4 Credits) Schedule: M 1200 PM - 0200 PM
Instructor Permissions: None Enrollment Cap: n/a

Close readings of postwar French fiction and theory with emphasis on what is called "the feminine" in key psychoanalytic, philosophical, and literary writings of the French poststructuralist tradition. In particular, we will focus on fifty years of dialogue between postwar theory in France and feminist practice in the United States. Writers considered include Cixous, Duras, Irigaray, Kristeva, and Wittig as well as Deleuze, Derrida, and Lacan.
Course Notes: This course occurs entirely in French.
Recommended Prep: Excellent reading knowledge of French.

Vision and Violence: Face-to-Face Encounters, Affects, and Politics in Early Modern France (127874)

*Sylvaine Guyot*

2021 Spring (4 Credits)

Schedule: W 0945 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Explores early modern ways of depicting and showing violence (physical, political, domestic, supernatural). The spectacle of violence represents a site of cultural conflict during the 17th century, since it implies both the pleasure taken by the viewer and the risk of imitation. Readings include plays, tragic histories, utopian and travel literature, historical and theoretical texts (Foucault, Rancière, Marin, Elias, Lyotard), and the analysis of images (paintings, frontispieces).

Course Notes: Conducted entirely in French.

Inventions of Liberty: Day, Night, and Geography of the Enlightenment (216090)

*Tom Conley*

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Building on Starobinski’s The Invention of Liberty, this course aims to follow an itinerary that goes from the reign of the Sun King (1714) to the tribulations of the Terror (1793) and Napoleon’s rise to power, from
"subject" to "citizen". The starting question will be: how did the great Enlightenment writers «invent» the concept of 'liberty'? For what reasons and to what ends? An unavoidable question: if the century celebrates the « day », where does that leave the « night »? Following Starobinski, the course will cover spaces urban and rural, public and private, in Europe and in the colonies, as well as human geography. We will examine the socio-political changes that lead to the Revolution of 1789, as well as what follows: modernity.

Course Notes: This course will be taught in French.

Class Notes: First class meeting will be Thursday, September 3rd at 3:00. Remaining course schedule will be determined based on student enrollment.

#### French 149

**Queer Fictions (205160)**

*Annabel Kim*

2021 Spring (4 Credits)

**Schedule:**

F 1200 PM - 0200 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 20

A survey of modern and contemporary twentieth- and twenty-first-century queer French literature. We will begin first with an introduction to some canonical texts in queer theory (e.g. Sedgwick, Butler, Bersani, Warner) and proceed to the fictions (Genet, Guibert, Louis, Leduc, Wittig, Best, Garréta) to see the ways in which literature itself theorizes and does the work of deconstructing identity and desire.

Course Notes: Conducted in French, except for the first two weeks, which will be conducted in English.

#### French 173

**Turmoil and Bliss: Poetry in France (1490-1530) (216091)**

*Tom Conley*

2021 Spring (4 Credits)

**Schedule:** TBD

**Instructor Permissions:** None

**Enrollment Cap:** n/a
The aim of this course is to study the growth, dissemination, and impact of poetry in France from the age of the incunabulum (the printed book before 1500) to the waning years of the Wars of Religion (1580-98). It will take up five generations and, as it were, as many or more styles of expression: (1) the force of form that drives La Grande Rhétorique and the first editions of the Testament of François Villon (1489-98); (2) the "transitional" but indelibly influential verse of Jean Lemaire de Belges (1505-1525); (3) the Reform and Evangelical calling of Clément Marot (1525-1545); (4) the impact of the École de Lyon in the 1550s, in Maurice Scève's Delie (1544) and Louise Labé's élégies and sonnets (1555); (4) led by Joachim Du Bellay and Pierre de Ronsard, the panache and splash of the Pléiade from its beginnings up to the Religious Wars (1549-1562); (5) the "baroque" character of epic and religious turmoil in Ronsard, Guillaume Du Bartas, and Agrippa d'Aubigné (1570-1600). From the sum of we can contend that poetry in this troubled age internalizes, intensifies and, like a prism, refracts difficult issues about the nature of belief; political upheaval in the Reform and Counter-Reformation; apprehension of the unknown with the advent of oceanic travel and new discoveries; finally, in the waning years of the century, millenarian fears that world is drawing to its end.

The method of the course will be its madness: we will engage close readings from a selected canon that includes: (1) samples of verbal gymnastics in Jean Molinet's Faictz et dictz (circa 1470-75) ; (2) "gothic" tessellations in the play of ballads, woodcuts, and octains in the Testament (1489); Lemaire's « Epistres de l'amant vert » and Concorde des deux langaiges (in the ongoing Œuvres complètes of 1512-1515, and Antoine Du Moulin's re-edition in Lyon, 1549); (3) in collaboration with typographer Geoffroy Tory, Clément Marot's edition of Villon (1532) and the Adolescence clémentine (1545), a collection of early and later verse both joyous and fraught with doubt ; (4) hermetic form and abjection in Scève's Delie (1544) and Saulsaye (1549) ; (5) the « Petarchan » sonnets Du Bellay pens in L'Olive (1549 and their contrary in Les Antiquitez de Rome (1558), Les Regrets (1558) and Les Jeux rustiques (also 1558, including « Contre les pétrarquistes ») ; (6) poetry and « désir » in Ronsard's Amours (1552) and its « Continuations » (1553-1556) ; (7) the birth of the polemical « Discours » (1562-65) that inspire d'Aubigné's epic Tragiques (1575-80, published in Geneva, 1615) ; the 'late' Ronsard of the Sonets à Hélène (1578) ; the worldview and cosmography of Guillaume Du Bartas, La Sepmaine (1578). Participants in the course will determine what we wish to « do » and, from a creative angle, what will be our art de faire.

Most of the readings will be supplied online, through Gallica ; by way of pages scanned from Floyd Gray, ed., Anthologie de la poésie du seizième sié

Class Notes: First class meeting will be Wednesday, January 27, 3:00-5:00. Remaining course schedule will be determined based on student enrollment.

French 180

"The Words to Say It": 20th-century Women Writing in French, From Colette to Satrapi (126038)

Alice Jardine

2020 Fall (4 Credits) Schedule: M 1200 PM - 0200 PM

Instructor Permissions: None Enrollment Cap: n/a
Motherhood, romantic love, independence, sexuality, citizenship, fantasy, death: these are just some of the themes explored in women's novels, written in French, during the twentieth century. Students will read four exemplary novels, exploring how they have finally become classics, even given what they say about life and what it means for women to write about it. At the same time, the advent and development of feminist and/or queer literary criticism over the course of the 20th century will be explored. Finally, we will consider what this 20th-century trajectory means for women writers today, culminating our study in a discussion of a 2016 novel that took the Francophone world by storm. The seminar has been modified to reflect distance learning requirements leading to a lively and successful seminar experience while ensuring everyone's safety.

France-North Africa, Encounters in Literature and Film: Cultures of Protest and Violence (211119)

Verena Conley

2021 Spring (4 Credits) Schedule: R 0300 PM - 0500 PM

Instructor Permissions: None Enrollment Cap: n/a

Focusing on fiction, film and other media, this course deals primarily with encounters between North Africa, Algeria, Morocco, Tunisia and France; but also, with Italy and Spain, from independence to today. Through the lens of protest cultures and violence, we will study and compare political, social and media entanglements among countries joined and separated by the Mediterranean, from colonial uprisings to the “Black decade” of terror, the Arab Spring, disenchantment with nationalisms, and today’s forced migrations. Special attention will be paid to the ties between violence, protest and artistic forms.

French 245
Against Difference: Monique Wittig's Trojan Horse Writing and Theory (216060)

Annabel Kim
2021 Spring (4 Credits) Schedule: F 0300 PM - 0500 PM
Instructor Permissions: Instructor Enrollment Cap: 15

French feminism, as it is studied and taught in the Anglo-American academy, is most often associated with the three names that constitute the "Holy Trinity" of Hélène Cixous, Luce Irigaray, and Julia Kristeva—thinkers whose various theorizations of sexual difference permitted the convergence of an emergent feminist literary criticism with high theory and all its cachet. The dominance of this differentialist vein of what is described as French feminism has effaced or obscured the rich but understudied tradition of anti-difference French feminism, which unequivocally rejects the notion of any kind of essential sexual difference.

This graduate seminar, which is open to advanced undergraduates, will explore the anti-differentialist strand of French feminism, taking Monique Wittig as our primary author and an exemplary figure of both feminist thought and literature—a figure for whom the literary is political and the political, literary. We will explore Wittig's entire corpus, reading it alongside the major anti-differentialist French feminist thinkers with whom Wittig was in conversation—Nicole-Claude Mathieu, Christine Delphy, Colette Guillaumin, Paola Tabet—to chart out a different account of French feminism than we get with the more familiar history and poetics of differentialist French feminism. In doing so, we will explore how the story we tell of feminist theory is as essential to feminist projects as the theory itself.

Course Notes: Readings in French, discussions and written work conducted in English. Wittig's fiction is available in inferior/questionable English translations. Students are welcome to read the English translations if they wish, and we can discuss how Wittig gets (mis)translated and what a difference translation makes.

### Subject: Romance Studies

**Romance Studies 91R**

_Supervised Reading and Research (123138)_  
_Kathy Richman_
Tutorial supervision of research in subjects not treated in regular courses.

Course Notes: Limited to juniors and seniors. Students wishing to enroll must petition the Undergraduate Adviser in Romance Studies for approval, stating the proposed project, and must have the consent of the proposed instructor. Ordinarily, students are required to have taken some course work in the area as background for their project. May not be taken more than twice, and only once for concentration credit.

This course is taught by members of the Department.

Romance Studies 97

Sophomore Tutorial: Poetics, Practice, and Politics in Romance Societies (114941)

Kathy Richman

2021 Spring (4 Credits) Schedule: TBD
This course introduces students to a range of analytical and theoretical approaches to "reading" fiction, poetry, film, and essays. We will pair critical writings and creative texts of importance to the Romance world to help students develop their own voice and analytical stance. Prepares students for advanced work in literary and cultural studies in Romance Languages and Literatures and related fields.

Course Notes: Language of instruction to be decided upon by student in consultation with the Undergraduate Adviser in Romance Studies. Successful completion of one term of Romance Studies 97 (or equivalent) is required of all concentrators in their sophomore year.

Romance Studies 99A

Tutorial - Senior Year (108907)

Kathy Richman

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: n/a

Weekly individual instruction for students writing a senior thesis in Romance Studies. Part one of a two part series.

Course Notes: For honors seniors writing a thesis. Successful completion of two terms of Romance Studies 99 is required of all thesis-track honors concentrators. Students who do not complete a thesis are required to submit a substantial paper in order to receive either half course or full course credit.

This course is taught by members of the Department.

Recommended Prep: Satisfactory completion of a junior tutorial and prior faculty approval of proposed thesis topic.

Requirements: Prerequisite: French 98 OR Italian 98 OR Portuguese 98 OR Spanish 98 OR Romance Studies 98 OR Latin American Studies 98

Romance Studies  110
Haiti, Cuba, Martinique: Plotting Resistance in Fiction and Film (161274)

Kathy Richman

2020 Fall (4 Credits)  

Schedule:  
TR 1200 PM - 0115 PM

Instructor Permissions:  
Instructor

Enrollment Cap:  
20

What makes a novel moving, a film disturbing? How does humor work, even in the grimmest context? “Haiti, Cuba, Martinique” explores these aesthetic questions in works that engage slavery and its legacies, resistance and revolution, and paths to “development.” We will consider historical context and discuss categories like "genre" fiction, didactic writing, realism, romanticism, and la littérature engagée, or "committed" literature. Includes works by Alejo Carpentier, Chamoiseau, Condé, Guillén, Gutiérrez Alea, Lahens, and Roumain.

Course Notes:  
Taught in English. For concentration and secondary credit in Romance Languages and Literatures, readings and written work must be done in French or Spanish.

Class Notes:  
In the unlikely event that students need accommodation for time zone differences, course meeting times may change.
Romance Studies 138

Literature and Urban History: Views from Brazil and the United States (217625)

Bruno Carvalho
Sidney Chalhoub

2021 Spring (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 15

In this seminar we will focus on novels about urban experience, paying particular attention to how they represent what subordinate peoples do with what is done to them (the enslaved and their descendants, migrants, dependents, women, workers). We will study major authors and works of late 19th- and early 20th-century fiction in Brazil and the United States, attentive to points of contact between cities in both countries during a period of intensive urbanization. Questions of class, gender and identity-formation in the general context of defining and setting new limits of citizenship rights will be emphasized.

Course Notes: This course is also offered through the History Department as HIST 1933. Credit may be earned for either ROM-STD 138 or HIST 1933, but not both.

Romance Studies 168

Futurisms (a comparative history) (205157)

Jeffrey Schnapp

2020 Fall (4 Credits) Schedule: W 1200 PM - 0200 PM

Instructor Permissions: None Enrollment Cap: n/a

From its foundation in 1909 through WWII, futurism developed into the first international cultural-political avant-garde. Its aim was the revolutionary transformation of all spheres of life and its influence extended from Europe to the Americas to Asia. The seminar adopts a cross-disciplinary and comparative focus; and includes such topics as humans and machines; experimental poetics; futurism's ties to anarchism, bolshevism and fascism. Media surveyed include poetry, performance, music, painting, photography, radio, and film.
Romance Studies 201

Questions of Theory (205260)

*Doris Sommer
Nicole Suetterlin*

2020 Fall (4 Credits)  
**Schedule:**  T 1200 PM - 0245 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

To explore key literary, cultural and critical theories, we pose questions through readings of classic and contemporary theorists, from Aristotle to Kant, Schiller, Arendt, Barthes, Foucault, Glissant, Ortiz, Kittler, and Butler, among others. Their approaches include aesthetics, (post)structuralism, (post)colonialism, media theory, gender theory, ecocriticism. Each seminar addresses a core reading and a cluster of variations. Weekly writing assignments will formulate a question that addresses the core texts to prepare for in-class discussions and interpretive activities.

**Course Notes:** Conducted in English. This course is also offered as Romance Studies 201 and German 291. Credit may be earned for Romance Studies 201 or German 291, but not both.

Romance Studies 290

Migration and the Humanities (205269)

*Homi Bhabha
Mariano Siskind*

2021 Spring (4 Credits)  
**Schedule:**  R 0300 PM - 0500 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

By focusing on literary narratives, cultural representations, and critical theories, this course explores ways in which issues related to migration create rich and complex interdisciplinary conversations. How do humanistic disciplines address these issues—human rights, cultural translation, global justice, security, citizenship, social discrimination, biopolitics—and what contributions do they make to the "home" disciplines of migration studies such as law, political science, and sociology? How do migration narratives compel us to revise our concepts of culture, polity, neighborhood, and community? We will explore diverse aspects of migration from existential, ethical, and philosophical perspectives while engaging with specific regional and political histories.

A basic beginning semester course for students with no previous study of Spanish. Emphasis on speaking,
writing, reading, and listening, as the basis for the development of all three Communication Modes (Interpersonal, Interpretive, and Presentational). Hispanic cultures will be introduced through a variety of texts, including readings, music, art, and film.

Course Notes: Conducted in Spanish. Open to students who have not previously studied Spanish or who have scored below 300 on the Harvard placement test. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

This course is taught by members of the Department.

Spanish 10 Section: 002
Beginning Spanish I (124982)
Jorge Mendez Seijas
2021 Spring (4 Credits) Schedule: MTWR 0900 AM - 1015 AM
Instructor Permissions: None Enrollment Cap: n/a
A basic beginning semester course for students with no previous study of Spanish. Emphasis on speaking, writing, reading, and listening, as the basis for the development of all three Communication Modes (Interpersonal, Interpretive, and Presentational). Hispanic cultures will be introduced through a variety of texts, including readings, music, art, and film.

Course Notes: Conducted in Spanish. Open to students who have not previously studied Spanish or who have scored below 300 on the Harvard placement test. May not be taken Pass/Fail, but may be taken Sat/Unsat
by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

This course is taught by members of the Department.

Beginning Spanish II (125058)

Maria Parra-Velasco

2021 Spring (4 Credits) Schedule: MWF 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

For students with the equivalent of one semester previous study of Spanish. Emphasis on strengthening students' interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and
newspaper articles. Music, art, and film are also included. After Spanish 10 and 11, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.

Spanish 11 Section: 006

Beginning Spanish II (125058)

Maria Parra-Velasco

2021 Spring (4 Credits) Schedule: MWF 1200 PM - 0115 PM

Instructor Permissions: None      Enrollment Cap: n/a

For students with the equivalent of one semester previous study of Spanish. Emphasis on strengthening students' interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and newspaper articles. Music, art, and film are also included. After Spanish 10 and 11, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.
Recommended Prep: A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.

2021 Spring (4 Credits)  Schedule:  MWF 0900 AM - 1015 AM
Instructor Permissions:  None  Enrollment Cap:  n/a
An advanced language class that reinforces the practice of oral and written communication in Spanish through topics in contemporary cultural materials from Spain and Latin America. Students will focus on improving proficiency, refining pronunciation and acquiring vocabulary. In addition to in-class discussions, course work involves grammar review and practice in writing. Consult course website for current semester topics.

Course Notes: Conducted in Spanish. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

This course is taught by members of the Department.

Recommended Prep: A score between 601-680 on the SAT II test or on the Harvard Placement Test, Spanish C, or permission of course head.

Frequent written and oral assignments, and a thorough review of grammar. Consult course website for current semester topics.

Course Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students’ time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: A score between 681-720 on the SAT II test or on the Harvard Placement Test, AP 5, Spanish 30, or permission of course head.
Instructor Permissions: None  Enrollment Cap: n/a

An advanced language and culture class that further develops linguistic competence using a region or regions of the Hispanic world as a focus for class discussion, grammar review, and an introduction to Hispanic social contexts and texts. Course materials may also include films, interviews, paintings, photography, music, selections from the press, as well as literary or historical readings. Frequent written and oral assignments, and a thorough review of grammar. Consult course website for current semester topics.

Spanish 49H

Languaging and the Latinx identities (109820)

Maria Parra-Velasco

2020 Fall (4 Credits)

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This course builds on students' knowledge of Spanish to explore the relationship between their languaging practices and their Latinx identities. Understanding languages as a way of knowing and meaning making, we use a variety of texts, genres, music, videos, films and visual arts to engage in discussions about family heritage, migration, and Latinx cultural and linguistic traditions and innovations. Students will strengthen their oral and written abilities, expand their interpersonal, interpretive and performative resources for languaging in informal and academic contexts.

Course Notes: Spanish 49h was formerly Spanish 35; therefore, students cannot take 49h if they've already taken 35. Spanish 49h should be a prerequisite for 59h (or permission of the instructor). PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Spanish 50

Advanced Spanish II: Creative Writing and Performance (115920)

Adriana Gutierrez

2020 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

An advanced language course designed to strengthen and develop competence in written expression. Close reading of texts in literary and non-literary genres will help students refine personal style. The performance of short excerpts of plays, combined with advanced work on oral expression and phonetics,
will help students increase their fluency and ease of expression.

Course Notes: Conducted in Spanish. Recommended for concentrators. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: A score between 721-750 on the SAT II test or on the Harvard Placement Test, Spanish 40, or permission of course head.

Spanish for Latino Students II: Connecting with Communities (159938)

*Maria Parra-Velasco*

2021 Spring (4 Credits)  
**Schedule:** TR 1200 PM - 0115 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

An advanced language course for Spanish heritage learners that aims to: strengthen students' oral and written linguistic range, with emphasis on Spanish use for academic contexts; and to further develop students' critical language and social awareness around important issues for Latinos in our globalized era: Spanish as global language, identity, language rights, global migration and labor, U.S.-Latino America relations, food and environment, the 'war on drugs'. Students explore these topics through various genres (newspapers and academic articles, debates, literary essays, short novels, poetry, visual art, film and music) and through 4 hours a week of community service.

The Ethics of Business in Latin America (127573)

*Adriana Gutierrez*

2021 Spring (4 Credits)  
**Schedule:** TR 0130 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 30

An advanced language and culture class that examines literature and films portraying the political,
sociological, financial and environmental impact of multinational companies doing business in Latin America. Students' linguistic competency is developed through discussion of the ethics of business, grammar reviews, and weekly writing assignments. Students will also choose a specific project for a business in Latin America and research its possible outcome and social, political, and environmental consequences.

Course Notes: Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Recommended Prep: A score between 751 and 780 on the SAT II test or Harvard Placement test, a Spanish 50-level course, or permission of course head. Students are allowed to take a maximum of two courses at the 60-level in Spanish, not including Spanish 60.

Reading and Writing in Latin America: Creative Genres (Afro-descendant Writers) (215959)
Adriana Gutierrez
2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a
An advanced language and culture class that examines literature, documentary films, journalistic articles
and other media portraying the cultural artistic and literary diversity of Afro-descendant Latin American
writers. Students' linguistic, written, reading and aural competency is developed through class
discussions, written assignments and synchronous and asynchronous task-based activities. Students will
be in charge of facilitating one creative activity during the semester, in order to help interpret and read the
text.

Course Notes: Not open to auditors. May not be taken Pass/Fail, but may be taken
Sat/Unsat by GSAS students.

Recommended Prep: A score between 751 and 780 on the SAT II test or Harvard Placement
test, a Spanish 50-level course, or permission of course head.
Students are allowed to take a maximum of two courses at the 60-level
in Spanish.

Introduction to Latin American Studies: Modernity, Culture and Politics (116263)

*Mariano Siskind*

2020 Fall (4 Credits)  
**Schedule:** M 0600 PM - 0800 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Introduces students to central debates and problems that have shaped Latin American culture. We address questions of cultural identity, gender, race, politics, economics and aesthetics by looking at historical and literary texts, films, visual arts and urban development from an interdisciplinary perspective. We analyze colonial encounters; revolutions; US-Latin American relations; popular cultures from tango and samba to football and *carnaval*; Latin American cities and slums; and memory, trauma and traces of the region's dictatorships.

**Course Notes:** Conducted in Spanish. Readings in Spanish and English.

Spanish  72

Introduction to Contemporary Spanish Literature and Culture (207836)

*Raquel Vega-Duran*

2021 Spring (4 Credits)  
**Schedule:** W 0945 AM - 1145 AM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

This course introduces students to the literature, history, and visual culture of contemporary Spain (from the 18th century through the first twenty years of the 21st century). We will study representative short stories, poems, plays, novellas, essays, paintings, photographs, and films from the Spanish War of Independence, the "disaster" of 1898, the Surrealist movement, the Spanish Civil War and the Republican Exile, Franco's Dictatorship and the Transition to Democracy, the "Movida Madrileña," and the literature of immigrants and "new" Spaniards. Through visual and written works by Goya, Galdós, Campoamor, Bécquer, Pardo Bazán, Azorín, Unamuno, Lorca, Machado, Buñuel, Laforet, Matute, Almodóvar, Martín Gaite, Puértolas, and others, students will gain a general knowledge and...
appreciation for main works, periods, and authors of contemporary Spain, and will appreciate the uniqueness and diversity of Spanish culture by establishing transnational relations between Spain and Latin America, North Africa, Asia, and Europe. All readings will be in Spanish, although we will look at texts originally written in Spanish, Catalan, Galician, and Basque.

Course Notes: Taught in Spanish.

*Words of Which History is Made: Translation Workshop on Modern Spain (126860)*

*Daniel Aguirre-Oteiza*

2020 Fall (4 Credits)  

**Schedule:** W 1245 PM - 0245 PM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12  

Through close readings and translations centering on Spanish history and society from the late 19th to the 21st century, students hone their linguistic, grammatical, and stylistic skills, and acquire the interpretive tools required to analyze increasingly complex literary and cultural texts. Course materials include short fiction, newspaper articles, memoirs, and historical essays.

**Course Notes:** Conducted in Spanish. Recommended for concentrators.

**Recommended Prep:** A score of 800 on the SAT II test or on the Harvard Placement test, a previous course in Spanish at the 70-level, or permission of course head.

2021 Spring (4 Credits)

**SCHEDULE:**

TR 1030 AM - 1145 AM

**Instructor Permissions:**

**Enrollment Cap:**

15

From classroom to kitchen, picnic or café, this advanced language and food culture course will examine the Spanish table, its history and origins, expansions and innovations, from medieval times to present-day molecular gastronomy. Frequent reading, viewing and writing assignments and classroom discussion are all designed to reinforce language skills and academic literacy in the target language. The course, along with all materials and assignments, is entirely in Spanish, primarily focusing on literary, historical, linguistic and sociological texts and topics from Spain—selections ranging from Harvard’s vast culinary collection to the most current media—with reference to Latin America and the Latino community in the United States, as well.

**Course Notes:**

This course is taught in Spanish.

**Recommended Prep:**

A score of 750 or beyond on SAT II or Harvard Placement; previous enrollment in Spanish 50 or higher; or permission of the instructor.

**Inspiring Women: The History of Women in Spain in Dialogue with Hispanic America (211120)**

**Raquel Vega-Duran**

2020 Fall (4 Credits)

**SCHEDULE:**

MW 1030 AM - 1145 AM
In this course we will examine the significant role of women in society, politics, history, and culture from the Middle Ages to the 21st century on both sides of the Hispanic Atlantic. Through films, political speeches, manuscripts, short stories, novels, newspaper articles, memoirs, and visual art, we'll study women's history, voices, and experiences in Spain, and we will often put them in dialogue with women who lived at the same time on the American side of the Atlantic. We will examine medieval beguines, witches, healers, and the Inquisition; heroines, queens, adventurers, and explorers in the Spanish empire; depictions of women at war; the relevance of age, maternity, body, and education for women; suffragettes, women politicians, and feminist movements; the "visible invisibility" of women during the early dictatorship; women in the works of male authors such as Federico García Lorca and Pedro Almodóvar; women painters, imagined, and imaged in Spain and Latin America; the concept of "third gender"; and the feminization of immigration in the twenty-first century; among other topics.

Course Notes: Conducted in Spanish.

Spanish 129R
Culture and Development in Reciprocity: Paraguay (217638)
Doris Sommer
2021 Spring (4 Credits)  Schedule:  F 0945 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  20
This seminar is an interdisciplinary approach to research about Paraguay that takes Reciprocity, a core practice in Latin American cultures, as the pedagogical structure for studying the region. Harvard students will work in reciprocal collaboration with students in Paraguay.
The first half of the semester will introduce a range of topics that include arts, social mobilization, ways of learning, environment, and public policy. By mid-semester students form pairs based on shared interests and choose a question to develop together. Harvard offers important resources for the team and Paraguay offers other important resources. Student-to-student interchanges will allow for ongoing and reciprocal social and scholarly development.
The seminar has two fundamental objectives: 1) to foster intercultural research through...
collaborations that combine perspectives on readings and inquiries; and 2) enhance capacity in English and in Spanish, reciprocally, as students read closely together and write persuasively. Pre-Texts will be the pedagogy for achieving language proficiency. Our institutional partner is Paraguay's Instituto Desarrollo, directed by José Molinas. It will serve as co-mentor for the student teams and will provide guidance for accessing resources and convening relevant scholars in Paraguay.

The co-written final paper for the course will be a "Case for Culture." This is a hybrid essay that combines humanities with social and/or natural sciences to develop the kinds of interdisciplinary collaborations made possible by reciprocity.

Course Notes: This course in Spanish with readings and advising in both languages.

Class Notes: This course is co-taught with José Molinas, Instituto Desarrollo, Paraguay

Libertades literarias: Afrolatinoamérica escribe (215958)

*Doris Sommer*

2020 Fall (4 Credits) Schedule: R 0300 PM - 0500 PM

Instructor Permissions: None Enrollment Cap: n/a

Afrodescendent writers in Latin America explore formal literary decisions as opportunities to exercise authority, no matter how unbidden the content may be. Choices of form and technique are freedoms that ignite memory, reflection, and imaginaries that outstrip existing conditions. Art presages agency in a range of social constructions.

Immigration and the Globalization of Borders (206816)

*Raquel Vega-Duran*
This course explores how film, painting, photography, literature, and multimedia projects relate to and narrate contemporary borders such as those between Mexico and the USA; Spain and Morocco; Haiti and Dominican Republic; the five borders of Manipur; other "border spaces" such as the enclosed migrant detention centers in Ceuta (Spain), Lampedusa (Italy), and California; the emergence of "new" identities such as "New Europeans," "Latiñoles," the Mei Ming generation, and the perception of Roma in Europe; and the patrolled waters that separate Cuba from the US, West Africa from the Canary Islands, and North Africa from Southern Europe; among others. We will pay particular attention to the history of these walls, fences, and controlled spaces, and the stories they tell us, and consider border-crossing experiences of migrants from a variety of perspectives. We will look in depth at the role of art in relation to these walls, both on the actual walls (artists who use the fences as canvases, such as the project "Borrando la frontera" in the San Diego/Tijuana border, and Ulises, a graphic novel written on the wall of the North African city of Melilla), as well as the ways in which these walls are chronicled in literature, film, photography, and painting (including Danticat’s novel The Farming of Bones; Spottorno’s graphic novel on refugees La grieta; the online project Poets on Borders; Sebastião Salgado’s photographic cycle Migrations; and movies such as Sin nombre and Balseros; among other works).

Course Notes: Conducted in Spanish.

Narratives of Identity about 19th- and 20th-Century Spain (207918)

Daniel Aguirre-Oteiza

What are the connections between narrative and identity? To what extent are our personal and collective identities shaped by received ideas of "others"? How does questioning "others" help us understand our ideas of culture, nation, and polity? In what ways are fear, hate, pain, and identity narratively related? What's the value of asking these questions when we read modern fiction about Spain? Texts by Cercas, Clarin, Laforet, Ndongo, Saer, Semprun, among others.

Barcelona and the Catalan Culture (109775)

Aina Obis Monne

2021 Spring (4 Credits)

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

The course offers an interdisciplinary approach to Barcelona, a multilayered space furnished by Roman, French, Muslim, and Spanish legacies that shaped a singular culture and language. Developing from periods of egalitarian social and political institutions in the Middle Ages to strong socioeconomic industrial development in the 19th century and later tourism, Spain’s most European city is inscribed by a deep sense of civic and industrious society permanently seeking innovation and modernity, yet facing the consequences of its complex past. Through readings of historians, art critics, urban designers, and writers, and supported by visual materials, the course offers an integrated perspective which opens questions in every field of the Humanities and the Social Sciences on Catalan and Hispanic Cultures.

Course Notes: The course will be conducted in Spanish. The readings will be in English & Spanish.

Spanish 194

The Borges Machine (108752)

Mariano Siskind

2021 Spring (4 Credits)

Schedule: F 1245 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

Between 1923 and 1970, Jorge Luis Borges wrote some of the most original poems, short stories, essays and film scripts in Latin America and anywhere in the world, and he redefined the meaning and scope of literature. In this course, we will examine the signifying power of Borges’ short stories, essays and poems, and we will consider his work as a literary machine whose output radically transforms aesthetic formations and imaginaries beyond Argentina and Latin America. Rather than thinking about what his literature means, we will concentrate on what it produces as a fictional-poetic machine: cities and worlds, love and treason, popular and high culture, politics and death, institutions of knowledge and traditions, and new ways of reading and thinking about aesthetic and social relations.

The Warning in its Music: Politics of the Poem in 20th Century Spain (161249)

**Daniel Aguirre-Oteiza**

2021 Spring (4 Credits)  
**Schedule:** W 1245 PM - 0245 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a  

This graduate seminar proposes an exploration of the fraught connection between political engagement and textual innovation in poetry written in and about 20th Century Spain. We will discuss key texts by Max Aub, Luis Cernuda, Rubén Darío, Antonio Gamoneda, Federico García Lorca, Antonio Machado, Pablo Neruda, Chus Pato, Tomás Segovia, and César Vallejo, among others. Focus on topics such as violence, testimony, memory, exile. Theoretical and critical readings include essays by T.W. Adorno, Hannah Arendt, Michel De Certeau, Paul Celan, Carolyn Forché, Claudio Guillén, Eduardo Milán, Octavio Paz, Jahan Ramazani, Jacques Rancière, Elaine Scarry, Raymond Williams, and Slavoj Zizek.

**Course Notes:** Conducted in Spanish.

Subject: Portuguese

Portuguese 10

Beginning Portuguese I: From Cambridge to Copacabana (120398)

Benedict Cruz

2020 Fall (4 Credits) Schedule: MWF 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

Intended for those with no prior experience in the target language, this course emphasizes interpersonal communication as well as the interpretation and production of written and spoken language. Students take their first steps on the journey from speaking English to carrying conversations with Portuguese speakers over the course of one semester, thanks to immersion activities and dynamic, interactive learning. Students will experience contextualized Luso-Afro-Brazilian culture through music, film, and social media.

Course Notes: Conducted in Portuguese. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have previously studied Portuguese must take a placement exam. Students with a solid knowledge of Spanish should enroll in PORTUG 10s instead of PORTUG 10. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Portuguese 10S
Beginning Portuguese for Spanish Speakers I: It's SAMBA, not salsa! (113806)
Benedict Cruz
2021 Spring (4 Credits)  Schedule:  MWF 0130 PM - 0245 PM
Instructor Permissions:  None  Enrollment Cap:  n/a
Designed specifically for students with a sound knowledge of Spanish. This course presents linguistic and cultural structures necessary for basic communication, emphasizing the features of Portuguese most challenging for Spanish Speakers: pronunciation, idioms, and grammatical structures peculiar to Brazilian Portuguese. Over the course of the semester, students learn to express themselves effectively using their Brazilian voice, distinct from their Spanish voice. Students experience contextualized Lusophone culture through music, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.
Course Notes:  Conducted entirely in Portuguese. Requires a solid knowledge of but not necessarily native proficiency in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. PLEASE NOTE: Class time, Teletandem and Recitation Sessions may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.
Class Notes:  This course requires 3.15 hours of synchronous instruction weekly, with Recitation session (45-minute discussion session) TBD.
Recommended Prep:  Prerequisite: 720 on the Spanish SAT II or the Harvard Placement test; 5 on the Spanish AP test; a 30s level Spanish course; or permission of Course Head.

**Portuguese 11S**

Beginning Portuguese for Spanish Speakers II: More SAMBA, less Salsa! (110641)

*Benedit Cruz*

2020 Fall (4 Credits)  

**Schedule:** MWF 0900 AM - 1015 AM  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

Portuguese 11S is a continuation of Portuguese 10S. This course guides students to continue the work of confronting features of the Portuguese phonological system that are most challenging for Spanish speakers. It helps solidify the student's foundation in Brazilian Portuguese, and pushes them to go deeper by engaging with literary readings, examining unique cultural aspects in addition to practical points of the language. Students will continue to experience contextualized Lusophone culture through music, film, literature, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

**Course Notes:** Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Intermediate Portuguese: Palcos e Palavras (121934)  

Viviane Gontijo

2020 Fall (4 Credits)  

**Schedule:** MWF 0130 PM - 0245 PM  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

An intermediate course for students interested in expanding and strengthening their Portuguese language skills. Reading, writing, and conversational competencies are emphasized through a panoramic study of Luso-Afro-Brazilian Theater. The course will continue to promote cross-cultural understanding by introducing learners to different textual genres such as screenplays, critical review as well as a selection of literary work that represents the Lusophone arts. The weekly online Teletandem interaction with college students in Brazil, unique to the Portuguese Program, allows learners to discuss readings, and engage in peer-review of writing completed for this course.

**Course Notes:** Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department. PLEASE NOTE: Class time, Teletandem and Recitation Sessions may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

**Class Notes:** This course requires 3.15 hours of synchronous instruction weekly, which includes Recitation session (45-minute discussion session) and one-hour Teletandem session (Lab) TBD.

**Recommended Prep:** Prerequisite: PORTUG 11 (AB) or 11s (AD) OR permission of Course Head.

**Requirements:** Prerequisite: Portuguese 11 OR Portuguese 11s

Portuguese 30

Upper-Level Portuguese: Lusophone Culture in Bits and Pieces (114944)

Viviane Gontijo

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

This course engages in a systematic review of grammar, along with writing practice and vocabulary enrichment, while examining contemporary society as presented in the Portuguese-language press, television and film. PORTUGUESE 30 analyzes the ways in which Luso-Afro-Brazilians construct different and conflicting images of Angola, Brazil, Cape Verde, Portugal, and Mozambique. Class discussions are based on a variety of content, including advertisements, documentaries, and current periodicals.

Course Notes: Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department.

Class Notes: This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, asynchronous tasks or workshop will be arranged each week.

Recommended Prep: PORT 20 OR permission of Undergraduate Advisor in Portuguese and Brazilian Studies.

Requirements: Prerequisite: Portuguese CREQ; PORTUG 30

Portuguese 40

Advanced Portuguese I: Other Brazils: The Favelas and Sertões in Brazilian Cinema (124524)

Viviane Gontijo

2020 Fall (4 Credits) Schedule: R 0300 PM - 0345 PM
Examines major Brazilian films in their historical, political, and social context. Class discussion also focuses on documentaries, reviews, and critical articles. In-depth textual and grammatical analysis, vocabulary building, reflections on the similarities and differences of the oral and written Portuguese will lead students to achieve a high level of competency.

Course Notes: This course meets regularly on Tuesdays and Thursdays, with additional asynchronous components. Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. PLEASE NOTE: Class time, Teletandem and Recitation Sessions may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Class Notes: This course requires 2 hours of synchronous instruction, which includes Recitation session (45-minute discussion session) TBD.

Recommended Prep: Prerequisite: PORTUG 30 OR Permission of Course Head.

Requirements: Prerequisite: Portuguese C OR Portuguese 30

Portuguese and the Community (118080)

*Viviane Gontijo*

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This is an advanced language course examining the Luso-African-Brazilian experience in the United States. This course promotes community engagement as a vehicle for greater linguistic fluency and cultural understanding. Students are placed with community organizations within the Boston area and volunteer for four hours a week. Class work will focus on expanding students' oral and written proficiency through discussing and analyzing readings, arts, and films by and about Luso-African-Brazilians in the US.

Course Notes: Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

Recommended Prep: Prerequisite: PORTUG 40 or 50 or permission of the Undergraduate Advisor in Portuguese and Brazilian Studies

Requirements: Prerequisite: Portuguese C OR Portuguese 30

Women's Voices in the Brazilian Literary Tradition (216399)

Viviane Gontijo

2020 Fall (4 Credits)  Schedule:  W 0515 PM - 0600 PM  M 0300 PM - 0415 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

Historically, among the most noteworthy yet underrepresented contributions to literature have been those made by women. In this course we will explore a range of Brazilian Literature created by women. Students will approach works by Clarice Lispector, Lygia Fagundes Telles, Cecilia Meireles, Luisa Geisler among other Brazilian women, with particular consideration given to both social context and literary craft. Major topics for discussion and analysis will include power relations and poverty, family structures and dynamics, identity and gender construction, and the intersection of gender with race and ethnicity. Readings will encompass short stories, poetry, and novels by and about these notable Brazilian writers spanning the last century. By closely examining the voices of such significant authors, participants will develop and strengthen their skills in critical and analytical reading and writing, as well as improve their overall academic discourse in Portuguese.

Course Notes:  Course will be taught in Portuguese. Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Class Notes:  This course will meet synchronously 2 hours per week.

Recommended Prep:  PORTUG 50, 59 OR permission of Course Head.

Writing and Urban Life (207683)

Bruno Carvalho

2020 Fall (4 Credits)  Schedule: TBD
Instructor Permissions: Instructor  Enrollment Cap: 12

In this seminar we will explore literary representations of urban experience, and how the evolution of cities has been shaped by writing. Topics include the impact of technology on cities as lived and imagined spaces; interfaces between literacy, orality, and visual cultures; intersections between fiction, poetry, and social history; porous boundaries between built and natural environments; relationships between modernity, writing, and urban planning. Focus will be placed on major cities of the Portuguese-speaking world and authors like Machado de Assis, Fernando Pessoa, Patrícia Galvão, and Clarice Lispector.

Course Notes: The seminar will be conducted in Portuguese.

Class Notes: Course schedule will be determined in consultation with students, based on enrollment.

**Subject: Italian**

**Italian 10**

Beginning Italian I - Parliamo Italiano! Pathways to Italy (113814)

*Chiara Trebaiochhi*

2021 Spring (4 Credits)  
**Schedule:** MTWR 1030 AM - 1145 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a
This is a first semester beginning course designed for students with little or no knowledge of Italian. The course aims at achieving basic communication skills and vocabulary. Emphasis is on oral expression and listening comprehension. Listening/Speaking/Writing/Reading about what is, what has been, what will be (Indicative). The cultural component examines everyday life through a comparative perspective with emphasis on topics such as school, families, shopping, sports, and food culture. This course will give you the language you need to communicate effectively in Italian and to get ready for future adventures all'italiana. Course materials include workbook, audio-lab, video and other materials provided by instructor on Canvas. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

Course Notes: Conducted in Italian. Students whose placement score does not entitle them to enter a more advanced course are assigned to Italian 10. Students who have studied Italian for two years or more in secondary school must begin at Italian 11 or higher. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Italian 11

Beginning Italian II - Parliamo Italiano! The Art & Craft of Italy (125061)

Chiara Trebaiochi

2020 Fall (4 Credits)  Schedule: MWF 1030 AM - 1145 AM
Instructor Permissions: None  Enrollment Cap: n/a

Picking up where Ital 10 left off, this is a second semester beginning level course. The course aims to consolidate reading and writing skills in Italian. Speaking/Listening/Writing/Reading about what would be, what might be (Conditional & Subjunctive). Cultural component includes units on fashion, music, literature and film, as well as capsules on the history of modern Italy through the movie La meglio gioventù. Course materials include workbook, audio-lab, video and other materials provided by instructor on Canvas. Class time will be supplemented with "TalkAbroad" conversations. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

Course Notes: May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students’ time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: Italian 10, or a score of 301-450 on the SAT II test or the Harvard Placement test, or a score below 3 on the Italian AP exam, or two years of high school Italian, or permission of course head.

Intensive Beginning Italian: Gateway to Italy (112340)

Chiara Trebaiocchi

2020 Fall (8 Credits)  

**Schedule:**  MTWRF 0130 PM - 0245 PM

**Instructor Permissions:**  Instructor

**Enrollment Cap:**  15

This is an intensive and complete first-year course in one term for students with no knowledge of Italian, focused on developing all four communicative skills. Students are introduced to contemporary Italian culture through a variety of topics from everyday life (family, shopping, food, fashion) to the arts (music, literature, cinema). Materials include films and cultural readings that present capsules on the history of modern Italy (in particular through the movie *La meglio gioventù*). Course materials include workbook, audio-lab, video and other materials provided by instructor on Canvas. Class time will be supplemented with "TalkAbroad" conversations. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. **Italian 16**

Reading, Understanding and Translating Written Italian for Research (113582)

**Chiara Trebaiocchi**

2020 Fall (4 Credits)  

**Schedule:** TR 0300 PM - 0415 PM

**Instructor Permissions:** None

**Enrollment Cap:** n/a

This is a single-skill course for students (both undergraduate and graduate) with little or no knowledge of Italian. It aims at the rapid development of rapid comprehension skills as a tool for research and independent reading of both academic and literary texts. Materials will be selected in accordance with the needs and interests of enrolled students. Students will develop individual, semester-long reading/research "goals" in a field or on a topic of their choosing, which will become the primary focus of their work during the second half of the course. Past students have set (and met!) a wide variety of reading goals, such as: a Divinity School student investigating the life of an early 20th-century Tuscan saint and stigmatic; a Design School student tackling a 16th-century treatise on architecture; an undergraduate reading a novel of Elena Ferrante in the original Italian.

The course will have synchronous group zoom sessions to consider specific reading strategies and facilitate discussion.
among students. There will also be one on one zoom meetings with the instructor to best respond to each student individual needs.

Course Notes: Taught in English. Not open to auditors. May not be used to fulfill the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: Some previous study of a Romance language helpful but not necessary. Fluency in English required.

Intermediate Italian: Romance! Mystery? Noir...L'Italiano in Rosa, Giallo e Nero (128265)

*Chiara Trebaiocchi*

2020 Fall (4 Credits)  

**Schedule:**  

F 1200 PM - 0115 PM  

MW 1030 AM - 1145 AM

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

Using popular literary genres (from romance to crime stories to graphic novels: the *rosa*, the *giallo*, and the *nero* of Italian pop lit), this course aims to build reading skills and includes a structured review of grammar. By the end of this course you will read with more fluency, write with more accuracy, and talk about Italian pop lit through a colorful spectrum of oral and written expressiveness. Course materials include multi-media projects that increase language proficiency and cultural awareness (no textbook is required). Class time is supplemented with "TalkAbroad" conversations. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

**Course Notes:** Conducted in Italian. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

**Recommended Prep:** A score of 451-600 on the SAT II test or the Harvard Placement test, or a score of 3 on the Italian AP Exam; Italian 11 or 15; or permission of course head.
Italian 20

Intermediate Italian: The Colors of Italian Pop Lit (128265)

Chiara Trebaiochci

2021 Spring (4 Credits) Schedule: MWF 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

Inspired by the "colors" of Italian pop lit and culture (from romance to crime stories to graphic novels and even the Spaghetti Westerns), this course aims to build reading skills and includes a structured review of grammar. By the end of this course you will read with more fluency, write with more accuracy, and talk about Italian pop lit through a colorful spectrum of oral and written expressiveness. Course materials include multi-media projects that increase language proficiency and cultural awareness (no textbook is required). Class time is supplemented with "TalkAbroad" conversations. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. This course revisits structures and refines speaking and writing skills through media and arts interface. This course is structured around what is happening in Italy, as reported in the news (print and multimedia), and as represented through pop culture (talk shows, song, social media). Assignments are built to strengthen receptive and productive communicative skills. Course materials may include news, films, popular music, podcasts, and literary texts, among others. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Short asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

Course Notes: Conducted in Italian. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students’ time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep: Italian 20; a score of 601-680 on the SAT II test or the Harvard Placement test, or a score of 4 on the Italian AP exam; or permission of course head.

Italian 40

Advanced Italian I: Oral Expression and Performance (116233)

Chiara Trebaiocchi

2020 Fall (4 Credits)  Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None  Enrollment Cap: n/a

This course aims to build interpretive, interpersonal, and presentational modes of communication, while engaging analytical and creative thinking. Students develop oral expression and communication skills through the close reading of texts that are meant for performance, such as plays, film scripts, poetry, music, and games. At the end of the course you will find yourself more confident about speaking in Italian in front of an audience and about expressing your opinions on a variety of topics (formal and colloquial expressions). Variation in diction and presentation techniques culminates in the adaptation and production of one or more of these texts for a public performance at the end of the term. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Short asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it). Consult course website for current semester topics.

Course Notes: Conducted in Italian. May not be taken Pass/Fail, but may be taken
Sat/Unsat by GSAS students. Appropriate for concentrators electing the Italian Studies or Romance Studies track. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Class Notes: Meeting time may be subject to change, depending on enrollment.

Recommended Prep: A score of 681-720 on the SAT II or the Harvard Placement Test, or a score of 5 on the Italian AP exam; Italian 30; equivalent preparation; or permission of course head.

**Italian 50**

Advanced Italian II: Written Expression. Italy in Other Words (127889)

*Chiara Trebaiocchi*

2021 Spring (4 Credits)  
**Schedule:** TR 1200 PM - 0115 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

A theme-based course designed to develop advanced competence in written expression through guided examination of stylistics and pragmatics. The course includes readings from a variety of literary genres, films, workshops, and it might include a series of guest lectures by our faculty on design, women and society, cinema, fiction, and other subjects.

You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with many opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Short asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it). Consult course website for current semester topics (Spring 2021: Scrivere per descrivere, raccontare, argomentare e riflettere).

**Course Notes:** Conducted in Italian. Appropriate for concentrators electing the Italian Studies or Romance Studies track. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

**Class Notes:** NOTE: Class time may be subject to change based on students’ time zone constraints. Please be in touch with the course head if you have a time zone conflict.

**Recommended Prep:** A score between 721-750 on the SAT II or on the Harvard Placement Test; Italian 40; or permission of course head.
Italian 91R

Supervised Reading and Research (111393)

Chiara Trebaiocchi

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Tutorial supervision of research on subjects not treated in regular courses.

Course Notes: Limited to juniors and seniors. Students wishing to enroll must petition the Undergraduate Adviser in Italian for approval, stating the proposed project, and must have the consent of the proposed instructor. Ordinarily, students are required to have taken some course work in the area as background for their project. May not be taken more than twice, and only once for concentration credit.

This course is taught by members of the Department.

What is Time? (108772)

*Francesco Erspamer*

2021 Spring (4 Credits)

**Schedule:** M 1200 PM - 0230 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 12

A course about the meaning of time, not just as a measurement of change, but also as the social and intellectual prerequisite for knowledge, morality, and political action. With examples drawn mostly from Italian culture—readings include Machiavelli, Galileo, Vico, Pirandello, Gramsci, Elena Ferrante.

**Course Notes:** Conducted in Italian.

Material Culture in the Middle Ages: Dante's Commedia (216057)

*Jeffrey Schnapp*

2021 Spring (4 Credits)

**Schedule:** W 1200 PM - 0200 PM

**Instructor Permissions:** None

**Enrollment Cap:** n/a

An advanced research seminar devoted to Dante's poem on the occasion of 700th anniversary of his death. The course will combine close attention to Dante's text with nuanced attention to strategies of literary allusion, cross-reference, and reworking, and a series of in-depth explorations of the material culture of Dante's era. Among the latter themes will be: pathways and travel, the materiality of the page, the voice, the life of plants, the geology of the landscape.

Subject: Romance Languages

Romance Languages 210
Language Pedagogy: Theories, Approaches, and Practices (136717)
Nicole Mills
2020 Fall (4 Credits) Schedule: W 0300 PM - 0500 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

This course is designed for TFs and TAs in the department of Romance Languages and Literatures who are teaching a Romance language at Harvard for the first time, or those who are interested in foreign language learning and teaching. It introduces TAs and TFs to theories of second language acquisition (SLA) and explores their implications for the teaching of foreign language, culture, and literature. The course provides opportunities for students to learn to enact the specific pedagogical practices deemed essential to foreign language teaching. The intensive week before the start of classes includes reports on and discussion of general SLA theories and demonstrations and analysis of varied instructional approaches.
Course Notes: Students are required to attend the pre-service seminar before classes begin. Students who do not attend the pre-service seminar will not be permitted to enroll in the course. For details and further information, please contact the Course Heads. May be taken SAT/UNS. Permission of Course Head required.

Romance Languages 230
Teaching Languages, Cultures and Literatures (216381)

Virginie Greene

2021 Spring (4 Credits)  Schedule:  M 0300 PM - 0500 PM  Enrollment Cap:  n/a

Instructor Permissions:  None  Class Notes:  This class will be taught by Prof. Virginie Greene with the collaboration of guests Dr. Nicole Mills and Dr. Maria Luisa Parra.

This course is addressed to experienced TFs and TAs who are currently teaching foreign languages, literatures and cultures at Harvard. It will present and use theories coming from the disciplines of language pedagogy, relevant applied linguistic research, socio-linguistics, anthropology, and literary criticism, applied to classroom experience whether online or in situ.

The course is conceived as a space of open and structured discussion among humanists and social scientists specializing in different fields, teachers at different stages of their careers, and individuals coming from diverse linguistic, cultural and social backgrounds. We will learn from each other through comparing theories, practices, and stories.

Course Notes:  This course fulfills one of the requirements of the Bok Certificate in Teaching Language and Culture (in collaboration with the Bok Center for Teaching and Learning).

Article Publication Workshop (212926)

*Annabel Kim*

2020 Fall (4 Credits)  
Schedule: TBD

Instructor Permissions: None  
Enrollment Cap: n/a
A reading and writing intensive workshop aimed at doctoral students done with coursework, and postdocs affiliated with the department. Through workshopping (both as a class and in smaller groups), participants will go through two intensive rounds of revision to produce an article ready to submit to peer-reviewed journals at the end of the semester. We will begin with preliminary discussions of the nuts and bolts of writing and publication: reading essays and articles on how to write well; identifying journals that are a good fit for publication; reading sample abstracts and writing and revising one's own; analyzing sample readers' reports (from the generous and intelligent to the brutish and mean) to think through how to respond to feedback; etc.

Class Notes: The first class will meet on Monday, September 7, 3-5 pm, with the schedule to be determined thereafter.

Bosnian, Croatian & Serbian     AA

Elementary Bosnian, Croatian, and Serbian I (110073)

Tatiana Kuzmic

2020 Fall (4 Credits)  Schedule:  TBD
Instructor Permissions:  None  Enrollment Cap:  n/a

Part one of a two-part introductory course in modern Bosnian, Croatian, and Serbian (BCS) language and culture, designed for students without previous knowledge who would like to speak BCS or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to BCS culture through excerpts from poetry, prose, and newspaper articles, as well as video and popular music clips as they learn to use the language both as a means of communication and as a tool for reading and research.

BCS AA: Elementary BCS I (in the fall) and BCS AB: Elementary BCS II (in the spring) satisfy the foreign language requirement and prepare students for continued study of BCS in intermediate-level courses and for study or travel abroad.

Course Notes:  This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in BCS AA in the fall and BCS AB in the spring within the same academic year. - - -

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Bosnian, Croatian & Serbian BA

Intermediate Bosnian, Croatian, and Serbian I (110074)

Tatiana Kuzmic

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: n/a
Part one of a two-part intermediate course in modern Bosnian, Croatian, and Serbian (BCS) language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of BCS grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading.

The two-part course prepares students for continued study of BCS in advanced-level courses and for study or travel abroad.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in BCS BA in the fall and BCS BB in the spring within the same academic year. - - -

**Bosnian, Croatian & Serbian BB**

Intermediate Bosnian, Croatian, and Serbian II (205525)

*Tatiana Kuzmic*

2021 Spring (4 Credits)  
**Schedule:** MWF 0900 AM - 1015 AM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Part two of a two-part intermediate course in modern Bosnian, Croatian, and Serbian (BCS) language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of BCS grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading.
The two-part course prepares students for continued study of BCS in advanced-level courses and for study or travel abroad.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses.

Part two of a two-part series. Students are strongly encouraged to enroll in BCS BA in the fall and BCS BB in the spring within the same academic year.

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Requirements: Prerequisite BCS BA

Tutorial - Sophomore Year (121681)

Aleksandra Kremer

2021 Spring (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

An interdisciplinary introduction to major issues in the field of Slavic Languages and Literatures, including critical theory, modes of interpreting literary texts, the forces structuring national and regional identities, as well as great authors of the Slavic literary traditions, including Russian, Czech, and Polish works.

Course Notes: Required for Slavic Language and Literature concentrators. Course open to non-concentrators by permission of the instructor.
In this course, we will read Pushkin's beloved novel in verse, Evgenii Onegin in its entirety—in the original!—paying special attention to its cultural and historical contexts, its play with poetic form and genre, and its innovative approach to plot and characterization. Together we will revel in its wit, virtuosity, and sheer linguistic brilliance, and find out for ourselves why this work has never lost its popular appeal. In addition to Onegin, we will read some of Pushkin's most celebrated lyric poems, watch Tchaikovsky's opera based on the novel, and take a virtual trip to Houghton to look at first editions. We will supplement our close reading of the text with articles by renowned Pushkin scholars, and will refer to the two most important commentaries on the novel, by Yuri Lotman and Vladimir Nabokov. This course is open to anyone currently in third-year Russian or above. Onegin and other poetry will be read in Russian; supplemental readings and class discussions will be in English. The course meeting time will be determined on the basis of student availability.

Course Notes: Required of junior concentrators in Slavic Literatures and Cultures. Course open to non-concentrators by permission of the instructor. Readings will be in Russian.

Recommended Prep: Students must be able to read in Russian.

Squaring the Circle: Russia, Art, Revolution (208135)

Daria Khitrova

2020 Fall (4 Credits)  Schedule:  TR 0130 PM - 0245 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

Wherever an avant-garde movement sprang up, its artists would announce they were there to change the world. Nowhere did this promise come closer to fruition than in Russia of the 1920s. This course explores Russian and Soviet avant-garde art and its most radical manifestations in literature and dance, on stage and screen, in visual arts and in the ways of life. We will examine the way art and political revolution impact each other and focus on the many "isms," avant-garde and otherwise, that shaped society and the arts during a period of rapid modernization and experimentation: Futurism, Suprematism, Constructivism, Productivism and others. We will look at works by Malevich and Meyerhold, Tatlin and Mayakovsky, Rodchenko and Stepanova, Nijinsky and Meyerhold, Vertov and Eisenstein.

Course Notes:  No prerequisites. All readings in English.

This course is cross-listed as SLAVIC 114 and TDM 114K.

Slavic 116
Russian Novel (216024)
Explores the distinctive tradition of the modern Russian novel beginning in the late eighteenth century and emphasizing works from the nineteenth century, with a sampling of twentieth-century works that continue the tradition. Compares and contrasts this Russian tradition with its Western counterparts (England, France, America). What is "Russian" about the Russian novel? Works by Karamzin, Pushkin, Lermontov, Gogol, Goncharov, Turgenev, Dostoevsky, Tolstoy, Saltykov-Shchedrin, Chekhov, and others.

Course Notes: No knowledge of Russian required.

Modern Russian: The Back Story (160167)

Michael Flier

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Russian has a fascinating history that reveals explanations for the irregularities and mysteries presented in textbooks but often unexplained. Why does \( g \) sound like [g] in *mnogo* 'many', but like [v] in *segodnia* 'today'? How is *moloko* 'milk' related to *mlechnyi put* 'the Milky Way'? Why *pet* / *poiu* 'sing' and not *pet* / *peiu*? Why do the numbers 2, 3, and 4 govern the genitive singular rather than nominative plural? How can *nachalo* 'beginning' and *konets* 'end' come from the same root? A historical knowledge of Russian is not only enlightening; it will help improve your skills in the modern language.

Course Notes: No knowledge of linguistics is required. Lectures will be supplemented with problem sets available from the course website. Intermediate college-level Russian (= RUSS BAB or its equivalent) required.

Recommended Prep: Russian A, "Elementary Russian" (parts I and II), or Russian AAB, "Intensive Elementary Russian"

Slavic 127
Hacking Russia: Technological Dreams and Nightmares of Russian Culture (216025)

Nariman Skakov

2020 Fall (4 Credits)  Schedule:  MW 0300 PM - 0415 PM

Instructor Permissions: None  Enrollment Cap:  n/a

The course explores the role of technology in constructing the social and ideological fabric, as well as the material reality, of Soviet and Russian society. From the early Soviet period, when technological progress was linked to humanistic utopia, through dystopian critiques of a totalitarian machine of conformity and constraint, we proceed along the assembly line of communist production, avant-garde and constructivist artistic utopia, socialist realism, the space race, and information technology, using examples from Russian literature, film, art, visual arts, performance, and current events. With the media's concern for fake news and Russian hacking today, it is our course's goal to "hack Russia": to understand the politics and technology shaping Russia, and the creative responses that have made its society a site of both dreamlike promise and nightmarish threat, through its history and today.

Course Notes: All readings in English.

Slavic 133
Modernist Journeys (216030)
In the years following the Russian Revolution, the Soviet Union emerged as a major political power and underwent sweeping social changes. This course will explore the radical displacements that took place in this, the first socialist society—immigration, war, forced relocation, labor camps, and, in very rare cases, travel for leisure. In parallel with these sweeping movements of dislocation, this was the time when a modernist aesthetic tradition was flourishing and key precepts of the emerging Soviet identity were formed. Modernist Journeys explores accounts of travel, displacement, and migration as a window into the diversity of perspectives that contributed to the formation (or disintegration) of the new "Soviet man." We will consider memoirs, travelogues, films, and theoretical texts by major Soviet authors and filmmakers as they traveled to Mongolia, Central Asia, Armenia and China as well as Paris and "the West": Sergei Tretyakov, Osip Mandelstam, Isaak Babel', Andrei Platonov, Aleksandr Rodchenko, Dziga Vertov, Ilya Ilf and Evgeny Petrov among others.

Note: All readings in English. No previous knowledge of Russian literature or history is necessary.

Russian Fiction in the Soviet Era (216339)

Justin Weir

2021 Spring (4 Credits) Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None Enrollment Cap: n/a

In this course we will read several of the most acclaimed works of Russian fiction in the Soviet era, including Mikhail Bulgakov’s The Master and Margarita, Boris Pasternak’s, Doctor Zhivago, Vladimir Nabokov’s Invitation to a Beheading, as well as other stories and novels by Osip Mandelshtam, Yuri Olesha, Alexander Solzhenitsyn, and Evgeny Zamyatin. The main themes of the course will be the role of the author in a totalitarian society, politics, and the form of the novel in the twentieth century. No prerequisites. Conference course.
Slavic 157

Tolstoy (111184)

Julie A. Buckler

2021 Spring (4 Credits)  Schedule:  T 1245 PM - 0245 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

Tolstoy’s development as a writer and thinker, beginning with his early diaries and progressing through the novels to the late stories and plays, also sampling Tolstoy’s non-fictional writing and correspondence. Examines Tolstoy’s work in light of recent critical approaches to authorship, artistic biography, literary canon, ethics, gender, sexuality, and affect. How has Tolstoy been variously interpreted in Russian, Soviet, post-Soviet, and Western-humanistic contexts? How did Tolstoy view his own work at various points in his life?

Course Notes:  Reading knowledge of Russian (equivalent to three or more years of study) is required.

Document, Testimony, and Political Fictions (216428)

Jonathan Bolton
Justin Weir

2020 Fall (4 Credits)  Schedule:  TR 1030 AM - 1145 AM

Instructor Permissions:  Instructor  Enrollment Cap:  15

We will consider classic narratives that incorporate real written documents or personal testimonies into works of fiction, film, and journalism. How do such works blur the line between fiction and reality, between individual testimony and collective experience, in order to construct larger narratives about political repression and political history? We will explore why some testimonies, images, or documentary details feel more "authentic" or "truthful," inspiring a strong response in readers and viewers, while others recede...
into the background. What is gained or lost when facts are folded into a narrative that does not just inform but also entertains? Why do works of fiction and film create such persuasive versions of the past, and how do these stories shape our sense of political life and state power? We will examine diverse historical documents, individual and collective testimonies, stories, novels, photos, and films from Russia, Eastern Europe, and other regions in order to investigate these questions. Course readings will range from Defoe, Melville, Tolstoy, Dostoevsky, and Babel to Nobel Prize winners Alexander Solzhenitsyn and Svetlana Alexievich, as well as non-fiction from Elena Poniatowska, Ryszard Kapuściński, Javier Cercas, Liao Yiwu, Carlo Ginzburg, and others; we will also discuss films from Errol Morris and Andrei Tarkovsky.

Slavic 182
The Political Novel (205018)
Jonathan Bolton
2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 15

No novel can be reduced to a set of political beliefs, and yet we often feel that novels speak to our political theories and practices. What makes a novel "political"? Can the novel make a contribution to political theory? How does our understanding of political power change when we imagine detailed and dramatic confrontations between individuals and the state, individuals and empire, or individuals and global ideologies? How does narrative form reinforce or undermine ideology? What archetypal dramas—protest against authority, the loss of political innocence, the battle between tolerance and conviction—have shaped the political novel in its various traditions from the nineteenth century to the present?

For spring 2021, our readings will include works by Pushkin, Dostoevsky, Ivan Olbracht, Koestler, Kundera, Le Guin, Gordimer, and Colson Whitehead.

Course Notes: All readings in English.

**Slavic 278**

Readings in Poetry and Theory (216051)

*Aleksandra Kremer*

2021 Spring (4 Credits)  
**Schedule:**  
R 03:00 PM - 05:00 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

An introduction to different ways of reading modern and contemporary poetry, with a special emphasis on Europe's less-known traditions, minor languages, and small nations (including Austrian, Czech, Polish, and Yiddish texts). From this perspective we will revisit big, age-old questions – what is lyric poetry? how is it made? how can we read it? – and explore the relations between poetry and nation, tradition, and translation, as well as the boundaries of language, speech, and writing. In each class, we will focus on a few poems (texts, books, recordings), which we will examine in the light of classic theories of literature and recent literary criticism. Each time, the commentaries will illustrate at least two different approaches to the same question, familiarizing us with a wide range of literary methodologies and allowing us to problematize their usefulness.

Course Notes: Readings in English.

Subject: Russian

**Russian AA**

Elementary Russian I (122907)

*Steven Clancy*

*Natalia Chirkov*

2020 Fall (4 Credits) Schedule: MWF 0900 AM - 1000 AM

Instructor Permissions: None Enrollment Cap: n/a

Part one of a two-part introductory course in modern Russian language and culture, designed for students without previous knowledge of Russian who would like to speak Russian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are introduced to Russian culture and the etiquette of social exchanges, and expand their knowledge of grammar and vocabulary through readings (including stories, biography, and poetry), videos, and class discussions.

Course Notes: Part one of a two-part series. Students are strongly encouraged to enroll in Russian AA in the fall and Russian AB in the spring within the same academic year.

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Russian AA together with Russian AB or Russian ATB (Elementary Russian through Authentic Texts II) satisfy the foreign language requirement. Any of the elementary (A-level) level Russian courses (A,
AAB, and AT) prepare students for continued study of Russian in intermediate (B-level) courses (B, BAB, or BTA) and for study or travel abroad in Russian-speaking countries.

Recommended Prep: No prior knowledge of Russian is required.

Russian BA

Intermediate Russian I (112823)

Veronika Egorova

2020 Fall (4 Credits) Schedule: MWF 1030 AM - 1130 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

Part one of a two part intermediate course in modern Russian language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Russian grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Vocabulary is thematically organized to include such topics as self and family, education, work, human relationships, politics, and national attitudes and is reinforced through film and the reading of classical and contemporary fiction and history. Practice in the etiquette of common social situations (sociolinguistic competence). Computer exercises on selected topics.

Course Notes: Interested students should contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions regarding scheduling conflicts. With sufficient enrollments it is possible that this course will be offered in an additional section on MWF in a different time slot. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Russian BA in the fall and Russian BB in the spring within the same academic year. - - -

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students’ availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes. - - -

Any full course in Russian at the B-level (Russian Ba-Bb, Russian BTA-
BTB, or Intensive Russian BAB) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Recommended Prep:

Russian AA-AB, AAB, ATA-ATB, AH, or placement at the B-level. Familiarity with fundamentals of Russian grammar, particularly case endings, verb conjugation, and elementary competence in spoken Russian.

Advanced Russian: Russian Cultural Self-Images and National "Mentality" (122814)

*Natalia Pokrovsky*

2021 Spring (4 Credits)  
Schedule: MWF 1030 AM - 1130 AM  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

Through readings and film, we explore Russian cultural attitudes and self-images as socio-cultural context. Topics include cultural perceptions of self as nation and as cultural "mentality," the collective vs. the individual, attitudes toward friendship, the family and women, law, crime, prestige and success, and ethnic difference. Concentrates on vocabulary and phrasing, and includes extensive writing practice.

Recommended Prep: Russian 103, 113, or permission of the instructor.

**Subject: Polish**

**Polish AA**

Elementary Polish I (123076)  

*Anna Baranczak*  

2020 Fall (4 Credits)  

**Schedule:** TBD
Instructor Permissions: None  Enrollment Cap: n/a

Part one of a two part introductory course in modern Polish language and culture, designed for students without previous knowledge who would like to speak Polish or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Polish culture through reading of prose and poetry as they learn to use the language both as a means of communication and as a tool for reading and research.

Polish AA: Elementary Polish I together with Polish AB: Elementary Polish II satisfy the foreign language requirement and prepare students for continued study of Polish in intermediate-level courses and for study or travel abroad in Poland.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses.

Part one of a two-part series. Students are strongly encouraged to enroll in Polish AA in the fall and Polish AB in the spring within the same academic year.

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Polish BA

Intermediate Polish I (124971)

Anna Baranczak

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: n/a

Part one of a two part intermediate course in modern Polish language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Polish grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Introduction to Polish literature through fiction and poetry, history and contemporary events, including readings from literary masterpieces from Polish literature from the era of the Renaissance to contemporary times including Jan Kochanowski, Wislawa Szymborska, Zbigniew Herbert, Czeslaw Milosz and others. Film clips and newspaper articles will introduce students to a variety of styles of contemporary Polish. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading.

Intermediate Polish I and Intermediate Polish II together prepare students for continued study of Polish in advanced-level courses and for study or travel abroad in Poland.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the
availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses.

Part one of a two-part series. Students are strongly encouraged to enroll in Polish BA in the fall and Polish BB in the spring within the same academic year.

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Recommended Prep: Polish AB or placement at the B-level. Familiarity with fundamentals of Polish grammar, particularly case endings and elementary competence in spoken Polish.

Czech AA: Elementary Czech I (in the fall) and Czech AB: Elementary Czech II (in the spring) satisfy the foreign language requirement and prepare students for continued study of Czech in intermediate-level courses and for study or travel abroad in the Czech Republic.

**Course Notes:**  
This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses.

Part two of a two-part series. Students are strongly encouraged to enroll in Czech AA in the fall and Czech AB in the spring within the same academic year. - - -

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Czech BA

Intermediate Czech I (121469)

Veronika Tuckerova

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Part one of a two part intermediate course in modern Czech language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Czech grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Increased exposure to the differing registers of Czech in its literary and spoken forms.

The two part course prepares students for continued study of Czech in advanced-level courses and for study or travel abroad in the Czech Republic.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Czech BA in the fall and Czech BB in the spring within the same academic year. - - -

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Recommended Prep: Completed Czech AB, or placement at the B-level. Familiarity with fundamentals of Czech grammar, particularly case endings and elementary competence in spoken Czech.

This course offers an introduction to the foundations of modern social theory from the seventeenth to the nineteenth century. Our focus will be on the rise of democratic, capitalist societies and the concomitant development of modern moral, political, and economic ideas, with special emphasis on empire, race, and inequality. Authors we will examine include among others, Thomas Hobbes, Jean-Jacques Rousseau, Adam Smith, Mary Wollstonecraft, Alexis de Tocqueville, Frederick Douglass, Charles Darwin, and Karl Marx.

This course is limited to sophomores and Social Studies concentrators. This course is a prerequisite for sophomores applying to Social Studies. Students planning to take this class must attend the first lecture to be admitted.

Students who are in time zones in Asia and Australia will be able to watch a recording of the weekly lecture online but will also need (as with all students in this course) to attend a two-hour synchronous discussion section later in the week. Weekly evening (drop-in) office hours will be provided for all students, but those unable to attend lectures synchronously will be especially encouraged to attend.

This class continues the introduction to the classic texts of social theory begun in Social Studies 10a through the twentieth century. Authors include Friedrich Nietzsche, Max Weber, Emile Durkheim, W.E.B. Du Bois, Sigmund Freud, Simone de Beauvoir, Frantz Fanon, and Michel Foucault.

This course is limited to sophomores and Social Studies concentrators. This course is a prerequisite for sophomores applying...
to Social Studies. Students planning to take this class must attend the first lecture to be admitted.

Requirements: Prerequisite: Social Studies 10a AND Social Studies Concentrators

Social Studies  50

Foundations of Social Science Research (213384)

Adaner Usmani

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 50

This course has two goals. First, to introduce students to the diversity of methods that social scientists use to answer questions about the social world. Second, to prepare thesis writers to conduct original research. We will survey both qualitative and quantitative approaches, reading a combination of methodological texts and exemplary empirical work. For their final project, students will write a research proposal that will anchor their future thesis work.

Social Studies  60

Methods Training for Social and Political Theorists (213383)

Don Tontiplaphol

2020 Fall (4 Credits) Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Is social-scientific knowledge possible? How does empirical research depend on conceptual analysis? What is the relationship between normative theory and empirical reality? This course investigates different modes of theorizing and integrates them into the philosophical foundations of the social sciences. Units include "Epistemology and Social Explanation"; "Conceptual Analysis and the Human Sciences"; "Political Theory and Historiography"; "Normativity, Critique, and Political Realism." Recommended preparation for senior-thesis research in social and political theory, including the epistemology of social science.

Continuation of the methodological themes of Social Studies 10b; intended for first-term juniors and first-
In the wake of a global pandemic and the George Floyd protests, many are searching for ways to take action, to improve our communities and the world, and to help others. This altruistic mission is a noble goal, but like all missions, it requires thoughtful planning and reflection. The main question this course will address is "What is altruism?" We will approach this question from a variety of interdisciplinary perspectives: biology, psychology, political theory, and moral philosophy. Are we naturally altruistic, or are all actions in some sense selfish? How do we know when we are helping others? What is charity, or philanthropy, and what role does it play in a functioning democracy? We will spend a good portion of the course on the "effective altruism" movement, which aims to maximize the amount of good that each of us can do. How are calculations about "effectiveness" made? How do we identify the causes that are most important to prioritize? How does the EA movement relate to activism? More importantly, who are effective altruists, and how do they live their lives? We will read stories of people who have risked their lives to provide healthcare in the midst of war, people who have donated kidneys to strangers, people who adopted over 20 children, and many other examples that illustrate (or not!) different ways of being altruistic. The ultimate goal of this course is to think about what it means to help not just theoretically, but also in practice.

Instructor Permissions: Instructor
Enrollment Cap: 12
As the United States begins a new presidency, both the continuing global pandemic and the recent assault on the U.S. Capitol cast long shadows over the immediate political future. This course seeks to connect political theory to practice by asking how conceptual arguments about politics are reflected, transformed, or rejected in the experience of political practitioners. The class is structured as a series of two-week modules: one week focused on understanding the arguments of political theorists about a topic, then a second week focused on a relevant case at the state or local level, with political actors participating as guest speakers. Final papers will connect theory to practical politics in which students are engaged.

Course Notes: This course will be lotteried.

Elections in a Time of Democratic Stress: America's 2020 Choice in Comparative Perspective (216265)

E. J. Dionne

2020 Fall (4 Credits)  Schedule: M 0300 PM - 0500 PM
Instructor Permissions: Instructor  Enrollment Cap: 15

It's rare to be certain that a given election will be seen as historic. The 2020 contest in the United States is that rare election. This seminar will focus on the choice in 2020, the meaning of the Trump presidency, the nature of polarization in the United States, the proper understanding of populism, and the coronavirus pandemic as a transformative event. It will also place the American election in a comparative context, examining the democratic distemper in other nations. We'll be discussing politics in Britain, France, Germany, the Iberian Peninsula, and Eastern Europe. This class is open to all students, but a preference will be given to Social Studies concentrators.

Course Notes: This course will be lotteried.

Development and Modernization: A Critical Perspective (116329)

Stephen Marglin

2020 Fall (4 Credits)  Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: Instructor  Enrollment Cap: 10

What assumptions about human beings underlie the conviction that development and modernization constitute progress, that the developed West points the way for the rest of the world? Does economic growth involve a package that necessarily changes the society, the polity, and the culture along with the economy? This tutorial provides a framework for thinking about these questions, both in the context of the West, and in the context of the Third World. This is a junior tutorial.

Course Notes: This course will be lotteried.

Social Studies  98CL
Law and American Society (121345)

Terry Aladjem

2021 Spring (4 Credits)  Schedule:  R 0300 PM - 0500 PM

Instructor Permissions:  Instructor  Enrollment Cap:  10

The course examines law as a vehicle of political conflict and a defining force in American society in four dimensions: 1.) as it establishes individual rights, liberties, and limits of toleration; 2.) as it attempts to resolve differences among competing constituencies; 3.) as it sets out terms of punishment and social control having effects on race and class, and 4.) as a source of informing images and ideological meaning. We will examine these themes from their historical roots and their constitutional and theoretical origins, to their manifestations in our current political debates. We will take up issues at the level of jurisprudence or political theory, but also as they arise or are settled in legal cases by the courts—cases in which racial or gender equality are at stake, religious or sexual freedom, cases in which the nature and content of political speech are questioned, cases in which the claims of religious communities seem irreconcilable, cases in which the nature and extent of punishment have been debated and the question of who deserves to be punished decided, and notorious public trials in which the national self-understanding has been shaped. Our aim is to bring theory to bear, and down to earth, in each consideration, (we will read Foucault and also examine prisons and mass incarceration) and since this is an inaugural presidential year in which the constitutional framework for our democracy has been tested, the issues being raised accordingly will be much on our minds. This is a junior tutorial.

Course Notes:  This course will be lotteried.

Social Studies  98EO

Art, Political Culture, and Civic Life (116288)

Kiku Adatto

2020 Fall (4 Credits)  Schedule:  T 0345 PM - 0545 PM

Instructor Permissions:  Instructor  Enrollment Cap:  10

The seminar explores the interplay of the arts, political culture, and civic life. It will draw on studies in art, history, political philosophy, literature, sociology, and photography. Among the questions we will address are: How is historical memory constructed, and what are the competing forces that shape it? What is the significance of public apologies, and does solidarity create moral responsibilities for historical injustices? How is cultural domination exerted, and how is it resisted? In what ways does rhetoric shape politics, and what role does it play in national narratives? Why does the contest to control images loom so large in politics, the media, and in our everyday lives? This is a junior tutorial.

Course Notes:  This course will be lotteried.
Social Studies 98LF

Globalization and the Nation State (125982)

Nicolas Prevelakis

2020 Fall (4 Credits)

Schedule: W 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 10

Despite globalization, the nation is still a major actor in today’s world. This course tries to understand why this is so by examining the role that nationalism plays in peoples’ identities and the effects of globalization on nations and nation-states. It includes theoretical texts, but also case studies from the recent rise of populism and authoritarianism, the role of supranational entities such as the European Union, and the urgency of global issues such as climate change, inequality, and migration. Examples from the United States, Europe, Latin America, China, and the Middle East. This is a junior tutorial.

Course Notes: This course will be lottered.

Social Studies 98MI

Migration in Theory and Practice (127021)

Nicole Newendorp

2020 Fall (4 Credits)

Schedule: W 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

In this course, we will examine how and why people migrate from one location to another, focusing both on the theoretical paradigms scholars use to explain migration processes as well as on the individual experiences of migrants. Topics include transnationalism, diaspora, identity formation, integration and assimilation, citizenship claims, and the feminization of migration. Ethnographic readings focus primarily on migration to the US, but also include cases from other world areas, most notably Asia. This is a junior tutorial.

Course Notes: This course will be lottered.

Class Notes: Additional weekly one-hour group meetings TBD
Social Studies 98ND

Justice and Reconciliation after Mass Violence (128057)

Jonathan Hansen

2021 Spring (4 Credits) Schedule: M 1245 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 10

This seminar examines the problem of justice and reconciliation after mass violence: How does a nation sundered by genocide, civil war, or gross human rights violations reestablish the social trust and civic consciousness required of individual and collective flourishing? What is the proper balance between individual and collective responsibility? What is the role of trials, truth commissions, and apology in civil reconciliation? How do specific types of mass violence influence outcomes? What makes some reconciliations successful, others less so? The course engages these and other questions from historical and contemporary perspectives, exploring the legacy of mass violence going back centuries, while examining reconciliation projects across cultures, countries, and continents.

This course comprises three units: 1) a typology of mass violence (civil war, genocide, state repression, for instance) and historical responses; 2) case studies of the U.S. Civil War (and its continuing legacy), the Spanish Civil War, and the Rwandan genocide; and 3) a research and writing workshop emphasizing students own work. The goal of the course is to introduce students to the literature of mass violence from an interdisciplinary perspective (including but not limited to historical, sociological, and anthropological approaches), ultimately launching students on their own research projects. This is a junior tutorial.

Course Notes: This course will be lotteried.

Global East Asia (108761)

Nicole Newendorp

2021 Spring (4 Credits) Schedule: W 1245 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 10

In this course, we will explore how social life in contemporary East Asia is both influenced by and contributes to processes of globalization. Ethnographic readings on China, Korea, and Japan focus on migration, gender roles, consumption, media, and markets as we trace the role of the global in everyday life for rural and urban inhabitants of a variety of East Asian locations. For these individuals, engagement with the global structures how they make sense of the world and creates desires for future life change. This is a junior tutorial.

Course Notes: This course will be lotteried.
Social Studies 98PV

The Critical Theory of the Frankfurt School (156263)

Charles Clavey

2021 Spring (4 Credits)  Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor  Enrollment Cap: 10

This course examines the distinctive critical theory created by members of the Institute for Social Research—better known as the Frankfurt School—from its origins in the interwar era to the present day. Over these decades, critical theory has used tools from philosophy, psychology, and sociology to grasp the pathologies of the present and to chart a path towards emancipation in the future. We will reconstruct the Frankfurt School's evolving theory through its connections to the most important themes of twentieth-century thought: capitalism, authoritarianism, individuality, bureaucracy, and alienation. Our goal is not only to gain a deep understanding of critical theory but also to assess its continued relevance to modern social and political thought. This is a junior tutorial.

Course Notes: This course will be lotteried.

Media, Power, and Resistance (205458)

Ieva Jusionyte

2020 Fall (4 Credits)  Schedule: W 0900 AM - 1145 AM

Instructor Permissions: Instructor  Enrollment Cap: 10

Media and power are inextricably linked. On the one hand, mass forms of communication, such as national television and mainstream dailies, have long been circulating hegemonic discourses and given legitimacy to state projects and official ideologies. On the other hand, nicknamed the "Fourth Estate," news organizations have also acted as watchdogs, monitoring the performance of the government and holding it accountable to the people. Today's diversified and loosely regulated media landscape has destabilized and complicated this dual role of news organizations in reproducing existing power relations and providing a forum in which citizens can critically discuss public matters. The course draws on social theory and
ethnographic research with various forms of media (from print newspapers to online memes, from public radio to "deep fakes") to raise questions about political agency and trace its limits as well as possibilities through multiple public spheres that are both more participatory and more fractured than ever before. This is a junior tutorial.

Course Notes: This course will be lotteried.

Social Studies  98QI

Reimagining Populism (205480)

Angela Maione

2020 Fall (4 Credits) Schedule: M 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 10

Who represents the people and on what basis? What role do the people play in creating, sustaining, or destroying democracy? Who is the most appropriate agent for democratic change: the masses, the working class, the peasantry, or the citizens of a representative democratic state? These questions are currently vibrantly debated by contemporary scholars who issue warnings that come out of fear of mob rule (ochlocracy), expert rule, or fear of the people themselves. Is some form of populism necessary to democracy or is it always a sign of its demise?

This class will first explore different contemporary views, including anti-democratic, democratic, and left populisms. We will give attention to the increasing place of socio-economics in these discussions. In order to deepen our understanding of the questions these current positions raise, we will then return to key texts in the history of social and political thought. Readings include selections from Hannah Arendt, Niccolò Machiavelli, Jean-Jacques Rousseau, Karl Marx, Rosa Luxemburg, and Franz Fanon. This is a junior tutorial.

Course Notes: This course will be lotteried.

2021 Spring (4 Credits) Schedule: T 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 10

How do the languages we use shape our thinking? And how do our ideas about how language works intersect with issues of race, gender, and class? This course is an introduction to key debates in the social
scientific study of language as a social, cultural, and political phenomenon.

Our readings focus on a range of contexts and issues unfolding across Europe – from colonial practices of language documentation and translation to discourses of bilingualism and code-switching, from "migrant" literature to public debates about the roots of national identity. At the same time, we will explore how the study of language itself has historically contributed to the creation and maintenance of the idea of "Europe" in the first place, both in the way it narrates the history of and relationships between languages, and in describing their differing capacities. Tracing this story will in turn require that we ask how European ideas about language have been naturalized in the social sciences, and what kinds of alternatives have emerged to challenge this hegemony. Instead of treating language as a separate domain of research, therefore, we will see how language helps constitute the social and political worlds in which we live, as well as how our ideas about language reflect and produce a variety of normative assumptions. This is a junior tutorial.

Course Notes: This course will be lotteried.

Aesthetics and Politics (211214)

Ana Isabel Keilson

2021 Spring (4 Credits) Schedule: R 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 10

Since Ancient Greece, individuals have considered aesthetics, defined alternately as the appreciation of art and beauty and the felt (sensible, embodied) experience of the world, as a way to theorize society and politics. This course examines the history of ideas about aesthetics by major modern political thinkers (Kant, Burke, Nietzsche, the Frankfurt School, Chantal Mouffe) alongside some of their cultural contemporaries in the literary, visual, musical and performing arts. This is a junior tutorial.

Course Notes: This course will be lotteried.

Caste, Race, and Democracy (213297)
Hari Ramesh

2021 Spring (4 Credits)  Schedule:  W 1245 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

Drawing on the resources of social and intellectual history, political theory, and social science, this tutorial will explore the intimacies and differences between two forms of social differentiation: caste in India and race in the United States. We will focus, in particular, on the relationships between caste, race, and imperial power; the diagnoses of and forms of democratic resistance to caste and race subjugation that were articulated in the 19th and 20th centuries; and the place of contemporary social science in documenting both the persistence of oppression along caste and racial lines and the success of efforts to combat such oppression. This is a junior tutorial.

Course Notes:  This course will be lottered.

Race and Ethnicity in the United States (213256)

Christina Ciocca Eller

2021 Spring (4 Credits)  Schedule:  T 1245 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

The United States is more racially and ethnically diverse than at any point in its history. Yet racial and ethnic social categories remain persistent sources of inequality in American society. This tutorial will interrogate the relationships between race, ethnicity, and inequality, examining theoretical and empirical approaches across multiple social domains. It particularly will emphasize how race and ethnicity structure experiences, opportunities, and outcomes in important social contexts such as neighborhoods, educational institutions, and the labor market, among others. This is a junior tutorial.

Course Notes:  This course will be lottered.

Human Rights in History (213298)
Human rights have become the dominant moral language of our day. When, and how, did they first emerge as an operative system of moral and political belief, and how can their history inform an understanding of contemporary politics and society? Focusing on European, American, and global contexts, this course explores the history of ideas and practices of human rights from the 18th century to the present. This is a junior tutorial.

Course Notes: This course will be lottered.

The Many Faces of Tyranny (213280)

Rosemarie Wagner

2020 Fall (4 Credits)  Schedule:  F 1200 PM - 0245 PM

Instructor Permissions:  Instructor  Enrollment Cap:  10

This course explores the way tyranny has been presented in different times and places and the many ways tyranny can create unfreedom. From a wild man out of control, to a carefully orchestrated system of control, tyranny wears many faces. This course begins with Plato's tyrant who rises from the rubble of a failed democracy, through early modern defenses of Regicide, to modern accounts of the tyranny of the majority, empire, and structural oppression. Through this course we will examine what a tyrannical nature is, what makes it rise to power, and what can be done to stop it. This is a junior tutorial.

Capitalism, Time, and Value (213266)

Tracey Rosen

2021 Spring (4 Credits)  Schedule:  R 1245 PM - 0245 PM

Instructor Permissions:  Instructor  Enrollment Cap:  10
College students are often counseled to "make the most valuable use of their time." The "budgeting" of hours, days, and weeks of a semester often rests on an evaluation of how much time an activity is worth. In this tutorial we will explore how capitalism might shape the way we perceive, understand, and value time. We start from the premise that economic systems do more than organize the production and distribution of goods; they also help organize how we experience the world as well as the meanings and values that shape our actions within it. In order to ground the dynamics of time and value within capitalism, we begin by drawing from anthropological and historical examples to consider the relationship of time and value in a variety of pre-capitalist contexts. The course then considers the way in which capitalist transformations coordinate new forms of value and perceptions of time. We end with an examination of our everyday, contemporary experience of time against the backdrop of "neoliberal" capitalism and the rise of "futures" markets. This is a junior tutorial.

Course Notes: This course will be lotteried.

What's the Matter with Inequality? Normative and Empirical Perspectives (216070)

Glory Liu

2020 Fall (4 Credits) Schedule: T 0345 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 10

This course investigates the diverse ways in which we theorize, study, and talk about economic inequality today. Is inequality wrong because some people have too much, or because others have too little? Or is it wrong simply because some people have more than others? To answer these questions, this course explores prominent social science explanations of the nature, causes, and consequences of economic inequality in the United States alongside normative theories of equality and inequality. We will also investigate the theory and practice of different "solutions" to inequality such as redistribution and "predistribution", philanthropy, and universal basic income. This is a junior tutorial.

Course Notes: This course will be lotteried.

Social Studies 98TD

The Theory and Practice of Democracy in Developing Countries (216073)

Julie Weaver

2020 Fall (4 Credits) Schedule: R 1245 PM - 0245 PM
What does the practice of democracy look like in developing countries today? How does that practice map on to democratic ideals like representation, participation and accountability? The course will explore these questions through both theoretical and empirical social science research, with cases drawn primarily from Latin America and Sub-Saharan Africa. Topics will include political accountability, state and institutional strength, corruption and clientelism, participatory democracy, managing diversity, and activism and civil society engagement. This is a junior tutorial.

This course is organized around three crucial questions: (1) What does a truly democratic society require of its educational institutions? (2) How well do our current educational institutions—especially our K-12 schools—live up to the standard set by question 1? (3) What approaches, at the level of both pedagogy and policy, should we take to make our school system more democratic? We'll address these questions in conversation with philosophers (like John Dewey, Paolo Freire, and Danielle Allen), cognitive psychologists (like Susan Carey), jurists (like Earl Warren and Thurgood Marshall), and social scientists (like Raj Chetty and Daniel Koretz). This is a junior tutorial.

This course explores the exciting field of participatory innovations in democratic governance and public policy. Our goal will be to identify proposals that generate effective citizen participation and engagement while addressing pressing public problems. A number of challenges for democracy reform will be...
considered, including the role of expertise, inattention and misinformation, the tyranny of powerful minorities, political polarization, and rising public distrust and disaffection. Throughout, our discussions will be grounded in an analysis of real-world cases, from elections and criminal justice, to international development and urban planning. This is a junior tutorial.

Course Notes: This course will be lotteried.

Sociology
Subject: Sociology

Sociology 90EQ
Research Lab: Equity through Inquiry: Pedagogy, Research, and Capacity Building Strategy Lab (216133)

Flavia Perea
2020 Fall (4 Credits) Schedule: T 1245 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 8

This course will examine the principles and methods of community based, participatory, action, and decolonizing approaches to inquiry. In addition to developing this knowledge and skill-set among students in the course, the purpose of this lab is to design a curriculum to teach this content to undergraduates in tandem with creating a strategy to increase public knowledge and usage of equitable approaches for knowledge generation, meaning making, and social transformation through inquiry.

Together we will engage with various frameworks and systems of knowing and meaning making; how they are centered on, or the extent they intersect with the pursuit of equity and justice; and pragmatic approaches for moving from theory to practice. We will discuss power and privilege, identity and location in the context of research; the promise and limitations of engaged inquiry to help advance social change; and the ethics of inquiry with historically and systemically oppressed people and communities. We will discuss epistemology, research paradigms, and explore a variety of approaches, including Participatory Action Research/PAR, Community Based Participatory Research/CBPR, citizen science, and indigenous approaches to research. We will examine how different approaches for asking questions, methods for gathering and analyzing information, and sharing knowledge, as well as the principles, truths, and worldviews that undergird different approaches, can be applied in diverse contexts. Learning from and critical engagement with voices and perspectives from beyond the academy, in particular those excluded from academic scholarship, will be central to our work. Ultimately, we will critically examine how inquiry that emphasizes equity, collaboration, and reciprocity in the uncovering, integration, application and dissemination of knowledge can be a tool of liberation and certain methods a strategy for responding to oppression, colonization, and systems of domination.

Sociology 90I
Research Lab: Immigration (207118)

Leah Muse-Orlinoff
2021 Spring (4 Credits) Schedule: R 1200 PM - 0200 PM
Instructor Permissions: Instructor Enrollment Cap: 8

What does it mean to be a "good" immigrant? Is current media attention on immigration perpetuating an image of "deserving" and "undeserving" immigrants? How is coverage of immigrants' race, gender and
sexuality, and human capital evolving in the current political context? And what implications for immigrant integration – the two-way process by which immigrants and their communities of settlement interact and adjust to one another – might be emerging from the media's depiction of immigrants and immigration policy?

In this research lab students will learn data collection and analysis skills that will help them answer these and related questions. Course content will include a robust research design and methodology component through its focus on media coverage of immigration and integration in mainstream and ethnic media. Course participants will develop qualitative research projects that analyze key sociological themes including race and ethnicity, gender and sexuality, and human capital. Students will learn how to formulate sociological research questions and hypotheses, collect and analyze data, and articulate findings in a formal academic proposal. This course is limited to sociology concentrators; bilingual students are encouraged to enroll.

Course Notes: Limited to Sociology concentrators. Preference given to those who have taken Sociology 128.

Research Lab: Inequality (214610)

Xiang Zhou

2021 Spring (4 Credits)

Schedule: R 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 8

This course introduces students to quantitative research on social and economic inequalities. By analyzing data from National Longitudinal Surveys of Youth, 1997 cohort (NLSY97), we investigate educational inequality, labor market inequality, and intergenerational mobility in contemporary America. In the context of these topics, students will build skills in data analysis and data visualization in R and learn a variety of quantitative methods including regression modeling, path analysis, and causal inference.

Class Notes: A basic course in statistics such as Sociology 156, Stat 100/102/104, or an equivalent.

Sociology 92R

Faculty Research Assistant (160534)
Danilo Mandic

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: Instructor  Enrollment Cap: n/a

Students gain research skills along with an understanding of the production of sociological knowledge through work on faculty research projects. Work is arranged and directed by faculty members, who supervise and meet with students regularly (every 1-2 weeks). The specifics of the intellectual goals for the student and the research tasks involved will vary. The student and faculty member will consult on this in advance and will outline the following on the 92r Registration Form: 1) the specific skills to be learned, 2) how the course will engage students with the discipline, and 3) the specific work product. What students produce will depend on the kind of research involved. It is expected that students will work 8 to 10 hours per week on the course. Students may engage with data collection, data analysis, literature reviews, or other aspects of a faculty project.

Course Notes:  Members of the department.

This course introduces students to the complicated, conflictual, and often contradictory theoretical origins of sociology as a discipline. We begin by reading the standard sociological "canon"—Marx, Weber, and Durkheim—and interrogating why their ideas were canonized over others. We then read scholars who have been historically "written out" of the social sciences to evaluate their important, yet historically underappreciated, contributions. By the end of the course, students should (1) master key concepts in classical sociological thought, (2) understand what it means to theorize, and what makes for good theory, and (3) learn to critically interrogate the relationship between power, standpoint, and the production of knowledge.

Course Notes: Required of concentrators, ordinarily sophomores, and secondary concentrators.

Class Notes: This course will be taught with one lecture and one section per week.

Sociology 98AC

Junior Tutorial: The Future of Work (215924)

Hilary Holbrow

2020 Fall (4 Credits)  Schedule: T -

Instructor Permissions: Instructor  Enrollment Cap: 10

The 21st century has brought dramatic changes to the world of work. The traditional, full-time employment relationship is in decline. New ways of organizing work are on the rise, with more people working as independent contractors or using gigs to get by. Technology is changing the nature of jobs, as workers can collaborate remotely and delegate complex tasks to computers. And employers face growing demand for diversity, inclusion, and accountability when it comes to discrimination and harassment. In the midst of the major transitions already taking place, Covid-19 has forced organizations—from corporations to schools to healthcare providers—to radically rethink when, where, and how work is performed.

These changes bring new challenges, both for individual workers and for social policy. How does a single mother manage childcare when an algorithm assigns her to shifts that change weekly? How do gig workers juggle multiple jobs across digital platforms to make ends meet? How can we provide benefits to people who work 40 hours a week but do not have a regular employer? How can employers control their workers from a distance—and should they?

The tutorial will guide students in the development of an empirical research paper on a topic of their choosing that addresses the changing world of work. Topics may include gender and race in the workplace, automation and the machine-human interface, experiences of empowerment or precarity in gig work, new labor movements, and policy responses such as universal basic income. Through in-class workshops, we will develop research questions and formulate practical research designs. We will explore qualitative research methods, including interviews and observation, and learn to conduct online survey experiments. Throughout, we will refine our understanding of the world of work and how workers, employers, social movements, and policymakers are responding to new challenges.

Course Notes: Required of and limited to Sociology concentrators.

Class Notes: Course taught by Laura Adler; time TBD

Junior Tutorial: Ethnography of Social Movements in a Digital World (212755)

Vivian Shaw
How do activists organize during a pandemic when social distancing is paramount? How have social movements changed alongside the evolution of social media? This tutorial explores the craft of digital ethnography through the theme of social movements. The COVID-19 pandemic has fundamentally altered the terrain of immersive research, forcing researchers to rapidly adjust to digital methods for collecting and analyzing data. In this course, we will read "traditional" ethnographies on social movements and related topics alongside more recent and experimental digital ethnographies, using these as models for understanding ethnographic fieldwork and analysis. As a junior tutorial, your research interests will serve as a foundation for the class. You will each complete an independent research project on some aspect of social movements, employing in-depth interviews and/or ethnographic methods. Through in-class workshops, we will formulate research questions and practical research design. The goal of this course is to provide you with the opportunity to conduct original research and to better understand the insights and challenges of ethnographic fieldwork.

The course will begin with a review of some of the key debates on social movements within sociology. You will then design and complete your own ethnographic research projects, engaging with the key methodological questions raised throughout the course. The course will cover the various steps of the research process, from formulating a research question through collecting and analyzing data and reviewing existing literature, to constructing the final paper. As we compare "traditional" and digital ethnographies, we will explore the opportunities and limits of conducting fieldwork online. We will also discuss the logistics of conducting ethnographic fieldwork, including contacting groups, gaining access, and recording data.

Course Notes: Required of and limited to Sociology concentrators. Junior Tutorials are by lottery only.

Recommended Prep: Prerequisite: Sociology 97 AND Sociology Concentrators

we will examine visual culture from a sociological perspective. Who produces visual culture, how, and why? How do images become icons, taking on symbolic meaning for large groups of people? To what extent and how do those meanings change over time? How do relations of power and inequality shape the production and dissemination of visual culture? Why do people perceive bodies and spaces in the ways that they do, and with what consequences? How do relations of seeing and being seen (re)produce power asymmetries?

In class, we will cover a range of topics pertaining to visual culture, including the making of cultural icons, their dismantling through acts of iconoclasm, the surveillance of people and spaces through visual technologies, racialized and gendered politics of representation, modes of producing and distributing visual culture, and more. Students will also learn the fundamentals of sociological research, and over the course of the tutorial, they will develop an independent research project about a topic of their choice that pertains to visual culture. Through a series of assignments and workshops, they will choose a research question, situate it in scholarly literature, develop a research design, and use either ethnographic, interview-based, or archival methods to gather original data. Those who choose ethnographic projects will have the option of supplementing traditional hand-written textual fieldnotes with alternative visual note-taking strategies, such as photography and sketching. Ethnographic projects involving participation in the production of visual culture are also welcomed. Students will present their research findings in oral and written form.

Sociology  98WE

Junior Tutorial: Poverty (213641)

Danilo Mandic

2021 Spring (4 Credits)  Schedule:  W 0945 AM - 1145 AM

Instructor Permissions: Instructor  Enrollment Cap:  10

Nearly one in three residents of the United States lives close to the poverty line, and a growing number of us live in deep poverty, subsisting on less than $2 per day. This course examines the social world of poverty in the United States today. It pays particular attention to the lived experiences of low-income people. It also examines the parallel set of institutions low-income people must navigate—institutions that often perpetuate poverty: low-wage jobs, systems of policing and surveillance, substandard schools and colleges, exploitative housing, and predatory financial services. During the semester, students will conduct an extended research project about some aspect of poverty in the United States. The project will be a chance to hone important research skills, including conducting interviews and taking ethnographic fieldnotes, analyzing and presenting qualitative data, figuring out the "so what?" behind empirical findings, and thoughtfully giving and receiving peer feedback.

Course Notes: Required of and limited to Sociology concentrators. Junior tutorials are by lottery only.

Models of Social Science Research (117560)

*David Pedulla*

2021 Spring (4 Credits)  

**Schedule:** TR 1200 PM - 0115 PM

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

This course introduces students to core methodological concepts and strategies used in social science research including: research design, sampling and measurement, experiments, survey analysis, content analysis, network analysis, ethnography, and interviewing. Throughout the course we will develop the analytical skills necessary to interrogate epistemological assumptions in published social science research specifically and truth-claims generally. In addition to critically evaluating previous research, students will collect and analyze data using the different methods discussed in class. By the end of the course, students should have acquired valuable research skills widely applicable in academic and professional settings.

**Course Notes:** Required of concentrators, ordinarily sophomores, and secondary concentrators.

### Sociology 1024

Social Inequality (117584)

*Jonathan Mijs*

2021 Spring (4 Credits)  
**Schedule:** MW 0130 PM - 0245 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course is an introduction into the sociological study of Social Inequality. Students will learn about sociological theories and read empirical research describing how social inequality is produced and reproduced in various institutions (e.g. the family, neighborhood and labor market) and through different mechanisms (e.g. socialization, segregation, discrimination). We will explore what it would take to address these different sources of social inequality in America, and learn from comparisons with other countries and historical moments.

**Course Notes:** May be counted for introductory concentration requirement, if letter-graded.

**Class Notes:** The first course will be held Wednesday, January 27th. There will be no course on Monday, January 25th.

The Sociology of Organizations (113256)

*Frank Dobbin*

2021 Spring (4 Credits)  
**Schedule:** TR 1030 AM - 1145 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course examines the evolution of the modern organization, focusing on changing approaches to
corporate strategy and to managing employees. We read both social scientific analyses and Harvard Business School cases to trace the history of management, from the harsh principles of the "drive system" to the latest theories of how "work teams" improve productivity and how focusing on a firm's "core competence" improves the bottom line. The course covers research examining the efficiency and the equity of current corporate practice.

Sociology 1026

Global Social Change (109657)

Rachel Meyer

2020 Fall (4 Credits) Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: 36

This course explores the development of global capitalism with a focus on changing relationships between markets, states, and civil societies. Questions of power and inequality will be central to our approach. We will begin from a macro political economy perspective, exploring global social change through the lens of world-system theory, neoliberalism, deindustrialization, and "flexible accumulation." We will then examine resistance to global capitalism in local contexts around the globe. We will explore a variety of mobilizations in civil society, including transnational activism, student movements, and precarious workers' mobilizations. The course will culminate with a unit on contemporary social movements and social change where we will pay particular attention to recent events: the Black Lives Matter movement, COVID-19 and essential workers, and teacher strikes. Finally, we will take up the question of the relevance of social media to protests and social change. Throughout the course we will ask: How are social relations shaped by capitalist development in different contexts? Under what circumstances does civil society resist markets and states? And how can we conceptualize the different forms of resistance and their significance? We will explore the possibilities for and limitations on social change around the globe through a variety of cases of transnational and community-based activism.

Sociology 1067

Sociology of Law (212660)

Yael Berda
Law has a social life. Actually, it has multiple social lives. First, law is itself the product of social forces. It is shaped by what people fight about, what is taken for granted, and what can and cannot be said. But law is also an institution that makes other social institutions possible. From contracts to borders, citizenship to marriage, law consists of concepts and categories, institutions and processes that create social forms and enforce the rules of multiple games. As we will see this semester, law is both the outcome and the starting point of many social processes, it tells us both the history and the perceived future of a social phenomenon. Even before its inception within the legal structure of mandate Palestine in 1948, Israeli law, broadly defined, has been a site for social controversy and contestation. Issues of citizenship and land ownership, geographical borders and international law, the role of the religion in private and public life, questions of historical legacies from the Ottoman and British empires as well as Hebrew and Muslim law all provide powerful case studies for sociologists of law. We will use these issues in Israel as a comparative vantage point to learn to use our sociological imagination to identify, analyze and explain these social phenomena using law and society scholarship.

Course Notes: Counts for introductory credit when taken for letter grade.

Sociology 1103

Environment and Inequality (212756)

Vivian Shaw

2021 Spring (4 Credits) Schedule: W 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 15

How does your zip code affect your health? What are the social and political consequences to building a dam? What are the economic and political foundations underlying racial disparities in sickness and mortality during the COVID-19 pandemic? This seminar explores environmental issues through the lens of inequality, focusing particularly on race, indigeneity, gender, and (dis)ability. We will look at case studies across the globe such as toxic disasters in Bhopal, India, to the Grenfell Tower fire in London, UK, Standing Rock, in the United States, and the present global pandemic. While learning about the transnational and comparative-historical scope of environmental issues, students will apply key theoretical tools to situate course topics within broader themes, including cultural memory, popular culture, violence, and governmentality. Students will also develop an expertise in a course-related topic of their choice.

Sociology 1104
Sociology of Higher Education (203333)

Manja Klemencic

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This undergraduate seminar explores modern higher education systems, institutions and student experiences of higher education through sociological lenses. We read the seminal works and concepts from the seven domains of inquiry in sociology of higher education: college impact, study of inequalities, universities and colleges as organizations, academic profession, higher education politics, higher education culture and student agency and impact in higher education. We analyze some of the major questions and controversies in contemporary higher education – What are the implications of COVID-19 pandemic for higher education? Is college worth the cost? Why does higher education cost so much? How is higher education industry changing globally? Is higher education the Great Equalizer? We also look backstage to student experiences at Harvard. This is a research-intensive seminar. With personalized advising from the instructor each student conducts independent (conceptual or empirical) research leading to a capstone paper. This course offers opportunities to gain perspectives into established and emerging areas of research into higher education and insights into today’s changing higher education landscape at Harvard, in the United States and across the world.

Sociology 1106
Humanitarian Activism and Civil Society (203440)

Shai Dromi
Cristina Lacomba

2020 Fall (4 Credits) Schedule: TR 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a

When global crises strike, humanitarian nongovernmental organizations – NGOs – spring to action, offering emergency medical services, basic necessities, expertise, and innovation to affected communities around the world. Yet COVID-19 brings unprecedented challenges—and unprecedented opportunities—to humanitarian endeavors. Humanitarian workers are now working globally to distribute personal protection equipment in disadvantaged communities, trace the spread of coronavirus in countries with sparse public health resources, support countries with weakened hospital systems, and advocate for an equitable distribution of a future vaccine.

This course provides a comprehensive view of humanitarian organizations and activism from a sociological perspective. We will examine the origins of organized humanitarian activism and the dilemmas and challenges that NGOs face. We will investigate the consequences, justifications, and limitations of humanitarian work. COVID-19 will be a central study case for us, and we will also look at case studies from the Kosovo War, the Nigerian Civil War, and the 2004 Indian Ocean Tsunami. Students will be assigned specific regions to research over the course, and will create visual representations of the conditions and humanitarian activities in their assigned region. The course will include a virtual “hackathon” with the Bok
Center's Learning Lab Studio where students will learn visual media skills for this purpose.

**Sociology 1113**

Latinx Identity and Mobilization (211161)

*Cristina Lacomba*

2021 Spring (4 Credits) Schedule: W 1200 PM - 0200 PM

**Instructor Permissions:** Instructor Enrollment Cap: 15

This course examines Latinx identity and mobilization from a sociological perspective. It begins by investigating the complexity of the Latinx identity in the United States. Does Latinx refer to a culture that encompasses many cultures, a common geographical origin, a shared linguistic identification, some or all the former? How does the use of pan-ethnic identities, of which Latinx is a representation, shape power, representation, and inequalities within and between social groups? The course will first focus on sociological theory of ethnic identity construction. Students are then asked to apply their newfound understanding of the Latinx identity to an analysis of Latinxs' mobilization and social movement activism. What socio-political issues undergird Latinxs' mobilization in modern times? How well does social movement theory explain Latinx mobilization? The course discusses the formation of Latinx identities and mobilizations of Caribbean, Northern, Central, and South American people/s in the United States.

**Sociology 1121**

Understanding Meritocracy (212827)

*Jonathan Mijs*

2020 Fall (4 Credits) Schedule: R 0945 AM - 1145 AM

**Instructor Permissions:** Instructor Enrollment Cap: 10

Some hold inequalities to be the result of a fair "meritocratic" race that is decided by hard work and effort alone. Others believe the race is fixed: some of us, because of their gender, color of skin, or their parents' resources have a much better shot at winning than do others. This course challenges students to critically evaluate the concept of meritocracy, its origins and contemporary adoption as an ideal worth striving for. Taking a sociological perspective, we ask what a true meritocracy would look like, what its societal implications would be, and what social processes may stand in its way. We then review the empirical
record describing people's various perceptions and explanations of social inequality, and we explore the factors underlying their beliefs. Specifically, what are the psychological underpinnings of people's beliefs about inequality and what role does culture play? Are people's beliefs most impacted by news reporting, by facts or by experience? We conclude by exploring how beliefs about inequality are mobilized in class and racial conflict, and explore in what ways people's beliefs are or aren't likely to change.

Immigration and Gender (213351)

*Talia Shiff*

2020 Fall (4 Credits)  
**Schedule:** M 1200 PM - 0200 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

The study of immigration and the study of gender often do not intersect. This is despite the fact that scholars in both fields of study focus on questions concerning cultural membership and equal citizenship and the processes that produce social inequality. The goal of this course is to reinvigorate the linkages between gender and immigration. We will interrogate how gender, as it intersects with race, shapes practices and policies of im/migration and migrants' lived experiences: what is the gendered character of migration patterns, and policies? How does migration occur on a voluntary and involuntary basis in ways that disproportionately disadvantage marginalized groups along lines of gender and race? And conversely, in what ways do the practices and consequences of immigration and transnationalism shape and constitute gender relations? The course will combine discussions of current issues on public media and news articles with academic analyses to encourage students to think about the complex interrelations between immigration, sexuality, gender and race, and the ways these shape our social world.

**Sociology 1127**

Media and Society (215910)

*Cristina Lacomba*

2021 Spring (4 Credits)  
**Schedule:** TR 1200 PM - 0115 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

What are the virtuous capacities of mass-delivery information technologies? How do they help the world become a better place? Do they present potential threats to individuals and the societies in which they live? Through select theoretical work in sociology, we will reflect upon those questions and apply that knowledge to the world we know. To illustrate these theories, we will resort to past and current examples of
the use of the media and new technologies. The course will explore how the media helps uncover injustices, such as police brutality, and generates social mobilization. It will also cover how the media produces political propaganda and provides space for virtual (online) communities. For instance, the course will explore both top-down and ground-up approaches, examples of which are how the United Nations uses new technologies to promote its political agenda or how individuals join online blogs in search of identity and community. The semester will begin with the study of older media outlets, such as newspapers, televisions, and the internet, and move onto newer social media technologies such as Facebook, Twitter, and Instagram. The class will include the topics of gender, race and ethnicity, inequality, and collective identity in the socio-political and cultural terrains.

This course is apt for undergraduates interested in communication, culture, and politics.

**Sociology 1130**

Student Leadership and Service in Higher Education (205039)

*Manja Klemencic*

2021 Spring (4 Credits)

**Schedule:** R 1200 PM - 0200 PM

**Instructor Permissions:** Instructor Enrollment Cap: 30

This Undergraduate Engaged Scholarship Course specifically targets students in service and leadership roles at Harvard (e.g. student leaders in student organizations, students serving on University committees or as interns in University offices or programs, PAFs, HOCOs, UC members, Crimson, etc.). To these students it offers an opportunity to engage with scholarship from sociology of higher education to better understand and explore student agency in college contexts. Through hands-on student leadership development workshops built into the course, students will also develop skills that will help them in their roles. Students’ grasp of concepts, such as university citizenship, mattering, belonging, community-building, and self-formation, is reinforced through their experiential learning in existing service and leadership roles on campus. Based on their campus role, students work on participatory action research and develop blueprint to change practice or policy. This course challenges the traditional line of inquiry in sociology of higher education which focuses primarily on the effects of college on students. Instead, student action research projects demonstrate student agency and the impact students have on higher education communities.

When crises strike, nonprofit organizations spring to action, offering their resources, expertise, and innovation to affected communities. Yet COVID-19 brings unprecedented challenges—and unprecedented opportunities—to philanthropic endeavors. Indeed, aside from supporting medical research on COVID-19, nonprofit organizations have been providing medical care, distributing personal protective equipment (PPE), helping address loss of employment and food insecurity, and advocating for global equity in vaccine distribution, among other tasks.

This course partners with the Lemann Program on Creativity and Entrepreneurship (LPCE) in order to provide students with a unique opportunity to experience first-hand how philanthropists and nonprofit organizations are helping address the global effects of this global pandemic. On the theoretical side, the course will examine the workings of philanthropy and of nonprofit organizations, using different sociological perspectives and a series of case studies. Alongside the theoretical content, students will form groups and will develop their own nonprofit ventures to address the social impact of COVID-19. Student ventures will receive startup seed funding and, at the end of the course, will compete over additional seed money. The course will include a series of guest lectures and workshops on entrepreneurship to support student venture development.

This course explores the production of social inequality from a global and transnational lens. The course is based on the premise that we have to think about core issues concerning unequal access to rights, resources and cultural membership globally while at the same time not denying the importance and centrality of the unit of the nation state. In this course, students will not only compare differences across countries but will also develop tools by which to critically think about what it means to see the world as a unit that is populated by markets, movements and networks that transcend national boundaries. We will ask how the national and transnational are interrelated and mutually constitutive of each other. Students will have the opportunity to explore questions concerning borders and boundaries, forced migration, and changes in the relations between civil societies, states and markets. Through considering these topics of global social change, students will critically investigate the limits and potential of establishing a global sociology for understanding social relations at local, national, and international scales.
### Sociology 1133

**War, Revolution, and Organized Crime: In Film, and in Reality (159926)**

*Danilo Mandic*

2020 Fall (4 Credits)

**Schedule:** MW 1030 AM - 1145 AM

**Instructor Permissions:** None

**Enrollment Cap:** n/a

This course explores war, revolution and organized crime as interrelated social phenomena. Students will read sociologists, historians, political scientists and philosophers addressing the nature, causes and consequences of these phenomena in different national and historical contexts. The course will combine influential theoretical frameworks (by Karl Marx, Max Weber, Sigmund Freud, Hannah Arendt), middle-range social scientific approaches (by Anthony Giddens, Charles Tilly, Michael Mann, Theda Skocpol), and empirical and historical analyses (by Eric Hobsbawm, Benedict Anderson, James C. Scott, Eugen Weber). The three phenomena will further be scrutinized through their (mis)representation in movies by Mike Nichols, Milos Forman, Bernardo Bertolucci and others.

### Sociology 1137

**Political Sociology (215965)**

*Rachel Meyer*

2021 Spring (4 Credits)

**Schedule:** TR 1030 AM - 1145 AM

**Instructor Permissions:** None

**Enrollment Cap:** n/a

This course is about political power: who has it, how it is used, and how it can change over time. The course begins by outlining key concepts and theories along with an examination of political power in the neoliberal state. What does democracy, public policy, and political participation look like in this neoliberal context? We will then move on to explore how power operates through state institutions with an analysis of both the welfare state and the carceral state. Should the welfare state be understood as a method of redistribution or of social control? How can we think about the relationship between the carceral state and power in civil society? What can we learn from a comparison of the welfare state and the carceral state? We will compare policies and practices in different contexts while focusing on surveillance of civil society via state institutions. Our final unit is about contesting state policies, institutions, and structures. We will take up the cases of welfare rights organizing and the Black Lives Matter movement, along with the contemporary emergence of both 'right' and 'left' populist movements. We will end with attention to the
particularities and possibilities of local-level politics in terms contestation, civil society, and grassroots political power. The focus of the course is on the United States while at the same time using a comparative sociological perspective to examine political power in a variety of national, historical, and cultural contexts. Underlying our analyses will be comparisons with "real utopias" (Wright 2010)—alternative, prefigurative models of state institutions and political power.

Sociology 1138
The Israeli/Palestinian Conflict: Contemporary Socio-Legal Aspects (212817)

Tally Amir

2021 Spring (4 Credits)

Instructor Permissions: Instructor Enrollment Cap: 15

Schedule: R 0600 PM - 0800 PM

The decades-long Israeli-Palestinian conflict has attracted significant international attention and is perceived as an international threat. This seminar offers a nuanced and safe discussion of the conflict’s socio-legal context and its implications for Palestinian and Israeli society, through exploring the works of scholars from diverse backgrounds and views. We will take a closer look at some of the main controversies, and how these impact the lived experiences of people in both societies, including Israel’s control over and settlements in the West Bank; the separation wall and policy; concepts of citizenship, migration and refugeehood; Palestinian and Israeli statehood; and more. Readings for the course include court decisions, international law instruments, and domestic legislation, as well as sociological analyses.

Sociology 1141
Contemporary Chinese Society (116219)

Ya-Wen Lei

2020 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM
Situating China in the context of the transition from socialism, this seminar provides an overview of contemporary Chinese society. We will explore recent structural changes in China’s economy, political system, legal institutions, media, family forms, education, stratification and inequality, and contests over space—as well as how all these various changes interact with one another. We will begin with the Chinese Communist Revolution and then the Cultural Revolution as crucial historical context, and then move on to examine the profound social transformations of the post-1978 reform period. The course will examine how these changes have impacted social relations, how they have been experienced and understood by individuals, and how, in turn, the responses of individuals have also shaped the trajectory of reforms.

Sociology 1142

Sociology of Asian America (212728)

Vivian Shaw

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 16

Today, over 22 million people living in the United States identify as Asian. Asian Americans and Pacific Islanders (AAPI) are one of the fastest growing populations in the US. What are the social, cultural, and political structures that shape the lives of AAPI? How have the experiences of AAPI changed from the nineteenth century to the present? This course takes a sociological view to examine “Asian America.” Rather than analyzing AAPI as a monolithic group, this course explores the diversity of experiences and histories within Asian America. Through readings on a range of case studies, we will examine Asian America through important historical and social phenomena such as colonialism, environmental racism, war, migration, and social movements. We will look at the ways that AAPI have been socially and politically constructed as a racial group and the ways that such categorizations continue to shift. Finally, we will consider contemporary debates about AAPI that are particularly alive here at Harvard, such as affirmative action, socioeconomic mobility, and social justice.

Sociology 1152

Conflict, Justice, and Healing (212659)

Matthew Lee

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a
Serious crime and other forms of conflict are experienced as a traumatic violation. This is to be avoided at all costs. And yet... some survivors experience surprising levels of resilience, a renewed sense of meaning and purpose, empowerment, and post-traumatic growth. Some offenders turn towards a deeper sense of truth and existential responsibility. Some communities transcend institutionalized patterns of dehumanization and violence to embrace the challenging path of forgiveness, reconciliation, healing, and inclusive flourishing. When and how do individuals and communities heal after conflict? We engage with these issues through a series of diverse case studies, including contemporary examples drawn from the international Black Lives Matter movement, prisoner reintegration efforts in the U.S., victim/offender dialog in the Middle East, and embodied emancipation in post-apartheid South Africa, as well as classic cases such as the Cuban Missile Crisis. A critical engagement with the emerging fields of conflict transformation and positive criminology reveals potential restorative pathways to individual and communal well-being, and ultimately harm prevention. A growing body of empirical research on the social conditions and processes that give rise to these outcomes will also help us explore such timeless questions as: What is justice? How can "enemies" reconcile? What is the good life?

Sociology 1153

Subcultures (213536)

Cristina Lacomba

2020 Fall (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

What does subculture mean? Who participates in subcultures and why? What is society's reaction to subcultural mobilization? How do new technologies and the media shape subcultures? This course will mainly draw from sociological theory of culture to examine a variety of national and international subcultural movements around the world. The course also draws from literature on media and cultural studies to provide a further understanding of how subcultural movements arise and evolve. We will analyze different types of subcultures under the lens of class, gender, and race in music, arts, and style movements. Examples include but are not limited to hippies and hipsters, mods, pin-ups, lolitas, or French zazous, rastafarians, pachucos, and hip-hop. The course will explore these forms of identity through theories of resistance, stigma, deviance, fandom and participatory culture among others. The course is of interest to students who want to further their understanding of the relationship between culture, identity, and power.

Sociology 1160 Section: LEC

Gender, Race, and Social Institutions (217831)
This class offers an introduction to the relationship between race, gender and social institutions. We will interrogate how gendered and racial classifications contribute to the making of law and other core social institutions at the same time that these very institutions reflect and create distinctions on the basis of gender and race. The first part of the course will provide students with a set of sociological tools and approaches by which to critically analyze and breakdown the interrelations between race, gender and law in American society and globally. In the second part of the course, we will examine how core concepts and approaches concerning the interrelations between race, gender and social institutions come to play in the context of immigration and asylum policy, both historically and currently. We will discuss contemporary immigration and human rights issues—such as asylum, "illegal" immigration, reproductive labor, and sex trafficking—with the goal of interrogating how our cultural framings of these issues are shaped by gender, race, and the social and political aspects of law.

Crime and Order in the American City (212927)

Robert Sampson

2020 Fall (4 Credits) Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 20

Ideas about crime and social order have generated debates about cities for over a century. After briefly discussing classic theories, we will evaluate contemporary arguments on topics such as racial segregation and neighborhood inequality, immigration, interactions in public space, policing, the great crime decline, and mass incarceration. We will also reflect on how the pandemic of 2020 and protests over criminal justice have changed cities. Students will conduct neighborhood observations both virtually and in person.

Sociology 1180

Law, Science, and Society in America (108974)

Sheila Jasanoff

2021 Spring (4 Credits) Schedule: T 0430 PM - 0715 PM

Instructor Permissions: Instructor Enrollment Cap: 25

This course explores the tensions, contradictions, and mutual appropriations that characterize the relationship between law, science, and technology in America. It examines how ideas of evidence, expertise, and public reason have changed over the past half-century in response to such phenomena as the rise of the risk society, environmentalism, patient advocacy, and the information revolution. Law is broadly construed to include the activities of legislatures, regulatory agencies, and courts. The course seeks to contextualize the interactions of law, science, and technology in relation to wider transformations in US culture and society.

Course Notes: Offered jointly with the Kennedy School as IGA-516.

Class Notes: Also offered through HKS as IGA516

Refugees in Global Perspective (203272)

Danilo Mandic

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

The recent arrival of refugees at the U.S.’s southern border and into Europe has caught citizens and policy-makers off guard. Yet such forced migration will continue to rock our globalized world in coming decades. Why are there so many refugees? How are they displaced? Where do they travel, and why? This course will inquire into the nature, causes and consequences of contemporary refugee waves. Students will survey regional dynamics in the Middle East, Africa, Southeast Asia, Eastern Europe and North America. We will examine the particularities of refugees (compared to other migrants) and the changing nature of forced migration since the Second World War. Students will explore historical precedents to contemporary waves, learn about different host society approaches to asylum, compare government and criminal mechanisms of forced migration, and examine the reasons refugees are the object of increasing suspicion and hostility around the world. Particular attention will be paid to Central American migration into the U.S., the recent EU crisis, the role of refugee camps in the 21st century, and alternative strategies for global asylum management by bridge and destination countries.

Sociology 1193  Section: SEM

What's Wrong with Mass Incarceration (217829)

*Adaner Usmani*

2021 Spring (4 Credits)  
**Schedule:**  
R 0500 PM - 0700 PM

**Instructor Permissions:**  
**Enrollment Cap:** 11

Most academics who think and write about Mass Incarceration do so because we believe it to be wrong. But what exactly is wrong with it? This course canvases the range of answers that social scientists, lawyers, philosophers, and activists have given to that question. It is motivated by our view (to be developed in a forthcoming book) that the most common answers make both logical and empirical errors, and that better answers will require more clarity about facts and more explicit normative reasoning. Our view is still developing, and students will be strongly encouraged to argue against us. The ambition of this course is to help us and to help students—whether aspiring social scientists or budding lawyers—to think more carefully about the relationship between facts and values in discussions of race, class, crime, and punishment.

**Course Notes:** This course is capped at 22, with 11 slots reserved for FAS advanced undergrads, preferably those with some background in both philosophy and social science.

This course will be co-taught with Christopher Lews, Assistant Professor of Law at HLS, and will include 11 students from HLS.

Sociology 2175

Sociology of Immigration (207599)

*Mary Waters*

2020 Fall (4 Credits)  
**Schedule:**  
T 1245 PM - 0245 PM

**Instructor Permissions:**  
**Enrollment Cap:** n/a

This course examines theories and empirical research on international migration. We concentrate on recent research in sociology, but we also include readings from across the social sciences. We examine immigration policy, and the integration of immigrants and later generations, paying particular attention to legal status and race and ethnicity. Limited to graduate students in sociology and related social sciences.
Sociology 2202
Intermediate Quantitative Research Methods (119985)

Peter Marsden
2020 Fall (4 Credits)  Schedule:  TR 0900 AM - 1100 AM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Descriptive and inferential techniques used in quantitative sociological research. Emphasis is on the fundamentals of the linear regression model for continuous response variables, focusing on assumptions and interpretation. Motivation, application, and presentation are stressed; topics include categorical covariates, interactions, and diagnostics. Because the linear regression model is the foundation for more specialized models that are often applied in sociological research, the aim of this course is to develop the skills necessary to (a) understand quantitative sociological research, (b) produce convincing analysis, (c) evaluate quantitative analysis, and (d) learn more specialized techniques as needed.

Course Notes:  Required of, and limited to, first-year graduate students in Sociology
Recommended Prep:  Familiarity with basic statistics.

Sociology 2203
Advanced Quantitative Research Methods (112874)

Christopher Winship
2020 Fall (4 Credits)  Schedule:  TR 0945 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Matrix approach to regression analysis with an emphasis on the assumptions behind OLS. Instrumental variables, generalized least squares, probit and logit models, survival analysis, hierarchical linear models, and systems of equations are studied.

Course Notes:  Required of, and ordinarily limited to, second-year graduate students in Sociology. Previously offered as 203a and 203.
Class Notes:  Limited to Sociology, SP, and OB grad students.

Recommended Prep:  Sociology 2202 (formerly 202) or basic course in regression analysis.
Sociology 2204
Classical Social Theory (117877)
Adaner Usmani
2020 Fall (4 Credits) Schedule: W 0900 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

Introduction to the formative ideas and socio-intellectual contexts of 19th and early 20th century sociological theory. Course will explore social thought from the perspective provided by the problem of social order - and the roles different thinkers attributed to such factors as solidarity, power, and meaning as solutions to this problem. Consideration of the continuing significance of these ideas for contemporary social thought.

Course Notes: Required of and limited to first-year graduate students in Sociology, OB, and Sociology/Social Policy students.

Sociology 2205
Sociological Research Design (125089)
David Pedulla
2021 Spring (4 Credits) Schedule: R 0945 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

This course covers the fundamentals of sociological research design. Emphasis is placed on principles that are applicable in all kinds of sociological research, including surveys, participant observation, comparative historical study, interviews, and quantitative analysis of existing data. The course also delves into current methodological controversies in several arenas.

Course Notes: Required of, and ordinarily limited to, first-year graduate students in Sociology.

Sociology 2224 Section: SEM
Organizational Analysis: Seminar (123130)
Rakesh Khurana
2021 Spring (4 Credits)
Instructor Permissions: Instructor
Enrollment Cap: 15
Schedule: F 0900 AM - 1200 PM
This course covers classical works in organization theory and surveys the main paradigms that are now active in the field. In addition, we read works from business historians, economists, comparativists, and critical theorists that have shaped sociological thinking about organizations.

Sociology 2234
Ethnographic Fieldwork (213557)
Roberto Gonzales  
2021 Spring (4 Credits)  
Schedule: R 1200 PM - 0200 PM  
Instructor Permissions: None  
Enrollment Cap: n/a

This seminar explores the practice, politics, and poetics of ethnographic fieldwork—the method of immersing oneself into people's daily routines and systematically recording social processes as they unfold in real time. Along with engaging several classic and contemporary texts, seminar members will collect, analyze, and wrestle with ethnographic data. In service to the seminar's broad goals, members will engage in various stages of the ethnographic process: gaining access to a research site or population, taking field notes, conducting and transcribing interviews, and engaging in preliminary analyses of their data. We will also discuss the challenges of entering, being in, and leaving the field. The seminar is therefore designed for students who are willing to engage in focused, hands-on training on ethnographic theory and practice. To best take advantage of what this seminar has to offer, members are urged to come in with a preliminary sketch of a research plan that they would be ready to either directly study in the field or explore through field exercises. This will be a working seminar with members sharing field notes and experiences from the field as well as offering advice and constructive criticism at various stages of the process. This course structure requires a high level of responsibility, respect, and risk-taking among all members.

Course Notes: Jointly offered with EDU S527

Class Notes: Course held at HGSE

Sociology 2245

Causal Inference for the Social Sciences (216192)

Xiang Zhou

2021 Spring (4 Credits)  
Schedule: MW 1030 AM - 1145 AM  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

It is an adage that association does not imply causation, yet causality is at the center of most social science inquiries. This course introduces a set of concepts, assumptions, and methods that allow students to rigorously assess causal relationships from experimental and observational data. Drawing on applications from sociology, economics, and political science, we discuss a variety of research designs and statistical methods, including randomized experiments, regression adjustment, matching and weighting, instrumental variables, regression discontinuity designs, panel data models (including difference in differences), causal mediation analysis, and nonparametric/machine learning methods. The class will be a mixture of lectures, discussions, and computer work.

Recommended Prep: Two graduate-level courses in quantitative methods, such as Sociology 2202 and 2203 or their equivalents. Prior experience with R is encouraged but not required.
Sociology 2247

Nationalism and Citizenship in Comparative Perspective (212764)

Elke Winter

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 12

This course focuses on the structural and discursive conditions of membership in the nation. It examines how immigration and citizenship policies emphasize specific dimensions of national identity, and how they operate as means of nation-building under the conditions of neoliberalism and globalization. The course introduces students to key sociological issues, concepts, and theories on both nationalism and citizenship, two bodies of literature that cross-fertilize but do not fully overlap. Drawing primarily on recent debates and empirical cases from Europe and North America, the course also highlights how (im)migration and different forms of citizenship acquisition (e.g. birthright versus naturalization) interact with some of the "new nationalisms" (e.g. Brexit, the rise of Trump, new nationalist/identity movements in Europe).

Overall, this course has two principal goals: First, it offers an overview of the interdisciplinary debates that have shaped the field(s) in recent years. Second, it invites students to ask new questions and provides them with the sociological tools to address them.

Course Notes: Designed as a graduate seminar, relying heavily on student presentations, case studies and class discussions; ideally, enrollment restricted to graduate students from sociology and related disciplines (social sciences and arts), however advanced undergraduate students and/or interested graduate students from other disciplines may be accepted upon request.

Sociology 2276

Seminar on Networks and Decision-Making (216780)

Mario Small

2021 Spring (4 Credits)  
Schedule: T 1000 AM - 1200 PM
Recent years have seen a growth in research on decision-making under uncertainty. Much of this research, originally in psychology and now also in economics, has been devoted to understand how actors make decisions in practice, which is often inconsistent with the standard assumptions that rational actor theory has relied on. Yet one of the most important ways people manage uncertainty in practice is by turning to their social networks, and little of the new research on decision-making under uncertainty has taken this fact into account. At the same time, the large body of work in sociology and other fields examining how networks affect people's actions has not generally adopted a behavioral or decision-making perspective. Prioritizing the social network over the individual as the unit of analysis, it has had far more to say about network structure than about how people make choices given their network contexts.

This course is devoted to examining and understanding the limits of what we know about how networks shape decision-making. We will examine research in sociology, organizations, economics, psychology, and anthropology concerned with the relationship between networks and decision-making. We will study experimental, survey-based, and qualitative work. We will cover theoretical, methodological, and substantive issues, with the topics likely involving financial decisions, poverty, inequality, health, and management. The workshop will be experimental in nature, and will involve scholarly papers, possible visitors, and sharing of one another's work and ideas. Students will be encouraged to think creatively, to experiment with ideas and methods, and to push their work beyond the comfort zones of traditional disciplinary thinking. Recent years have seen a growth in research on decision-making under uncertainty. Much of this research, originally in psychology and now also in economics, has been devoted to understand how actors make decisions in practice, which is often inconsistent with the standard assumptions that rational actor theory has relied on. Sociology 3305
Teaching Practicum (111781)

Mary Waters
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

This course is intended to enhance the teaching skills of graduate students in the Sociology Department. Through a combination of classroom discussions and teaching simulations, the seminar challenges students to discover and hone their teaching styles, to develop a personal philosophy about teaching and learning, to develop self-confidence leading and facilitating small and large group discussions, to learn about the teaching resources that are available to them throughout the university, to experiment with designing engaging courses of study, and to discover that teaching can be a rewarding and stimulating element of an academic career.

Course Notes: Required of and limited to graduate students in Sociology. Attendance at first meeting is required. Not repeatable for credit.

Class Notes: Time TBD

Sociology 3307
Proseminar on Inequality and Social Policy III (112355)

Christopher Winship
2021 Spring (4 Credits) Schedule: M 0130 PM - 0330 PM
Instructor Permissions: Instructor Enrollment Cap: 18

Students develop previously completed papers from Proseminar I and II into professional presentations and publishable articles, critique peer papers across disciplines, and discuss presentations of national experts.

Course Notes: Offered jointly with the Kennedy School as SUP-923.

Recommended Prep: Open to doctoral students in the Multidisciplinary Program in Inequality and Social Policy or the joint PhD Program in Social Policy. Prerequisites: Sociology 296a/Gov 2340a and Government 2340b/Soc
296b (or SUP-921 and SUP-922 at the Kennedy School).

Sociology 3308

Workshop on Economic Sociology (121013)

Frank Dobbin

2021 Spring (4 Credits)  Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

Presentations and discussions of new research by members of the community and visiting scholars. Students are exposed to the major paradigms in the field, and see how research articles are developed and refined.

Course Notes: This course meets weekly at either Harvard or MIT.

Additional Course Attributes:

historical social science, especially in the fields of Anthropology, Economics, History, Political Science, Psychology, and Sociology. The workshop's primary methodological goal is to initiate a discussion of what constitutes acceptable historical evidence in each of the social sciences. Its main substantive goal is to understand how the past influences the present.

Contemporary Ethnography and Inequality Workshop (216443)

Roberto Gonzales

2020 Fall (4 Credits)  Schedule:  R 1200 PM - 0200 PM

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

The Contemporary Ethnography and Inequality Workshop advances cutting-edge, socially significant, and novel ethnographic work addressing social, economic, and political inequality. The workshop circulates, appraises, and critically evaluates research presented by leading scholars as well as works-in-progress by graduate students rigorously pursuing ethnographic inquiry and methods. The workshop is open to students and faculty from across the University as well as faculty and students from nearby Boston and Cambridge universities. While regular attendance is the norm, visitors are welcome. In the Fall Semester, we will meet approximately once a month on Thursdays from noon to 1:30 pm.

Course Notes:  Workshop typically meets once per month.

Sanskrit  101A

Elementary Sanskrit (123045)

Nell Hawley

2020 Fall (4 Credits)  Schedule: MWF 1200 PM - 0115 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

Students learn fundamental skills in Classical Sanskrit, the language that was, for many hundreds of years, the most prestigious and broadly-deployed medium of intellectual and literary expression across South Asia. In the first year of study, students develop capabilities in analytical reading (and, secondarily, in writing, speaking, and listening) that will enable them to interpret Sanskrit texts on a foundational level. Participation in this course lays the groundwork for students to engage with Sanskrit texts in a wide array of styles and genres—poetry, narrative, philosophy, and beyond. Most lessons and assignments involve students collaborating with their peers. Please note that the "Related Section" for this course will be a weekly review session led by the course's Teaching Fellow.

Enrollment information: Enrollment will be by permission of the instructor. After reading through the syllabus, which is available on Canvas, students who intend to enroll in this course should email the
instructor (Nell Hawley, nshawley@fas.harvard.edu) introducing themselves and requesting permission to enroll. Those students should simultaneously petition for enrollment in this course through my.harvard. No auditors will be permitted. Enrolled students must take the course for a letter grade.

Sanskrit 102AR

Intermediate Sanskrit I (114270)

Nell Hawley

2020 Fall (4 Credits) Schedule: MWF 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

The intermediate-level Sanskrit course enables students to interpret Sanskrit texts in several major categories: epic, poetry, and commentary. Students expand and strengthen the skills in reading comprehension, grammatical analysis, and vocabulary retention that they developed during the first year of study. Students will be able to dissect and describe nominal compounds, verbal forms, poetic meters, and
morphological and syntactical features of Sanskrit words, sentences, and verses in greater detail. As a whole, the course prepares students to participate in Sanskrit language and reading courses at the advanced level.

Students achieve these objectives through focused study of three different texts. In the fall, students read a story from one of the two great Sanskrit epics, the Mahābhārata or the Rāmāyaṇa. In the first half of the spring term, students study a work of poetry (kāvya) that portrays the same story. In the second half of the spring term, students read select portions of a Sanskrit commentary on that kāvya composition.

In Fall 2020, students will read a story from the Mahābhārata that describes an extraordinary encounter between Arjuna (one of the epic's protagonists) and the god Śiva, who is disguised as a hunter. This leads students to the first sarga (chapter, canto) of Bāravi's celebrated sixth-century poem Kirātārjunīya ("Arjuna and the Hunter") in the Spring, and eventually to a commentary on the poem by the fifteenth-century scholar Mallinātha.

Please note that the "Related Section" for this course will be a weekly review session led by the Teaching Fellow.

Enrollment information: Enrollment will be by permission of the instructor. After reading through the syllabus, which is available on Canvas, students who intend to enroll in this course should email the instructor (Nell Hawley, nshawley@fas.harvard.edu) requesting permission to enroll. Those students should simultaneously petition for enrollment in this course through my.harvard. Students are required to have successfully completed an elementary-level Sanskrit course at the college level. No auditors will be permitted. Enrolled students must take the course for a letter grade.

Advanced Philosophical Sanskrit (117524)

Parimal Patil

2020 Fall (4 Credits) Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

An advanced Sanskrit reading course focusing on the development of skills in either classical belles lettres (kāvyā) or scholastic, commentarial prose (śāstra). In the former, emphasis is on the ability to re-arrange complex poetic forms into digestible prose word order. In the latter, students learn both the stylistic conventions of scholastic Sanskrit and the technical vocabulary of the relevant intellectual discipline.

Course Notes: Please note that this course is a prerequisite for Advanced Sanskrit in the Spring.

Hindi-Urdu 101A

Introductory Hindi-Urdu (113639)

Richard Delacy

2020 Fall (4 Credits)  Schedule: MTWR 0300 PM - 0415 PM

Instructor Permissions: None  Enrollment Cap: n/a

An Introduction to the modern standard form of the most widely spoken language in South Asia, Hindi-Urdu. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The course also draws from the modern medium of film, in particular recent Bollywood songs, to reinforce structures and vocabulary. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: Not open to auditors.

**Hindi-Urdu 104**

The Classical Urdu Ghazal and Its Symbolism: Seminar (145866)

Hajnalka Kovacs

2021 Spring (4 Credits)  
**Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: Instructor  
Enrollment Cap: n/a

A survey of the popular literary genre with a focus on the classical period. Includes close readings of selected poems of Vali Dakkani, Siraj Aurangabadi, Mir Taqi Mir, Mir Dard, Haidar Ali Atish, Mirza Ghalib, and others, along with discussions of the conventions, stylistics, and the religious and mystical symbolism of the ghazal. A high degree of reading and writing proficiency in Urdu is required. Assignments include weekly responses in Urdu and a final paper. Students who possess a similar degree of proficiency in Hindi but cannot read and write Urdu and wish to take the class should contact the instructor.

Recommended Prep: Hindi-Urdu 103 or equivalent.

**Hindi-Urdu 123**

Bollywood and Beyond: Commercial Cinema, Language and Culture in South Asia (123790)

*Richard Delacy*

2021 Spring (4 Credits)

**Schedule:** W 1200 PM - 0245 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This course examines concepts of personhood, community and culture in South Asia as expressed in contemporary film and literature. Works in Hindi-Urdu and in translation will be examined with emphasis on language as an index of cultural difference and of broad social shifts, notably the transformation of audiences from citizens to culture-consumers. Knowledge of Hindi-Urdu is not required. However, there will be a section for students with intermediate proficiency utilizing language materials.

**Course Notes:** Students who enroll in the language section of this course may count it towards a citation in Hindi-Urdu.

South Asian Studies 183

The Vernacular in South Asia: Language, Culture and Politics (213521)

Sravanthi Kolli

2020 Fall (4 Credits) Schedule: R 0945 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Language has long been a gateway to South Asia, a region famed for its linguistic diversity and multilingual populations. Language has also been of perennial interest for historians, literary scholars and philosophers. This introductory course will enable you to connect the region with these broader concerns by examining how and why language became significant for comprehending the modern world and how this changed the relationship of individuals, cultures and societies to language. The course makes South Asia the center of its enquiry and will focus on the region’s significance for contemporary analyses of language, such as language’s links to colonialism, the public sphere, political representation, modern
theology and subalternity. It is also designed to deepen your understanding of language and its uses in your life and writing. To that end, we will explore how texts in a variety of genres (literature, history, political tracts and non-academic writing) by diverse writers (academics, public intellectuals and political figures) have made claims about language and its relationship to the self and the world. You will use these readings to produce a mix of academic and non-academic writing through the semester, including a semester long translation project that will relate to your interests outside this course.

All texts will be made available in English or English translation. No prior knowledge of South Asia or South Asian languages required but you will be encouraged to draw on any existing proficiency in languages other than English.

Class Notes: For more information about the course, see https://sites.google.com/g.harvard.edu/thevernacularinsouthasia/home.

South Asian Studies 185

Writing Modern South Asia (214528)

Sravanthi Kollu

2021 Spring (4 Credits) Schedule: R 1200 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

What does South Asian literature mean? What does a literary text have to be about, whom does it have to be written by to count as South Asian literature? These questions determine how publishers and readers relate to South Asian writing; they also reveal the concerns with location, identity, tradition and literary canon that determine how we read modern world literature. Building on these two questions, this course offers a semester-long exploration of modern South Asian writing, both mainland and diasporic. The texts we will read span a period of roughly two centuries (1790-2016), four nations (India, Pakistan, Sri Lanka and Bangladesh), and global diasporic communities; yet they offer at best a limited sampling of the breadth and diversity of literary writing in/about South Asia. This course treats this breadth of material as a powerful challenge to us as readers. Hence, we will focus as much on our responses to, and expectations of, South Asian texts as we will on the texts themselves. A key aim of the course is to help you cultivate reading and writing skills that equip you to work with diversity and contradiction in literary texts, skills that can be applied more broadly to other texts and contexts. In keeping with this broader aim, the writing assignments through the semester will culminate at the end of the course in a longform essay you will write about an author or text from the course that spoke to you.

South Asian Studies 186
Subaltern South Asia: Gender, Caste and Literature (217875)
Sravanthi Kollu
2021 Spring (4 Credits) Schedule: T 0300 PM - 0545 PM
Instructor Permissions: None Enrollment Cap: n/a

This course will explore colonial and post-colonial South Asia via literary texts that foreground questions of gender, caste and social equality. We will read anti-caste and feminist autobiography, fiction, poetry and literary criticism alongside canonical literary texts to examine how South Asian writers have negotiated questions of literary writing, genre and tradition and produced work that represents, critiques and/or addresses the social condition of women, Dalits, adivasis and other subalterns. What ideas of the literary do these writers produce? What can we extrapolate from these texts for larger conversations about politics and aesthetics? How do subaltern perspectives challenge and transform the global understanding of South Asia? These are the questions this course will focus on.

In addition to engaging with literary translation, representation, identity and experience, this course will help you investigate the global circulation of literary and political ideas by focusing on a concept – subalternity – that emerged from South Asian studies of history and literature but has become a part of global literary and social theory. These intersecting but varied foci are designed to help you develop the skills to work with and write about culturally specific texts for a global audience.

**Subject: Nepali**

**Nepali 101A**

Introductory Nepali (118665)

*Richard Delacy*

2020 Fall (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** Department  
**Enrollment Cap:** n/a

This course introduces the basic grammatical structures of modern Nepali, enabling students to read and produce simple, standard prose as well as engage in basic conversation by the end of the first year. Nepali is taught with a concern for the cultural context in which this language is spoken and written.

**Course Notes:** Not open to auditors.
Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies’ website in shortly before the term begins: sas.fas.harvard.edu

Nepali 103A
Advanced Nepali (125730)
Richard Delacy
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Department Enrollment Cap: n/a
A reading course in Modern Nepali Literature, suitable for students who have at least three years of Nepali learning. This course is designed to help students understand some of the complex literary materials composed in modern Nepali language. The students will have an opportunity to read a wide variety of selected texts, understand the linguistic systems operative in those writings, and come up with their own informed understanding of them.

Course Notes: Not open to auditors.
Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies' website in shortly before the term begins: sas.fas.harvard.edu

*Jonathan Ripley*

2020 Fall (4 Credits)  
**Schedule:** MWF 0900 AM - 1015 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a  

An interactive introduction to Tamil, the oldest of the Dravidian languages of South India
with a literary tradition that spans millennia. It is designed for students with no previous background in Tamil and progressively introduces speaking, listening, reading and writing using textual and audio-visual materials. After taking the TAM 101 series, students will have a working knowledge of the fundamental grammatical structures necessary to navigate colloquial and literary modern Tamil and to begin reading older Tamil literature as well.

Course Notes: Not open to auditors.

Subject: Thai

Thai 101A

Introductory Thai I (107892)
Richard Delacy
2020 Fall (4 Credits)

Schedule: TBD
Instructor Permissions: Department
Enrollment Cap: n/a

This course introduces the basic grammatical structures of modern Thai, enabling students to read and produce simple, standard prose as well as engage in basic conversation by the end of the first year. Thai is taught with a concern for the cultural context in which this language is spoken and written.

Course Notes: Not open to auditors.

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies' website in shortly before the term begins: sas.fas.harvard.edu

Intermediate Thai I (124031)

Richard Delacy

2020 Fall (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** Department  
**Enrollment Cap:** n/a

A two-term continuation of the study of Thai at the intermediate level. Students build on acquired proficiency at the elementary level (or its equivalent) towards achieving more fluency in reading, speaking, writing, and listening comprehension of standard Thai, as well as in cultural-social skills. Introduces new vocabulary and grammar through communicative tasks and text readings, mainly using the situational-communicative methodology.

Course Notes: Not open to auditors.

Languages in the tutorial program are offered when there is
demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies’ website in shortly before the term begins: sas.fas.harvard.edu

Thai 103AR

Readings in Thai I (121497)

Richard Delacy
This course is designed to focus on reading and comprehension. Selected readings will be both for academic purposes and for pleasure. Students will read newspaper and magazine articles; short stories; and passages covering topics such as history, science, politics, medicine, technology and more. This reading course will help students become more proficient with nuanced/implied meanings, bolster vocabulary and acquire familiarity with various professional jargon.

Course Notes: Not open to auditors.

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies' website in shortly before the term begins: sas.fas.harvard.edu

Subject: Indo-Persian

Indo-Persian 101
Readings in Indo-Persian Literature I (207944)
Hajnalka Kovacs
2020 Fall (4 Credits)                  Schedule:  TR 0300 PM - 0415 PM
Instructor Permissions:  Instructor    Enrollment Cap:  n/a

The course introduces students to Persian literature composed in the Indian Subcontinent from the 11th through the 20th century. We will combine close reading of texts in the original Persian with a discussion of grammar and prosody as well as secondary readings in English. Texts include excerpts from chronicles, discourses and
letters of Sufis, hagiographies, biographical dictionaries, travelogues, collections of tales, as well as epic, lyric, and panegyric poetry.

Recommended Prep: Two years of Persian or equivalent; one year experience with Classical Persian preferred.

Elements of Data Science (213330)

Liberty Vittert
Hanspeter Pfister

2021 Spring (4 Credits)  Schedule:  TR 0130 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  60

Data science combines data, statistical analysis, and computation to gain insights and make useful inferences and predictions. This course will take a holistic approach to helping students understand the key factors involved, from data collection and exploratory data analysis to modeling, evaluation, and communication of results. Working on case studies and a final project in teams will provide students with hands-on experience with the data science process using state-of-the-art tools. Emphasis will be given to the strengths, trade-offs, and limitations of each method to highlight the importance of merging analytical skills with critical quantitative thinking.

Class Notes:  Also offered as COMPSCI 10. Students may not take both for credit. Please note that the enrollment cap is a combined total for both STAT 10 and COMPSCI 10.

Requirements:  Anti-requisite: Cannot be taken for credit if AC 209A or CS 109A or CS 10 or STAT 121A is already complete.

Statistics 104

Introduction to Quantitative Methods for Economics (114027)

Katy McKeough

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

A rigorous introduction to statistics for students intending to study economics. Examples drawn from finance, decision analysis and economic decision-making. In addition to descriptive statistics, probability, inference and regression modeling, also covers portfolio optimization, decision analysis, and time series analysis. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques.

Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104.

Requirements: Anti-Req: may not be taken for credit if STAT 109 or STAT 139 already complete.

Statistics 104

Introduction to Quantitative Methods for Economics (114027)

Katy McKeough

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a
In a world where data is growing larger and more complex, it can be a challenge to turn an abundance of information into the knowledge from which sound decisions can be made. As a discipline, statistics aims to bridge the gap between knowledge and information. This course will motivate statistical methods through data analysis and visualization, in addition to discussing the underlying theory. We will discuss topics such as study design, descriptive statistics, probability, sampling distributions, hypothesis testing, linear regression, and Bayesian inference. A wide variety of applications from the economic and social sciences will be highlighted along with examples from biology, sports, politics, and more. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques. This course makes use of the statistical programming language R, but no prior knowledge of computer science is required.

Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104.

Requirements: Anti-Req: may not be taken for credit if STAT 109 or STAT 139 already complete.

Introduction to Statistical Inference (111036)

Joseph Blitzstein
Neil Shephard

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

The course is designed for undergraduates as their first introduction to rigorous statistical inference. Understanding the foundations will allow you to see more deeply into individual methods and applications, placing them in context and able to learn new ones (and invent new ones!) much faster having understood broad principles of inference.

Recommended Prep: Mathematics 19a and 19b or equivalent and Statistics 110.

Introduction to Computational Biology and Bioinformatics (122304)

Xiaole (Shirley) Liu

2021 Spring (4 Credits) Schedule: TR 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a

The course will cover basic technology platforms, data analysis problems and algorithms in computational biology. Topics include sequence alignment and search, high throughput experiments for gene expression, transcription factor binding and epigenetic profiling, motif finding, RNA/protein structure prediction, proteomics and genome-wide association studies. Computational algorithms covered include hidden Markov model, Gibbs sampler, clustering and classification methods.

Recommended Prep: Good quantitative skills, strong interest in biology, willingness and diligence to learn programming.

Statistics 117
Data Analysis in Modern Biostatistics (203104)

Giovanni Parmigiani

2021 Spring (4 Credits)

Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

An Introduction to applied biostatistics via case studies. The course is based on four practical problems, and methodology relevant for each. Students will apply the concepts from the methodology to the data analysis or modeling task, and carry out four mini projects, with ample opportunities for peer-to-peer discussion.

Course Notes: There is a cap of 30 students for this course. Preference is given to Statistics concentrators; all other students wishing to take the course must send a request along with a list of statistics/computer science courses already completed to the professor at gp@jimmy.harvard.edu. Please put Stat 117 in the subject line of the email.

Recommended Prep: Prerequisites: Stat 110 and (AP Stat or 102 or 104) and 111 and 139. Recommended: 115

Statistics 120
Introduction to Bayesian Inference and Applications (156425)

S. C. Samuel Kou

2020 Fall (4 Credits)

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

Provides students a comprehensive understanding to the questions as of what is, how and why Bayesian. Introduction to classic Bayesian models, basic computational algorithms/methods for Bayesian inference, as well as their applications in various domain fields, and comparisons with classic Frequentist methods. As Bayesian inference finds its roots and merits particularly in application, this course puts great emphasis on enhancing students’ hands-on skills in statistical computation (mostly with R) and data analysis.

Recommended Prep: STAT110, STAT111 and basics of R programming are required.

Data Science 1: Introduction to Data Science (203101)

Kevin A. Rader
Pavlos Protopapas
Christopher Tanner

2020 Fall (4 Credits)  Schedule:  MWF 0300 PM - 0415 PM
Instructor Permissions:  Instructor  Enrollment Cap:  30

Data Science 1 is the first half of a one-year introduction to data science. The course will focus on the analysis of messy, real life data to perform predictions using statistical and machine learning methods. Material covered will integrate the five key facets of an investigation using data: (1) data collection - data wrangling, cleaning, and sampling to get a suitable data set; (2) data management - accessing data quickly and reliably; (3) exploratory data analysis – generating hypotheses and building intuition; (4) prediction or statistical learning; and (5) communication – summarizing results through visualization, stories, and interpretable summaries. Part one of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: Only one of CS 109a, AC 209a, or Stat 121a can be taken for credit. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109a, AC 209a, or Stat 121a for credit.

Recommended Prep: Programming knowledge at the level of CS 50 or above, and statistics knowledge at the level of Stat 100 or above (Stat 110 recommended).

Requirements: Not to be taken in addition to Computer Science 109 or Computer Science 109A, or Applied Computation 209, or Applied Computation 209A.

Data Science 2: Advanced Topics in Data Science (203102)

Pavlos Protopapas
Mark Glickman
Christopher Tanner

2021 Spring (4 Credits) Schedule: MWF 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

Data Science 2 is the second half of a one-year introduction to data science. Building upon the material in Data Science 1, the course introduces advanced methods for data wrangling, data visualization, and statistical modeling and prediction. Topics include big data and database management, interactive visualizations, nonlinear statistical models, and deep learning. Part two of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: Can only be taken after successful completion of CS 109a, AC 209a, Stat 121a, or equivalent. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109b, AC 209b, or Stat 121b for credit.

Recommended Prep: CS 109a, AC 209a, or Stat 121a required.

Requirements: Requisite: (Must take CS 109A OR APCOMP 209A OR STAT 121A)

Quantitative Finance (126048)

Stephen Blyth

2020 Fall (4 Credits)  Schedule:  MW 1200 PM - 0115 PM

Instructor Permissions: None  Enrollment Cap: n/a

Introduction to financial derivatives and the probabilistic techniques used to analyze them. Topics include: forwards, swaps and options; replication, no-arbitrage and risk-neutrality; martingales, numeraires and the fundamental theorem of asset pricing; and an introduction to interest-rate derivatives and their valuation. Provides a rigorous but accessible treatment of the elegant theory underpinning quantitative finance, motivated by real problems from the financial industry.

Course Notes: Designed for those seeking an understanding of the quantitative challenges on Wall Street and the probabilistic tool-kit developed to address them.

Recommended Prep: Statistics 110 or equivalent.

Linear Models (110751)

Kevin A. Rader

2020 Fall (4 Credits)  
Schedule: MWF 0130 PM - 0245 PM

Instructor Permissions: None  
Enrollment Cap: n/a

An in-depth introduction to statistical methods with linear models and related methods. Topics include group comparisons (t-based methods, non-parametric methods, bootstrapping, analysis of variance), linear regression models and their extensions (ordinary least squares, ridge, LASSO, weighted least squares, multi-level models), model checking and refinement, model selection, cross-validation. The probabilistic basis of all methods will be emphasized.

Class Notes: This Course has a Friday Lab.

Recommended Prep: Statistics 110 and Math 21a and 21b or equivalent

Spatial Statistics (217516)

Alex Young

2021 Spring (4 Credits)  
Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor  
Enrollment Cap: n/a
Spatial data – which is prevalent in climatology, meteorology, geology, oceanography, ecology and many other fields – requires specialized statistical tools for analysis due to the inherent dependence which exists between samples taken at nearby locations (or times). In this introductory course in spatial statistics, we’ll cover central topics including spatial point processes, lattice models, and geostatistics. Theory (mathematical models and background) will be presented in concert with inference and prediction (statistics and estimation) with an emphasis on numerical examples to provide intuition and identify commonly used tools for EDA including visualization and important summary statistics. Students should take this course if they are interested in learning more about tools to handle the complex datasets where each datum depends in some part upon all others.

**Recommended Prep:** Required courses: Stat 110; Math 21A/B; Stat 111 (may be taken concurrently)

**Recommended courses:** Stat 139

**Additional Course Attributes:**

Sports Analytics (217523)

*Laurie Shaw*

2021 Spring (4 Credits) **Schedule:** WF 0300 PM - 0415 PM

**Instructor Permissions:** None **Enrollment Cap:** n/a

The amount of data collected during games and tournaments has increased enormously over the last few decades, as has demand for new techniques for analysing this data. This course will cover a wide variety of quantitative topics in sports analytics, including: player evaluation; measuring team strength and predicting outcomes; situational analysis; working with tracking data; and special topics. It will be hands-on, including live data analysis in class and an emphasis on project work (group and individual).

**Recommended Prep:** Prerequisites include STAT110, STAT111 and STAT139. Experience using python or R is strongly recommended.

**Additional Course Attributes:**

**Statistics 149**

Generalized Linear Models (118974)
Sequel to Statistics 139, emphasizing common methods for analyzing continuous non-normal and categorical data. Topics include logistic regression, log-linear models, multinomial logit models, proportional odds models for ordinal data, Gamma and inverse-Gaussian models, over-dispersion, analysis of deviance, model selection and criticism, model diagnostics, and an introduction to non-parametric regression methods.

Course Notes: Examples will be drawn from several fields, particularly from biology and social sciences.

Recommended Prep: Statistics 139 or with permission of instructor.

---

Statistics 151
Multilevel and Longitudinal Models (160736)

Luke Miratrix

Data often have structure that needs to be modeled explicitly. For example, when investigating students’ outcomes we need to account for the fact that students are nested inside classes that are in turn nested inside schools. If we are watching students develop over time, we need to account for the dependence of measurements across time. If we do not, our inferences will tend to be overly optimistic and wrong. The course provides an overall framework, the multilevel and generalized multilevel (hierarchical) model, for thinking about and analyzing these forms of data. We will focus on specific versions of these tools for the most common forms of longitudinal and clustered data. This course will focus on applied work, using real data sets and the statistical software R. R will be specifically taught and supported. While the primary focus will be on the linear model with continuous outcomes (i.e., the classic regression framework) we will also discuss binary, categorical, and ordinal outcomes. We will emphasize how to think about the applicability of these methods, how they might fail, and what one might do to protect oneself in such circumstances. Applications of hierarchical (multi-level) models will include the canonical specific cases of random-slope, random-intercept, mixed effect, crossed effect, marginal, and growth-curve models.

Recommended Prep: Permission of instructor required. Prerequisite: S-052, Stat 139, or an equivalent. Jointly-offered in the Graduate School of Education.
Statistics 171

Introduction to Stochastic Processes (113721)

Subhabrata Sen

2021 Spring (4 Credits)  

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None  

Enrollment Cap: n/a

An introductory course in stochastic processes. Topics include Markov chains, branching processes, Poisson processes, birth and death processes, Brownian motion, martingales, introduction to stochastic integrals, and their applications.

Recommended Prep: Statistics 110 and Mathematics 21a and 21b, or equivalent

Statistics 186

Introduction to Causal Inference (110022)

Susan Murphy
Causal inference concerns the very difficult, challenging problem of addressing questions such as, "Would vaccinating children 16 and younger against COVID 19 lead to fewer deaths among public school teachers?" and "Would providing Harvard students access to a mobile health application designed to help them manage school stress, lead to improved school performance?" This class will include 4 modules. The first module introduces the nuanced world of causal inference along with a fundamental tool: the language of potential outcomes. The second module covers randomized experiments and how data from randomized experiments can be used to make causal statements. The third module introduces the rather tricky problem of using observational (non-randomized) data to attempt to make causal statements. The final module introduces a new and challenging area in which the goal is to make causal inference about the effect of sequences of treatments.

Class Notes: SHOPPING HOURS:

1/15 8-9am (EST) https://harvard.zoom.us/j/97899599356
1/19 5-5:30pm (EST) https://harvard.zoom.us/j/92094871598

Probability and statistical inference is needed extensively, and statistical linear models are needed occasionally.

Requirements: Prerequisite: STAT 110 AND STAT 111 AND STAT 139 or Gov 2000 AND Gov 2001

Statistics 195

Statistical Machine Learning (207703)

Lucas Janson

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

This course is designed to follow CS 181 and will dive deeper into the statistical properties of various machine learning methods. The goal of the course is to introduce and prepare students for theoretical and methodological research in statistical machine learning. Methods include linear methods for regression and classification, splines, kernel smoothing, additive models, trees, boosting, bagging, and random forests. Statistical principles covered include no-free-lunch theorems, generalization error, degrees of freedom, shrinkage, smoothing, and model selection. The latter part of the course will be devoted to introducing some emerging statistical topics at the cutting edge of statistical machine learning such as using machine learning for statistical inference, conformal inference, using machine learning for causal inference, implicit
regularization, algorithmic fairness, differentially-private machine learning, and transfer learning. **different this year** In addition to problem sets but instead of exams or a course project, students will work in groups to synthesize and give short presentations on recent applied and theoretical machine learning papers.

Course Notes: Textbook Information: Elements of Statistical Learning by Hastie, Tibshirani, and Friedman is a required text and is available for free at https://web.stanford.edu/~hastie/ElemStatLearn/printings/ESLII_print12.pdf

Recommended Prep: Statistics 111 and Computer Science 181, or equivalents

Statistical Inference 2 (159802)

Pragya Sur

2021 Spring (4 Credits) Schedule: R 0900 AM - 1015 AM T 0430 PM - 0545 PM

Instructor Permissions: None Enrollment Cap: n/a
Stat 213 will build upon Stat 211, providing tools to study and validate statistical methods. A primary focus will be large-sample theory, specifically, inference for M- and Z- estimators under well-specified and mis-specified models, quadratic mean differentiability and its implications, local asymptotic analysis, contiguity, LeCam's lemmas, asymptotic analysis of tests including optimality, asymptotic normality of U-statistics, Bayesian large sample theory: consistency, Bernstein-von-Mises theorem; time and interest permitting, one or more of the following: minimax lower bounds, special topics in high-dimensional inference, MCMC, basics of empirical process theory.

Recommended Prep: Stat 210, 211, 212 (Stat 210b)

**Statistics 215**

Introduction to Computational Biology and Bioinformatics (126060)

*Xiaole (Shirley) Liu*

2021 Spring (4 Credits)  

**Schedule:** TR 1200 PM - 0115 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Meets with Statistics 115, but graduate students are required to do more coding, complete a research project and submit a written report during reading period in addition to completing all work assigned for Statistics 115.

**Recommended Prep:** Good quantitative skills, strong interest in biology, good programming skills in C/C++, Java, Perl or Python.

**Additional Course Attributes:**

**Statistics 220**

Bayesian Data Analysis (118016)

*Jun Liu*

2021 Spring (4 Credits)  

**Schedule:** MW 0900 AM - 1015 AM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a
Basic Bayesian models, followed by more complicated hierarchical and mixture models with nonstandard solutions. Includes methods for monitoring adequacy of models and examining sensitivity of models.

**Course Notes:** Emphasis throughout term on drawing inferences via computer simulation rather than mathematical analysis.

**Recommended Prep:** Statistics 110 and 111.

---

### Statistics 221

Monte Carlo Methods & other computational tools for statistical learning (115077)

*Jun Liu*

2020 Fall (4 Credits)

**Schedule:** TR 1030 AM - 1145 AM

**Instructor Permissions:** None

**Enrollment Cap:** n/a

Computational methods commonly used in statistics: random number generation, optimization methods, numerical integration, Monte Carlo methods including Metropolis-Hastings and Gibbs samplers, approximate inference techniques including Expectation-Maximization algorithms, Laplace approximation and variational methods, data augmentation strategies, data augmentation strategies.

**Course Notes:** Computer programming exercises will apply the methods discussed in class.

**Recommended Prep:** Linear algebra, Statistics 111, and knowledge of a computer programming language (R or Matlab) required; Statistics 220 recommended.

---

### Statistics 230

Multivariate Statistical Analysis (119940)

*S. C. Samuel Kou*

2020 Fall (4 Credits)

**Schedule:** MW 0130 PM - 0245 PM

---

Statistics 234
Sequential Decision Making (205213)

Susan Murphy

2021 Spring (4 Credits)  Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor  Enrollment Cap: 25

This graduate course will focus on reinforcement learning algorithms and sequential decision making methods with special attention to how these methods can be used in mobile health. Reinforcement learning is the area of machine learning which is concerned with sequential decision making. We will focus on the areas of sequential decision making that concern both how to select optimal actions as well as how to evaluate the impact of these actions. The choice of action is operationalized via a policy. A policy is a (stochastic) deterministic mapping from the available data at each time t into (a probability space over) the set of actions. We will consider both off-line and on-line methods for learning good policies.

Mobile health is an area that lies within multiple scientific disciplines including: statistical science, computer science, behavioral science and cognitive neuroscience. This makes for very exciting interdisciplinary science! Smartphones and wearable devices have remarkable sensing capabilities allowing us to understand the context in which a person is at a given moment. These devices also have the ability to deliver treatment actions tailored to the specific needs of users in a given location at a given time. Figuring out when and in which context, which treatment actions to deliver can assist people in achieving their longer term health goals. In the last 15-20 minutes of many of the classes we will brainstorm about how the methods we discussed during that class might be useful in mobile health.

This course will cover the following topics: Markov Decision Processes, on-policy and off-policy RL, least squares methods in RL and Bayesian RL, namely posterior sampling. Most of the course will focus on Bayesian RL via posterior sampling. This is particularly useful in mobile health as posterior sampling facilitates off-policy and continual learning. Also the Bayesian paradigm facilitates use of prior data in initializing an RL algorithm. Other topics from statistics, machine learning and RL that I think are potentially important in mobile health but that we won't cover are (you could consider in your class project) include: 1) transfer learning (using data on other similar users to enable faster learning); 2) non-stationarity (dealing with slowly changing or abrupt changes in user behavior); 3) interpretability of policies (enabling communication with behavioral scientists by making connections to behavioral theories); 4) using approximate system dynamic models to speed up learning, 5) hierarchical RL, 6) experience replay and 7) multi-task learning.
Statistics 236

Modern Statistical Learning (211175)

Zheng Ke

2020 Fall (4 Credits) Schedule: WF 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

High dimensional data analysis is a recent interdisciplinary research area of Statistics, Genetics and Genomics, Engineering, and several other scientific areas. It addresses an array of challenging problems that of contemporary interest, and research in this area has been very active in the past decade.

This course aims to provide a systematic introduction to various topics in high dimensional data analysis, focusing on large-scale sparse learning, and network and text data analysis. Large-scale sparse learning: Sparsity is a universal phenomenon in modern high dimensional data. Sparse structures are observed in many application settings and have many different forms, such as parameter sparsity, graph sparsity, eigenvalue sparsity, and so on. Exploring sparsity has become a common strategy in data analysis and has largely reshaped classical multivariate statistics problems. This course will investigate classical problems such as multiple testing, linear regression, classification and clustering, under the modern sparse settings. For each problem, the course discusses recent statistical methods for taking advantage of sparsity, and introduces the theoretical framework for analyzing these methods.

Network and text data analysis: Social networks and text documents are unconventional data types. This course introduces statistical models and methods for analyzing such type of data. Topics for network data analysis include community detection, mixed membership estimation, link prediction, and dynamic network modeling. Topics for text data analysis include topic modeling, word embedding, information retrieval, and sentiment analysis.

Recommended Prep: This course is mainly designed for graduate students in Statistics. The prerequisites are Statistical Inference 1&2 (students can take the prerequisites simultaneously with this course). Graduate students from other departments (CS, Biostatistics, Economics, etc.) can also take this course, if they have taken statistics-related courses which have a significant amount of content in mathematical statistics. Undergraduate students please consult the instructor before enrolling.
Statistics 244
Linear and Generalized Linear Models (127856)
Mark Glickman
2020 Fall (4 Credits)    Schedule:    MW 0900 AM - 1015 AM
Instructor Permissions:    None    Enrollment Cap:    n/a
The theory and application of linear and generalized linear models, including linear models for normal responses, logistic models for binary and multinomial data, log-linear models for count data, overdispersion and quasi-likelihood methods, random effects models, model selection, and computational issues.
Recommended Prep:    Strong statistics background required (at the second-year graduate level), Statistics 210 may be taken concurrently, Statistics 211 desirable.

Statistics 248
Couplings and Monte Carlo (217522)
Pierre Jacob
2021 Spring (4 Credits)    Schedule:    MW 0900 AM - 1015 AM
Instructor Permissions:    None    Enrollment Cap:    n/a
The course is about the method of coupling in probability and its use in Monte Carlo methods. These methods are algorithms that generate samples distributed according to probability distributions of interest, and have found countless applications in physics, chemistry, statistics, machine learning to name a few fields. The course includes an introduction to Monte Carlo methods, followed by an in-depth coverage of the coupling method for both theoretical and practical purposes. On the theoretical side, the course covers the celebrated “coupling inequality” and its ramifications, and coupling interpretations of different notions of distances between probability distributions, with connections to optimal transport. On the methodological side, the course covers Markov chain methods and couplings to monitor their convergence, to enable parallel computation and for variance reduction. Examples of methods covered in the course include Coupling From The Past and recent debiasing techniques. The course is intended for students interested in learning about applied probability, numerical methods, and algorithms that are routinely used to compute probabilities, volumes and integrals across many scientific fields.
Recommended Prep:    Basic notions of mathematics, probability and algorithms. For example
Stat 210 or at least 110, and in any case a good motivation to learn more. Prospective students can reach out to instructor to discuss. Stat 221 is not required. Lecture notes can be found at this address: sites.google.com/site/pierrejacob/cmclectures. Prospective students are invited to have a look at the first two chapters available there, before registering for this course.

**Statistics 286**

Causal Inference with Applications (156925)

*Kosuke Imai*

2021 Spring (4 Credits)  
**Schedule:** TR 1030 AM - 1145 AM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Substantive questions in empirical scientific and policy research are often causal. Does voter outreach increase turnout? Are job training programs effective? Can a universal health insurance program improve people’s health? This class will introduce students to both statistical theory and applications of causal inference. As theoretical frameworks, we will discuss potential outcomes, causal graphs, randomization and model-based inference, sensitivity analysis, and partial identification. We will also cover various methodological tools including randomized experiments, regression discontinuity designs, matching, regression, instrumental variables, difference-in-differences, and dynamic causal models. The course will draw upon examples from political science, economics, education, public health, and other disciplines.

**Recommended Prep:** Stat 110, 111, and 139 or equivalent (probability, statistical theory, and linear models). Students who took Stat 186 in 2018 Fall and 2019 Fall should not enroll in this course.

Statistics 333

Individual Risk (216523)

Joseph Blitzstein
Cynthia Dwork

2020 Fall (4 Credits)

Risk assessment tools are increasingly deployed in high-stakes settings: What is the probability that the tumor will metastasize? What is the chance that this individual will commit a violent crime in the next two years? What is the probability that the student will graduate within 4 years? But what is the probability of a non-repeatable event? What is the mathematical meaning of "individual risk" and what should we require of a risk assessment algorithm? This reading course will explore different notions of risk, based on different notions of probability, and will connect this literature to notions of regret and indistinguishability from computer science.

Course Notes: Also offered as COMPSCI 333. Only one of COMPSCI 333 or STAT 333 can be taken for credit.

Recommended Prep: Familiarity with probability (e.g., Stat 110 and/or exposure through theoretical computer science). Exposure to theoretical computer science will be helpful but is not mandatory.

Unprecedented advances in digital technology have produced a revolution that is transforming science and society. Big data have been rapidly generated in many disciplines, such as genomics, health, physical and social sciences. The value of big data lies in effective analysis using statistical inference and machine learning methods that are computationally scalable and efficient. In this course, we will discuss several ongoing research areas on scalable statistical inference for big data, including several current research activities, challenges and open problems. Examples include dense and sparse signal detection, feature selection, boosting, high-dimensional prediction and testing, sparse and low-rank matrix estimation, general tensor methods, fast PCA, post PC inference and eigenvector theory, efficient concave and non-concave penalized likelihood maximization and inference, nonparametric function estimation, network analysis, convolutional neural networks, random projection, sketching, distributed computing, cloud computing, variational Bayesian methods, and estimating (possibly) low dimensional functionals in high dimensional models (e.g. average treatment effects in the presence of high dimensional covariates, signal to noise ratio, genetic relatedness). Applications of these methods in various areas will be discussed.

Design of Experimental and Non-experimental Studies (213597)

Jose Zubizarreta

2021 Spring (4 Credits)  Schedule: F 0900 AM - 1145 AM
Instructor Permissions: Instructor  Enrollment Cap: n/a

This is a seminar course on causal inference. We will discuss new and old papers on the design (and analysis) of experimental and non-experimental (observational) studies. Occasionally, leading scholars in the field will visit us and present their work. This course is geared towards methodological research in causal inference.

Recommended Prep: Stat 211 or equivalent

Building a Human Body: From Gene to Cell to Organism (212882)
Amie Holmes
Fei Chen
Richard Lee
Jessica Whited
Jason Buenrostro
Paola Arlotta
2021 Spring (4 Credits)  
Instructor Permissions: None  
Schedule: MW 1030 AM - 1145 AM  
Enrollment Cap: n/a
Through a series of lectures, application exercises and laboratory experiments, we will explore how the human body develops on a molecular level from gene to cell to organ. Ever wonder how you can make heart cells beat in a dish? Why can axolotls regenerate their limbs but humans cannot? How do neurites grow? Can we grow a brain in a cell culture dish? Come join us to discover the answers to these questions and more.
Recommended Prep: LS1a/LPSA is required; SCRB 10 is recommended

Stem Cell & Regenerative Biol 91R

Introduction to Research (125804)

Amie Holmes
Amy Wagers

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

Laboratory research in topics related to the Human Developmental and Regenerative Biology Concentration under the direction of, or approved by, members of the Department of Stem Cell and Regenerative Biology, Principal Faculty of the Harvard Stem Cell Institute, or others with permission. A paper must be submitted to the laboratory sponsor and to the HDRB Concentration Office for review by the Course Director and Head Tutors.

Course Notes: Students must have joined a laboratory by the course registration deadline (i.e., "study card day") to be able to enroll in SCRB 91.

Limited to Human Developmental and Regenerative Biology Concentrators; written permission of the laboratory sponsor must be submitted to the HDRB Concentration Office prior to enrolling in the course. This introductory research course is intended to prepare students for SCRB 99 and may ordinarily be repeated no more than once. Ordinarily may not be taken as a fifth course. Laboratory safety session required.

Course Notes:  Ordinarily may not be taken as a fifth course. Laboratory safety session required.

Recommended Prep:  Students intending to enroll in the fall are required to submit a written proposal to the Course Director. Students may enter the course at midyear only with the permission of the Course Director. The thesis proposal must be approved by the Course Director and Head Tutors prior to enrolling in SCRB 99.

Requirements:  Pre-requisite: SCRB 99A

Stem Cell & Regenerative Biol  111

Regeneration:  Phenomena to Mechanisms (212688)

Jessica Whited

2020 Fall (4 Credits)  
Schedule:  MW 0430 PM - 0545 PM
Instructor Permissions:  None  
Enrollment Cap:  n/a

How can some animals regenerate large pieces of their bodies following injury? This course will use both classical and current primary literature to explore the fascinating process of regeneration across phyla, covering both invertebrates and vertebrates. Through a combination of minimalist lectures, robust discussion, and student-led presentations, students will learn to distill questions into specific, key experiments; to design experiments with meaningful controls; and to use data to refine, reformulate, and develop new hypotheses.

Course Notes:  Students will be engaged in group work throughout the semester. They will develop new Wikipedia pages about specific topics related to regeneration. As a final project, they will write and produce short videos centered on student-selected topics, and the course will culminate with a class-wide viewing event.

Stem Cell & Regenerative Biol 140
Developmental and Molecular Basis of Growth and Regeneration (126744)
Fernando Camargo
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a
This course will focus on the biology of organ growth and regeneration from a developmental perspective. How is the size and symmetry of our organs set? How does a regenerating animal sense that something is missing and eventually stop the regenerative process when tissues reform? We will learn about conserved developmental pathways that are necessary for adult regeneration and discuss how the aberrant activation of these pathways can lead to overgrowth disorders such as cancer.
Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or permission of the instructor.

From Cells to Tissues, in Sickness and in Health (161207)
Ya-chieh Hsu
2021 Spring (4 Credits) Schedule: MW 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 18
Every cell is a part of a larger "community", working together to enable tissue function. This course will explore the principles of building complex tissues from cells. How do cells know what tissues to make and when to make them? How do cells communicate with one another? What diseases can arise when these principles go awry? How can we build tissues in the lab? In addition to lectures, students will engage deeply in primary literature.

Stem Cell & Regenerative Biol 155 Section: 01
Epigenetics and Gene Regulation of Human Development and Disease (215900)

Jason Buenrostro

2021 Spring (4 Credits) Schedule: MWF 0300 PM - 0415 PM
Instructor Permissions: None Enrollment Cap: n/a

Are we destined to be our parents? In this course we will study topics in epigenetics and gene regulation to challenge some of Mendel's ideas on genetic inheritance. To do this, we will learn about the biochemical processes that control the expression of genes as cells change across human development, aging and disease. Together with genetics, we'll use science to discuss whether "nature or nurture" defines who we are. Finally, the human genome is huge, employing diverse mechanisms of epigenetic regulation, we'll learn about data rich experimental tools and work together to use computational methods to study epigenetic processes within cells.

Recommended Prep: LS1a or LPSA, LS1b, and SCRB 10.

Stem Cell & Regenerative Biol 167 Section: 01
Stem Cell Therapeutics: Exploring the science and the patient experience (125200)

Leonard Zon
David Breault

2021 Spring (4 Credits) Schedule: W 0900 AM - 1130 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

Stem cells are the basis for tissue maintenance and repair, thus, are essential elements of normal organ and tissue physiology. Stem cells are also targets for disease processes and through transplantation are important therapeutic agents. This course will allow advanced undergraduates to explore how stem cells and tissue regeneration impact human disease pathogenesis and how stem cells might be exploited to advance new therapies for disease.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10.

Stem Cell & Regenerative Biol 175

Glucose: From Molecule to Society (128041)

Richard Lee

2020 Fall (4 Credits)  
Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None  
Enrollment Cap: n/a

We will explore the biochemistry, cell biology, and physiology that make glucose our main source of energy. How did humans depend on and crave this molecule? What consequences does it hold for normal metabolism and disease? Students will integrate evolution, endocrinology, biostatistics, bioengineering, and regenerative biology approaches in considering sugar and all its consequences. Finally, we will evaluate legal and business issues necessary to move scientific and technical innovations from the laboratory to the patient.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or permission of the instructor.

Stem Cell & Regenerative Biol 177 Section: 01

Inflammation & Immunity (217489)

Ruth Franklin

2021 Spring (4 Credits)  
Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None  
Enrollment Cap: n/a

What happens during an infection? This course will follow the progression of an immune response while exploring the following questions: What is inflammation? How can it both protect us and contribute to disease? Which physiologic processes are regulated by immune cells? In addition to participation in lectures, discussions, and analysis of primary literature, each student will create an original piece of science communication to engage with the general public.

Course Notes: Weekly section meeting time to be determined, will likely be on Thursday or Friday.

Recommended Prep: Prerequisite: Molecular biology

Stem Cell & Regenerative Biol 180 Section: 01
Development, Plasticity, and Regeneration in the Mammalian Brain (125803)

Jeffrey Macklis

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

Why do nerves in limbs regenerate after traumatic or combat injuries, but nerves in the spinal cord and brain do not? Why do diseases often have mutations in every cell in the body, and every neuron type in the brain, but only 1 or 2 neuron types out of thousands degenerate or fail? How does often remarkable recovery from brain surgery or injury occur in young children, but not so much in later life? How is the brain set up to sense the world, integrate incoming sensory information, and lead to movement and behavior, and how is that organized during development? Might we overcome lack of spinal cord regeneration? Might we reverse or repair neuron degeneration in ALS, e.g.? How might advanced brain-computer interface prosthetic devices add value? What's up with stem cell biology– including hope, hype, and reality?

We will highly interactively study regenerative biology of the mammalian central nervous system (CNS), motivated by a focused and related set of human CNS disorders: This course will discuss molecular and cellular mechanisms of regeneration and repair in the mammalian central nervous system (CNS), motivated by prototypical examples in the motor control systems and circuitry of the cerebral cortex and spinal cord centrally relevant to spinal cord injury, ALS / Lou Gehrig's disease ("amyotrophic lateral sclerosis", and related disorders), and spinal muscular atrophy (SMA). We will take an approach integrating developmental and regenerative biology: we will compare and contrast aspects of embryonic neural development (molecular and cellular) with adult neural plasticity; discuss limitations to neuronal and axonal regeneration in the mature mammalian CNS following degeneration or injury; examine CNS regeneration approaches directed at overcoming intrinsic limitations; explore developmental controls, gene manipulation, and cellular reprogramming to promote neurogenesis (birth of new neurons), axonal regeneration, and directed differentiation of progenitors and stem cells in diseased adult mammalian brain; and consider technology such as "brain-computer interfaces". This course has always functioned as an interactive seminar rather than a lecture course, and includes the trajectory of knowledge and thinking over the past century, plus the state-of-the-art in these fields, emphasising the need for a healthy measure of skepticism in some fields. Sections cover advanced experimental approaches, critical reading of the literature, and conceptual thinking.

Course Notes: Expected to be offered in alternating fall terms in even years.

Recommended Prep: Waived for Fall Term 2020. (standardly, Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; MCB 80 or equivalent "Introduction to Neuroscience" course, or permission of the instructor)

Stem Cell & Regenerative Biol 195
The Translational Science of Stem Cells (204006)

Lee Rubin

2020 Fall (4 Credits) Schedule: TR 1200 PM - 0115 PM
Instructor Permissions: Instructor Enrollment Cap: 16

Through a series of lectures, given by Professor Rubin and Dr. Nayara, as well as some outstanding international speakers, students will be introduced to a broad view of the ways in which stem cell biology can be used in translational research. Topics to be discussed include precision medicine-oriented human disease modeling, discovering drugs that target endogenous stem cells or otherwise promote tissue repair, reprogramming endogenous cells to adopt new identities as treatments for degenerative disorders, and regenerative medicine (cell-based therapies). The goal of the course is to provide a very up-to-date view of where stem cell-associated therapies stand now and, most of all, are heading in the future. The course relies on active participation and will include reading primary research articles. Students will also have the opportunity to act as hosts for outside lecturers. A key objective of the course is to help the students acquire the knowledge to design new ways of treating disease in the form of a term-long paper project.

Course Notes: Permission of the instructor required to enroll. Ability to work in a less structured environment will be essential.

Recommended Prep: Life Sciences 1a or Life and Physical Sciences A, Life Sciences 1b, and preferably SCRB 10.

Systems Biology 220
Analysis foundations for quantitative biologists (204480)

Allon Klein
Andrew Murray
Eleanor Rand
2020 Fall (4 Credits) Schedule: TR 0215 PM - 0330 PM
Instructor Permissions: Instructor Enrollment Cap: 15

The bedrock foundation of quantitative biology is controlling assumptions and errors in empirical measurement. This course focuses on developing "street-fighting" capabilities in quantitative analysis: statistical concepts that every biologist needs to ensure that they can interpret their data correctly. The course introduces estimators, the origin and consequences of key distributions in biology, error propagation, hypothesis testing, multiple hypothesis correction and the perils of p-hacking. Concepts are reinforced through problem sets, and team-based analysis of new experimental methods.

Recommended Prep: This course is required for all Systems, Synthetic, and Quantitative Biology students. Knowledge of programming, statistics, physics and chemistry.

Systems Biology 221QC
Analysis foundations for quantitative biologists (part 2) (214495)

Allon Klein
Sahand Hormoz
Ying Lu
Elizabeth Pomerantz
2021 Spring (2 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 40

( Part 2 of the SB220qc / SB221qcseries) New experimental techniques are changing the nature of data sets in biology. For example, high throughput methods routinely measure expression levels of thousands of genes in individual cells across tens of thousands of cells. Imaging methods record 3-dimensional movies of developmental processes, generating terabytes of data in a single run. How do we make sense of these data sets? This course will begin with "street-fighting" statistics: tools that every biologist needs to ensure that they can interpret their data correctly. We will then study the
fascinating world of high-dimensional spaces and build the intuition required for interpreting data that live in these spaces. We will cover linear and non-linear dimensionality reduction, statistical learning and inference in high-dimensional spaces, and relevant machine learning tools such as autoencoders. Finally, we ask how biological systems themselves solve high-dimensional inference problems, subject to severe measurement constraints in the form of thermal noise and limited energy resources. We will cover relevant ideas from statistical physics such as kinetic proof reading. To join the first five weeks of this course (on "street-fighting" statistics) enroll in SB220qc.

The course will cover writing different types of project proposals. Students will learn about project development and presentation in various areas of systems, molecular, and cellular biology. They will practice developing and writing their own project proposals, and giving and receiving peer feedback.

Course Notes: This course is required for all Systems, Synthetic, and Quantitative Biology PhD first year students.

Driven by challenges such as the COVID-19 pandemic, racial injustice, and climate change, many have come to fear the "new normal" that we are all facing. But must this new normal necessarily be a diminished or broken version of reality that simply happens to us? The StudioLab pursues the creation of a "better normal" using an interdisciplinary exploration of how transformative ideas from the liberal arts developed by Harvard students can be applied to today's societal challenges.

You will work to develop actionable solutions to pressing issues, using the starting framework of the UN Sustainable Development Goals. You will learn to identify and properly analyze a problem; work collaboratively to ideate and create an actionable approach; build an organizational strategy and business plan; network with expertise to pressure-test your ideas; and persuasively communicate your ideas to build the requisite human capital and funding relationships to launch a venture. The term will culminate in a Festival of Ideas, where individuals and teams will have opportunities to seek support to move their projects along. Through your efforts, you will reimagine a better normal for society and take meaningful action to make it a reality.

Theater, Dance, and Media
Subject: Theater, Dance & Media

Theater, Dance & Media     CAMR
Advanced Playwriting: Workshop (203500)

Sam Marks
2021 Spring (4 Credits)   Schedule:   T 1200 PM - 0245 PM
Instructor Permissions:   Instructor   Enrollment Cap:   12

This workshop is a continued exploration of writing for the stage. Students will be encouraged to excavate their own voice in playwriting. They will examine and attempt multiple narrative strategies and dialogue techniques. They will bolster their craft of playwriting through generating short scripts and a completed one act. Readings will include significant contributors to the theatrical form such as Ibsen and Beckett as well as contemporary dramatists such as Annie Baker, Caryl Churchill and Sam Shepard.

Course Notes:   TDM CAMR is the same course as ENGLISH CAMR. Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department’s Creative Writing web page.

Theater, Dance & Media     CKR
Introduction to Playwriting: Workshop (205632)

Sam Marks
2020 Fall (4 Credits)   Schedule:   M 1200 PM - 0245 PM
Instructor Permissions:   Instructor   Enrollment Cap:   n/a

This workshop is an introduction to writing for the stage through intensive reading and in-depth written exercises. Each student will explore the fundamentals and possibilities of playwriting by generating short scripts and completing a one act play with an eye towards both experimental and traditional narrative styles. Readings will examine various ways of creating dramatic art and include work from contemporary playwrights such as Clare Barron, Aleshea Harris, Jeremy O. Harris, Taylor Mac, Suzan Lori-Parks, as well as work from Edward Albee, Caryl Churchill, and Harold Pinter.

Course Notes:   TDM CKR is the same course as ENGLISH CKR. Admission is based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Theater, Dance & Media  90AR

Production Studio - Making Horizontal Theater (205023)

Jay Stull
EllaRose Chary

2020 Fall (4 Credits)  Schedule:  W 0300 PM - 0545 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

This workshop teaches the practices and politics surrounding what has been defined variously as "non-fiction," "documentary," "interview-based," or "investigative" theater. We call this theater "horizontal" because its text, source material, and process are multivariate, self-consciously non-hierarchical, and aspirationally democratic: generated by and with communities through interviews.

In this workshop students will build and perform a full-length piece of horizontal theater. They will collectively choose the topic and scope of the production, study existing models, and interrogate the design of live theater on digital platforms in order to develop an original aesthetic sensibility for an online presentation. Students will determine whom to interview and about what subject of interest; they will conduct those interviews, record them, and transcribe them; and they will use verbatim language from those interviews to build lyrics, write songs, monologues, and dialogue, ultimately constructing a full-length play with music and/or a musical.

In addition, students will examine existing models of horizontal theater and discuss the politics of representation and risks of appropriation that surface in this kind of work. Models of meaningful horizontal theater include: Lynn Nottage's Sweat, the Tectonic theater Company's The Laramie Project, Anna Deavere Smith's Fires in the Mirror, The Civilians' In the Footprint, and Pearl/D'Amour's 5 Miltons.

Horizontal theater is a document of the present moment - its content informed by the context in which it is made - and this semester our production will inevitably be shaped by the challenges and opportunities of pandemic time. We will explore the paradoxes streaming video platforms offer for live performance - intimacy and alienation, a virtual-near and a tangible-far - and how these platforms recommend performative approaches that unify process and execution.

This workshop has the spirit of a lab, wherein the aesthetics of horizontal theater are modeled, deconstructed, questioned, and ideally re-invented, where students think seriously about the identities of their subjects as well as their own, and where conversations about art-making, performance, and politics are courageous, generous, and daring.

Course Notes: TDM production studios (TDM 90AR/BR/CR/DR) frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar discussions and studio work at designated times (TBD) to examine the entire performance process through a creative lens. Additional rehearsal dates and times are TBD.
Class Notes: The fall 2020 production will focus on Horizontal Theater. The production will be led by Jay Stull and EllaRose Chary.

Class Notes: Instructors will conduct interviews with students to gauge course interest.

TDM 90AR Info Sessions for Course Presentation Period will take place on Tuesday, August 18 at 10-11am ET and Thursday, August 20 from 6-7pm ET. Please visit the Canvas course website for more info and Zoom links.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

### Theater, Dance & Media  90BR

New Species: A Hybrid Studio (205031)

Phillip Howze  
Tara Ahmadinejad

2021 Spring (4 Credits)  

**Schedule:**  
R 0300 PM - 0545 PM

**Instructor Permissions:**  
Department  
Enrollment Cap: 15

Co-taught by multidisciplinary artists Phillip Howze and Tara Ahmadinejad, New Species: A Hybrid Studio, is a research and production-centered studio course designed especially for students who are interested in rewilding their curiosities and engaging new skills. Working individually and collectively, students will generate interdisciplinary performance works that defy definition, and take advantage of remote engagement and collaboration. Riffing off of themes in Howze's latest interdisciplinary play—which examines our relationship to community and the contemporary moment through the lens of land, artifact, burial rites, and the poetry of personhood—students will create their own original works that will culminate in an end-of-semester production, directed by Ahmadinejad.

TDM production studios frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar discussions at designated times (TBD) to examine the entire performance process through a dramaturgical lens.

No previous theater experience is required. Students from other concentrations are strongly encouraged to participate.

**Course Notes:**  
TDM 90BR is required of concentrators and open to other students involved in the TDM spring production (as actors or apprentices on the production team). Participation is limited to students involved with the production, either as performers or as members of the production team. Students who wish to be part of the production team should
contact Artistic Producer James Stanley, jamesstanley@fas.harvard.edu

Class Notes: Two synchronous shopping gatherings will be held:
- Tuesday, Jan. 19th from 12:00 - 1:00pm EST
- Thursday, Jan. 21st from 3:00 - 4:00pm EST

All students who are interested in the course should try their very best to attend one of these two meetings as Tara and Phillip will be sharing important course information that the students won't be able to glean from the offline materials.

This course is cross-listed in Art, Film & Visual Studies, and Folklore & Mythology: Concentrators in these departments may take this course for concentration credit this term.

Theater, Dance & Media  90DR

Harvard Dance Project (160653)

Laura Rodriguez

2021 Spring (4 Credits)  Schedule:  R 0300 PM - 0545 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

The Harvard Dance Project cultivates invention, captures imagination, and fosters the courage of artistry.

The Harvard Dance Project will be a remote studio-based course focusing on project based collaborative performance research, choreographic composition, curation and camera dances, video editing for movement, and links choreographic thinking to other fields. The course will explore interdisciplinary approaches to facilitate independent and interdependent virtual performance possibilities in Spring 2021. Over the course of the semester, students will have opportunities to curate, showcase, and deepen their performance practices. Professor LROD (Laura Rodriguez) will lead HDP with Teaching Assistant Danny Rivera.

Course Notes: Some dance, interdisciplinary, and collaborative experience is required. Students concentrating in Theater, Dance & Media or interested in developing a performance practice encouraged to enroll. Enrollment determined by audition during shopping week. Fulfills a
TDM Production Studio requirement.

Come speak with Professor LROD about your experience and interest in the course.

Class Notes: SEEKING dancers, poets, actors, writers, visual artists, performance artists, musicians, and art curators with interest in virtual performances, deepening artistic courage & vision, and developing interdisciplinary skills with media design.

During course presentation times, LROD will provide a brief presentation of what HDP looks like as a virtual course, and answer any questions you may have. Please come to one presentation to sign up for individual audition times.

For individual auditions please consider a brief introduction of who you are, your experience with performance, dance, technology, design, and why you are interested in taking this course. This individual meeting time is conversational and casual and if you wish to share links, portfolios, or websites of your previous experience please email to LROD.

AUDITIONS DURING SHOPPING WEEK:
Join one 30 minute course presentation via zoom and sign up for individual audition times.

Presentation times
FRIDAY, 1/15 4 - 4:30 PM & 5:30-6 PM ET
TUESDAY, 1/19 11-11:30 AM & 1:30-2 PM ET

Recommended Prep: Previous dance experience required.

Theater, Dance & Media  97
Theater, Dance & Media: See it. Do it. Make Theory. (160648)

Julia Smeliansky

2021 Spring (4 Credits)                      Schedule: M 0300 PM - 0545 PM
Instructor Permissions: Instructor        Enrollment Cap: 30

What are theater and dance? What is at stake when a performance is live or recorded? How do performers use space, time, and bodies to make meaning? What is the relationship between a performance and a script? Why do performers and audiences gravitate to live arts? How do economic and political circumstances shape live performances? This sophomore tutorial in Theater, Dance & Media provides students with an intellectual and practical foundation to the concentration by exploring these questions and more. Readings will include theoretical texts from Schechner, Phelan, and Chaudhuri, alongside scripts and other performance materials by Kennedy, Bausch, Kaprow, and Smith. Assessments emphasize how to write about performance and how performance serves as a form of criticism.

Course Notes: Required of all, and limited to, concentrators.

Theater, Dance & Media  98

Junior Tutorial (160647)

James Stanley

2020 Fall (4 Credits)  

Schedule:  
R 1200 PM - 0245 PM

In Junior Tutorial, TDM concentrators work together to strengthen their critical vocabularies, define their goals as scholars and artists within their chosen fields, and workshop their own ideas for independent and senior thesis projects. While this course adheres to a fixed structure, the intimate nature of the course allows us to fill that structure with content, assignments and exercises indexed to specific students interests and projects.

Course Notes:  
Required of all, and limited to, concentrators.

Class Notes:  
Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Junior Tutorial (160647)

Jill Johnson  
Diane Borger

2021 Spring (4 Credits)  

Schedule:  
W 1200 PM - 0245 PM

In Junior Tutorial, TDM concentrators collaborate to strengthen their critical vocabularies, evolve interarts objectives for their artistic and written scholarship, develop research acuity, and workshop their ideas for independent and senior thesis projects. While there is a core scaffolding for the course, the tutorial allows for responsive activation of course content, assignments, discussion and exchange that are based on students' specific needs, interests, provocations and projects.

Course Notes:  
Required of all, and limited to, concentrators.

**Theater, Dance & Media 109**

Beginning Acting Through Scene Study and Monologue Work (207571)

*Marcus Stern*

2020 Fall (4 Credits)  
**Schedule:** T 1200 PM - 0245 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This is a beginning acting class designed both for students who have had no previous acting, performance or arts class experience at all, as well as for students who have had a fair amount of acting experience. The focus is on scene and monologue work using contemporary texts from theater, television and film. Core components of the class include the idea of simply working from yourself, "action-based acting" (how one person is trying to change/affect another person in a scene), and how to read a scene or monologue to figure out what your character might want from that situation. Students learn how to rehearse outside of class with a long-distance scene partner, and how to present that work both live and in a pre-recorded format. This class can also be helpful for directors, writers, designers, dramaturgs, stage managers, choreographers and dancers interested in learning more about acting techniques in performance. It is important to note that while the class is intentionally designed to be as unintimidating and accessible as possible, created with the absolute beginner in mind, the class does require a great deal of outside work. Students should expect to spend 4-6 hours per week on class work, including time for analyzing texts and rehearsal time for the scenes and monologues.

**Course Notes:** Enrollment will be determined by submitted audition videos: Please prepare a 1-2 minute contemporary monologue. Choose any piece of text (1990's to the present) from any theater, television or film script. Choose a text you can relate to in some way, that feels comfortable and real to you when you say the words out loud. Please memorize the text and practice saying those lines until they feel natural to say.

Then, please record your monologue (using your phone, or whatever device you want) and email the recording or a link to the video to both marcus_stern@harvard.edu and ashleigh.d.reade@gmail.com no later than 1pm ET, Friday August 21st. If videos are sent by Google Drive link, make sure your permissions are set such that we can immediately watch the video without requesting access.

Please feel free to email us if you have any questions about the class, or about preparing and sending in an audition monologue.

**Class Notes:** Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if...
the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 109 Info Sessions for Course Presentation Period will take place on Monday, August 17 at 9-10am and 5-6pm ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media  110

Foundations in Acting: Pathways (112880)

John Kuntz

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 12

A beginning acting class that explores the basic techniques of acting, including the various entry points to building a character as well as various techniques to rehearsing a scene or speech. Beginning with exercises that flex the imagination and heighten observation; the course will then move towards work on an actor's instincts, rhythm, focus, trust, concentration, text analysis, language and other techniques, with an ongoing emphasis on improvisation and the actor's imagination. Students will select, edit (if necessary), memorize and perform two contrasting monologues of their choice during the course. Speeches will receive in-class feedback and coaching. Especially suitable for first-year and sophomore students as well as for directors, writers, designers, dramaturgs, stage managers, choreographers and dancers interested in learning more about acting techniques in performance.

Course Notes: Enrollment determined by audition. Students will audition for the course with a short improvisation described by the professor during the course shopping/pre-registration period.

Class Notes: TDM 110 will be holding sessions for interested students during shopping week on:

Friday, 1/15 from 1-3pm
Tuesday, 1/19 from 10:30am-12:30pm

If you are interested in taking the class, please arrive at the beginning of one of these two sessions. There will be a brief introduction and then present individuals will be assigned an individual time slot for the audition.

For your audition, please prepare one of the following:
A short speech (1 min or so) from the play (or other source) of your choice.
A personal story or anecdote you feel comfortable sharing
A really good joke
(Note: Please don't be stressed at all by this audition! This is just a chance for the instructor and faculty to get to know you and what kind of a perform we you are!)

In addition, there is a short form for you to fill out before your
Theater, Dance & Media  112R

Advanced Acting: Contemporary Texts (122906)

Marcus Stern

2021 Spring (4 Credits)

Instructor Permissions: Instructor

Enrollment Cap: 12

Schedule: T 1200 PM - 0245 PM

Using contemporary text from TV, film, and theater, this course introduces advanced acting techniques through scene and monologue work. Core components of the class include the idea of "simply working from yourself" and action-based acting, which explores how one person is trying to change/affect another person in a scene. In addition, students will learn how to read a scene or monologue to figure out what your character might want from that situation, audition techniques, how to choose material that best suits the individual actor for auditions and scene work, text analysis, and personalization of a character. All of the concepts are aimed at the creation and refinement of an acting process that can be specifically tailored to the individual actor. This course has been adapted for the online classroom, and we're excited about the concrete results we're seeing from the student actors who have been working with us virtually!

Course Notes:

Enrollment determined by audition.

Class Notes:

Enrollment will be determined by live audition in the information/audition sessions on Friday, January 15th from 11:00am-1:00pm ET or Tuesday, January 19th from 11:00am-1:00pm ET. Please prepare a 1-2 minute contemporary monologue. Choose any piece of text (1990's to the present) from any theater, television or film script. Choose a text you can relate to in some way, that feels comfortable and real to you when you say the words out loud. Please memorize the text and practice saying those lines until they feel natural to say. If you are unable to attend one of the audition sessions, please record your monologue (using your phone, or whatever device you want) and email the recording or a link to the video to both marcus_stern@harvard.edu and ashleigh.d.reade@gmail.com no later than Tuesday, January 19th at 1:00pm ET. If videos are sent by Google Drive link, make sure your permissions are set such that we can immediately watch the video without requesting access. Please feel free to email us if you have any questions about the class, or about preparing an audition monologue.

Theater, Dance & Media 114K

Squaring the Circle: Russia, Art, Revolution (208135)

Daria Khitrova

2020 Fall (4 Credits)  Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None  Enrollment Cap: n/a

Wherever an avant-garde movement sprang up, its artists would announce they were there to change the world. Nowhere did this promise come closer to fruition than in Russia of the 1920s. This course explores Russian and Soviet avant-garde art and its most radical manifestations in literature and dance, on stage and screen, in visual arts and in the ways of life. We will examine the way art and political revolution impact each other and focus on the many "isms," avant-garde and otherwise, that shaped society and the arts during a period of rapid modernization and experimentation: Futurism, Suprematism, Constructivism, Productivism and others. We will look at works by Malevich and Meyerhold, Tatlin and Mayakovsky, Rodchenko and Stepanova, Nijinsky and Meyerhold, Vertov and Eisenstein.

Course Notes: No prerequisites. All readings in English.

This course is cross-listed as SLAVIC 114 and TDM 114K.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: SLAVIC 114/TDM 114K Info Sessions for Course Presentation Period will take place on Tuesday, August 18 at 1:30-2:45pm ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media 115

Acting Shakespeare (119020)

Remo Airaldi

2021 Spring (4 Credits)  Schedule: T 0300 PM - 0545 PM
Instructor Permissions: Instructor  Enrollment Cap: 12

This course is an intensive study of Shakespeare's dramatic works from the point of view of the actor. It is important to remember that Shakespeare's verse dramas were written to be performed and that only when they are approached this way - as playable, theatrical texts - that they have their maximum impact. Through text analysis, scene study, vocal work, and acting exercises we attempt to find not only the meaning, but the music and theatrical power of Shakespeare's words.
Course Notes: Enrollment will be determined by an audition during the first class meeting.

Class Notes: This class will meet and hold auditions during Shopping Period on Friday, 1/15 from Noon to 2PM (Eastern Time) and on Tuesday, 1/19 from 3 to 5PM (Eastern Time). (If neither of these times work for you, please contact the instructor.)

Acting Alone: Voice, Speech, and the Monologue (108799)

Remo Airaldi
Erika Bailey

2020 Fall (4 Credits) Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This course will explore the rehearsal and performance of theatrical monologues with a particular focus on voice and speech training. The ability to work on a monologue—whether in the context of a play or as an audition piece—is a foundational skill for all actors. We will explore various warm-up techniques to allow greater vocal and physical expressiveness in both classical and contemporary material. We'll study specific approaches to help students "act alone" creatively, honestly, and spontaneously. Students will also work on the presentation of a monologue in the context of an audition and will learn to create an effective self-tape.

Course Notes: Enrollment determined by short interview/audition.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: During the Presentation Period the instructors will meet individually with everyone who is interested in enrolling to discuss the class and answer questions. Students should also be prepared to read a short monologue during these sessions, which will take place on Mon 8/17 at 12-2pm ET, Wed 8/19 at 12-2pm ET, and Thurs 8/20 at 3-5pm ET. If students cannot attend one of these sessions please email the course instructors to arrange for an alternate time. More details are on the Canvas course website.

Theater, Dance & Media 119
Vocal Production for the Stage (118497)

Erika Bailey

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 12

Whether one is performing in a play, pitching an idea, presenting research or leading a group, the ability to use one's voice effectively is a primary element in the success of the performance. The importance of a rich and varied voice has only increased as we communicate and perform through zoom and other online platforms. Using several major techniques of voice training from the field of acting, students will learn the possibilities, nuances and power of the human voice. We will explore both ideas of vocal authenticity and vocal transformation. Preference is given to Theater, Dance, and Media concentrators, but students with no previous voice or theater experience are welcome in this class.

Class Notes:
There will be two shopping periods for TDM 119:
Friday 1/15 at 9:30-11am EST
Tuesday 1/19 at 5-6:30pm EST
There will be a 20 minute information session about the class and then those present and interested will scheduled a 1 on 1 sessions (5-10 minutes) following the info session.

Theater, Dance & Media 125X
Performing Criticism (216430)

David Levine

2020 Fall (4 Credits) Schedule: W 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 12

What makes "Great Criticism?" Analytic clarity? A surfeit of objectivity? Dedication to art and artists? Or is great criticism more like great art, relying on a strong point of view and deep personal investment? This course tests the latter view, by treating works of criticism as dramatic monologues to be analyzed, invested with desire, and performed. We will use techniques of script analysis to pay closer attention to how arguments are constructed, and acting techniques to listen closely for the ways that criticism is always, to quote Nietzsche, "the confession of its originator, and a species of involuntary and unconscious autobiography"
This course will range through the history of English criticism from Philip Sidney to Zadie Smith. Students will also learn basic techniques of script analysis, acting, and public speech, and apply these techniques to works of criticism, culminating in a final recorded performance of an essay-as-monologue.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 125X Info Sessions for Course Presentation Period will take place on Monday, August 17 at 4-5pm ET and Thursday, August 20 from 10-11am ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media  130R

Directing (123080)

Marcus Stern

2020 Fall (4 Credits)  

Schedule: R 1200 PM - 0245 PM

Instructor Permissions: Instructor  

Enrollment Cap: 9

Redesigned in response to the pandemic, this is a directing class for storytelling and some of the various forms it can take online. It's a class for directors, actors, writers, choreographers, dancers and any others interested in exploring online vocabularies, refining their voice as storytellers and artists. The course accommodates all levels of directing, from beginners with no experience, to advanced directors who are interested in a career of directing in theater and/or film. The emphasis is on telling stories that are of personal interest to you, defining your story points and desired visceral impact, and learning techniques to help you accomplish your vision. Each student directs 5 very short pieces in the first 8 classes and then 3 longer pieces over the rest of the term. Directors learn how to work with long-distance actors in terms of staging and acting values and how to assess actors’ spaces for directorial possibilities. Students usually pre-record their work for presentation but have the chance to present stories live online during class time. Students may direct their own writing (however, feedback and focus will primarily be on the directorial choices), and direct themselves as actors if that's of interest to them. Students will use free basic video editing software to create their video work, but no previous video experience is necessary. While we'll look at how the camera and editing are used in some of the storytelling, this is not a technical filmmaking class. The central focus is on how a director’s personal experiences and/or passions can creatively and concretely shape their story telling.

Course Notes: Enrollment determined by the instructor after viewing student Introduction Videos. For those interested in taking the course, please submit a short 2-5 minute Introduction Video. Please include the following: 
1) Your name, year, and concentration if you have one.
2) Why you're interested in taking the course. What do you hope to get out of this course?
3) If you've had any directing, theater, film or other kind of storytelling experience. No previous experience in any of these areas is needed to
take this course.
4) Please tell us two things that feel personally important to you in life. We want to encourage students to make work that they feel personally connected to.

Please email these introduction videos or a link to the video to BOTH marcus_stern@harvard.edu and annabeth_lucas@g.harvard.edu no later than 12pm ET, Friday, August 21st. If videos are sent by Google Drive link, make sure your permissions are set such that we can immediately watch the video without requesting access.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 130R Info Sessions for Course Presentation Period will take place on Tuesday, August 18 at 9-10am and 5-6pm ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media 131

Directing Lab (126812)

Shira Milikowsky

2021 Spring (4 Credits)                        Schedule:  M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This class is designed for students interested in expanding and exploding their understanding of theater and performance studies. Directing lab is actually a laboratory: a place for hypothesis, experimentation, and practice. Over the course of American theater history thus far, who have been the great experimenters? Which directors have broken the rules and re-defined the game? Does innovation come from a single auteur, a tightly woven ensemble, a well-funded institution or a band of rogue outsiders? This class will tackle these and other questions, weaving together theory and practice to provide students with a holistic understanding of the American avant-garde and a set of practical tools with which they can tackle their own, burning artistic questions.

At the root of experimentation are questions of power and oppression. As we examine the innovators of American theater in the 20th and 21st century, course materials inherently probe questions of access and inclusion. Who is invited in? Who is left out? Which creators truly held the tools to challenge the status quo? Was their work allowed to be seen, heard, and felt? In this course students will engage in these questions not only by reading the history, but by creating and directing their own work, inspired by the artists and productions studied.

Convention tells us that 'you have to know the rules to break them,' but Directing Lab isn't a course about convention. This class is open to students with all ranges of directing experience - including none. The only
prerequisite is curiosity.

Course Notes: Enrollment determined by short interview during course shopping/pre-registration period.

Class Notes: This class will meet Mondays, from 12:00-2:00PM ET.

There will be *three* information sessions. Sessions are about 30 minutes, with time for questions at the end.

- Friday, 1/15 @ 12pm ET
- Friday, 1/15 @ 5pm ET
- Tuesday 1/19 @ 12pm ET

If you would like to be considered for enrollment, please send an email requesting admission to Shira (shira.milikowsky[at]gmail.com) and to James (phillipjamesmontano[at]gmail.com) (please cc: us both) by 11:59pm ET on Tuesday, 1/19. The email should contain a short paragraph telling us your name, graduation year, why you're interested in the course, and anything else about you that you'd like to include. Don't overthink it! A "short" paragraph will suffice - we are interested in getting to know something about you and your goals for the class. Selected students will be notified by email by 12pm ET on Wednesday, 1/20.

Theater, Dance & Media 134R

CoLLab: Disruptive Performance in Liquid Times (212801)

Debra Levine

2020 Fall (4 Credits) Schedule: T 0300 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 12

The poet Askia Muhammad Tore asked whether Black music could become "a potent weapon in the Black freedom struggle." Can we ask the same of theater and performance that we might identify as what playwright Naomi Wallace calls, "engaged"? Wallace offers the term up through example rather than definition: "Engaged, for example, with questions of power and its myriad forms; questions of who has it and who doesn't, and the reasons why. Questions of what happens to those who struggle with their disempowerment; who we are allowed to touch, what colour of skin articulates which desire; what orifices are worthy of worship; which of us is beaten to death for not following the rule book on acceptable sexual conduct - all these are questions intimately
connected to our social contracts."

If this is a moment when what we formerly believed were necessary qualities of theater and performance—including: presence, simultaneity, buildings, proximity, liveness, actors, and audiences—are not fully operative, how can we use this aesthetic disruption to rethink the ethical possibilities and priorities of the practice and the field? What now can be done as theater? What now can be performance?

This research-based class will develop a partial snapshot of this historical moment in contemporary theater and performance. Together we will sift through the overwhelming numbers of performance works, talks, TikTok manifestos, chats, debates, panels and archival materials accessed on the internet after CoVID restrictions shut down face-to-face assembly in theatrical venues and we will identify what we think is both aesthetically compelling and "engaged." Class participants will be responsible for deconstructing the aesthetics and ethics of those works and performance-based initiatives, teaching what they learn to one another throughout the semester using the format of "teach-ins" (practical, participatory learning sessions that are action oriented). The final results of our research will be recorded in a collectively authored digital book, a platform that allows for different formats of critical analysis to be staged alongside the rich media that served as our research archive. The book will document our collective reflection on the significance of each of the projects we have identified and the hope is that the act of bringing each individual project together might reveal some commonalities, some new possibilities of aesthetic and political solidarity.

Students will collaborate to research and identify which artists and institutions, (both insiders and outliers) across the globe who are using this moment to radically reconceive theater and performance that we might call "engaged." We will debate our own understanding of how that term that can be pertinent for this political moment or whether there need to be better aesthetic and theoretical descriptors. Then our task is to discover who is using the instability of theater and performance in this moment to challenge the terms of the how the practice can be thought, done and the ways in which it is in concert with social justice initiatives and movements. We will become researchers of the present and future of the art form, seekers of those who are experimenting with liberating artistic practice, as Robin D.G. Kelly writes, in order to "build community, establish fellowship, play and laugh, and plant seed for"

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 134R Info Sessions for Course Presentation Period will take place on Tuesday, August 18 at 3-4pm ET, Thursday, August 20 from 12-1pm ET, and Friday, August 21 from 10-11am ET. Please visit the Canvas course website for more info and Zoom links.

What if the classics offer us nothing? What if catharsis is BS? What if the "power of stories" is just marketing, and theater is inherently reactionary, elitist, out-of-date, and steeped in white supremacy? What then? This studio class takes these positions as givens, and tries to create something faster, slyer, less prone to institutional capture. Students will create new works, rip apart old ones, and process the structural conditions of "American Theater".

Actors, directors, designers, and aspiring dramaturgs welcome.

Course Notes: This course is best suited to students who have taken two theater classes at Harvard, participated in two productions (extra-curricular or in TDM), or have equivalent experience.

Class Notes: Info session: Wednesday, January 20, 3pm Boston time.

The Theater, Dance & Media 138X class is about creating new works, rip apart old ones, and processing the structural conditions of "American Theater". It is best suited for students with prior theater experience. The Info session is on Wednesday, January 20, 3pm Boston time.

The Theater, Dance & Media 148P class focuses on unpacking four dance and rhythm stylings: Forokotoba, Tansole, and Bara/Baradong. The class is about exploring the traditions of Noh drama, Sanskrit theater, and Greek.
tragedy have informed the development of American dance and theatrical forms, and similarly, a deep investigation of Koteba masquerade performance traditions will offer students of theater and dance informative tools as theorists, practitioners and historians.

Class Notes: Information Session #1: January 15, 2021: 1:30p - 2:30p
Information Session #2: January 20, 2021: 3p - 4p

Theater, Dance & Media  149
Latinx Movement Practice (217446)

2020 Fall (4 Credits)
Instructor Permissions: Instructor
Schedule: T 0600 PM - 0845 PM
Enrollment Cap: 12

A warm invitation to get up, connect with our bodies, and move together after a long day of zooming. Latinx Movement Practice rigorously explores the social and communal Latin Diaspora of movement, migration, and music from Mexico, the Caribbean, South America, and the United States. The course is taught with a blend of English, Spanish, and Spanglish.

Together we will investigate and deepen our use of horizontal and vertical weight, isolations, polycentric movements, and hip whining techniques. We will weave a survey of the history, art, and literature from the Latinx experience through an embodied experience while fostering our virtual community. LROD (el rod) will facilitate Latinx Movement Practice with radical tenderness to embrace deeper states of power, awareness, and energetic alignment during movement rituals for heightened connectivity, and restorative power. ¡Vamos a Bailar!

Key Questions:
How do we foster a sense of community in movement during the era of zoom and isolation?
Can we deepen our movement intentions and embrace our artistic voices, while simultaneously creating space for joy and empowerment?
What are the ways we share and celebrate each other’s movement investigations each week.

Course Notes: No previous Latin movement experience is needed to enroll.
Class Notes: This course is taught by Theater, Dance & Media Lecturer in Dance, Laura Rodriguez.

Directorial Concepts and Set Design of the 20th and 21st Centuries (110319)

Julia Smeliansky

2020 Fall (4 Credits)  Schedule: M 1200 PM - 0245 PM
Instructor Permissions: Instructor  Enrollment Cap: 20

What are the similarities between Las Vegas pop diva concert design and performances at the Theater of Dionysus in 5th Century BCE Athens? How do theater architecture and design reflect changes in society? What is the process of designing an opera or a musical? This course will introduce students to some of the most influential 20th and 21st-century directors, designers, and performance artists. We will explore a range of artistic movements that cross-pollinated the visual arts and theater over the past century, and trace the artistic heritage of current theatrical experiments to their avant-garde roots. Examining how meaning in the theater is derived not only from text but also from spatial composition, light, and overall design concept, we will study a variety of approaches to storytelling in theater, dance, and opera. Working with primary sources in the Harvard Theatre Collection, students will develop and present short creative projects based on a wide range of theatrical texts. Students will also meet with guest artists to engage in a dialogue about contemporary design practices.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 150 Info Sessions for Course Presentation Period will take place on Monday, August 17 at 12-1pm ET, Wednesday August 19 from 2-3pm ET, Thursday, August 20 from 12-1pm ET, and Friday, August 21 from 12-1pm ET. Please visit the Canvas course website for more info and Zoom links.

Design Foundations: Scenography 1 (109545)

Dede Ayite

2021 Spring (4 Credits)  Schedule: T 1200 PM - 0245 PM
Instructor Permissions: Instructor  Enrollment Cap: 12

Great design for live performance requires synergy between all the key elements to unlock the visual power of a play. This course explores the fundamentals of set, costume, lighting and sound through critical texts and applied projects.

Students will be taught the fundamentals of design with an emphasis on script analysis, research and the articulation of a design concept through rendering, collage, model building with an introduction to basic drafting principles. The goal is for students to develop key skills for conceiving and designing visual elements for live performance. Students should not expect a technical survey, but rather an exploration of
how visual elements shape a given performance.

Class Notes: 

Presentation Period
Tues 01/19 at 12-1pm ET

There will be a short introduction at the top of the hour, followed by Q&A's. Students can show up at any time during the hour.

Interested students should send an email with name, background experience in theatre or the arts and a short note on why they would like to take the class to Dede Ayite at dedeayite[at]fas.harvard.edu. No previous experience in Theatre is required to take this course.

Students should add the course to their Crimson Cart by Thur. 1/21 at noon for instructor approval.

Transformative Design: Introduction to Costume Design (214575)

Dede Ayite

2020 Fall (4 Credits) Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 12

If all that is truly needed to tell a great story is an actor and an audience then what is design for the stage and what can it do?

This class explores the design of visual and material elements for the stage. How it can amplify, interpret and extend the message of the production to the viewer through delight, astonishment and provocation. Together we will explore how costume design can even assist in changing a cultural narrative.

Transformative Design is rooted in the principles of theatrical design practice as a process to explore the breadth of these questions. The professor will first demonstrate the design process that a costume designer undertakes, from start to finish. Students will learn how to read and research an existing dramatic text as a designer and how to manifest the vision of the designer’s other collaborative artists – director, choreographer, dramaturg and actors – in visual terms.

Design (whether a designer creates a costume, a prosthetic, a material prop or piece of scenery) can also transform the performer and shift the very terms of representational embodiment. For the actor, design can change one’s understanding of the physicality, the intellectual and emotional life of the character they are engaged to portray. Students will learn how to sketch and design costumes that assist in transforming the performer’s body, and how to collaborate with everyone involved in a theatrical production.

After carefully following the steps of a professional costume designer preparing for theatrical work, students in the class undertake an individual design project, from start to finish, under the supervision of the professor.

Class Notes: This course is taught by TDM Lecturer on Design and Obie and Lortel
Award-winning costume and scenic designer Dede Ayite.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 158A Info Sessions for Course Presentation Period to be announced. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media 161 Section: 0010

Live Art from Archival Sources: Devised Theater Workshop (203537)

James Stanley

2021 Spring (4 Credits) Schedule: R 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Course Description: How can vinyl records, legal transcripts, classic movies, home recordings, 19th century burlesque routines, or old photographs become the raw materials for some of today's most compelling theater? And how do these works ask audiences to reconsider our inheritance of the past, creating a dialogue between the past and the present? This course focuses on theater-makers and processes of production that turn objects, archives and cultural data from the past into vibrant forms of contemporary performance. In the first half of the course, we will explore works by Tina Satter, Alison S. M. Kobayashi, Phil Soltanoff, Kaneza Schaal and Object Collection (among others), meet with these artists to discuss their processes, and take a deep dive into our own archives at the Harvard Libraries. Moving from theory to practice, we will then devise our own solo and collaborative works based on objects and artifacts of our choosing. This course is for writers, directors, designers and performers willing to work across disciplines.

Class Notes: Shopping Week

Tuesday, January 19th from 2-3pm EST
Thursday, January 21st from 12-1 EST

If you can't make either of these times and are still interested in the course, please contact me directly at: jamesstanley[at]fas.harvard.edu.

Theater, Dance & Media  164H

Playwriting: Ritual Practice and Curious Worlds (207819)

Phillip Howze

2020 Fall (4 Credits)  Schedule:  R 0300 PM - 0545 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

A play is a new world in and of itself. What sorts of strange, curious worlds are theater makers crafting today? What approaches are they taking to create these worlds?

In this new playwriting course we will explore both text and non-texts, the wild (as well as the conventional) to discover what drives contemporary plays, devised works, and performance today.

We will discuss the practices employed by various playwrights and directors—particularly women and artists of color—and try our own hand at some of these approaches. In addition, we will see live performances in realtime; engage special guest/visiting artists; collaborate with fellow classmates; and expand our curiosities.

Most importantly, we will write. This is an exploratory writing workshop with a focus on generating new material. By the end of the semester, you will have created a portfolio of new works, ideas, processes and rituals.

Class Notes:  Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes:  TDM 164H Info Sessions for Course Presentation Period will take place on Monday, August 17 at 3-4pm ET and Thursday, August 20 from 3-4pm ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media  169B

Theater 000 (216730)

Lex Brown

2020 Fall (4 Credits)  Schedule:  M 0600 PM - 0845 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

Where do you see yourself in 5 years? On Broadway or in a bunker? As we find ourselves gearing more toward the latter, this course will help students unthink what they know about theatrical performance and strip it down to its most mobile and visceral parts. Theater 000 considers dramatic performance an essential human activity: an interpretive skill that can serve as entertainment, information sharing, or escape strategy. Under our unusual circumstances in an ambient disaster, we will delve into the creative
process with a search for raw, poetic, and comedic experiences, to "touch reality" at a time when we need it the most.

Using a variety of techniques and prompts, we will devise theater from its most elemental parts – vocalization, light, and movement. Beginning with a piece made completely in darkness, students will progressively build toward a piece with light, sound, movement, music, set, etc. Our texts will be technical, philosophical, and art historical, with subjects ranging from light, sound, physics and color, to surveillance and identity politics. Our goal is to find the impact of the subtle gesture; develop specificity in word choice, movement, and timing; develop the storytelling voice; and build basic skills in performance documentation. Naturally we will be partnering with the camera as the conduit for live action.

Students of all concentrations are welcome, with no requirement for prior experience in acting, performance, or movement. For students with theater experience, this will be an opportunity to reconfigure your toolbag. All students must be ready to be open-minded, non-judgemental of their peers, and desire to find the goodies that are just beyond their comfort zone.

Course Notes: An additional individual/group working time will be determined after enrollment is determined.

This course is taught by Harvard College Media Fellow Lex Brown.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 169B Info Sessions for Course Presentation Period will be announced. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media 169S

Singer + Song = Story (215988)

Stew Stewart

2020 Fall (4 Credits)  Schedule: W 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This course is an immersive, songwriting-based introduction to Stew's musical theater-making practice, a process which views the nexus of writer and song as the seed out of which a more personal, visceral musical theater can emerge. Singer + Song = Story believes in a theater that seeks, via a respect for the inherent dramatic potential of song itself, to capture the intensity of personal testimony that characterizes the best rock, pop, rap, blues and folk songs of our country and the world, with the goal of bringing that testimonial fire to the American theater stage, screen, and street.

Course Notes: Those with no songwriting experience are welcome.

Class Notes: This course is taught by singer-songwriter and Tony and Obie-Award winning playwright Stew.
Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 169S Info Session for Course Presentation Period will take place on Wednesday, August 19 from 12-1pm ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media 169SC

This is a show tune, but the show hasn't been written for it yet. (217583)

E. Jane

chukwumaa --

2021 Spring (4 Credits)  

Schedule: M 1200 PM - 0245 PM  

Instructor Permissions: Instructor  

Enrollment Cap: 12

This course is a sound studio/workshop exploring the way sound communicates narrative, examining the way sound aids narrative in drama and beyond as well instances where artists and musicians have created music for imagined dramas or conceptualized a song or album as a drama, which is what Nina Simone is describing in the line from the song "Mississippi Goddam" from which the course title is derived. Students will listen to Orson Welles' 1938 radio drama "The War of the Worlds", watch films, listen to songs, albums and soundtracks, and create stand-alone compositions that function or are conceptualized as radio dramas and soundtracks. Students should be prepared to think critically and experimentally about sound and the work they produce and be able to articulate their process and goals for their work. This class will include projects, readings, screenings, listening sessions, discussions, and workshops.

Class Notes: This course is taught by the performance art duo SCRAAATCH.

COURSE APPLICATION:

Submit a 1:30 to a 4-minute long sample of a song or composition* (.mp3) you have previously made. Do not feel any pressure to make anything new. *Please do not submit a straight field recording. Email your submission to ejackson1[at]fas.harvard.edu and chukwumaa[at]fas.harvard.edu by January 19th at 11:59 pm EST. Students will be notified of their status on January 20th.

SHOPPING WEEK INFO SESSION:

On Friday, January 15th we'll hold a 2-hour session at 2pm ET to discuss the course and answer any questions you have. Come to the session ready to answer this question: When's the last time a sound, song, or composition told a story for you? * We'll also be available from 11 am - 12 pm EST for office hours.
This course will explore theater-producing models in the nonprofit sector and imagine ways to break boundaries and produce work in new ways. Nonprofit theater in the United States has historically been a predominately white institution that has been built on and benefited from racist policies. Working to dismantle those structures and build anti-racist practices into producing theater will be at the core of this course. The course will be undertaken with guest collaborators Dayron J. Miles (A.R.T.) and Maria Manuela Goyanes (Woolly Mammoth Theater, Washington D.C.), in addition to five professional theater-makers who will work directly with students in small groups with particular attention to new models of producing that embed anti-racist practices.

Students will learn about the history of theatrical producing and the evolution of the job of the producer. The course will examine the role of the producer in facilitating creative development and providing dramaturgical support, as well as resource allocation, budgeting, and contract negotiation and writing. Additional units will focus on labor negotiations and collective bargaining agreements, financial analysis, artistic mission and vision, commercial vs. nonprofit producing, and the role of the audience in performance - and how all of these must change going forward.

As a culminating project, students will apply what they've learned over the course of the semester and work with the professional artists to develop producing plans and strategies for a range of theatrical performances and experiences, centering anti-racist practices.

Class Notes: This course is taught by American Repertory Theater Executive Producer Diane Borger.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.
In this participatory hybrid course, we explore the creation and implementation of Street Dance Activism as a Co-choreographic somatic healing modality, and form of spiritual transcendence, through participating in the Global Dance Meditation for Black Liberation and deeply engaging with The Ritual of Breath is the Rite to Resist. Street Dance Activism's 28 Day Global Dance Meditation features embodied meditation & movement sessions led by Black, Indigenous, People of Color + Queer guides from multiple wisdom traditions and healing practices. It takes 28 days to change a habit, so imagine if we took 28 days to focus on our liberation. Liberation not only as a single entity, but as a global, collective consciousness. Black liberation is your liberation, and your liberation is Black liberation.

This interdisciplinary course uses somatic practices to engage with the historical context and legacy of public rituals of extreme violence against Black people as both sites of anti-Black state, and non-state sanctioned disciplinary projects, as well as time-spaces of radical resistance. At the center of these forms of violence are the control of breath as life force, and as a sign of freedom. We discuss the past, present, and future all occurring in the now as we examine the murder of George Floyd in May 2020 as an officer pressed his knee against Floyd's neck for nearly eight minutes as Floyd repeatedly lamented that he could not breathe.

We explore theories of ritual and performance to understand how artists and communities come together as collectives to contextualize and re-present impossible terrors. Artists and grassroots organizers use aesthetics and collective action to transform the horror of being subject to violence at any moment into rituals of breath and potential social transformation. This course then teaches students theories of ritual and performance as ways that communities have historically engaged and confronted histories of anti-Black violence in order to conceive of new future possibilities to embody liberation in the face of disciplinary actions meant to contain and choke Black people. It is my intent for us to become guides to bring social activists into the classroom and the pedagogy out into the streets.

Theater, Dance & Media  182B

Black Arts Movement to #blacklivesmatter (217585)

Shamell Bell

2021 Spring (4 Credits)  

Instructor Permissions: Instructor  

Enrollment Cap: 12

This course situates the "Black Arts Movement" (1965-1975) in its historical context, but also places our explorations in this present moment where artists continue to light the torch of art reflecting the times, as our ancestor Nina Simone so eloquently asserts as "our duty". Scholar Larry Neal writes in his seminal piece:

"The Black Arts Movement is radically opposed to any concept of the artist that alienates him from his community. This movement is the aesthetic and spiritual sister of the Black Power concept. As..."
such, it envisions an art that speaks directly to the needs and aspirations of Black America."

As this course begins during the celebration of Dr. Martin Luther King Jr.’s birthday, let’s place MLK in the context of the material conditions in Black communities during the Black Arts Movement, which Larry Neal coined as the “aesthetic and spiritual sister of Black Power.” This act is often seen as the starting point of the Black Arts Movement. In a Time article, “A Riot Started in Newark 50 Years Ago. It Shouldn’t Have Been a Surprise.” Arica L. Coleman writes, “Martin Luther King Jr. aptly predicted just such a riot in a speech titled “The Other America,” which he delivered at Stanford University on April 14, 1967, three months prior to the unrest. “All of our cities are potentially powder kegs,” he said. While King maintained his commitment to nonviolent civil disobedience, he also recognized the psychology of oppression.

In this course, we will explore the legacy of the Black Arts Movement and its manifestations in today’s Black liberation movement. In addition to required and suggested readings, we will supplement course lectures with selected films and musical selections. This course takes an ethnographic and interdisciplinary approach to mapping the historical, geographical, and socio-political trajectory of the Black Arts Movement to #blacklivesmatter by highlighting the motivations, strategies, and experiences of community organizers on the ground. The narratives of grassroots organizers from groups such as Justice 4 Trayvon Martin and those organizing for #blacklivesmatter across the United States, will provide nuance to our understanding of an international movement that we now know as Black Lives Matter. Students will be encouraged to explore their own foundations and personal stories connecting them to the Black liberation struggle past, present, and future. The course culminates with a "Community Gathering" that will feature short student documentaries of their group projects. The gathering will include a collaboration with Dartmouth Students, activists on the ground, and community members to continue to move the work of the people on the ground forward, and the work of the students outside of the classroom, and into the community.

Class Notes: This class will meet on Tuesdays, 3:00-5:00PM ET.

The Power and Relevance of the American Musical: 1776 and Other Musicals (205365)

Ryan McKittrick
Diane Paulus
Jeffrey Page

2021 Spring (4 Credits) Schedule: W 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 12

With a focus on the American Repertory Theater’s upcoming revival production of the musical 1776 co-directed by Jeffrey L. Page and Diane Paulus, this course examines how the musical theater can uniquely and powerfully inspire audiences to reflect on history, politics, race, and identity.
Analyzing scenes and songs from 1776 and other musicals including West Side Story, Cabaret, Hair, The Wiz, and Hamilton, students will explore the multiple layers of meaning created by the combination of music, lyrics, choreography, staging, book scenes and design.

Students will read works by theorists, historians and practitioners, examining the cultural significance of these shows in the years they opened on Broadway, how they have evolved in revivals and adaptations over time, and how they resonate today. In addition, students will engage directly with guest artists who will share their practical experience creating work in the musical theater.

Course Notes: This course will take place from 12-2pm ET.

Topics in Advanced Performance Theory: Gender and Sexuality (126954)

Robin Bernstein
Debra Levine

2021 Spring (4 Credits) Schedule: R 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 24

In this seminar, we will listen to and participate in current conversations in Performance Theory about gender and sexuality, especially as both these categories intersect with race. Topics include racialized and gendered structures of feeling; queer transnational social histories; technosexuality and mutation; and minor keys of Black unruliness and fugitivity. Reading includes works by José Esteban Muñoz, Paul Preciado, Saidiya Hartman, and Kareem Khubchandani. This is an advanced course intended for graduate students and upper-level undergraduates.

Course Notes: Note: This course may count for the WGS Theory foundation requirement or the 1400 level requirement, but not both.

Synchronous attendance required. Class meetings will not be recorded.

This course is co-taught with Debra Levine.

Class Notes: Shopping Week
Tuesday, January 19 at 1-2pm ET
Thursday, January 21 at 1-2pm ET

Interdisciplinary seminar in Ukrainian studies with broad regional and comparative perspective. Faculty and invited scholars discuss a variety of topics in the humanities and social sciences. Background readings and follow-up discussions help students put the specific lectures in broader context. Students also conduct an individually tailored reading and research project under the guidance of a faculty advisor and in consultation with other resident specialists. Part two of a two part series.

Women, Gender & Sexuality  98F

Tutorial - Junior Year: Research and Methods (109933)

Sarah Richardson

The course is organized to support student success in writing a junior research paper. We will read a variety of texts and interrogate closely how topics are approached in literary and cultural studies, in social and historical studies, and in life-sciences, in order to become prepared to discuss critically different methodological approaches and theoretical frames. Students will also work in small groups with a tutor, who will guide them through their research and writing on the particular topic of their interest.

Course Notes: WGS Juniors are expected to take 98s in the spring term. This course is only open to students planning to be on leave in the spring term of the junior year. Permission from the DUS in WGS and updated plan of study required.

Women, Gender & Sexuality 1204

Power, Knowledge, Identity: Critical Approaches to Race and Ethnicity (208114)

Eleanor Craig

2021 Spring (4 Credits) Schedule: MW 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 20

How might critical attention to race and ethnicity as they intersect with gender and sexuality—and also
frameworks of indigeneity and class—shape how we study? How do these lenses shift the questions we ask, the information that counts as data, and the genres of work that we recognize as ‘academic’?

For those newer to studies of race and ethnicity, this course provides intersectional frameworks for recognizing what assumptions undergird academic projects and fields of study. For those familiar with ethnic studies, it aims to serve as a 'Theories and Methods' course, providing tools and strategies for refining one's own interdisciplinary inquiries.

Course Notes: Weekly lectures and a one hour section to be arranged.

Synchronous attendance is expected. The class will not be recorded.

**Women, Gender & Sexuality 1210FT** Section: 01

Feminist Theory as Critique (142819)

_Afsaneh Najmabadi_

2020 Fall (4 Credits)  

**Schedule:**  

W 1245 PM - 0245 PM

**Instructor Permissions:**  

Instructor  

**Enrollment Cap:** 15

This course begins with feminist critical engagements with other theories and practices, including Marxism, psychoanalysis, and Foucault. It will then move on to debates and discussions within feminism, as well as intersections of feminist theory with other theories including sexualities studies, post-colonial/trans-national studies, transgender studies. One of the major concerns of the course is the relationship between feminism, theory, and politics. Throughout the course, we will discuss the contemporaneous movements that intersected with emergence of these theoretical concerns.

**Course Notes:**  

Synchronous attendance is required; class meetings will not be recorded.

This course fulfills the theory requirement for the undergraduate concentration in Studies of Women, Gender, and Sexuality.

Psychology of the Gendered Body (205489)

_Nicole Noll_
Our perceptions of gender—our own and others’—powerfully shape our embodied experiences and behaviors. This course examines the embodiment of gender via the lens of psychological science. We will begin by exploring recent research related to gender and the body, and then study the underlying psychological mechanisms that influence our self-perceptions about gender. Our disciplinary foundation in psychological science will allow us to complicate current understandings of gender and embodiment by considering factors such as sex, race, sexuality, experience, intention, and awareness.

Course Notes: Synchronous attendance required. Class meetings will not be recorded.

Women, Gender & Sexuality 1219

Domestic Witness: "At Home" for Better or Worse (216398)

Phyllis Thompson

2020 Fall (4 Credits) Schedule: W 0300 PM - 0515 PM

Instructor Permissions: Instructor Enrollment Cap: 24

In the spring of 2020 many Americans were sent home by the state, to shelter in place and learn new ways of working "safely". Others were deemed "essential workers" and forced to labor under conditions of risk. Some faced homelessness while others fled to second homes. This collision of work and home, public and private, exposed multiple fault lines across the axes of race, gender, class, and sexuality. Our current moment is rooted in a long history in which the home becomes a charged site for racialized, classed, and gendered performances of cleaning, cooking, childcare, and schooling. Topics to include: the division of labor, domestic workers, queer and feminist revisions of home, clutter, homelessness, food and nutrition, home makeovers, and efficiency.

Course Notes: Weekly lecture plus an additional one hour section to be arranged.

Synchronous attendance required. Class meetings will not be recorded.

Women, Gender & Sexuality 1225

Leaning In, Hooking Up: Visions of Feminism and Femininity in the 21st Century (159887)
Phyllis Thompson
2021 Spring (4 Credits) Schedule: W 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 60

What does it mean to "do" feminism, or to "be" a feminist in the 21st-century United States? What can we make of the dominant social expectations for a woman's life? This course explores contemporary ideals of feminine success, including their physical, familial, professional, and political manifestations. We will engage with highly-contested topics—including sexual violence and Title 9; work-life balance; the imperatives of self-care and presentation; and new models for sexuality, reproduction, family, motherhood, and domestic life—using the tools of theory and cultural studies to interrogate their framing within popular discourse. Throughout, we will critique ideological formations of gender, particularly as bounded by race, class, and sexuality.

Course Notes: Weekly lecture plus an additional one hour section to be arranged.
Synchronous attendance required. Class meetings will not be recorded.

A Voice of One's Own: Creative Writing in Women, Gender, and Sexuality (108569)

Linda Schlossberg
2021 Spring (4 Credits) Schedule: T 1245 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 12

How does one balance the demands of "politics" with the subtleties of "artistry?" In this course, we'll write and analyze short stories, paying close attention to key writing concepts such as characterization, voice, point of view, dialogue, and setting, while also investigating thematic issues related to women, gender, and sexuality studies. In addition, we'll read secondary readings by authors such as Audre Lorde, Dorothy Allison, and Adrienne Rich that illuminate the ways in which issues of power, agency, and voice have emerged as key themes in feminist writing. Frequent writing assignments, including written evaluations of peers' stories.

Course Notes: Synchronous attendance required. Class meetings will not be recorded.

Gender and Sexuality in Asian-American Writing and Film (110080)

Rani Neutill

2021 Spring (4 Credits)  
Schedule: R 0300 PM - 0545 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 15  

This course examines works across a range of genres by Asian-American writers, focusing on the intersection of race, gender formation, and sexuality. We will put conceptions of feminism, queerness, and LGBT identity in conversation with ideas about ethnicity, citizenship, power, activism, art, and politics. Selections from film, memoir, novels, and short stories, with an eye to thinking critically about genre, representation, and collective histories. Texts to include Nicole Chung's *All You Can Ever Know*, Deepa Mehta's *Fire*, R. Zamora Linmark's *Rolling the R's*, Ruth Ozeki's *A Tale for the Time Being*, Rakesh Satyal's *Blue Boy*, Kai Cheng Thom's *Fierce Femmes and Notorious Liars: A Dangerous Trans Girls Confabulous Memoir*, Ocean Vuong's *On Earth We're Briefly Gorgeous*, and Alice Wu's *The Half of It*.

Course Notes: Synchronous attendance is required; class meetings will not be recorded.

Women, Gender & Sexuality 1274

Gender, Race, and Poverty in the United States (207786)

Marya Mtshali

2021 Spring (4 Credits)  
Schedule: T 0300 PM - 0530 PM  
Instructor Permissions: Instructor  
Enrollment Cap: n/a  

This course investigates the realities of poverty through an intersectional lens, meaning that we will consider the simultaneous impact of race, gender, sexuality (and other identities) on economic insecurity. In what ways are conversations about poverty and its causes infused with assumptions and stereotypes related to gender, race, and sexuality? We hear so much in the media about what causes poverty – what is reality and what is myth? How do these myths operate to reinforce and sustain economic inequality? Who and what gets left out of the conversation about poverty? Topics in the course include historical understandings of poverty; intergenerational class mobility; depictions of poverty in pop culture; and bringing attention to populations that often get left out of mainstream conversations about poverty.

Course Notes: Weekly lecture plus an additional one hour section to be arranged.
Women, Gender & Sexuality 1278

Interracial Intimacy: Sex, Race, and Romance in the U.S. (215756)

Marya Mtshali

2020 Fall (4 Credits)  

Instructor Permissions: Instructor  

Enrollment Cap: 24

Schedule: T 0300 PM - 0530 PM

What assumptions about race and sex are embedded in the term "interracial," and why are different types of interracial relationships viewed differently? How did White fears of relationships between Black men and White women influence the creation of the Ku Klux Klan? How did the story of Pocahontas influence the development of a settler colonial state? This course investigates the significance of interracial intimate relations throughout United States history and through the lens of race, class, gender, and sexual orientation. Although interracial intimate relations (consensual and non-consensual) predate the nation's founding, they have been considered taboo throughout most of American history. From Sally Hemings and Thomas Jefferson to Meghan Markle and Prince Harry, we will analyze how social perceptions of these relationships shift over time, as well as the economic and legal implications of interracial intimacy in the construction of the U.S. as a nation-state.

Course Notes: Weekly lecture plus an additional one hour section to be arranged.

interact with the lives of transgender people, especially those at the intersection of multiple axes of oppression?

This seminar will discuss contemporary cases involving transgender rights, as well as historical cases where the rights of transgender people were directly or indirectly contested. Readings will incorporate case law, sociological perspectives, critical race studies, feminist theory, and direct first-person narratives. By looking at law through the lens of transgender experiences, the class will critique legal assumptions about gender and reflect upon how law as a whole could be made less cis-normative. No prior legal experience or education is required.

Course Notes: Synchronous attendance required. Class meetings will not be recorded.

Friendship as Way of Life (212892)

Afsaneh Najmabadi

2021 Spring (4 Credits) Schedule: W 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This course will begin with Foucault's essay, "Friendship as a Way of Life." It will discuss the contemporary context of new engagements with and interests in friendship. We will then look at differing concepts and practices of friendship, and their work in shaping social sentiments and political affects in Euro-American context. Readings will include Plato, Montaigne, Bray, Marcus, Foucault, and Miller.

Course Notes: Synchronous attendance required. Class meetings will not be recorded.

Topics in Advanced Performance Theory: Gender and Sexuality (126954)

Robin Bernstein

Debra Levine
In this seminar, we will listen to and participate in current conversations in Performance Theory about gender and sexuality, especially as both these categories intersect with race. Topics include racialized and gendered structures of feeling; queer transnational social histories; technosexuality and mutation; and minor keys of Black unruliness and fugitivity. Reading includes works by José Esteban Muñoz, Paul Preciado, Saidiya Hartman, and Kareem Khubchandani. This is an advanced course intended for graduate students and upper-level undergraduates.

Course Notes: Note: This course may count for the WGS Theory foundation requirement or the 1400 level requirement, but not both.

Synchronous attendance required. Class meetings will not be recorded.

This course is co-taught with Debra Levine.

Luxury and Commodity Pleasures: Histories of Gender, Sex, and Racial Capitalism (216397)

Bradley Craig

This upper-level seminar explores the relationship between the gendered history of luxury—as commodity, aesthetic, and affect—and the history of racial capitalism from slavery to the hip-hop era. Many scholars have increasingly drawn attention to the phenomenon of racial capitalism, or the ways that slavery and anti-black racism were central to the emergence of the modern global economy, while others have interrogated the feminized, sensual, and exotic pleasures of luxury consumption. This course asks what we might learn from thinking about the history of gendered consumer cultures alongside the history and afterlives of slavery, in which black people seem to figure most persistently through the categories of labor and (re)production. This course instead contemplates the relationship between race, gender, and consumption, identifying the particularly fraught and contested entanglements of blackness and luxury as a constituent element of modern racial capitalism. We will consider how notions of taste, refinement, leisure, style, pleasure, and beauty have shaped and been shaped by blackness globally through representation, performance, fashion, and material and visual culture. Focusing on contested forms of conspicuous consumption during and after the period of slavery, we will interrogate the politics and moral economy of consumer culture through readings that consider black people as both discerning consumers of luxuries and other goods, and also as consumed by processes of commodification and objectification that produce racial and gendered hierarchies.

Course Notes: Synchronous attendance required. Class meetings will not be recorded.
Women, Gender & Sexuality 2000

Live Theory (and Practice): A Graduate Proseminar in WGS Studies (122276)

Alice Jardine

2021 Spring (4 Credits)

Schedule: T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This WGS Graduate Proseminar will emphasize in-depth, lively conversations with WGS faculty about the interdisciplinary innovations of WGS Studies today, with singular attention to current debates in feminist and queer theories and practices. Each week, one member of the WGS faculty will guide the seminar in wide-ranging conversation about their own intellectual formation, about their own field of expertise, and about where and how their own writing fits into the larger intellectual itinerary of WGS Studies. Discussions focused on the intellectual history of WGS Studies as well as on matters of writing, teaching, and professional development will frame the course. Visiting faculty members may include Robin Bernstein, Michael Bronski, Caroline Light, Afsaneh Najmabadi, Sarah Richardson, and Linda Schlossberg.

Course Notes: Open to advanced undergraduates and to graduate students from all schools and disciplines.

Is required for the WGS graduate secondary field.

Synchronous attendance is required. This course will not be recorded.

Women, Gender & Sexuality 3010A
Supervised Reading and Research-GenderSci Lab. Part one of a two-part series. (213359)

Sarah Richardson

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

The GenderSci Lab supports graduate students working at the intersection of the sciences and gender studies. The lab offers interdisciplinary training in theories and methods for the critical intersectional study of sex/gender in biology, medicine, public health, and the social sciences. Students participate in collaborative research, contribute to peer-reviewed publications, and engage in public outreach.

Course Notes: Contact the WGS Director of Graduate Studies for application information. Approval is required prior to registration.

The GenderSci Lab is a year-long commitment. Students are expected to enroll in 3010a and 3010b in the same academic year.
