**Economics 1052**

Game Theory and Economic Applications (111817)

*Shengwu Li*

2021 Spring (4 Credits)  

**Schedule:** TR 0130 PM - 0245 PM

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

Game theory is a mathematical method for analyzing strategic situations. It deals with situations in which multiple people must make interdependent decisions, such as chess, poker, bargaining, oligopoly pricing, and warfare. Topics include strategic-form and extensive-form games, rationalizability, Nash equilibrium, and subgame-perfect equilibrium. We will study applications such as long-term cooperation, auctions, mechanism design, and division of treasure between pirates.

**Course Notes:** Students may not take both Economics 1051 and Economics 1052 for credit.

**Recommended Prep:** The only formal prerequisite for this course is Mathematics 21a. Students should have a strong grasp of calculus, basic probability theory, and some exposure to proofs. No prior knowledge of game theory is necessary.

**Economics 1057**

Game Theory with Applications to Social Behavior (203555)

*Erez Yoeli*  

*Moshe Hoffman*
Game theory is the formal toolkit for analyzing situations in which payoffs depend not only on your actions (say, which TV series you watch), but also others’ (whether your friends are watching the same show). You’ve probably already heard of some famous games, like the prisoners’ dilemma and the costly signaling game. We’ll teach you to solve games like these, and more, using tools like Nash equilibrium, subgame perfection, Bayesian Nash equilibrium, and the one-shot deviation principle.

Game theory has traditionally been applied to understand the behavior of highly deliberate agents, like heads of state, firms in an oligopoly, or participants in an auction. However, we’ll apply game theory to social behavior typically considered the realm of psychologists and philosophers, such as why we speak indirectly, in what sense beauty is socially constructed, and where our moral intuitions come from.

Each week, students are expected to complete a problem set, to read 2-3 academic papers, and to complete a 1-2 page response to short essay questions (‘prompts’) on these readings. All assignments can be completed in groups of two. Tutorials are not required but are highly recommended for students without a substantial background, especially in math. There will also be a final exam.

**Economics 1078**

Analyzing Education Policy (204433)

Michela Carlana

2020 Fall (4 Credits) Schedule: M 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: 10

This course examines a variety of education policy issues in the United States and abroad, with an emphasis on rigorous econometric evaluation of such policies. By the course’s end, students should have an analytical framework that allows them to think clearly about the impacts of education policies, as well as be able to distinguish good research from bad. The first half of the course reviews important empirical techniques in the context of broad questions, such as whether people make educational decisions by weighing benefits and costs and whether education improves students’ long-term outcomes. The second half of the course centers on debates in which teams of students will argue for a given policy proposition and I will argue against it, with the aim of sharpening everyone’s arguments on the basis of existing empirical evidence. Prerequisites: Familiarity with regression analysis and causal inference, or permission of the instructor.

1.7 billion adults around the world do not have access to a financial account. Why has it been so challenging to reach this population? What financial product innovations have worked for banking poor customers? How do the underbanked make do without access to the formal financial market? This course investigates the functioning of the financial market for low income populations, with a focus on developing countries. Example topics include: 1) the link between financial market development and economic growth; 2) financial literacy and consumer protection; 3) savings; 4) credit; 5) insurance; 6) mobile banking and digital payments. The course will cover relevant economic principles, business case studies, product design experiments, and research papers.

Course Notes: Ec 1088 offers an optional writing requirement. Students writing the final project without a partner will satisfy the concentration writing requirement.

Recommended Prep: Ec 10A

Economics 1123

Introduction to Econometrics (123033)

Gregory Bruich

2021 Spring (4 Credits) Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: None Enrollment Cap: n/a

An introduction to multiple regression techniques with focus on economic applications. Discusses extensions to discrete response, panel data, and time series models, as well as issues such as omitted variables, missing data, sample selection, randomized and quasi-experiments, and instrumental variables. Also develops the ability to apply econometric and statistical methods using computer packages.

Course Notes: Students may take both Economics 1123 and Statistics 139 for credit. However, Statistics 139 will not count as the econometrics requirement for the economics concentration. Only one course can count towards EC credit; either Economics 1123 or Economics 1126. Both courses can count towards college credit regardless of the order they are taken.

Recommended Prep: Statistics 100 and 104.

Quantitative Methods in Economics (113637)

*Elie Tamer*

2020 Fall (4 Credits)  

**Schedule:** MW 1030 AM - 1145 AM  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

Topics include conditional expectations and its linear approximation; best linear predictors; omitted variable bias; panel data methods and the role of unobserved heterogeneity; instrumental variables and the role of randomization; various approaches to inference on causal relations.
Course Notes: Only one course can count towards EC credit; either Economics 1123 or Economics 1126. Both courses can count towards college credit regardless of the order they are taken.

Students who fulfill the econometrics requirement with Economics 1126 and who intend to pursue Honors should note that the Honors exam assumes knowledge of the material covered in Economics 1123.

Recommended Prep: Math 18, 21a, Applied Math 21a.

Economics 1410

Public Economics: Designing Government Policy (117818)

Stefanie Stantcheva

Stan Veuger

2020 Fall (4 Credits)

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course analyzes what role the government plays and should play in a market economy, especially those policies that work through taxes and government spending. It covers topics such as tax and welfare policy, unemployment insurance, social security, environmental protection, and state and local policy. The course emphasizes recent empirical research on policy issues and will teach students how to conduct such studies.

The first half of the course, taught by Professor Stantcheva, will cover the basic principles of public economics. These principles will be used to shed light on current questions and debates on tax policy, the provision of public goods, and social insurance.

The second half of the course, taught by Professor Veuger, will highlight recent empirical research on business taxation, the regulatory state, political economy, and multilevel government. In this part of course we will also see how the theoretical and empirical approaches covered in the course can be and have been used to inform and assess the economic policy response to the COVID-19 crisis, in particular in the United States and Europe.

Course Notes: Students should have some knowledge of basic calculus and statistics, but there is no formal mathematics prerequisite. Offered jointly with the Kennedy School as SUP-125. This course offers an optional writing requirement which if completed will satisfy the concentration writing requirement.
Economics 1415
Analytic Frameworks for Policy (107613)
Richard Zeckhauser
2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 3
Enrollment Cap: 3
This course develops abilities in using analytic frameworks in the formulation and assessment of public policies. It considers a variety of analytic techniques, particularly those directed toward uncertainty and interactive decision problems. It emphasizes the application of techniques to policy analysis, not formal derivations. Students encounter case studies, methodological readings, modeling of current events, the computer, a final exam, and challenging problem sets.

Course Notes: Jointly offered with the Kennedy School as API-302.
Class Notes: Course will take place at HKS in L-230.

Recommended Prep: Economics 1011a or permission of instructor.

American Economic Policy (123003)
Lawrence H. Summers
Jeffrey Liebman
2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a
Enrollment Cap: n/a
Analyzes major issues in American economic policy including taxation, Social Security, health care reform, budget policy, monetary and fiscal policy, and exchange rate management. Current economic issues and policy options discussed.

Course Notes: Offered jointly with the Kennedy School as API-126. This course offers an optional writing requirement which if completed will satisfy the
The aim of the course is to give students familiarity with a broad range of European policy issues: integration of markets (for goods, services, and labor), monetary union (ECB) and its consequences for fiscal policy, financial sector regulation as well as supervision. It is offered for students who would like to employ the tools they have learned in principles of economics and introductory micro and macro courses on real world cases. This implies to write and present a paper (mandatory writing requirement).

Course Notes: Writing requirement: A research paper is required. This course meets the concentration writing requirement.

Recommended Prep: Ec 10a and Ec 10b.

---

## Economics 1450

The Political Economy of Religion (107425)

*Robert Barro*

2020 Fall (4 Credits)  
Schedule: W 0300 PM - 0545 PM  
Enrollment Cap: n/a

The study of the political economy of religion is grounded in two intellectual strands of thought developed in economics and sociology. The economic approach views religious competition and church-state relations as market phenomena. The absence of state religion allows for competition, thereby creating an environment for a plurality of religious faiths in society. The continual subdividing of religion into sects ensures an open and competitive market whereby no one single religion dominates. The sociological approach focuses on religious beliefs and activities as rational choices as well as cultural phenomena. **Religious beliefs are a part of cultural traits, values, and organizations which**
contribute to economic outcomes. As in commercial activity, people respond to religious costs and benefits in a predictable, observable manner. Religious beliefs that promote hard work, thrift, and honesty can be found across the world’s major religions. The key question is: How does a society promote these values and in what circumstances does it, intentionally or unintentionally, discard them? People choose a religion (the theory of sects) and the degree to which they participate and believe (if at all). In this course we discuss a wide range of topics—religious competition, secularization (and its varieties), pluralism and tolerance, the structure of religious organizations, religion and individual behavior—that highlight the contributions and areas of further research in the field of political economy of religion.

Economics of Health Care Policy (122492)

*Joseph P. Newhouse*

2020 Fall (4 Credits)  

**Schedule:** MW 0845 AM - 1000 AM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 10

Policy issues related to the following: the demand for medical care services, especially as a function of insurance; the demand for insurance and issues of selection; reimbursement policies of Medicare and other payers toward health plans, hospitals, and physicians; effects of health maintenance organizations and managed care; and malpractice and tort reform. Focus on federal policy, although state and local perspectives will receive some attention.

**Course Notes:** Students may not take both Economics 1460 and Quantitative Reasoning 24: Health Economics and Policy for credit. Offered jointly with the Kennedy School as SUP-572.

**Recommended Prep:** Economics 1010a or 1011a. A statistics course is highly desirable.

**Economics 1499**

Low Interest Rates, Secular Stagnation and Macroeconomic Policy (217408)

*Lawrence H. Summers*
With real interest rates negative for nearly a decade and nominal interest rates close to zero throughout the industrial world, we are in a new era for macroeconomic policy making. This seminar course will focus on the reasons for low real rates, their impact on growth, inflation, inequality and financial stability, and their implications for macroeconomic policy.

The focus of the class will be on student research papers. Students will be expected to choose a topic related to the course theme and write a 25- to 30-page original research papers developing, applying and testing relevant economic theory. Students will work closely with one of the course instructors and an economics PhD student on their papers.

Examples of topic areas for papers might include: The role of risk premiums vs. savings-investment gaps in explaining interest rate fluctuations; the influence of social insurance on aggregate demand; Ricardian equivalence and the impact of fiscal policy in raising long run demand; the implications of low rates for target returns on institutional portfolios, financial stability, and creative destruction; saving gluts and current account surpluses; the risks of destabilizing deflation; and lessons from the Japanese experience.

Only students with significant exposure to advanced undergraduate courses in economics and statistical and quantitative work should consider this class. This class is potentially open to seniors writing theses on this topic. Admission is by permission of the instructors; Charles W. Eliot University Professor Lawrence Summers and Sir Paul Tucker, the Former Deputy Governor of the Bank of England.

Course Notes: Interested students should send a transcript and a 250-word statement of why they want to take the class to: Lhs@lawrencesummers.com.

Class Notes: This course will take place from 12:00-2:00pm.

International Monetary Economics (111378)

**Richard Cooper**

2020 Fall (4 Credits)  
Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: None  
Enrollment Cap: n/a

This is an intermediate level international finance and macroeconomics course that uses a mix of theoretical, empirical and policy frameworks to analyze topical problems in international finance. The topics include exchange rate determination, currency interventions, monetary policy coordination, capital flows and currency crises.

Course Notes: Writing requirement: A research paper is required. This course meets the concentration writing requirement. May not be taken for credit with Economics 1531.

Recommended Prep: Economics 1010b or 1011b.
Economics 1535
International Trade and Investment (111749)
Pol Antras
2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a
Analyze the causes and consequences of international trade and investment. Focuses on the interplay of economic theory and empirical descriptions of foreign trade and direct investment patterns.
Recommended Prep: Economics 1010a1, 1010a2, or 1011a.

Economics 1545
International Financial and Macroeconomic Policy (111477)
Kenneth Rogoff
2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: n/a
Advanced theoretical and empirical analysis of contemporary international macroeconomic policy issues in both industrialized and developing economies. Topics include exchange rates, international capital flows, debt crises, growth, and policy coordination.
Class Notes: Potentially open to some modification with final course time agreed after enrollment has stabilized.
Requirements: Prerequisite: Econ 1010b OR Econ 1011b
Economics 1550
International Macroeconomics (116356)

Jeffrey Frankel

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 20

This course deals with the macroeconomics of open economies. Topics include the foreign exchange market, devaluation, and import and export elasticities; the simultaneous determination of the trade balance, national income, the balance of payments, money flows and price levels; capital flows in internationally integrated financial markets; monetary and fiscal policy in open economies, including at the Zero Lower Bound for interest rates; crises; international macroeconomic interdependence and policy coordination; supply relationships, inflation, and nominal anchors for monetary policy; currency unions; the determination of exchange rates in international money markets; and international portfolio diversification.

Course Notes: Offered jointly with HKS as BGP-620.
Recommended Prep: Economics 1010a (or 1011a) and 1010b (or 1011b).

Economics 1644
Market Power in the New Economy (217793)
Myrto Kalouptsidi
2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 50
This course studies firms, markets and competition, in the context of today’s (globalized) world. Nowadays, in the majority of markets, a handful of firms interact strategically and compete in numerous dimensions, including prices, products offered, advertising and investment. We will use formal models in order to address questions like, Why are markets organized the way they are? How does market organization affect firm behavior, such as firm production or pricing? How does the behavior of firms in turn affect the market structure? How does government policy shape firm behavior and market structure? What is the impact on welfare? Through the use of both theory and data, we will attempt to answer these questions.

The course will proceed in three modules. We will first tackle decentralized markets; i.e. markets where many small firms compete in an ad hoc fashion (e.g. taxis, oceanic shipping, real estate). A recent and growing phenomenon in this setup is the emergence of platforms, such as Uber and Lyft, Uber Freight, Airbnb, etc. We will discuss their impact on markets and societal welfare.

The second module, will introduce key concepts of the field of Industrial Organization in order to study oligopolistic markets. Through the use of models (mainly game theory) but also empirical analysis, we will explore the strategic interactions between firms and the impact of market power on society. We will study collusion, product differentiation, mergers and vertical relations (supply chains).

The third and final module of the class will study market power in global markets. In a strong recent trend, governments around the world are engaging in industrial policy (e.g. Made in China 2025). What are the rationales behind these initiatives? Are they effective? What is their impact on both domestic and global societal welfare? In this part of the course we will focus on the role of governments in shaping global competition.

Corporate Finance (117237)

Daniel Bergstresser

2021 Spring (4 Credits) Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

Introduction to corporate finance, including capital budgeting, capital structure of firms, dividend policy, corporate governance, and takeovers. Prerequisites for this course include Economics 1010a1, 1010a2, or 1011a, Mathematics 18, and Statistics 100.

Class Notes: course will be taught by visiting Professor Dan Bergstresser.

Recommended Prep: Economics 1010a1, 1010a2, or 1011a, Mathematics 18, and Statistics
Economics 1746 Section: 01

Financial Crises and Recessions of the 21st Century (207618)

Karen Dynan

2021 Spring (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

This course will explore the dramatic financial and macroeconomic developments that the United States has experienced over the last two decades. We will look at research on what factors precipitated the boom and bust in the housing market in the early 2000s and how the resulting mortgage crisis rippled through the global financial system and ultimately generated the most severe economic downturn since the Great Depression. We will analyze the policies put in place to stabilize the financial system, limit the economic fallout, and reduce the likelihood of future financial crises. The course will also examine the response of the financial system and the economy to the onset of the COVID-19 pandemic, with particular attention to how these developments and the appropriate policy responses compare with past episodes.

Recommended Prep: Ec1010b, Econ 1011b, or permission of the instructor

Economics 1800

The Economics of Cities (111292)

Edward Glaeser
Denise DiPasquale

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM
Addresses the central questions of why cities exist, what roles will cities continue to play in the economy, and what determines the rise and fall of cities. Special attention is paid to cities and information, and social problems in cities.

Recommended Prep: Social Analysis 10 and Statistics 100.

Economics 1818

Economics of Discontinuous Change (112195)

Richard Freeman

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Explores discontinuous changes in the economic position of groups and countries and presents mathematical and computer simulation models designed to illuminate the theme that economic and social lives are changed by sudden sharp shocks that generate positive feedback loops rather than the normal workings of markets that equilibrate through negative feedbacks. Will include effects of the Covid19 pandemic on the economy, Great Depression and 2008 collapse of Wall Street, growth/decline of trade unions which occurs in spurts, and such patterns as segregation of groups, power laws in income inequality growth/decline in social pathologies in neighborhoods, and Malthusian concerns about the environment. Models include nonlinear simulations, neural networks, finite automata, evolutionary stable strategies, and agent-based simulations with attention on getting evidence on key parameters from diverse empirics, from big data to case studies.

Course Notes: Key requirement is an independent research paper. Professor and TF will provide guidance on topic, help in obtaining data, information from firms, etc. This course meets the concentration writing requirement, if the paper is a substantive, solo-authored, original research work (not a literature review). Students should have some mathematical background, but there is no prerequisite.

Class Notes: SCHEDULING NOTE: Course will also include a section-discussion mtg every week. Post-enrollment, days & times of course mtg & section mtg can be adjusted to later afternoon, or early evening, to accommodate student time zones.

Economics 1936

Keynes (107388)

Stephen Marglin

2020 Fall (4 Credits) 

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None 

Enrollment Cap: n/a

This course explores the birth, death, and resurrection of The General Theory of Employment, Interest and Money from the Great Depression (1929-1939) to the Great Recession (2008-?). A major goal is to lay out a coherent argument that, for all its theoretical innovation, The General Theory did not deliver: the argument why a market system, even an idealized system with all of the warts removed, may fail to provide jobs for willing workers. In the process we will examine the orthodoxy that Keynes attacked and that resurfaced in the 1960s and 70s; the key concepts underlying the models implicit in The General Theory; and the attempts of the Keynesian mainstream to make peace with both Keynes and orthodoxy. We will also explore the applicability of The General Theory to the long run. A final section will view the present economic difficulties through a Keynesian lens.

Recommended Prep: Economics 1010b or 1011b, or permission of instructor; a year of college calculus allowing students to understand mathematical notation and concepts (derivatives, maximization, etc.) even though mathematics will be used very sparingly.

Economics 2000

Transitioning to Research (113716)

Jeffrey A. Miron

Natalia Emanuel

2020 Fall (4 Credits) 

Schedule: M 1030 AM - 1145 AM

Instructor Permissions: None 

Enrollment Cap: n/a

This course helps launch graduate students who are transitioning from classes to research. The course has four main goals: developing research-relevant skills and routines; establishing domain-specific knowledge that provides the context for your research agenda; building experience presenting research at all stages of development; and facilitating production of the Ec 3000 paper.

Recommended Prep: Students should have completed enough coursework that they are turning their attention to research. The course is best suited to rising or newly minted G3s, but anyone is welcome. Even those students who have begun research successfully will benefit from this course.

Microeconomic Theory I (112942)

Rahul Deb

2020 Fall (4 Credits) Schedule: MW 0845 AM - 1000 AM

Instructor Permissions: Instructor Enrollment Cap: 52

A comprehensive course in economic theory designed for doctoral students in all parts of the university. Topics include consumption, production, behavior toward risk, markets, and general equilibrium theory. Also looks at applications to policy analysis, business decisions, industrial organization, finance, and the legal system. Undergraduates with appropriate background are welcome, subject to the instructor's approval.

Recommended Prep: Multivariate calculus and one course in probability theory. Thorough background in microeconomic theory at the intermediate level.

Economics 2035

Psychology and Economic Theory (156371)

Matthew Rabin

This course explores ways that psychological research indicating systematic departures from classical economic assumptions can be translated into formal models that can be incorporated into economics. Topics include ways utility theory can be improved—such as incorporating reference dependence, news utility, social preferences, self image, and other belief-based tastes—and ways we can relax assumptions of perfect rationality—such as incorporating focusing effects, limited attention, biased prediction of future tastes, present-biased preferences, biases in probabilistic judgment, and errors in social inference. The course will emphasize (a) careful interpretation and production of new evidence on relevant departures,(b) formalizing this evidence into models that can, with discipline and rigor, generate sharp predictions using traditional economic approaches, and (c) exploring economic implications of those models presented. Although we will primarily emphasize (b), the course is meant to be useful to students whose interests lie anywhere in this spectrum, under the premise that all such research will be improved by a greater appreciation of the full spectrum. The course is intended for PhD students in the Business Economics and Economics programs and others who have a solid background in microeconomic theory at the level of introductory PhD courses in these programs. While obviously appropriate to those wishing to specialize in "behavioral economics", the course is also designed for those interested in doing research in particular fields of economics. And while the course centers on theoretical models (learning and evaluation will center around solving formal problem sets), the theory is focused towards its empirical implementability and economic relevance, so that the course is also designed for those interested in theory-influenced empirical research.

Course Notes: This course is cross listed with HBS as HBSDOC 4155.
**Economics 2040**

Experimental Economics (123849)

*Benjamin Enke*

2020 Fall (4 Credits)  
**Schedule:**  
F 0900 AM - 1145 AM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 48

This course provides an introduction to experimental methods and their applications in economics. We will focus on (i) the use of lab experiments in establishing causal effects, testing models, and illuminating mechanisms; (ii) field experiments in behavioral economics; and (ii) the measurement of preference parameters and behavioral traits in lab-in-the-field settings. Topics include bounded rationality, wishful thinking, moral values and social image concerns, gender, the measurement of preferences in lab and large-scale survey settings, and the explanatory power of behavioral traits for field behaviors. We will cover methodological topics including the relationship between experiments and theory, simple process-tracing techniques, internet experiments, and surveys. Students will become acquainted with the full process of designing an experiment, and class discussions will place heavy emphasis on the development of early-stage research ideas. The course is intended not just for those with an interest in behavioral and experimental economics per se, but also for those who wish to measure behavioral parameters in non-lab settings in applied work or to conduct field experiments.

**Course Notes:** Open to undergraduates with permission of the instructor.

Economics 2110 Section: 1

Econometrics I (120668)

Gregory Bruich

Economics 2110 and 2115 comprise a two-course sequence for first-year graduate students seeking training in econometric methods at a level that prepares them to conduct professional empirical research. Economics 2110 (fall) reviews probability and statistics, then covers the fundamentals of modern econometrics, with a focus on regression methods for causal inference in observational and experimental data. Prerequisites: undergraduate courses in probability and statistics, regression analysis, linear algebra, and multivariate calculus.
Course Notes: Enrollment limited to PhD candidates in economics, business economics, health policy, public policy, and political economy and government (PEG).

Recommended Prep: The two-course sequence is open only to qualified PhD students from HKS, HBS, GSE, and HSPH, but occasionally others may be admitted at the discretion of the instructor (if the instructor is convinced that such individuals can perform well and would not negatively affect the nature and pace of the course).

Econometric Methods II (205523)

*Will Dobbie*

2021 Spring (4 Credits)  
**Schedule:** TR 1230 PM - 0145 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Economics 2110 and 2115 comprise a two-course sequence for first-year graduate students seeking training in econometric methods at a level that prepares them to conduct professional empirical research. Economics 2115 (spring) covers topics (different methods) in current empirical research. Faculty members from across the university will teach modules each covering a different method of causal inference, including but not limited to instrumental variables, panel data methods, and regression discontinuity and kink designs. The course will emphasize a mixture of theory and application, with problem sets focused on the replication or extension of recent papers utilizing these methods.

**Course Notes:** This course is designed for PhD candidates in health policy, public policy, education policy, the Business School DBA program. Qualified undergraduates are also permitted to take the course with permission of the instructor.

**Recommended Prep:** Prerequisite: Economics 2110 or the equivalent.

**Additional Course Attributes:**

Section: 1

Principles of Econometrics (115026)

*Elie Tamer*

2020 Fall (4 Credits)  
**Schedule:** MW 1200 PM - 0115 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a
Linear predictor as approximation to conditional expectation function. Least-squares projection as sample counterpart. Splines. Omitted variable bias and panel data. Bayesian inference for parameters defined by moment conditions. Finite sample frequentist inference for the normal linear model. Statistical decision theory and dominating least squares with many predictor variables; applications to estimating fixed effects (teacher effects, place effects) using panel data. Asymptotic inference in the generalized method of moments framework. Likelihood inference using information measures to define best approximations within parametric models. Instrumental variable models and the role of random assignment; applications include models of demand and supply and the evaluation of treatment effects.

Course Notes: Enrollment is limited to PhD students in the Economics Department, Business Economics program, and PEG program. Other students wanting to enroll in the course should contact the instructor.

Recommended Prep: probability at the level of Statistics 110; linear algebra.

Econometric Methods (120662)

*Isaiah Andrews*

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

This course continues the first year sequence in econometrics and covers a variety of topics and ideas that are important for pursuing and interpreting empirical research in economics. The first half of the course covers core econometric approaches that are important for a wide range of applications, including identification analysis, asymptotic approximations, large sample theory for estimation and hypothesis testing, and the bootstrap. The second part of the course examines a range of complementary topics and new developments, including reasons why canonical econometric methods may be unreliable (such as model misspecification, identification failure, and the incidental parameters problem) and extensions of and alternatives to the traditional econometric paradigm (such as partial identification, Bayesian inference, nonparametrics, and machine learning). Economic applications will be discussed throughout. Enrollment limited.

Recommended Prep: Economics 2120 or equivalent.

Economics 2148

Topics in Econometrics: Optimization-Conscious Econometrics (110300)

Guillaume Pouliot

2020 Fall (4 Credits)  Schedule: TR 0300 PM - 0415 PM
Instructor Permissions: None  Enrollment Cap: n/a

Economics 2148 will study key optimization methods and concepts underpinning classical econometric estimators.

First, we study Markov Chain Monte Carlo methods and theory. Then, each optimization topic is studied through the lens of an econometric method. Linear programming is studied via quantile regression, numerical linear algebra is studied via partial identification in ordinary least-squares, integer programming is studied via exact sparse methods, and so on. We will be particularly interested in questions at the intersection of econometrics and optimization.

Modern research in econometrics often intersects with machine learning and big data questions. Likewise, while the overlap of econometrics with optimization and operations research has traditionally been limited, previously intractable large scale or combinatorially difficult econometrics problems are now being solved using modern optimization software and heuristics. This lays out a rich research agenda and opens up consequential new questions for econometricians. How can machine learning methods be used for econometric regression analysis and causal inference? How can modern optimization methods be applied to solve previously intractable econometric problems? What are the statistical consequences of changes made for numerical reasons? How does one do inference on the output of nonstandard optimization problems? At the heart of these new estimation and inference questions lies the need to design and understand estimators as the product of algorithms and optimization problem, not only the minimand...
and of objective functions.

Comparative Historical Economic Development (126819)

*Nathan Nunn*

2021 Spring (4 Credits) Schedule: F 0900 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

The course examines the historical origins of differences in the economic and social development of societies. Participants discuss recent research in the field and present their own work in progress.

Course Notes: This course is targeted to second-year Ph.D. students in economics. It is not open to undergraduate or Masters students. The course fulfills the distribution requirement.

History and Human Capital (124933)

*Lawrence Katz*

*Claudia Goldin*

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Explores a range of subjects concerning human capital, historically and comparatively. Topics include
fertility, mortality, health, immigration, women’s work, child labor, retirement, education, inequality, slavery, unionization, and governmental regulation of labor, all within the broader context of economic history.

Course Notes: Satisfies the graduate distribution requirement. Open to undergraduates on a limited basis with permission of instructor.

Behavioral Development Economics (160359)

_Gautam Rao_

2021 Spring (4 Credits)  

**Schedule:**  
TR 0300 PM - 0415 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 30

This graduate level course will focus on the intersection of two rapidly growing fields in economics - development economics, and behavioral economics. We will study applications of behavioral economics to development questions, and ask whether there is a special behavioral science of poverty and development. Methods covered will include field experiments, lab experiments, tests of theory and combining experiments with structural estimation.

Transportation and Development: Evidence and Quantitative Models (215901)

_Gabriel Kreindler_

2020 Fall (4 Credits)  

**Schedule:**  
TR 0900 AM - 1015 AM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

How does spatial mobility affect firms, migrants, commuters and job-seekers? What barriers hamper mobility at these different scales? What are the equilibrium implications of changes in travel costs, for example, due to infrastructure improvements? This course discusses recent research on the links between transportation and the economy, with a focus on developing countries. It focuses on the interplay between
empirical evidence and quantitative models, and students will gain hands-on experience with both. The first part of the course introduces the workhorse models and empirical tools, which we then apply to topics in infrastructure, migration, urban traffic congestion, and urban mobility and labor markets.

Economics 2355

Unleashing Novel Data at Scale (217485)

*Melissa Dell*

2021 Spring (4 Credits)  
**Schedule:**  WM 0130 PM - 0245 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

A vast number of important economic questions remain unanswered, in substantial part because the data required to examine them has traditionally been inaccessible. For example, much historical data remains trapped in hard copy. More broadly, information that could elucidate important questions is scattered throughout text, or contained in scans, photographs, videos, or audio files. This course will provide an introduction to deep learning-based methods and other data science tools that can process such sources on a massive scale.

We will examine natural language processing, with a particular focus on recent advances for creating and visualizing computable text measures that capture not just topics, but also sentiment and its polarization across sources. The course will also introduce deep learning-based methods for object detection and layout analysis, which can be used to extract complex structures from documents such as tables or newspapers. Active learning, which aims to optimally combine inputs from humans and deep learning to conserve tedious human labor, will receive particular emphasis. We will moreover discuss how to optimize character recognition using off-the-shelf solutions and how to design your own engine when existing tools fail. Efficiently harnessing the power of large-scale computing will receive emphasis throughout the course. We will combine the focus on methods with a discussion of papers that make particularly exemplary use of unique data sources, in order to build intuition for how such data can be located and processed. By introducing a range of methods to convert diverse information into computable data, we aim to increase the number of questions that will be feasible to research, as well as to make research agendas more robust to unforeseen data disruptions. The course is well suited to anyone with an interest in using observational data for applied research.

Economics 2410A

Macro-Finance: Rational and Behavioral (125372)

Xavier Gabaix

2020 Fall (4 Credits) Schedule: MW 0600 PM - 0715 PM

Instructor Permissions: None Enrollment Cap: n/a

1. Bounded rationality: we'll go over a behavioral version of basic microeconomics (consumer theory, Arrow Debreu), basic macroeconomics (real and monetary) and public economics.

2. Macroeconomics with heterogeneity: we'll study how microeconomic shocks can generate macro fluctuations; network models in macro-finance; models of the income distribution.
(3) Finance: we'll study unified macro-finance models. First, with perfect financial markets: we'll review unified models of stocks, bonds, options and exchange rates. Second, with imperfect financial markets: we'll study how this sheds light on financial crises and currency movements. Time permitting, we'll review some behavioral finance, merging all three themes.

The course is geared toward two types of students, and has accordingly two tracks, "behavioral" and "finance", with corresponding emphasis in the homework and exam.

Advanced Topics in Empirical Macroeconomics (207940)

_Gabriel Chodorow-Reich_

2021 Spring (4 Credits)  

**Schedule:**  
R 0300 PM - 0545 PM  

**Instructor Permissions:**  
Instructor  
Enrollment Cap: 30  

The course will explore topics in applied macroeconomics, with emphasis on the intersection of empirical analysis and theory. Topics may include monetary policy, fiscal policy, financial frictions, and labor markets. The course will present a variety of empirical methods, such as the narrative approach, VAR analysis, and the use of cross-sectional data in macroeconomics.

**Course Notes:**  
This will be a 6 week long course taught in the first half of the semester.

Political Economy of Non-Democracies (215796)

_David Yang_

2020 Fall (4 Credits)  

**Schedule:**  
TR 0130 PM - 0245 PM  

**Instructor Permissions:**  
Instructor  
Enrollment Cap: 30  

Non-democratic regimes have been the oldest and most common form of political governance. This course studies the forces of stability and forces of change in non-democratic regimes. Concerning the forces of stability, we will cover topics such as repression, hatred, state coercion, information control, corruption, co-optation, and political trust and norms. Concerning the forces of change, we will cover topics such as democratization, collective actions, conflict, nation building, reform and privatization, state capacity,
bureaucracy, and the role of institutions on economic development and innovation. We will explore these topics both theoretically and empirically. Students will be exposed to various workhorse models in political economy, as well as recent advances in empirical methods such as natural experiments, field experiments, lab experiments, lab-in-the-field experiments, and text analyses.

Public Economics and Fiscal Policy I (110660)

Nadarajan Chetty

Hunt Allcott

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

The course will focus on a range of topics in public economics including welfare estimation of tax and expenditure policies, including income and commodity taxation, public goods, education, and place-based policies. We will also discuss foundations for government intervention, including market failures such as externalities and asymmetric information. Throughout, the focus will be on using theoretical models to motivate empirical analyses to uncover the desirability of government intervention in the economy and to quantify the welfare impacts of such policies.
Class Notes: This course will be co-taught with visiting Professor Hunt Alcott.

Requirements: Prerequisite: (Economics 2010a AND Economics 2010b) OR (Economics 2020a AND Economics 2020b)

Theoretical and Empirical Perspective on Entrepreneurship: Economics and Finance (124076)

William Kerr
Josh Lerner
Shai Bernstein

2021 Spring (4 Credits)  Schedule:  W 0530 PM - 0830 PM
Instructor Permissions: None  Enrollment Cap: n/a

TEPE explores scholarly work from economics and finance disciplines regarding entrepreneurship—the formation and growth of new firms. While work on this topic dates back to Schumpeter and earlier, academic research regarding entrepreneurship has exploded over the last decade. There are two complementary doctoral classes, each taught every other year, with the Spring 2021 course focusing on the entrepreneurship research about corporate finance, including entrepreneurial finance and behavioral economics. The Spring 2022 course focuses on entrepreneurship and its relationship to economics fields like industrial organization, labor economics, and economic growth.

Course Notes: Offered jointly with the Business School as 4350.

Economics 2727
Empirical Methods in Financial Economics (119971)
Samuel Hanson
Adi Sunderam

2021 Spring (4 Credits) Schedule: M 0300 PM - 0545 PM
Instructor Permissions: None Enrollment Cap: n/a

Examine empirical research in corporate finance. Covers empirical research methodology, financial institutions, and financial policy. Major emphasis is on how to do well-executed and persuasive research in corporate finance.

Course Notes: Structured to minimize overlap with Economics 2725. Seminar format; students write referee reports and a research paper. Offered jointly with the Business School as 4220.

**Economics 2880**

Economics of Science (124078)

*Richard Freeman*

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 40  
Schedule: R 0300 PM - 0500 PM

Analyzes economic issues regarding the role of science and RD in the economy and in the deployment and productivity of scientists, engineers, and highly skilled technical workers. Topics include: wage levels/employment prospects; stipend policy, education/recruitment, student unionization/post-doc organization, career choices/trajectories, with reference to women; scientific competition/collaboration, and affects of the Covid19 pandemic on the economics of science.

Course Notes: Key requirement is graduate-level research paper, potentially using big data set on scholarly paper, R&D spending, patents, etc.

Class Notes: Scheduling note: post-enrollment, day & time can be adjusted to later afternoon, or early evening, to accommodate student time zones. Total 3 hours of class time per week, divided into 2-3 sessions and discussions via zoom (depending on class size).

Recommended Prep: Attendance at the Economics of Science & Engineering Seminar is strongly suggested.

**Economics 2901**

Early-Stage Research and Discussions on Behavioral and Experimental Economics (210858)

*Gautam Rao*

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 30  
Schedule: TBD
This working group is intended for students doing research in empirical behavioral economics. Each week, two students will discuss early-stage ideas or in-progress work and receive feedback from other participants. Enrollment is by permission of the instructor, and restricted to PhD students. Pre-requisites include having completed field courses in behavioral economics (typically at least two of Ec 2030, 2035, 2040, 2338).

Research in Health Economics (115494)

*Joseph P. Newhouse*

2020 Fall (4 Credits)  

*Schedule:*  
T 0800 AM - 0930 AM

*Instructor Permissions:* Instructor  

*Enrollment Cap:* n/a

Participants discuss recent research in health economics. Course may also include presentation of original research by participants. Open to doctoral students only.
Economics 3116A
Seminar in Environmental Economics and Policy (113829)

Robert Stavins
James H. Stock

2020 Fall (2 Credits)       Schedule: W 0430 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 10

Selected topics in environmental and resource economics. Emphasizes theoretical models, quantitative empirical analysis, and public policy applications. Includes invited outside speakers.

Course Notes: Primarily for graduate students in economics or related fields with environmental interests. Offered jointly with the Kennedy School as API-905Y.

Recommended Prep: Graduate-level course in microeconomic theory.

Engineering Sciences 20R
Science & Engineering for Managing COVID Seminar (216462)
Evelyn Hu
Michael P. Brenner
John Doyle
2020 Fall (4 Credits) Schedule: M 1200 PM - 0200 PM
Instructor Permissions: Instructor Enrollment Cap: 14
Modules in the course will explore the nature of pandemics, COVID-19, the critical elements in modeling, analyzing and mitigating the spread of COVID-19.

Class Notes: The 14 students enrolled in ENG-SCI 20r will meet collectively for two hours a week with a companion class, FRSEMR 52I, of 14 first-year students. For team projects, there will be 7 teams of 4 people, with each team having two first-year students and two upperclass students.

Recommended Prep: None needed: a book on the 1918 Flu will be assigned as a pre-read.

Engineering Sciences 22
Product and Experience Design for Desirability (109374)
B. Ames Altringer
2021 Spring (4 Credits) Schedule: TR 0345 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: n/a
Multi-disciplinary, project-based course for students interested in designing products, services, or ambitious art or educational works that are meaningful, beautiful, useful, as simple as possible, and emotionally desirable (e.g., calming, inspiring, delightful, cool, covetable.). Students learn the fundamentals of design theory, emotional design, user-centered design, and design leadership. The class format consists of a series of project-based design challenges, and each challenge has three parts. The first part is a summary of the scientific literature on an important emotional concept that is relevant to design, such as trust, anxiety reduction, or belonging. The second part includes one or more case studies of past works that were exceptionally well designed for this emotional concept. The third part is a custom design challenge for students to practice applying what they are learning to their own creative ideas. Past project prompts include challenges like designing headphones for anxiety reduction, health literacy campaigns for rapid adoption, and sustainable materials like bamboo to represent the future of luxury. Along with this
cycle of theory and application, the course teaches research-based design process and design leadership skills. Weekly critique panels enable students to develop and refine their own design point of view. The final project in the course is a professional design portfolio.

Course Notes: Limited enrollment. Instructor permission required for all students. Engineering Sciences 22 is jointly offered with the Graduate School of Design as SCI 6276.

Flavor Molecules of Food Fermentation: Exploration and Inquiry (156947)

*Pia Sorensen*

2021 Spring (4 Credits)  
**Schedule:**  
MW 1200 PM - 0115 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 28

Microorganisms produce a diverse array of specialized small molecules as part of their metabolic processes. In this course we will study the production, properties, and characterization of these molecules through the lens of food fermentation. In particular, we will focus on the small molecules that contribute taste and aroma in fermented foods. Students will experience the scientific inquiry process in a creative way by designing and implementing their own research project based on a fermented food of their choosing. Still a field with much potential for discovery, interested students are invited to continue their research project in the summer.

**Recommended Prep:** Ls1a, LPSA or equivalent; first semester Organic Chemistry recommended but not required.

**Engineering Sciences 26**

Humanity and its Futures: Systems Thinking Approaches (204471)

*Fawwaz Habbal*

*Vikram Mansharamani*

2021 Spring (4 Credits)  
**Schedule:**  
M 0900 AM - 1145 AM
Instructor Permissions: None  Enrollment Cap: n/a

As citizens in a rapidly changing world facing increasingly complex challenges, the skills that tomorrow's leaders need are increasingly crossing disciplinary silos. Humanity's most pressing problems are interconnected, involve competing interests, and defy simplification into single disciplines. Reductionist approaches focused on linear understanding must be balanced against the integrative logic of systems-oriented thinking. Depth must be balanced with breadth.

This course will give students an appreciation for the complexities of today's most intractable problems, and in so doing, help students develop a methodology for navigating the world they will face. After an overview of systems thinking and its emphasis on interconnections and feedback loops, the course will explore several issues and the complications they generate. Over the course of the semester, topics including epidemics, inequality, human displacement, and food systems will be addressed.

The course will employ multiple methods of learning, with course preparation varying from reading novels to watching videos to reviewing academic papers. Each case will include an overview of the issue and why it matters, before exploring existing disciplinary approaches to address the challenge. Prior thinking is evaluated both in terms of its rigor and its effectiveness. What worked and didn't work? Why?

Students will learn to employ systems thinking using a multi-disciplinary method to evaluate possible solutions. This future-oriented analysis will emphasize the necessity to zoom out and paint a mosaic of possible unintended consequences and roadblocks that may impede progress. By the end of the course, students should have developed a robust framework for integrating economic, political, technical, ethical, and social lenses into an analysis of complex problems and their potential solutions.

Aesthetic Pleasure and Smart Design: Janus Faces the Future (217636)

Fawwaz Habbal
Doris Sommer

2021 Spring (4 Credits)  Schedule: T 0945 AM - 1145 AM

Instructor Permissions: None  Enrollment Cap: n/a

Engineers today can make almost anything they think of. Do we ask why to pursue one innovation over another? This course considers the personal and social drivers of innovation, including beauty and sustainable value. Complex or "wicked" problems today demand interdisciplinary approaches that bring the Humanities in dialogue with Technology. Along with predicting the success of new products through existing needs and desires, innovation in its most spectacular cases comes close to art, making new and unpredictable things that generate new desires, markets, and behaviors. How will engineers today respond to the opportunities and obligations that accompany technological advances?
Introduction to Electrical Engineering (140008)

Marko Loncar
Chris Lombardo

2021 Spring (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

The main course objectives are to introduce students to the exciting and powerful world of electrical engineering and to explain how gadgets that we use every day actually work. After taking ES 50, you will be able to leverage the power of electricity to build systems that sense, control and program the physical world around you. Examples include intelligent and autonomous systems (robots), audio amplifiers (e.g. guitar amp), interactive art installations, light-shows, mind-controlled machines, and so on.

Recommended Prep: Enthusiasm, curiosity and desire to build things! Previous engineering or programming experience is NOT needed. The amount of high school physics required is minimal, and is limited to basic concepts only.

Computer-Aided Machine Design (148434)

Michelle Rosen

2020 Fall (4 Credits) Schedule: MWF 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 60

An introductory course in the design, fabrication, and assembly of mechanical and electromechanical devices. Topics include: Engineering graphics and tolerances; Structural design and material selection; Machine elements and two-dimensional mechanisms; DC motors; Design methodology. Emphasis on hands-on work and team design projects using professional solid modeling CAD software and numerically controlled machine tools.
An introductory course in the design, fabrication, and assembly of mechanical and electromechanical devices. Topics include: Engineering graphics and tolerances; Structural design and material selection; Machine elements and two-dimensional mechanisms; DC motors; Design methodology. Emphasis on hands-on work and team design projects using professional solid modeling CAD software and numerically controlled machine tools.

Course Notes: Intended for freshmen and sophomores.
Recommended Prep: High school calculus; high school physics.

Quantitative Physiology as a Basis for Bioengineering (122339)

*Daniel Needleman*

*Linsey Moyer*

2020 Fall (4 Credits) Schedule: MWF 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

This course is designed as an introduction to thinking as a bio/biomedical engineer and is recommended for first years and sophomores but open to all students. Simple mathematical models are used to represent key aspects of organ systems function. Core engineering concepts are explored through mechanical and electrical examples within the human body. The primary focus is on quantitative descriptions of organ systems function and control in terms of physical principles and physiologic mechanisms. It includes a foundation in human organ systems physiology, including cardiovascular, pulmonary, and renal systems. Emphasis will be given to understanding the ways in which dysfunction in these systems gives rise to common human disease processes.

Course Notes: Open to first-year students.

Class Notes: Additional synchronous office hours will be available to students who cannot attend lectures at the primary course time. This course also includes a weekly laboratory section.

Recommended Prep: Calculus at the high school level

Humanitarian Design Projects (208044)
Multi-year long team projects that provide an engineering experience working with partner communities on real-world problems. Projects provide exposure to problem definition, quantitative analysis, modeling, generation of creative solutions utilizing appropriate technology, engineering design trade-offs, and documentation/communication skills. These projects will be implemented with our project partners after the appropriate design and approvals have been obtained.

Course Notes: This course is part of a two-semester sequence. Students are strongly encouraged to enroll ENG-SCI 91HFR in two consecutive semesters. Enrollment limited.

Guided reading and research.

Course Notes: An ES91r project must possess engineering content at a level similar to other technical engineering courses at SEAS and include many, but not necessarily all, of the following elements: modeling, simulation, design, measurement, and data analysis.

Normally open to candidates accepted for work on a specific topic by a member of the faculty of the School of Engineering and Applied Sciences. Normally may not be taken for more than two terms; may be counted for concentration in Engineering Sciences with prior approval and if taken for graded credit. Applicants must file a project application form prior to the course registration deadline to receive permission to enroll. Project application forms may be obtained from the SEAS website or the Office of Academic Programs, Pierce Hall 110.

Engineering Sciences  94

Entrepreneurship and Innovation: Practical and Academic Insights (217639)

Josh Lerner

2021 Spring (4 Credits)  

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 60

Entrepreneurship is increasingly transforming our society and economy. This course aims to provide for undergraduates an introduction to entrepreneurship and its implications for innovation. The class will primarily consist of case study discussions, but will include some traditional lecture sessions that built on academic papers to provide more frameworks. As such, it draws primarily on materials from the introductory MBA course at Harvard Business School, “The Entrepreneurial Manager” (TEM). Students will be expected to come to class prepared to discuss the cases.

Class Notes: Enrollment in this course is limited to 50-60 students and will be determined by the instructor if interest exceeds the limit. To help in this process, it would be helpful if you would fill out a short four-question survey that can be found here to highlight your interest in the class.

The survey would ask:

Name:
Year of study:
Concentration or program:
Why are you interested in taking this class? (one paragraph)

Startup R & D (109272)

Paul Bottino

2021 Spring (4 Credits)  Schedule:  T 0300 PM - 0545 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Students do field-based work in entrepreneurship to develop their existing startup and explore new ideas and opportunities for startup design. The course is for students seeking innovation experience as a founder of a startup. Students may work individually; teams are preferred. Requires self-directed, independent work and active outreach to mentors, customers, and partners for guidance and feedback in addition to that provided by the instructor. Students will share their work regularly and engage in a peer-to-peer feedback forum. The coursework is customized to the needs of each student and their startup role and includes development of product, technology, market, business, organization and leadership.

Course Notes:  Enrollment limited; permission of instructor required.

Thermodynamics by Case Study (160454)

*Scot Martin*

2021 Spring (4 Credits)  
Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor  
Enrollment Cap: 18

Fundamental concepts and formalisms of conservation of energy and increase of entropy as applied to natural and engineered environmental and biological systems. Pedagogical approach is to start with real-world observations and applications, extracting the underlying fundamentals of thermodynamics from these.

Course Notes: ES 112 is also offered as EPS 112. Students may not take both for credit. Undergraduate engineering students should enroll in ES 112. Total class capacity of 18 includes students in both ES 112 and EPS 112.

Class Notes: Meets on Monday and Wednesday from 12pm to 12:50pm for all 18 students. Also meets on Friday in one of two separate 50-min blocks of 9 students for discussion. Friday meeting times will be determined according to enrolled students' availability. Please see course page for lottery instructions.

Mathematical Modeling (156427)
Abstracting the essential components and mechanisms from a natural system to produce a mathematical model, which can be analyzed with a variety of formal mathematical methods, is perhaps the most important, but least understood, task in applied mathematics. This course approaches a number of problems without the prejudice of trying to apply a particular method of solution. Topics drawn from biology, economics, engineering, physical and social sciences.

Course Notes: Engineering Sciences 115 is also offered as Applied Mathematics 115. Students may not take both for credit. Undergraduate Engineering Students should enroll in Engineering Sciences 115.

Class Notes: Enrollment for APMTH/ENG-SCI 115 is limited to 40 students. Priority will be given to AM seniors taking this course to fulfill the honors requirement. To be given priority, you must request permission to enroll by Thursday, Jan. 21.

Recommended Prep: Prerequisite: Applied Mathematics 21a and 21b, or Mathematics 21a and 21b or permission of instructor. Taking APMTH 105 OR APMTH 108 OR APMTH 104 OR MATH 112 OR STAT 110 before taking APMTH 115 is recommended but not required.

Requirements: Prerequisite: Must take APMTH 105 OR APMTH 108 OR APMTH 104 OR MATH 112 OR STAT 110 before taking ENG-SCI 115

Engineering Sciences 120

Introduction to the Mechanics of Solids (131270)

Joost Vlassak

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

A first course in the mechanical sciences which introduces elements of continuum mechanics and explains how materials and structures stretch, bend, twist, shake, buckle, and break. Stress-strain behavior of materials. Statically determinate and indeterminate structures. Stress and strain, equations of motion or equilibrium, strain-displacement relations. Torsion. Beam theory with applications to beam deflections, vibrations, and buckling. Three laboratory sessions required.

Recommended Prep: Applied Physics 50a, Physical Sciences 12a, or 15a and Applied
Mathematics 21a or Mathematics 21a (previously) and Applied Mathematics 21b or Mathematics 21b (previously or concurrently).

Requirements: Prerequisite: Math 21a (or equivalent); and Physical Sciences 12a, Physics 15a, or Applied Physics 50a; AND Co-requisite: Math 21b (or equivalent)

Introduction to Fluid Mechanics and Transport Processes (144952)

*Petros Koumoutsakos*

2021 Spring (4 Credits)  
**Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: None  
Enrollment Cap: n/a

Panta rhei; Energy and Entropy; Atomistic-Mesoscale-Continuum Fluids and Flows; Dimensional Analysis; Atomistic descriptions of Liquids, Gases and their interfaces; Atomistic, Mesoscale, Continuum descriptions of Diffusion Processes; Surface Tension: bubbles and droplets; Fluid kinematics; Eulerian and Lagrangian descriptions; Macroscale conservation laws for incompressible flows; Mass conservation and potential flows; Momentum conservation and the Navier-Stokes equations; Vorticity and Vortices; Lift and Drag in Aerodynamics; Flows in Pipes and Channels; Elementary concepts of Turbulent flows.

Recommended Prep: Programming experience is highly encouraged/desired.

Requirements: Prerequisite: (Applied Math 21a or Math 21a or equivalent) AND (Applied Math 21b or Math 21b or equivalent) AND (APPHY 50a or PHYSCI 12a or Physics 15a)

Mechanical Systems (144157)

Boris Kozinsky

2020 Fall (4 Credits)  

Schedule:  
MW 1200 PM - 0115 PM  

Instructor Permissions:  None  
Enrollment Cap:  n/a

Modeling and analysis of mechanical systems. Topics include 3D rigid body dynamics, resonance, damping, frequency response, Laplace transform methods, Lagrange's equations, multiple degree-of-freedom systems and an introduction to control and continuous systems. Analytical modeling will be supplemented with numerical simulations and lab experiments. Laboratory exercises will explore vibration, and stabilization using data acquisition systems.

Requirements:  
Prerequisite: Math 21a and 21b (or equivalents); and Physical Sciences 12a (or equivalent)

Additional Course Attributes:

Computational Solid and Structural Mechanics (133525)

Katia Bertoldi

2021 Spring (4 Credits)  

Schedule:  
MW 1200 PM - 0115 PM  

Instructor Permissions:  None  
Enrollment Cap:  n/a

Introduction to finite element methods for analysis of steady-state and transient problems in solid and structural mechanics. Implementation of simple MATLAB codes and use of existing general-purpose software (ABAQUS). Final project offers opportunities to extend focus to fluid mechanics and heat transfer and to explore additional software (e.g. COMSOL, FEniCS), if desired.

Course Notes:  
Offered alternate years.

Recommended Prep:  
Engineering Sciences 120 or equivalent introduction to the mechanics of deformable materials.

Engineering Sciences  139
Innovation in Science and Engineering: Conference Course (118939)

David Weitz
2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

Explores factors and conditions contributing to innovation in science and engineering; how important problems are found, defined, and solved; roles of teamwork and creativity; and applications of these methods to other endeavors. Students receive practical and professional training in techniques to define and solve problems, and in brainstorming and other individual and team approaches.

Course Notes: Offered jointly with the Design School as SCI-06272. Taught through a combination of lectures, discussions, and exercises led by innovators in science, engineering, arts, and business.

Requirements: Anti-Req: May not be taken for credit if ENG-SCI 239 already complete

Computer Vision (216372)

Todd Zickler

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

An introduction to the mathematical, optical, and computational foundations of computer vision, with a focus on applications in augmented reality and robotic perception. Topics include: camera optics, digital color photography pipelines, multi-camera geometry, image processing and manipulation, simultaneous localization and mapping, lighting and material estimation, and 3D scanning. Emphasis on combining mathematical modeling with robust algorithms for solving ill-posed problems.

Recommended Prep: Applied Mathematics 22a or Mathematics 21b, Computer Science 51 or 61.

Probability with Engineering Applications (116859)

Yue Lu

2021 Spring (4 Credits) Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

This course introduces the fundamentals of probability theory for parameter estimation and decision making under uncertainty. It considers applications to information systems as well as other physical and biological systems. Topics include: discrete and continuous random variables, conditional expectations, Bayes' rules, laws of large numbers, central limit theorems, Markov chains, Bayesian statistical inferences, and parameter estimations.

Requirements: Prerequisite: (Applied Math 21a or Math 21a or equivalent) AND Corequisite: (Applied Math 21b or Math 21b or equivalent)

Circuits, Devices, and Transduction (207597)

Gu-Yeon Wei

2020 Fall (4 Credits)  Schedule:  MW 0300 PM - 0415 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

This course introduces fundamentals in designing and building modern information devices and systems that interface with the real world. It focuses on devices and systems that use analog electronics, and it complements COMPSCI 141, which focuses on digital devices and systems. Topics of this course include: time and frequency domain analysis of simple 1st and 2nd order circuits; operational amplifiers and op-amp circuits; basic semiconductor physics; PN junctions and diodes; bipolar junction transistors (BJT); field-effect transistors (MOSFETs); bias circuits and current sources; amplifier gain and bandwidth; frequency response, feedback, noise, and stability. Further, students are introduced to select transducers, particularly motors and their concomitant drive schemes, but also photocells, photodiodes, and semiconductor lasers to highlight device design and characterization.

Requirements:  Prerequisite: Math 1a and 1b; AND Co-requisite: Physical Sciences 12b or Physics15b or Applied Physics 50b

Engineering Sciences 155
Systems and Control (207626)

Na Li
Yue Lu

2020 Fall (4 Credits)  Schedule:  MW 0130 PM - 0245 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

This course and its follow-on course ENG-SCI 156 concern the fundamentals of information systems in the real world. Together they provide a comprehensive foundation in signal processing, systems design and analysis, control, and communications, while also introducing key linear-algebraic concepts in the context of authentic applications. The first course, ENG-SCI 155, focuses on the basic principles of feedback and its use as a tool for inferring and/or altering the dynamics of systems under uncertainty. Topics include linear algebra, the elemental representations of dynamic systems, stability analysis, the design of estimators (e.g., Kalman Filter) and feedback controllers (e.g., PID and Optimal Controller). The class includes both the practical and theoretical aspects of the topic.

Recommended Prep:  Applied math 21a, b or Math 21a, b or equivalent are encouraged to be taken concurrently but not required. Additional sections and materials of linear algebra will be provided in the course.

Requirements:  Prerequisite: Math 1a and Math 1b
**Engineering Sciences 156**

Signals and Communications (148148)

*Flavio du Pin Calmon*

*Todd Zickler*

2021 Spring (4 Credits)  

**Schedule:**  
MW 1030 AM - 1145 AM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course is a follow-on to ENG-SCI 155 and continues to develop the fundamentals of information systems in the real world. It focuses on the analysis and manipulation of signals in the time and frequency domains in the context of authentic applications. Topics include: the sampling theorem, convolution, and linear input-output systems in continuous and discrete time. Further, students are introduced to transforms—including Fourier, discrete cosine, wavelet, and PCA / SVD 'transforms'—that map between vector spaces via matrix multiplication as a method to ease analysis provided conditionalized knowledge. Randomness, noise, and filtering. Waves and interference in the context of communications; antennae, phasors, modulation, multiplexing. Applications in communications and data science.

**Recommended Prep:**  
Applied Mathematics 21b or Mathematics 21b.

**Requirements:**  
Prerequisite: Math 21a and Math 21b (or equivalents), or Applied Math 22a

**Additional Course Attributes:**

tools (Python, Jupyter notebooks) to interpret biological signals and tell engaging and informative stories using biological data. The signals of interest can be deterministic, semi-periodic, transient, random, stationary, non-stationary, etc., depending on their source and generation mechanism. We will use EEG, EKG, temperature data, neural spiking data, and data from Covid-19 as examples. Our focus will be on foundational signal processing concepts that can be applied in a variety of biological applications. Examples include the Fourier Transform, Principal Component Analysis, Clustering, etc. Applications include those to patient monitoring, diagnostics, patient prognostics, online monitoring, and the computation of wellness measures. For many of us, one frustrating aspect of Covid-19 is our inability to understand figures that are reported, such as infection rates and numbers. We will introduce you to a powerful suite of mathematical and scientific computing tools will enable you to evaluate and make decisions based on evidence and data.

Recommended Prep: It is helpful, but not necessary, for students to have taken Engineering Sciences 150 or 156 prior to Engineering Sciences 157.

Requirements: Prerequisite: Math 21a and Math 21b (or equivalents)

Engineering Sciences 171

Introduction to Quantum Materials and Devices (215415)

Robert Westervelt

2021 Spring (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

This course provides an introduction to quantum materials and devices, including two-dimensional electron layers, single and double quantum dots, 2D materials such as graphene, and Josephson junctions. Their behavior is explained using semiclassical and quantum transport, electron states in reduced dimensions, the Coulomb blockade, and superconductivity. Quantum devices offer new approaches to electronics and photonics.

Course Notes: Formerly APPHY 171

Class Notes: Meeting time will be determined according to enrolled students’ availability.

Recommended Prep: ES 170 or Physics 143A, and ES 154 or Physics 153. AP 195 / Physics 195 provides a good introduction, but is not required.

Materials Selection and Design (216405)

David Clarke

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

The repertory of materials available to engineers today and embodied in engineering systems includes tens of thousands of different materials, as well as naturally occurring ones. This course addresses why specific materials are selected for particular applications and the rational basis for their selection. The course is intended to serve as an introduction to the principles and methodology of selecting materials for engineering components based on the functionality and purpose of the component in different system applications and operating environments. The selection specification includes satisfying a variety of objectives, such as minimizing weight, cost (financial as well as environmental), end of life recycling and material scarcity.

Engineering Sciences 201

Decision Theory (131407)

Demba Ba

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 30

ES 201/AM 231 is a course in statistical inference and estimation from a signal processing perspective. The course will emphasize the entire pipeline from writing a model, estimating its parameters and performing inference utilizing real data. The first part of the course will focus on linear and nonlinear probabilistic generative/regression models (e.g. linear, logistic, Poisson regression), and algorithms for optimization (ML/MAP estimation) in these models. We will play particular attention to sparsity-induced regression models, that arise for instance in compressed sensing, because of their relation to artificial neural networks, the topic of the second part of the course. The second part of the course will introduce students to the nascent and exciting research area of generative models of deep networks called model-based deep learning. At present, we lack a principled way to design artificial neural networks, the workhorses of modern AI systems. Moreover, modern AI systems lack the ability to explain how they reach their decisions. In other words, we cannot yet call AI explainable or interpretable which, as a society, poses important questions as to the responsible use of such technology. Model-based deep learning provides a framework to develop and constrain neural-network architectures in a principled fashion. We will see, for instance, how neural-networks with ReLU nonlinearities arise from sparse probabilistic generative models introduced in the first part of the course. This will form the basis for a rigorous recipe we will teach you to build interpretable deep neural networks, from the ground up. We will invite an exciting line up of speakers. Speakers will suggest papers that a group of students will present at the beginning of lecture, which will build up to a final project/paper that utilizes/on model-based deep learning applied to problems of interest to students.

Course Notes: Engineering Sciences 201 is the same as Applied Mathematics 231. Students may not take both for credit.

Class Notes: Enrollment for ES 201/AM 231 is capped at 30 students. Students who wish to enroll in this course should add it to their Study Card in my.harvard.edu by 23:59 on Tuesday January 19, and request permission to enroll. Please write a paragraph explaining your interest in this course, how it fits either with your concentration plans, and/or how model-based deep learning can help your research. The instructor will let students know if they can enroll by 17:00 on Thursday January 21.

Recommended Prep: Applied Mathematics 21a,b or Mathematics 21a,b, and Statistics 110 or equivalents.

**Engineering Sciences 256**

Informal Robotics/New Paradigms for Design and Construction (156726)

*Chuck Hoberman*

2021 Spring (4 Credits)

**Instructor Permissions:**

Instructor

**Schedule:**

F 1200 PM - 0159 PM

**Enrollment Cap:**

5

This course teaches how to create original robotic devices made of light, compliant – informal – materials.

New fabrication techniques are transforming the field of robotics. Rather than rigid parts connected by mechanical connectors, robots can now be made of folded paper, carbon laminates or soft gels. They can be formed fully integrated from a 3D printer rather than assembled from individual components. Informal Robotics draws on cutting-edge research from leading labs, in particular, Harvard’s Micro Robotics Laboratory which has created unique designs for ambulatory and flying robots, end-effectors, medical instruments and other applications.

We will explore informal robotics from multiple perspectives, culminating with the design of original devices displaying animated intelligence in real-time. Going beyond traditional engineering approaches, we will also explore new opportunities for design at the product, architectural, and urban scales.

**Techniques:**

Hands-on: Working with the GSD’s Fab Lab we are creating a kit of parts that will be available to all enrolled students. With the kit, you can create a wide range of folding mechanisms controlled by on-board miniature electronics.

Software / Simulation: Software workshops will be offered on Fusion 360 and Grasshopper to simulate robotic performance within a virtual environment.

**Topics:**

- Kinematics: design techniques for pop-ups, origami, and soft mechanisms.
- Fabrication: methods: for composite materials, laminated assembly, self-folding, and integrated flexures - the kit of parts will allow for hands-on exploration.
- Controls: how to actuate movement and program desired behavior. Topics include servos, linear actuators, and use of Arduino actuator control.
- Applications: takes us beyond purely technological concerns, contextualizing Informal Robotics within larger trends where materials, manufacturing and computation are starting to merge.

**Format, prerequisites, evaluation:**

A portion of the lecture material will be pre-recorded, allowing students to view this on their own schedule. The class session will emphasize discussion and review of assignments & projects.

There will be assignments to produce test mechanisms and CAD models, followed by final group projects. Presentations and discussions of ongoing student work are integral to the course. There are no prerequisites and evaluation will be based on completion of assignments and the final project.

Projects may be virtual, physical or both. Resources for fabricating customized final projects are not fully known at this point, but I am committed to supporting physical-making to the degree possible.

**Course Notes:**

This course does not count for concentration credit for SEAS
undergraduate concentrators; this course does not count as a disciplinary course for SEAS Ph.D. students. Jointly offered with GSD, SCI 6478.

Engineering Sciences 261

Stratospheric Dynamics (217786)

Marianna Linz

2021 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions:  None  Enrollment Cap:  n/a

This course will review some introductory geophysical fluid dynamics before focusing primarily on the physics of the stratosphere. Topics covered will include eddy transport of heat and momentum, stratospheric Rossby and gravity waves, wave-mean flow interaction, and tracer transport. The course will alternate lecture with in-class coding activities. Each week will have a preparatory reading and brief assignment.
Class Notes: Meeting time will be determined according to enrolled students' availability.

Recommended Prep: Differential equations and some graduate level fluid dynamics, preferably Geophysical Fluid Dynamics (e.g. EPS 208, EPS 231, EPS 232, MIT 12.800)

Additional Course Attributes:

Quantum Devices (118028)

Marko Loncar
Federico Capasso

2020 Fall (4 Credits) 

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

The focus of this course are quantum devices that have revolutionized the field of information science and technology. Particular emphasis this year will be on optical devices and communication technology. First, quantum devices that have enabled development of internet will be discussed, including semiconductor lasers, modulators and photo-detectors. Next, emerging quantum devices that will lead to so-called "second quantum revolution" and development of quantum internet and quantum computers will be introduced. These include single-photon sources and detectors, quantum memories, physical implementations of quantum gates, etc.. Topics that will be covered include quantum dots, color centers in solids, trapped ions and atoms, photon pair generation, quantum teleportation, quantum cryptography and quantum repeaters. The course is a mixture of quantum mechanics, semiconductor device physics, nanophotonics, quantum electronics and quantum optics.

Recommended Prep: Undergraduate level quantum mechanics such as Physics 143a or equivalent.

Systems Engineering (208004)
Robert D. Howe  
Venkat Venkatasubramanian

2020 Fall (4 Credits)  
Schedule:  
TBD

Instructor Permissions:  
Instructor

Enrollment Cap:  
30

This is the first core course for students in the MS/MBA: Engineering Sciences program, to be taken in August of the first year of the program. The course will begin with methods for modeling engineering and business systems, including discrete and continuous systems and feedback controls. Students will write simple simulations and then use professional modeling software to simulate complex systems. Students will next learn design methodology, including stakeholder modeling, ideation, and decision making tools. A final team project will involve design of a system, including simulation and prototyping.

Course Notes:  
This course is limited to first-year MS/MBA: Engineering Sciences students only. Intensive 3-week course, Aug. 7-23.

Recommended Prep:  
Calculus, linear algebra, differential equations.

Requirements:  
First year MS/MBA students only

Integrated Design (212920)

B. Ames Altringer  
Roberto Verganti

2020 Fall (4 Credits)  
Schedule:  
MT 0430 PM - 0630 PM

Instructor Permissions:  
Instructor

Enrollment Cap:  
35

Leading advanced design projects requires the integration of multiple skill areas and ongoing learning about the best concepts and tools to guide development. This course in leadership and design practice trains students to lead multi-disciplinary, integrated teams capable of envisioning a meaningful project direction and developing seamless product and service experiences. Students learn strategic design and design leadership alongside the history of design and the principles, processes and techniques of intermediate to advanced Human Computer Interaction (HCI) and UX, graphic design, psychology of design, and design decision-making tools and tradeoffs. Students learn the skills needed to become not just an engineer or a manager, but integrated engineer-designers who have the unique capabilities needed to lead entrepreneurial projects. They learn to use collaborative sensemaking to find the most meaningful problem to work on, and to do this through an iterative cycle that integrates the technical, user experience, and interface design elements of a solution. The course is structured to provide a comprehensive education in all stages of the new product design process: from idea generation to concept development, detailed design and prototyping, testing and integrating data into design decisions.

Course Notes:  
This course is limited to second-year MS/MBA: Engineering Sciences students only. Requires instructor consent.

Recommended Prep:  
Integrated Design is a required core course for the Harvard MS/MBA joint degree program. It builds on skills and tools developed in prior
courses in the MS/MBA core sequence. Specifically, students enrolled in this course must have taken Systems Engineering, which covers advanced statistical analysis techniques, data analytics, and the modeling and simulation of complex engineered systems. Students must also have taken the intensive course Technology Venture Immersion, which covers the fundamentals of achieving product-market fit in early-stage ventures, encompassing tools and techniques for problem finding (e.g., customer interviewing and persona development) and solution finding (e.g., brainstorming, prototyping, user testing and defining a Minimum Viable Product).

Nano Micro Macro: Adaptive Material Laboratory (156219)

Joanna Aizenberg

Jonathan Grinham

2021 Spring (4 Credits) Schedule: F 0800 AM - 0959 AM

Instructor Permissions: Instructor Enrollment Cap: 20

This course is an interdisciplinary platform for designers, engineers, and scientists to interact and develop innovative new products. The course introduces ideas-to-innovation processes in a hands-on, project/product focused manner that balance design and engineering concepts with promising, real-world opportunities. Switching back and forth between guided discovery and focused development, between bottom-up and top-down thinking, and market analyses, the course helps students establish generalizable frameworks as researchers and innovators with a focus on new and emerging technologies. There are no prerequisites.

*Note! MDE students, this course can satisfy a GSD course requirement by enrolling in SCI 6477, or a SEAS course requirement by enrolling in ES 291. But it cannot simultaneously satisfy both requirements.*

Course Notes: Offered jointly with Harvard Graduate School of Design as SCI 6477.

Class Notes: See course video at https://www.gsd.harvard.edu/course/nano-micro-macro-adaptive-material-laboratory-with-seas-spring-2021/.

Launch Lab/Capstone 1 (214579)
The MS/MBA Capstone is an intensive project that requires teams of students to apply and integrate the skills they have learned across core disciplines developed in the program curriculum. Specifically, teams will be expected to design, build and launch a new technology-based product/service venture, and thereby demonstrate mastery with respect to three areas of knowledge: Design Knowledge: The use of human-centered design methods to understand users, identify solutions to their needs, and gather feedback via rapid, iterative prototyping. Technical Knowledge: The use of rigorous system engineering methods to plan, design, develop, build, and test a complex technology-based product/service, integrating knowledge across multiple engineering disciplines. Business Knowledge: The use of business model analysis and lean experimentation methods to develop and test a set of hypotheses that capture how the new product/service will create value, including business model design, pricing, sales and marketing, operating model and profit formula.

The Capstone is divided into two parts, the first of which is an immersive course completed during the January term of the G2 year (Capstone I). The subsequent spring course (Capstone II) follows on from and builds upon work completed in January. In Capstone II, dedicated mentors will be allocated to each team based upon the specific projects they are completing. Given students prior coursework, a working knowledge of human-centered design methods, systems engineering techniques, and business modeling and lean experimentation is assumed. Launch Lab therefore focuses on the practical application of these skills to team projects, supplemented by content in three areas: i) seminars on advanced methods and techniques, ii) workshops that demonstrate how to put these skills and tools into practice, and iii) guest speakers who share their experience in the areas of design, technology and business.

Course Notes: Open to MS/MBA: Engineering Sciences students only.

Engineering Sciences 297

Professional Writing for Scientists and Engineers (207614)

Jenny Hoffman
Suzanne Smith

2020 Fall (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor
Enrollment Cap: 15

This class leads students to develop their skills in the critical reading and writing of science and engineering. Genres will include research articles, grant proposals, school/fellowship/job applications, or lay abstracts & press releases for the non-scientific public. Crucially, students will be empowered not only to achieve their own writing goals, but also to break down these learned skills and impart them to others, as effective collaborators and mentors of younger students.

Course Notes: We welcome graduate students and senior undergraduates! Enrollment is limited to 15 students. Tentative meeting time is 3-5pm on Weds, but may be updated based on student preference.

Methods & Practices in Design Engineering (214632)

Nabil Harfoush
Arianna Mazzeo

2020 Fall (4 Credits) Schedule: R 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

This course is a practice-focused introduction to applied design research and analysis methods on human subjects (individuals or groups) and on organizations in a post-pandemic urban context. The first part of the course provides an introduction to qualitative research methods such as observation, interviewing and emergent design fiction from a cultural and systemic perspective. The second part introduces learners to key methods and tools for analyzing enterprises and their resilience. The course is intended to complement the knowledge of students in engineering, sciences, and multidisciplinary programs and provide them with practical skills in domains adjacent to their fields. The course is suitable for students and for graduate and undergraduate students of many disciplines.

Engineering Sciences 298CR

Innovating in Health Care (214632)

Regina Herzlinger

2021 Spring (4 Credits) Schedule: MTW 1040 AM - 1200 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This course enables students to bring their entrepreneurial health care ventures to market by: 1) Learning how to align their venture with the six factors that influence entrepreneurial ventures - the structure of the health care system, its financing, technology, consumers, accountability, and public policy; and 2) Learning the nine essential elements of a business model. The course uses case studies of all kinds of health care innovations – delivery, med tech, insurance, biopharma – in global settings and lectures on subjects such as reimbursement to enable these learnings. Students apply these learnings to complete a business plan for an entrepreneurial venture. The project can be completed with a team of classmates.

Course Notes: Med Tech Cases Include: CVI Ingenuity (A) & (B), PARAXEL International Corp.: Stages of Innovation, Reinvining Brainlab (A) & (B), Emdeon’s Acquisition of Change Healthcare: Innovating Transparency Solutions for Health Care Consumers, ABC Pharmaceuticals, Medtronic: Patient Management Initiative (A) & (B), Fitbit, Philips-Visicu, and Phreesia.

Class Notes: For more information, please see http://www.hbs.edu/coursecatalog/2180.html.

Engineering Sciences 298DR

Methodologies in Design Engineering (213398)

Kit Parker

Fawwaz Habbal

2020 Fall (4 Credits) Schedule: F 1100 AM - 0100 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This is a SAT/UNSAT seminar course focused on design thinking, analysis, planning, and executing the development of engineered systems. Weekly meetings will include discussions and assigned readings of case studies and examples of the systems surrounding the developing technical system. Organizing and executing research, innovation, and product design at the scales from academic group, to startup, to major industry will be discussed. The course is designed to allow the engineer and designer to integrate technical knowledge into an executable framework as an individual or leader of a design team.

Course Notes: Enrollment subject to approval of the instructor, with first and second year MDE graduate students receiving priority. Undergraduates are not allowed to enroll.
Engineering Sciences 298R
Solving Tech's Public Dilemmas (107995)

Ash Carter
2020 Fall (4 Credits)

Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Instructor
Enrollment Cap: 20

This course identifies and analyzes alternative solutions to the dilemmas that disruptive technology is posing to public good in the digital, biotech, and jobs and training domains. The objective is for students to craft technologically-informed practical public-private approaches to some of the key policy issues of our time. It begins with a brief history of successful and unsuccessful governance of far-reaching technological changes in the past. The first part of the course treats the ongoing digital revolution, crafting solutions to issues of social media responsibility, cybersecurity, and artificial intelligence (AI). It then turns to the biotech revolution that is gathering momentum, addressing genome editing, bioweapons and bioterror, and the role of venture capital in biotech. The third segment of the course addresses the ways that technology is disrupting the nature of work and lifelong training. The example of driverless cars will be used to illustrate the challenges and opportunities that technology provides to sustain cohesive and prosperous societies in the era of tech "disruption". Assignments stress development of key writing and speaking skills.

Course Notes: Cannot be used for computer science or engineering concentration credit. Also offered by HKS as IGA 505.

Engineering Sciences 299R
Special Topics in Engineering Sciences (143668)

Fawwaz Habbal
2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None
Enrollment Cap: n/a

Supervision of experimental or theoretical research on acceptable problems in engineering and applied science and supervision of reading on topics not covered by regular courses of instruction.

Course Notes: Open to graduate students and AB/SM candidates only. Students must arrange such work with a member of the School of Engineering and Applied Sciences. This course is graded and is ordinarily taken with the approval of the Committee on Higher Degrees. Applicants must file
a project sheet before study cards are filed. Project sheets may be obtained from the Student Affairs Office, Pierce Hall 110 or at https://www.seas.harvard.edu/office-academic-programs/graduate-policies-procedures-and-forms/graduate-student-forms.

SEAS Teaching Practicum (125374)

_John Girash_

2021 Spring (4 Credits)  
**Schedule:** R 0300 PM - 0500 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Practicum emphasizing an active but reflective approach to teaching applied sciences and engineering; designed for graduate students in any SEAS area, not specifically Engineering Sciences. Topics: presentation and communication; in-class teaching and interaction; developing, grading and giving feedback on assignments; course head / TF relations and expectations; cognition and learning. Seminar.
style with an emphasis on observation, practice, feedback, and reflection. While the primary context of the course is classroom-style teaching, those interested in developing instructional communication skills in other contexts within science and engineering -- labs/studios, presentations, etc. -- are quite welcome, and course tasks can be adjusted for such.

Class Notes: Unlike most 300-level courses at SEAS, this is a class with a regular meeting time and some assignments, largely involving lesson prep and brief background reading. Counts towards the Derek Bok Center’s Teaching Certificate. Graduate students from all science and engineering fields within Harvard are welcome. Postdocs and motivated undergraduates may audit, doing the same work as enrolled graduate students. Once each month the regular class will be followed by a 45 minute open-attendance reading group.

Engineering Sciences 399-TIME

Academic-Related Work for SEAS Graduate Students (208271)

2021 Spring (4 Credits)  
Schedule: TBD  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

Enrollment in ES 399-TIME is open to any SEAS Ph.D., M.E., or S.M. student who holds a SEAS or FAS Teaching Fellow (TF) appointment and is engaged in teaching a course. Once hired to teach in a specific course, whether within or outside SEAS, the student must complete the online form at http://tinyurl.com/seastfform.

SEAS Ph.D. students who are required to enroll in the Bok Center’s non-credit Communicating Science seminar in order to meet the GSAS English Language Proficiency requirement may also enroll in 4 units of ES 399-TIME.

Course Notes:  
Teaching Fellows may enroll in 4 units of ES 399-TIME for a .25 FTE TF appointment, or up to 8 units of ES 399-TIME for a .5 FTE TF appointment. TFs should not enroll in the course in which they are teaching.

Any enrollment in ES 399-TIME other than as described here is disallowed by SEAS policy, with exceptions requiring prior approval of the Director of Graduate Studies. ES 399-TIME cannot be used to satisfy any degree requirements.

In Lost Children Archive, Valeria Luiselli writes: "I suppose that documenting things—through the lens of a camera, on paper, or with a sound recording device—is really only a way of contributing one more layer, something like soot, to all the things already sedimented in a collective understanding of the world." This class will focus on the art of documenting the "now" through prose and how such documentation can work to contribute another layer to the collective understanding. Together we will explore the art of writing from a space of "closeness," or rendering events/moments in time on the page as they unfold around us. How can closeness deepen intensity and insight? What value can we locate in writing from a place of ongoingness as opposed to in pursuit of resolution? What specific difficulties and questions can closeness introduce?

In support of this exploration, we will study published prose works that take the shape of diaries; self-portraits; drifts; hybrids of fiction and reportage. The reading list will include work from Ross Gay, Kate Zambreno, Valeria Luiselli, Zadie Smith, and Yuko Tsushima. Students will also undertake exercises designed to encourage experiments with form, perspective, time, observation, and genre (we'll be reading fiction, nonfiction, and hybrid forms, and students will be invited to write in any or all of those genres). Later in the term, your own stories will serve as the primary text as the focus shifts to workshop and revision.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.

"I've often noticed that we are not able to look at what we have in front of us," the Iranian director Abbas Kiarostami said, "unless it's inside a frame." For our communities confronting invisibility and erasure, there's an urgent need for new frames. In this workshop, we'll explore a community-engaged approach to documentary filmmaking, as we seek to see our world more deeply. We'll begin with screenings, craft exercises, and discussions around authorship and social impact. Then we each will develop a short documentary over the rest of the semester, building off of intentional community engagement. Students will end the class with a written documentary treatment and recorded material for a rough cut.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.

CAFR: Advanced Fiction Workshop: Writing this Present Life (160953)

Claire Messud

2021 Spring (4 Credits) Schedule: R 0300 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Intended for students with prior fiction-writing and workshop experience, this course will concentrate on structure, execution and revision. Exploring various strands of contemporary and recent literary fiction – writers such as Karl Ove Knausgaard, Rachel Cusk, Chimamanda Adichie, Valeria Luiselli, etc – we will consider how fiction works in our present moment, with emphasis on a craft perspective. Each student will present to the class a published fiction that has influenced them. The course is primarily focused on the discussion of original student work, with the aim of improving both writerly skills and critical analysis. Revision is an important component of this class: students will workshop two stories and a revision of one of these.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. Students will be notified of admissions decisions by 5:00pm ET on Wednesday, January 20th. Workshops do not meet during Shopping Week.

All workshops will be taught remotely. All workshops are to be taught and attended live, and students need to be able to attend the workshop live during the listed course day/time in order to apply/enroll.

Investigations: Journalism and Social Justice (205147)

Jill Abramson

2021 Spring (4 Credits)       Schedule:       W 0300 PM - 0545 PM
Instructor Permissions:    Instructor
Enrollment Cap:             12

This advanced seminar focuses on investigative reporting about social justice issues and cases. Readings will cover school resegregation, housing and homelessness, health care and economic inequities, among other subjects. Class members will learn how to use documents, transcripts and other materials in their
reporting.
The emphasis of the course is on investigative writing techniques, story ideas, voice and narrative framing.
Students will be required to write two investigative articles, one involving a group reporting project and another on an original subject chosen by each student. There will be intermittent, shorter writing assignments. Grades are based on written work and class participation. Guest speakers will include many of the journalists whose articles are included in class reading assignments.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. Students will be notified of admissions decisions by 5:00pm ET on Wednesday, January 20th. Workshops do not meet during Shopping Week.

All workshops will be taught remotely. All workshops are to be taught and attended live, and students need to be able to attend the workshop live during the listed course day/time in order to apply/enroll.

English     CAJR
Investigations: Journalism and Social Justice (205147)

Jill Abramson
2020 Fall (4 Credits) Schedule: W 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: 12

The former executive editor of The New York Times is offering an advanced seminar on investigative journalism and social justice. Going back to the famous Muckrakers of the early 1900s, investigative journalists have exposed social injustice. Their work has inspired change in laws and public attitudes. By holding powerful people and institutions accountable, investigative journalism has been important instrument of social change.

Readings will include The New York Times’ 1619 Project, a deep investigation of slavery’s legacy and racism’s impact on American life, including economic inequality, mass incarceration, police killings, red-lining, evictions, re-segregation of school systems and wide health care disparities. The 1619 Project and its creator, Nikole Hannah-Jones, won this year’s Pulitzer Prize for Public Service.

Besides the Project, other works on the syllabus include, among others, Ta Nehisi Coates on reparations, Ida B. Wells on lynching, Bill Dedman's Pulitzer-winning account of red-lining in Atlanta, Andrea Elliot’s exploration of homelessness in New York City, Nikole Hannah-Jones examination of the re-segregation of schools in Tuscaloosa, Alabama, and Pro-Publica's probe into high mortality rates among Black mothers during childbirth. The class will also study the methodology, reporting and writing challenges faced by The Washington Post and The Guardian in undertaking national investigations of police killings.

With the 2020 presidential campaign looming we will also focus on the role of race in the campaigns of
Donald Trump and Joe Biden.

The class will be multi-platform and multi-media including assignments of documentaries, such as "13th" and podcasts such as "Still Processing." Outside speakers will include some of the journalists whose work we explore. They will Zoom into class as frequently as possible.

Students will become skilled in the basics of investigative reporting, including how to use public documents, how to build sources, and how to conduct interviews (remotely and in-person). Students will learn the basic rules of ethical journalism and apply them to their work.

There will be bi-weekly writing assignments and each student will produce a major investigative reporting project. Grades will be based on writing assignments, class engagement and analysis of readings. The final project will weigh heavily on final grades.

Prior experience in journalism or published articles are not required. Love of great writing that performs a social good is the main prerequisite.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.

Advanced Screenwriting: Workshop (123934)

Musa Syeed

2021 Spring (4 Credits)  
Schedule:  
T 1200 PM - 0245 PM

Instructor Permissions:  Instructor  
Enrollment Cap:  12

The feature-length script is an opportunity to tell a story on a larger scale, and, therefore, requires additional preparation. In this class, we will move from writing a pitch, to a synopsis, to a treatment/outline, to the first 10 pages, to the first act of a feature screenplay. We will analyze produced scripts and discuss various elements of craft, including research, writing layered dialogue, world-building, creating an engaging cast of characters. As an advanced class, we will also look at ways both mainstream and independent films attempt to subvert genre and structure. Students will end the semester with a first act (20-30 pages) of their feature, an outline, and strategy to complete the full script.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. Advanced Playwriting: Workshop (145402)

*Sam Marks*

2021 Spring (4 Credits)  
**Schedule:** T 1200 PM - 0245 PM

**Instructor Permissions:**  
Instructor:  
Enrollment Cap: 12

This workshop is a continued exploration of writing for the stage, with an eye towards presentation. The semester will culminate in a staged reading of each student’s work for the Harvard Playwrights Festival. Each reading will be directed by a professional director. Students will be encouraged to excavate their own voice in playwriting and learn from the final presentation. The class will examine the design of the stage, the playworld, and the page. Students will attempt multiple narrative strategies and dialogue techniques. They will bolster their craft of playwriting through generating short scripts and a completed one act. Readings will include significant contributors to the theatrical form such as Caryl Churchill and Samuel Beckett as well as contemporary dramatists such as Annie Baker, Jackie Sibbles Drury, Branden Jacobs Jenkins, and Jeremy O. Harris.

**Course Notes:**  
Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. The Art of the Personal Essay: Workshop (213301)

Darcy Frey

2020 Fall (4 Credits)  

Schedule: R 0300 PM - 0545 PM

Instructor Permissions: Instructor  
Enrollment Cap: 12

What makes a successful work of personal narrative? What lifts mere experience into shapely art? In this workshop, students will study—partly through reading iconic and experimental essayists, mainly through the submission of their own writing—the art of the personal essay. We will explore elements of the craft such as the construction of a trustworthy narrator, varieties of structure and the fashioning of a satisfying conclusion. Readings include work by writers such as Annie Dillard, Joan Didion, James Baldwin and David Foster Wallace. Writing assignments include several short essays, one longer essay and an extensive revision.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.

The tension between the invented and the observed has compelled many writers to break out of inherited forms. How can we productively blur the line between fiction and non-fiction? What are the possibilities for very short narrative pieces? In this prose writing workshop, our thinking will be helped along by a wide variety of authors that, in one way or the other, make it new. Readings include Lydia Davis, Michael Ondaatje, Anne Carson, and Claudia Rankine.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.

English CBN

Creative Nonfiction: Before and Beyond the (Imaginary White) Reader (216639)
Joan Kane

Writers of literary, lyrical nonfiction negotiate complex power dynamics with their selves, communities, subjects, and readers. In this workshop we will conduct an intensive study of the craft techniques writing of creative nonfiction, focusing on the balance between the politicization of witness, descriptive detail, and narrative voice. Given that one of the great imaginative allures of lyric prose is that it can invent its audience as much as it can invent its speaker, how do writers of creative nonfiction contend with social context? What are the ways in which we can write and revise lyrically that can allow our work to depart from, evade and amplify the experiential in its collaborations with language, history, and place? We will do some generative exercises and workshopping (each writer will be workshopped at least twice per semester) as well as discussion, of course. Participants will generate drafts, revise new work, and investigate the fundamentals of the genre of creative nonfiction.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on

Advanced Fiction Writing (216215)

Indraneel Mukherjee

2021 Spring (4 Credits)  Schedule:  W 0900 AM - 1145 AM

Instructor Permissions:  Instructor  Enrollment Cap:  12

The course will consist of two halves. In the first hour of each class, we will be doing close readings of an assigned text (TBA), with the aim of isolating some aspect of the craft of writing in order to take bearings for your own. In the second half of the class, divided into two equal segments of an hour each, we will be workshopping the writing of two students. Our goal is for each of you to have two turns, and approximately 5-10,000 words of your work critiqued, by the time semester ends. The final project involves significant redrafting of a story or a portion of a novel

Course Notes:  Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. In this course, we will explore the evolution of a story from a factual anecdote or incident to a fictional creation. The aims of the semester are to learn to listen to someone else's story in interviews, and to endeavor to find, from there, the necessary bones for a fictional narrative. What is most urgent? What is most emotionally affecting? What are the details from an interview that stay with you? And from there: what, from a broader account, is the story you are moved to relate? Once you make that choice, how do you do further research, if necessary? How do you select the point of view, the frame, the characters for your fiction? What are the ethics and responsibilities of these choices?

In these riven and challenging times, storytelling is vital: learning to listen, to engage, and responsibly to relay what we discover. Each person we encounter is a bearer of wisdom and vast experience; so many urgent stories remain untold. How might we, as fiction writers, address reality, without simply writing about ourselves?

Several published writers will visit the class to share their experiences of research, and of the relation in their work of fact to invention. We will read published examples of fact-based fiction, and discuss the authors' choices.

The first third of the class will involve preparing and conducting interviews with a chosen subject, and sharing those interviews with the class. The second third will involve refining the story's arc, research and formal decision-making, and writing a first draft. Finally, we will workshop the revised stories that have emerged from this process.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.
This course approaches the writing of fiction with character at its center. If fiction is an exploration of what it's like to be alive on the planet, character is paramount: we are who we are because of a combination of temperament and experience. You can't write convincingly if you don't know your characters: plot, voice, detail, dialogue, setting – all these elements of story are interwoven with and dependent upon character. While it will be primarily a workshop of student fiction, we will read and discuss fiction through the lens of character – including works by Gustave Flaubert, Virginia Woolf, Joyce Carol Oates, Toni Morrison, Viet Than Nguyen, Ben Lerner, and Tayari Jones.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. Students will be notified of admissions decisions by 5:00pm ET on Wednesday, January 20th. Workshops do not meet during Shopping Week.

All workshops will be taught remotely. All workshops are to be taught and attended live, and students need to be able to attend the workshop live during the listed course day/time in order to apply/enroll.

Voicing Character: Fiction Workshop (217820)

Geraldine Brooks

2021 Spring (4 Credits) Schedule: F 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This workshop aims to develop a tool box useful for a wide range of fiction. Students will begin by writing an oral history, develop it into a non-fiction profile, and then create a fictional character based on their subject for a short story or first chapter of a novel. In our first workshop, we will read selected Studs Terkel and WPA oral histories, discussing how to approach and conduct an oral history interview. Next we'll workshop the results of your interviews and discuss how to shape them into profiles. As we move into creating fiction, we'll read Colum McCann's essay "Two Stories, So Many Stories" in the anthology "Kingdom of Olives and Ash" and study how he developed his reportage into the novel "Apeirogon."

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. Students will be notified of admissions decisions by 5:00pm ET on Wednesday, January 20th. Workshops do
not meet during Shopping Week.

All workshops will be taught remotely. All workshops are to be taught and attended live, and students need to be able to attend the workshop live during the listed course day/time in order to apply/enroll.

Indraneel Mukherjee

2021 Spring (4 Credits)  

Schedule: M 0900 AM - 1145 AM

Instructor Permissions: Instructor  

Enrollment Cap: 12

The course will consist of two halves. In the first hour of each class, we will be doing close readings of an assigned text (please see ‘Syllabus’), with the aim of isolating some concept or aspect of the genre under discussion in order to take bearings for your own. The assigned reading is obligatory. We will be looking at questions of genre, and at the reasons for the quotation marks bracketing the word genre in the heading. We will also look at the convergences and divergences in the various kinds and modes mentioned in the title of the course. We will be thinking of generic topoi, conceptual underpinnings, imagination, style, world-building, storytelling, resolution, among other things.

In the second half of the class, divided into two equal segments of 50 minutes each, we will be workshopping the writing of two students. Our goal is for each of you to have two turns, and approximately 5-10,000 words of your work critiqued, by the time semester ends. The final project involves significant redrafting of a story or a portion of a novel.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. Students will be notified of admissions decisions by 5:00pm ET on Wednesday, January 20th. Workshops do not meet during Shopping Week.

All workshops will be taught remotely. All workshops are to be taught and attended live, and students need to be able to attend the workshop live during the listed course day/time in order to apply/enroll.

Advanced Poetry: Workshop (130000)

Joshua Bell

2020 Fall (4 Credits)

Schedule: M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

By guided reading, classroom discussion, one-on-one conference, and formal and structural experimentation, members of the Advanced Poetry Workshop will look to hone, deepen, and challenge the development of their poetic inquiry and aesthetic. Students will be required to write and submit one new poem each week and to perform in-depth, weekly critiques of their colleagues' work.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Workshops do not meet during Shopping Week.

The Craft of Historical Fiction: Workshop (217819)

Geraldine Brooks

2021 Spring (4 Credits)

Schedule: M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Using the Harvard archives, students will complete a short story or chapter based on a character or incident that occurred on this campus anytime from its founding in 1636 to the 1970s. We will read Hilary Mantel’s Wolf Hall and Marlon James’s The Book of Night Women, examining these authors’ use of sources, voice, point of view and structure. We will examine what responsibility, if any, the novelist has to history, how to locate the voices of the unheard, and how we might confront, but not exploit, past suffering.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. Introduction to Journalism: Workshop (156630)

*Jill Abramson*

2021 Spring (4 Credits) **Schedule:** M 0300 PM - 0545 PM

**Instructor Permissions:** Instructor  **Enrollment Cap:** 12

An intense seminar for those interested in understanding the changing role of journalism and in learning the art of reporting and writing narrative stories. The course is intended for those contemplating careers as journalists or because they want a better sense of how journalism really works. Coursework will include two narrative articles that are ready for publication. Readings will include some of the best examples of modern journalism, from magazine features by authors including Gay Talese to multimedia narratives such as The New York Times' "Snow Fall."

**Course Notes:** Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. **DEADLINE:** for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. Students will be notified of admissions decisions by 5:00pm ET on Wednesday, January 20th. Workshops do not meet during Shopping Week.

All workshops will be taught remotely. All workshops are to be taught and attended live, and students need to be able to attend the workshop live during the listed course day/time in order to apply/enroll.

Poetry Workshop: BIPOC Context and Craft (216638)

Joan Kane

This poetry workshop centers the work of BIPOC writers through intensive study of poetry writing and the writing process, focusing on craft techniques of imagery, rhythm, and poetic structure. This workshop will initially focus on the generation of new work but will move toward revision-based instruction and discussion. Each student will have their poems workshopped at least twice per semester. Students are responsible for reading assigned texts, submitting required work for workshop, reading and writing critiques of fellow students’ work, accessing (livestreamed or archived) readings, reading and (writing about) one poem closely each week, and memorizing and recording two poems.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Introduction to Playwriting: Workshop (116875)

Sam Marks

2020 Fall (4 Credits)  Schedule:  M 1200 PM - 0245 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

This workshop is an introduction to writing for the stage through intensive reading and in-depth written exercises. Each student will explore the fundamentals and possibilities of playwriting by generating short scripts and completing a one act play with an eye towards both experimental and traditional narrative styles. Readings will examine various ways of creating dramatic art and include work from contemporary playwrights such as Aleshea Harris, Ayad Akhtar, Robert O'Hara, Clare Barron, Suzan Lori-Parks, and Taylor Mac, as well established work from Caryl Churchill, Edward Albee, and Harold Pinter.

Course Notes:  Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Introduction to Screenwriting: Workshop (116874)

Musa Syeed

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  Enrollment Cap: 12

Schedule: M 1200 PM - 0245 PM

The short film, with its relatively lower costs and expanded distribution opportunities, has become one of the most disruptive, innovative modes of storytelling—and is often an emerging filmmaker’s first step into the industry. This course will introduce students to the basics of short form screenwriting, including narrative theory/structure, character design, and dialogue/voice. In the first quarter of the semester, we will hone dramatic techniques through several craft exercise assignments and in-class writing. In the following weeks, students will write two short screenplays. Throughout the semester, we will be workshopping and doing table reads of student work, discussing screenplays and craft texts, and screening a wide array of short films. The emphasis will be on discovering a sense of personal voice and completing two short screenplays (under 20 pages) that the student can produce in the future, if they choose.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. Students will be notified of admissions decisions by 5:00pm ET on Wednesday, January 20th. Workshops do not meet during Shopping Week.

The Novel Lab: Studying Long-Form Narratives in Fiction (216098)

Paul Yoon

2020 Fall (4 Credits)  Schedule:  T 1200 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

What defines a novel? And what does it mean to read one as a writer? How does a painter consider a painting or a photographer a photo? This readings class will study novels through the point of view of a practicing writer. We will read one novel a week, with the goal of exploring the ways in which long-form narratives are constructed, from chapter to chapter, from one movement to another—that is, the architecture of it. Please note: this is not a workshop. You will not be sharing your work. Consider the class an investigation into all the tools a writer has to create fiction, with the end goal of producing 2 - 3 chapters of the beginning of a novel as your final project.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19.

Writing for Television: Developing the Pilot: Workshop (203266)

Sam Marks

2020 Fall (4 Credits)  

Schedule: T 1200 PM - 0245 PM  

Instructor Permissions: Instructor  

Enrollment Cap: 12

This workshop introduces the television pilot with a focus on prestige drama and serialized comedy. Students will excavate their own voice and explore the structure and execution of pilot writing through a
first draft of their own original script. With intensive reading and discussion of student work we will examine elements of TV writing, such as treatments and outlines as well as character, dialogue, tone, plot, and, most importantly, vision. Over the semester, we’ll turn ideas into worlds and worlds into scripts.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. Fiction Writing: Workshop (203265)

Laura van den Berg

2020 Fall (4 Credits) Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This course will focus on the art of writing fiction. The initial weeks will focus on reading and craft discussion—exploring craft subjects such as structure, time, point-of-view, and landscape—and generating new work through experiments in craft and imagination. Later in the term, your own fiction will serve as the primary text as the focus shifts to workshop critique and, finally, to revision. The syllabus is likely to include work from Helen Oyeyemi, Claire Vaye Watkins, Nam Le, Julio Cortázar, Italo Calvino, Nana Kwame Adjei-Brenyah, and Alexander Chee—among others.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2020 workshops, applications are due via Submittable by 11:59pm ET on Wednesday August 19. Students will be notified of admissions decisions by 5:00pm ET on Monday, August 24. The Art of Writing about Science and the Environment: Workshop (207988)

Russell Rymer

2021 Spring (4 Credits) Schedule: R 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This is a seminar in creative nonfiction writing that will take science and the environment as its subject matter. Students will research and write a series of magazine-style articles about science or scientists, intended for a general readership. Along the way, they will hone their interviewing and research skills and expressive capabilities, while contending with issues of factual accuracy, creative license, authority, and responsibility, along with the basic tenets of longform nonfiction. Ultimately students will explore the ways that hard science and subjective prose are interrelated forms. No prior experience with science is required.

Course Notes: Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. Students will be notified of admissions decisions by 5:00pm ET on Wednesday, January 20th. Workshops do not meet during Shopping Week.

All workshops will be taught remotely. All workshops are to be taught and attended live, and students need to be able to attend the workshop live during the listed course day/time in order to apply/enroll.

Narrative Nonfiction: Writing About Women and Sexual Politics: Workshop (207987)

*Susan Faludi*

2021 Spring (4 Credits)  

**Schedule:**  
R 1200 PM - 0245 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

This is a workshop class where students will learn the art of literary longform journalism and compose stories that take on questions of gender, feminism, sexuality and power, while simultaneously exploring how the media represents gender and learning the history of women in journalism. No profession has been as important to feminists in challenging society than journalism—even as journalism has been historically resistant to a feminist vision. Students will master the fundamentals of great reporting and writing—interviewing, structure, voice, style, and ethics—while crafting their own magazine-style stories that grapple with ground-level gender dramas.

**Course Notes:**  
Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. **DEADLINE:** for all Spring 2021 workshops, applications are due via Submittable by 11:59pm ET on Saturday, January 16th. Students will be notified of admissions decisions by 5:00pm ET on Wednesday, January 20th. Workshops do not meet during Shopping Week.

**Schedule:**  
TR 0130 PM - 0245 PM
All literature was contemporary at some point, but the literature that is contemporary now provides special opportunities for enjoying, questioning, and understanding the world. Literature Today focuses on works written since 2000—since most of you were born. It explores how writers from around the world speak to and from their personal and cultural situations, addressing current problems of economic inequality, technological change, structural prejudice, and divisive politics. We will encounter a range of genres, media, and histories to study contemporary literature as a living, evolving system. The course uniquely blends literary study and creative writing—students will analyze literature and make literature. The conviction that these practices are complementary will inform our approach to readings and course assignments.

**English 20**

Lightary Forms (216063)

*James Simpson*

2021 Spring (4 Credits)  
**Schedule:**  
TR 1200 PM - 0115 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
27

This foundational course for English concentrators examines literary form and genre. We explore some of the many kinds of literature as they have changed over time, along with the shapes and forms that writers create, critics describe, and readers learn to recognize. The body of the course looks to the great literary types, or modes, such as epic, tragedy, and lyric, as well as to the workings of literary style in moments of historical change, producing the transformation, recycling, and sometimes the mocking of past forms. While each version of English 20 includes a different array of genres and texts from multiple periods, those texts will always include five major works from across literary history: Beowulf (epic), King Lear (tragedy), Persuasion (comic novel), The Souls of Black Folk (essays; expository prose), and Elizabeth Bishop’s poems (lyric). The course integrates creative writing with critical attention: assignments will take creative as well as expository and analytical forms.

English 40
Arrivals: British Literature, 700-1700 (145787)

Daniel Donoghue
2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 27

An introduction to major works in English literature from Beowulf through the seventeenth century, the course will explore various ways that new literatures are created in response to cultural forces that shape poets, genres, and group identity. We will hone close reading skills, introduce rhetorical tropes, and develop techniques of critical writing.

Course Notes: Be sure to attend first class meeting to be considered for admittance.

English 45 Section: 01
Arrivals: British Literature 700-1700 (207556)

Anna Wilson
2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 27

In this course we will read some of the most significant works of literature written in the British Isles before 1700, whose influence continues to be felt in present-day writers. We will trace the early evolution of different genres - romance, epic, drama, lyric - and the emergence of English from an underdog position to a fully realized literary language. We will read some of the classics alongside some of their lesser known interlocutors, while exploring how these texts respond to and shape issues of their time, including war, shifting political regimes, national, racial, and religious identities, and changing attitudes to gender and sexuality. Come for the grounding in the great works of early British literature, stay for the dragons, genderfluid knights, dark comedies about selling your soul, and surprisingly racy sonnets.

Course Notes: Be sure to attend first class meeting to be considered for admittance.

Poets: Keats Isn't Dead: How We Live Romanticism (214513)

Vidyan Ravinthiran

2020 Fall (4 Credits)  Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor  Enrollment Cap: 27

Our thoughts and feelings about identity, self-expression, and the power of the imagination draw on the British Romantic poetry of the Long Eighteenth Century—whether we've read any or not. Focusing on John Keats (his key poems, and his key ideas, about 'negative capability', the 'camelion poet', and so on), this course makes unconventional connections into the twentieth, and twenty-first century. Tracking issues of race, class, gender and sexuality, we'll bounce from Keats into war verse; African-American poetries; world/postcolonial writing; the literature of social class; feminist experimentalism; and constructions of masculinity. Concentrators will learn how to analyze poetry in both closed and open forms.

Migrations: Narrating Displacement (216066)

Katie Daily

2021 Spring (4 Credits)  Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: Instructor  Enrollment Cap: 27

This seminar will examine the intersections of individual identity and national identity with a unifying course theme of immigrant displacement as a lived experience. Accordingly, we will examine American immigrant experiences through nonfiction from different periods and voices. The texts we'll read and
discuss will challenge what we think we know about ourselves, about others, and about the idea of where we belong. Through our readings, class discussions, and writing requirements, we will develop a more nuanced and critical understanding of the constructed nature of displacement and what it means to belong.

Course Notes: Be sure to attend first class meeting to be considered for admittance.

**Migrations: Imagined Climates: Writing in the Wake of Climate Change (216071)**

**Sarah Dimick**

2020 Fall (4 Credits)  
**Schedule:** MW 0300 PM - 0415 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 27

How do novelists and poets and essayists represent climate change? What kinds of futures do they project for our injured and shifting world? Through mysteries, spoken word poetry, science fiction, and other genres, this course confronts the representational challenges presented by planetary environmental crisis. Our focus is on the climate refugee and the myriad migrations and displacements of anthropogenic climate change. We also theorize how—and why—particular writers’ voices become central or peripheral within climate discourse. Authors may include Octavia Butler, Cherie Dimaline, Kathy Jetñil-Kijiner, Barbara Kingsolver, Nathaniel Rich, Elizabeth Rush, Juliana Spahr, and Emily St. John Mandel.

**Memory in Asian American Literature (216395)**

**Janet Zong York**

2021 Spring (4 Credits)  
**Schedule:** T 1200 PM - 0200 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

What is the status of memory in contemporary Asian American literature? We explore how remembrance and forgetting, both individual and collective, help constitute panethnic Asian America as an imagined
community. What conflicts of memory are inherited from legacies of war, exclusion, and migration? How does memory inform responses to present injustices and the ways people narrate the past and imagine the future? Other topics: form; affect and racialization; multimedia memory; memory as work; mourning and history; memorialization and monuments. Novels, nonfiction, theory and criticism, case histories, short stories, graphic narratives, and poetry may include works by: Cathy Park Hong, Aimee Phan, Ocean Vuong, Mira Jacob, Mohsin Hamid, Viet Thanh Nguyen, Jhumpa Lahiri, Ling Ma, among others.

**Boredom (216431)**

*Elizabeth Phillips*

2020 Fall (4 Credits)  
**Schedule:** TR 1030 AM - 1145 AM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

What is boredom? In many ways, it has likely never been more deeply felt, culturally contentious, and all-consumingly right now. But this feeling has a long and rich history in literature, drama, philosophy, and science. This interdisciplinary seminar will explore plays and novels by authors like Baudelaire, Beckett, Chekhov, Flaubert, Huysmans, Wallace, Warhol, and Wilson, as well as theoretical readings, psychological studies, performance art, and reality television. We will ask: how is the emotion of boredom destructive and/or generative? How might its effects and moral resonance change across lines of gender, race, and class? How does boredom transform or become magnified in spaces like schools, theaters, trench warfare, arctic winter, or solitary confinement? Assignments and projects may include papers, creative writing, music and dance, and/or social experiments.

**Contemporary American Plays: Seminar (130958)**

*Derek Miller*

2020 Fall (4 Credits)  
**Schedule:** R 0300 PM - 0500 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

This course examines recent scripted theater by American playwrights. Readings focus on work by historically underrepresented writers, including the wave of award-winning plays by Black writers such as Jackie Sibblies Drury, Michael R. Jackson, Aleshea Harris, Branden Jacobs-Jenkins, Jeremy O. Harris, and
others. We will consider the shape of the American theater, its response and resistance to contemporary social and political movements, and the pandemic's effects on the present and future of American theater.

Literature and Disability (216196)

Marc Shell

2021 Spring (4 Credits)  

Instructor Permissions:  Instructor    Enrollment Cap:  15

How has literature influenced the rhetoric and philosophy of disability? This seminar considers literary and cinematic works that focus on the body (deafness, blindness, and paralysis), the mind (madness and trauma), and language (muteness, stuttering, and dyslexia). Special attention to the disabling and enabling aftermaths of pandemics and to the effects of modern prostheses. Readings include chapters from the King James Bible and works by Brecht, Hitchcock, Keller, Martineau, Milton, Morrison, Shakespeare, Shaw, and Trumbo.

English  90DK

A Divided Kingdom: Nation, Race, and Belonging in Postwar Britain. (216412)

Kelly Rich

2021 Spring (4 Credits)  

Instructor Permissions:  Instructor    Enrollment Cap:  15

When Aldwyn Roberts, famed Trinidadian calypsonian "Lord Kitchener," landed in England, he commemorated the event by singing "London Is the Place for Me," a song celebrating the beauty and hospitality of his "Mother Country." Roberts was a passenger on the ship Empire Windrush, whose 1948 arrival from the West Indies signaled a new era of migration to the UK from its colonies, many of which would gain independence over the next fifty years. But was Britain the place for them? As many discovered, making a home there was a fraught process, fueled by long-existing structures of racial prejudice that continue and evolve to this day.

This course explores the cultural politics of British identity after 1945: a period whose social and political upheavals both radically redefine and conservatively re-entrench "British" as a category of analysis. From
the 1958 Notting Hill race riots to current-day Brexit, national belonging has always been a complex and contested process, one that fuels myriad forms of desire and alienation. During our time together, we will ask: how do artists and theorists engage with problems of inequality, histories of empire and migration, politics of race, sexuality, and class, and practices of community-building? How do they respond to these aspects of modern social life, as well as re-imagine what that sociality might look like? We will approach these questions by focusing on Black and Asian British literatures—including works by authors Buchi Emecheta, Bernadine Evaristo, Jackie Kay, Hanif Kureishi, Andrea Levy, Daljit Nagra, Caryl Phillips, Salman Rushdie, Sam Selvon, Kamila Shamsie, Warsan Shire, and Zadie Smith—as well as selections from the fields of postcolonial, feminist, and cultural studies.

Elizabeth Bishop and Others (216197)

*Vidyan Ravinthiran*

2021 Spring (4 Credits)  
**Schedule:**  
MW 0130 PM - 0245 PM  
**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
15

This course introduces students to the poetry, literary prose, and artful correspondence of one of the major poets of the twentieth century, considering her innovations in all these genres. We will look at her writing in multiple genres alongside the mid-century shift from 'closed' to 'open' verse forms, and relate stylistic issues to the intellectual and social changes, and political and historical developments of the period. Bishop's critique of received ideas about nationality, race, power, gender, sexual orientation, and the overlap between culture and nature, is connected with her status as a cosmopolitan poet with links to Canada, the U.S. and Brazil. 'Others' refers both to how her writing comes to terms with the (sociopolitical) reality of other people, and to the comparisons we'll draw between her writing and that of other poets.

Five Shakespeare Plays (146586)

*Marc Shell*

2020 Fall (4 Credits)  
**Schedule:**  
W 0300 PM - 0545 PM  
**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
15
We'll be reading Hamlet, King Lear, The Merchant of Venice, Henry V, and The Tempest. Special attention to dramatically motivating issues involving familial kinship, racial and linguistic difference, and national and religious conflict. Philosophical and historical issues include Shakespeare's unique use of language, the ambiguous authorship of the plays, gender issues informing stage production, the sense of place in Shakespeare Globe Theatre, and the influence of the Shakespearean canon in the various arts and media.

Course Notes: This course, when taken for letter grade, meets the Department of English Shakespeare requirement. This class will run for two hours.

Consciousness from Austen to Woolf (118850)

*James Wood*

2020 Fall (4 Credits)

**Schedule:** M 0300 PM - 0500 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 15

A look at the complex ways in which writers represent their characters' thought in texts by Austen, Flaubert, James, Tolstoy, Chekhov, Giovanni Verga, and Woolf. More broadly, traces the development of stream-of-consciousness, from Austen's incipient mastery of free indirect style, through Flaubert's more sophisticated use of it, to Woolf's full-blown inner monologues, seeing this development as not merely a fact of English and American literature, but as a phenomenon of world literature and an element of our modernity.

**English 90MR**

Race and Religion in Medieval Literature (216396)

*Anna Wilson*

2021 Spring (4 Credits)

**Schedule:** W 1200 PM - 0245 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 15

This course focuses on representations of race, religion, and cross-cultural contact in literature written in western Europe between approximately 800 and 1450 CE, before colonial contact with the Americas. During this period, diplomats, pilgrims, and merchants crisscrossed Europe and Asia, generating fascination with far-away lands and a booming trade in exotic goods; Christian kingdoms of western Europe formed uneasy alliances under the banner of a shared religion to invade Muslim territories and sack Jewish communities in the Crusades; and a global pandemic spread via fleas on ship rats, killing hundreds of thousands and fomenting xenophobic violence. We will read texts from a variety of genres, including religious plays, romances about inter-faith marriage, chansons de geste (poems celebrating deeds in war, often grotesquely violent), and 'armchair travel' guides. We will trace the emergence of modern concepts of race and ethnicity in the way medieval Christian writers represented religious difference in/as bodily difference;
develop a critical, historically-situated toolkit for analysing medieval concepts and terms around race, ethnicity, and nation; and analyse the role of the middle ages in current conversations about race in America.

Prison and Performance (216432)

Elizabeth Phillips

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 15

This seminar will explore the history and philosophy of prison with particular reference to the role of literature and art in rehabilitation and decarceration. We will study plays, poetry, and performances that depict incarceration, as well as works written and developed by incarcerated or formerly incarcerated individuals. We will discuss the efficacy of prison arts programming and explore themes of justice, racism, and identity as they relate to incarceration across a diverse set of texts from sociology, performance studies, autobiography, and psychology. Authors include Angela Davis, Michelle Alexander, Anna Deavere Smith, Michel Foucault, Suzan-Lori Parks, Samuel Beckett, Rena Fraden, Naomi Wallace, George Jackson, and others.

Performing Criticism (216430)

David Levine

2020 Fall (4 Credits) Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 12

What makes "Great Criticism?" Analytic clarity? A surfeit of objectivity? Dedication to art and artists? Or is great criticism more like great art, relying on a strong point of view and deep personal investment? This course tests the latter view, by treating works of criticism as dramatic monologues to be
analyzed, invested with desire, and performed. We will use techniques of script analysis to pay closer attention to how arguments are constructed, and acting techniques to listen closely for the ways that criticism is always, to quote Nietzsche, "the confession of its originator, and a species of involuntary and unconscious autobiography".

This course will range through the history of English criticism from Philip Sidney to Zadie Smith. Students will also learn basic techniques of script analysis, acting, and public speech, and apply these techniques to works of criticism, culminating in a final recorded performance of an essay-as-monologue.

Race and Jurisprudence (216401)

*Louis Menand*

2020 Fall (4 Credits)  
**Schedule:** T 0945 AM - 1145 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

How has the American judicial system dealt with racial discrimination, racial segregation, racial exclusion, and systemic or institutional racism? Has the design of the American legal system made it easier or harder to remedy cases of racial inequality and injustice? What should we expect from the courts in the future?

We study cases involving Americans of African and of Asian ancestry, beginning with Dred Scott and ending with the Harvard College admissions case. Visitors include Drew Faust, Mae Ngai, Richard Pildes, and William Lee and Felicia Ellsworth, the trial lawyers in the Harvard College case.

The primary readings are legal documents: the Constitution, judicial opinions, and the statutes judges interpret. We'll analyze the opinions in order to understand the legal logic that led to their outcomes. We will see, by doing this, how courts are constrained by the system that was designed by the Constitution's framers and by the traditions of the common law. We will also consider the historical context in which these cases were decided. Two papers and class participation required. Enrollment limited to 15.

Staging Shakespeare (212789)

*Derek Miller*

2021 Spring (4 Credits)  
**Schedule:** M 0945 AM - 1145 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15
Like any other plays, those by William Shakespeare pose serious challenges for actors, directors, designers, and audiences, problems they must solve in performance. Because Shakespeare’s plays have such a long history in the theater, they offer a unique window into ever-evolving performance aesthetics. In staging Shakespeare, artists always attempt to capture what they perceive as Shakespeare's universal achievements and to amplify his work's resonance for a contemporary audience. This seminar examines a history of Shakespeare in the English-speaking theater to illuminate how Shakespeare helps to shape theater and how the theater helps to make Shakespeare. We will read a number of Shakespeare's works, but will attend not to literary interpretations of the texts, but rather to (a) the problems those texts create in performance and (b) how artists have solved those challenges over the past four centuries. In other words, we will explore both prior approaches to staging Shakespeare and what in Shakespeare’s plays makes them particularly difficult—and exciting—to stage.

Course Notes: This course, when taken for letter grade, meets the Department of English Shakespeare requirement.

English 90SM
Speculative Modes: Fiction, Technology, Justice (216394)

Janet Zong York

2020 Fall (4 Credits)  

Schedule: T 0300 PM - 0500 PM  

Instructor Permissions: Instructor Enrollment Cap: 15

How do fiction and technology's intersections fuel modes of speculation: the imagining of how things in the world could be? We investigate how different imaginative works question and reinvent our relationships to technology; inspire reflection and action; and ask what alternatives exist to practices that appear inevitable or structures that seem entrenched. Fiction allows us to explore how the design and impact of ubiquitous surveillance, data collection, and artificial intelligence reinforce tacit ideas about power, identity, ethics, labor, and the nature of reality itself. We read short stories, essays, TV episodes, graphic narratives, digital media, datasets, and journalism, in addition to perspectives from studies of design, human-computer interaction, and society and technology. Ursula LeGuin, Ken Liu, N.K. Jemisin, Ted Chiang, Black Mirror, Octavia Butler, Kelly Link, among others. We aim to gain insight into technical processes and cultural narratives, developing our own critical models and projects for speculation.

Juliet, Rosalind, Portia, Ophelia, Isabella, Cressida, Cleopatra, Cordelia, Imogen, Volumnia, Lady Macbeth—the women of Shakespeare's plays have become iconic figures, cited, admired, critiqued, and invoked in every generation. But in the English public theater of Shakespeare's time no women were permitted to appear onstage. All these famous roles were played by boy actors; Shakespeare wrote their words and their stories—parts so often celebrated for their truth to nature—knowing they would be performed by young men. In the cross-dressing plays, in which the heroine disguised herself as a boy, the boy actor would then be playing a girl playing the part of a boy. When actresses began to perform in Shakespeare's plays, at the end of the seventeenth century, they immediately began to make the roles their own, and productions of Shakespeare were dominated, over the years, by female stars. In the mid-twentieth century feminist critics and theorists drew renewed attention to women and gender in Shakespeare, producing a rich and diverse set of books and articles, many now regarded as classic. And in what might have been anticipated as a telling reversal, contemporary directors and performers have staged productions in which major male roles, like King Lear and Prospero, are played by women.

The seminar will read and discuss a number of Shakespeare's plays, together with criticism, theory, and stage history, to see how women—characters, actors, critics, audiences—have shaped our understanding of Shakespeare, and how Shakespeare has influenced ideas about women, both over the years and in the present day.

Why We Tell Their Stories (216094)

Katie Daily

2020 Fall (4 Credits)  
Schedule: W 0945 AM - 1145 AM

Instructor Permissions: Instructor  
Enrollment Cap: 15

In this course, we explore how immigration issues are depicted on film as a way to advance political agendas. We will consider films as textual ways to read political debates surrounding the processing and treatment of immigrants in contemporary America. We'll begin by examining post-9/11 documentary films and the US government's own cinema products. From there, we'll transition to dramas to examine imaginative representations of real-life concerns. Across the semester, we consider who owns narratives and how particular themes (i.e. detention, border crossings, and racial profiling) are imagined on film, working to become visual scholars who can dissect political and social justice conversations.

Sophomore Tutorial: Literary Methods (216074)  
Derek Miller  
2021 Spring (4 Credits)  
Schedule:  T 0900 AM - 1145 AM  
Instructor Permissions:  Instructor  
Enrollment Cap:  18
This course, taught in small groups and required for concentrators, introduces theories, interpretive frameworks, and central questions about literature and literary media. What do we do when we read? What is an author? What do we mean by “literature” itself? How might we compare and evaluate interpretations? How do the historical, social, cultural, and legal frameworks around a text shape its meanings and its effects? Combining major critical and theoretical writings with primary works, the course investigates how literary production and interpretation are informed by philosophical and aesthetic traditions, gender and sexuality, race and ethnicity, national and post-colonial identities, and the material forms in which literature circulates, from parchment books to the internet. Students will also practice fundamental literary research methods through close engagement with Harvard libraries.

Whose English? The Diverse History of the English Language (126847)

Daniel Donoghue

2020 Fall (4 Credits)

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

From its obscure origins, over its long history, and with today’s global reach, the English language has meant many things to the people who use it. It also prompts many questions. Why is pronunciation at odds with spelling? What happened to “thou”? What did Shakespeare sound like? How do we know? Why the love/hate relationship with grammar scolds? What about the future of English as a world language? Knowing the fascinating backstory of the language will give you more confidence as a writer; it also sharpens your skills as a reader as you see things you never noticed before. A final promise: geeking out will equip you to win countless arguments with friends, roommates, and family.

Course Notes: Formerly offered as Culture & Belief 45: History of the English Language.

Enrollment Cap: n/a

An introduction to the Bible, which William Blake called 'the great code of art.' The course gives an overview of the biblical writings, of the religions that arose from them, and the arts they inspired: church music, architecture, painting, and poetry. Attention will be given especially to English poetry, from the Old English Genesis to Spenser, Milton, Hopkins, Eliot, Jones, and popular songs. Even for non-religious authors, the Bible is a rich source of images and spiritual energy. Students may create art projects in response to their chosen parts of the Bible.

Course Notes: Formerly offered as AIU 37: Introduction to the Bible in the Humanities and the Arts.

English 102C

Introduction to Old English: Inside the Early Medieval English Classroom (110604)

Joseph Shack

Daniel Donoghue

2020 Fall (4 Credits)

Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course serves as an introduction to Old English, the language spoken and written by the inhabitants of early medieval England from the fifth century until around 1100. Although many of its linguistic features are recognizable in Modern English, Old English must be learned as a foreign language. The first half of the course focuses on learning the grammar of Old English. We begin translating short texts in the third week, before progressing to more complex prose and poetry as the semester continues. Our readings will consist of “classroom” texts used for the education of medieval clergymen and monks: Æflric's Colloquy, an early dramatic text that facilitated language learning by means of a fictional dialogue; scientific texts explaining the workings of the natural world; wisdom poetry that sought to catalogue how members of society ought to act; riddles that offered playful intellectual exercises their audience. Alongside translation, some time will be devoted to discussion organized around our translations and a few select readings to familiarize students with early medieval England and its social, intellectual, and political contexts.
**Course Notes:** This course, when completed with an honors grade and in combination with English 103, fulfills the College language requirement and the English Department’s Foreign Literature requirement.

Advanced Old English: Riddles (216067)

*Daniel Donoghue*

2021 Spring (4 Credits)  
**Schedule:** TR 1200 PM - 0115 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

What deepens your grasp of Old English grammar, improves your translation skills, and ends with a creative project? At times child's play, at times deadly earnest (think of Oedipus and the Sphinx), enigmatic puzzles have fascinated us for many centuries. They were particularly prolific in the earliest literature in English, including over ninety poetic riddles in the Exeter Book. We will translate a number of such riddles, read many more in translation, and speculate on the philosophical questions they raise about language and meaning. The semester will end with a creative project. Prerequisite: one term of Old English.

**Course Notes:** Students who complete both English 102 and 103 with honors grades will fulfill the College language requirement and the English Department’s Foreign Literature requirement.

Milton's Paradise Lost (203023)

*Gordon Teskey*

2021 Spring (4 Credits)  
**Schedule:** MW 0430 PM - 0545 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course focuses on Milton's most famous work, *Paradise Lost*, the greatest long poem in English and the only successful classical epic in the modern world. Milton went totally blind in his forties and composed *Paradise Lost* by reciting verses to anyone available to take them down, like the blind prophets and poets of legend. Yet the questions he raised are surprisingly enduring and modern. We will consider how he generates the sublime and how he builds great scenes and characters, especially his most famous one, Satan.
English 141

When Novels Were New (111565)

Deidre Lynch

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

What was it like to read and write a novel at a moment before that term named a stable category and before the genre’s conventions were established? How did it feel to be a writer or reader in an era when the novel was (as some authors put it in the middle of the eighteenth century) "a new species" or "a new province" of writing?

This class is devoted to the remarkable record of literary experimentation that forms the history of the early novel. As we study works by Aphra Behn, Mme de Lafayette, Daniel Defoe, Eliza Haywood, Samuel Richardson, Henry Fielding, Frances Burney, and Jane Austen, we'll attend particularly to questions of genre and genre hierarchy, fictionality and realism. To investigate what was novel about novels, we will ponder, for instance, how novels differ from epics or histories or the news in newspapers. That pondering will give us rich new insights into the formal devices that empowered this new kind of fiction as it claimed--unlike its predecessors in the narrative line-- to tell the truth: a claim that would eventually, by the time of Jane Austen, underwrite the novel's emergence as the crucial genre of modern times. At the same time, we will also investigate what this emergence can tell us about modernity itself--about love, sex, and marriage, consumer capitalism, race, and empire. We'll cap our reading by pairing Austen's Pride and Prejudice with an extraordinary novel in letters from 1808 (only recently rediscovered, and anonymously published), The Woman of Colour: A Tale.

English 160BG

Virginia Woolf and the Bloomsbury Group (205107)

Marjorie Garber

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a
Virginia Woolf, novelist, essayist, feminist and critic, was at the center of a remarkable group of creative intellectuals who changed the course of the 20th century—and the present day. Her sister was the artist Vanessa Bell, her husband the political writer and publisher Leonard Woolf, her lifelong friends included the biographer Lytton Strachey, the economist John Maynard Keynes, the painter Duncan Grant, and the art historians Roger Fry and Clive Bell. Together with G.E. Moore, E.M. Forster, Bertrand Russell, Desmond MacCarthy, Vita Sackville-West, and Lydia Lopokova, the members of this powerful coterie were innovators—not only pioneers in their fields but also witty commentators and skilled critics across the disciplines.

Not content to change merely the arts and letters of the 20th century, these intimate friends were also social pioneers: some were openly queer, some openly polyamorous, most outrageously iconoclastic, and all radically insistent on the equality of the sexes. They have come to be known as The Bloomsbury Group, named after the area in London where many of them lived and worked. This course will look at the works these people created across the spectrum of the arts, as well as the friendships that sustained this work of nearly half a century, as the vital context that allowed for the major novels and essays of Virginia Woolf.

Extreme Reading: The James Joyce Challenge (203059)

*Beth Blum*

2021 Spring (4 Credits)  
**Schedule:** MW 1030 AM - 1145 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Speaking of James Joyce’s *Ulysses*, T.S. Eliot confessed: “I wish, for my own sake, that I had not read it.” How does one write literature after Joyce’s revolutionary prose? This course explores different authors’ responses to that challenge. You will be introduced to one of the most influential authors of the 20th century through selected readings from Joyce’s key works: *Dubliners*, *A Portrait of the Artist as a Young Man*, *Ulysses*, and *Finnegans Wake* (excerpts). After immersing ourselves in Joyce’s oeuvre, we will track its afterlife in literature (Virginia Woolf, Zadie Smith), graphic narrative (Chris Ware, Alison Bechdel), and popular culture.

English 168D

Postwar American and British Fiction (118852)

James Wood

2021 Spring (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

In this class, we will examine novels and short stories published since 1945 in Britain and the United States. Though certain themes naturally emerge -- belonging and not belonging; immigration and emigration; estrangement, race and post-colonial politics; liberalism and the importance of "noticing" others; the role of realism and the various postmodern movements in reaction to realism -- the primary emphasis is on learning how to read slowly, and learning how to enjoy, appreciate and properly judge a living, contemporary literature.

Course Notes: This course, when taken for a letter grade, meets the Core area requirement for Literature and Arts A.

Note: Formerly English 160w.

English 175PL

American Protest Literature: Paine & Wheatley to the Present (119747)

John Stauffer
Examines the rich tradition of "protest literature" in the United States. The focus is on civil rights; gender & women's rights; labor; and environmentalism. We explore how expressions of dissent have functioned as powerful "voices" of individuals and movements, and as aesthetic, political, and performative texts in specific contexts. And we examine how historical forms of dissent have shaped today's protests. Readings range from fiction, photography, and video to speeches, essays, poetry, and music.

**Course Notes:** Formerly offered as Culture & Belief 49: American Protest Literature from Tom Paine to Tupac.

**English 177PM**

Broadway, 1940–Present (130682)

*Derek Miller*

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

**Instructor Permissions:** None  **Enrollment Cap:** n/a

Cultural education usually occurs piecemeal: a novel from this period, a poem from that. Cultural works are not, however, truly isolated from each other, but rather appear as artifacts of cultural systems. This course uses cultural works to understand a single cultural system: Broadway since 1940. Comparative analyses of musical and non-musical plays will illuminate how Broadway has changed over the past seventy-five years. We will attend to economic, social, technological, and other transformations in how Broadway makes, markets, and measures its shows. Through our explorations of some of those shows, we will grasp the system's effects on major dramaturgical strategies including approaches to plot, characterization, and staging. The course thus simultaneously surveys major works of the commercial American theater, narrates a history of Broadway since 1940, and models how to think about the relationship between that history of the Broadway system and the works it produces.

Modern Women Writers (213541)

*Elizabeth Phillips*

2021 Spring (4 Credits) **Schedule:** MW 1030 AM - 1130 AM
What does it mean to be, or feel as, a woman? This course will survey major female authors from the twentieth and twenty-first centuries who ask these questions in their novels, plays, and essays. In our lectures, we will move through literary explorations of womanhood in Modernism, to Expressionism, the Feminist movements, and on to contemporary questions of trauma, reproductive rights, love, activism, sexuality and gender identity, race, sexual exploitation and abuse, camaraderie, unity, and comedy. Authors include Virginia Woolf, Margaret Atwood, Toni Morrison, Audre Lorde, Djuna Barnes, Sally Rooney, Alice Birch, Elena Ferrante, and Chimamanda Ngozi Adichie. Final assignment will be a creative project of your own design based on course themes and materials.

English 190VE

Voices of Environmental Justice (216068)

Sarah Dimick

2021 Spring (4 Credits) Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None Enrollment Cap: n/a

This course considers the relationships between systems of human injustice and environmental issues—including industrial disasters, ocean acidification, and resource extraction. We examine environmental justice writing and artwork with a transnational, interconnected approach. For example, we ask how the Ogoni activist Ken Saro-Wiwa's writing on oil pipelines in the Niger Delta anticipates Native American protests against the Dakota Access Pipeline. We draw connections between a poem documenting silicosis in the lungs of West Virginian coal miners and a novel portraying the aftermath of the Union Carbide gas leak in Bhopal. We compare a nonfiction account of Kenyan women resisting deforestation and an iPhone app reclaiming public access along the Malibu coast. We explore questions of voice, genre, and narrative, cataloguing the strategies writers and artists use to reach a global audience.

English 191C

Constellations (212761)

Homi Bhabha

HARVARD UNIVERSITY
"Constellations" is an attempt at putting key literary works in conversation with significant texts from other disciplines and discourses --- philosophy, politics, history, law, and the social sciences. The conversations initiated between these texts might converge on conceptual or historical issues; on other occasions, they may conflict on matters of aesthetic form or cultural belief. What gives these "coupled" conversations a thematic or curricular coherence is their sustained interest in the life-worlds of minorities as they struggle to gain the recognition and protection of human rights. One of the key questions running through the course will be what it means to make a claim to human dignity from a position of inequality and injustice.

I have chosen landmark texts that describe a wide arc of historical experience from colonization and segregation to migration and the predicament of refugees. These conditions of life and literature will be framed by questions of national sovereignty and international cosmopolitanism. Discourses of race, gender and identity will intersect with conceptual issues of cultural representation and literary form. The conversations initiated by this course will be polyphonic and plural.

English 200D

Advanced Topics in Old English: The Riddle Tradition (204019)

Daniel Donoghue

2021 Spring (4 Credits)  Schedule: TBD

Instructor Permissions: Instructor  Enrollment Cap: 15

For students who have a reading knowledge of Old English, this seminar will build upon that competence and offer new directions to pursue. How do we define a riddle? What’s the difference between it and other kinds of enigmatic discourse? The genre of riddles opens up questions concerning the relation between language and reality, human perception, and the construction of meaning.

Course Notes: Graduate students who enroll in English 200d must audit English 103r.

English 210Q

Queer/Medieval (207592)

Anna Wilson

2020 Fall (4 Credits)  Schedule: W 1245 PM - 0245 PM

Instructor Permissions: Instructor  Enrollment Cap: 15

The / in this course title can suggest slippage or interchangeability, opposition and polarization, or (in fanfiction tagging conventions) erotic or romantic friction between two entities. This course functions as an introduction to queer theory as an intellectual tool with which to read texts far removed from the modern political, cultural, and social discourses from which queer theory emerged. We will ask: what can queer theory offer readers of medieval literature in its explorations of gender, sexuality, power, narrative, trauma, and time? Each week we will read a single queer theorist alongside a single medieval text to do a deep dive into both. Theorists include Judith Butler, José Esteban Muñoz, Lee Edelman, Eve Sedgwick, and Carolyn Dinshaw. Texts will be from the European Middle Ages (roughly 500-1500) that think through questions of gender and sexuality, including the plays of Hrotsvitha of Gandersheim, the Iais of Marie de France, the poetry of Baudri of Bourgueil, Roman de Silence, The Book of Margery Kempe, and Alan of Lille’s Plaint of Nature. Readings will be in modern translation or in glossed Middle English; some experience with the latter is recommended but not necessary.

Gender, War, Writing, Rhetoric, and Reading: Troilus and Criseyde from Late Medieval to Early Modern (216208)

James Simpson

2021 Spring (4 Credits)  Schedule:  M 0300 PM - 0500 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

The material of this course consists of the following exceptionally rich late medieval and early modern Trojan materials: Chaucer's House of Fame; Chaucer's Troilus and Criseyde; Lydgate's Troy Book (Book 2); Henryson's Testament of Cresseid; and Shakespeare's Troilus and Cressida. We will be guided into these materials by the inter-related topics listed in the course title. Wherever possible and appropriate, we will absorb the publication conditions and media of these texts and/or performances.

English 224SR
Shakespeare and Racial Justice (216478)

Marjorie Garber

2020 Fall (4 Credits)  Schedule:  T 0945 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  15

One of the most powerful effects of Shakespeare's plays is the uncanny way they both reflect and anticipate the concerns of readers and audiences over time. The plays that address questions of racial justice and injustice seem strikingly pertinent now, just as they have at other key moments from the early modern period to the present.

Working with the play-texts, with literary criticism and theory, and with stage history and material culture, this graduate seminar will examine issues of race, justice, performance and resistance as manifested in Shakespearean drama, both historically and in our own time. Plays to be considered include Titus Andronicus, The Merchant of Venice, Othello, Antony and Cleopatra, and The Tempest. Our concerns will be with language and character and with a range of theoretical perspectives, as well as with thematic issues and facets of race, including color, religion, humoral theory, and the idea of the stranger. Participants will be invited and encouraged to address both the plays and ongoing current events, reading them together—or against one another—as theatre, criticism, and critique.

Course Notes:  Graduate seminar with limited enrollment, admission by permission of instructor. Priority given to FAS Ph.D. students in English, American Studies, Comparative Literature, and African American Studies. All other FAS Ph.D. applicants should indicate their familiarity with Shakespeare. If space in the seminar permits, applications will be considered from English department senior concentrators who have already taken at least one semester of Shakespeare at Harvard.
What challenges and opportunities arise for artists and writers working under dire conditions—martial, political, medical, and natural states of emergency? To what extent are such exceptional conditions the rule (as Walter Benjamin proposed)? Co-taught by Stephen Greenblatt (English) and Joseph Leo Koerner (History of Art), this course considers art and literature in states of siege against the backdrop of juridical theories of such states. This class is also offered as HAA 253k.

In an age of scientific and political revolution, how do poets respond when common beliefs about God, humans, cosmic and social order, consciousness, and gender have been taken away? Modern poetry starts in the seventeenth century when poets, notably women poets, sought new grounds for poetic expression.

In an age of scientific and political revolution, how do poets respond when common beliefs about God, humans, cosmic and social order, consciousness, and gender have been taken away? Modern poetry starts in the seventeenth century when poets, notably women poets, sought new grounds for poetic expression.

In an age of scientific and political revolution, how do poets respond when common beliefs about God, humans, cosmic and social order, consciousness, and gender have been taken away? Modern poetry starts in the seventeenth century when poets, notably women poets, sought new grounds for poetic expression.

When, in 1792, one Charlotte Palmer published a work of fiction entitled *It Is and Is Not a Novel*, her choice of title, both teasing and fence-sitting, suggested a long history of generic fluidity. It also suggested that by the end of the eighteenth century this history was drawing to a close, as if the moment had arrived when it could be viewed through the lens of a certain playful self-consciousness. Our work this semester will be devoted to the record of remarkable narrative experiment preceding this moment of generic consolidation: preceding the moment, which arrived later than we might think, when a disparate range of fictions—including many calling themselves "histories"—could be categorized retroactively as examples of "the" novel and treated as "imaginative literature."

Early modern writing does a remarkable job of testing our twenty-first-century expectations about literary kinds and our twenty-first-century convictions about how those kinds relate respectively to probability, knowledge, evidence, fact, and believability. We find factually-based biographies that draw unabashedly on the conventions of the heroic romance; we find travel narratives that are part allegory, part scientific discourse; and, most interestingly for our purposes, we find fictions that claim to report the truth. These early fictions’ documentary pretenses, their affinities for matters of fact and transcripts of real life, will be one recurrent concern for this seminar. The overlap between the novelist and the juror in a legal trial (both of whom, according to Ian Watt, take a "circumstantial view of life") will be another. Throughout the semester we’ll probe Bakhtin’s suggestion that the moment of the novel coincides with that moment when Europe is thrust out of its cultural isolation and enters into relations with the entire globe—a suggestion that helps us see why questions about empire, colonial domination, racialization and chattel slavery loom so large in this writing. And one additional question that is likely to inform our discussions goes like this: why are the secret truths of female sexuality (white and black) so often the referent of early realism?

Course Notes: Graduate students who wish to obtain 200-level credit should be auditors in English 141 rather than enrolling in it officially.

Twentieth-Century Texts: Graduate Seminar (119737)

Louis Menand

2020 Fall (4 Credits)  
**Schedule:** M 0945 AM - 1145 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

A reading course of works important for understanding twentieth-century literary and intellectual history. Some of the works will be drawn from the Generals list, and half will be chosen by the instructor and half by the class. The goals are 1) familiarize ourselves with 20th century works "everyone" is expected to know something about; 2) practice for a very common instructional situation: having to get up a new text and introduce class discussion about it in a week.

**Course Notes:** Course is open to all graduate students in FAS, and from other schools with permission. No undergraduates.

Modern and Contemporary Poets (130676)

Stephanie Burt

2021 Spring (4 Credits)  
**Schedule:** W 1200 PM - 0200 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

Major poets and poems from T.S. Eliot and Marianne Moore almost to the present day: we may also read, among others, William Carlos Williams, Wallace Stevens, Elizabeth Bishop, Robert Lowell, Lorine Niedecker, Gwendolyn Brooks, Bernadette Mayer, J F Herrera, James Merrill, C. D. Wright, and Terrance Hayes. Appropriate both for students who know some of these poets well, and for those relatively new to the study of poems.

Humanists of the 21st century are looking at a changed professional landscape. Major shifts in higher education, and in the college and university job market for humanists, predate the COVID-19 pandemic, but the pandemic has brought these shifts into starker relief—even as it has revealed new opportunities for humanists in the fields of digital learning and educational media production, K-12 education, higher education administration, education policy, and more.

Teaching the Humanities with New Media: A Poetry in America Practicum will enable students to experience some of these newer career opportunities by "embedding" as Research and Pedagogy Associates in Poetry in America: The City from Whitman to Hip Hop, a for-credit course being offered to high-school students—most of them from Title I and Title I-eligible schools—across the US and around the world. This semester’s practicum will provide students an opportunity to gain exposure to, and to build skills in, the world of online education, broadly defined. Poetry of the City (POTC) is offered in partnership with the National Education Equity Lab and with Arizona State University. The course will be offered under auspices of ASU’s online high school, ASU Prep Digital.

Students enrolled in the practicum will have official titled roles within the ASU course that may provide them useful credentials for the future. Visit poetryinamerica.org to learn more about Poetry in America and its programs.

Course Notes: Jointly offered with Harvard Kennedy School (as SUP-472 Education Equity Through A Solutions-Targeted Lens) and Harvard Graduate School of Education.

Who Cares about Modernism?: Literary Studies and the Problem of Periodization (212774)

Beth Blum

2020 Fall (4 Credits) Schedule: R 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 15

This graduate seminar uses modernism as a test case for debates regarding the merits and limits of literary periodization. Though our focus is modernism, we will be engaging with examples of similar debates from other periods, such as challenges to the medieval/ Renaissance divide, calls for “presentist Shakespeare,” the manifesto of the Victorian v21 collective, and discussions regarding the utility of labelling...
contemporary literature as "post-45." We will examine the contingencies and controversies of modernism's fraught self-formation, reading detractors including Wyndham Lewis, Laura Riding, and Edith Wharton, as well as figureheads such as Woolf, Lawrence, and Joyce.

Primary texts are designed to partly overlap with the generals list and may include: Joyce’s *Portrait of the Artist as a Young Man*, Woolf’s *To the Lighthouse*, Wharton’s *The House of Mirth*, and more. Secondary readings to include: Eric Hayot, Rita Felski, Paul Saint-Amour, Fredric Jameson, Kenneth Burke, Susan Stanford Friedman, René Wellek, Gerald Graff, Ted Underwood, David James and Urmila Seshagiri, Wai Chee Dimock.

Migration and the Humanities (205269)

*Homi Bhabha*

*Mariano Siskind*

2021 Spring (4 Credits)

**Schedule:** R 0300 PM - 0500 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 15

By focusing on literary narratives, cultural representations, and critical theories, this course explores ways in which issues related to migration create rich and complex interdisciplinary conversations. How do humanistic disciplines address these issues—human rights, cultural translation, global justice, security, citizenship, social discrimination, biopolitics—and what contributions do they make to the "home" disciplines of migration studies such as law, political science, and sociology? How do migration narratives compel us to revise our concepts of culture, polity, neighborliness, and community? We will explore diverse aspects of migration from existential, ethical, and philosophical perspectives while engaging with specific regional and political histories.

Public Humanities Workshop (212794)

*Martin Puchner*

2021 Spring (4 Credits)

**Schedule:** TBD

**Instructor Permissions:** Instructor

**Enrollment Cap:** 15
Public humanities are becoming increasingly central for careers both inside and outside of academia. This workshop, which is open to beginning and advanced graduate students, introduces participants to the tools they need to address audiences other than specialists in their own field. These tools range from writing op-eds based on dissertation research to writing general interest books, and also include book reviews, podcasts, social media strategies and more. While we will discuss some historical context, the emphasis is on practice and skills. Our work will be supplemented by visits from editors and literary agents. Because the course is a workshop, enrollment is limited to 12.

Glenda Carpio

2021 Spring (4 Credits) Schedule: T 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This second-year proseminar has a two-part focus: it introduces students to the craft of scholarly publishing by helping them revise a research paper for publication in a peer-reviewed journal by the end of the course. It thus gives students the tools to begin publishing early in their career. It also introduces students to the growing array of alternative careers in the humanities by exposing them to the work of scholars who are leaders in fields such as editing, curating, and digital humanities.

Course Notes: Open to English graduate students only.
Prerequisite: For G2+ students

Humanists of the 21st century are looking at a changed professional landscape. Major shifts in higher education, and in the college and university job market for humanists, predate the COVID-19 pandemic, but the pandemic has brought these shifts into starker relief—even as it has revealed new opportunities for humanists in the fields of digital learning and educational media production, K-12 education, higher education administration, education policy, and more.

Teaching the Humanities with New Media: A Poetry in America Practicum will enable students to experience some of these newer career opportunities by "embedding" as teaching staff (G4+) or Research and Pedagogy Associates (G1-G3) in Poetry in America: The City from Whitman to Hip Hop, a for-credit course being offered to high-school students--most of them from Title I and Title I-eligible schools--across the US and around the world. This fall's practicum will provide students an opportunity to gain exposure to, and to build skills in, the world of online education, broadly defined. Poetry of the City (POTC) is offered in partnership with the National Education Equity Lab and with Arizona State University. The course will be offered under auspices of ASU's online high school, ASU Digital Prep Digital.

Students enrolled in the practicum will have official titled roles within the ASU course that may provide them useful credentials for the future.

Visit poetryinamerica.org to learn more about Poetry in America and its programs.

Course Notes: This practicum is open to G1-G3 students in FAS seeking course credit, and to G4 students and above seeking paid teaching work. GSE students in any of the Master's or PhD programs are welcome to apply, as well as undergraduates planning to pursue teaching careers.

Sustainable Development (109934)

William Clark
Alicia Harley
2021 Spring (4 Credits)  Schedule:  MW 1030 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  40

Explores contemporary understandings and practical implications of the idea of sustainable development. Investigates the meanings and measures that different groups have given to "sustainable development;" scientific understanding of the complex social-environmental systems we seek to develop sustainably; and lessons on how societies have avoided the "tragedy of the commons" while instituting practical action that advances sustainable development effectively and equitably. Employs case studies in development to meet needs for energy, food, water and health.

Environmental Politics (112610)

Sheila Jasanoff
2020 Fall (4 Credits)  Schedule:  MW 1030 AM - 1145 AM
Instructor Permissions:  None  Enrollment Cap:  n/a

An introduction to the history, organization, goals, and ideals of environmental protection in America. Examines the shifts in emphasis from nature protection to pollution control to sustainability over the past hundred years and develops critical tools to analyze changing conceptions of nature and the role of science in environmental policy formulation. Of central interest is the relationship between knowledge, uncertainty, and political or legal action. Theoretical approaches are combined with case studies of major episodes and controversies in environmental protection.

Class Notes:  First-year students should consult instructor.
Environmental Sci & Public Pol  90E Section: 0

Conservation Biology (119814)

Aaron Hartmann

2021 Spring (4 Credits)  

Schedule:  
F 1200 PM - 0115 PM  
F 0900 AM - 1015 AM

Instructor Permissions:  Instructor  
Enrollment Cap:  n/a

The major goal of conservation biology is to preserve and recover genetic, species, and ecosystem diversity through evidence-based assessment, analysis, and management. This course will integrate evolutionary and ecological theory into resource management, economics, sociology, and political science to explore conservation strategies associated with habitat fragmentation and loss, exotic species invasions, over-harvesting and sustainable development, re-wilding, and other relevant topics across the ever-changing wildlife-human landscape relationship. State-of-the-art tools and methodologies will be introduced and showcased with real examples. Weekly classes will involve discussions of emerging conservation issues through the reading of research papers as well as hands-on learning of methodologies of conservation science through analysis of real data. Seminars and discussion forums with guest researchers and field trips with hands-on data collection will also be offered.

Environmental Sci & Public Pol  90G

The Law and Policy of Climate Change: Influencing Decision Makers (208113)

Aladdine Joroff

2020 Fall (4 Credits)  

Schedule:  
F 0400 PM - 0530 PM  
F 1030 AM - 1200 PM

Instructor Permissions:  Instructor  
Enrollment Cap:  30

Empirical data demonstrate that the climate is changing and that these changes could produce increasingly serious consequences over the course of this century. Governments and private actors
around the world are strategizing, debating, lobbying, implementing, and defending mechanisms to both mitigate and adapt to the impacts of climate change. This course will explore (i) the legal framework in which climate change action occurs in the United States, (ii) policy tools available to regulators, (iii) impacts on regulated entities and individuals and (iv) opportunities for private stakeholders to participate in and influence climate change decisions.

Natural Climate Solutions: Feasible or Fantasy? (118736)

Daniel Schrag
Noel Holbrook

2021 Spring (4 Credits)          Schedule:       M 0300 PM - 0515 PM

Instructor Permissions:   Instructor  Enrollment Cap:  n/a

"Natural climate solutions" are a set of conservation, restoration and improved land management actions that some have claimed can offer more than 30% of the required mitigation of "near-term" carbon emissions to hold global warming below 2°C. Some have criticized these claims for overstating the potential of biological carbon sinks, arguing that the advocates for natural climate solutions are motivated by conservation of biodiversity rather than mitigation of climate change. And yet the clamor around natural climate solutions in the policy world continues to grow, with multiple bipartisan legislative efforts in the new Congress focused on strategies such as carbon sequestration in soils by farmers. In this course, we will explore various dimensions of natural climate solutions, including reduced deforestation, reforestation, afforestation, wetlands restoration, biochar, no-till agriculture and other farming practices to increase carbon content of soils. We will examine the feasibility of each proposed action and also the potential limitations. We will also explore policy dimensions for encouraging such efforts, if desirable, through direct subsidies, regulation, or integration into carbon pricing regimes including carbon offsets. By the end of the semester, we hope that all participants will have a clearer understanding of the potential role for natural climate solutions in national and international climate mitigation strategies.

The seminar will discuss the nature of the climate challenge and the implications it poses for different communities and different parts of the world. Mitigating negative impacts of human induced climate change will require an urgent transition from the current global fossil fuel-based energy economy to one based on renewable alternatives. Possibilities include wind, solar, hydro, biomass and potentially nuclear. The seminar will review options with specific attention to differences in the challenges faced by developed economies such as the US and Europe and large developing economies such as China, India and parts of Africa. Can we chart a feasible path to net zero global carbon emissions by 2050?

Environmental Sci & Public Pol  90S Section: SEM

The Technology, Economics, and Public Policy of Renewable Energy (127572)

George Baker

2021 Spring (4 Credits)  

Schedule:  
F 1200 PM - 0115 PM  
F 0900 AM - 1015 AM

Instructor Permissions:  
None

Enrollment Cap:  
n/a

Energy is the lifeblood of economic activity, indeed of human society. However, the planet's stores of easily accessed fossil fuels are limited, and the climatological cost of continuing to rely on fossil fuels is high. This course examines the long run and short run prospects for renewable energy. We start by understanding the technology of various renewables, including hydro, solar, wind, biomass, etc. We then examine the economics of these technologies, and how policies (subsidies, taxes, regulations) affect their viability. Special attention will be paid to the interaction of technology, economics, and public policy.

Class Notes:  
This course will be offered in a seminar format. First year students should consult instructor.

Recommended Prep:  
Economics 10a.

Supervised Reading and Research (110943)

Noel Holbrook

2021 Spring (4 Credits)  

Schedule:  
R 0300 PM - 0359 PM  
W 0900 AM - 0959 AM

Instructor Permissions:  Instructor  
Enrollment Cap:  n/a

Supervised reading and research on topics not covered by regular courses of instruction. Students must complete a registration form, including permission from their faculty sponsor, with the concentration office before course enrollment. A final paper describing the research/reading completed during the term is due in duplicate to the Head Tutor on the first day of reading period.

Course Notes:  Intended for junior and senior concentrators in Environmental Science and Public Policy; open to sophomore concentrators only under exceptional circumstances. Permission of the Head Tutor is required for enrollment. May be counted for concentration only with the special permission of the Head Tutor.

Introduction to Environmental Science and Engineering (116362)
Elsie Sunderland
Steven Wofsy
2021 Spring (4 Credits)  Schedule:  TR 1030 AM - 1145 AM
Instructor Permissions:  None  Enrollment Cap:  n/a

This course will provide students with an introduction to current topics in environmental science and engineering by providing: an overview of current environmental issues, critically evaluating their underlying science and knowledge limitations, and exploring the best-available engineering solutions to some of our most pressing environmental problems. The course will emphasize the interconnected biological, geological, and chemical cycles of the earth system (biogeochemical cycles) and how human activity affects these natural cycles within each of the major environmental compartments (atmospheric, aquatic, and terrestrial).

Recommended Prep:  The course presumes basic knowledge in chemistry, physics, and mathematics at the high school level.

Environ Science & Engineering  101
Global Warming Science 101 (214500)
Eli Tziperman
2021 Spring (4 Credits)  Schedule:  W 0300 PM - 0545 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

An introduction to the science of global warming/ climate change, meant to assist students to process issues that often appear in the news and public debates. Topics include: the greenhouse effect, and consequences of the rise of greenhouse gasses including sea level rise, ocean acidification, heat waves, droughts, glacier melting, hurricanes and more. Throughout, an ability to critically evaluate observations, predictions and risk will be emphasized. The students will be involved in in-class quantitative analysis of climate observations, feedbacks and models via python Jupyter notebooks that will be provided.
Course Notes: ESE 101 is also offered as E-PSCI 101. Students may not take both for credit. For SB students: this course can only count as a science elective in the concentration requirements, and SB students must enroll in E-PSCI 101. AB students may enroll in either E-PSCI 101 or ESE 101 to meet their concentration requirements.

Class Notes: Programming in Python will be employed throughout the course in HW assignments and course workshops. Prior exposure to basic programming would be helpful, and students will be provided with template code to start from and be guided in this work in weekly course workshops. Students are requested to bring their laptops to the first class, and to try to install Anaconda python version 3.7 before class.

Recommended Prep: Basic calculus and ordinary differential equations, as covered for example by Math 1b or Math 19a or Math 21b.

Earth Resources and the Environment (121463)

John Shaw
Annika Quick

2021 Spring (4 Credits) Schedule: TR 0900 AM - 1015 AM
Instructor Permissions: None Enrollment Cap: n/a

An overview of the Earth’s energy and material resources, including conventional and unconventional hydrocarbons, nuclear fuels, alternative/renewable energy resources, metals, and other industrial materials. The course emphasizes the geologic and environmental factors that dictate the availability of these resources, the methods used to identify and exploit them, and the environmental impacts of these operations. Topics include: coal and acid rain; petroleum exploration, drilling, and production, shale gas/oil, photochemical smog, and oil spills; nuclear power and radioactive hazards; alternative energies (solar, hydroelectric, tidal, geothermal power), metals and mining.

Course Notes: Course includes three hours of laboratory work each week and two field trips. EPS 109 is also offered as ESE 109. Students may not take both for credit. Undergraduate engineering students should enroll in ESE 109. Given in alternate years.

Recommended Prep: EPS 10, ES 6, an equivalent course, or permission of instructor.

Environ Science & Engineering 129
Climate and Atmospheric Physics Laboratory (213669)

Marianna Linz

2020 Fall (4 Credits) Schedule: R 0300 PM - 0545 PM
Instructor Permissions: None Enrollment Cap: n/a

This course will take a hands-on approach to learning climate and atmospheric physics. Topics covered will include global scale atmospheric dynamics, synoptic meteorology and weather forecasting, and climate modeling. Some fundamental fluid dynamics will be covered along the way. Half of the weeks will involve experiments using water and food coloring with lab kits that will be provided to each student, and half of the weeks will involve working with observed and/or modeled climate data or running a climate model. Each week will have three components: one 1.5 hour lab session to perform laboratory experiments, run models, and analyze data over zoom; one peer-to-peer feedback/problem solving session; and one 1.5 hour class
session. In this flipped-classroom environment, knowledge transfer will occur outside of class through readings, videos, and lab prep in advance of each lab session. Peer-to-peer sessions will be focused on writing up the labs and providing feedback. Class sessions will include a lab discussion, a wrap-up activity, and an introduction to the next week’s subject.

Course Notes: ESE 129 is also offered as EPS 129. Students may not take both for credit. For SB students: this course can only count as a science elective in the concentration requirements, and SB students must enroll in EPS 129. AB students may enroll in either EPS 129 or ESE 129 to meet their concentration requirements.

Recommended Prep: Physics 12a/15a/16, Math/AM 21a (b recommended) or equivalent or permission of instructor.

Introduction to Meteorology and Climate (156491)

*Brian Farrell*

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Physical concepts necessary to understand atmospheric structure and motion. Phenomena studied include the formation of clouds and precipitation, solar and terrestrial radiation, dynamical balance of the large-scale wind, and the origin of cyclones. Concepts developed for understanding today’s atmosphere are applied to understanding the record of past climate change and the prospects for climate change in the future.

Course Notes: ESE 132 is also offered as EPS 132. Students may not take both for credit. Undergraduate Engineering Students should enroll in ESE 132. Previously ENG-SCI 132.

Recommended Prep: Mathematics 21 or Applied Mathematics 21a and 21b; Physical Sciences 12; or permission of instructor.

Environ Science & Engineering 160

Space Science and Engineering: Theory and Applications (160452)

Robin Wordsworth

2020 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 30

This course is an introduction to the challenges involved in designing spacecraft for observation of Earth and exploration of other planets. Topics covered include basic atmospheric and planetary science, key principles of remote sensing, telemetry, orbital transfer theory, propulsion and launch system design, and thermal and power management.

Course Notes: ESE 160 is also offered as EPS 160. Students may not take both for credit. Undergraduate engineering students should enroll in ESE 160.

Requirements: Prerequisite: Math 21a and 21b (or equivalents); and Physical Sciences 12a and 12b (or equivalents)

Additional Course Attributes:
Environ Science & Engineering 162

Hydrology (137573)

Kaighin McColl

2020 Fall (4 Credits)  

Schedule: TBD

Instructor Permissions: None  
Enrollment Cap: n/a

This course provides an introduction to the global hydrologic cycle and relevant terrestrial and atmospheric processes. It covers the concepts of water and energy balance; atmospheric radiation, composition and circulation; precipitation formation; evaporation; vegetation transpiration; infiltration, storm runoff, and flood processes; groundwater flow and unsaturated zone processes; and snow processes.

Course Notes: ESE 162 is also offered as Earth and Planetary Sciences 162. Students may not take both ESE 162 and Earth and Planetary Sciences 162 for credit. Undergraduate engineering students should enroll in ESE 162.

Recommended Prep: Applied Mathematics 21a,b or Mathematics 21a,b; AND Applied Physics 50a,b, Physics 15a,b or Physical Sciences 12a,b.

Requirements: Prerequisite: Math 21a and 21b (or equivalents); and Physical Sciences 12a (or equivalent)

Environ Science & Engineering 168

Human Environmental Data Science: Agriculture, Conflict, and Health (216460)

Peter Huybers

2020 Fall (4 Credits) Schedule: MW 0300 PM - 0415 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

The purpose of this course is to develop understanding and guide student research of human and environmental systems. In class we will explore agriculture, conflict, and transmissible disease. Study of each topic will involve introduction data, mathematical models, and analysis techniques that build toward addressing a major question at each interface: Have agricultural systems been adapted to climate change? Has drought caused conflict? And does the environment influence the spread of COVID-19? These questions are diverse, but are addressed using common analytical frameworks. Analytical approaches include simple mathematical models of feedback systems, crop development, and population disease dynamics; frequentist statistical techniques including linear, multiple linear, and panel regression models; and Bayesian methods including empirical, full, and hierarchical approaches. You will be provided with sufficient data, example code, and context to come to your own informed conclusions regarding each of these questions. Furthermore, topics covered in class will provide a template for undertaking independent research projects in small teams. Research will either extend on topics presented in class or address other human-environmental questions. Historically, such student projects have sometimes led to senior theses or publication in professional journals.

Course Notes: ESE 168 is also offered as E-PSCI 168. Students may not take both for credit. Undergraduate Engineering Students should enroll in ESE 168. Enrollment is by instructor permission.

Seminar on Global Pollution Issues: Case Study of Lead Biogeochemistry (109341)

Elsie Sunderland

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

This course provides a cross-disciplinary overview of environmental science and how research contributes to public policy and human health risk assessment through a case study of a global pollution issue: lead biogeochemistry. The scientific foundations of environmental research methods are discussed (i.e., analytical chemistry, ecology, use of environmental archives, environmental modeling). Experience conducting multidisciplinary environmental research and data analysis will be provided. Course Activities: Lectures, discussions, case studies, field/lab visits.

Recommended Prep: Two semesters of undergraduate chemistry including Physical Sciences 1 or Physical Sciences 11; Mathematics 1a & 1b. Knowledge of basic statistics is also helpful.
Requirements: Physical Sciences 1 or 11; and Math 1b

Native Americans in the 21st Century: Nation Building II (160752)
Eric Henson
2021 Spring (4 Credits)  Schedule: T 0300 PM - 0415 PM
Instructor Permissions: Instructor  Enrollment Cap: 16
This community based research course focuses on some of the major issues Native American Indian tribes and nations face in the 21st century. It provides in-depth, hands-on exposure to native development issues, including: sovereignty, economic development, constitutional reform, leadership, health and social welfare, tribal finances, land and water rights, culture and language, religious freedom, and education. In particular, the course emphasizes problem definition, client relationships, and designing and completing a research project for a tribe, tribal department, or those active in Indian Country. The course is devoted primarily to preparation and presentation of a comprehensive research paper based on work with a tribal community. In addition to faculty presentations on topics such as field research methods and problem definition, students will make presentations on their work in progress and ultimate findings.

Ethnicity, Migration, Rights  128
Critical Refugee Studies (216391)
This seminar offers an introduction to the emerging interdisciplinary field of Critical Refugee Studies. In her field defining 2006 article "Toward a Critical Refugee Study," Yến Lê Espiritu argued that "we need to imbue the term 'refugee' with social and political critiques—that is, to conceptualize 'the refugee' not as an object of investigation, but rather as a paradigm 'whose function [is] to establish and make intelligible a wider set of problems.'" Together, we will explore the problems and opportunities for social and political critique within refugee studies that Espiritu alludes to. We will focus, for example, on the role of nation-states in producing refugees and perpetuating their displacement(s); the concept of "refuge"; the relationship of "refugee" to other migrant categories; identity and cultural production; refugee activism; and narratives of American exceptionalism that hinge on the idea of the United States as a place of refuge. In addition to these themes, we will build on Critical Refugee Studies' engagement with the role of US empire in the (re)production of refugees by utilizing a historical perspective that acknowledges the United States as a settler state. What does it mean, in other words, for a nation that was built on the dispossession of Indigenous peoples to claim to be a place of refuge?

Our discussions will be fueled by interdisciplinary readings that span the humanities and the social sciences. In addition to exploring the major theoretical perspectives and scholarship that informs Critical Refugee Studies, then, this seminar will give us the opportunity to think together toward the future of Critical Refugee Studies as the field continues to develop and as displacement continues in record numbers around the globe.

Ethnicity, Migration, Rights 133

Power, Knowledge, Identity: Critical Approaches to Race and Ethnicity (208114)

Eleanor Craig

How might critical attention to race and ethnicity as they intersect with gender and sexuality—and also frameworks of indigeneity and class—shape how we study? How do these lenses shift the questions we ask, the information that counts as data, and the genres of work that we recognize as 'academic'?

For those newer to studies of race and ethnicity, this course provides intersectional frameworks for recognizing what assumptions undergird academic projects and fields of study. For those familiar with ethnic studies, it aims to serve as a 'Theories and Methods' course, providing tools and strategies for refining one's own interdisciplinary inquiries.

Course Notes: Weekly lectures and a one hour section to be arranged.
Ethnicity, Migration, Rights  136

Race, Gender, and American Empire (213393)

Hannah Waits

2020 Fall (4 Credits)  Schedule: R 1200 PM - 0245 PM
Instructor Permissions: Instructor  Enrollment Cap: 15

This seminar explores the culture and politics of American imperialism from the late 19th century to the present, with particular attention to race and gender. This writing and discussion-intensive course encourages students to examine how formal and informal imperial relations developed, and to analyze how American empire functioned on the ground for those who imposed it and those who resisted, appropriated, or accommodated it. The course focuses especially on American relations with Asia and Latin America, and topics include immigration, military occupation, gendered and racialized cultural engagement, international adoption, humanitarianism, and international development. Assigned readings bring together scholarship from American Studies, Women's Studies, Ethnic Studies, Anthropology, and American History.

Ethnicity, Migration, Rights  137

Asian American Mobility and Transpacific Movements (213404)

Courtney Sato

2020 Fall (4 Credits)  Schedule: T 0300 PM - 0545 PM
Instructor Permissions: Instructor  Enrollment Cap: 15

This seminar draws together Asian American history (ca. 1800-present) and the emerging interdisciplinary field of mobility studies. This course will explore the formation of "Asia America" through Asian American networks and transpacific communities with particular attention to the perspectives and agency of Asian/Americans. Together we will think through and critically interrogate histories and cultures of movements in various forms (lecture and world fair circuits, gendered labor flows, cultures of travel, the figure of the sojourner, international student exchanges, and transportation infrastructure like steamship and railroad lines). Throughout, we will employ transnational and diasporic analyses to examine central themes in Asian American and transpacific studies including: immigration, labor, cultural representations, militarism, gender and sexuality, settler colonialism, and political movements and ideologies.
**Ethnicity, Migration, Rights 139**

Coloniality, Race and Catastrophe (213559)

*Mayra Rivera*

2020 Fall (4 Credits)   **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor   **Enrollment Cap:** 12

This course explores the relationship between coloniality, race and ecology through the lens of “catastrophe.” We will examine a variety of theoretical and literary sources that deploy or refute tropes of the “end of the world.” We will study different uses of “catastrophe” to denounce the destruction of a particular world, re-imagine the past, or proclaim the impossibilities of the present. Through the readings and discussions, we will analyze the aims, effectiveness and limitations of talk of catastrophe in the contemporary context. Jointly offered as HDS 2432.

---

**Ethnicity, Migration, Rights 140**

Contemporary Immigration Policy and Educational Practice (214346)

*Roberto Gonzales*

2020 Fall (4 Credits)   **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: None   **Enrollment Cap:** n/a

Today's immigration debates have brought to the fore conflicting visions regarding the place of immigrants in our society and educational systems. This course will examine legal and undocumented immigration from both community level and policy frames of understanding and interrogation. Students will start with the broad question of what Americans should do with the current immigration system—including the estimated 11.1 million people presently living in the United States in unauthorized residency status—and then take a deeper look at the ways in which U.S. laws and school experiences shape the everyday lives of immigrant children, adolescents, and young adults. Finally, students will explore the challenges educators face in working within the intersection of immigration policy and people's lives, and how this work shapes various possible roles as teachers, leaders, school policy-makers, advocates, and allies.

The primary objective of this course is to assist students in building a fundamental understanding of various issues relevant to immigration policy and educational practice. It is designed to achieve the following objectives: 1. To provide students with an understanding of the public policy context of immigration and how that context shapes immigrants' daily realities and our work with immigrant communities, families, and individuals; 2. To present students with important controversies and trends in contemporary immigration and education policy and help them to develop a critical perspective with
respect to such controversies and trends; 3. To help students understand the important implications of immigration policies for the education and schooling of immigrant youth; 4. To provide students the tools to critically examine their professional work and evaluate its outcomes in ways that are self-reflective; 5. To broaden students' viewpoints so they can advocate for the policies and practices that meet the needs of immigrant students and their families.

Ethnicity, Migration, Rights 141

Race, Solidarity, and the Carceral State (216400)

_Sara Awartani_

2021 Spring (4 Credits) Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This specialized seminar course surveys how U.S. social and racial justice movements have encountered and interacted with the rise of the carceral state. Using case studies from African American, Arab American, Latino, and other New Left movements, we will ask: what possibilities of resistance are imagined under conditions of repression? And how have these possibilities of resistance and conditions of repression changed over time?

This course equips students to understand how imprisonment, surveillance, and political repression have shaped social movements, racial formations, and U.S. politics since the late 1960s. The course is divided into five units: (1) COINTELPRO & the Civil Rights Movement; (2) Operation Boulder and Surveillance; (3) Reagan, Terrorism, and the New Right; (4) Prison Abolition; (5) Immigration and Border Security. At the end of the course, students will present original historical research on a topic relevant to the course themes and questions.

Ethnicity, Migration, Rights 142

Introduction to Latinx Studies (216672)

_Marcelo Garzo_

2021 Spring (4 Credits) Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 36

In this survey course we will problematize the project of Latinidad — tracing its contours as they have been shaped by
historical systems and processes of power such as racialization, gender, sexuality, class, ability, and nation. Following a comparative and critical Ethnic Studies approach, students will gain historical and transdisciplinary perspectives towards the possibilities and limitations of Latinx identity and discourse. Grounded in Afro-Latinx, Indigenous, decolonial, abolitionist, queer and feminist entanglements, we will interrogate Latinidad as an intersection — a complex and dynamic site of cultural, social and political questions. In this way, we will visit Latinidad as a "way station," that is, not a destination but a temporary and imagined construction. Together we will be "caminando, preguntando" (a Zapatista concept of "walking while asking") upon a "path of conocimiento" (Gloria Anzaldúa’s epistemic identitarian process of coming to know). Readings and discussions will engage in Ethnic Studies scholarship and social movements to trace how Latinx Studies and related projects seek to build solidarities and connections across various communities, as they also reproduce modern/colonial divisions, erasures and exclusions.

Ethnicity, Migration, Rights 143

Introduction to Ethnic Studies (216463)

Marcelo Garzo

2020 Fall (4 Credits)  

Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Instructor  

Enrollment Cap: 36

Ethnic Studies remains the first and only academic field of study within the Westernized academy that has been created and sustained through student struggle. Ethnic Studies’ earliest foundations were articulated by the 1969 Third World Liberation Front (TWLF), who initiated strikes at San Francisco State University and UC Berkeley, winning the first Third World College and Department of Ethnic Studies. The TWLF - a multi-racial coalition of Black, Indigenous, Chicanx/Latinx, and Asian American student organizations - envisioned a "relevant education" that was rooted in intercommunal solidarity, self-determination and community-engaged scholarship. 50 years later, with hundreds of related programs taking root in schools and universities around the world, we will explore how Ethnic Studies can continue to serve as a matrix for higher education and as a bridge between the academy, K-12 schools, grassroots social movements, and frontline communities.

This course will introduce students to key terms and concepts in critical and comparative Ethnic Studies. We will engage questions of race, ethnicity, gender, sexuality, class, ability, and other systems of power through transdisciplinary and intersectional theories and analyses.

Ethnicity, Migration, Rights  144

Decolonial Aesthetics and Poetics (216464)

Marcelo Garzo

2020 Fall (4 Credits)  
Schedule:  
MW 0430 PM - 0545 PM

Instructor Permissions:  
Instructor  
Enrollment Cap:  
15

In this seminar course we will trace the contours of decolonial theory and practice through the literary, visual and performing arts. We will read cultural and theoretical texts from Black, Indigenous, Latinx and people of color artists, scholars and social movements. Weaving Ethnic Studies theory and expressive arts practice, we will study the works of Audre Lorde, Gloria Anzaldúa, Frantz Fanon, Residente, Leslie Marmon Silko, Nezahualcoyotl, Ana Tijoux, Jimi Hendrix, Café Tacuba, Fred Ho, Kendrick Lamar, Guillermo Gómez-Peña and others. These hemispheric and inter-cultural cross-pollinations will help us bridge creative approaches to knowledge production, social movement activism and critical pedagogy. Students will learn Ethnic Studies methods in close reading and critical analysis of historical and contemporary cultural production through oral presentations, essay writing and creative projects. Following what decolonial thinker Walter Mignolo has termed "shifting the geo- and body politics of knowledge and power", we will "de-link" aesthetics and poetics from their conventional Eurocentric lineages as we study the past, present and future of decolonial expressive arts and culture.

Ethnicity, Migration, Rights  145

Latinx Xicanx Indigeneities (217386)

Marcelo Garzo

2021 Spring (4 Credits)  
Schedule:  
W 0300 PM - 0500 PM

In this advanced seminar course, we will explore questions of indigeneity and decolonization in Latinx and Xicanx communities and diasporas across Abya Yala (the Americas, including the Caribbean). Thinking from the intersections of Latinx/Xicanx and Native/Indigenous Studies and communities — and through a comparative and critical Ethnic Studies lens — we will trace key terms and concepts that emerge from these important transdisciplinary fields, social movements and debates. How does indigeneity relate to concepts such as Latinidad, Xicanismo, mestizaje and decolonization? What are the possibilities and problems that emerge in the context of hemispheric, transnational Indigenous struggles? How are these realities shaped by systems and processes of racialization, gender, sexuality, language, and migration? These dialogues serve to map historical and contemporary dynamics of "resisting ↔ oppressing" (Lugones 2003) as they are shaped by structures of settler colonialism, genocide, and heteropatriarchy.

Expository Writing
Subject: Expository Writing

Expository Writing 10 Section: 101

Introduction to Expository Writing (118262)

Tad Davies

2020 Fall (4 Credits) Schedule: TR 0600 PM - 0715 PM

Instructor Permissions: Department Enrollment Cap: 10

In Expos Studio 10, students practice analyzing sources, developing and organizing their ideas, and making arguments as they become familiar with the expectations of college writing. In small classes taking a hands-on approach, students work closely with instructors to learn strategies for drafting and revising clear, engaging essays. Students meet frequently in individual conferences with instructors to discuss their work, and the class also emphasizes collaborative work among students. In a small community of writers, students participate in workshops to discuss each other’s work, thereby becoming more skillful at reading and revising their own writing. Assignments are based on sources from a range of disciplines and genres, and build in complexity so that students can master essential skills at each step. Expos Studio 10 focuses on academic essays as well as the personal statement required for fellowship or internship applications. Following Expos Studio 10, students take either Expos Studio 20 or an Expos 20 course to meet the writing requirement. All students meet with an Expos faculty member to discuss their course placement before enrolling.

Topic: Expos Studio 10: Introduction

Course Notes: After taking Expos Studio 10, a student must pass Expository Writing 20 or Expos Studio 20 to meet the College’s Expository Writing requirement.

**Expository Writing 20**

Expository Writing 20 (116353)

*David Barber*

2020 Fall (4 Credits)  

**Schedule:** TR 0430 PM - 0545 PM

**Instructor Permissions:** Department  

**Enrollment Cap:** 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Wizards and Wild Things

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** Once upon a time, there was no Harry Potter. Once upon a time, there was no such thing as children's literature. When and if children learned to read, they read what grown-ups read. How then did writing for children as we now know it come of age? Why does the genre have such an enduring hold on our cultural imagination, even as it continues to provoke sharp debate over its greater purpose and value? Are classic children's books like *The Wonderful Wizard of Oz*, *The Wind in the Willows*, and *The Cat in the Hat* instructive or subversive, didactic or liberating? In this course we'll examine selections from three centuries of popular prose and verse written expressly for and about children as we investigate how this eclectic canon reflects evolving ideas about childhood, changing views about educating and enchanting young readers, and persistent disputes over what and how children should learn from books. In Unit 1 we'll survey landmark works
in English for children from the Puritan through the Victorian eras, including *The New England Primer*, *Grimms’ Tales*, and *Alice in Wonderland*, as we consider what these texts tell us about the origin and evolution of the genre. In Unit 2 we’ll examine works by touchstone authors for younger readers including Mark Twain, Louisa May Alcott, Rudyard Kipling, E. B. White, C. S. Lewis, Ursula Le Guin, Roald Dahl, Maurice Sendak, and others, drawing on the critical perspectives of thinkers such as John Locke, Bruno Bettelheim, Alison Lurie, Jacqueline Rose, and Marina Warner to assess arguments about the essential function of imaginative literature from infancy through adolescence. In the final unit, students will conduct their own research to place a major children's author of their choice in a relevant cultural and historical context.

All sections emphasize revision.

**Topic:**  Wastelands

**Course Notes:**  Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**  The impenetrable wilderness of *The Revenant*, the diseased streets of *Children of Men*, the trash heap cities of *Wall-E*—these are the wastelands that fascinate our pop culture. On the screen, they come to life as horrifying alternate universes and dead civilizations—the very fates we must avoid at all costs. And yet wastelands are not exclusively the stuff of science fiction. In this course, we will grapple with both imaginary and actual
wastelands. We will begin with short stories by Jack London, Thomas King, and Octavia Butler. From the icy wilds of the Yukon to the borderlands of Native American exile, these writers question the way wastelands have been imagined, especially in North America, over the past century. Next, we will turn to real wastelands—to the garbage dumps and arid landscapes where nothing grows. We will ask what these places reveal about their inhabitants, their struggles, and their achievements. Finally, students will research a wasteland of their own choosing—anything from the mega slums of Mumbai to the sprawl of Boston’s unused rooftops. Along the way, we will investigate how wastelands form and evolve, and how people adapt to them. Are wastelands actually the places we should avoid at all costs, or are they the places we can no longer afford to ignore?

**Expository Writing  20 Section: 003**

Expository Writing 20 (116353)

Collier Brown

2020 Fall (4 Credits)  Schedule:  MW 1030 AM - 1145 AM

Instructor Permissions:  Department  Enrollment Cap:  13

An intensive seminar that aims to improve each student’s ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Expository Writing  20 Section: 004

Expository Writing 20 (116353)

Willa Brown

2020 Fall (4 Credits)  Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: Department Enrollment Cap: 12

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Remembering the Civil War

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The "Engaged Scholarship" components of this course include multiple mandatory activities outside of regular class hours.*

Over the summer, cities across America erupted in protest. As the weeks dragged on, civil unrest that began with the murder of George Floyd shifted focus. Protesters across the US, and then across the globe, began to tear down statues. And not just any statues – memorials to Civil War generals. Since the violent
protests in Charlottesville four years ago to the banning of Confederate flags at NASCAR, the Civil War is at the center of American conversations. How did we get here? How is it that in 2020 symbols and flags of a war a century-and-a-half old still dominate our political landscape? One hundred-and-fifty-five years after Lee and Grant shook hands at Appomattox Court House, it was clearer than ever that the Civil War is not part of our past – it is at the very core of our present.

Together, we will examine the fine line between history and memory, and explore the history of memory. We will explore where the mythologies around the War came from, and try to understand how they affect our current understandings of politics and identity. This course will teach you to read the arguments all around you, whether they're being made by traditional sources like books and articles, or by buildings, statues, and movies. We will begin by decoding the arguments made by Memorial Hall, at the heart of Harvard's community. We'll then dive into the single biggest source of Civil War memory: Gone with the Wind. Finally, you will choose an area of your own interest to dig into for a research paper. Throughout, we'll focus on evaluating arguments and making our own, finishing up with the creation of a well-researched, accessible op-ed and media presentation.

**Topic:** Democracy in Action

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** *Note: The Engaged Scholarship components of the course may require participation in some activities outside of normal class hours.*

It's a cliché for pundits and politicians to declare that each election is the most important in our lifetimes, maybe all of American history – at least, that is, until the next one. Even so, it's easier than usual to make the argument that the 2020 Election finds American democracy at a crossroads. President Trump's bid for re-election was bound to be contentious, given the shocking upset that brought him to the White House in 2016 and the divisive character of his policies and rhetoric. Less expected was that the 2020 Election would be held amidst a deadly pandemic that has ground normal life to a halt and raised uncertainty about how to conduct the vote safely and fairly. Or that the preceding summer would see a national reckoning with systemic racism and police brutality. Consider that all of this occurs within a political climate of intense polarization, refracted in a media environment which frequently distorts reality to fit partisan narratives, and it is clear that the 2020 Election will test America's democracy like none before. And yet, for all that makes this election unique, we have arrived at this critical juncture as a result of forces that are deeply rooted in our nation's history, from the bitter residue of the 2016 Election, to the unfinished work of the Civil Rights Movement, to paradoxes of democratic citizenship that date back to the nation's founding.

In this course, we'll draw on works by political scientists, historians, journalists, and activists to better understand the stakes of the 2020 Election and the wider issues it raises about participation, representation, citizenship, and equality. The first unit of the course focuses on voting as a right and as a responsibility. Our readings will address barriers to the ideal of full and equal participation - such as low voter turnout, voter suppression, gerrymandering, and the Electoral College - and assess potential solutions, from the seemingly common-sense to the deeply controversial. The second unit then asks that we zoom out from the polls and take a broader view of the systemic
challenges facing American democracy. As a class, we'll engage with cutting edge research on topics like polarization, authoritarianism, inequality, and the influence of money in politics. These readings will lay the groundwork for students to conduct original research and analysis on American politics in 2020 and beyond. Along the way, we'll be cataloguing our predictions and reactions as the electoral drama unfolds, curating our own archive of news items, and reflecting on our part in the process from the unique vantage of point of the University, where many students will be casting their ballots for the first time. This work will provide the materials for our third unit capstone, where students will contribute to a collaborative project that blends public writing with visual media and compose a personal reflection discussing their experience of this historic moment.

Expository Writing 20 Section: 008

Expository Writing 20 (116353)

Margaret Doherty

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Department Enrollment Cap: 12

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Modern Love

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Reader, I married him." As this famous line from Charlotte Brontë's Jane Eyre reminds us, writers have long been preoccupied with matters of the heart. Love stories are everywhere, from the novels of Jane Austen to the "rom-coms" of the 1980s and 1990s to essays in the "Styles" section of the New York Times. For centuries, marriage was primarily an economic relationship, and love outside of marriage ended in humiliation or even death. But what happens when society expands the options for living and loving? What happens to love stories when divorce has been normalized, taboos have been trampled, and the definition of marriage is ever-expanding? When couples are as likely to meet through Tinder as they are through mutual friends? In this course, we'll explore what love stories can tell us about changing concepts of gender, sexuality, family, and freedom. We'll start with short stories by Kathleen Collins—a playwright and filmmaker working in the aftermath of the civil rights movement and Black Power movement—and Lydia Davis, an acclaimed contemporary writer of epigrammatic short stories. In our second unit, we'll look at a couple of love stories through the lens
of feminist and queer theories. Our texts for this unit will include an essay by the black feminist poet and theorist Audre Lorde, the Academy-Award-winning film *Brokeback Mountain*, and the viral *New Yorker* short story "Cat Person." Finally, in our third unit, students will pick a modern love story of their choosing—a novel, a memoir, a film—and, drawing on the work of critics and scholars, make an argument about what this story shows us about our society's romantic and sexual mores.

**Expository Writing 20 Section: 009**

Expository Writing 20 (116353)

*Janling Fu*

2020 Fall (4 Credits)

**Schedule:**

MW 1200 PM - 0115 PM

**Instructor Permissions:**

Department

**Enrollment Cap:** 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Eating Culture

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** "Food . . . is not art. . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William Deresiewicz, in an opinion piece for the *New York Times*, dismisses our society's rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories of cod, salt, and sugar, to the glut of cooking shows, many featuring contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresiewicz right to say that food won't give us insight into ourselves? Is it not possible that by examining what scholars and commentators call "foodways"—the various forces involved in how different cultures produce, buy, sell, and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, "food is good to think," as we contemplate various foodways from a number of illuminating perspectives. In our
first unit we delve into what makes food "disgusting" or "natural." How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful cooking shows produced in different countries, for instance, *Top Chef*, *Iron Chef*, and *The Great British Bake Off*. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? How has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

**Expository Writing 20 Section: 010**

Expository Writing 20 (116353)

_Alexandra Gold_

2020 Fall (4 Credits)  
Instructor Permissions: Department  
Schedule: TR 1030 AM - 1145 AM  
Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Telling Her Story: Narrative,

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** In a powerful essay, the late writer and activist Audre Lorde suggested, "Where the words of women are crying to be heard we must each of us recognize our responsibility to seek those words out, to read them and share them and examine them in their pertinence to our lives." Lorde is not alone in asking us to pay attention to and take responsibility for women's stories; for centuries scholars and activists alike have
championed the words of women, including women of color and queer women, whose stories have routinely gone untold or unheard. Yet if this issue has always been pressing, the call to heed women’s stories seems especially urgent at a moment when such stories have come to dominate the cultural landscape and public consciousness – from news accounts to popular shows, literature to social media. This course responds to this moment by examining how women’s stories are narrated across a variety of media and exploring what impact the sharing of them can have. Our first unit will focus on short stories by contemporary women authors Roxane Gay, Carmen Maria Machado, and Jenny Zhang that raise questions about the body, family, love, and society. Our second unit then turns to television, studying Hulu’s 2017 adaptation of Margaret Atwood’s dystopian novel The Handmaid’s Tale. Informed by readings in critical feminist theory, we’ll consider how the show probes the troubling connections between gender, authority, power, and image. Finally, our third unit engages visual and performance art alongside movements like #MeToo and #SayHerName, offering students an opportunity to pursue independent research projects that explore the relations between art, activism, and social media.

### Expository Writing 20 Section: 012

Expository Writing 20 (116353)

*Martin Greenup*

2020 Fall (4 Credits)  
**Schedule:** MW 1200 PM - 0115 PM

**Instructor Permissions:**  
Department:  
Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Humans, Nature, and the Enviro

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways
of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial society. They may be doing what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: “to imagine that which we know.” How, then, have creative minds imagined – in essays, books, and movies – the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret “Walking” (1862), the naturalist Henry David Thoreau’s seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists – Rachel Carson’s *Silent Spring* (1962), and James Lovelock’s *The Revenge of Gaia* (2006). Through shocking critiques that draw upon the power of the imagination, both writers, in different ways, have tried to inform the public of the harm being done to nature in the hope that this harm can be averted. And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals – Werner Herzog’s *Grizzly Man* (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite’s *Blackfish* (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

**Expository Writing  20**  
Section: 013

Expository Writing 20 (116353)

*Martin Greenup*

2020 Fall (4 Credits)  

**Schedule:**  
MW 0130 PM - 0245 PM

**Instructor Permissions:**  
Department  
Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:**  
Humans, Nature, and the Enviro
Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial society. They may be doing what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: "to imagine that which we know." How, then, have creative minds imagined – in essays, books, and movies – the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists – Rachel Carson's Silent Spring (1962), and James Lovelock's The Revenge of Gaia (2006). Through shocking critiques that draw upon the power of the imagination, both writers, in different ways, have tried to inform the public of the harm being done to nature in the hope that this harm can be averted. And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals – Werner Herzog's Grizzly Man (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite's Blackfish (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

Expository Writing 20 Section: 014

Expository Writing 20 (116353)

James Herron

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Department Enrollment Cap: 13
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Class and Culture

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** It is commonplace to note that in the United States many people identify as "middle class" even though our society is marked by deep, persistent, and increasing class inequality. Such self-identification, however, can obscure the complex and often contradictory ways in which we experience social class in our everyday lives. This course explores the cultural dimensions of social class in the U.S. from an ethnographic perspective, focusing on the everyday lives and cultures of ordinary Americans. We will consider questions such as the following. What is it like to be a working class person in a society heavily invested in ideas of individual advancement and meritocracy? How do professionals (the "upper-middle" class) define themselves and how do they view those above and below them in the class structure? What role does elite education play in the creation and reproduction of class inequality? How does social class shape people’s values, political views, and tastes? In our first unit we will compare two important ethnographic studies of working class Americans — Michèle Lamont’s classic The Dignity of Working Men and Jennifer Silva’s more recent Coming Up Short — in order to gain some understanding of how working class people have responded to the relative decline in their living standards over the past 20 years. In the second unit we will read selections from Armstrong and Hamilton’ s Paying for the Party in order to analyze the role of higher education in shaping the class trajectories of students from working-, middle-, and upper-class backgrounds. For the third unit students will devise their own research project concerning the roles and self-conceptions of elites. For inspiration, we'll read selections of Shamus Khan’ s Privilege, which examines life at an elite New England boarding school, and Karen Ho's Liquidated, which analyzes the ideologies and identities of Wall Street financiers.

**Expository Writing 20** Section: 015

Expository Writing 20 (116353)

Richard Martin
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Society and the Witch

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated through the witch's very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand others' beliefs in the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we closely analyze the film Harry Potter and the Chamber of Secrets and the television sitcom Bewitched, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on Purity and Danger, Pierre Bourdieu's critique of Masculine Domination, and Umberto Eco's ruminations on interpreting serials. Using these theories, we examine the aesthetic and cultural significance of imaginative representations of witches. For the research paper, each student chooses their own example of witchcraft on which to conduct independent research. Sample topics include postmodern fairy tales like Frozen and Maleficent, Broadway musicals like Into the Woods and Wicked, historical witch-hunts and contemporary occult practices. What unites our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Work: Culture, Power, and Cont

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** This course explores the structure and experience of work in the contemporary political economy with an eye toward both its liberating and oppressive potential. We will take up enduring sociological questions with respect to power, control, autonomy, surveillance and self-determination on the job. How do different forms of work affect our life circumstances, personalities, and connections to each other? In the first unit we will examine corporate culture and how it affects the experience of professional work. Does a strong corporate culture enhance professional autonomy or management’s power? Does it facilitate or undermine community? In unit two we explore the crucial issue of workers’ control over their own labor and the concept of alienation. We examine accounts of deskilling, the separation of mental and manual labor, and the consequences of these processes for workers’ experience on the job. To what extent does alienation occur in offices versus factories versus service counters? For the final unit we will critically engage in a debate about the development of “flexible” labor and the ways in which workers’ connections to employers, occupations, and locations have become more fluid and transitory. We will explore what flexibility means in a variety of contexts and ask: does flexibility lead to liberation or loss of identity? Does it bring self-fulfillment or insecurity? What does flexibility mean for tech workers in Silicon Valley and bankers on Wall Street? Our texts consist of case studies and ethnographic accounts representing a variety of workplaces along with readings from prominent social theorists who in different ways seek to elucidate the conditions of work under modern capitalism.

**Expository Writing 20** Section: 018

**Expository Writing 20 (116353)**

_Lindsay Mitchell_

2020 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

**Instructor Permissions:** Department **Enrollment Cap:** 13
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** The Femme Fatale

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** The femme fatale—the attractive, seductive woman who brings about the downfall of men—has fascinated us through the ages, from Biblical figures like Eve and Delilah, to historical women such as Cleopatra and Wallis Simpson, to the media personas of modern pop stars like Cardi B and Miley Cyrus. In the classic femme fatale narrative, the woman's dangerous actions empower her, but she also must submit to the fact that her empowerment renders her a villain. Might this contradiction in the femme fatale's character reflect tensions in our own evolving understanding of gender? How can the femme fatale character help us untangle the real-world gender problems that modern women and men face?

This course will begin to explore these and other related questions by studying accounts of femme fatales in literature and film. In our first unit, we'll explore 1920s and 1930s pulp fiction as a source of the modern fatale archetype, with special focus on James M. Cain's noir novella *Double Indemnity*. In our second unit, we'll move forward to the post-feminist movement 1990s and examine two films featuring teenage femme fatales, comparing Gil Junger's *Ten Things I Hate About You* to Alexander Payne's *Election*, both released in 1999. Finally, in our third unit, students will research a modern-day femme fatale, either real or fictional, and argue why the modern version is recognizable as a femme fatale, but also represents some evolution of, or twist on, the classic archetype. Here students will be challenged not only to apply broad theories and ideas from the course, but also to reach a greater understanding of why some modern women seem so dangerous.

Expository Writing 20 Section: 020

Expository Writing 20 (116353)

Shannon Monaghan

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: "Noncombatants": The Home Front

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: While it is perceived today as one of the greatest aberrations in human society, warfare has also been one of the most common experiences in human history. Yet popular conceptions of the history of warfare are often limited to the myth of completely separated soldiers and civilians. This has not, historically, been so: there is a reason that we call the "home front" a front. We begin by looking at the idea of "total war" within the context of several modern case studies. We will question and examine the roles of women and children, as agents and as targets, in these conflicts. We then move to thinking about the memory and meaning of war through the art and memoirs of the great German printmaker and sculptor Käthe Kollwitz and the intellectual polymath (and French Resistance member) Marguerite Duras. What do the histories and stories that we tell about war, about resistance and about patriotism, particularly stories told by those not

Topic: "Noncombatants": The Home Front

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.
While it is perceived today as one of the greatest aberrations in human society, warfare has also been one of the most common experiences in human history. Yet popular conceptions of the history of warfare are often limited to the myth of completely separated soldiers and civilians. This has not, historically, been so: there is a reason that we call the "home front" a front. We begin by looking at the idea of "total war" within the context of several modern case studies. We will question and examine the roles of women and children, as agents and as targets, in these conflicts. We then move to thinking about the memory and meaning of war through the art and memoirs of the great German printmaker and sculptor Käthe Kollwitz and the intellectual polymath (and French Resistance member) Marguerite Duras. What do the histories and stories that we tell about war, about resistance and about patriotism, particularly stories told by those not in uniform, add to the national and cultural understanding of a conflict? In the final unit, students will choose their own historical research subject from a variety of options. They might investigate conflicts and wars ranging from the recent (the "forever wars" of Iraq and Afghanistan) to the nineteenth century (the U.S. Civil War); from the modern and industrial (the Second World War) to the guerrilla, civil, and anti-imperial (the Spanish Civil War and the Algerian War of Independence). Further research options include different types of participants in conflict (from forcibly recruited child soldiers to anti-war activism) and different ways to pressure an enemy (food policy and blockade). Students will analyze the conflict in their chosen subject through the lens of the unexpected agent in modern warfare: the woman and/or the child. Throughout the course, we will ask what it means to be a "soldier" or a "civilian" in modern conflict, pondering the nature of the distinction.

Expository Writing 20 Section: 022

Expository Writing 20 (116353)

Emilie Raymer

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Department Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.
Topic: Genetics and Bioethics

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: When researchers at the National Institutes of Health announced in June 2000 that they had successfully sequenced the human genome, President Bill Clinton asserted that "with this profound new knowledge, mankind is on the verge of gaining immense, new power to heal." Since 2000, scientists have developed DNA-risk tests, stem-cell therapies, and precise gene-editing techniques. Yet, despite the potential benefits of these breakthroughs, some have expressed concerns about the bioethical consequences of these new technologies. Critics have voiced fears that scientists are "playing God" and have expressed apprehensions that those who can afford new gene-editing technologies may produce "designer babies" while those who cannot will continue to suffer from heritable diseases. In this course, we will explore how to balance the medical advantages of genetic technologies with their potential disadvantages. For the first essay, we will analyze "The Case Against Perfection" by Harvard political philosopher Michael Sandel, who emphasizes the dangers of genetic enhancements. For the second essay, we will explore claims that new genetic techniques could create a contemporary eugenics movement. For the third and final essay, students will examine both the positive and negative consequences of a genetic technology of their choice and decide how to establish bioethical guidelines to direct its use. Possible topics could include human germline editing, pharmacogenomics, stem-cell therapy, cosmetic enhancements, cloning, or CRISPR-CaS, a new gene-editing technique. The course will culminate with a capstone project, and students will prepare a short talk about the social and biomedical ramifications of a selected genetic technology.

2020 Fall (4 Credits) Schedule: MW 0600 PM - 0715 PM

Instructor Permissions: Department Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.
Topic: God and Government

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: "God is Back!" proclaims the title of a 2009 book by the editor-in-chief of The Economist. "Democracy is giving the world's peoples their voice," asserts a feature in Foreign Policy magazine, "and they want to talk about God." Although many have assumed that modernization would diminish the cultural and political salience of religion, the contemporary world provides little evidence to sustain that belief. Religious difference has been central to some of the most violent conflicts of the past thirty years (the Balkan Wars, the "Troubles" in Northern Ireland, Israeli-Palestinian border clashes, ethnic cleansing in Burma, the rise of ISIS), even as it is also central to many figures of political resistance (e.g., the Dalai Lama) and a wide range of reformist and humanitarian efforts worldwide. Meanwhile, even in the supposedly more secular West, religion remains a volatile flashpoint on a range of political issues, from immigration and assimilation (the Trump administration's "Muslim ban") to free speech and self-expression (the Charlie Hebdo affair in France) to the politics of gender and sexuality (the perennial fights over abortion and LGBT rights). Without a doubt, religious actors remain a potent and visible presence in the political workings of the contemporary world. To get a handle on this complex topic, this course is organized around a set of carefully selected case studies that showcase some of the most significant philosophical, legal, and sociopolitical challenges posed by the problem of state governance of religion.

To write about religion requires care and compassion, an attentiveness to analytical precision and evenhandedness. Students in the class can expect not only to think carefully about some of the trickiest and most tendentious political issues of the modern era, but also how to write effectively and persuasively about them. Learning to write about religion, then, is a great preparation for learning to write persuasively about any complex or controversial issue.

Expository Writing 20 Section: 026

Expository Writing 20 (116353)

Hannah Rosefield
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** American Money

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Money is famously difficult to talk about: too awkward, too divisive, too complicated, too abstract, too personal. In this course, we look at how contemporary American writers, philosophers and filmmakers have chosen to talk about money, and how these conversations involve questions of class, justice, work, race and gender. In the first unit of the course, students will watch the 2015 film The Big Short and read sociological writing about the culture of Wall Street, in order to explore how the film portrays the values and practices of the financial industry. Unit Two focuses on arguments made by contemporary philosophers and journalists about how individuals and governments should spend their money in order to reflect their values and create a just and healthy world: readings will include Ta-Nehisi Coates's article "The Case for Reparations", Silvia Federici's manifesto "Wages Against Housework" and Michael Sandel's work on morals and markets. We will ask questions such as: What is money? How do we decide what monetary value to place upon love, or a nation's racist history, or body parts—and is there anything that should not have a price put on it? How does money interact with race, class and gender in the United States, and how does it mediate our personal relationships? The final unit of the course presents students with a selection of recent films and television series, including Magic Mike (2012), Support the Girls (2018) and Mad Men (2007-15), that raise questions about the relationship between money, work and gender. Focusing on one of the suggested films or television shows, students will undertake their own research and, in conversation with the scholarship of other critics, write a paper about how money and value function in their chosen work.

Expository Writing 20 Section: 027

Expository Writing 20 (116353)
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Journey to Mars

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** In recent years, interest in outer space has galvanized around the exploration of Mars. This summer alone three nations launched missions to the red planet (UAE, USA, China). Meanwhile, this fall’s Netflix series Away is only the latest in a series of recent Hollywood portrayals of human missions to Mars that includes the blockbuster The Martian (2015). Why Mars? Why now? What is the relationship between scientific and artistic imaginaries about Mars? This course explores the meaning of our fascination with Mars and what this might tell us not only about Mars but also ultimately ourselves. Our launch begins with a close analysis of a Hollywood film about Mars to examine themes and imagery associated with the red planet in popular culture. We then chart a path through two ethnographies about the scientific study of Mars to gain a better understanding of the relationship between visualization and the production and dissemination of scientific knowledge about Mars. Drawing on ideas from these readings, students write an analytical essay that argues for a new way of seeing a Martian site of their choosing. In the final unit, we bring together speculative and scientific perspectives to form the first Ministry of Tourism of Mars and develop a research project that engages with possible futures in which humans have become a multi-planetary species. In small groups, students will imagine an activity or event on Mars that addresses the priorities of the Mars 2050 "Visit Mars" campaign and present it in the form of a webpage on the course website.

Expository Writing 20 Section: 029

Expository Writing 20 (116353)

Ben Roth

2020 Fall (4 Credits)
Instructor Permissions: Department Enrollment Cap: 12

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Philosophical Films

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: How should society be organized? What should individuals do when they disagree with the reigning order? Protest? Revolt? Withdraw? Our class will approach these perennial philosophical questions through a number of recent films. At the beginning of the semester, we will watch Bong Joon-ho's Parasite, about the stratification of wealth and opportunity in contemporary South Korea; Michael Haneke's Caché, in which a man's personal history—and France's colonial one—come back to haunt him; and Queen and Slim (directed by Melina Matsoukas, screenplay by Lena Waithe), about race and policing. As students develop their interpretations of one of these films in their first paper, we will also learn the basic vocabulary of cinematography and editing. Then, in the middle of the semester, we will turn to questions of adaptation, reading two classic works of philosophical literature and watching films that import their stories into radically different settings. Tolstoy's novella The Death of Ivan Ilyich, about how awareness of our mortality affects our values, is relocated from nineteenth-century Russia to post-World War Two Japan in Akira Kurosawa's Ikiru. Aristophanes' ancient drama Lysistrata, in which the women of Greece go on a sex strike to end the Peloponnesian War, is transported by Spike Lee to Chicago's South Side in Chi-Raq. Students will compare one of these films to its source material in their second papers. Finally, at the end of the semester, we will read some short theoretical selections about the relationship between philosophy and film, attuning students to larger issues as they write a research paper about a philosophical film or filmmaker of their choice, such as Memento, Eternal Sunshine of the Spotless Mind, Stalker, Claire Denis, Jordan Peele, David Lynch, or Terrence Malick, among many other possibilities.

Expository Writing 20 Section: 030

Expository Writing 20 (116353)

Sparsha Saha
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Animals and Politics

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Animals play an important role in politics and society; yet, there is not much academic, governmental, or societal attention on them or on our relationship to them. In this engaged course, you will have the opportunity to learn more about how animals, with a focus on farm animals, impact the environment, our health, pandemics, our prejudicial attitudes toward other humans (like racism and sexism), and even elections. In the first unit, we'll focus on the question of why should we care about the wellbeing of animals in society? We'll read different theories and you'll come up with your own answer. In the research unit, you'll have the chance to ask your very own research question. Given the lack of attention on animals, there are a plethora of topics that could be developed further if we "consider the role of the animal," so this unit very much encourages you to bring your interests to the table. In the capstone unit, you'll work in teams to come up with a "message to the world" about animals based on your individual research projects. The medium for this — a song? A poster? A website? A short movie? Something else? — is up to you. You'll present your projects to our community partners: Ed Winters (Earthling Ed) and the Animal Law and Policy Program over at Harvard Law School. The course finishes up by asking you to write a short blog. There will be required outside of class events. Please be sure to watch the course trailer for more information.

Expository Writing 20 (116353)

**Adam Scheffler**

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

**Instructor Permissions:** Department Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the
**Expos Website.** All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** The Underworld

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Hell is popular. In fact, it's been doing much better than heaven. It's practically a literary consensus that Dante's best book is his *Inferno* not *Purgatorio* or *Paradiso*, and that Milton, a Christian believer, got so carried away in describing Satan and hell that he ended up being "of the Devil's party without knowing it" (Blake). And the world today may be more secular than in past generations, but hell is doing just fine. Harvard presents its own interesting case: Currier House's annual "Heaven and Hell" party has situated "Hell" in a room that can hold about 500 people whereas "Heaven" can fit only about 50. (This past year heaven was eliminated entirely.) But what are the components of hell – what archetypes or depictions of hell and the underworld helped to cement their importance in culture? And why is hell so alive in secular culture? Why do those people who don't believe that hell is real want to keep imagining it again and again (in *Supernatural*, in *South Park*, in *Buffy the Vampire Slayer*, etc.)? In our first unit, we will examine famous underworld themes and archetypes as we look at short excerpts from *Gilgamesh*, Homer, Virgil, Dante, Milton, Jonathan Edwards, the story of Persephone, and the story of Orpheus and Eurydice. In our second unit, we'll consider how these themes and archetypes are taken up by recent secular texts such as a Stephen King short story, the film *Pan's Labyrinth*, and a *New Yorker* article by Harvard Professor Danielle Allen about her cousin's experience in the American prison system. Finally, in our third unit, students will select and research a contemporary depiction of hell, and make an argument about how that hell works as a metaphor for a real-world issue or fear (such as the sleaziness of Hollywood, or bickering families, or mental illness, or the vastness of outer space). Throughout, we will try to better understand the curious attraction of hell, and why its 4,000-year-old story shows no sign of ending.

Expository Writing 20 Section: 034

Expository Writing 20 (116353)

Jessie Schwab (she/her)

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Language, Identity, and Power

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: While a variety of animal species can communicate, humans are unique in their use of language. Language enables us to talk about the future and the past, express complicated thoughts, and develop new technologies. But to what extent does the language we use also make us who we are? How do our social and cultural backgrounds inform our use of language, and how does our use of language influence our social relationships? In this course, we will explore the intersections of language, identity, and
power from an interdisciplinary perspective. In our first unit, we will consider opposing theoretical claims regarding gender differences in communicative interactions, and we will test these theories by analyzing elements of conversations shown in reality television. In our second unit, we will collect our own data (in the form of conversation recordings, surveys, or interviews) to further examine the complex interactions between language, identity, and power dynamics. Here you will form an argument regarding the extent to which elements of our daily language use help to reinforce or subvert existing power structures or markers of identity. In our final unit, you will work to communicate your research-based argument to a wider audience by planning and producing a 10-minute podcast, in which you will distill your research findings and weave in interviews as evidence. Throughout the course, students will also be encouraged to reflect on their own experiences with language, including the ways in which their native languages, accents, and communication styles influence their identity and relationships.

**Topic:** Truth Claims in a Post-Truth World

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** We often describe an idea or phrase as having “the ring of truth,” but what does truth sound like? And what happens when politicians, news organizations, and advertising agencies learn to reproduce or mimic that sound? This course addresses recent claims that we are living in a "posttruth world,” and considers the fate of argument in a world in which truth is subjective, and fact divided into mainstream and alternative forms. Is it possible to draw clear lines between fact and fiction, truth and lies? And if, as Oprah Winfrey has insisted, there is value in the transformative power of "speaking your truth," what does this mean for debate and the project of seeking a truth that exists beyond our personal experience? In our first unit, we'll consider the methods we use to distinguish fact from fiction as we examine fictional and philosophical texts by Tim O’Brien, J.L. Austin, and others that seek to distinguish (or blur the lines) between truth and fiction. In the second unit, we'll focus on subjective truths (or truths that differ for each individual) and examine the challenges these truths pose for our justice system and for fields like medicine and science. Students will choose from a number of potential topics that address the intersection of truth and race, including racial bias in witness testimony and in medical treatment. Our final unit will take us where the quest for truth reaches its extremes: the conspiracy theory. We'll look at the complex anatomy of conspiracy theories from the world-wide (the moon landing "hoax" and "crisis actors," among others) to the local (Harvard-based conspiracies), and students will have an opportunity to design original research projects that fit their interests.

2020 Fall (4 Credits)  
**Schedule:** MW 1030 AM - 1145 AM  
**Instructor Permissions:** Department  
**Enrollment Cap:** 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence.
through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Buddhism, Mindfulness, and the

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**

Today, mindfulness is touted as a panacea, the secret to happiness and health, superb sex and unparalleled productivity. The hype is not entirely new, however. For decades, ostensibly Buddhist ideas have been tossed around in the West as recipes for success in just about any art or craft. But what hides behind this craze? Can Buddhist teachings offer us tools with which to achieve our goals, or are we corrupting Buddhism by using it in such a way? What have artists and practitioners thought of the use of meditative tools, and how have they integrated Buddhist terms like "bare awareness" and "emptiness" into their work?

In order to answer such questions, we will start the course with a reading of the *Satipaṭṭhāna Sutta*, the Buddha's instructions on mindfulness meditation. A close reading of the text in our first unit will give us a glimpse of the ancient Buddhist practice, its complexity and richness. In our second unit, we will read the text that gave the West the idea that Buddhism can allow us to "hit the mark" without trying to do so, Eugen Herrigel's bestselling *Zen in the Art of Archery*. Using Edward Said's classic work, *Orientalism*, we will ask if Herrigel was romanticizing Zen Buddhism, and if he was, what the consequences of such a romanticization have for Japan and the West. In our last unit, we will stage a series of class debates about "mcmindfulness," joining a larger conversation with scientists and Buddhist practitioners about the compatibility of Buddhism with its modern, secular appropriations.

As we reflect on these matters intellectually, we will also practice mindfulness meditation, as well as various other forms of Buddhist meditation. In doing so, we will think about these meditations both practically and critically, at the same time as we refine our analytical understanding of Buddhist ideas.

Expository Writing 20 Section: 039
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Are Prisons Obsolete?

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** With 2.3 million Americans currently locked behind bars, the United States imprisons its citizens at a higher rate than any other country in the world. But calls to reimagine our country's carceral system are on the rise. Black Lives Matter and other movements are asking urgent questions: Why are Black Americans imprisoned five times more than white ones? Should there be for-profit prisons? What crimes merit confinement? What is the purpose of prisons? And do we even need them? In this course, we will grapple with these questions by examining a variety of scholarly perspectives on the United States prison system. We will begin by analyzing the arguments for prison abolition versus reform in Angela Davis's Are Prisons Obsolete? (2003). To situate ourselves within a broad debate over the recent history of mass incarceration in the United States, we will then compare new scholarship on the subject by Michelle Alexander, James Forman, Jr., and Elizabeth Hinton. We will also read first-hand accounts of prisons in Reginald Dwayne Betts's memoir and poetry, as well as Shane Bauer's investigative journalism. Over the course of the semester, we will receive visits from prison reform advocates, prisoners' rights attorneys, and formerly incarcerated people, who will help us understand the United States prison system and the movement for carceral reform today.

evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Why Shakespeare?

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronouncement, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Why did the British government pay $2.4 million to have Shakespeare translated into Mandarin? Does Shakespeare deserve this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare’s popularity by looking into the relationship between his methods of artistic creation and the values of the modern world. We’ll begin with the most famous artwork of the past millennium, Hamlet, about a young scholar (like you) who finds the injustice of the world overwhelming (like you?). Then we’ll turn to Much Ado About Nothing—a precursor to the modern rom coms where two people who can’t stand each other end up falling in love—in conversation with two additional texts: (1) Jeffrey Hall’s The Five Flirting Styles, a sociological theory and, at times, a how-to manual, and (2) the Public Theater’s summer 2019 production of Much Ado, which featured an all-Black cast under a Stacey Abrams 2020 banner. Finally, we’ll ask, “Why Shakespeare?” and entertain answers ranging from the skeptical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

Expository Writing 20 Section: 043

Expository Writing 20 (116353)

Eve Wittenberg

2020 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Department

Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

What is Health?
Health care is on everyone’s minds these days: polls show it is among voters’ top priorities when considering candidates, it dominates headlines, and elected officials wrestle with options to improve our insurance system. Underlying all this talk is a fundamental goal of health—yet what in fact does this term mean? What does it mean to be healthy? What are we trying to achieve with our health system or with health insurance? How would we know if we’ve done a good or bad job? These are the questions that challenge practitioners of medicine, public health, and health policy. To be “healthy” may be living very long, having healthy behaviors, or being happy; it could be a combination of all of these, and it could be different for different people. Understanding what we mean when we talk about health is important to every facet of the health system and to everyone who interacts with it, so we know what we are collectively and individually aiming for and whether it is achieved.

This course will explore what health is, what it means to be healthy or not healthy, and how we can improve people’s health. The emphasis will be on writing from a science and social science perspective, highlighting the distinctions with writing in the humanities. It is an "active-learning" seminar, which means we will use in-class exercises and frequent assignments to build writing skills: you will write, critique others’ writing, talk about writing, read writing aloud, draw diagrams of arguments—all sorts of varied exercises to understand, develop, and improve your own writing style. Unit 1 will focus on the definition of health to form a basis for the semester, including the World Health Organization’s definition and case examples of people who we may or may not consider healthy (for instance, would Stephen Hawking have been considered healthy?). Unit 2 will look at health policies, specifically focusing on childhood obesity prevention. We will read conflicting views of obesity as a medical condition or a descriptor of body size, and grapple with a situation where science points in different directions. Unit 3 will introduce research papers, and you will write on an individually-chosen topic around improving college students’ health. You will learn to use the Harvard library system and resources to write a final paper. The materials for the course will consist of scientific articles (mainly in medicine and public health), online health data sources, commentaries and editorials, videos/TED talks, and a few newspaper articles and websites. Some classes will be held at Harvard’s Global Health Education and Learning Incubator to use verbal and visual exercises to clarify concepts, practice articulating ideas, and develop a focus for writing.

Topic: Representing Childhood

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Cultural attitudes toward childhood have long been complex. Novelists, poets, and philosophers alike have espoused the virtues of cultivating cherished qualities of childhood: the playfulness, authenticity, and boundless curiosity of children unburdened by the stifling responsibilities of adulthood. But, as educators and political commentators remind us at every turn, childhood is also a condition to be overcome, a state of unsophisticated lack of discipline and immaturity that our leaders should avoid. These tensions have made children—so often spoken for and about on the page and screen, but rarely speaking for themselves—into vessels of meaning for a wide variety of purposes, from rallying cries urging military involvement abroad to immigration reform at home. In this course, we'll consider what representations of childhood can tell us about the adult world and childhood itself. What is the root of adult anxieties about children? And what are the moral and practical costs of upholding certain images of childhood—for example, its innocence—to both adults and children themselves? We'll begin our exploration of these questions by attending to the imagined worlds of Brian Aldiss, Ray Bradbury, and Lesley Nneka Arimah. What deeper meanings, we will ask, can be uncovered by attending to representations of children and the child's point of view in their works? Next, we'll shift our gaze to the highly controversial photographs of Sally Mann as we question the limits of acceptable representation of childhood. In the third unit, students will have the opportunity to conduct their own original research as we explore how childhood figures in a range of recent debates from climate change to slacktivism.

Topic: Wizards and Wild Things

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: Once upon a time, there was no Harry Potter. Once upon a time, there was no such thing as children’s literature. When and if children learned to read, they read what grown-ups read. How then did writing for children as we now know it come of age? Why does the genre have such an enduring hold on our cultural imagination, even as it continues to provoke sharp debate over its greater purpose and value? Are classic children’s books like The Wizard of Oz, The Wind in the Willows, and The Cat in the Hat instructive or subversive, didactic or liberating? In this course we’ll examine selections from three centuries of popular prose and verse written expressly for and about children as we investigate how this eclectic canon reflects evolving ideas about childhood, changing views about educating and enchanting young readers, and persistent disputes over what and how children should learn from books. In Unit 1 we’ll survey landmark works in English for children from the Puritan through the Victorian eras, including The New England Primer, Grimms’ Tales, and Alice in Wonderland, as we consider what these texts tell us about the origin and evolution of the genre. In Unit 2 we’ll examine works by touchstone authors for younger readers including Mark Twain, Louisa May Alcott, Rudyard Kipling, E. B. White, C. S. Lewis, Maurice Sendak, and others, drawing on the critical perspectives of thinkers such as John Locke, Bruno Bettelheim, Alison Lurie, and Marina Warner to assess arguments about the essential function of imaginative literature from infancy through adolescence. In the final unit, students will conduct their own research to place a major children’s author of their choice in a relevant cultural and historical context.

**Expository Writing 20**

Section: 202

Expository Writing 20 (116353)

*Jacob Betz*

2021 Spring (4 Credits)

**Schedule:** TR 1200 PM - 0115 PM

**Instructor Permissions:**

Department: Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.
Topic: Religious Pluralism

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: The United States is arguably the most religiously diverse nation in the world. Americans possess a dizzying array of religious beliefs and behavior. And despite predictions to the contrary, levels of devout religious belief remain high, evidenced by recent controversies over a proposed Islamic community center in Lower Manhattan, as well as Supreme Court rulings on female access to contraception and same-sex marriage. How do people—including nonbelievers—experience this religious multiplicity? How are these vast religious differences negotiated socially, culturally, politically, and legally? Moving beyond theology, this course will explore the broad concept of lived religion in the United States. Through readings in fiction, law, history, and sociology, we'll tackle these fundamental issues. In Unit One, we'll read Ayad Akhtar's 2013 Pulitzer Prize-winning play, *Disgraced*, to explore how religion affects intimate relationships among spouses, friends, and co-workers. In the second unit, we'll wade into the constitutional quandary surrounding the First Amendment, dissecting legal scholars' arguments over the limits of religious freedom. Through a series of case studies involving snake handling, home schooling, and drug use, we'll examine the frequent tension that emerges from a Bill of Rights that both guarantees the free exercise of religion and requires some degree of secularism. Finally, in Unit 3, students will focus on a religious topic of their choosing, design a research proposal, examine both primary and secondary sources, and write a substantial research paper.

Expository Writing 20 Section: 204

Expository Writing 20 (116353)

*Collier Brown*

201 Spring (4 Credits)  

**Schedule:** MW 0900 AM - 1015 AM

**Instructor Permissions:** Department  

**Enrollment Cap:** 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.
Topic: Wastelands

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The impenetrable wilderness of *The Revenant*, the diseased streets of *Children of Men*, the trash heap cities of *Wall-E*—these are the wastelands that fascinate our pop culture. On the screen, they come to life as horrifying alternate universes and dead civilizations—the very fates we must avoid at all costs. And yet wastelands are not exclusively the stuff of science fiction. In this course, we will grapple with both imaginary and actual wastelands. We will begin with short stories by Jack London, Thomas King, and Octavia Butler. From the icy wilds of the Yukon to the borderlands of Native American exile, these writers question the way wastelands have been imagined, especially in North America, over the past century. Next, we will turn to real wastelands—to the garbage dumps and arid landscapes where nothing grows. We will ask what these places reveal about their inhabitants, their struggles, and their achievements. Finally, students will research a wasteland of their own choosing—anything from the mega slums of Mumbai to the sprawl of Boston's unused rooftops. Along the way, we will investigate how wastelands form and evolve, and how people adapt to them. Are wastelands actually the places we should avoid at all costs, or are they the places we can no longer afford to ignore?

Expository Writing 20 Section: 206

Expository Writing 20 (116353)

*Willa Brown*

2021 Spring (4 Credits)  
Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Department  
Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the *[Expos Website](#)*. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Remembering the Civil War
Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The "Engaged Scholarship" components of this course include multiple mandatory activities outside of regular class hours."

Over the summer, cities across America erupted in protest. As the weeks dragged on, civil unrest that began with the murder of George Floyd shifted focus. Protesters across the US, and then across the globe, began to tear down statues. And not just any statues – memorials to Civil War generals. Since the violent protests in Charlottesville four years ago to the banning of Confederate flags at NASCAR, the Civil War is at the center of American conversations. How did we get here? How is it that in 2020 symbols and flags of a war a century-and-a-half old still dominate our political landscape? One hundred-and-fifty-five years after Lee and Grant shook hands at Appomattox Court House, it was clearer than ever that the Civil War is not part of our past – it is at the very core of our present.

Together, we will examine the fine line between history and memory, and explore the history of memory. We will explore where the mythologies around the War came from, and try to understand how they affect our current understandings of politics and identity. This course will teach you to read the arguments all around you, whether they're being made by traditional sources like books and articles, or by buildings, statues, and movies. We will begin by decoding the arguments made by Memorial Hall, at the heart of Harvard's community. We'll then dive into the single biggest source of Civil War memory: Gone with the Wind. Finally, you will choose an area of your own interest to dig into for a research paper. Throughout, we'll focus on evaluating arguments and making our own, finishing up with the creation of a well-researched, accessible op-ed and media presentation.

Topic: 1984: Orwell's World and Ours

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: When George Orwell wrote 1984, the year that gave the book its title and setting lay 35 years ahead. Today, it is 35 years in the past, and yet Orwell's prophecies seem more relevant than ever. In 2017, when a Trump spokesperson debuted the concept of "alternative facts" to an incredulous public, 1984 raced to the top of the best-seller charts. In 2013, the book saw a similar resurgence of popularity following revelations of a secret mass surveillance program that allowed the NSA to gather the data of American citizens. Even if you've never read the book you've probably heard – maybe even used – some of its iconic phrases: Big Brother, Thought Police, doublethink, thoughtcrime, Newspeak, or 2+2=5. Orwell invented all of this because he wanted to give his readers a handle on what was happening in the world. He feared that a new species of totalitarian governments wielding new forms of power – power over the body, the mind, and perhaps even reality itself – would come to dominate and dehumanize their citizens, and he believed that only a conscious choice to prevent this would redeem the future. Much has changed since then, including the fall of the totalitarian regimes that inspired the novel, and yet it seems we still cannot put Orwell's premonitions behind us.

In this course, we will shed light on the enduring significance of 1984 by investigating the novel from three different angles. In the first unit, we will grapple with the text itself, close-reading key passages from the novel and using them to explore the underappreciated nuances of Orwell's masterpiece. In the second unit, we will look at the text in its historical context, drawing evidence from Orwell's essays, journalism, and letters to add depth and sophistication to our analysis. In the third unit, we will consider whether and to what extent Orwell's novel still illuminates our future. Students will pursue independent research on key Orwellian themes such as authoritarianism, post-truth, and surveillance, in order to see how the arguments of contemporary scholars and thought leaders have updated Orwell's insights for the twenty-first century. During this time, the class will also collaborate on a video time capsule to transmit our own predictions, hopes, and fears to the Harvard students of the future.

Topic: Modern Love

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Reader, I married him." As this famous line from Charlotte Brontë's Jane Eyre reminds us, writers have long been preoccupied with matters of the heart. Courtship plots are everywhere, from the novels of Jane Austen to the "rom-coms" of the 1980s and 1990s to essays you can find every Sunday in the "Styles" section of the New York Times. For centuries, marriage was primarily an economic relationship, and love outside of marriage ended in humiliation or even death. But what happens when society expands the options for living and loving? What happens to the courtship plot when women choose not to be wives, or when people who once couldn't marry now can? When couples are as likely to meet through Tinder as they are through mutual friends? In this course, we'll explore what courtship plots can tell us about changing concepts of gender, sexuality, family, and
freedom. We'll start with fiction by Edith Wharton, one of the American literature's keenest social observers (and, incidentally, one of the inspirations for the TV show *Gossip Girl*). By closely reading her accounts of love and marriage in New York's high society at the turn of the twentieth century, we'll ask what stories about eligible bachelors and old maids can tell us about a society's values and beliefs. In our second unit, we'll turn to more recent courtship plots that trouble traditional conceptions of romance, marriage, and the family. Our texts will include the story "Brokeback Mountain" (and scenes from the Oscar-winning film), short fiction from Pulitzer-prize-winner Jhumpa Lahiri, and the viral *New Yorker* short story "Cat Person." Using feminist theory, queer theory, literary criticism, and recent sociologies of dating, we'll examine what new romantic possibilities—and problems—exist for couples today. Finally, in our third unit, students will pick a modern love story of their choosing—a novel, a memoir, a film—and, drawing on the work of critics and scholars, make an argument about what this story shows us about our society's sexual mores.

**Expository Writing 20 Section: 214**

Expository Writing 20 (116353)

*Janling Fu*

2021 Spring (4 Credits)  
**Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Department  
Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:**  
Eating Culture

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** "Food . . . is not art. . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William
Deresciewicz, in an opinion piece for the New York Times, dismisses our society’s rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories of cod, salt, and sugar, to the glut of cooking shows, many featuring contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresciewicz right to say that food won’t give us insight into ourselves? Is it not possible that by examining what scholars and commentators call “foodways”—the various forces involved in how different cultures produce, buy, sell, and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, “food is good to think,” as we contemplate various foodways from a number of illuminating perspectives. In our first unit we delve into what makes food “disgusting” or “natural.” How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful cooking shows produced in different countries, for instance, Top Chef, Iron Chef, and The Great British Bake Off. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? Has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

### Expository Writing 20 Section: 216

Expository Writing 20 (116353)

Alexandra Gold

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Department Enrollment Cap: 14

An intensive seminar that aims to improve each student’s ability to discover and reason about evidence
through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Telling Her Story: Narrative,

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** In a powerful essay, the late writer and activist Audre Lorde suggested, "Where the words of women are crying to be heard we must each of us recognize our responsibility to seek those words out, to read them and share them and examine them in their pertinence to our lives." Lorde is not alone in asking us to pay attention to and take responsibility for women's stories; for centuries scholars and activists alike have championed the words of women, including women of color and queer women, whose stories have routinely gone untold or unheard. Yet if this issue has always been pressing, the call to heed women's stories seems especially urgent at a moment when such stories have come to dominate the cultural landscape and public consciousness – from news accounts to popular shows, literature to social media. This course responds to this moment by examining how women's stories are narrated across a variety of media and exploring what impact the sharing of them can have. Our first unit will focus on short stories by contemporary women authors Roxane Gay, Carmen Maria Machado, and Jenny Zhang that raise questions about the body, family, love, and society. Our second unit then turns to television, studying Hulu's 2017 adaptation of Margaret Atwood's dystopian novel *The Handmaid's Tale*. Informed by readings in critical feminist theory, we'll consider how the show probes the troubling connections between gender, authority, power, and image. Finally, our third unit engages visual and performance art alongside movements like #MeToo and #SayHerName, offering students an opportunity to pursue independent research projects that explore the relations between art, activism, and social media.

**Expository Writing 20** Section: 218

Expository Writing 20 (116353)
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial society. They may be doing what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: “to imagine that which we know.” How, then, have creative minds imagined – in essays, books, and movies – the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists – Rachel Carson's Silent Spring (1962), and James Lovelock's The Revenge of Gaia (2006). Through shocking critiques that draw upon the power of the imagination, both writers, in different ways, have tried to inform the public of the harm being done to nature in the hope that this harm can be averted. And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals – Werner Herzog's Grizzly Man (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite's Blackfish (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

**Expository Writing 20 Section: 220**

James Herron

2021 Spring (4 Credits)  

**Schedule:**  
TR 1200 PM - 0115 PM

**Instructor Permissions:**  
Department  
Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:**  
Class and Culture

**Course Notes:**  
Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:**  
It is commonplace to note that in the United States many people identify as "middle class" even though our society is marked by deep, persistent, and increasing class inequality. Such self-identification, however, can obscure the complex and often contradictory ways in which we experience social class in our everyday lives. This course explores the cultural dimensions of social class in the U.S. from an ethnographic perspective, focusing on the everyday lives and cultures of ordinary Americans. We will consider questions such as the following. What is it like to be a working class person in a society heavily invested in ideas of individual advancement and meritocracy? How do professionals (the "upper-middle" class) define themselves and how do they view those above and below them in the class structure? What role does elite education play in the creation and reproduction of class inequality? How does social class shape people’s values, political views, and tastes? In our first unit we will compare two important ethnographic studies of working class Americans — Michèle Lamont’s classic *The Dignity of Working Men* and Jennifer Silva’s more recent *Coming Up Short* — in order to gain some understanding of how working class people have responded to the relative decline in their living standards over the past 20 years. In the second unit we will read selections from Armstrong and Hamilton'
Paying for the Party in order to analyze the role of higher education in shaping the class trajectories of students from working-, middle-, and upper-class backgrounds. For the third unit students will devise their own research project concerning the roles and self-conceptions of elites. For inspiration, we'll read selections of Shamus Khan’s Privilege, which examines life at an elite New England boarding school, and Karen Ho’s Liquidated, which analyzes the ideologies and identities of Wall Street financiers.

Expository Writing 20 Section: 221

Expository Writing 20 (116353)

Richard Martin

2021 Spring (4 Credits)

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: Department

Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Society and the Witch

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated through the witch's very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand others' beliefs in the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we closely analyze the film Harry Potter and the Chamber of Secrets and the television sitcom Bewitched, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on Purity and Danger, Pierre Bourdieu's critique of Masculine Domination, and Umberto Eco's ruminations on interpreting serials.
Using these theories, we examine the aesthetic and cultural significance of imaginative representations of witches. For the research paper, each student chooses their own example of witchcraft on which to conduct independent research. Sample topics include postmodern fairy tales like Frozen and Maleficent, Broadway musicals like Into the Woods and Wicked, historical witch-hunts and contemporary occult practices. What unites our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

**Expository Writing  20 Section: 223**

Rachel Meyer

2021 Spring (4 Credits)  
**Schedule:**  
MW 1030 AM - 1145 AM

**Instructor Permissions:**  
Department  
Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:**  
Work: Culture, Power, and Cont

**Course Notes:**  
Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**  
This course explores the structure and experience of work in the contemporary political economy with an eye toward both its liberating and oppressive potential. We will take up enduring sociological questions with respect to power, control, autonomy, surveillance and self-determination on the job. How do different forms of work affect our life circumstances, personalities, and connections to each other? In the first unit we will examine corporate culture and how it affects the experience of professional work. Does a strong corporate culture enhance professional autonomy or management’s power? Does it facilitate or undermine community? In unit two we explore the crucial issue of workers’ control over their own labor and the concept of alienation. We examine accounts of deskilling, the separation of mental and manual labor, and the consequences of these processes for workers' experience on the job. To what extent does alienation occur in offices versus factories versus service counters? For the final unit we
will critically engage in a debate about the development of "flexible" labor and the ways in which workers' connections to employers, occupations, and locations have become more fluid and transitory. We will explore what flexibility means in a variety of contexts and ask: does flexibility lead to liberation or loss of identity? Does it bring self-fulfillment or insecurity? What does flexibility mean for tech workers in Silicon Valley and bankers on Wall Street? Our texts consist of case studies and ethnographic accounts representing a variety of workplaces along with readings from prominent social theorists who in different ways seek to elucidate the conditions of work under modern capitalism.

**Expository Writing 20** Section: 224

Lindsay Mitchell

2021 Spring (4 Credits) Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Department Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** The Femme Fatale

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** The femme fatale—the attractive, seductive woman who brings about the downfall of men—has fascinated us through the ages, from Biblical figures like Eve and Delilah, to historical women such as Cleopatra and Wallis Simpson, to the media personas of modern pop stars like Cardi B and Miley Cyrus. In the classic femme fatale narrative, the woman's dangerous actions empower her, but she also must submit to the fact that her empowerment renders her a villain. Might this contradiction in the femme fatale's character reflect tensions in our own evolving understanding of gender? How can the femme fatale character help us untangle the real-world gender problems that modern women and men
This course will begin to explore these and other related questions by studying accounts of femme fatales in literature and film. In our first unit, we’ll explore 1920s and 1930s pulp fiction as a source of the modern fatale archetype, with special focus on James M. Cain’s noir novella *Double Indemnity*. In our second unit, we’ll move forward to the post-feminist movement 1990s and examine two films featuring teenage femme fatales, comparing Gil Junger’s *Ten Things I Hate About You* to Alexander Payne’s *Election*, both released in 1999. Finally, in our third unit, students will research a modern-day femme fatale, either real or fictional, and argue why the modern version is recognizable as a femme fatale, but also represents some evolution of, or twist on, the classic archetype. Here students will be challenged not only to apply broad theories and ideas from the course, but also to reach a greater understanding of why some modern women seem so dangerous.

Expository Writing  20 Section: 226

Expository Writing 20 (116353)

Shannon Monaghan

2021 Spring (4 Credits)  

Schedule: TR 0900 AM - 1015 AM  

Instructor Permissions: Department  

Enrollment Cap: 14  

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: "Noncombatants": The Home Front

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: While it is perceived today as one of the greatest aberrations in human society, warfare has also been one of the most common experiences in human history. Yet popular conceptions of the history of warfare are often limited to the myth of completely separated soldiers and
civilians. This has not, historically, been so: there is a reason that we call the "home front" a front. We begin by looking at the idea of "total war" within the context of several modern case studies. We will question and examine the roles of women and children, as agents and as targets, in these conflicts. We then move to thinking about the memory and meaning of war through the art and memoirs of the great German printmaker and sculptor Kathé Kollwitz and the intellectual polymath (and French Resistance member) Marguerite Duras. What do the histories and stories that we tell about war, about resistance and about patriotism, particularly stories told by those not in uniform, add to the national and cultural understanding of a conflict? In the final unit, students will choose their own historical research subject from a variety of options. They might investigate conflicts and wars ranging from the recent (the "forever wars" of Iraq and Afghanistan) to the nineteenth century (the U.S. Civil War); from the modern and industrial (the Second World War) to the guerrilla, civil, and anti-imperial (the Spanish Civil War and the Algerian War of Independence). Further research options include different types of participants in conflict (from forcibly recruited child soldiers to anti-war activism) and different ways to pressure an enemy (food policy and blockade). Students will analyze the conflict in their chosen subject through the lens of the unexpected agent in modern warfare: the woman and/or the child. Throughout the course, we will ask what it means to be a "soldier" or a "civilian" in modern conflict, pondering the nature of the distinction.

In the final unit, students will choose their own historical research subject from a variety of options. They might investigate conflicts and wars ranging from the recent (the "forever wars" of Iraq and Afghanistan) to the nineteenth century (the U.S. Civil War); from the modern and industrial (the Second World War) to the guerrilla, civil, and anti-imperial (the Spanish Civil War and the Algerian War of Independence). Further research options include different types of participants in conflict (from forcibly recruited child soldiers to anti-war activism) and different ways to pressure an enemy (food policy and blockade). Students will analyze the conflict in their chosen subject through the lens of the unexpected agent in modern warfare: the woman and/or the child. Throughout the course, we will ask what it means to be a "soldier" or a "civilian" in modern conflict, pondering the nature of the distinction.

Expository Writing  20 Section: 228

Expository Writing 20 (116353)

Emilie Raymer

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Department Enrollment Cap: 14
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Genetics and Bioethics

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** When researchers at the National Institutes of Health announced in June 2000 that they had successfully sequenced the human genome, President Bill Clinton asserted that “with this profound new knowledge, mankind is on the verge of gaining immense, new power to heal.” Since 2000, scientists have developed DNA-risk tests, stem-cell therapies, and precise gene-editing techniques. Yet, despite the potential benefits of these breakthroughs, some have expressed concerns about the bioethical consequences of these new technologies. Critics have voiced fears that scientists are “playing God” and have expressed apprehensions that those who can afford new gene-editing technologies may produce “designer babies” while those who cannot will continue to suffer from heritable diseases. In this course, we will explore how to balance the medical advantages of genetic technologies with their potential disadvantages. For the first essay, we will analyze “The Case Against Perfection” by Harvard political philosopher Michael Sandel, who emphasizes the dangers of genetic enhancements. For the second essay, we will explore claims that new genetic techniques could create a contemporary eugenics movement. For the third and final essay, students will examine both the positive and negative consequences of a genetic technology of their choice and decide how to establish bioethical guidelines to direct its use. Possible topics could include human germline editing, pharmacogenomics, stem-cell therapy, cosmetic enhancements, cloning, or CRISPR-CaSI, a new gene-editing technique. The course will culminate with a capstone project, and students will prepare a short talk about the social and biomedical ramifications of a selected genetic technology.

**Expository Writing 20 Section: 229**

Expository Writing 20 (116353)

*Emilie Raymer*
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Genetics and Bioethics

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: When researchers at the National Institutes of Health announced in June 2000 that they had successfully sequenced the human genome, President Bill Clinton asserted that "with this profound new knowledge, mankind is on the verge of gaining immense, new power to heal." Since 2000, scientists have developed DNA-risk tests, stem-cell therapies, and precise gene-editing techniques. Yet, despite the potential benefits of these breakthroughs, some have expressed concerns about the bioethical consequences of these new technologies. Critics have voiced fears that scientists are "playing God" and have expressed apprehensions that those who can afford new gene-editing technologies may produce "designer babies" while those who cannot will continue to suffer from heritable diseases. In this course, we will explore how to balance the medical advantages of genetic technologies with their potential disadvantages. For the first essay, we will analyze "The Case Against Perfection" by Harvard political philosopher Michael Sandel, who emphasizes the dangers of genetic enhancements. For the second essay, we will explore claims that new genetic techniques could create a contemporary eugenics movement. For the third and final essay, students will examine both the positive and negative consequences of a genetic technology of their choice and decide how to establish bioethical guidelines to direct its use. Possible topics could include human germline editing, pharmacogenomics, stem-cell therapy, cosmetic enhancements, cloning, or CRISPR-CaS, a new gene-editing technique. The course will culminate with a capstone project, and students will prepare a short talk about the social and biomedical ramifications of a selected genetic technology.

All sections emphasize revision.

Topic: God and Government

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "God is Back!" proclaims the title of a 2009 book by the editor-in-chief of The Economist. "Democracy is giving the world's peoples their voice," asserts a feature in Foreign Policy magazine, "and they want to talk about God." Although many have assumed that modernization would diminish the cultural and political salience of religion, the contemporary world provides little evidence to sustain that belief. Religious difference has been central to some of the most violent conflicts of the past thirty years (the Balkan Wars, the "Troubles" in Northern Ireland, Israeli-Palestinian border clashes, ethnic cleansing in Burma, the rise of ISIS), even as it is also central to many figures of political resistance (e.g., the Dalai Lama) and a wide range of reformist and humanitarian efforts worldwide. Meanwhile, even in the supposedly more secular West, religion remains a volatile flashpoint on a range of political issues, from immigration and assimilation (the Trump administration's "Muslim ban") to free speech and self-expression (the Charlie Hebdo affair in France) to the politics of gender and sexuality (the perennial fights over abortion and LGBT rights). Without a doubt, religious actors remain a potent and visible presence in the political workings of the contemporary world. To get a handle on this complex topic, this course is organized around a set of carefully selected case studies that showcase some of the most significant philosophical, legal, and sociopolitical challenges posed by the problem of state governance of religion.

To write about religion requires care and compassion, an attentiveness to analytical precision and evenhandedness. Students in the class can expect not only to think carefully about some of the trickiest and most tendentious political issues of the modern era, but also how to write effectively and persuasively about them. Learning to write about religion, then, is a great preparation for learning to write persuasively about any complex or controversial issue.

Expository Writing  20  Section: 233

Expository Writing 20 (116353)

Ramyar Rossoukh

2021 Spring (4 Credits)  Schedule:  TR 0300 PM - 0415 PM

Instructor Permissions:  Department  Enrollment Cap:  14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:  Journey to Mars

Course Notes:  Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes:  Evoking President Kennedy's famous speech to put a man on the moon by the end of the 1960s, on October 11, 2016, President Obama called for the United States to launch humans to Mars by 2030 and to one day settle there. The quest to achieve this goal has dominated recent headlines from NASA’s landing of the Curiosity Rover to Hollywood’s renewed fascination with the red planet. Mars has become the next great frontier in human conquest and exploration. Why Mars? What is at stake in our efforts to reach Mars? What does it say about life here on Earth? Over the semester, we will look at a range of scholarly literature on Mars as well as films, science fiction, and virtual reality simulations to examine some possible futures in which humans have colonized outer space and become a multi-planetary species. Our launch will be a close analysis of the film The Martian to discover key themes and topics in media representations of Mars. We will next chart a path through Ray Bradbury’s The Martian Chronicles to explore connections between science, technology, and art in our imagination of human life and the experience of difference on Mars. The course will conclude with a broader inquiry of Mars as the next frontier of human entrepreneurship that critically engages with the science and ethics of proposed future Mars missions (Mars One, SpaceX, UAE’s Mars 2117, among others). Students will write a final research paper on a topic of their choice that builds on course readings, activities, and discussion.

Expository Writing 20 Section: 235

Expository Writing 20 (116353)

Ben Roth

2021 Spring (4 Credits) Schedule: TR 0600 PM - 0715 PM

Instructor Permissions: Department Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Philosophical Films

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: How should society be organized? What should individuals do when they disagree with the reigning order? Protest? Revolt? Withdraw? Our class will approach these perennial philosophical questions though a number of recent films. At the beginning of the semester, we will watch Sophie Barthes's Cold Souls, Boots Riley's Sorry to Bother You, and Bong Joon-ho's Snowpiercer, which in very different settings—affluent New York City, the gentrifying Bay area, and a frozen post-apocalyptic world—offer critiques of the stratification of wealth and opportunity between haves and have-nots. As students develop their interpretations of one of these films in their first paper, we will also learn the basic vocabulary of cinematography and editing. Then, in the middle of the semester, we will consider the stories of two individuals who, alienated from society, decide to recede from it, examining their own lives in minute detail instead. In Tom McCarthy's cult-classic novel Remainder and video artist Omer Fast's adaptation of it, a man is pathologically compelled to reenact a (possibly false) memory of a time when he felt authentic; he then begins, very strangely, to reenact moments from other people's lives. In Charlie Kaufman's film Synecdoche, New York, a playwright self-consciously recreates his life on stage, eventually employing hundreds of actors and filling multiple impossibly large warehouses. In order to think about the nature of adaptation—from text to screen, from life to art—students will compare two of these works, with attention to the differences between them facilitating more nuanced arguments about memory, authenticity, and how we should live. Finally, at the end of the semester, we will read some short theoretical selections about the relationship between philosophy and film, attuning students to larger issues as they write a research paper about a philosophical film or filmmaker of their choice, such as Memento, Eternal Sunshine of the Spotless Mind, Stalker, Claire Denis, Spike Lee, Akira Kurosawa, David Lynch, or Terrence Malick, among many other possibilities.

Expository Writing 20 Section: 236

Expository Writing 20 (116353)

Sparsha Saha

2021 Spring (4 Credits) Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: Department Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Animals and Politics

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Animals play an important role in politics and society; yet, there is not much academic, governmental, or societal attention on them or on our relationship to them. In this engaged course, you will have the opportunity to learn more about how animals, with a focus on farm animals, impact the environment, our health, pandemics, our prejudicial attitudes toward other humans (like racism and sexism), and even elections. In the first unit, we'll focus on the question of why should we care about the wellbeing of animals in society? We'll read different theories and you'll come up with your own answer. In the research unit, you'll have the chance to ask your very own research question. Given the lack of attention on animals, there are a plethora of topics that could be developed further if we "consider the role of the animal," so this unit very much encourages you to bring your interests to the table. In the capstone unit, you'll work in teams to come up with a "message to the world" about animals based on your individual research projects. The medium for this — a song? A poster? A website? A short movie? Something else? — is up to you. You'll present your projects to our community partners: Ed Winters (Earthling Ed) and the Animal Law and Policy Program over at Harvard Law School. The course finishes up by asking you to write a short blog. There will be required outside of class events. Please be sure to watch the course trailer for more information.

Expository Writing 20 Section: 238

Expository Writing 20 (116353)

Adam Scheffler

2021 Spring (4 Credits)  

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Department  
Enrollment Cap: 14

An intensive seminar that aims to improve each student’s ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: The Underworld

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: Hell is popular. In fact, it’s been doing much better than heaven. It’s practically a literary consensus that Dante’s best book is his Inferno not Purgatorio or Paradiso, and that Milton, a Christian believer, got so carried away in describing Satan and hell that he ended up being “of the Devil’s party without knowing it” (Blake). And the world today may be more secular than in past generations, but hell is doing just fine. Harvard presents its own interesting case: Currier House’s annual “Heaven and Hell” party has situated “Hell” in a room that can hold about 500 people whereas “Heaven” can fit only about 50. (This past year heaven was eliminated entirely.) But what are the components of hell – what archetypes or depictions of hell and the underworld helped to cement their importance in culture? And why is hell so alive in secular culture? Why do those people who don’t believe that hell is real want to keep imagining it again and again (in Supernatural, in South Park, in Buffy the Vampire Slayer, etc.)? In our first unit, we will examine famous underworld themes and archetypes as we look at short excerpts from Gilgamesh, Homer, Virgil, Dante, Milton, Jonathan Edwards, the story of Persephone, and the story of Orpheus and Eurydice. In our second unit, we’ll consider how these themes and archetypes are taken up by recent secular texts such as a Stephen King short story, the film Pan’s Labyrinth, and a New Yorker article by Harvard Professor Danielle Allen about her cousin’s experience in the American prison system. Finally, in our third unit, students will select and research a contemporary depiction of hell, and make an argument about how that hell works as a metaphor for a real-world issue or fear (such as the sleaziness of Hollywood, or bickering families, or mental illness, or the vastness of outer space). Throughout, we will try to
better understand the curious attraction of hell, and why its 4,000-year-old story shows no sign of ending.

Expository Writing   20 Section: 240

Expository Writing 20 (116353)

Jessie Schwab (she/her)

2021 Spring (4 Credits)

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: Department Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Language, Identity, and Power

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: While a variety of animal species can communicate, humans are unique in their use of language. Language enables us to talk about the future and the past, express complicated thoughts, and develop new technologies. But to what extent does the language we use also make us who we are? How do our social and cultural backgrounds inform our use of language, and how does our use of language influence our social relationships? In this course, we will explore the intersections of language, identity, and power from an interdisciplinary perspective. In our first unit, we will consider opposing theoretical claims regarding gender differences in communicative interactions, and we will test these theories by analyzing elements of conversations shown in reality television. In our second unit, we will collect our own data (in the form of conversation recordings, surveys, or interviews) to further examine the complex interactions between language, identity, and power dynamics. Here you will form an argument regarding the extent to which elements of our daily language use help to reinforce or subvert
existing power structures or markers of identity. In our final unit, you will work to communicate.

How do our social and cultural backgrounds inform our use of language, and how does our use of language influence our social relationships? In this course, we will explore the intersections of language, identity, and power from an interdisciplinary perspective. In our first unit, we will consider opposing theoretical claims regarding gender differences in communicative interactions, and we will test these theories by analyzing elements of conversations shown in reality television. In our second unit, we will collect our own data (in the form of conversation recordings, surveys, or interviews) to further examine the complex interactions between language, identity, and power dynamics. Here you will form an argument regarding the extent to which elements of our daily language use help to reinforce or subvert existing power structures or markers of identity. In our final unit, you will work to communicate.

Expository Writing 20 Section: 242

Hudson Vincent

2021 Spring (4 Credits) Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: Department Enrollment Cap: 14

Expository Writing 20 (116353)

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Are Prisons Obsolete?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: With 2.3 million Americans currently locked behind bars, the United States imprisons its citizens at a higher rate than any other country in the world. But calls to reimagine our country's carceral system are on the rise. Black Lives Matter and other movements are asking urgent questions: Why are Black Americans imprisoned five times more than white ones? Should there be for-profit prisons? What crimes merit confinement? What is the purpose of prisons? And do we even need them? In this course, we will grapple with these questions by examining a variety of scholarly perspectives on the United States prison system. We will begin by analyzing the arguments for prison abolition versus reform in Angela Davis's Are Prisons Obsolete? (2003). To situate ourselves within a broad debate over the recent history of mass incarceration in the United States, we will then compare new scholarship on the subject by Michelle Alexander, James Forman Jr., and Elizabeth Hinton. We will also read first-hand accounts of prisons in Reginald Dwayne Betts's memoir and poetry, as well as Shane Bauer's investigative journalism. Over the course of the semester, we will receive visits from prison abolitionists, civil rights attorneys, and formerly incarcerated people, who will help us understand the movement to end mass incarceration in the United States.

Expository Writing 20 Section: 244

Expository Writing 20 (116353)

Julia Tejblum

2021 Spring (4 Credits)  

Schedule: TR 0730 AM - 0845 AM  

Instructor Permissions: Department  

Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Truth Claims in a Post-Truth W

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: We often describe an idea or phrase as having "the ring of truth," but what does truth sound like? And what happens when politicians, news organizations, and advertising agencies learn to reproduce or mimic that sound? This course addresses recent claims that we are living in a "post-truth world," and considers the fate of argument in a world in which truth is subjective, and fact divided into mainstream and alternative forms. Is it possible to draw clear lines between fact and fiction, truth and lies? And if, as Oprah Winfrey has insisted, there is value in the transformative power of "speaking your truth," what does this mean for debate and the project of seeking a truth that exists beyond our personal experience? In our first unit, we'll consider the methods we use to distinguish fact from fiction as we examine fictional and philosophical texts by Tim O'Brien, J.L. Austin, and others that seek to distinguish (or blur the lines) between truth and fiction. In the second unit, we'll engage with texts from both sides of heated debates that challenge the idea of "expertise"—including climate-change and vaccination as we explore how social media platforms shape our relationship to the truth and to argument. Our final unit will take us where the quest for truth reaches its extremes: the conspiracy
theory. We'll look at the complex anatomy of conspiracy theories from the world-wide (the moon landing "hoax" and "crisis actors," among others) to the local (Harvard-based conspiracies), and students will have an opportunity to interview peers and local members of the community as they conduct their research.

**Expository Writing 20** Section: 246

Expository Writing 20 (116353)

_Ezer Vierba_

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM

**Instructor Permissions:** Department **Enrollment Cap:** 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Buddhism, Mindfulness, and the

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**

Today, mindfulness is touted as a panacea, the secret to happiness and health, superb sex and unparalleled productivity. The hype is not entirely new, however. For decades, ostensibly Buddhist ideas have been tossed around in the West as recipes for success in just about any art or craft. But what hides behind this craze? Can Buddhist teachings offer us tools with which to achieve our goals, or are we corrupting Buddhism by applying it in such a way? What have artists and practitioners thought of the use of meditative tools, and how have they integrated Buddhist terms like "bare awareness" and "emptiness" into their work?

In order to answer such questions, we will start the course with a reading of the *Satipaṭṭhāna Sutta*, the Buddha's instructions on mindfulness mediation. A close reading the text in our first unit will give us a glimpse of the ancient Buddhist practice, its complexity and
richness. As we move into our second unit, we will read the text that first gave the West the idea that Buddhism can allow us to "hit the mark" without trying to do so, Eugen Herrigel's bestselling 1948 book, *Zen in the Art of Archery*. Using Edward Said's classic work, *Orientalism*, we will ask if Herrigel was romanticizing Zen Buddhism, and if he was, what the consequences of such a romanticization have for Japan and the West. In our last unit, we will read the work of Chögyam Trungpa, one of the most charismatic masters to have taught in the West. His lectures in *Dharma Art* will provide us a glimpse into the way Buddhist religious-artistic practices have influenced contemporary artists in the West. By looking at Trungpa's Tibetan "crazy wisdom," we will try to understand what Buddhist ideas of self/not-self mean, and why artists have taken such avid interest in them.

As we read these texts, we will also practice mindfulness meditation, as well as various other forms of Buddhist meditation. In doing so, we will think about these meditations both practically and critically, at the same time as we refine our analytical understanding of Buddhist ideas.

**Topic:** Why Shakespeare?

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronouncement, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Why did the British government pay $2.4 million to have Shakespeare translated into Mandarin? Does Shakespeare deserve this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his methods of artistic creation and the values of the modern world. We’ll begin with the most famous artwork of the past millennium, Hamlet, about a young scholar (like you) who finds the injustice of the world overwhelming (like you?). Then we’ll turn to Othello, its confrontation with race and gender especially relevant in our moment. We’ll read it in conversation with Blindspot: Hidden Biases of Good People by Anthony Greenwald and Mahzarin Banaji, a social science theory we'll use to think about the identity politics of Shakespeare and his characters; and with Desdemona by Toni Morrison, whose recent passing will no doubt bring additional weight to her adaptation of Othello addressing life "beyond death when you have time, time, time to talk, to explain, to reargue, to debate, to confess, to love." Finally, we’ll ask, “Why Shakespeare?” and entertain answers ranging from the skeptical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

Expository Writing 20 Section: 250

Expository Writing 20 (116353)
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** What is Health?

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Health care is on everyone's minds these days: polls show it is among voters' top priorities when considering candidates, it dominates headlines, and elected officials wrestle with options to improve our insurance system. Underlying all this talk is a fundamental goal of health—yet what in fact does this term mean? What does it mean to be healthy? What are we trying to achieve with our health system or with health insurance? How would we know if we've done a good or bad job? These are the questions that challenge practitioners of medicine, public health, and health policy. To be "healthy" may be living very long, having healthy behaviors, or being happy; it could be a combination of all of these, and it could be different for different people. Understanding what we mean when we talk about health is important to every facet of the health system and to everyone who interacts with it, so we know what we are collectively and individually aiming for and whether it is achieved.

This course will explore what health is, what it means to be healthy or not healthy, and how we can improve people's health. The emphasis will be on writing from a science and social science perspective, highlighting the distinctions with writing in the humanities. It is an "active-learning" seminar, which means we will use in-class exercises and frequent assignments to build writing skills: you will write, critique others' writing, talk about writing, read writing aloud, draw diagrams of arguments—all sorts of varied exercises to understand, develop, and improve your own writing style. Unit 1 will focus on the definition of health to form a basis for the semester, including the World Health Organization's definition and case examples of people who we may or may not consider healthy (for instance, would Stephen Hawking have been considered healthy?). Unit 2 will look at health policies, specifically focusing on childhood obesity prevention. We will read conflicting views of obesity as a medical condition or a descriptor of body size, and grapple with a situation where science points in different directions. Unit 3 will introduce research papers, and you will write on an individually-chosen topic around improving college students' health. You will learn to use the Harvard library system and resources to write a final paper. The materials for the course will consist of scientific articles (mainly in medicine and public health), online health data sources, commentaries and editorials, videos/TED talks, and a few newspaper articles and websites. Some classes will be held at Harvard's Global Health Education and Learning Incubator to use verbal and visual exercises to clarify concepts, practice
articulating ideas, and develop a focus for writing.

Expository Writing 20 (116353)

Hannah Rosefield

2021 Spring (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Department Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: American Money

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Money is famously difficult to talk about: too awkward, too divisive, too complicated, too abstract, too personal. In this course, we look at how contemporary American writers, philosophers and filmmakers have chosen to talk about money, and how these conversations involve questions of class, justice, work, race and gender. In the first unit of the course, students will watch the 2015 film The Big Short and read sociological writing about the culture of Wall Street, in order to explore how the film portrays the values and practices of the financial industry. Unit Two focuses on arguments made by contemporary philosophers and journalists about how individuals and governments should spend their money in order to reflect their values and create a just and healthy world: readings will include Ta-Nehisi Coates's article "The Case for Reparations", Silvia Federici's manifesto "Wages Against
Housework” and Michael Sandel’s work on morals and markets. We will ask questions such as: What is money? How do we decide what monetary value to place upon love, or a nation’s racist history, or body parts—and is there anything that should not have a price put on it? How does money interact with race, class and gender in the United States, and how does it mediate our personal relationships? The final unit of the course presents students with a selection of recent films and television series, including Dirty Dancing (1987), Magic Mike (2012), Support the Girls (2018) and Succession (2018), that raise questions about the relationship between money, work and gender. Focusing on one of the suggested films or television shows, students will undertake their own research to make an original argument in conversation with the work of other scholars.

Expository Writing  20 Section: 260

Expository Writing 20 (116353)

Hannah Rosefield

2021 Spring (4 Credits)  Schedule:  MW 1200 PM - 0115 PM

Instructor Permissions:  Department  Enrollment Cap:  14

An intensive seminar that aims to improve each student’s ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:  American Money

Course Notes:  Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes:  Money is famously difficult to talk about: too awkward, too divisive, too complicated, too abstract, too personal. In this course, we look at how contemporary American writers, philosophers and filmmakers have chosen to talk about money, and how these conversations involve questions of class, justice, work, race and gender. In the first unit of the course, students will watch the 2015 film The Big Short and read sociological writing about the culture of Wall Street, in order to explore how the film portrays the values and practices of the financial industry. Unit Two focuses on arguments made by contemporary philosophers.

**Expository Writing 20 Section: 262**

Expository Writing 20 (116353)

Janling Fu

2021 Spring (4 Credits)

Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Department Enrollment Cap: 13

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Eating Culture

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** "Food . . . is not art. . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William Deresiewicz, in an opinion piece for the New York Times, dismisses our society's rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories
of cod, salt, and sugar, to the glut of cooking shows, many featuring contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresciewicz right to say that food won't give us insight into ourselves? Is it not possible that by examining what scholars and commentators call "foodways"—the various forces involved in how different cultures produce, buy, sell, and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, "food is good to think," as we contemplate various foodways from a number of illuminating perspectives. In our first unit we delve into what makes food "disgusting" or "natural." How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful cooking shows produced in different countries, for instance, *Top Chef*, *Iron Chef*, and *The Great British Bake Off*. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? How has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

**Expository Writing 20** Section: ES01

Expository Writing 20 (116353)

*Karen Heath*

2021 Spring (4 Credits)  
**Schedule:** TR 1200 PM - 0115 PM

**Instructor Permissions:** Department  
Enrollment Cap: 9

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](https://www.expos.harvard.edu). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed
Evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Expos Studio 20: The Successful

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** What does the successful life consist of? Do we base our notions of success on careers and paychecks? On the impact we have on others? On where we go to college, or on the happiness we achieve? In this course, we will investigate the different definitions and assumptions we might hold about success. First, we will examine accounts of working in a variety of professions. What makes the work in that career meaningful? How do people measure success in these occupations? And what do people sacrifice for their success? Next, students will conduct original research to answer a question about success they’re interested in, whether happening right here at Harvard or elsewhere. What, for example, predicts success in school, or in athletics and other extracurricular activities? What difference does a person’s race, socioeconomic background, gender identity, culture, or religion make to their attaining success? What power do media images of success and failure have on people? What are potential barriers to success in a college or high school environment? When we look back at Harvard’s own history, who fought to change institutional barriers to success and how, and what barriers might still remain? The course will also give students the opportunity to become more confident and skilled oral presenters; to create a final capstone project about their research; and to learn the art of writing an effective Job Cover Letter commonly required by employers for summer jobs, term-time positions, or employment after college.

Topic: Expos Studio 20: The Successful Life

Course Notes: Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

Class Notes: What does the successful life consist of? Do we base our notions of success on careers and paychecks? On the impact we have on others? On where we go to college, or on the happiness we achieve? In this course, we will examine accounts of working in a variety of professions. What makes the work in that career meaningful? How do people measure success in these occupations? And what do people sacrifice for their success? Next, students will conduct original research to answer a question about success they're interested in, whether happening right here at Harvard or elsewhere. What, for example, predicts success in school, or in athletics and other extracurricular activities? What difference does a person's race, socioeconomic background, gender identity, culture, or religion make to their attaining success? What power do media images of success and failure have on people? What are potential barriers to success in a college or high school environment? When we look back at Harvard's own history, who fought to change institutional barriers to success and how, and what barriers might still remain? The course will also give students the opportunity to become more confident and skilled oral presenters; to create a final capstone project about their research; and to learn the art of writing an effective Job Cover Letter commonly required by employers for summer jobs, term-time positions, or employment after college.

Expository Writing   20 Section: ES10

Expository Writing 20 (116353)

Ryan Napier
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Expos Studio 20: The Successful Life

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** What does the successful life consist of? Do we base our notions of success on careers and paychecks? On the impact we have on others? Expository Writing  40 Section: 007
Public Speaking Practicum (125227)
Lee Nishri

2021 Spring (4 Credits)  Schedule:  MW 0300 PM - 0500 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

Expos 40 is an elective within the Writing Program, and focuses on developing and strengthening the skills necessary for successful public speaking. Students learn strategies for impromptu speaking, preparing and delivering presentations, formulating and organizing persuasive arguments, cultivating critical thinking, engaging with an audience, using the voice and body, and building confidence in oral expression.

Admission is by application only. See any of the Canvas sites for a link to the online application. Limited to 15 students per section (135 total).

Folklore & Mythology 97
Fieldwork and Ethnography in Folklore (134893)

Lowell Brower

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 10

This tutorial introduces students to the study of cultural traditions, beliefs, and artistic expressions—their performance, collection, representation and interpretation—through the practice of ethnography. Both ethnographic and theoretical readings serve as the material for class discussion and the foundation for ethnographic fieldwork.

At once a crash course in ethnographic theory and ethics, and a practicum in qualitative methods, FM97 wedds scholarly inquiry and academic study to practical experience in cultural documentation and personal involvement with local tradition bearers and folk communities. Guided by an interdisciplinary collection of texts, students will have the opportunity to study folklore from the ground up, not only through an academic lens, but through personal relationships, cultural participation, and inquisitive explorations of local communities. Throughout the semester you will be invited to develop skills in qualitative research, cultural documentation, proposal design, interviewing, and the arts of interpretation as you try your hand at fieldwork and ethnography. By examining folkways, expressive culture, traditions, and performances, and-interrogating their import in the daily lives of individual and groups, we will aim to bridge the divide between grand theories and everyday practices, between intellectual debates and lived experiences, between the academic institution and the vernacular world. Ultimately, this course aims to bring "the folks" themselves into the center of the academic study, discussion, and debate. And it aims to give you the tools to help amplify and illuminate their voices, traditions, practices, and lore.

Course Notes: Required of all, and limited to, concentrators.

Folklore & Mythology 130

The Folklore of Emergency: Change, Continuity, and Communal Creativity Amid Crisis (208259)

Lowell Brower

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 15

This course tracks the maneuvers of folklore and expressive culture through crises, conflict zones, and emergency situations. By examining the creative interventions of storytellers, performers, and everyday folks in response to a wide range of profound ruptures and transformations—from political upheavals, to global pandemics, to genocidal violence, to forced migration, to social revolution, to ecological disaster, to everyday rites of passage—the course illuminates and interrogates the powers and potentials of cultural
performance, communal storytelling, ritual praxis, and folkloric "tradition," in the face of destabilizing change and unprecedented emergence. We'll ask how storytellers revive and revise old stories to confront new challenges, how preexisting expressive forms weather unprecedented socio-cultural storms, how individuals and communities attempt to re-narrate themselves after calamity. What role can storytelling play in transforming relationships, in navigating rites of passage, and in confronting existential and ethical dilemmas? How do folks turn their afflictions into art, how do they make sense of their sufferings, how do they treat their traumas, and rebuild after ruin? What roles can folklore play in reimagining communities, in reconstructing selves, in remaking worlds?

Course work will include analytic and creative assignments, online ethnography, and a semester-long research project which gives you the chance to investigate how "the folklore of emergency" is at work in our world today.

The course format will include:
1.) Synchronous discussions, mini-lectures, and group activities
2.) Asynchronous Slack discussions, film/video screenings, and listening sessions
3.) Independent reading, writing, and research

Folklore & Mythology  150

Internet Folklore, Online Communities, and Digital Storytelling (217642)

Lowell Brower

2021 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: 30

That that conspiracy theory you read while scrolling through your Twitter feed last week...that subversive meme just posted to Harvard Memes for Elitist 1% Tweens...that spooky contemporary legend circulating on Creepypasta...that hilarious prank you just saw on TikTok...that infuriating "fake news" your uncle keeps amplifying on Facebook...that 4-Chan board that you wish you hadn't read...your frenemy's latest Instagram post: all of these and more comprise our consequential objects of study in this course. Exploring the wild world- wide-web of "informal vernacular culture" being created, transmitted, and adapted by deterritorialized online communities of 21st century folk, we'll think through the powers, potentials, and peculiarities of online storytelling in relationship to community- building, political engagement, social change, and everyday negotiations of individual and group identity. Investigating online discourses is especially important in a "post truth" age, in whose popular discourse "witch hunts," "internet trolls," "deep state cabals," "occult economies," "fake news", ethno-nationalist myths, and salacious sex rumors, regularly collide with international politics, climate catastrophes, violent conflicts, economic crises, mass migrations, social justice movements, and everyday life in villages and cities across the globe.

Our journey to the depths and heights of the contemporary online world will introduce us to viral videos, dank memes, contemporary legends, fantastical folk beliefs, conspiracy theories, and a whole host of folk-communities-in-the-making, allowing us to think though the relationship of everyday online culture to ancient storytelling traditions, folkloric motifs, and pre-internet ways of knowing, being, and interacting.
What new folk groups, storytelling genres, intersubjective possibilities, and political potentialities are arising as a result of online engagement? What kinds of connections are people seeking, and what kinds of meaning are they making through memes, TikToks, "Finstas", Facebook posts, Twitter DMs, Slack channels, Snapchats, and other forms of digital storytelling? What are the powers and potentials of online communities and internet folklore and how are they being harnessed in projects of future-making? This course invites students to research, analyze, and participate in digital storytelling in an attempt to better understand ourselves and our historical moment through folkloristic engagement. Course texts include ancient myths, Twitter threads, trickster tales, ethnographic essays, dank memes, theoretical articles, YouTube videos, your friends' folkloric repertoires, and your own wild imaginings. Course work will include discussion posts, training in online ethnographic methods, a folklore collection and documentation project, and an analytic essay with a creative option.

**Folklore & Mythology 168**

Magic and Faith in Medieval Medicine (216677)

Joseph Nagy

2020 Fall (4 Credits)  

**Schedule:** TBD  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

This course explores the ways in which medieval medicine operates at the nexus of science, religion, and magic. Through analyses of medieval literature (medical texts, prose narratives, and poetry) we will seek to better understand how knowledge of the body and healing was preserved and transmitted over time. We explore the role of "learned medicine," folk practice, and religion in the medieval concept of healing from an interdisciplinary approach—including folkloristics; economic/urban history; sociology and anthropology of science; gender studies; colonial studies; and cultural history. The major project of the semester will allow each student to develop a writing project centered on aspects of the course that most interest them. A pre-med or potential pre-med student might choose to research and write on medieval herbal medicine in dialogue with modern development of medicines by "Big Pharma." A student who is more interested in cultural studies or religious studies might choose to examine the role of environment (urban v. rural), gender, or religious reform in, for example, the healing traditions of the British Isles and Ireland in the years leading up to the Early Modern period. Similarly, someone with an interest in folklore and mythology might explore the oral-traditional background to popular medical remedies of the Middle Ages, and might even consider the wide-reaching continuity of such traditions, many of which are still relevant today.

Quilts and Quiltmaking (127859)
Felicity Lufkin

2021 Spring (4 Credits)  
Schedule: TBD
Instructor Permissions: Instructor  
Enrollment Cap: 10

Are quilts the great American (folk) art? From intricately stitched whole-cloth quilts, to the improvisational patchworks of Gee’s Bend; from the graphic simplicity of Amish quilts to the cozy pastels of depression-era quilts; from the Aids Quilt to art quilts; quilts have taken on extraordinary significance in American culture. This class surveys the evolution of quilt-making as a social practice, considering the role of quilts in articulations of gender, ethnic, class and religious identities, and their positions within discourses of domesticity, technology, consumerism, and cultural hierarchy.

Enrollment Cap: 15

In January 2017, the Pussyhat Project created an effective visual unity for the Women’s March on Washington, although the pink hats were also criticized as vulgar, trivial and exclusionary. This is not the first time that needlework has played a central (and controversial) role in political protest: Its associations with femininity and family life have been used to underscore contrasts between domestic morality and public policy, as well as to subvert or confirm gendered notions of decorum and citizenship. In the more recent wave of protests in the US, the role of needlework as such is less obvious, but images of police uniformed in hyper-masculine military gear confronting protesters in t-shirts and summer dresses suggest that public contests of power and morality are always at least partially mediated through (gendered) clothing. At the same time, while volunteer mask-making efforts in response to the Covid-19 crisis are not explicitly political, they were in many cases organized through the same networks that produced the Pussyhats, and mask-wearing itself has been treated as a partisan political expression. This class sets these recent cases of politicized needlework and dress into dialog with broader historical and theoretical discussions of needlework, dress, protest, art and the public performance of gender and race.

Freshman Seminar  21G
First Stars and Life in the Cosmos (108389)

Abraham Loeb

2021 Spring (4 Credits) Schedule: M 1200 PM - 0230 PM
Instructor Permissions: Instructor Enrollment Cap: 12

Since the Universe is expanding, it must have been denser in the past. But even before we get all the way back to the Big Bang, there must have been a time when stars like our Sun did not exist because the Universe was denser than they are. Since stars are needed to keep us warm, we face the important question about our origins: how and when did the first stars form? Primitive versions of this question were considered by humans in religious and philosophical texts for thousands of years. The Seminar will summarize the fundamental principles and scientific ideas that are being used to address this question in modern cosmology. Eventually, the formation of stars like the Sun was accompanied by planets like the Earth on which life has emerged. When did life start in the cosmos and when will it all end? The Seminar will describe current plans to search for extraterrestrial life, including project "Starshot" which aims to visit the nearest stars within our lifetime and send close-up photos of their planets.

Freshman Seminar  21V
Black Holes, String Theory and the Fundamental Laws of Nature (109627)

Andrew Strominger

2020 Fall (4 Credits) Schedule: W 0600 PM - 0800 PM
Instructor Permissions: Instructor Enrollment Cap: 12

The quest to understand the fundamental laws of nature has been ongoing for centuries. This seminar will assess the current status of this quest. In the first five weeks we will cover the basic pillars of our understanding: Einstein's theory of general relativity, quantum mechanics and the Standard Model of particle physics. We will then examine the inadequacies and inconsistencies in our current picture, including for example the problem of quantum gravity, the lack of a unified theory of forces, Dirac's large numbers problem, the cosmological constant problem, Hawking's black hole information paradox, and the absence of a theory for the origin of the universe. Attempts to address these issues and move beyond our current understanding involve a network of intertwined investigations in string theory, M theory, inflation and non-abelian gauge theories and have drawn inspiration from the study and observation of black holes, gravitational waves and developments in modern mathematics. These forays beyond the
The seminar will consist of weekly discussions led jointly by the instructors and students concerning global change impacts on the New England landscape as explored through diverse studies by Harvard Forest researchers. The readings and discussions will acquaint students with our current knowledge of forest ecosystem structure, function and dynamics, drawing upon state-of-the-art tools, measurements, and studies across New England, including the 4000-acre Harvard Forest. Through discussions, virtual field excursions, and presentations students will become versed in approaches to global change ecology and conservation, the science behind predictions for future conditions, and approaches to utilize natural solutions to mitigate and adapt to these changes. We will broadly address the critical role that forests play in a changing climate, with in-depth discussion on such topics as the history and dynamics of forests due to natural and human processes including the introduction of non-native organisms, the benefits of forests to society across rural to urban settings, and approaches to forest management and conservation. Virtual visits to long-term ecological experiments will help to introduce approaches and infrastructure employed in studying long-term changes in climate and forest ecosystems. Through comparative discussion with leading scientists of findings in the established 15-year-old synthesis volume on the Harvard Forest Long Term Ecological Research program with new research, the students will help to guide directions for a new synthetic book on New England forests and global change.

Student responsibilities will include: completing the wide-ranging background reading; participating in and leading occasional weekly discussions; writing brief perspectives on topics discussed; and preparing a final paper that will be shared with the class and Harvard Forest community through a mini-symposium on the last day of class.

Course Notes: This format is intended to immerse students into an active field research setting and allow extended small group interaction with leading global change scientists. Students will emerge with an understanding and ability to explain to a broad audience the major scientific methods and findings used in evaluating global change.

Recommended Prep: FAS Course Roll

Requirements: Course open to Freshman Students Only
**Freshman Seminar  22I**

The Science of Sailing (123658)

Jeremy Bloxham

2020 Fall (4 Credits)  
**Schedule:**  
M 0600 PM - 0800 PM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
12

Explores the application of simple physics to various natural phenomena associated with sailing. Topics addressed range from hydrostatics (e.g. why do boats float?) to meteorology (e.g. why do sea breezes veer during the afternoon?). Explores in depth the generation of lift and drag by the flow of air over sails and the flow of water over keels and rudders, examining critically the numerous incorrect explanations in the popular literature.

**Recommended Prep:**  
Participants in this seminar should have a good high school physics background and have some knowledge of sailing.

**Requirements:**  
Course open to Freshman Students Only

**Freshman Seminar  22T**

Why We Animals Sing (108564)

Brian Farrell

2021 Spring (4 Credits)  
**Schedule:**  
R 0945 AM - 1145 AM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
15

We do not sing alone. On land, four kinds of animals produce songs or calls: birds, frogs, mammals, and insects. Some of these (and fish) also do so underwater. The principal sounds such animal species make are signaling behaviors directly related to mating success. They are of individuals, usually males, marking territories, and wooing mates. However, in any one location, species may also compete with one another for occupation of acoustic space (that is, for bandwidth) and otherwise optimize their sound signals to features of their environment. We will explore these topics and others as we listen to and read about each of the various kinds of singers on earth, the biology of their sound production and reception, and the ways they attract mates while avoiding becoming meals for eavesdropping predators. We will listen to many different kinds of acoustic signalers across a wide array of acoustic communities in tropical and temperate settings, both terrestrial and aquatic, and we will examine sound spectra on a large screen as we listen and slow down and isolate sounds to help distinguish their parts. Finally, we will consider the biology and evolution of music in humans, considering evidence from brain studies, archaeology and anthropology, and the music of indigenous peoples. We will look at music parallels in different kinds in animals of other species. There will be field trips to listen to and record assemblages of local species. The overall objective is to awaken the students’ sense, understanding, and appreciation of the acoustic environment from which we come, and the role of this environment in shaping human biology and culture. There is a fair bit of
reading required in preparation for weekly discussions. Accordingly, participation will be expected for discussion of the readings and listening experiences.

Freshman Seminar 23C

Exploring the Infinite (160198)

W. Hugh Woodin

2020 Fall (4 Credits) Schedule: T 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Infinity captivates the imagination. A child stands between two mirrors and sees herself reflected over and over again, smaller and smaller, trailing off to infinity. Does it go on forever? ... Does anything go on forever? Does life go on forever? Does time go on forever? Does the universe go on forever? Is there anything that we can be certain goes on forever? ... It would seem that the counting numbers go on forever, since given any number on can always add one. But is that the extent of forever? Or are there numbers that go beyond that? Are there higher and higher levels of infinity? And, if so, does the totality of all of these levels of infinity itself constitute the highest, most ultimate, level of infinity, the absolutely infinite? In this seminar we will focus on the mathematical infinite. We will start with the so-called "paradoxes of the infinite", paradoxes that have led some to the conclusion that the concept of infinity is incoherent. We will see, however, that what these paradoxes ultimately show is that the infinite is just quite different than the finite and that by being very careful we can sharpen the concept of infinity so that these paradoxes are transformed into surprising discoveries. We will follow the historical development, starting with the work of Cantor at the end of the nineteenth century, and proceeding up to the present. The study of the infinite has blossomed into a beautiful branch of mathematics. We will get a glimpse of this subject, and the many levels of infinity, and we will see that the infinite is even more magnificent than one might ever have imagined.

Freshman Seminar 23I

GeoSciFi Movies: Real vs. Fiction (160219)
Natural disasters such as earthquakes, tsunamis, hurricanes, and volcanic eruptions have major impact on society and cause great tragedies. The participants in this seminar will examine one Earth-science related science fiction movie each week and discusses features that are real and fictitious based upon our current understanding of the science of disastrous events. Simple math and science concepts are used to test how likely some effects are (e.g., is magnitude 11 earthquake possible and why?), and to understand the underlying science behind these features (e.g., what are the factors that control the size of an earthquake?). If applicable, we discuss how these scientific ideas are exaggerated to dramatize the effects.

Course Notes: Students will be required to watch the assigned movie prior to class.

Recommended Prep: Students must be comfortable with high-school level math and science.

Requirements: Course open to Freshman Students Only

**Freshman Seminar** 23P

Physics, Math and Puzzles (109319)

C. Vafa

Physics is a highly developed branch of science with a broad range of applications. Despite the complexity of the universe the fundamental laws of physics are rather simple, if viewed properly. This seminar will focus on intuitive as well as mathematical underpinnings of some of the fundamental laws of nature. The seminars will use mathematical puzzles to introduce the basic features of physical laws. Main aspects discussed include the role of symmetries as well as the power of modern math, including abstract ideas in topology, in unraveling the mysteries of the universe. Examples are drawn from diverse areas of physics including string theory. The issue of why the universe is so big, as well as its potential explanation is also discussed.

Recommended Prep: This seminar is recommended for students with a strong background in both math and physics and with keen interest in the relation between the two subjects.

Freshman Seminar  23R

Asteroids and Comets (161261)

Charles Alcock

2021 Spring (4 Credits)  Schedule:  M 0600 PM - 0815 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

Comets have been seen regularly since before the beginning of recorded history. They have often been regarded as disturbing portents. Asteroids, on the other hand, were not discovered until the 19th century, with the advent of astronomy with telescopes. Today we know of many more asteroids than comets, but we believe that there are vastly more comets than asteroids in the solar system.

This seminar will start with the history of the study of comets and asteroids, including the "Great March Comet of 1843", observations of which led to the establishment of the Harvard College Observatory and its Great Refractor, at that time the largest telescope in the Americas. Our understanding of comets advanced dramatically in 1950 with the publication of two extraordinary papers: Whipple (then at Harvard) described the mixture of dust and ice that comprises the nuclei of comets, and Oort (Leiden University) showed that new comets enter the inner solar system from a vast, diffuse cloud surrounding the planetary system. Modern telescopes and spacecraft encounters provide us today with a wealth of information about comets and asteroids. We will examine these observations and learn what is known and what is inferred about the origin and structure of asteroids and comets. The students will observe with the Astronomy Laboratory's Clay Telescope on the roof of the Science Center. Students will take on projects, which may involve their own observing program, or which exploit existing data.

Recommended Prep:  AP calculus or equivalent.
Requirements:  Course open to Freshman Students Only

Freshman Seminar  23Y  Section: 01

All Physics in 13 Days (109575)

John Doyle

2020 Fall (4 Credits)  Schedule:  R 0345 PM - 0545 PM
Instructor Permissions:  Instructor  Enrollment Cap:  8

Some claim that there are 13 ideas or principles that can form the bedrock for a pretty good understanding of our physical and technological world. These are:
1) Boltzmann factor and thermal equilibrium, 2) Turbulence, 3) Reaction rates, 4) Indistinguishable particles, 5) Quantum waves, 6) Linearity, 7) Entropy and information, 8) Discharges, ionization, 9) Relativity, 10) Nuclear binding energies, 11) Photon modes, 12) Diffraction, 13) Resonance. Each week we will discuss one of these principles and see how they explain certain things about the physical world. We will discuss these
and connections with other principles, as well as how the principle shows up in technology and, more broadly, in our technological society.

Course Notes: The meeting time will be determined according to enrolled students' availability.

Recommended Prep: Please note that this seminar will be geared to students likely to go on in physics or related areas, such as chem/phys or engineering. The introduction to certain principles is done with the expectation that students will return to a more formal course on the subject in the future. This course acts as a kind of road map for further studies in physics. Topics may change.

Freshman Seminar  24Q

Biology of Symbiosis: From the Deep-Sea to the Human Microbiome (110305)

Colleen Cavanaugh

2020 Fall (4 Credits) Schedule: W 0300 PM - 0515 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Symbioses - "living together" with microbes - are ubiquitous in nature, with powerful effects on the physiology, ecology, and evolution of all living organisms. The diversity of symbioses drives biological innovation, challenging us to think about life on earth at a different/new level. This seminar examines the role of symbiosis in ecology and evolution, human health and disease, agriculture, and biotechnology. Ranging from beneficial bacteria to pathogens, microbial symbioses with animals (including the human microbiome), plants, fungi, and protists will be explored through lectures, presentations, and critique of primary research papers. Symbioses will be complemented by firsthand observations via microscopy and field trips to local environs. Every student will have their own microscope!

Location: Online and environments on Harvard campus

Course is planned for Wednesdays, 3:00PM - 5:15PM, but may change depending on student schedules.

Requirements: Course open to Freshman Students Only

Freshman Seminar  26J

The Universe’s Hidden Dimensions (121549)
This seminar will give an overview and introduction to modern physics and cosmology. As with the books, *Warped Passages, Knocking on Heaven's Door, Higgs Discovery, and Dark Matter and the Dinosaurs*, on which it will be loosely based, the seminar will consider important developments in physics today and in the last century. We will consider the revolutionary developments of quantum mechanics and general relativity; and will investigate the key concepts which separated these developments from the physical theories which previously existed. We will then delve into modern particle physics and cosmology and how theory and experiment culminated in the “Standard Model of particle physics” which physicists use today as well as the current cosmological model based on the Big Bang theory and inflation. We will also move beyond the standard theories into more speculative arenas, including supersymmetry, string theory, and theories of extra dimensions of space, as well as ideas about the nature of dark matter. We will consider the motivations underlying these theories, their current status, and how we might hope to test some of the underlying ideas in the near future.

**Freshman Seminar  260**

Changing Our Mind: Evolving Thoughts on Brain Regeneration (156449)

*Paola Arlotta*

We will discuss current theories on brain regeneration in a dynamic setting that combines brainstorming of the literature with virtual experiences in the laboratory. Students will learn experiments that have shaped the field of brain repair and consider the newest theories on ways to regenerate the nervous system. We will also virtually visit the laboratory to investigate the regenerative capabilities of different organisms. Experimental results will be used to consider, contrast and evaluate how regenerative capacities have changed during evolution and to brainstorm paths forward towards new solutions for brain regeneration in species, like humans, that have not mastered this art.

Freshman Seminar   30M
California in the 60s (109324)

Kate van Orden

2020 Fall (4 Credits)  

Schedule:  

T 0600 PM - 0800 PM

Instructor Permissions:  Instructor  

Enrollment Cap: 13

This seminar examines American youth culture in the "long" 1960s through the lens of music in California. A range of popular and art music will be considered, from San Francisco psychedelia, L.A. rock-n-roll, surf rock, outlaw country, funk, and the ballads of singer-songwriters to the early minimalism of Steve Reich, Terry Riley, and John Adams. Much of our attention will be concentrated on a few spectacularly influential albums: The Doors (the group’s debut album, 1967), Jefferson Airplane’s Surrealistic Pillow (1967), an album definitive of the Summer of Love, Sly & the Family Stone’s Stand! (1969), and the self-titled Crosby, Stills & Nash (1969), an album that turned the tide of pop music away from blues-based rock-n-roll toward acoustic guitars, folk elements, and singing in harmony. Our musical “texts” for the class will be sound recordings, so you will not have to read scores. Come with open ears, an open mind, and a desire to learn from listening. In addition to studying musical genres, performance styles, and the effects of technology (radio, recording, electric instruments), the seminar will delve into the social movements in which music played a crucial role: the Civil Rights Movement, protests against the Vietnam War, the ecology movement, gay liberation, and feminism.

Freshman Seminar   30Q
Death and Immortality (110425)

Cheryl Chen

2020 Fall (4 Credits)  

Schedule:  

R 1200 PM - 0200 PM

Instructor Permissions:  Instructor  

Enrollment Cap: 12

In this seminar, we will discuss philosophical questions about death and immortality. What is death? Is there a moral difference between "brain death" and the irreversible loss of consciousness? Is the classification of a person as dead a moral judgment, or is it an entirely scientific matter? Is death a misfortune to the person who dies? How can death be a misfortune if you are no longer around to experience that misfortune? Is it possible to survive after death? What does it mean for you to survive after your death? Is there such a thing as an immaterial soul distinct from your body? Is immortality something you should want in the first place? Even if you do not live forever, is it nevertheless important that humanity continues to exist after your death? By discussing these questions about death, we will hopefully gain insight about the importance and meaning of life.

**Freshman Seminar  31Q**

**Literal Looking: What We See in Art (109624)**

*Peter Burgard*

2021 Spring (4 Credits)  
**Schedule:**  
W 1200 PM - 0200 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

What do we really see when we look at a work of art? If we have little experience, we may not get far beyond discerning the theme and ascertaining whether the work is an accurate representation of reality (in the case of representational art); confronted with abstract art, seeing the work may result primarily in confusion or frustrated musing over what the point is. If we have too much experience — the seminar will address what "too much experience" might be and how literal looking relates to it — we may see the work as a function of historical, religious, aesthetic, mythological, and other concerns, or we may get caught in the web of a work's iconography. Either way, our too little or too great experience can prevent us from seeing what is there. This seminar is an exercise in seeing what is actually there in a series of great works of art, in moving beyond too much mystification yet staying this side of too much sophistication, an exercise in evaluating composition and representation as they present themselves to the viewer directly. We will spend most of our time looking and talking about what we think we see, what we actually see, and how it informs interpretation, but we will also read short texts where professionally encumbered lookers (i.e., experts) say what we should see, so that we can compare the two and explore the degree to which literal looking aids or is aided by contextually informed looking. Works by Raphael, Caravaggio, Bernini, Velázquez, Turner, Renoir, Sargent, Klimt, Schiele, Kandinsky, Warhol, Richter.

**Freshman Seminar  33O**

**Animation--Getting Your Hands on Time (126211)**

*Ruth Lingford*

2021 Spring (4 Credits)  
**Schedule:**  
M 1200 PM - 0245 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

Students in this practice-based seminar will experiment with a variety of animation techniques to gain new perspectives on time. Using drawing, we will break down time into frames, understanding movement as
both a liquid flow and a sequence of distinct infinitesimals. Using pixilation, a technique from the beginning of cinema, we will analyze and deconstruct human movement, then reassemble it for magical effect. Using strata-cut animation, we will attempt to think of time as a solid, and to visualize the progression of time in terms of volume and shape. Using editing software, we will explore cinematic constructions of time through the use of cutting and juxtaposition. Each session will include screenings, discussion and practical work. There will be practice-based assignments each week. Each student will have the opportunity to make a film of around one minute, using an animation technique of their choice. Or they may decide to collaborate with others to make a longer piece.

Recommended Prep: No previous experience of drawing or animation is required.

Requirements: Course open to Freshman Students Only

Freshman Seminar  33X

Complexity in Works of Art: Ulysses and Hamlet (116807)

Philip Fisher

2020 Fall (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 15

Is the complexity, the imperfection, the difficulty of interpretation, the unresolved meaning found in certain great and lasting works of literary art a result of technical experimentation? Or is the source extreme complexity—psychological, metaphysical, or spiritual? Does it result from limits within language, or from language's fit to thought and perception? Do the inherited forms found in literature permit only certain variations within experience to reach lucidity? Is there a distinction in literature between what can be said and what can be read? The members of the seminar will investigate the limits literature faces in giving an account of mind, everyday experience, thought, memory, full character, and situation in time. The seminar will make use of a classic case of difficulty, Shakespeare's Hamlet, and a modern work of unusual complexity and resistance to both interpretation and to simple comfortable reading, Joyce's Ulysses. Reading in exhaustive depth these two works will suggest the range of meanings for terms like complexity, resistance, openness of meaning, and experimentation within form.

It was discovered around 1800 that the major languages of Europe, along with the ancient languages of India and Iran, were descended from an unattested parent, formerly known as "Aryan" or "Indo-Germanic," but today usually called Proto-Indo-European. The identification of the Indo-European family raised many questions, some purely linguistic (e.g., what was Proto-Indo-European like; was it grammatically complex or "primitive"?), and some more far-reaching (e.g., who were the speakers of Proto-Indo-European; why did Indo-European languages spread so widely?). Questions of the first type eventually led to the birth of the academic field of historical linguistics. Questions of the second type, however, led many nineteenth- and early twentieth-century intellectuals to posit a genetically and culturally superior Aryan "race." This idea is now universally rejected, but evidence from language still figures importantly in speculation about the remote past. Recent debates about the origins of "Western civilization," for example, center on the alleged presence of Egyptian elements in Greek, while theories about the settlement of the Americas sometimes cite supposed linguistic connections between the New World and other continents. This seminar, after surveying the basic elements of historical linguistics, will explore the use and misuse of such methods. What, if anything, does the fact that languages are related tell us about their speakers? How can we distinguish genuine cases of language contact or "influence" from the kinds of resemblances that come about through pure chance? Answers to questions like these will be sought through case studies, with readings chosen to illustrate and contrast scholarly and unscholarly approaches. The work for the course will consist of readings, four or five short problem sets, and a final project with both written and oral components.

Beauty does not promise or imply the possibility of verification—there will be no comprehensive research and no day of reckoning to finally prove that Leonardo's *Mona Lisa* or Beethoven's *Ninth Symphony* are in fact beautiful. Perhaps this is precisely the reason why we need beauty, and why it is worth studying: because it teaches the contingency of values and the revocability of absolutes. Beauty is a most effective training for tolerance and innovation.

In the early part of the seminar we will analyze Kant's approach to aesthetics. We will then study the evolution of the concept of beauty throughout history, with examples mostly taken from the
culture of a country, Italy, that has successfully self-fashioned itself as the land of beauty.

## Freshman Seminar 37P

**Reading Tolstoy's War and Peace (119150)**

*Julie A. Buckler*

2020 Fall (4 Credits) **Schedule:** T 1200 PM - 0200 PM

**Instructor Permissions:** Instructor | **Enrollment Cap:** 16

Leo Tolstoy's massive masterwork *War and Peace* (1865-69) is a magnificent work of art by a world-class writer tackling life's "big questions." It is also a great read! Over the course of a semester, we will give this nineteenth-century novel the time and attention it deserves. We will read War and Peace closely, while comparing two different English-language translations, exploring cultural and historical context, artistic biography, historiography, the novel as a literary form, literary language, issues in translation, interpretive paradigms, and potential new ways of reading. We will trace the changing interpretative approaches to *War and Peace* from the 1860s to the present. How does the pacing of the novel relate to nineteenth-century reading and publishing practices? To nineteenth-century conceptions of time, space, narrative, and genre? What are the problematic distinctions between history and literature that the novel raises? We will also consider the significance of the Napoleonic wars (1803-1815) in Russian history and the broader pan-European cultural legacy of this period, including literature, art, and architecture.

**Course Notes:** All readings will be in English.

**Requirements:** Course open to Freshman Students Only

## Freshman Seminar 37U

**Bob Dylan (119171)**

*Richard Thomas*

2020 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

**Instructor Permissions:** Instructor | **Enrollment Cap:** 15

"'Twas a dark day in Dallas." So begins the nearly 17-minute song Bob Dylan delivered on March 27, 2020, a gift to a world in the grip of Covid-19. With its Shakespearean title "Murder Most Foul" is, in
part, about the assassination of JFK, and about the music that he and many of us have been listening to across the decades since that day. This seminar will examine Dylan as a musical, literary, and general cultural phenomenon, in the context of high and popular culture of the last 60 years, but also in the context of the much more long-lived poetic, literary, artistic and musical cultures of which he has played so demonstrably a leading role. Dylan has been at the center of popular culture ever since he arrived in New York City on 24 January 1961, from Hibbing MN, by way of Minneapolis, Madison and Chicago; and the longevity of his art defies the validity of the very term popular culture. The seminar will trace the evolution of his songs and lyrics from its early folk, blues, rock and roll, gospel, and protest roots, through the transition from acoustic to electric, also through the many evolutions, reinventions, and innovations that followed—and that continue to emerge. We will also focus on Dylan's frustrations of audience expectation, from the anger evoked by his apparent abandonment of the serious protest and static urban folk traditions, to his apparent embracing of Christianity, to his change in musical arrangement in performance, to attacks focused on Dylan's "plagiarism" which show a lack of understanding of the vital and original literary process of intertextuality. The seminar will also explore the multiple versions of many of Dylan's songs that show him to be not unlike an oral poet in his ability to re-perform and recreate through performance, in the process often transforming utterly the original lyrics and meanings of his own songs. Attention will be given to the ways in which Dylan's career builds up through periods of evolution and experimentation to productions that can only be called "classics" from a diachronic perspective, among others, *Highway 61 Revisited* (1965), *Blonde on Blonde* (1966), *Blood on the Tracks* (1975), "Love and Theft" (2001), *Modern Times* (2006), *Tempest* (2012), and the bootleg and outtakes from the 1990s to the astonishing *Telltale Signs* (2008) and the highly revealing *The Cutting Edge* (2015) and *More Blood More Tracks* (2018). The seminar will also consider Dylan's role in film, particularly the brilliant commercial failure, *Masked and Anonymous*, from 2003, a work of high allegorical import. We will also look at Todd Haynes' insightful 2007 movie, *I'm Not There*, which captures the essence of some of Dylan's persona creation, even though it initially met with bafflement from many critics. We will also read Dylan's *Chronicles* Volume 1, itself a work of genius, a sprawling Dylan prose song posing as an autobiography.

**Freshman Seminar  40E**

Law and Society through the Cinematic Frame (160785)

Ofrit Liviatan

2021 Spring (4 Credits)  

**Schedule:** M 0300 PM - 0500 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

In this seminar, we will explore the interaction of law and society using the lens of film. The cinematic experience has become a key site through which the public understanding of law is produced, debated, and influenced. Driven first and foremost by market and audience considerations, law-related films often inject drama, contentious dimensions, and even misrepresentations into the portrayal of real events. Nonetheless, by raising awareness about legal themes that pervade the plot, these films offer valuable insights toward discovering social scientific perspectives on the manner in which law functions in everyday life. Hence, the seminar will not focus on legal doctrine or teach you the fundamentals of the legal profession. Rather, using films and socio-legal scholarship as frameworks for discussion, we will study
law’s working in relation to the social, political, economic, and cultural environments in which it operates. Central thematic topics to be discussed include: the relationship between law, justice, and morality; how does law intervene in social relations and whether it is over-utilized as part of these relations; the dynamics between law and social change; is access to the legal process equal to everyone; and the function of law in deeply divided societies.

Course Notes: Film viewing will occur outside class as part of your weekly preparation for the seminar.

Freshman Seminar 40J

Advice to Young Leaders (127970)

David Armitage

2020 Fall (4 Credits) Schedule: W 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Our current crisis has starkly exposed the strengths and weaknesses of leaders around the world and in local communities. Meanwhile, questions of leadership will be front and center as we head towards November’s elections in the US. What makes a good leader has been subject to debate for at least two thousand years, especially in the many classic works of political and ethical theory in the western tradition that were written for young people about to enter public service or positions of authority. This Freshman Seminar introduces students to a selection of these texts of advice and encouragement, among them works by Plato, Aristotle, Cicero, Machiavelli, William James, Max Weber, and Virginia Woolf, that might speak to their own ambitions and interests. It will show how to treat such works historically, in their own terms and their own contexts, while also applying them to contemporary concerns and dilemmas. The overarching aim of the class is for students to think rigorously about their own imminent responsibilities as citizens and leaders by reflecting on arguments addressed to similar rising generations in the past, from 5th-century Athens to Harvard’s first online Commencement in May 2020.

Making the Grade? Middle and High School Math Education in the U.S. (109469)

Robin Gottlieb

2021 Spring (4 Credits)  
**Schedule:** W 0300 PM - 0500 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

What are the goals of mathematics education at the middle and high school level, and how do these goals impact our evaluation of the success or failure of math education in America? Why does math education at these levels matter? What societal structures (historic, economic, political, cultural) impact mathematics education? How does math education in turn impact societal structures? As the world changes, how do the goals of mathematics education change, and in what ways? We will explore these issues to become more educated participants in this ongoing discussion.

**Course Notes:** A special invitation is extended to students not planning to concentrate in math.

**Requirements:** Course open to Freshman Students Only

Challenges to the International Monetary and Financial System in Historical Perspective (109472)

Kenneth Rogoff

2020 Fall (4 Credits)  
**Schedule:** T 0900 AM - 1100 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

This seminar explores contemporary debates on the future of the international monetary and financial system drawing on both historical and recent experiences. Topics will include understanding the underpinning and aftermath of sovereign defaults, financial crises and high inflation over history, with particular emphasis on the Great Depression of the 1930s, the Great Inflation of the 1970s, and the Great Recession in the twenty-first century.

**Recommended Prep:** The seminar does not require any background in economics.

**Requirements:** Course open to Freshman Students Only

American Presidential Campaigns and Elections 1960-2020 (124777)

*Maxine Isaacs*

2020 Fall (4 Credits)  

**Schedule:**  
R 1200 PM - 0230 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
16

For two hours each week, students will work to understand the history, forces and politics of American presidential campaigns and elections. Each student will be "responsible" for one presidential election between 1960 and 2016, and, together, members of the seminar will develop some perspective on dramatic changes as well as enduring factors that have shaped our own times, issues and society. With the help of some guests – practitioners including political leaders, public opinion analysts and journalists – students will develop a deeper understanding of contemporary politics; the impact of demographic patterns and changes; public opinion and polling; and political communication. Students will learn about the relationship among politics, news and public opinion, and who influences whom. Participants will be introduced to excellent contemporary studies about modern presidential campaigns and elections. At the end of the term, students will make oral reports to the class on lessons learned from a past election which can help all of us better understand this one.

**Requirements:**  
Course open to Freshman Students Only

**Freshman Seminar  41U**

Museums in the Age of Covid (156182)

*James Hanken*

2021 Spring (4 Credits)  

**Schedule:**  
M 0300 PM - 0500 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
12

The ongoing Covid-19 pandemic is taking a huge toll on museums, both causing great harm and forcing long-overdue changes that address new opportunities. This seminar will trace the history of museums from their beginnings centuries ago as personal collections maintained by private (wealthy) individuals to the modern institutions of today, many of which are struggling to survive in the age of Covid. What are museums? Where did they come from? What exactly do they do, and why? Do they have a future? We will consider not only the objects maintained in museums and their conservation, but also the role of museums in contemporary society, financial considerations associated with their successful operation, their dual—and sometimes conflicting—functions of scholarly research and public display, the mechanics and psychology of exhibit design, and legal and ethical issues of collecting and acquisition. The seminar's focus will range from large art, archaeological, and natural history museums to smaller and more specialized institutions that focus on particular cultural, scientific, artistic, and engineering artifacts. Weekly class meetings, all via Zoom, will include both discussion sessions and virtual field trips to museums and libraries at Harvard and beyond.

**Requirements:**  
Course open to Freshman Students Only
### Freshman Seminar 42H

**U.S. Energy Policy and Climate Change (160203)**

*James H. Stock*

2020 Fall (4 Credits)  

**Schedule:**  
T 1245 PM - 0245 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
12

Burning fossil fuels has powered 150 years of unprecedented economic growth but has also left a legacy of ever-increasing concentrations of carbon dioxide and other greenhouse gases. Those gases are changing our climate and thereby endangering human health, human welfare, and the earth’s ecosystems. To avoid the worst of those consequences requires decarbonizing the energy sector, but that task is massive and will require effective and efficient climate policy. Recently, U.S. energy and climate policy has been subject to wild swings, as Obama-era regulatory and subsidy policies designed to shift from fossil fuels to renewables have been replaced under the Trump administration by policies to promote and subsidize fossil fuel use and production and, now, some Democrats have proposed a Green New Deal. This seminar examines U.S. climate policy from both economic and technological perspectives. The seminar starts with a review of the U.S. energy sector, climate science, and climate economics. The seminar then dives into current policy issues, including carbon pricing, the regulation of CO2 emissions from fossil-fuel fired power plants, the keep-it-in-the-ground movement, policies to promote new green technologies, and the Green New Deal. The seminar also examines subnational (state and local) and international climate policies.

**Recommended Prep:**  
The seminar uses a mix of economic, legal, and technological/engineering tools, and the mix of students would ideally reflect this mix of backgrounds.

**Requirements:**  
Course open to Freshman Students Only

### Freshman Seminar 43C

**Human Rights and the Global South (160211)**

*Caroline Elkins  
Jacqueline Bhabha*

2020 Fall (4 Credits)  

**Schedule:**  
R 1200 PM - 0200 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
16
The disparate impact of the COVID-19 pandemic has highlighted for all to see the dramatic inequities and entrenched human rights violations that continue to plague human societies. Extreme poverty, especially among communities of color, is sky rocketing, refugees and other forced migrants are blocked from seeking life-saving protection, domestic violence is soaring. Despite over half a century of international law making and domestic enactment of human rights treaties, and despite a vibrant civil society that has embraced human rights principles world-wide, class privilege, structural racism, gender and caste differences, xenophobia and skewed trading and taxation policies persist. They militate against a level playing field when it comes to access to fundamental human rights such as the rights to non-discrimination, to life and to health.

Thus, though human rights have become a global lingua franca, invoked by leaders and movements across the political, religious and cultural spectrum, their efficacy is at best partial and flawed in most countries, including throughout the Global South. Remedies for violations such as deprivation of an adequate standard of living and the extreme poverty that accompanies it, slavery and colonization and their enduring 21st century legacy, and racialized and gendered forms of structural violence have proven elusive. This seminar will focus on the Global South, including populations from the global South seeking protection elsewhere, to address key issues in contemporary human rights theory and practice. Members of the seminar will first study the philosophical and political traditions that led to codification of human rights. The seminar will then cover the legal frameworks of contemporary international human rights law and examine how their relevance to some of the most egregious human rights violations of the current period. Case studies of pivotal controversies, including the failure to address extreme poverty, the question of reparations for slavery or colonization, solutions to forced (including climate-induced) migration and gender-based violence will be explored and discussed.

**Freshman Seminar  43J**

The Economist's View of the World (108562)

_N. Mankiw_

2021 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar probes how economic thinkers from the right and left view human behavior and the proper role of government in society. Each week, seminar participants read and discuss a brief, nontechnical, policy-oriented book by a prominent economist. There will also be required writing assignments. Students must have some background in economics, such as an AP economics course in high school or simultaneous enrollment in Economics 10.

**Recommended Prep:** Students are expected to have had some background in economics, such as an AP economics course in high school or simultaneous enrollment in Economics 10a.

**Requirements:** Course open to Freshman Students Only
Freshman Seminar  43W

History, Nationalism, and the World: the Case of Korea (108515)

Sun Joo Kim

2020 Fall (4 Credits)  Schedule: M 0300 PM - 0530 PM

Instructor Permissions: Instructor  Enrollment Cap: 12

The colonialism and postcolonial division of Korea into North and South thrust the memory of past events into current political discussions as well as scholarly debates. This seminar investigates selected events in Korean history to map the interaction between historical writing and politics and to address questions such as why historians have emphasized certain periods and aspects of Korean history while ignoring others. All readings will be in English.

Requirements: Course open to Freshman Students Only

Freshman Seminar  44J

Clash of Titans, Seats of Empire: The Aztecs, Toltecs, and Race of Giants in Ancient Mexico (116506)

William Fash

2021 Spring (4 Credits)  Schedule: W 0945 AM - 1145 AM

Instructor Permissions: Instructor  Enrollment Cap: 15

The film "Clash of Titans" was a British extravaganza dedicated to exploring the ancient Greeks' concepts of the interactions between humans and their gods. In Ancient Mexico, the tale of Topiltzin Quetzalcóatl, Toltec Prince of Tula is the best-known example of the intervention of rival gods in the affairs of kingdoms and empires. His tale and what was made of it by the Aztecs, and Spaniards, serves as the point of departure for our seminar. Just as the Greeks countenanced sacrifices and political assassinations, in Ancient Mexico the three great empires practiced human sacrifice, regicide, and warfare which was vital in their statecraft and economy. We will explore how these central components were explained and justified in their mythology, why reciprocity with the gods was so vital, and how and why each empire came to a violent end. A particular focus this year will be on the legend of Topiltzin Quetzalcoatl ("Our Prince, the
Feathered Serpent”) because the Feathered Serpent loomed very large in later Aztec mythology, and in the very founding of the earliest megalopolis of Teotihuacan. To do so we begin with the riveting first-person descriptions of the Aztec Empire and its violent conquest penned by a foot soldier in Hernán Cortés's army, Bernal Díaz del Castillo. In the following weeks we will explore the environmental basis, religious dimensions, and social and political development of civilization, cities, at the three seats of empire in ancient Mexico: the Aztecs, Toltecs, and Teotihuacanos. You will be engaged in answering the age-old (but never fully resolved) question as to why the Cult of the Feathered Serpent resulted in empires in Highland Mexico, but the Maya of Chichen Itza (who made more images of the deity than any other kingdom in Mexico) chose--or were unable--to create an empire on the scale of the Aztecs, Toltecs, or Teotihuacanos. We will make use of 3D models of Peabody Museum collections, archaeological studies, historical accounts, and recent films and other media to critically examine ancient practices and current perceptions of the Aztec empire (1428-1519 CE); its predecessor the legendary Toltec empire of Tula (850-1100 CE); and the foundational Teotihuacan empire (100-550 CE), known as "The City of the Gods" since it was built. The Aztecs and Toltecs went to Teotihuacan on pilgrimage every 20 days to make offerings because the scale of that ancient city was so massive, the architecture so impressive, and the religious art and historical lore so compelling, that the Aztecs had a legend that it was built in an earlier creation, by a race of giants. Seminar participants will use critical thinking to explore how the biases of the observer play a role in describing and explaining "the Other." Students will analyze the ways that religion and the quest for power fueled the genesis, expansion and demise of all three empires and the great Maya kingdoms as well. First-years in this seminar will also explore the ways the living descendants of the Aztecs are reviving their traditional culture and how the Pre-Columbian civilizations are integral to the national identity of Mexico and Latinx people in this country, vs. the way they are portrayed in Hollywood and U.S. popular culture, through films and other media in the U.S. and Mexico.

Course Notes: No background or previous experience, on or in Mexico is required, only an open mind.

Requirements: Course open to Freshman Students Only

Freshman Seminar 49G

The Holocaust in History, Literature, and Film (119999)

Kevin Madigan

2020 Fall (4 Credits) Schedule: T 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 16

This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The
aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce freshmen to the use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. Here the seminar will use literary and cinematic resources as well as discursive theological ones. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. The seminar will conclude with an assessment of the role played by the Holocaust in today's world, specifically in the United States. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.

Freshman Seminar  50H

The Biology of Movement (203243)

Andrew Biewener

2020 Fall (4 Credits)  Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor  Enrollment Cap: 15

Movement is a fundamental property of life that underlies many biological functions, ranging from collecting or catching food, predator escape, dispersal of offspring, mating and reproduction, to migration, social interaction, sport, and artistic expression. This seminar will explore why and how organisms move, providing an overview of the biological motors animals and microbes use to power movement, and mechanisms plant use for growth and geo-/photo-taxis. The seminar will survey historical photographic and modern filming approaches; examine how movement is depicted in art and evoked in dance; how movement shapes perception and cognitive interpretation; and how and why movement plays a central role in health and disease. The broader relevance of movement to the humanities and social sciences will therefore be examined. Students will be introduced to a variety of filming methods, allowing them to explore how movement is studied, and will learn how to quantify movement patterns to inquire and gain insight into their functional significance. Students will actively participate by video-recording observed movements of interest, exploring their functional relevance to terrestrial locomotion, swimming, flying, dance, athletics, and cognition as well as plant movement. This seminar will include 'field trips' to Harvard Museums and Libraries, a dance studio and the Concord Field Station. Students will read general articles and share weekly video recordings throughout the term. Students will complete a course project based on a video-kinematic analysis of movement highlighting its biological, social and/or artistic significance; or by writing a final paper that examines in-depth some aspect of the biology of movement.

Science is focused on discovering and explaining the world around and within us. This has been its goal for hundreds of years and has produced astonishing breakthroughs from population genetics, to general relativity, to plate tectonics. Artificial intelligence is touted as a tool for learning about a complex systems in ways that humans can't and has seen exceptional progress in natural language processing and image identification. In this class we explore the emerging linkages between scientific inquiry and artificial intelligence. The central goal of this class is to question the classical role of the scientist as a creator of theories and consider how scientists may become interpreters of theories developed by AI. We do this by developing an understanding of how AI systems actually work (they're astonishingly simple), explain recent success cases, and then consider how we may (or may) not rebuild science in an AI-first manner. Examples with be drawn from the earth and planetary sciences as well as the life sciences.

Recommended Prep: High school calculus and/or computer programming would be extremely useful.

Requirements: Course open to Freshman Students Only

Occasionally a scientific discovery is so unexpected that it is seemingly unexplainable. This seminar will revisit one such event, the discovery of RNA interference and how modern experimental molecular genetics cracked this "problem" and started a billion-dollar industry. Rare unexpected discoveries in biology, for example catalytic RNAs, instantly extend and broaden our understanding of the world, while the impact of other discoveries (split genes, hopping genes) are more gradual. However, some discoveries challenge firmly supported ideas. The initial description of RNA interference (RNAi) was seemingly magical—the introduction of a RNA molecule matching the sequence of any gene, results in the effective silencing (turning off) of the gene. Further, the silencing signal(s) were extremely potent and mobile, moving between cells, tissues, and generations. A series of seminal discoveries during an amazing four-year period revealed the previously unimagined process. We will read and talk about how these discoveries were made and how this unexpected new biology launched new therapeutic companies and is informing developing ideas about heritability, adaptation, and evolution.
Freshman Seminar  51H

Models of the World: Explaining the Past and Predicting the Future (207799)

Nina Zipser

2020 Fall (4 Credits)  Schedule:         T 0900 AM - 1100 AM
Instructor Permissions:  Instructor  Enrollment Cap:  12

This freshmen seminar explains the concept and practice of social and natural science modeling. The seminar will address four fundamental questions: (1) What is a model? (2) How are models related to data? (3) How are models used to explain and predict events in the world, including counterfactuals (i.e., what would happen if we conducted military campaigns differently)? (4) How do models evolve over time? The seminar answers these questions with numerous case studies from the fields of astronomy, biology, computer science, economics, mathematics, and physics. For example, we'll see that natural science models have (unintentionally) challenged fundamental social and religious beliefs, like the geocentric view of the universe and the origin of species. We'll also show how models have been used to measure social phenomena, like the pursuit of instant gratification. We'll also explore the origins and trajectory of a new class of powerful, data-driven models that are emerging in the field of machine learning.

Recommended Prep: High school-level algebra and geometry. No knowledge of model-building is required.

Freshman Seminar  51M Section: 01

Skin, Our Largest, Hottest, and Coolest Organ: From Cancer to Cosmetics (207776)

David Fisher

2020 Fall (4 Credits)  Schedule:         W 0300 PM - 0545 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

Skin provides a protective barrier that is vital to survival of all multicellular organisms. Its physical properties have been exploited for centuries, from clothing to footballs, and yet skin is a vibrant and dynamic organ that responds to environmental signals in myriad ways. Skin protects humans from toxic exposures, but can also be an intrinsic source of dangerous diseases. While its defects only rarely kill humans, its imperfections can cause misery and discomfort, ranging from subtle annoyances to depression and loss of self-esteem. It is a source of immense pleasure or excruciating pain. This seminar will provide a series of exposures at an introductory level, to distinct topics in skin biology. They will
exemplify the diverse and vibrant nature of cutaneous networks and signals, through the lens of commonly recognized topics such as tanning, hair, sweat, cancer, cosmetics, cancer, and infections.

Recommended Prep: None. Prior AP-Biology may be helpful but not required.

Freshman Seminar  51N
The Secrets of Stradivarius or What Makes the Violin Sound Beautiful? (212694)

Philippe Cluzel

2020 Fall (4 Credits) Schedule: W 1200 PM - 0200 PM

Instructor Permissions: Instructor Enrollment Cap: 8

This is an exploratory seminar that draws concepts from many different fields ranging from music to evolution, machine learning, physics, biology, wood carving, and neuro-aesthetics. The goal of the seminar is to discuss the different concepts needed to understand the design of a violin and to propose new methods and technology to improve the quality of the sound it produces. Students will spend most of their time developing hands-on experiments whose final goal will be to transform low-cost violins into beautiful-sounding instruments using the ideas developed through the readings.

Recommended Prep: Students are not expected to know any of the concepts and tools used in class, but in view of the highly interdisciplinary nature of the project, the ideal class would comprise individuals with a strong interest in EITHER architecture, computer science, physics, biology, music, or an affinity with hand tools and tinkering. There will be no cost to students.

Freshman Seminar  51S
Natural History Museums and the Anthropocene (216084)

Charles Davis

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 12
Natural history museums have inspired us for centuries and represent our best resources for understanding nature. They have been central to the development of countless scientific principles, including the theory of evolution itself. Yet the more inward facing missions of a museum are unfamiliar and the collections that sustain these efforts are vast and remain largely invisible. These institutions, however, have assumed a renewed relevance in the modern era of global change, especially as millions of artifacts are being mobilized online and facilitating a revolution in museum-based science. Here, we take a behind-the-scenes look into natural history museums over the course of the semester, including their organization, care, public outreach, and centrality to science. We will then explore the variety of ways in which new life is being breathed into museums to understand the geological era of the Anthropocene. Central to our learning will be weekly exploration and engagement with Harvard's Natural History Museums and more broadly via a host of vast, curated online collections. Students will also engage directly with this subject through self-directed field exploration of nature guided by cutting-edge resources and tools developed for this purpose. The capstone project will be a collaborative effort to devise a museum exhibit that unites major themes of the term.

**Freshman Seminar  51T**

The Universe: Its Origin, Evolution, and Major Puzzles (216086)

*Cora Dvorkin*

2021 Spring (4 Credits)  
**Schedule:**  
T 0945 AM - 1145 AM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
12

This seminar will lead you on a tour of Cosmology and its open questions: how were the first structures of the universe seeded? What is dark matter? What is dark energy? We will study the universe since the very first tiny fraction of a second after the Big Bang and its subsequent evolution. We will delve into its composition at large scales, and existing theories explaining its main components: dark matter and dark energy. We will learn about a wide variety of observations that are obtained and analyzed by different experiments around the world in order to make progress in our understanding of the cosmos. We will also study how these data sets are currently analyzed and debate about possible ways of moving forward in the times of "Big Data". Finally, we will discuss how the scientific method is used in cosmology, where we only have one experiment: our universe.

**Recommended Prep:**  
High school level math and physics. Non-scientists are welcome.

Freshman Seminar  51U

Insurrection in a Little Kingdom—The Real Story of the Standard Model of Particle Physics (216087)

Howard Georgi

2021 Spring (4 Credits)  

Schedule:  
R 0645 PM - 0845 PM

Instructor Permissions:  Instructor
Enrollment Cap:  12

At the end of the 1960s, particle physics was in a very chaotic state. There were experiments producing apparently conflicting data that were as confusing to the theorists as they were to the experimenters themselves. There were dramatically different theoretical approaches, none of which were convincing or even thoroughly understood. Less than 10 years later, we could put the standard model on a t-shirt and we had the great good fortune to participate in this remarkable decade of particle physics, so I know what really went on, not just what has been recorded in the history books. My hope for this seminar is three-fold. I want to try to explain what happened and why to a diverse group of students in a way that preserves the flavor of the physics without getting lost in technical details. This is a difficult task and I hope to get help and insight from the students in the seminar. I want to look at some of the Scientific-American-level attempts by physicists to explain what they were doing as they were doing it. I believe that scientists must do a better job of this kind of outreach, and again I hope to learn a lot from the students about how to do it better. Finally, and perhaps most importantly, I want to try to expose the amazing diversity of thought that went into this mini-revolution. xOne of my great joys in this period was that I got to know and often collaborate with many of the giants of late-twentieth-century physics. The people watching was almost as much fun as the physics. From this personal study, I concluded that there are many ways of being a great physicist—probably as many different ways as there are great physicists. This suggests that there are more ways of being a great physicist that we have not seen yet.

Recommended Prep:  Background in physics is not required, but curiosity about physics and physicists is important! The assignments will be mostly short essays and in-class presentations on the readings with a few algebra level calculational problems.

Freshman Seminar  51V

Physics of Measurements: Experimental Science (215847)

Philip Kim

2020 Fall (4 Credits)  

Schedule:  
W 1200 PM - 0245 PM
Measurement, a procedure to acquire a quantitative description of our surroundings, has been an essential part of scientific and engineering research. Often, new scientific breakthroughs rely on the development of new measurement methodology. A notable example in the recent development of quantum computing relies on the uncertainty of the measurement procedure in quantum systems. Conversely, new ideas and applications can be formulated by the precise and accurate measurement of physical quantities. In this seminar, we will discuss various aspects of physics-related measurement procedures, focusing on several key elements of measurement, such as quantification, accuracy, precision, units, estimation, and error evaluation. We will discuss key concepts behind measurement procedures, including Einstein’s relativity, quantum physics, and statistical physics. Examples are drawn from historical, scientific events, our daily life, and current topics of research.

Recommended Prep: This seminar will target to students who are interested in quantitative science or engineering. We assume a high school level of mathematics and physics knowledge

Science Not Silence: Censorship and Secrecy from Copernicus to Climate Crisis (215848)

Hannah Marcus

2021 Spring (4 Credits) Schedule: R 1200 PM - 0200 PM

In April 2017, over a million people around the globe took to the streets to defend science in the face of declining public attention to scientific knowledge and increasing governmental neglect of scientific research. This seminar explores how and why religious, political, and social authorities try to control scientific knowledge. From the avian flu to 3-D printed weapons and from Galileo to the Guatemala syphilis experiments, we will wrestle with difficult questions like: Who speaks for science? Who decides what we know and how we recognize truth? How do societies create scientific ignorance? How have answers to these questions changed over time? And what does it mean to stake your life and reputation on the defense of scientific knowledge? In this seminar, we will investigate these questions using tools and tactics from the history of science. Focusing in particular on questions of censorship and secrecy from the Renaissance to the present, we will discuss groundbreaking social science scholarship, explore censored objects in the Harvard Libraries, visit local and national archives, and bring insights from the past to bear on our contemporary world. This seminar is designed to question how we know the world around us and illuminate the forces that stand between us and knowing more.

Freshman Seminar  51X

Changing Perspectives: the Science of Optics in the Visual Arts (215849)

Aravinthan Samuel

2021 Spring (4 Credits)  Schedule:  R 1200 PM - 0245 PM

Instructor Permissions:  Instructor  Enrollment Cap:  8

Renaissance artists began to create stunningly realistic representations of their world. Paintings started to resemble photographs, suggesting that artists had solved technical problems that escaped their forebears. Our brains effortlessly deduce three-dimensional scenes from two-dimensional images. But faithfully transferring spatial information to a flat canvas -- a sense of depth, surface and shadow, geometrical accuracy -- is hard to do. Here, we will discuss how artists including van Eyck, da Vinci, Vermeer, and Ingres might have used science to make art. We will ask how devices like pinhole cameras, mirrors, and lenses might help artists see more deeply and create images more faithfully. We will use Home Lab Kits and experiment for ourselves with optical devices. We will try to use devices to create our own work using Home Art Kits. We will use online platforms to look closely at selected masterpieces to assess their optical qualities. We will use online learning to Zoom beyond Harvard to visit museums where selected masterpieces are located. We will Zoom to the homes of artists and scientists who think about art and optics from many different perspectives. Our seminar is a synthesis of art history, studio art, and optical science.

Course Notes:  This seminar is recommended for students with interests in science and art. There will be an exhibition of the works created by the students at the end of the term.

Recommended Prep:  No prior training in art or optics. We will learn how to draw in our own workshop with provided tools. We will learn optics with practical exercises, not with math or physics.

Freshman Seminar  51Z

The Path to a Low-Carbon Future (216121)

Douglas Finkbeiner

2020 Fall (4 Credits)  Schedule:  R 0300 PM - 0500 PM

Instructor Permissions:  Instructor  Enrollment Cap:  15

Big changes are coming to the way we generate our electricity, with renewables like wind and solar displacing fossil fuels for both environmental and economic reasons. A future of carbon-free electricity is possible, but by no means inevitable. What will it take to get there? The transition away from carbon presents technical challenges related to generation, transmission, and storage. There are also human challenges ranging from dislocation in the workforce to political resistance. A profound reshaping of a trillion-dollar industry is daunting. In this seminar students will review how we currently generate electricity, learn about the underlying technologies, and assess the strengths and weaknesses of each. We will study grid stability and the effects of wind and solar intermittency, and evaluate the possibility of mass
storage. We will look at policy, both in terms of incentive structures that encourage renewables, but also policy that protects all the stakeholders, including workers in the energy industry. The science around global climate change is not the focus of this seminar, but we will spend one session studying the views of a climate optimist (physicist Will Happer) and their shortcomings, illuminating some of the political fault lines of this complex issue. We will also consider how energy generation intersects the water crisis, which increasingly threatens prosperity and stability in some parts of the world.

**Recommended Prep:**
Prerequisites: High-school physics and trigonometry. Non-scientists are welcome!

**Freshman Seminar  52C**

**Tree (216102)**

*William Friedman*

2020 Fall (4 Credits)  

**Schedule:**  
M 0300 PM - 0545 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
14

_Have you hugged a tree lately? How about grown one? Photographed one? Drawn one? Written about one?_ Imagine a semester devoted to connecting two organisms: a person (you) and a tree (not you). Interacting with a single tree, you will explore its individual history, evolutionary history, life cycle, leaves, bark, roots, flowers, cones, and architecture.

In an age of environmental destruction and outright murder of our biological brethren, there is something deeply troubling about humanity’s relationship with nature. Technology has left us with mere facsimiles of nature - pixilated abstractions of biodiversity through satellite imagery, decoded strings of DNA – and we, as a species, have become fundamentally disconnected from actual nature and the magnificent organisms with which we share the earth. In this seminar, we will work to understand and give agency to trees as individual organisms, literally rooted in the ground, and evolutionarily rooted in deep time. Topics to be covered include the evolutionary origin of arborescence, human relationships with non-sentient organisms, the case for legal rights for natural objects, reading a twig, the unseen world of roots, and finding human meaning in the longevity in trees. Each student will also work with an individual tree in the living collections of the Arnold Arboretum of Harvard University and observe (see) this organism throughout the entire semester through the creation of images (photography, drawing), journaling, and other forms of representation. The goal of this freshman seminar will be to initiate a personal and lifelong connection with the "other," the vast and variant organisms with which we share the planet.

In his final attack on quantum physics, Albert Einstein identified a property of the theory that he found so strange that he termed it "spooky". Decades later, numerous experiments have shown that nature behaves in exactly the strange way predicted by quantum mechanics, and the essential ingredient for this astonishing behavior is mainly what we now call quantum entanglement—a powerful but highly fragile resource with important applications. This has triggered a surge of recent interest, perhaps even a "second quantum revolution", and a race to develop technologies that benefit from quantum entanglement. Proposed applications range from secure quantum communication and cryptography, to the holy grail—an all-purpose quantum computer. Evaluating the potential and timescale for these technologies has been especially hard. Few people in industry possess the necessary quantum background to make a reasoned evaluation. In this seminar we will approach fundamental concepts in quantum mechanics, using only simple mathematics and demonstrations to convey its unfamiliar logic. We will then survey the "first quantum revolution" which led to the transistor and nuclear technology as a previous example of quantum applications. Finally, we will have an open-ended conversation on modern quantum technologies, with guest speakers from both academia and industry. The seminar deliverables will be a final essay with two parts, the first part reviewing an existing application, the second part on the future of quantum technologies which you will compose combining your newly acquired scientific insight with more practical, economic and sociological considerations.

Recommended Prep: This seminar has some, but not a very high, background knowledge requirement—some knowledge of probability, linear algebra at the level of vectors and matrices. Target audience, apart from those interested in the physical sciences, includes prospective engineers & perhaps students interested in economics or business.

We live in a world that is shaped by science and technology. As a modern citizen who will lead the U.S. and the world in the coming generation, we should be aware of the rapidly changing landscape of science and technology and be ready to participate in the decision-making processes for deploying these life-changing developments to the masses. In this freshman seminar, we will learn and debate contemporary topics that we encounter every day and use them as motivating examples to explore the underlying science, math, and engineering principles. Some of the issues that we will discuss include, but are not limited to, COVID-19 pandemic, the prosecutor's fallacy, coronavirus pandemic, climate change, information technology, quantum technology, genomics revolution, and brain-machine interfaces. We will learn
basic concepts in statistics, thermodynamics, quantum mechanics, information science, biomedical engineering, and nano-bio interfaces through these discussions. In this seminar course, the students will be asked to give presentations and participate in discussions and debates.

Course Notes: The seminar is geared toward first-year students who plan to concentrate on humanities and social sciences.

Freshman Seminar  52F

Parts Unknown: The Dark Matter of the Genome (216113)

Amanda Whipple

2020 Fall (4 Credits) Schedule: M 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 15

Did you know that genes, traditionally defined as DNA encoding protein, only account for two percent of the entire human genome? What is the purpose of the remaining 98% of the genome? Is it simply "junk DNA"? This seminar will explore the large portion of our genome that has been neglected by scientists for many years because its purpose was not known. Each week, through assigned reading material and in-class discussion, we will explore the diverse roles of the non-coding genome in fundamental biological processes, such as sex determination and aging. We will examine research findings which show that non-coding sequences, previously assigned as "junk DNA", play crucial roles in the development and maintenance of a healthy organism. We will also discuss how non-coding sequences are promising targets for drug design and disease diagnosis. Finally, we will visit a local pharmaceutical company to engage with active scientists about their scientific research. The broader learning goals are to develop a curiosity about genetics and biology, to critically evaluate research findings that contradict the current dogma, and to appreciate that many scientific discoveries are yet to come. A thorough understanding of the human genome not only provides a foundation for any student interested in the life sciences, it enables one to engage more deeply in related political and societal debates, which is expected to become even more central as scientists further uncover the dark matter of our genomes.

Recommended Prep: This seminar is recommended for students with a basic background in biology and genetics (high school equivalent), but more importantly, with a keen interest in learning about how our genome works and the consequences of it not working correctly.

Freshman Seminar  52G
Nuclear Dilemmas (216114)

Benjamin Wilson

2021 Spring (4 Credits) Schedule: R 0945 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 12

This freshman seminar explores major issues in nuclear weapons history and policy. Did the use of atomic bombs by the United States against Japan end the Second World War? Have nuclear arsenals prevented a direct conflict between nuclear powers since 1945? Why have some countries pursued nuclear arsenals while others have not? Could society survive a nuclear war in any meaningful sense, and should we prepare for that possibility? What harms has the pursuit of nuclear weapons caused to natural environments and human bodies? How have fictional portrayals shaped our understanding of the nuclear age? Is there any hope of eliminating nuclear weapons? Our discussions will take up classic historical controversies about the role of nuclear weapons in war and international relations, as well as major debates about the theories of nuclear deterrence and proliferation. We will study the arguments of pacifists, feminists, and other critics of nuclear weapons, and we will use several films and a novel to consider the place of nuclear weapons in modern culture. In a final project, students will have the option of writing a "white paper" or "op-ed" on a current nuclear policy question or pursuing a historical or creative project in consultation with the instructor.

Freshman Seminar  52I
Science and Engineering for Managing COVID-19 (216661)

Michael P. Brenner  
Evelyn Hu  
John Doyle

2020 Fall (4 Credits) Schedule: M 1200 PM - 0200 PM
Instructor Permissions: Instructor Enrollment Cap: 14

Our lives have been disrupted by the Covid19 pandemic. Important decisions that influence public policy and constrain personal behavior depend on the accuracy of forecasting future outbreaks, our ability to reliably test for the presence of the virus, and the efficacy of mitigation measures like wearing masks as a means of controlling the spread of infection. This seminar will examine the scientific and engineering basis at the heart of the policies that have been enacted to manage COVID at the level of countries and communities. The class will be organized around three major topics:

1. Predicting the future course of the epidemic: globally and locally
2. Monitoring technologies: how can we monitor and quantify viral transmission?
3. Mitigations: Masks, handwashing, living restrictions (de-densification) and so forth.

We will study the theory and the experiments behind the decisions and mitigations that have been made, including the strengths and weaknesses of the arguments. The first half of the semester will give background and tools to expose the major issues. In the second half of the semester, students will carry out team-based, experimental projects to explore some aspect or issues themselves. Our vision is that in the projects students will study an issue or set of issues affecting our community at Harvard. Depending on how the pandemic progresses, recommendations from the projects could inform decisions makers for the Spring term.

The 14 students enrolled in this Freshman Seminar will meet collectively for two hours a week with a companion class, Engineering Sciences 20r, of 14 upperclass students. For team projects, there will be 7 teams of 4 people, with each team having two freshman and two upperclass students.

Class Notes:

Course is open to Freshman Students only.

**Freshman Seminar  60K**

The Grail Quest of Marcel Proust (203268)

**Virginie Greene**

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 12

This seminar is an introduction to literature, the visual arts, the Harvard campus, and the Boston area.

We will read entirely Chrétien de Troyes’ Tale of the Grail (c. 1190), and excerpts of Marcel Proust’s In Search of Lost Time (1913-1922). Students will be invited to reflect on young Perceval's adventures coming to Camelot, young Marcel’s efforts entering elite Parisian circles, and their own experience of "coming to Harvard," whether physically or remotely. Taking advantages of Harvard and the Boston area art resources, we will focus on the visual aspects of the stories and the art works they inspired (such as the 1895 Edwin Austin Abbey wall paintings at the Boston Public Library), or describe (such as the Fogg Museum Gustave Moreau painting mentioned by Proust).

In its two previous iterations, the seminar was designed on the model of a quest, each class being held in a different location on campus and in the Boston area. The Fall 2020 seminar will remain a quest, but a remote one: synchronous in two weekly zoom live sessions with guests related to the locations (librarians, curators, etc.), and asynchronous with materials made available on the Canvas course site. Students will be encouraged (but not required) to go in small groups or individually to the location and view the building from outside. As things evolve, interior visits may become possible. Students who do not reside on campus may visit a local museum, a 19th or early 20th c. building, a neo-medieval architecture or mural, a garden, a park, a forest, etc. In all cases, students will be trusted to follow the rules of social distancing, mask wearing and other public health safety measures recommended or enforced at the time of their visit. If a quest is a solitary venture, the course will enable sharing this venture among all participants, through regular postings of personal scrapbooks, peer comments, and class discussion modeled on medieval courts and late 19th. c. salons.

No previous knowledge of the subject or French language is necessary. Texts and other materials will be
available in English.

**Recommended Prep:** No previous knowledge of the subject or French language is necessary. Texts and other materials will be available in English.

Death: Its Nature and Significance (203486)

*Jeffrey Behrends*

2020 Fall (4 Credits)  

**Schedule:** F 1200 PM - 0200 PM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

Here's a hard truth: you are going to die. That's nothing against you, of course. I'm going to die, too, and so is everyone else—it's just the way of things for creatures like us. Yet, despite the central role that death plays in our existence, it seems to remain deeply mysterious in a number of ways. It is difficult even to say precisely what death is—is it a mere biological phenomenon? If so, is there any sense to be made of the idea that I might continue to exist after my death, perhaps as a soul? Or is death instead final, in the sense that it causes me to cease existing altogether? Beyond these kinds of questions about death's nature, there are also questions about death's significance or value: Is death bad for the person who dies? If they go out of existence, how could it be bad—things can't be good or bad for us if we don't exist, it seems! Is it better to die at a certain age or time than some other? What should I think about my future death—should I fear it? Would it be better for us if we were immortal? In this class, we'll examine important philosophical work that responds to each of these questions, and more.

**Freshman Seminar  61F**

Cartoons, Folklore, and Mythology (204928)

*Joseph Nagy*
The creators of cinematic (and later TV) animation have perennially turned to traditional oral and literary tales about fantastic heroes, villains, tricksters, and settings for their story material. In the world of the animated “short” and feature-length film, myths, epics, legends, and folktales could come to life in a highly stylized, kinetic, and visually arresting way. Cartooning created a pathway for traditional stories to live on in the consciousness of twentieth-century viewers, and also for these old tales to be adapted to changing times. Hence animation offers not only an influential modern commentary on the folklore and mythology of the past but also a contemporary mythology of its own, deeply meaningful to adults and children alike. In this freshman seminar, students are invited to take what might be considered mere entertainment very seriously, closely reading texts of traditional stories in tandem with critically viewing animation that draws its inspiration from those stories. For a final assignment, each student will be called upon to choose some animation (a short or a clip from a feature-length film) to share with the rest of the seminar, to provide some background for it, and to lead a discussion of the animation in light of what else we will have seen, learned, and said. While the instructor’s contribution to the seminar will primarily focus on animation from 1900 to 1960, students when choosing which sample of animation to share will be welcome to present later or contemporary examples of the cartooning art—including perhaps even their own.

Freshman Seminar  61Q

Language: The Origins of Meaning (205082)

Gennaro Chierchia

How do languages work? Why are they so distinctly human in the natural world? Is language a creation of our intelligence, i.e. we speak, because we are smart, or the other way around? Birds produce sophisticated songs. Do bird songs mean anything? They do, in some way. They serve, for example, as predator warnings or mating calls. Humans too, like birds, can produce music. But for effective day to day communication (or, say, to develop a scientific theory, etc.), we need languages with words and sentences, i.e. the kind of languages which is unique to our species. Do all languages, in spite of looking so diverse, share a common structure? For example, in English words fall into categories: cat is a noun, meow is a verb. Do all languages have nouns and verbs? A fairly recent turning point in addressing these fundamental questions has been to view language as a computational device. This is enabling us to build effective models of how languages are structured so as to empower us with the ability to create meaning; which, in turn, is shedding light, more and more, on who we are. The seminar will explore how natural languages come to create meaning and invite participants to develop their own linguistic analyses through modern logical and computational tools.

Recommended Prep: An interest in language and mind, and no fear of formal methods or the desire to overcome such fear.
Freshman Seminar  61U
Reading the Novella: Form and Suspense in Short Fiction (205181)

Jonathan Bolton
2020 Fall (4 Credits)    Schedule: F 1200 PM - 0200 PM
Instructor Permissions: Instructor    Enrollment Cap: 15

Short enough to read in a single sitting, but more complex and absorbing than short stories, novellas give us some of our most intense reading experiences. Indeed, many of the enduring classics of world literature, from Melville's *Benito Cereno* to Tolstoy's *The Death of Ivan Ilich*, take advantage of the novella's compression and acceleration of plot—features that are also suited to horror, mystery, and other forms of "genre" fiction. In this seminar, we will read some of the great masters of the novella form, including Henry James, Leo Tolstoy, Thomas Mann, Alice Munro, Katherine Anne Porter, and James Joyce, as well as other examples from around the world, including Eastern Europe, China, and Japan. Readings of 50-125 pages a week (all of it in English) will allow us to work closely with some classics of modern fiction, going down to the level of word choice and sentence structure, but we'll also consider the way authors build and sustain suspense, the different forms of narrative resolution, and other questions of plotting and structure. We will also talk about how to get the most out of your weekly reading experiences—I'll ask you to set aside solitary time for your reading each week and, as far as possible, to read each novella in just one or two settings. You'll keep a reading journal, including 2-3 pages of unstructured writing each week; a number of short papers, including creative assignments, will help you understand the choices made by authors as they shape their stories for this most demanding and exciting of fictional forms.

Requirements: Course open to Freshman Students Only

Freshman Seminar  62P
War in Fiction and Film (207812)

Justin Weir
2021 Spring (4 Credits)    Schedule: W 1200 PM - 0200 PM
Instructor Permissions: Instructor    Enrollment Cap: 12

War has always been one of the most important subjects of art and literature, but in the twentieth and twenty-first centuries, public ideas about war and military service have been formed increasingly by film...
and other visual media. In this seminar we will consider the different ways war has been depicted in literature and in films. We will spend some time identifying the conventions and clichés of the genre, and we will have occasion to discuss depictions of war in news coverage, documentaries, and video games. But we will mainly be reading and viewing several masterpieces—including novels and stories by Leo Tolstoy, Isaac Babel, Ernest Hemingway, Svetlana Alexievich, Kurt Vonnegut, Tim O'Brien, Wallace Terry, and Phil Klay, and films by directors Jean Renoir, Stanley Kubrick, Francis Ford Coppola, Stephen Spielberg, Terrence Malick, Kathryn Bigelow, and Spike Lee. In our discussions, we will reflect on how these largely fictional narratives of war have shaped our understanding of culture, politics, and history.

Recommended Prep: There are no prerequisites. The seminar is designed for a general audience. Literary and/or media studies backgrounds are not required, nor is the material presented in a way that requires any special knowledge of military history. All texts originally written or filmed in languages other than English will be provided in translation or with subtitles.

LGBT Life Stories (212729)

_Linda Schlossberg_

2020 Fall (4 Credits) Schedule: T 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

In this seminar we'll read a range of classic LGBT life stories (memoirs, journals, diaries, essays, and autobiographies), beginning in the 1800s and ending in the present. We will study them as products of their specific historical moment, paying close attention to changing ideas about race, class, gender, and sexuality. Questions: How do people narrate the story of their identity? What aspects of their life histories do they highlight; what do they censor? How does the "coming out story," generally understood to be characterized by truth-telling and revelation, borrow from the conventions of fiction?

Freshman Seminar  62U

Zombies and Spirits, Ghosts and Ghouls: Interactions between the Living and the Dead (212697)

Shaye Cohen

2020 Fall (4 Credits)  Schedule:  R 0945 AM - 1145 AM

Instructor Permissions:  Instructor  Enrollment Cap:  15

Virtually all the cultures and religions of the world, from ancient to contemporary times, have teachings and rituals about death. In this seminar we will deal with a subset of this very large topic, namely, the relationship of the living and the dead. The dead are often depicted as still-living in some way and still in communication with us and our world. Are they friendly or hostile? Beneficent or malevolent? Think "undead" and "zombie" versus "saint" and "angel." In this course we will look at some of the myriad ways that religions and cultures conceive of the relationship of the living with the dead. We the living care for the dying and the dead, and hope that the dead will care for us, but how this works exactly is the subject of much speculation. American secular culture, at least in its cinematic expression, has a vigorous belief in the afterlife, especially in having denizens of the afterlife, in the form of zombies, ghosts, and poltergeists, intrude on the world of the living. In our seminar we will survey this rich set of themes as expressed in literature, art, music, cinema, and philosophy.

Freshman Seminar  62Y

Back to the Future: How the Past Imagined the Cities of Tomorrow (213247)

Bruno Carvalho

2020 Fall (4 Credits)  Schedule:  R 0300 PM - 0500 PM

Instructor Permissions:  Instructor  Enrollment Cap:  14

What will the cities of tomorrow be like? How did people in the past imagine our cities would be like? Our ability to foretell the future, it turns out, has a mostly poor record so far. And yet, predictions, visions and expectations can teach us a lot about how people make sense of their world. Since the 1800s we have seen a boom in urbanization, as well as in utopian and dystopian depictions of cities. In fact, we can think of modernity in terms of competing views about the future. Throughout the 20th century, for example, many envisioned flying vehicles. Some vied for segregated cities, others for diverse communities. Today, with climate change, labor precarity, and the effects of the coronavirus pandemic setting in, it often seems as if a dire destiny is inevitable. To some, it is as if the future, not the past, is already fixed. Others invite us to make radical changes. Most tend to assume that the future will be very different from the past. But some cultures think differently, and we will also consider alternative conceptions of time. As we reflect on our current moment, we will investigate multiple urban visions in design, literature and film, asking: How do expectations about the future shape the present? How did unrealized projects impact the built environment? Can fiction and the arts stretch the limits of the thinkable? How might futures imagined in the past help to address our urban and environmental challenges?

Requirements:  Course open to Freshman Students Only
Freshman Seminar  63K

"Copycat" China? (215846)

Thomas Kelly

2021 Spring (4 Credits)  Schedule:  R 0600 PM - 0845 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

In our age of deception, China is widely blamed for a failure to respect intellectual property. These attacks are not new: Chinese makers have long been condemned for flooding the market with cheap knockoffs, forgeries, and counterfeit brands. Challenging such stereotypes, this seminar explores ideas of copying in Chinese art and literature from ancient times to the present day. We will uncover a surprising history of forgeries, hoaxes, swindles, and scams, questioning what is meant by "originality." In doing so, we will also investigate the role of forgeries in shaping Western misconceptions about Chinese culture. From the Terracotta Army and medieval Buddhist spells to Mao's Golden Mangoes and "Shanzhai Harry Potter," the seminar asks what makes something a "fake." What is the relationship between forgery and invention? How have piracy and plagiarism influenced cultural innovation? What makes someone a skillful faker? We will learn what it takes to authenticate works of art and spot forgeries. Readings and class discussions will question what we think we know about China, creativity, and the timeless art of "faking it."

Course Notes:  No knowledge of Chinese required. All readings are in English. There will be required visits to the Harvard Art Museums and the Harvard-Yenching Library.

Freshman Seminar  63L

Memory Wars: Cultural Trauma and the Power of Literature (215850)

Nicole Suetterlin

2020 Fall (4 Credits)  Schedule:  W 0300 PM - 0500 PM

Instructor Permissions:  Instructor  Enrollment Cap:  15

How do we respond to a traumatic event? Denial, acceptance, blame, reconciliation—there are many stances we can take toward a harmful act we have suffered or committed in the past. When entire
populations have suffered or perpetrated crimes against humanity, the question of how to deal with this traumatic past can spark a full-blown memory war—such as the one raging in the U.S right now over Confederate monuments. In this seminar, we explore how the catastrophic events of World War II, slavery, and apartheid affect the way we think and act as individuals, groups and citizens today. What power do literature and the arts have in bringing peace to a society at war with its past? Our diverse spectrum of materials includes: acclaimed American, German, and South African writers such as Toni Morrison, Paul Celan, and Sindziwe Magona; human rights philosopher Hannah Arendt; comedian Trevor Noah; and civil rights lawyer and Harvard Law School graduate Bryan Stevenson, who has been fighting racial bias in the U.S. criminal justice system for the past three decades. Topics include: literature about the Holocaust, slavery, and apartheid; Germany’s and South Africa’s recent "ethical turn" in memory culture; reconciliation and reparation; mass incarceration; punitive vs. restorative justice; social justice.

Freshman Seminar 63M

War Stories: Looking at War Through the Tales We Tell (216108)

*Drew Faust*

2021 Spring (4 Credits)  

**Schedule:** M 0300 PM - 0500 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 15

This seminar will explore American wars from the Civil War to the present through the lens of fiction and film. As Ernest Hemingway once explained to F. Scott Fitzgerald, "War is the best subject of all. It groups the maximum of material and speeds up the action and brings out all sorts of stuff that normally you have to wait a lifetime to get." War has been lodged at the heart of the humanities since the time of Homer. War and narrative in some sense create one another. War is not random, shapeless violence. Fighting is reconceived as war because of how humans write and speak about it. It is humans that give it meaning. This seminar will explore how war has shaped stories and stories have shaped war in ways that have both changed and persisted from the nineteenth century to the present. A wide range of novels, drama, short stories and film will enable us to compare genres as well as eras as we examine how writers and the soldiers and civilians they create have grappled with the moments of truth that wars provide.

Freshman Seminar 63N

Narrative Negotiations: How do Readers and Writers Decide (216104)

*Homi Bhabha*

2020 Fall (4 Credits)  

**Schedule:** W 0945 AM - 1145 AM
Narrative Negotiations explores narrative "voice" in a wide range of literary and cultural texts. Narrative voice is a lively dialogue between the author and the reader as they engage in the experience of determining the value and veracity of the narrative: whose story is it anyway? The writer creates the imaginative universe of character, plot, emotions and ideas—she seems to be holding all the cards; but it is the reader who rolls the dice as she draws on her human experience and moral values to question the principles and priorities of the storyteller. The game of narrative becomes deadly serious when storytelling confronts issues of colonialism, slavery, racial profiling and gender discrimination. Is the right to narrative restricted to those who have suffered the injustices of exclusion? What is my responsibility as a storyteller—or a reader—if I am a witness to violence, or an advocate against injustice, but my life-story is one of privilege, protection and security? What is the role of the politics of identity or cultural appropriation in determining whose story is it anyway? Throughout the seminar students will be encouraged to draw on their own histories, memories and literary experiences as the enter into the world of the prescribed readings. For the final assessment I hope students will choose critical and creative ways of telling their own stories, or the stories of others who have captured their imaginations. Seminar participants will be required to come to each class with two questions that pose issues or problems based on the texts that are important for them, and may prove to be significant for their colleagues. I will invite members of the group to pose their questions and start a discussion.

Freshman Seminar  63O

Community Building and Social Justice through Music (216119)

Claire Chase

2020 Fall (4 Credits)  
Schedule: R 0945 AM - 1145 AM

Instructor Permissions: Instructor  Enrollment Cap: 15

Why do people come together to make new music? How does the act of making music build community and engender positive, even transformative, social change? How have musicians adapted and responded to the new realities of social distancing and remote collaboration in the era of COVID-19, and how have musical communities come together to fight for social justice during this time? How might societies of the future be impacted by these new modes of gathering, sounding, organizing and making music? And how might we as a musical community be of service to a suffering world? We will explore these questions in a hands-on, exploratory environment by becoming our own musical community as a class over the course of the semester. We will study graphic and open-form scores and varied types of musical notation (written and oral), and we will build our own musical instruments (electronic and acoustic). We will also invite members of our growing Harvard community to join us in music-making events in a variety of venues online and offline. Small group work as well as collaborations that extend beyond our unit will be explored. We will experiment with a wide range of pieces designed for musicians and non-musicians alike by composers such as Pauline Oliveros, Yoko Ono and Alvin Lucier, and we will learn about the intersection of music and community from guest lecturers in the fields of social justice, visual art, literature and integrated technologies.

Recommended Prep: While no prior specific musical experience is required for the seminar or for our various community participants, what is required is curiosity, openness and enthusiasm about how and why music brings people together.

Freshman Seminar 63P

Nietzsche (216110)

Jay Harris

2020 Fall (4 Credits) Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 12

In his autobiography, Friedrich Nietzsche included a chapter entitled, "Why I Write Such Good Books." While he won’t win any prizes for humility, he accurately anticipated the judgment of history: he did write some amazing books. In them, Nietzsche addresses some of the big questions of human existence in an elusive style that continues to resonate with—and confound—many. Indeed, he has allegedly influenced numerous philosophical schools, among them existentialism, post-structuralism, and deconstruction. More interestingly, he has been considered a promoter of anarchism, fascism, libertarianism, liberal democracy, and (incredibly) socialism. Nietzsche has always been of special interest to young people who have often appreciated the irreverence and freshness of his thought, as well as the often very high literary quality of his writing. In this seminar, we explore Nietzsche’s moral and political philosophy with emphasis on the themes he develops in his best-known and most accessible work, *The Genealogy of Morality*. Here he asks fundamental questions regarding how we came to a moral system rooted in self-denial and chastity (among other things). However, we also read several other of Nietzsche’s works, and do so chronologically, all the while being guided by his autobiographical reflections on these books. The other works include *The Birth of Tragedy*, *The Gay Science*, and *Thus Spoke Zarathustra*.

Recommended Prep: The seminar presupposes no previous exposure to Nietzsche or philosophy. The purpose is to get a sense of philosophical questions by engaging with one rather irreverent thinker.

Freshman Seminar 63R

What is a Classic? (216124)

Rachel Love

2020 Fall (4 Credits) Schedule: R 0945 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 15

The question of what makes certain works 'classics' has plagued readers ever since they had more than one book to choose from. When faced with more works of literature and art than one could consume in a single lifetime, the label 'classic' provides readers with a narrowed selection that is guaranteed to be worth the time and effort to engage with,
that is vital to participation within an intellectual community. Classical literature, classical art, classical music—all suggest art forms that are fundamental, elevated, perhaps even elite…but why? And who gets to decide what qualifies as 'classical', especially when those who constitute today's intellectual communities are increasingly heterogenous and have greater access to an impossibly vast, impossibly diverse trove of global artistic production? In this seminar, we are going to read ‘The Classics’—defined within universities as the study of literature from ancient Greece and Rome—in order to open up larger questions about the nature, purpose, and consequence of labelling certain works, aesthetics, and ideas 'classical'. We will read selections from a broad sampling of written works that survive from antiquity, learning firsthand what it means to read a classic. At the same time, we will be reading, watching, and listening to a diverse array of media that explain, criticize, and reimagine the role of classical literature and ideas in today's world.

**Recommended Prep:** There are no prerequisites for this class. All readings are in English, and no knowledge of Latin or Greek is expected.

**Freshman Seminar  63S**

Surviving Your First Year at Harvard: Lessons of Resiliency From Mexican Artist Frida Kahlo (216125)

*Maria Parra-Velasco*

2021 Spring (4 Credits)            **Schedule:** T 0600 PM - 0800 PM

**Instructor Permissions:** Instructor **Enrollment Cap:** 12

Are you trying to discover your passion in life? Is love a concern of yours? Do you often think about your appearance, and what others might think of you? Is a strong sense of community important to you? Do you fantasize about (better) Mexican food at Annenberg? Are you looking for opportunities to express your creativity? If any of these questions resonate with you, then this seminar is for you. This seminar will explore ways to tackle these and other questions by learning about the Mexican global icon Frida Kahlo. Born in Mexico City at the beginning of the 20th Century, Frida was a bright, complex, unapologetic and creative woman. She built strength and resiliency from a very young age in the face of polio and a terrible accident that incapacitated her from her teen years until her death at 47. Despite these hardships, Frida never forgot to enjoy life and to love both men and women. She was always in solidarity with those in need, and through her art she gave voice to the voiceless: women, indigenous communities, and the disabled. As we learn about Frida's journey, we will travel in time through Mexico's complicated social history and Mexico's rich and creative popular culture which includes fashion, cuisine and music. We will discover the hidden gems of Mexican art within Boston and Harvard Museums. Finally, this seminar hopes to be an open door to explore the vast field of the Humanities and art making.

Avant-garde art sometimes seems to make a complete break from the art that precedes it. The very name, 'avant-garde' (from French, literally 'advance guard') carries military connotations that suggest a total, violent break with the past. Our seminar will look at another side of this radical change, asking whether the avant-garde might also be playful, rather than violent, making possible an interplay between invention and convention? And what is the afterlife of the avant-garde? How did its legacy inform aesthetic innovation in a later period? We will try to answer these questions by studying a small set of textual and visual artifacts from the long twentieth century, cutting across different continents and political formations. We will begin with Italian and Russian Futurism and their convoluted relationship with Fascist and Communist ideologies. We contrast these historical examples with later work, like that of Samuel Beckett and Andy Warhol. We will consider films by Sergei Eisenstein and Jean-Luc Godard, ending with David Lynch's radical displacement of the reigning ideology of Hollywood in his 2001 masterpiece Mulholland Drive. This nearly century-long framework will allow us to investigate a range of artistic, social, and political mobilizations of the term 'avant-garde'. We will be doing short readings and working through them together in class, helping students learn how to read theoretical texts as well as read novellas and watch films in the light of theory.

Build a Modern Art Exhibition—Dig up Harvard’s Archives (216111)

Felipe Pereda

The making of an exhibition entails a thorough process of investigation. We will need to find the works of art, document them and construct an argument that will be brought to life at a museum gallery. The goal of this seminar is to give you the chance to participate in the research and design of this exhibition, that focuses on the work of a major figure of Spanish and Filipino art of the 20th century, Fernando Zobel (1926-1984), programmed at the Prado Museum, Madrid. A Harvard Graduate (1949) whose love for painting and collecting mandated his life, Zóbel saw and cultivated art as a universal language without frontiers. Harvard’s archives hold hundreds of Zobel’s letters, drawings, paintings and even his class note-books that will guide us into the fascinating life of a modern artist while allowing you to channel the role of a curator.

Recommended Prep: Some knowledge of Spanish will be useful but is not required. Zóbel was bilingual, Spanish/English and expressed himself in either language.
Video: The Medium of Everyday Life (216099)

Karthik Pandian

2021 Spring (4 Credits)  

Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor  
Enrollment Cap: 12

Video is fast becoming the medium of everyday life. We use it to communicate, learn, entertain, inform, and express ourselves. At the same time, we are often used by it - manipulated, programmed, influenced, distracted, fooled. In this production seminar, we will explore the medium of video by putting works of contemporary art into dialog with memes, viral videos, and other social media from the present moment. Artists whose work we will look at represent a broad range of backgrounds and experiences, motivating us to consider how video engages questions of race, class, gender, and sexuality. Over the course of the term, students will create a series of videos inspired by these discussions, drawing on technical workshops introducing the basics of shooting, editing, and publishing videos.

Recommended Prep: No experience with video production is necessary and all materials will be provided with no cost to the student.

Vegetal Humanities: Paying Attention to Plants in Contemporary Art and Culture (216106)

Carrie Lambert-Beatty

2021 Spring (4 Credits)  

Schedule: M 1245 PM - 0245 PM

Instructor Permissions: Instructor  
Enrollment Cap: 12

This class invites you to practice a new kind of plant-consciousness. Our guides will be contemporary artists and thinkers who are encouraging new relationships between human and vegetal life, or recalling
very old ones. Suddenly, we have plant protagonists, gardens in galleries, and botany-based forms of philosophy, architecture, music and more. Following the lead of these culture-makers and their work, we will draw on the new science of plant communication and learning in this class; uncover plant-based histories and renew ancient understandings of human-plant relations. But plants themselves will also be primary sources, as each student follows a sequence of exercises to deepen understanding of a plant “interviewee”—one they’ll grow at home from an unidentified seed. At the same time, we will ask critical questions: with climate crisis upon us, in a time of social inequity, poisonous politics, and mass dislocations, why this attraction to plants? Is the vegetal turn a diversion from tough human problems? Or is there reason to think a cultural change could, even now, change the fate of nature?

Recommended Prep: No prior art or botanical knowledge is expected. However students with backgrounds in agriculture, ecology, horticulture, or botany are especially welcome.

Freshman Seminar 63X
Happiness and Different Ways of Life (216188)

Susanna Rinard

2020 Fall (4 Credits) Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 12

What is happiness, and what can we learn from different ways of life about what conduces to human happiness? In this seminar we begin with an overview of thought in philosophy and contemporary science about the nature of happiness (our guide: Sissela Bok’s book Exploring Happiness). We then consider a few different ways of life. First, we look at modern-day Buddhist approaches to the search for happiness (our guide: Matthieu Ricard’s Happiness). This will provide a context in which we can consider to what extent internal conditions—your mental habits, your attitude, your overall outlook—are determinants of happiness. Then we turn to a study of the lifestyles of prehistoric humans, and consider their approaches to child-rearing, dispute resolution, and more (our guide: Jared Diamond’s The World Until Yesterday). Looking at these radically different cultures will prompt us to consider whether our modern society could benefit from re-adopting some aspects of these ways of life. Finally, we look at the conditions of poor women in India, and what we can learn from them about justice and quality of life (our guide: Martha Nussbaum’s Women and Human Development). We will consider both the devastating effects of oppression and certain kinds of material poverty, as well as the ways in which people can nonetheless flourish in difficult circumstances. Throughout the course we will see what can be learned by combining abstract philosophical reflection on happiness with attention to the details of the actual lives of human beings at different places and times.

Freshman Seminar 63Y

The American West: History & Myth (216280)

Christopher Clements

2020 Fall (4 Credits)  Schedule:  W 0945 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  12

Lil Nas X reinvented a Western aesthetic with his 2019 hit, Old Town Road:

I got the horses in the back / Horse tack is attached /

Hat is matte black / Got the boots that's black to match.

The 20-year-old Georgia rapper joined a parade of artists, authors, scholars, and citizens who have blended the imagined and the historical into something entirely its own. This seminar traces how he and others, in the present and in the past, have engaged in similar kinds of reimagining while also attempting to uncover the material history of what we think of as the American West. The West has long been a site of conflict and violence, yet many insist that we see it as a land of adventure and opportunity. How did we arrive at this peculiar dichotomy? What is the American West, and what does its flexibility as a cultural concept teach us about America itself? How did a place vastly peopled by diverse communities and nations become imagined as an open and untouched expanse? How do the worldviews and experiences of a diverse array of Indigenous peoples complicate this mythology and the idea of the “American” West? We will consider the West's portrayal in various mediums—historical documents, film, fiction, photography, painting, music, and more—and develop diverse analytical skills and interdisciplinary methods for answering these questions.

Shadow Economies in U.S. History (216278)

Devin McGeehan Muchmore

2020 Fall (4 Credits)  Schedule:  TR 1030 AM - 1145 AM
Instructor Permissions:  Instructor  Enrollment Cap:  12

Have you ever received cash for babysitting? Or used a friend’s HBO password? Or lied about your age to access a webpage? Although terms like “informal sector” and “black market” might seem to imply marginality, economic activities that evade or contravene legal regulation are part of everyday life. As you will learn in this seminar, this is hardly a recent development. Spanning the late-colonial period to the present, this seminar samples histories of controversial and shadow economies in the territory now known as the United States. We will examine a range of case studies, including counterfeit currency, enslaved human beings, commodity futures, animals, blood, and sex. In each case, we will analyze how the changing
legal and moral boundaries around the licit market (separating it from the black or grey market) have been
drawn and negotiated, and what the effects of those boundaries on the organization and valuation of illicit
commodities and markets have been.

Freshman Seminar  64C
Literature of Epidemics and Pandemics: Tackling Oppression (216193)
Karen Thornber
2020 Fall (4 Credits)  Schedule: M 0600 PM - 0800 PM
Instructor Permissions: Instructor  Enrollment Cap: 15

Wherever you live—whether in the United States, Asia, or anywhere in-between; whether in an isolated rural
community, a booming megacity, or anywhere in-between—it is almost certain that your life has been
affected if not transformed by Covid-19. This disease is not only a health crisis from which more than a
million people will lose their lives. It has also triggered a financial crisis, having left millions and likely soon
billions unemployed or underemployed. Just as significantly, COVID-19 has further exposed and
exacerbated countless of the inequalities in our societies, injustices fueled by racism, sexism, classism,
ableism, ageism, ethnocentrism/jingoism, heterosexism and similar and frequently intersecting forms of
oppression in the United States and around the world. Already, creative narratives on the current
pandemic—novels, plays, poems, short stories, essays, and memoirs—are exposing the many ways our
societies are failing and have long failed our most vulnerable. These narratives are also providing guidance
for a more equitable and sustainable future.

Putting our own experiences living through a pandemic into broader historical and cultural perspective, in
this seminar we read a selection of acclaimed novels, short stories, drama, poetry, memoirs, and essays
from around the world (Africa, Asia, the Americas, Europe) and from classical times to the present on a
range of epidemics and pandemics. This literature on epidemics and pandemics has played a large role in
documenting (and in some cases glossing over) historical injustices and inequalities on the one hand, and
on the other, imagining and inspiring future transformations. We will be most concerned with what these
narratives tell us about existing and longstanding forms of oppression, our frequent (in)capacities as
individuals, communities, and societies to ameliorate much less eliminate injustice and inequality, and
what vision these narratives can provide us as we continue to live through and one day emerge from Covid-
19. Class discussion gives the necessary historical, cultural, and literary contexts for these primary texts.
In-class presentations and final projects offer students opportunities to engage more deeply with their local
communities.

Recommended Prep: The only prerequisite for this seminar is a desire to read a range of
thrilling, provocative works from around the world that tackle some of
the most significant problems that have faced and continue to face
societies. No non-English language expertise required, but students
who can read a novel in the original language are encouraged to do so.

Freshman Seminar  64D

Water Rights in the Americas (216284)

James Mestaz

2021 Spring (4 Credits) Schedule: R 1245 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 12

Water is life, but is it a human right? Water use is a contentious issue globally because we rely on water for nearly every productive activity, but it is often scarce and not distributed equally. In this seminar, we will examine the social and physical shape of water in a modern and historical context to better understand the persistence and escalation of struggles over water access both locally and globally. While all bodies of water deserve mention, civilizations have most often relied on rivers to act as veins pumping fresh water like life blood. This class discusses popular and scholarly understandings of water issues, paying particular attention to the Boston area and then extending to other populations in the Americas, from South America through Canada. We begin by exploring the importance of Boston's waterways, and from there we examine global water policies, learning how marginalized groups have made use of water justice strategies to defend their identity, material wealth, and health. We will then come full circle by analyzing community activism on such local waterways as the Mystic River, and you will design your own proposal to protect our local waterways.

Freshman Seminar  64E

Asian American Literature (216282)

Catherine Nguyen

2020 Fall (4 Credits) Schedule: T 0600 PM - 0845 PM
Instructor Permissions: Instructor Enrollment Cap: 10

What is Asian American literature? Recently, Asian American literature has been increasingly visible with the 2016 Pulitzer Prize winner Viet Thanh Nguyen's *The Sympathizer* and with the many *New York Times* best sellers by Asian American writers. Asian American literature is born out of Asian immigration to the United States; it articulates the hardships of resettlement and assimilation and also critiques racism and the model minority. Asian American literature troubles literary genres, identity categories, borders, and the notion of Asian America itself. We will read a wide selection of literature that speaks to the range of Asian American experiences and the unique possibilities of Asian American writing. Moreover, we will engage in
art workshops on zines, painting, and protest postcards as a creative way to approach Asian American literature as well as activism and anti-racist work with the support of the Elson Family Arts Initiative Fund to Support Integration of the Arts into the Curriculum.

CIA Operations in the Global Cold War (216283)

*Beatrice Wayne*

2020 Fall (4 Credits)  

**Schedule:**  
W 0945 AM - 1145 AM

**Instructor Permissions:**  
**Enrollment Cap:** 12

What was the secret side of US foreign policy during the global Cold War? This course uses empirically grounded readings from across the Americas, Africa and Asia to understand the impact of the Central Intelligence Agency's covert operations on governments, organizations, and ordinary citizens living across the globe. We will examine memoirs, declassified documents and congressional hearings to understand the rationale behind the Central Intelligence Agencies actions, and engage with popular culture produced about the CIA to understand how coverage and representations of the Central Intelligence Agency have reflected and clashed with the realities of their operations. As this class is deeply engaged with understanding the response of global populations affected by this arm of U.S. foreign policy, we will analyze the literature, poetry, films, and various forms of cultural production from those who experienced the fallout of CIA covert actions in their regions. This course will focus on methods as well as ideas, exploring the challenges and restrictions inherent in studying an organization that is all about keeping secrets. Students will get hands-on experience with working to declassify documents from the U.S. State Department. The course encourages students to ask new questions about the way they see themselves, their fellow citizens, and their responsibilities to the wider global community.

Sex, Money, and Power in the Postcolonial World (205048)

*George Paul Meiui*

2020 Fall (4 Credits)  

**Schedule:**  
W 1200 PM - 0245 PM

**Instructor Permissions:**  
**Enrollment Cap:** 12

With globalization, sex—everywhere—has become more central to who we are as citizens and consumers, how we gain rights and resources, and how we relate to others as members of a specific race, ethnicity,
region, or culture. Worldwide, states invest or disinvest in people according to how they have sex, adopt gender identities, or sustain sexual morality. Terrorist organizations claim to use violence to reestablish bastions of piety and sexual propriety; various populist movements imagine immigrants and refugees to threaten their societies, in part, by failing to uphold the sexual norms of adopting countries; and transnational NGOs and activists seek to "rescue" or "rehabilitate" sex workers, gays, lesbians, transgender, and other people vulnerable for their intimate and social lives. The growing importance of sex to a global consumer culture only heightens the rush to secure societies from the so-called "perversions of globalization." Tourists now travel for sex to various destinations in Africa, Asia, Latin America, and the Caribbean; poor, unemployed men and women, in former colonies, sometimes use sex as a means of enrichment and empowerment; and amidst the rise of religious fundamentalisms, commodity ads incite youths to consume sex along other goods to build authentic selves. In this seminar, we ask: Why does sexuality become so central to how we imagine our world and futures? Why is sex so important in defining us, as subjects and populations? And how do older colonial stereotypes of race, ethnicity, and culture shape sexuality politics in the new global order? To address these questions, we read about how sex relates to politics and the economy in countries shaped by the histories of colonialism in Africa, Latin America, South Asia, and Europe; watch documentaries about prostitution and sex tourism; and jointly curate a small museum exhibit about sexuality in the postcolonial world.

How "Asian" is America today? This seminar explores the Asian dimensions of American society, with special attention to religion, ideas, and culture from the first encounters of Thoreau and Emerson with texts and ideas of the "Orient" to the saturation of modern America with the holistic cultures of yoga, tai chi, and mind-body medicine. We will look at the histories of immigrant communities from India, China, Japan, Korea, and Vietnam and new forms of religious and cultural life they brought with them—Hindus and Sikhs, Buddhists of many lineages, as well as Asian Christian communities. How has Asia reshaped the collective identity of the United States?

</table>
The adult human mind is a unique phenomenon on earth. Only people can ponder the causes of and cures for global warming or pancreatic cancer, and can think thoughts about molecules, genes, democracy... Animals, and human infants, do not have most of the 500,000 concepts expressed by words in English. How does the human mind work, and how can we understand how it came to be, with its vast repertoire of concepts from which we routinely compose thoughts? Seminar participants will explore together the origins and development of human knowledge in the individual child, in relation to two larger time scales: biological evolution and historical/cultural development. We will begin with several case studies, including case studies of the origin of a perceptual ability (depth perception), and of the concepts natural number and agent and mind. These case studies illustrate how all of the disciplines within the cognitive sciences, as well as anthropological, archeological and historical disciplines, shed light on these issues and establish that these perceptual and conceptual capacities have deep evolutionary roots. The main focus will be on experimental work from psychology. We will then turn to two case studies chosen by the participants in the seminar, chosen to illuminate human uniqueness (candidate topics include the origin of moral concepts, of logic, or of language). At the end of this seminar students will have a grasp of the theoretical debates about the nature of the human mind that have animated philosophy since the time of the Greek philosophers, as well as why considerations of the origins of the mind were always seen as central to these debates.

Recommended Prep: Students taking this seminar should have an interest in learning about the cognitive sciences, which draw primarily from linguistics, analytic philosophy, computer science, and experimental psychology.

makers out of work, but it created vastly more jobs making cars, and fueling them and repairing them, and it opened the way for whole new industries like roadside motels and restaurants. With robots increasingly performing the tasks once done by blue-collar labor, however, and computers and artificial intelligence now eliminating the need for many workers once thought to be immune because of their cognitive skills, today’s technological threat seems different. It is no longer just the unskilled and undereducated whose jobs are at risk. Moreover, the challenge may be especially acute in America, where wages are far higher than in many other countries and an ever greater share of what we consume and invest not only can be provided from overseas but often is. Does the next generation of Americans, then, face a genuine threat from advancing workplace technology? If so, what are the dangers – not just economic, but social, political, even moral – to the country as a whole? Most important, what can we do about it?

Freshman Seminar  71P

Making Places and Spaces in Modern America (212696)

Lizabeth Cohen

2020 Fall (4 Credits) Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 12

How did a home in 1945 compare to one in 2000? Did the opening of shopping malls in the 1950s change people's consumer habits? What made living in suburbs similar to and dissimilar from cities? How did various work and leisure settings alter people's attitudes toward labor and play? In what ways was traveling by airplane from airports different from transit by train? The built and natural environments offer important clues to how American culture, politics, and social life have transformed since World War II. In this seminar we will examine closely the shifting character of the ordinary and extraordinary places and spaces of postwar America. We will explore typical environments like the neighborhood, school, factory, movie theater, bar, and office as well as more unusual sites like a prison and Disneyland. In every place they occupied, Americans have left an important record of their values, tastes, and priorities. In the diversity of their choices we can see both what unites Americans in a common culture and what keeps them apart, segregated in different physical—as well as social and political—worlds, often defined by race, class, and gender. In addition to our group investigations through readings, media, and discussion, students will undertake their own exploration of a place or space that has changed significantly over time.

Students are expected to attend every seminar meeting to insure continuity in our discussions and to maximize the opportunity this freshman seminar will offer to get to know each other and to share ideas. Inevitably students will bring their own unique experiences with the American built environment to the class, from which we will all benefit.

Freshman Seminar  71U

The Psychological Roots of Oppression (212704)

James Sidanius

2020 Fall (4 Credits)  Schedule:  M 0300 PM - 0500 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

Why are people so willing to humiliate, oppress and even massacre people from other social groups? What are the obstacles impeding the construction of truly multi-ethnic societies in which people from all ethnic groups function as equal partners in the pursuit of the national project? What are the factors responsible for the horrors of the holocaust and similar acts of genocide in places such as Rwanda, Cambodia and Myanmar. In this seminar we will explore those aspects of human nature which lie at the root of the seemingly intractable problem of social exclusion and oppression. We will explore the cognitive, affective and motivational components of intergroup brutality by taking an excursion through both classical and contemporary approaches used by social scientists to come to grips with the psychology of social exclusion. This seminar will provide students with an overview of the major theoretical and methodological perspectives informing our understanding of the psychology of prejudice and oppression in modern society. These various theoretical perspectives will span disciplines such as social, political and evolutionary psychology, sociology, political science, and anthropology.

Freshman Seminar  72D

Democracy and Education in America (216285)

Rob Willison

2021 Spring (4 Credits)  Schedule:  T 0345 PM - 0545 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

*Cheerful illusions and wish fulfillment have dominated both popular and scholarly thought about democracy for two centuries. Democratic theory has sailed along as if no iceberg had struck and the engine room were not taking on water...Our view is that conventional thinking about democracy has collapsed in the face of modern social-scientific research.*

(Achen and Bartels, *Democracy for Realists*, 2010)

Democracy is in crisis. The problems we face—pandemic, environmental destruction, economic and technological upheaval, global migration—are far too complex for the average citizen to grasp in detail. Meanwhile, the tools of disinformation and manipulation are more powerful than ever. Set aside, for a moment, any default faith in democracy you've grown up with: do you really believe you can trust your fellow citizens to make wise decisions about how to approach these issues? In this seminar, we'll put to the test the most powerful answer to such worries that democracy's defenders can offer: education. If we are
not now the well-informed, open-minded, scientifically literate, engaged citizens that a healthy democracy requires, can our educational institutions be designed to bring us sufficiently close to that ideal? Or, as so often seems to be the case in contemporary America, are our schools doomed to reproduce the divisions and inequalities that they inherit? To address these guiding questions, we'll attack philosophical questions about the very nature of democracy and human cognition, and draw on the best research contemporary social science has to offer. Our companions in inquiry will be some of history's greatest theorists of education—Plato, Dewey, Freire—but also leading thinkers of today (many of whom are members of Harvard's faculty): Susan Carey, Danielle Allen, Daniel Koretz. By the seminar's end you'll make your own original contribution to this collective intellectual effort by completing, in collaboration with your classmates, a project of your own design.

Freshman Seminar 72E

That Seventies Seminar: Discovering a Decade that Made America (215845)

Jane Kamensky

2021 Spring (4 Credits) Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Sure, you know Watergate and disco. But did you know that the American 1970s also witnessed the rise of phenomena as diverse as the environmental movement, neoliberal economic policy, mass incarceration, modern conservatism, terrorism, gay rights, hip hop, the "zipless fuck," and the abortion wars? Freshman Seminar 72E takes a short, strange trip through this generative and often-mocked decade, whose imprint lingers powerfully today, now fifty years on. Our approach is both thematic and chronological. Each week, our discussions will center on a particular year, with special attention to a hot-button topic that gripped the American public then (and throughout the decade). Our encounter is meant to be immersive: most of the readings, listening, and viewing consists of primary sources (produced at the time). By the end of the semester, you should have a feel for this slice of the past, earworms and all, a sense of the decade's enduring impact, and through that, new strategies about how to navigate the political, economic, and cultural dilemmas of the present moment.

Freshman Seminar 72G
The American Democratic Tradition: Past, Present, and Future (216122)

James Kloppenberg

2020 Fall (4 Credits) Schedule: T 1200 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 15

The United States boasts one of the world's oldest continuously operating democracies. Why does it seem so unstable in 2020? Why is American politics so polarized? Is that polarization healthy or hazardous? What should Americans do to fix what ails our democracy? To answer those questions, we will examine contemporary US democracy in relation to its history, tracing the origins and growth of our ideas and institutions from the colonial era to the present. Readings will include selections from thinkers such as Jefferson, Madison, Tocqueville, Grimkè, Douglass, Lincoln, Sumner, Carnegie, Gilman, Du Bois, Dewey, Hayek, Friedman, Crenshaw, Joan Williams, Obama, and Coates. Students will investigate the sources of Americans' current disagreements and debate proposals to address problems such as economic and social inequality, apathy, intolerance, racism, sexism, and climate change. They will also explore the resources available at Harvard for active political and social action, including Harvard Votes, the Institute of Politics, Phillips Brooks House, and the Mindich Program in Engaged Scholarship, among others. In addition to writing brief essays throughout the fall, at the end of the semester each student will write a presidential inaugural address for delivery in January, 2021, or, if you prefer, January, 2025, in the middle of your freshman or senior year.

Recommended Prep: Although no particular background is required for the seminar, a serious interest in American politics and a solid grounding in US history, such as that provided by a good high school history class, is recommended.

Freshman Seminar 72I
Everyday I'm Hustlin': Pop Culture, Youth, and the African City (217842)

Daniel Agbiboa

2021 Spring (4 Credits) Schedule: W 0945 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 12

Cities today face broad challenges ranging from public health emergencies (e.g. Covid-19), to anti-police brutality protests (e.g. #ICan'tBreathe), and unemployment. Stuck in a frustrating period of "waithood" or waiting for adulthood, urban youths in Africa are increasingly devising enterprising ways to improvise their livelihoods and assert their right to the city. One creative way in which youths are responding to everyday uncertainty and frustrations is through the power of pop culture, which includes creating new artistic, musical, performance, and fashion forms that extend across and beyond African cities. Consider, for example, the cross-cultural power and global appeal of Afrobeats. Notable American musicians, from Beyoncé to Pharrell Williams and Chris Brown, are fast integrating African pop music into their sounds as part of the upward trend of the "Afro-Cool" in the United States. This, of course, raises important questions about the boundaries between what is cultural appreciation and what is cultural appropriation.
In this seminar, we ask: In the face of the contradictions of modern city life in Africa, in which people's opportunities and expectations are simultaneously broadened and constrained, how do young people fashion new ways of being and interacting with society? In what ways can crisis become opportunity? To address these questions, we will watch films, listen critically to music, analyze written texts, take virtual tours, and visualize fashion and popular art forms that shed new light on the "hustle economy" in urban Africa, its relationship with pop culture in American cities, and the innovative ways in which young people are making their voices heard in the city.

**Cities in an Age of Pandemic (217843)**

_Edward Glaeser_

2021 Spring (4 Credits)  
**Schedule:**  
M 0900 AM - 1145 AM  
**Instructor Permissions:**  
Instructor  
Enrollment Cap: 12  
Will COVID-19 permanently derail urbanization, or will cities shrug off this latest pandemic, just like Cholera, Yellow Fever and the 1919 Influenza outbreak? In this seminar, we will begin with oldest urban pandemics, such as the Plague of Athens described by Thucydides. We will then turn to the investments which enabled nineteenth century cities to protect themselves against disease, including Central Park, the Croton Aqueduct and the sewers of Paris. But we will spend more of our time focusing on COVID-19 and its economic and social consequences. We will cover the rise of remote work, the George Floyd protests and current battles over gentrification, but everything will be done with an emphasis on data and the tools of economics.

**Freshman Seminar 72K Section: 01**

Marvelous Markets: From Airbnb to Feeding the Hungry (216267)
Markets are everywhere, but they don't always work the way we want them to. While economists' "ideal" markets are supposed to find their way to socially optimal outcomes, real-world markets often fall far short. Valuable goods don't always reach the people who want to buy them; prices don't always match up across venues; and jobs can be hard to find even when the labor market isn't tight. This seminar explores the purpose and potential of markets, drawing on classical ideas in economic theory. At the same time, we look at the pitfalls: how and when markets lead to inequitable outcomes, or just fail to create value overall. Then, we ask: How should markets work—and how can economists and entrepreneurs help bring them there? We learn what makes marketplace platforms successful: How Uber and Airbnb create value from slack capacity; how social crowdfunding platforms like GoFundMe create trust; and how both dating sites and Craigslist thicken thin markets. And we see how marketplace design creates opportunities even in settings we might find surprising, such as when the nonprofit Feeding America uses a marketplace mechanism to distribute food to its nationwide network of food banks. Finally, we explore how better marketplace design can help address some of the deepest problems today's markets have created—including inequality, the decline of labor, and climate change.

Readings include research and philosophy papers, economics journalism, business case studies, and even a bit of fiction. Yes, we will discuss cryptocurrency/blockchain.

**Freshman Seminar 72L**

Political Crisis and Radical Change in Recent History (217385)

*Charles Maier*

2021 Spring (4 Credits)  
**Schedule:** R 0300 PM - 0545 PM  
**Enrollment Cap:** 12

All societies experience political disagreement and some degree of social conflict. Not all of these difficult passages lead to violence or a change of regime. How do we judge when governments are close to collapse and what outcomes might we expect? Were alternative outcomes possible? Can we separate the impact of long-term or "underlying" conditions from immediate provocations?

In an effort to answer these questions, this seminar will focus on some spectacular cases of political crisis in recent history that have brought down both democratic and authoritarian regimes—sometimes after long periods of strain but often unexpectedly. In some cases, these crises led to democratic advances, but we will also consider crises in which serious unrest was finally repressed or dissipated (e.g. in Paris 1968, China 1989, the Arab Spring, 2011). Students will be asked to strategize as well as analyze.

</table>
Humans seem to have always imagined the end of their world order. It appears that, without the "sense of an ending," not only artistic production, but also individual and social lives cannot be made coherent and effective. Fantasizing about the apocalypse is something that many people in the US and almost everywhere else in the world used to do on a daily basis either by watching their favorite shows on TV, by playing videogames, or by listening to political speeches. Of course, in 2020 all this has become not only fictional anymore due to the tragedies and disruptions brought about in our daily life by the Covid-19 pandemic: we truly live in a post-apocalyptic world. But it is worth remembering that many experienced such a condition even before 2020 and we can learn from their reflections and imaginations how to live the apocalypse.

This course will start from these observations to ask why imagining the end is so pervasive in contemporary cultures, what ethical choices are put in front of us "at the end of the world as we know it", and how we can analyze critically where apocalyptic images are coming from and how they are used in contemporary conversations.

Imaginations of the end have their roots in a literary genre that is often called "apocalyptic" and has been alive and productive since antiquity. The course will look at this historical trajectory, but most of the work will be focused on contemporary cultural products, such as movies, short stories, songs, art, comic books, videogames, and so on. The products of writers, filmmakers, and artists will be analyzed and observed as thought experiments and "revelations" about the incoming end and its aftermath. Much of this work will be carried out in collaboration with the Harvard Art Museum and through the participation of writers and artists as guest lecturers and interviewees.

Thus, students will be asked to observe how thinking about a catastrophic future is actually a means to reflect about the present, by identifying whether humans are doing something wrong, whether they have any chance to correct their mistakes, or what strategies can be deployed to face with resilience the aftermath of the end. In this perspective, for instance, God, aliens, or meteorites are metaphors representing our powerlessness, while sins, zombies, or climate change are wake up calls for humankind. "Prophets of doom" can be channels of liberating and progressive energy, but can also become instruments to set up for destruction people who look and act differently. Apocalyptic scenarios almost always distinguish humankind in the two opposed camps of those who are saved and those who are condemned, but in more modern apocalypses the Enemy (like the biblical Antichrist) looks more and more undistinguishable from our own selves.

Ultimately, the course will ask you to reflect about your own fantasy of the end and write (or photograph, or sing) it.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

General Education 1002
The Democracy Project (203045)
Jill Lepore
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

The United States is founded on the idea of equality but equality has always been elusive and has only ever been achieved through struggle, argument, and action. This course examines American history—especially the history of race, immigration, and constitutional justice—through historical analysis, democratic deliberation, and public-minded projects. It’s a history course—but a history of the present.

Class Notes: This course has several synchronous components. Most weeks, there will be a Town Hall on Mondays from 4:30-6:30 p.m. EST. Only a subset of the class is expected to attend the Town Hall each week. Students who do not attend the Town Hall live one week will watch a recording of it in an interactive viewing session. All students are expected to attend a weekly synchronous section, and the course will have several other opportunities for synchronous work on collaborative projects each week. Please see the syllabus on the course Canvas site for more detail.

General Education 1006
Music From Earth (215876)
Alexander Rehding
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

In 1977 humanity sent a mixtape into outer space. The two spacecraft of NASA’s Voyager mission include a Golden Record, featuring greetings in 55 earth languages, 116 images of the planet and its inhabitants, plus examples of music from a range of cultures across the world: from Azerbaijani bagpipes to Zaire pygmy songs, from English Renaissance dances to Stravinsky’s Rite of Spring, and from Louis Armstrong to Chuck Berry. The samplings of earthbound auditory culture are on their way into the unknown. The Voyagers left the solar system around 2014, and in about 40,000 years the sun will no longer be their nearest star.

The Golden Record raises a number of big questions. The vast temporal and spatial distances that it traverses force us to change our perspective so as to imagine the distant future and to think far beyond our usual comfort zone. In trying to make contact with the Big Other—quite literally, communicating with the
alien—the Golden Record asks us to confront our very humanity and to pose questions of self-
representation and communication on the broadest level. It is ironic that in 1977 the idea of communicating with aliens was something of a crackpot theory that serious scientists rarely promoted, whereas the vast number of exoplanets that have been discovered over the last forty years has given new relevance to this idea. We now believe that there must be at least 100 billion exoplanets, so the tables have turned: now it seems statistically unlikely that there would be no other inhabited planet in the universe.

The central question we will ask in this class is bafflingly simple: What might happen if someone picked up the Golden Record at the other end? What does listening actually mean on this broadest, interplanetary level? Of course, any answer must remain speculative, but this doesn't mean that we must throw our arms up in the air in despair. SETI, the Study of Extra-Terrestrial Intelligence, has identified a number of factors that we can safely assume to be universally recognizable across planets. Chief among them is the binary system of zero and one; it is also likely that sensory perception will rely on vibration patterns in a fluid medium. These give us a basis for some informed speculation. Concrete answers will likely remain evasive, but the creative and deductive work that goes into solving these puzzles are just as important as the answers themselves.

Class Notes: This course's live lectures are scheduled for noon-1:15 p.m. Eastern time Tuesdays and Thursdays, and students are encouraged to attend at that time. If you are unable to attend lecture synchronously, you will be able to watch recorded lectures instead and attend an alternate synchronous course session. All students are also expected to attend a weekly TF-led synchronous section.

General Education 1009

Who Do You Think You Are? The Ethics of Identity (215892)

Jay Harris

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 65

Who are you? We typically answer this question with a name and a collection of identity terms. Our identities may be ascribed or chosen; we often experience them as simply given, and we sometimes struggle against them. We use these identity categories, in turn, to structure decisions, negotiate relationships, and otherwise shape our lives. Our identity groups seem to make ethical claims on us, and we refer to them in making claims on one another. Yet the ways we conceptualize our identities may change over the course of our lives, and the identity concepts available to us may be more historically and culturally contingent than we recognize. In this course, we will take a step back from the ways we habitually think of identity. Using the tools of multiple disciplines — including art, philosophy, literature, religion, history and sociology — we will deepen our understanding of what identity is and what role it plays in our lives.

We will begin by confronting ethical questions that arise at the level of the individual, and then expand to
questions that arise for social groups, and finally, to questions that arise for institutions:

• How should each of us negotiate between identities that prioritize different values? What role should our identities play in the task of crafting a life and sense of self?

• What claims, if any, can groups organized around identity make on individuals? (“You are one of us, so show some solidarity with our struggle.”) What claims, if any, can individuals make on identity groups? (“This group ought to be more inclusive to people like me.”) What is to be done when groups hold views about identity that are helpful to some but cause injury to others, both within groups and outside groups? (“We can't accept you and still be true to who we are.”)

• When, if ever, should institutions organize individuals into identity categories and relate to them through these categories? (Is it ethically appropriate to use identity categories to institutionalize affirmative action? The census? Scientific research on race and sex? The very idea of a nation-state?)

Through this course, students will learn to analyze the ways identities impact human lives, relationships, and structures. The purpose of the course is not to try to answer questions about personal identity, social identity, or identity politics once and for all, but to have a rich and open discussion of the issues, and help shape a richer, and more nuanced private and public deliberations on identity and ethics beyond the classroom.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out no later than 11:59 p.m. that day. Visit the Spring 2021 Gen Ed web page for more information and step-by-step instructions.

General Education 1011

Contemporary Developing Countries: Entrepreneurial Solutions to Intractable Problems (107464)
*Satchit Balsari
Tarun Khanna

2020 Fall (4 Credits)

Instructor Permissions: None

Schedule: TBD

Enrollment Cap: n/a

What problems do developing countries face, and how can individuals contribute to solutions rather than waiting the largesse of the state or other actors? Intractable problems – such as lack of access to education and healthcare, forced reliance on contaminated food, deep-seated corruption – are part of the
quotidian existence of the vast majority of five of the world's seven billion people. Developing societies suffer from what we refer to as 'institutional voids' that make organized activities of all sorts difficult; think of the mundane but important physical infrastructure that allows us to get to work or school in the developed world, as well as our access to higher-order institutions such as the availability of information at our fingertips or the security of the rule of law. The course demonstrates that reflecting upon the nature of the developing world’s intractable problems through different lenses helps characterize candidate interventions to address them. The scientist’s hypothesis-driven and iterative experimentation, the artist’s imagined counterfactuals through putting oneself in others' shoes literally and theatrically, and the planner’s top-down articulation of boundary conditions, all tailor the ultimate solution.

Class Notes: This course's live lectures are scheduled for 3-4:15 p.m. Eastern time Mondays and Wednesdays, and students are encouraged to attend at that time. If you are unable to attend lecture synchronously, you will be able to watch recorded lectures instead and attend an alternate synchronous course session. All students are also expected to attend a weekly TF-led synchronous section.

General Education 1012
The Art and Politics of Propaganda: The Nazis and Their Legacy (108580)

Eric Rentschler
2020 Fall (4 Credits)

Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

As thinking beings we consider the limits of human potential and wonder what is the worst. The Nazis obsess us because they were masters of extremity who brought to the world unprecedented violence, destruction, and murder. They were also masters of propaganda who engineered sophisticated techniques of mass manipulation; in this endeavor cinema and modern media assumed a seminal role. This course considers why films proved to be so essential to the Hitler regime and so captivating to German audiences of the Third Reich. It also reflects on the continuing allure of Nazi sights and sounds for contemporary mass culture.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Ancestry: Where Do We Come from and Why Do We Care? (203820)
Maya Jasanoff
2021 Spring (4 Credits) Schedule: MW 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a

Everyone comes from somewhere. We carry our ancestries in our DNA, genealogy, family stories, and more. What do these forms of evidence tell us about who we are, as a species, as a social group, or as an individual? This course looks at ancestry from a range of perspectives: biology, anthropology, genealogy, history, law, and memory—from the origins of human populations to the origins of you. Whether or not you are coming into this course with a prior interest in genealogy or family history, you will leave it with a sharper sense of the role played by ancestry in the terms we routinely use to describe ourselves—as well as in policies and practices shaping everything from citizenship law to college admissions. We will pay close attention to different kinds of evidence—particularly genetic and genealogical—the kinds of questions they answer or raise, and what happens when they collide. We will also explore in depth the implications of genetic ancestry testing for concepts of race, ethnicity, and nationality. By its end, the course should make you better able to uncover implicit assumptions in qualitative and quantitative data alike, and to assess a claim's value and scope. Most of all, it will prompt you to reconsider your ideas about ancestry, lineage, and inheritance, and enrich how you think about identity in your life outside the classroom and after this semester, at Harvard and beyond.

Class Notes: This course’s live lectures are scheduled for noon-1:15 p.m. M/W, and students are encouraged to attend at that time. If you are unable to attend lecture synchronously, you will be able to watch recorded lectures instead and attend an alternate synchronous course session. All students are also expected to attend a weekly TF-led synchronous section.

Ethics of Climate Change (205079)
Lucas Stanczyk
2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a
How should governments respond to the problem of climate change? What should happen to the level of greenhouse gas emissions and how quickly? How much can the present generation be expected to sacrifice to improve conditions for future generations? How should the costs of mitigation and adaptation be apportioned between countries? Should significant funds be allocated to the study of geo-engineering? We will consider these and other questions in an effort to understand our responsibilities in respect of climate change, with a special focus on the structure of the analytical frameworks that have been dominant among policymakers.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

The aim of this course is to place human beings in a universal and planetary context. You will learn where we come from beginning with the Big Bang and ending with modern human civilization and our relationship to the planet from which we have evolved and on which we depend. You will understand the factual evidence for the Big Bang, the origin of the elements, plate tectonics, evolution and climate change. From this story a process of planetary evolution emerges and we will consider whether this process is likely to be common or a unique accident. Earth history has been punctuated by a series of revolutions where the planet molts to a new level of functioning. Viewed in this context, human civilization is the latest molting of the planet, giving Earth the possibility of a conscious presence to itself and in the galaxy. Are we as human beings an agent of planetary evolution, or instead a parasite or cancer to planetary systems? This question provides a novel perspective on current environmental problems and how we might deal with them, and moves the question from technology to personal philosophy and behavior. It also casts a different light on the likelihood of alien civilizations and whether we need to fear them. Climate change is seen in a much broader perspective of the relationship between people and Earth, and how our personal behavior is not trivial, but central. Readings include the book How to Build a Habitable Planet, short recorded lectures to deliver the scientific content, and discussion sessions each week to address any difficulties and explore the broader implications for human beings of what we are learning. At the end of this course, you will have a greater understanding of the past, present, and future of the planet we call home, and the planetary consequences of your life decisions.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1024

Scientific Critical Thinking (217834)

Ned Hall
Douglas Finkbeiner
We humans have developed rational and systematic methods for solving problems, ways carefully designed to chart a reliable path to the truth. Yet we as individuals, as groups, as whole societies fail to take full advantage of these methods. This course aims to equip you to do better, by helping you explore what it means to approach a question "scientifically."

What skills – and more importantly, habits of mind – does this approach require of you as an individual (especially an individual who needs to work in collaboration with other individuals)? What does successful scientific inquiry require of a community – both the community undertaking the inquiry, and the larger society of which it is part? Here you will find the tools to start answering such questions for yourself. You will learn to spot widespread and stubborn errors in reasoning that we humans easily fall prey to, along with techniques for avoiding them. You will uncover some of the fundamental assumptions (about the world we inhabit, and about our access to that world) that science must proceed from, and thereby become more sophisticated about what science can teach us and what it can't. By engaging with these foundational aspects of scientific inquiry, you will come to understand more fully what it means to adopt a critical scientific mindset, and how to do so for yourself. And you will thereby end up in a much better position to assess how communal scientific inquiry does and should guide decision making in a democratic society such as ours.

Class Notes: You are expected to attend live lecture synchronously thrice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1027

Human Evolution and Human Health (112339)

Daniel Lieberman

2021 Spring (4 Credits) Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: None Enrollment Cap: n/a

How and why did humans evolve to be the way we are, and what are the implications of our evolved anatomy and physiology for human health in a post-industrial world? Why do we get sick, and how can we use principles of evolution to improve health and wellbeing? To address these questions, this course reviews the major transitions that occurred in human evolution, from the divergence of the ape and human lineages to the origins of modern humans. Also considered are the many effects of recent cultural and technological shifts such as agriculture and industrialization on human health.
You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

What is Life? From Quarks to Consciousness (126148)

Andrew Berry
Logan McCarty

2020 Fall (4 Credits) Schedule: MWF 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 75

This course views life through multiple lenses. Quantum physics involves uncertainty and randomness, and yet paradoxically it explains the stability of molecules, such as DNA, that encode information and are critical to life. Thermodynamics is about the universe's ever increasing disorder, and yet living systems remain ordered and intact. This course will examine how these physical laws underpin life and how life itself has diversified since originating 3.5 billion years ago.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend live lecture synchronously three times weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Philosophers and politicians alike struggle to set the terms for living a good life in a world of conflict. Rulers seek guidance from their counselors, and philosophers have often dreamed of wielding real-world influence. Reading a series of masterpieces of philosophical thought and literary expression, we will examine some striking cases of relations between the pursuit of wisdom and the pursuit of power, from the extremes of conflict (the executions of Socrates, Han Fei, Jesus, Sir Thomas More) to the opposite dream of the philosopher king. How do seekers of wisdom speak truth to power? How do rulers understand their ethical responsibilities toward their often fractious subjects? How do rulers and subjects alike weigh the competing demands of liberty and order, self-fulfillment and self-restraint? Moving from ancient to modern examples, this course will see how the insights and methods of Plato, Machiavelli, Shakespeare, and Hannah Arendt can be useful in working through contemporary conundrums of wisdom and power, amid the heated rhetoric of this recent fall’s election contests.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

How do you navigate our increasingly automated culture? In this course, we will use the theme of primitive navigation to open our eyes to the physical world in a direct and palpable manner. Basic principles include human cognition of physical and mental maps, dead reckoning, direction finding from nature. The course includes the basics of astronomy, including planetary orbits, meteorology, thermodynamics, bird behavior, electromagnetic radiation, optics, waves, tides, ocean currents, and fluid dynamics. Navigational practices of Pacific Islanders, Norse, medieval Arabs, and early western Europeans provide a focus. Main themes of
the course will include automation bias, spatial cognition as a template for other forms of cognition, and reasoning when there is no 'right' answer. Some facility with algebra and trigonometry is useful. A series of hands-on projects are employed to understand navigational practices discussed in lecture.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. General Education 1032

Res Publica: A History of Representative Government (120049)

Daniel Carpenter

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

"A republic, if you can keep it." So did Benjamin Franklin characterize his hopes for American government. What did Franklin and others mean by republic, and why did he and so many others worry that it might be something hard to hold onto? This course will give you the theoretical basis and historical evolution of republics so that you can understand the American system of a democratic republic, now spread widely around the planet even as it is considered under threat. You will read Hamilton alongside Jefferson, Machiavelli alongside Montesquieu, and Angelina Grimké alongside Frederick Douglass. You will consider systems of governance in Republican Rome, medieval Europe, early modern England and France, Native American nations and the United States. The thinkers and founders you will read thought long and hard what freedom is, how to balance executive and legislative power, and why republics and democracies can be unstable. As a democratic republic, the United States places great faith in the capacity of voters to choose their rulers, who in turn make most of our policies. Is this faith misplaced? What is the role for virtue in a republic, and what is virtue? How does inequality undermine republican stability, and what might be done about it?

Screen reader support enabled.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences.

Conflict Resolution in a Divided World (107669)

Daniel Shapiro

2020 Fall (4 Credits)  
SCHEDULE: M 0300 PM - 0545 PM

Instructor Permissions: Instructor  
Enrollment Cap: 96

How should we understand conflict in our own lives and in the world around us? At all levels of society, people tend to approach conflict as an adversarial battle—communities polarize, ethnopolitical groups clash, and nations and international institutions face daily political tensions. To prepare you for a lifetime of civic engagement, this course empowers you with new pathways for examining enduring questions about the roots of conflict and interdisciplinary approaches for resolving it. We will explore rational, emotional, and identity-based perspectives on conflict resolution and connect these aspects to your own life challenges and to conflicts ranging from on-campus divisions to large-scale political disputes. Because conflict resolution often involves tough decisions and moral dilemmas, we also will examine models for understanding its broader sociopolitical and ethical dimensions. The hope is that, by the end of this course, you will have a deeper understanding of conflict resolution and will be better equipped to navigate its many contours to advance the vision of a more peaceful world.

We live in a moment of rapid changes in the ways we communicate. As our writing becomes ever more digital—and paradoxically both more ephemeral and more durable—the attitudes and tools we have for preserving our culture seem more complex and fluid. This course studies how written language—text—travels through time and across media. We will ask: how good are texts for capturing, transmitting, and preserving human experience? How have texts come down to us from the distant past? How do we ensure that what we write today will survive into the future? As we investigate contemporary approaches to cultural preservation, we will consider how pre-modern European cultures transmitted and transformed texts, and created institutions that we still rely on today, including museums, libraries, and archives. Each week you will observe or apply methods of preservation, restoration, destruction, translation, and transmission in an attempt to preserve a personal artifact. We will also read works of literature that reflect on questions of durability, ephemerality, and written memory. Students will work through weekly assignments toward a final project focused on studying, curating, and preserving a textual source of their choice.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. General Education 1036

Global Feminisms (212848)

Durba Mitra
Feminism shapes the world we live in today. Debates about women's and sexual rights define almost every public debate today -- from sexual harassment, to electoral politics, to development, public health, human rights, and political protest. But when, and where, did ideas of women's equal rights and liberation emerge? This course digs into the deep history of feminism from a global perspective. It traces the intimate relationship between feminism, colonialism, and racism in case studies from America, Europe, Asia, Africa, and the Middle East, from the eighteenth century until today. We will immerse ourselves in rare materials on transnational and global feminisms in digital archives and use the tools of feminist thought to critically engage concepts like decolonization and decarceration. Over the course of the semester, you will build a toolkit of critical thinking and writing skills by engaging diverse primary sources, including political writings of women of color and colonized women, short stories, posters, movies, and human rights reports. You will come away from the course having a deeper understanding of ideas of equality and justice that define politics today.

Readings will highlight marginalized authors, women writers, especially women of color authors, from previously enslaved women in the US South to indigenous people to colonized women in India and Africa. Reading assignments will focus on primary historical sources and encompass diverse genres, from political thought and speeches to fantasy fiction and posters.

Students will build critical skills through assignments that build source analysis skills over the course of the semester, including a feminist mixtape, a short reflective response to online archives, and a final creative project.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Facing the edifice of preexisting knowledge, how are breakthrough scientific discoveries made that contradict the existing canon? Twelve great experiments that have transformed our understanding of nature will guide us, first through immersion in the scholarship and popular beliefs of the time. Next, how did the discoverer prepare? What were the motivations, prior experiences, and training that led to the threshold of a fruitful advance? Then, to the degree possible, we will carry out the exact same investigations, building our own simple equipment from scratch, duplicating the challenges of wresting patterns from noisy and incomplete data. Students will compare their results to both private and published versions of the original research. The course will examine the magnitude of the cognitive shifts experienced and the often uphill battle to acceptance. We will build an understanding of the nature of scientific progress, examining how the mastery of natural phenomena leads to new technologies and how these can contribute to further scientific discovery.

Experiments are drawn from the natural sciences, ancient to modern, from Eratosthenes measuring the earth's size to Rosalind Franklin determining the structure of DNA. We will consider how these discoveries continue to impact society, as well as the many ethical questions raised. The course will examine the difficulty of accepting new experimental evidence falsifying accepted scientific paradigms and how this remains an issue that plays out in current society. By unpacking these 12 experiments, students will be able to better prepare for their own future discoveries and contributions.

General Education 1038

Sleep (212896)

Charles Czeisler

Frank Scheer

2020 Fall (4 Credits)  
Schedule: TR 1030 AM - 1145 AM  
Instructor Permissions: None  
Enrollment Cap: n/a  

What is sleep? Why do we sleep? Why don't we sleep? How much sleep do you need? What are circadian rhythms? How do technology and culture impact sleep? This course will explore the role of sleep and
circadian timing in maintaining health, improving performance and enhancing safety. We will evaluate the causes and consequences of the epidemic of sleep disorders and deficiency in our society, with particular attention to impacts on brain (learning and memory, mood and cognition) and body (appetite and metabolism, hormones and heart) functions. Personal and public policy approaches to issues such as drowsy students, drowsy drivers and drowsy doctors will be addressed.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

Class Notes: GENED 1038 will not be accepting any new students after Monday, September 21 prior to the 5th Monday deadline.

General Education 1039
Higher Education: Students, Institutions, and Controversies (212844)

Manja Klemencic

2021 Spring (4 Credits) Schedule: MW 0130 PM - 0245 PM
Instructor Permissions: Instructor Enrollment Cap: 75

Though we may think of universities and colleges as centers of learning and research, they too are subject of teaching and burgeoning research. This course explores contemporary higher education institutions and their students through a number of different perspectives and approaches. We identify major issues and controversies in higher education – how students learn, unequal access, the rise of corporate universities, changing funding models for higher education, politics of higher education, and more. We will read what leading scholars from the interdisciplinary field of higher education studies have written about these and other issues. Through personal reflection and insights from guest speakers from Harvard administration, we will look behind the scenes at Harvard student experiences. We will also seek to understand the workings of different types of higher education institutions, conducting field visits to universities and colleges in the Boston area. The centerpiece of this course is a capstone project that involves original research --theoretical or empirical or applied-- on a chosen higher education topic. The capstone research projects will be showcased on an online platform open to the Harvard community to inform and inspire practice and future research. This is an opportunity to gain perspectives on established and emerging areas of higher education research, insights into today’s changing higher education landscape, and the tools to address higher education issues. As student researchers you will develop agency to voice, critically examine and propose solutions to higher education issues you care about at Harvard and beyond.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out no later than 11:59 p.m. that day. Visit the Spring 2021 Gen Ed webpage for more information and step-by-step instructions.

General Education 1042
Anime as Global Popular Culture (125611)

Tomiko Yoda

2020 Fall (4 Credits) Schedule: TR 0430 PM - 0545 PM
In this course, students will learn to engage Japanese or Japanese-style animation (sometimes known as anime) through two-pronged approaches. First, the students will learn to evaluate the aesthetic and socio-cultural relevance of anime in relation to the criteria and perspectives developed through the study of more established artistic forms such literature, cinema and visual arts. We will cover topics including, anime's generic conventions, formal aesthetic, and narrative motifs. Secondly, students will learn to address the cultural value of anime in manners that recognize the specificity of its media ecology, encompassing the modes of production, distribution, and consumption. In particular, we will pay close attention to the ways media technology, industrial production of anime, marketing, and fan culture are integral facets of anime eco-system. In this sense, we will study anime as a node in the global network, involving diverse commercial as well as non-commercial medias such as graphic novels, live-action films, video games, character merchandises, and fanzines and other fan practices. The course as a whole suggests that we need to work between these two approaches in order to understand anime as a medium of global popular culture today.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. Deep History (205088)

*Matt Liebmann*

*Daniel Smail*

2021 Spring (4 Credits)  

**Schedule:**  
MW 0300 PM - 0415 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

When does history begin? To judge by the typical history textbook, the answer is straightforward: six thousand years ago. So what about the tens of thousands of years of human existence described by archaeology and related disciplines? Is that history too? This introduction to human history offers a framework for joining the entirety of the human past, from the long ago to the present day, in a single narrative that stretches across many disciplines. We will explore a series of interrelated themes each of which invites questions that travel across time and space. The material presented through lectures,
discussions, and activities will not only guide students through a collaborative exploration of human experience, but will also encourage them to contemplate how such experiences mirror and contrast with their own. To help anchor ourselves in the timeline of past and present, we will engage with the world-class collection of artifacts in Harvard's museums, giving students a unique, hands-on opportunity to experience human history through material remains. Course notes: No prior college-level course in archaeology, history, or a related field is required or assumed, and First-year students are welcome. Because the course touches on ideas in many disciplines beyond history and archaeology, including art, economics, human evolutionary biology, psychology, and religion, we welcome a range of students who can bring unique perspectives and expertise to class discussion.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Evolving Morality: From Primordial Soup to Superintelligent Machines (203129)

*Joshua Greene*

2021 Spring (4 Credits)  

**Schedule:**  
MW 0130 PM - 0245 PM  

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

In this course we'll examine the evolution of morality on Earth, from its origins in the biology of unthinking organisms, through the psychology of intelligent primates, and into a future inhabited by machines that may be more intelligent and better organized than humans. First, we ask: What is morality? Many people believe that morality descends from above, as divine commands or as abstract, timeless principles akin to mathematical truths. Here we take an empirical approach to morality, viewing it as a natural phenomenon that rises up from below—born of the strategic interactions among lifeforms and societies struggling to exist. Next, we take a scientifically informed look at the foundational questions of moral and political philosophy. Many people believe that the "is" of scientific knowledge has nothing to do with the fundamental "oughts" of morality, that science and morality exist in separate realms (and belong in separate courses). Here we challenge this assumption, asking whether our scientific self-knowledge can, and should, change our views about what's right and wrong and how a society should be organized. Finally, we consider the distinctive moral challenges posed by what may be the next stage in Earth's evolutionary history: the rise of artificial intelligence. Many people believe that there is and always will be a fundamental division between human minds and machines. Here we challenge this assumption, going beyond the tropes of science fiction and drawing instead on the latest advances in cognitive neuroscience and neurally inspired artificial intelligence. Our conclusions will have implications for moral challenges of the near and more distant future: Can self-driving cars, military drones, and life-like robots be programmed to behave morally? Will artificial intelligence displace human labor? If so, how can our societies adapt? Could machines displace humans entirely? If so, how can we stay in control? If machines do take over, will they be our conquerors or our children? Across diverse topics, this course explores the implications of a single idea: that the wonder we see around us, and ahead of us, is the product of competition and
cooperation at increasing levels of complexity.

Course Notes: Not open to students who have taken PSY 2250. Prior to Spring 2019, this course was offered as PSY 1002.

Class Notes: You are expected to attend class synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Requirements: Anti-requisite: Cannot be taken for credit if PSY 1002 already completed

General Education 1051

Reclaiming Argument: Logic as a Force for Good (112199)

Ned Hall

2020 Fall (4 Credits) Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: Instructor Enrollment Cap: 12

Our lives are awash in argument and persuasion. This course aims to teach you how to manage argument and persuasion in your own life – not just with skill, but ethically. Accordingly, we will have two main goals. The first is to develop your skill at recognizing the myriad ways in which language can be used and misused as a tool for persuasion, by teaching you a variety of techniques drawn from formal logic, linguistics, and the discipline of argument-mapping. Master this skill, and anytime someone attempts to persuade you of something, you will be able to understand the structure of their attempt so deeply that you need not fear manipulation, but can decide for yourself whether you wish to sign on to the conclusion they want you to reach. Our second goal is even more important: we hope to show you how you can – and why you should – construct your own arguments with such clarity, honesty, and logical transparency that the people you direct them to will be optimally placed to decide, for themselves, whether and why they ought to agree with you. In this way, you will come to see argument not primarily as a contest to be won or lost, but as something that should be reclaimed for a more noble purpose: building genuine understanding between people, even across profound differences of viewpoint.

Class Notes: This course has five separate times for instructor-led sessions each week. Students should enroll in only one of these; each has a separate listing in the course catalog. Additionally, you thereby commit to attending a TF-led section at the same time on the corresponding weekday. Please see the course Canvas site for more information and a detailed schedule.

General Education 1052

Race in a Polarized America (116248)

Jennifer Hochschild

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

How do we manage issues of race, ethnicity, and immigration in a polarized political era? What role did race play in the election of President Trump, after eight years of the presidency of Barack Obama? How can we be good citizens of the world when Americans have such mixed views and take such mixed actions in engaging with racial hierarchy, identity, or interaction?

This course addresses these questions by examining policy disputes around issues such as incarceration and policing, free speech, the role of biology in ancestry and medical care, electoral politics, activism, and movement across borders. We will examine class, nationality, and gender differences within and across groups, and how group boundaries are made stronger or weaker. We will consider how to reduce unproductive polarization, and how you -- the new generation of citizens of the world -- can promote a better America even, or especially, when we do not agree on just what "better" entails.

Course readings range from public speeches and interviews to works in political science, sociology, economics, and a bit of genomic science. You will learn how and where the United States has progressed in promoting group equality and fairness, as well as where it has not or has even moved backwards. You will end the course with a deeper understanding of the core American paradox of the persistence of group hierarchy in a country dedicated to democracy, equality, and liberty, and what people such as yourselves can do to resolve that paradox.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

The Global Heart Disease Epidemic: Stopping What We Started (215875)

Richard Lee

2020 Fall (4 Credits) Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 50

Heart diseases have killed occasional humans since ancient times, but only in the past century have heart diseases become epidemic throughout the world. In fact, the first description of a heart attack in a human was not until 1912. In the current century, heart diseases will be the leading global cause of death, and the majority of those heart disease deaths will actually occur in the developing world. The epidemic of heart disease has been driven by many social, economic and technological events. Some of these events have been dramatically detrimental to human health, such as the accidental invention of the American cigarette by a slave in North Carolina in the 19th Century—an invention that is projected to kill one billion people between 2000 and 2100. Other events, such as advances in public health and safety, have been beneficial by extending lifespan and preventing early death, but they have also allowed age-related heart diseases to explode. Technological advances have improved our economic productivity but also led to changes in our lifestyles that promote heart diseases. In this course, we will consider the complex relationship of health and society by examining the epidemic in common heart diseases. We will explore how major lifestyle factors such as tobacco, alcohol, exercise and diet affect health, and we will also consider how economics and politics powerfully influence health. We will also discuss the role of government and our obligations to each other, and to future generations.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. General Education 1054

Political Economy and Its Future (126203)

Dani Rodrik
Roberto Mangabeira Unger

2021 Spring (4 Credits)  Schedule:  M 0930 AM - 1130 AM
Instructor Permissions:  None  Enrollment Cap:  n/a

The world’s economic and political order reels under mounting challenges: the global financial crisis, the austerity debacle, a slowdown in economic growth and productivity, the aggravation of inequality and the inadequacy of conventional responses to it, the discrediting of the Washington Consensus, the globalization backlash, the re-emergence of nationalist politics in Europe and the United States, and a contest over the meaning, value, and requirements of democracy. We examine connections among these phenomena and explore alternative ways of thinking about contemporary market economies and their reconstruction. We organize the course around four related themes: the worldwide financial and economic crisis of the recent past and its management; the effort to promote socially inclusive economic growth in richer as well as in poorer countries; the nature, fate, and dissemination of the new knowledge-intensive style of production; and the past, present, and future of globalization.

Course Notes:  Students should have some previous acquaintance with economics but no advanced economic training is required.

Class Notes:  You are expected to attend live lecture synchronously once weekly at the time listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1056

Human Nature (202992)

Erin Hecht
Martin Surbeck

2020 Fall (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  100

This course asks: What makes us behaviorally and psychologically human? In what ways are humans similar to other species and in what ways are we different? What are the evolutionary origins of the behavioral and psychological features found across human societies including parental love, sibling rivalry, pair-bonding, incest aversion, social status, war, norms, altruism, religion, language, and cooking? At the same time, how can we account for the immense diversity we observe in behavior and psychology across time and across societies? Tackling these questions within a broad evolutionary framework, the course will draw on the latest insights and evidence from evolutionary biology, primatology,
anthropological ethnography, neuroscience, genetics, linguistics, economics and psychology. We'll fully contextualize contemporary behavior by examining studies of non-human primates, especially chimpanzees, and a broad breadth of human variation, based on comparative studies of hunter-gatherers, herders, agriculturalists and—the most unusual of all—people from industrialized societies. We'll also consider how cultural evolution has shaped our genetic evolution, both over our species' deep history and in more recent millennia. Along the way, we'll consider how understanding the evolutionary origins of human behavior, psychology and culture informs how we approach contemporary issues such as patriarchy, polygamous marriage, sex differences, child abuse, mating preferences, homosexuality, racism, psychological variation among populations and the use of oral contraceptives.

Class Notes: This course's live lectures are scheduled for 10:30-11:45 a.m. Eastern time Mondays and Wednesdays. If you are unable to attend lecture synchronously, you will be able attend an alternate synchronous course session involving a group viewing and discussion of the recorded lecture. All students are expected to participate in: (1) either live lectures or scheduled asynchronous group viewings of live lectures; (2) a weekly synchronous TF-led section; (3) regular small working group meetings of 4-5 students; and (4) asynchronous Slack discussions.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Requirements: Course open to Undergraduate Students Only

General Education 1063

World Health: Challenges and Opportunities (126193)

Sue J. Goldie

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 135

Extraordinary changes in the world present both risks and opportunities to health—unprecedented interconnections across borders, rapidly shifting global demographics, and changing patterns of diseases and injuries. This course will challenge your assumptions about the world's populations, as you discover surprising similarities and unexpected differences between and within countries. Approaching the concept of health as a fundamental prerequisite for building strong societies, we will explore its connection to
human rights, international relations, and sustainable development. Using case examples of contemporary health challenges, we explore the influence of social, political, and environmental determinants on health, particularly transnational risks associated with globalization. We consider solutions from an array of perspectives, contributions from within and outside the health sector, and interventions at the local, national and global levels. By the end of the course, you will be equipped to thoughtfully analyze important health challenges and appreciate how evidence is contextualized and translated to policy and action.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline. Please note that this course will incorporate a blend of carefully curated asynchronous and synchronous components, and some weeks will have synchronous lecture only once per week. Each week you will be expected to complete all asynchronous content as well as attend any scheduled live lecture and section, a combined total of approximately 4 hours per week.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out no later than 11:59 p.m. that day. Visit the Spring 2021 Gen Ed webpage for more information and step-by-step instructions.

General Education 1064

Brains, Identity, and Moral Agency (109360)

Steven Hyman

2021 Spring (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

Advances in brain science have the potential to diminish many forms of human suffering and disability that are rooted in disordered brain function. But what are the ethical implications involved in altering the structure and function of human brains? What’s at stake when we have the ability to alter a person’s narrative identity, create brain-computer interfaces, and manipulate social and moral emotion? In this
course, you will ask and attempt to answer these questions, and discuss the implications of mechanistic explanations of decision-making and action for widely-held concepts of moral agency and legal culpability. This course will prepare you to be a thoughtful citizen of a world characterized by rapidly emerging understandings of human brain function, and by new technologies intended to repair or influence human brains.

Course Notes: For students who have taken MCB 80, it is contemplated that there will be a section that incorporates more advanced concepts from neurobiology.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Recommended Prep: LPS A or LS 1a, a 4 or 5 on the AP Biology exam, or equivalent experience in biology

General Education 1067

Creativity (215890)

David Atherton

2021 Spring (4 Credits)

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

Geniuses are said to possess it. Self-help books offer to teach it. Both the arts and the sciences celebrate it. It sits at the heart of some of our oldest myths and is the subject of up-to-the-minute neuroscientific research. Some say it comes in momentary flashes; others call it a way of life. Some identify it as the key to deep fulfillment; others claim that it entails intense suffering. Many agree that it sets us apart as a species—but does it? What is creativity? How have humans made sense of it across centuries and cultures, and what role might it play in our lives today? Exploring creativity takes us into the very question of what makes us human, and the answers we discover can help equip us for the lives we will lead beyond the classroom. This course casts a wide net, crossing disciplines as it takes us from ancient treatises on the art of poetic composition to modern brain scans, and from centuries-old debates over intellectual property to present-day questions of artificial intelligence. Is creativity the same as originality? Can plagiarism be creative? Should one own the fruits of one's creative labor? What happens in the brain at moments of creative insight? Can creativity be "hacked"? We will hear directly from practicing artists and experts as we explore these questions through regular, small-stakes creative experiments and a creative final project. By course's end, you will have a deeper sense of where creativity belongs in your own life—and of how you might share what you have discovered with others.
The United States and China (217632)

William Kirby

2021 Spring (4 Credits)  
Schedule: R 1030 AM - 1145 AM

Instructor Permissions: Instructor  
Enrollment Cap: 96

The United States and China are global economic and military powers. They have a rich history of commerce, friendship, alliance, and antagonism. Both countries have been shaped and re-shaped by the nature of their mutual relations. Their relationship is in crisis, the outcome of which will do much to define the world of the 21st century.

This University-wide course invites undergraduates and graduate students to examine together the present and future of U.S.-China relations in the light of their past. What are the enduring patterns and issues in China's relations with the United States? How have these two countries perceived each other over time? How has trade defined the relationship from the Opium War to Huawei? How has war shaped experiences in the United States and China, and what are the risks of military confrontation today? What are the prospects for cooperation on global crises such as climate change? What is the role of American and Chinese universities, such as Harvard and Tsinghua, in shaping mutual relations in a time of global pandemic?

The course emphasizes active, participant-centered discussions of major issues, texts, and contemporary events, and will engage with Harvard Business School cases, experts on the U.S.-China relationship, and the rich resources of Harvard's schools and the Harvard Center Shanghai. In their final project, students, working in groups, will address a central challenge in the Chinese-American relationship and propose a solution.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out no later than 11:59 p.m. that day. Visit the Spring 2021 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend class synchronously weekly at the time listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.
Life as a Planetary Phenomenon (120881)

Dimitar Sasselov

2021 Spring (4 Credits)  
**Schedule:** TR 1200 PM - 0115 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

What is it about Earth that enables life to thrive? This question was reinvigorated with the 2016 groundbreaking discovery of a habitable planet around the nearest star, Proxima Centauri. A decade of exploration confirmed that such planets are common in our galaxy, and the commonality of habitable planets has raised anew some age-old questions: Where do we come from? What is it to be human? Where are we going? Are we alone in the universe? And last, but not least, what are the dangers of becoming a multi-planet species? Life and planets are intricately linked through geological processes, chemistry, and ultimately, biology, all of which you will explore in this course as we endeavor to answer questions about our place on this planet and beyond. You will gain knowledge of some natural sciences fundamentals while exploring current issues in biotechnology and space exploration technology. This course aims to equip you with both a conceptual understanding of Earth and its place in the universe as well as the quantitative reasoning to think critically about it. Hands-on experiences are central to accomplishing these objectives.

**Class Notes:** You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

This course explores Africa's religious and spiritual heritage on the continent in precolonial, colonial, and postcolonial periods. We begin by examining the main principles of African religious traditions, considering how they have changed and adapted to current situations today. We investigate the historical and contemporary relevance of indigenous traditions with attention to: cosmology, cosmogony, mythology, ritual practices, divination, healing ceremonies, and sacred kingship within both rural and urban African life. We expound how spirituality defines and influences other cultural and social practices, such as statecraft (chiefs, kings, diviners as guidance of tradition); the environment (climate change and environmental degradation); health (traditional healing rites and new religious movements' approach to healing); women, gender, and social justice; music and the arts; and questions of human rights as well as ethnic and racial conflicts. The course additionally explores how African indigenous religion has responded to Islam and Christianity on the continent, resulting in what we often call "Africa's Triple Heritage." It subsequently examines African religious sensibilities in the contemporary period, briefly considering how African religions are portrayed in popular culture (with such films as Black Panther) as they relate to issues of modernity and community relations. Finally, while we examine the movement of African religion to the so-called "New World," we look at the status of African spirituality as a global tradition and its role in the creation of new immigrant identities in Europe and the Americas.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. General Education 1073

Guns in the U.S.: A Love Story (212845)

Caroline Light

2021 Spring (4 Credits)  Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: Instructor  Enrollment Cap: 60

The U.S. comprises 5% of the world's population but holds approximately 40% of the world's guns. We also
experience more gun-related deaths than any economically comparable nation. How did the nation become a "gun culture," and whose rights and interests does widespread armament serve? Who is included in the Second Amendment’s appeal to "the right of the people to have and bear arms," and how have notions of race, gender, class, and sexuality framed popular understandings of "good guys" and "good women" whose armed citizenship is required for the nation's security? We'll read analyses from public health, history, literary/cultural studies, political science, and gender/ethnic studies to help unpack collective assumptions and historical blindspots about the purposes and effects of contemporary gun ownership.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out no later than 11:59 p.m. that day. The Ancient Greek Hero (113501)

Gregory Nagy

2020 Fall (4 Credits)

Schedule: M 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

How to face death? Concentrating on this central human question, we will explore some of the greatest works of ancient Greek literature (in English translation). For the Greeks, a special way to address the problem of death was to think long and hard about what they called heroes in their myths. Our purpose in this course is to extend that kind of thinking to the present. Assignments invite you to engage in personal reflections on the meaning of life and death in the light of what we read in Greek literature about the ordeals of becoming a hero.

Class Notes: This course meets for live plenary sessions at noon Mondays and 10:30 a.m. Tuesdays (Eastern time) each week. Students are encouraged to watch one or both of the plenary sessions live, but if they are unable to do so, they will have opportunities to watch them at another time.
Any students who do not attend a plenary session live will have alternate synchronous activities arranged; additionally, all students will attend one TF-led synchronous section meeting per week. Students will participate as a highly prepared member of a panel for at least one plenary session per term.

Equity and Excellence in K12 American Schools (107341)

**Katherine K. Merseth**

**Jacob Fay**

2020 Fall (4 Credits)

**Schedule:** MW 0900 AM - 1015 AM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 80

Each year, between September and June some 52 million students attend public schools in America. But why? Why do we have K-12 schools in America? What is their purpose? What do we expect schools to accomplish? Headlines decrying the failed state of our nation’s schools and clarion calls for the improved quality and reach of American schooling in the 21st century are commonplace. Against this backdrop, the course grapples with questions that have defined American K-12 education throughout history. What constitutes educational excellence? Is it realistic or naïve to strive for both equity and excellence for all students? Who are we educating and how important are student identities to schooling outcomes? Given that educators, families, politicians, and the courts often disagree vehemently about the answers to these
questions, the course explores these debates and considers who and what will define the future of American K-12 education and its role in society.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

Inevitably, at some point in our lives, most of us will develop a health condition that requires medical treatment and care. We also, regardless of our career, are likely to be called on to provide care for individuals (loved ones and/or patients) whose health conditions make it impossible for them to care for themselves. Moreover, as COVID-19 has made glaringly apparent, economic, racial, social, and other inequalities mean many members of society are especially vulnerable to serious health conditions. How can we be effective partners in care, both in our personal lives and, for those in the health professions, in our professional lives? How can we best prepare ourselves to be effective care partners, whether we are the givers of care, the receivers of care, or both? What should our short-term and long-term goals be as individuals, communities, and societies, and how can we best implement these goals? As healthcare costs soar and considerable suffering from disease and illness continues despite regular advances in medical technology, what should we advocate for in our communities, our societies, our nations, and beyond to ameliorate if not eradicate racism, sexism, classism, ableism, ageism, ethnocentrism/jingoism, heterosexism, and similar and frequently intersecting forms of oppression, easing the burden of disease and illness on caregivers and care recipients alike? This course provides the ideal space for you to examine, contemplate, discuss, and debate these and similar fundamental questions, which all of us increasingly must face. Class discussions, readings, and written assignments will provide you with the tools to become more effective advocates for and providers of compassionate, empathic care, both now and in the future. Engaging with a diverse range of fiction, drama, creative non-fiction, life writing, and memoirs from five continents by physicians, patients (including physician-patients), activists, and other concerned individuals, the course challenges many fundamental preconceptions regarding disease, illness, health, and care. This course helps us interrogate what it means to promote healing and wellbeing in our personal and professional lives particularly in the current COVID era.

Class Notes: Every week, students in Gen Ed 1078 are expected to participate in 2 hours and 15 minutes of synchronous (live) class via Zoom. This will consist of participation in 1) either a 75-minute synchronous lecture or a 75-minute live peer learning session as well as 2) a 1-hour live section with a TF.

This course’s live lectures are scheduled for 3-4:15 pm Eastern time Mondays and Wednesdays, BUT, students are only required to attend one live lecture every other week; the attendance schedule will be determined the first week of class. Moreover, the MW 3-4:15 time is flexible, and if student time zones require it, the professor will hold every other Wednesday’s live lecture at a different time.

Students must attend the live lectures to which they’re assigned, but they’re also welcome to attend as many additional live lectures as
they’d like. All lectures will be recorded, and students are responsible for watching the recordings of lectures they do not attend synchronously. Weeks where students do not attend a live lecture, they are required to attend a synchronous peer-learning session.

Every week, all students will also attend a required synchronous section with their TF; section times will be determined based on student preferences.

**Why is There No Cure for Health? (125932)**

*David Cutler*

2020 Fall (4 Credits)  

**Schedule:**  

MW 1200 PM - 0115 PM

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

Around the world, billions of dollars are spent on health care treatments, public health initiatives, and pharmaceutical research and development. So why are we still not able to prevent preventable diseases, provide affordable healthcare for millions of people, and deliver cures for curable diseases? And what are the best ways to address these issues?

Because these questions are so large, we will focus our discussion around questions like: What steps should be taken to address epidemics? How should the United States reform its health care system? And how should prescription drugs be produced and sold?

We will explore how social scientists address empirical questions, the types of data that are available, how those data are analyzed, and the confidence with which causal statements are made. By the end of the course, you will be able to dissect a large question—such as how to reform American healthcare—into its technological, social, economic, and moral components, and weigh potential solutions according to these guiding vectors.

**Class Notes:** You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

How does Shazam know what song is playing? Why do some rooms have better acoustics than others? How and why do singers harmonize? Do high-end musical instruments sound better than cheap ones? How do electronic synthesizers work? What processes are common in designing a device and composing a piece of music? How is music stored and manipulated in a digital form? This class explores these and related themes in an accessible way for all concentrators, regardless of technical background. The class is driven by hands-on projects to enhance your technical literacy, a critical skill for anyone designing solutions to today's most pressing and complex issues. The projects are designed so that the creativity of students in all fields will have a role to play. Lectures, demonstrations, and guest lecturers/performers are integrated into the class to build foundational knowledge and to inspire. We will also explore wider social and historical themes related to music and acoustics. The class is approached from an engineering perspective, using music and musical instruments as the framework to introduce a broad array of concepts in physics, mathematics, and engineering. Requires no previous exposure to physics or calculus beyond the high school level.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

General Education 1082

Elements of Rhetoric: Persuasive Writing & Public Speaking (124923)

James Engell

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 50

Rhetorical theory, originating with Aristotle, in contemporary applications. The nature of rhetoric in modern culture; practical examples drawn from American history and literature 1765 to the present; written exercises and attention to public speaking; the history and educational importance of rhetoric in the West; stresses theory and practice as inseparable.

Course Notes: This course may not be taken pass/fail.

Class Notes: You are expected to attend live class synchronously twice weekly. Students are also expected to view pre-recorded lecture segments prior to the Tu/Th classes, which will then be devoted to discussion, examples, and practice based on those segments and the readings.
Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out no later than 11:59 p.m. that day. Visit the Spring 2021 Gen Ed web page for more information and step-by-step instructions.

General Education 1084
The First Nine Months (212874)

David Haig

2021 Spring (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

What makes a human? A baby develops from a single cell during the nine months of gestation, but the process that begins so simply has complications that stretch beyond the womb into questions of human identity and individuality. This course will explore the process of embryonic and fetal development, highlighting complicated questions such as the medical dilemma of maternal-fetal conflict, which occurs when doctors must evaluate the competing health needs of both fetus and mother. You will study disorders of pregnancy such as gestational diabetes and preeclampsia, as well as types of nonstandard fetal development, like monozygotic twins or microchimerism, that result in human diversity. The course will also consider the kinds of families made possible by ovum donation, sperm donation, surrogate pregnancies, and the like, as well as the questions of bioethics raised by such assistive reproductive technologies.

Class Notes: You are expected to attend lecture (either synchronously or by watching the lecture recording) twice per week. You are also expected to attend a weekly TF-led synchronous section meeting at the time you have been assigned. Contact the course Head TF for questions.

General Education 1089

The Border: Race, Politics, and Health in Modern Mexico (204416)

Gabriela Soto Laveaga

2021 Spring (4 Credits)  Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None  Enrollment Cap: n/a

Why does the Mexico-U.S. border continue to be a space for debate and controversy? This course examines how the creation of the U.S.-Mexico border in 1848 shaped modern Mexican society from the nineteenth century to our present. For many, the border served (and serves) as a protective barrier from poverty, violence, and, especially, disease. By the early twentieth century many Mexican bodies were perceived as "alien," "illegal," and in need of patrolling. Yet these descriptions were also used by Mexican politicians to describe and isolate groups such as Indigenous and Chinese within Mexico. By examining, for example, Mexican public health campaigns, response to epidemics, and how Mexican ideas of race and health played out within Mexico we can better understand the U.S.-Mexico border today.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1091

Classical Chinese Ethical and Political Theory (121778)

Michael J. Puett

2020 Fall (4 Credits)  Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None  Enrollment Cap: n/a

What is the best way to live a fuller and more ethical life? Concretely what should we do to begin to live in a more flourishing and inspiring way? Questions such as these were at the heart of philosophical debates in China. The answers that classical Chinese thinkers developed in response to these questions are among the most powerful in human history. Regardless of whether one agrees with them or not, they should be studied and taken seriously by anyone who cares about ethics, politics, and the ways to live life more fully.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.
General Education 1092

American Society and Public Policy (119025)

Theda Skocpol
Mary Waters

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

In a period of contentious politics, Americans are debating fundamental issues about economic wellbeing and social justice. How can the nation expand opportunity and security for workers and families following years of rising socioeconomic inequalities and shifts in the relationship of families to work? How do we regulate immigration and citizenship and cope with surges in refugees and asylum seekers? How have ongoing partisan polarization and rising economic inequalities influenced U.S. responses to the current COVID-19 pandemic and the accompanying economic crisis? Controversies in these areas are bitter and persistent, and this course will introduce students to the ways the United States has dealt with each of set of challenges.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1093

Anne Becker
Paul Farmer
Salmaan Keshavjee
Arthur Kleinman

2020 Fall (4 Credits) Schedule: TR 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a
If you are sick or hurt, whether you live or die depends not only on biological factors, but social ones: who you are and where you are, what sort of healthcare system is available to help you survive, and what kind of care is available to help you recover, if society believes you deserve it. The global coronavirus pandemic illustrates with dramatic urgency the role social forces play in patterning health inequities and determining individual fates. The vulnerabilities of those most likely to get sick and to die from Covid-19 stem from the ongoing effects of systemic racism on racialized subjects, the devaluation of eldercare and precarity of low-paid work under neoliberal forms of governance, and enduring material effects of colonial-era power structures that render health care systems dangerously weak or inaccessible for many communities. Now, as ever, it is imperative to develop frameworks and methodologies to identify and to intervene effectively in harmful social configurations that cause illness and suffering.

Most medical research narrowly focuses on the biological basis of disease, but this course takes a novel biosocial approach to reveal how governments, institutions, and histories shape health and well-being, how poverty and racism get into someone’s lymph nodes, how cost-saving measures manifest as tuberculosis in someone’s lungs. In doing so, the course challenges conventional assumptions within the field of global health—examining how interventions influence what happens after a catastrophe in unexpected ways, how the persistence of health inequalities over centuries can be explained, how the structures of powerful institutions influence the policies they develop, how the poor deserve not only health care but high quality health care, and how caregiving and global health are urgent moral practices.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1094

Confronting Climate Change: A Foundation in Science, Technology and Policy (126633)

_Daniel Schrag_

2020 Fall (4 Credits)  
**Schedule:** MW 0130 PM - 0245 PM

_Instructor Permissions:_ None  
**Enrollment Cap:** n/a

This course will consider the challenge of climate change and what to do about it. Students will be introduced to the basic science of climate change, including the radiation budget of the Earth, the carbon cycle, and the physics and chemistry of the oceans and atmosphere. We will look at reconstructions of climate change through Earth history to provide a context for thinking about present and future changes. We will take a critical look at climate models used to predict climate change in the future, and discuss their strengths and weaknesses, evaluating which forecasts of climate change impacts are robust, and which are more speculative. We will spend particular time discussing sea level rise and extreme weather (including hurricanes, heat waves, and floods). We will look at the complex interactions between climate and human
society, including climate impacts on agriculture and the relationship between climate change, migration and conflict. We will also discuss strategies for adapting to climate change impacts, and the implications of those strategies for sub-national and international equity.

The last half of the class will consider what to do about climate change. First, we will review the recent history of greenhouse gas emissions, as well as various national and international efforts to limit them in the future. We will discuss reducing carbon emissions using forestry, agriculture and land use, and then focus on how to transform the world's energy system to eliminate CO2 emissions. We will conclude by examining different strategies for accelerating changes in our energy systems to limit greenhouse gas emissions.

The course is intended as a foundational course on climate change for students from around the university, preparing them for more specialized courses in their individual concentrations or degree programs. No prerequisites are required; students will be encouraged to apply their different preparations and interests to the various individual and group assignments. The course emphasizes the scientific and technological aspects of climate change (including the clean energy transition), but in the context of current issues in public policy, business, design and public health.

Class Notes: GENED 1094 is a University Course, which means that students from all Harvard schools are able to enroll. While graduate students will be separated from undergraduates in sections, all students will learn together in other ways and benefit from each other’s perspectives.

General Education 1095

Is War Inevitable? (214413)

Derek Penslar

2021 Spring (4 Credits)

Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap: 84

What is war, and why has it been nearly constant throughout history? Why do wars start, how can they be stopped, and what can be done to prevent them? This course seeks to answer these questions. It ranges from antiquity to the present, with an emphasis on the last 300 years.

Beginning with the socio-biological roots of human aggression and altruism, the course focuses on selected wars as case studies of different types of conflict. We distinguish wars fought within and between states, within a single region or spread across the globe. We compare wars fought to advance or crush revolutions and those that spread colonial power or liberate a colonized people. We examine wars' effects on fighters and non-combatants, the role of morale in sustaining wars once undertaken, and the possibilities for post-war reconciliation between adversaries. We measure the effectiveness of international humanitarian law, organizations like the League of Nations and United Nations, and anti-war protest movements. We employ a historical lens to understand the United States' recent disputes with foreign powers and bouts of domestic strife, which raise the possibility of inter-state and/or civil war.
By studying why wars start, what it takes to end them, and what measures have worked better than others to restrain or prevent conflict, we will better understand ourselves, our societies, our current crisis, and the prospects for humanity’s future.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out no later than 11:59 p.m. that day. Tradition, Performance, and Culture (125216)

Joseph Nagy

2021 Spring (4 Credits) Schedule: MW 0300 PM - 0415 PM
Instructor Permissions: None Enrollment Cap: n/a

What is culture, and how does it shape us? This class explores how folklore (a broad term meant to include all aspects of tradition, custom, and heritage) and its expressive manifestations shape national, regional, and ethnic identities. In particular, we examine the function of folklore within the communities that have, perform and use these cultural goods, as well as the ways traditions are expressed and performed in daily life. In this course, you will study major forms of folklore (e.g., myths, legends, beliefs, rituals, festivals), as well as the theoretical approaches (e.g., performance theory, the ethnography of communication) used to interpret cultural documents drawn from the world of traditional expression and ritualized behavior.
Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Natural Disasters (112430)

Brendan Meade

2020 Fall (4 Credits) Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 120

From Mexico to India, San Francisco to Tokyo, natural disasters have shaped both the surface of our planet and the development of civilizations. These catastrophes claim thousands of lives and cause tens of billions of dollars in damage each year, and the impact of natural disasters is only increasing as a result of human population growth and urbanization. This course uses the methods and skills associated with earth science to help you to develop an understanding of both the causes and impacts of these events. Readings will be assigned from the textbook *Natural Disasters* by Patrick Abbott (11th edition), to deliver the scientific content - recorded lectures will be available throughout the course, and live lectures and discussion sessions will be held each week to address any difficulties with the material, to facilitate discussion, and to provide an opportunity for interacting with fellow students and the teaching staff. By the end of this course, you will be able to understand the ways in which societies can systematically anticipate and prepare for the kinds of natural disasters which many people have come to assume are inevitable.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Pyramid Schemes: What Can Ancient Egyptian Civilization Teach Us? (126641)

Peter Manuelian

2021 Spring (4 Credits) Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: 50

How much of your impression of the ancient world was put there by Hollywood, music videos, or orientalist musings out of the West? How accurate are these depictions? Does it matter? This course examines the quintessential example of the "exotic, mysterious ancient world" – Ancient Egypt – to interrogate these questions. Who has "used" ancient Egypt as a construct, and to what purpose? Did you know that pyramids, mummies, King Tut, and Cleopatra represent just the (overhyped) tip of a very rich civilization that holds plenty of life lessons for today? Combine the ancient Egyptians' explanations of the world's natural forces with all the social complexity of human interaction and you have a fully formed society—about four millennia of accumulated experience! Can investigating the "real" ancient Egypt unpack our current misconceptions about the land of the pharaohs? Hardly morose, tomb-building "zombies," the Egyptians embraced life in all its messy details. Piety and corruption, imperialism and isolationism, divinity and mortality all played significant roles in life along the Nile. What can we learn about the nature of politics and society in our time by seeing the parallels between the ancient past and today? We will explore archaeology, modern Egyptomania, repatriation, new digital visualization technologies, and international politics. What was ancient Egyptian racism? What is modern archaeological racism? Who owns the past? Who needs it? We will take excursions into Egyptian art, history, politics, religion, literature and language (hieroglyphs), plus the evolution of Egyptology as a discipline. (Most likely virtual) field trips to the Museum of Fine Arts, Boston, the Peabody Museum, and the Harvard Museum of the Ancient Near East (formerly Harvard Semitic Museum) are included, along with the famous Giza Pyramids in 3D. Students will gain a transformative appreciation for the outstanding monuments and intellectual traditions of ancient Egypt. And with newly broadened horizons, we will debunk many popular myths.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out no later than 11:59 p.m. that day. General Education 1102

Making Change When Change is Hard: the Law, Politics, and Policy of Social Change (212858)

Cass Sunstein
Samantha Power

2020 Fall (4 Credits)  Schedule:  MW 1200 PM - 0115 PM
Instructor Permissions:  Instructor  Enrollment Cap:  300

How does change happen? When, why, and how do people, and whole nations, come together to influence large-scale policies and actions on issues like the environment, equality, criminal justice? Why do revolutions occur? This course will try to answer these questions, and do so by exploring a diversity of efforts related to societal change. In an effort to draw general lessons for those interested in making change, we will assess a range of political and legal approaches; examine mass movements and the leadership by organizations, governments, and individuals; and attempt to gauge outcomes. Using research from psychology, political science, and economics, and focusing on case studies, the course will explore the ideas behind several arguments: 1) big problems are rarely resolved with comparably big solutions, but instead are better met with small acts of reform; 2) coalition-building among strange bedfellows is usually indispensable; 3) agents of change fare best when they look to measure their impact and never lose sight of the real world results they seek, rather than the expressive highs along the way; 4) informational "cascades" are possible and critical, as people follow one another; and 5) group polarization can be both desirable and dangerous, as groups become more heated and more extreme.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Food and cooking are part of your everyday life. Whether you are a skilled chef or a home-cook, what you do in the kitchen is deeply rooted in science. This class brings together top chefs and Harvard scientists to explore how everyday cooking and haute cuisine can illuminate basic principles in physics and chemistry. Throughout the semester you will watch as chefs reveal the secrets behind some of their most famous culinary creations. Inspired by such cooking mastery, we will then explore the science behind the recipes. Students will gain a solid understanding of the properties and fundamental behaviors of soft matter materials. All food is made of soft materials, and cooking relies on many of their fundamental properties. Topics will include: emulsions, illustrated by aioli; elasticity, exemplified by the done-ness of a steak; and diffusion, revealed by the phenomenon of spherification, the culinary technique pioneered by Ferran Adria. The course includes laboratory work where students develop their skills as experimental scientists. Other assignments include weekly homeworks, in-class exercises, and a final project where students explore the science of a culinary topic of their choosing.

Course Notes: Occasionally there will be an optional 15-30 minute question and answer session with visiting chefs.

Class Notes: This class holds live lecture from 3-4:15 p.m. Eastern time Tuesdays/Thursdays. If you cannot attend Tuesdays at 3 p.m., you may attend a 9:15 a.m. Wednesday morning session instead. If you cannot attend Thursdays from 3-4:15 p.m., you may attend Thursday morning from 9-10:15 a.m. instead. In addition to two hours of live lecture per week, you will be expected to attend a synchronous, TF-led section.

General Education 1105

Can We Know Our Past? (112378)

Matt Liebmann
Jason Ur

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

What happened in the past? How do you know? Even though today we take great pains to document every major event that occurs, more than 99% of human history is not written down. How, then, can we determine
with any certainty what people did, let alone thought about, hundreds, thousands, and even millions of years ago? This course addresses these and other fundamental questions: Can we ever really know what happened in the past? If the past is "dead and gone," how do we know what we (think we) know about it? And what is our degree of certainty about the past societies and cultures that historians, archaeologists and others study today? Through hands-on interaction with artifacts, experiments and other analytical methods you will consider how these approaches relate to different "stakeholders" – groups of people whose understanding of themselves is rooted in a connection to history. By the end of this course, you will have a sense of how your knowledge of the seemingly-distant past is, in fact, intimately tied to your experiences in the contemporary world.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

Ecology & Equity (122012)
Ajantha Subramanian
2021 Spring (4 Credits)

Schedule: TR 0900 AM - 1015 AM
Instructor Permissions: None
Enrollment Cap: n/a

This course examines the historical, social, and political life of nature in its many manifestations—as a source of life and livelihood, as a resource for exploitation, as a heritage to be protected, and as a post-industrial hybrid—in order to understand the variety of human interactions with the natural environment. Through a focus on property relations, imperialism, development, and science, students will be exposed to the intimate connection between social inequality and ecological degradation, and encouraged to envision possibilities for a future of greater equality and sustainability.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1110
Classical Mythology: Myth in Antiquity and Today (126004)

Brigitte Libby

2021 Spring (4 Credits)   Schedule: TR 1030 AM - 1145 AM
Instructor Permissions: None   Enrollment Cap: n/a

The myths of ancient Greece and Rome embody both our worst nightmares and our most fabulous fantasies. Heroism, happy endings, and everlasting love blend with disturbing themes of parricide, cannibalism, incest, misogyny, and unthinkable violence. The resulting stories have fascinated generations of artists, writers, and thinkers, and this course will serve as an introduction to this distant but strangely familiar world. We will move from the very first works of Greek literature through the classic Greek tragedies and the Roman tales in Ovid's Metamorphoses. Along the way, we will ask these fundamental questions: What is "mythology"? What can these ancient stories tell us about ourselves as human-beings, and why are they still so resonant thousands of years later? And how does mythology both ancient and modern continue to reflect and shape our world view today? We will use examples from classical mythology to see how a society can re-remember and revise traditional stories to fit changing cultural circumstances and political ideologies. Our discussions will consider ancient rationalizations of myth, psychoanalytic approaches to myth, the use of myth in politics, and the reception of classical myth in the modern world.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1112
Prediction: The Past and Present of the Future (212919)

Alyssa Goodman

2021 Spring (4 Credits)   Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: Instructor   Enrollment Cap: 50

Human beings are the only creatures in the animal kingdom properly defined as worriers. We are the only ones who expend tremendous amounts of time, energy, and resources trying (sometimes obsessively) to understand our futures before they happen. While the innate ability of individual people to predict has not changed much in the past few millennia, developments in mathematical and conceptual models have inordinately improved predictive systems. These systems have integrated comparisons to past results and quantified how "certain" we can be about various aspects of the future -- processes that were, in many
cases, inconceivable at one point in the past. This course is a coordinated investigation of the history and future of prediction, beginning with Ancient Mesopotamians reading signs in sheep entrails and ending with modern computer simulations for climate, health, wealth, and the fate of our Universe. In this class, you will design your own predictive systems to critically engage with assumptions about how the world works and situate your explorations in a study of how motivations and techniques for divining the future have changed—and not changed—throughout human history.

**Course Notes:** For more information, please see the Prediction Project website at http://predictionx.org.

**Class Notes:** You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

**Class Notes:** This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out no later than 11:59 p.m. that day. Visit the [Spring 2021 Gen Ed webpage](http://predictionx.org) for more information and step-by-step instructions.

### General Education 1115

**Human Trafficking, Slavery and Abolition in the Modern World (214486)**

*Orlando Patterson*

**2021 Spring (4 Credits)**

**Schedule:** TR 1200 PM - 0115 PM

**Instructor Permissions:** None

**Enrollment Cap:** n/a

We often think of slavery as being a dark chapter in our past, but this is a tragic oversimplification. What defines slavery in the modern world, and what are the moral, political and social implications of its continued existence? As we explore its underpinnings, we discover that all of us may be in some way complicit in its survival. This course surveys the nature, types and extent of modern servitude such as transnational and domestic prostitution, forced marriage, labor trafficking and forced domestic labor, child soldiering and other forms of enslavement of children, organ trafficking and other health aspects of trafficking, debt-bondage, and the forced exploitation of other vulnerable groups such as refugees and stateless persons. Throughout the course, but especially in the final part, we examine anti-trafficking and anti-slavery measures and movements and ways in which you can increase awareness or become involved. You will, by the end of our exploration, be able to trace the moral and ethical arguments surrounding human slavery in its various forms, understand the ways in which this problem still affects so many people,
and what can and should be done about it.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1117

Nature (109030)

Joyce Chaplin

2021 Spring (4 Credits)

Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 50

So, the good news is that we're already using ethics to define how we can and should do the right thing in relation to the natural world. In fact, all ethics in the western tradition have used "nature" and "natural" as foundational definitions—we're more than halfway there! But, obviously, we need to be conscious that we're using those definitions and we must decide which of them to correct or reject. (Ethics from western philosophy have an outsized place in global debates over policy and science, for instance, but should this continue to be the case?)

And we'll need to be more disciplined in how or when we use these ethical definitions, in a calm and rational way, even during panic-inducing states of emergency, such as the climate crisis. (Or a pandemic.) This class is designed to give you, as a human being with rights and as a global citizen with obligations, an intellectual, verbal, and ethical toolkit for dealing with the debates over imperiled natural resources and competing human needs that have become urgent. To learn to do that, you'll read classic texts in western ethics, analyze recent statements on the human-nature interface to see how those ethics continue to be used, and write some ethical statements of your own.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Class Notes: This course has an enrollment cap, so to be considered, you must
General Education 1120

The Political Economy of Globalization (107821)

Robert Lawrence
Lawrence H. Summers

2020 Fall (4 Credits) Schedule: R 0900 AM - 1015 AM

Instructor Permissions: None Enrollment Cap: n/a

Why is populism becoming pervasive - and is there a revolt against global integration? What is the right balance between national sovereignty and international integration? Is the US equipped to sustain its role as a global leader? How does international trade affect prosperity and inequality? Should we regulate multinational companies who move their factories to countries with lower labor standards? How should the IMF respond to financial crises in Europe and the developing world? How will the rise of China change the world system? This course uses basic economic logic to illuminate the choices - and trade-offs - faced by governments, international institutions, businesses and citizens as the global economy evolves. Our course is based on the premise that passion without careful reason is dangerous and that reliance on solid analytics and rigorous empirical evidence will lead to a better world. Policy issues are debated in class by the professors and guest speakers, and students will participate in simulated negotiations on Brexit and on the US-China economic relationship, experiencing the issues first hand, as well as illustrating the importance of decisions made by individual actors for the evolution of the global system.

Class Notes: All students are expected to attend Thursday lecture and a TF-led synchronous section each week. A second set of course materials will be available to view asynchronously.

What do universities owe society? Since their origins in medieval Europe, universities have been granted special privileges because they have been understood to contribute to the social welfare. Do these privileges incur corresponding obligations on universities? Should they influence how universities educate their students or create, share and preserve knowledge or conduct their internal affairs? Given that universities have a significant impact on society, what principles should guide their activities to ensure that they serve the public good? While universities have been expected to serve society, they also espouse values, such as academic freedom, institutional autonomy and neutrality, that some see as antithetical to social engagement. The image of the ivory tower, remote and removed from society, captures this vision of the university. As a result, there has been a tension about how universities can both serve society and remain true to these core values. This course examines how questions about universities' social responsibilities have been debated over the past century in the context of American higher education. We examine specific cases related to students' education, partnerships with other social institutions, and the use of university policies for social change. Students will be asked to use the specific cases to think through the broader normative questions about the universities' role in society.

Class Notes: If a group of students want to take the course but cannot attend the designated lecture times because of time zone differences, the instructor is willing to make accommodations. If this option interests you, please email natalie_solomon@gse.harvard.edu and include your location and the time range (in EST) that you would be able to attend alternative course sessions.

Today’s news headlines consistently point to the role that religion plays in the political life of Middle Eastern societies. But do these headlines tell the whole story? This course will challenge simplistic explanations of the dominant role of Islam in Middle Eastern politics by putting it in historical perspective. You will explore the genealogy of some of the most important debates about the role of religion in politics: the extent of Middle Eastern states’ involvement in religion, the place of religious minorities, whether religious norms should infringe on individual freedoms, and the various political theologies at play in Islamist opposition movements, in liberal conceptions of religion, and in state religious interpretations. At the crux of these vigorous debates is the issue of the meaning of a “Muslim state,” an issue that has shaped vibrant discussions and deep political disagreements that you will discover through textual and historical analysis of primary sources. Understanding who were the men and women who participated in these debates over the modern history of the Middle East, what they argued for and against, and the context in which they made their claims will provide you with the historical and textual perspective to make sense of the news headlines about religion and politics in the Middle East.

Course Notes: Sections offered in English or Arabic.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. General Education 1125

Artificial & Natural Intelligence (215896)

Venkatesh Murthy

2021 Spring (4 Credits) Schedule: MWF 0430 PM - 0545 PM
Instructor Permissions: None Enrollment Cap: n/a
What is intelligence? An inquiry into the nature of intelligence can take different forms – philosophical, biological, mathematical or technological. In this course, we will use machine intelligence (everything from voice recognizing smartphones to game-playing computers) as a handle to think about natural intelligence (brains and behavior of animals). Although we will start with big, general questions, we will quickly move to concrete queries about brains and computers. This approach, rather than just starting with brains of animals, may be useful in framing more universal questions independent of the specific architecture of brains of animals. As machines increasingly perform tasks that were once thought to be solely in the domain of humans, there is an urgent need for discussions of the moral and societal implications of artificial intelligence. This course targets students interested in brains and computers in equal measure, are comfortable discussing ethical concerns.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

### General Education 1128

The Conduct of Life in Western and Eastern Philosophy (122544)

*Roberto Mangabeira Unger*

*Cornel West*

2021 Spring (4 Credits) Schedule: R 0930 AM - 1130 AM

Instructor Permissions: None Enrollment Cap: n/a

A study of approaches in the philosophical traditions of the West and the East to the conduct of life. Philosophical ethics has often been understood as meta-ethics: the development of a method of moral inquiry or justification. Here we focus instead on what philosophy has to tell us about the first-order question: How should we live our lives?

Course Notes: No prerequisites other than a willingness to consider a wide range of problems and materials. Extended take-home examination.

Offered jointly with the Law School as 2392 and the Divinity School as 2313.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.
General Education 1130

Power to the People: Black Power, Radical Feminism, and Gay Liberation (108482)

*Michael Bronski*

2020 Fall (4 Credits)  
**Schedule:** TR 0130 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 50

An introduction to the radical American social change movements of the 1960s and 70s. We will examine the specific historical conditions that allowed each of these movements to develop, the interconnections and contradictions among them, and why their political power faded, only to reemerge in new manifestations today. Along with historical analysis, we will examine primary source materials, manifestos, autobiographies, and media coverage from the period, as well as relevant films, music, and fiction. The class will be a mixture of lecture and discussion. Midterm and final assignments will include options for engaged scholarship with community engagement projects.

**Class Notes:** This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the [Fall 2020 Gen Ed web page](#) for more information and step-by-step instructions.

**Class Notes:** You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Loss is an inevitable fact of human existence. Small losses most of us learn to bear with equanimity. But enormous, wrenching, life-changing losses open voids in our lives for which we can never feel adequately prepared, even if we can see them coming. This course tries to understand the nature of loss on a physical and emotional level, to give us some framework for coping with it and to help us develop some empathy in those very difficult situations when someone else has faced a loss and we do not know how to react. Our main focus will be upon the loss of someone "close" to us, through either death or a personality-changing accident or illness ("close" is in quotation marks, because some of these losses may be of public figures whom we have never met personally, but whose loss makes an impact on our entire society). We will compare this form of loss with others, such as loss of country through exile or forced migration and loss of part of oneself through amputation. Our approach will be threefold: we will try to understand the physiological and psychological effects of loss; we will study the rituals that different societies have evolved to mark loss and memorialize the lost; and we will analyze textual, artistic, and musical expressions of loss, chiefly "great works," but also some more humble attempts to record the emotional rupture that loss entails. We will work on a broad canvas, both spatially and chronologically, looking at personal testimonies as various as Cicero's reactions to the death of his adult daughter; the diary of the nineteenth-century Japanese poet, Kobayashi Issa, charting his father's last days; two great twentieth-century authors, C. S. Lewis and Joan Didion, writing about the loss of their life partners; and many others. We will encounter tombstones with simple inscriptions commemorating the death of family pets from the Roman world and set these in the context of scientific research on the human-animal bond, as manifested by both humans and animals reaching the end of their life. We will study prayers for the dead in the major faith traditions, and visit (virtually) the Rothko Chapel in Houston, Texas, to consider the therapeutic effects of the somber walls of its octagonal interior. We will listen to two Requiem Masses, one religious and one secular. We will examine mourning rituals in the Shona culture of Zimbabwe, to see how pre-colonial beliefs and practices have become melded with the religious practices of the colonizers. By the end of the course, which will have ranged far beyond these few examples, we will have gained a deeper understanding of the effects of loss on us both individually and collectively, and of the rituals and therapies that different societies have developed over time to mark and memorialize it.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

Loss is an inevitable fact of human existence. Small losses most of us learn to bear with equanimity. But enormous, wrenching, life-changing losses open voids in our lives for which we can never feel adequately prepared, even if we can see them coming. This course tries to understand the nature of loss on a physical and emotional level, to give us some framework for coping with it and to help us develop some empathy in those very difficult situations when someone else has faced a loss and we do not know how to react. Our main focus will be upon the loss of someone "close" to us, through either death or a personality-changing accident or illness ("close" is in quotation marks, because some of these losses may be of public figures whom we have never met personally, but whose loss makes an impact on our entire society). We will compare this form of loss with others, such as loss of country through exile or forced migration and loss of part of oneself through amputation. Our approach will be threefold: we will try to understand the physiological and psychological effects of loss; we will study the rituals that different societies have evolved to mark loss and memorialize the lost; and we will analyze textual, artistic, and musical expressions of loss, chiefly "great works," but also some more humble attempts to record the emotional rupture that loss entails. We will work on a broad canvas, both spatially and chronologically, looking at personal testimonies as various as Cicero's reactions to the death of his adult daughter; the diary of the nineteenth-century Japanese poet, Kobayashi Issa, charting his father's last days; two great twentieth-century authors, C. S. Lewis and Joan Didion, writing about the loss of their life partners; and many others. We will encounter tombstones with simple inscriptions commemorating the death of family pets from the Roman world and set these in the context of scientific research on the human-animal bond, as manifested by both humans and animals reaching the end of their life. We will study prayers for the dead in the major faith traditions, and visit (virtually) the Rothko Chapel in Houston, Texas, to consider the therapeutic effects of the somber walls of its octagonal interior. We will listen to two Requiem Masses, one religious and one secular. We will examine mourning rituals in the Shona culture of Zimbabwe, to see how pre-colonial beliefs and practices have become melded with the religious practices of the colonizers. By the end of the course, which will have ranged far beyond these few examples, we will have gained a deeper understanding of the effects of loss on us both individually and collectively, and of the rituals and therapies that different societies have developed over time to mark and memorialize it.

Is the U.S. Civil War Still Being Fought? (128327)

John Stauffer

2021 Spring (4 Credits)  Schedule:  MW 0130 PM - 0245 PM
Instructor Permissions:  None  Enrollment Cap:  n/a
Most of us were taught that the Civil War between the Confederacy and the Union was fought on battlefields chiefly in the American South between the years of 1861-1865. In this narrative, the North won and the South lost. But what if the issues that resulted in such devastating bloodshed were never resolved? What if the war never ended? This course demonstrates the ways in which the United States is still fighting the Civil War, arguably THE defining event in U.S. history. In each class, we connect current events to readings and themes in the course, highlighting how and why the war is still being fought. From Nat Turner's slave rebellion in 1831 to the recent riot (or battle) in Charlottesville, we trace how and why the South was in certain respects the victor, even though the Confederacy was destroyed and the Constitution amended. We explore the different kinds of war—ideological, political, cultural, military, and para-military—that placed the unfreedom of blacks—as slaves, serfs, and prisoners—at the center of larger conflicts over federal versus state and local rule, welfare, globalization, and free trade. We analyze the Civil War in literature, art, politics, photography, prints, film, music, poetry, speeches, and history, while also discovering how these cultural forms worked to shape our memory of the event itself. By the end of the course, we will be able to show how and why contemporary U.S. debates are rooted in this defining narrative, and we will better understand the dilemmas the nation faces today.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Understanding Islam and Contemporary Muslim Societies (108890)

Ali Asani

2021 Spring (4 Credits) Schedule: T 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

People from diverse religious backgrounds are in closer contact with one another than ever before. Yet, without the intellectual tools needed to engage with and understand religious difference, this closer contact often has resulted in misunderstanding and stereotypes. Using Islam as a case study, this course offers a methodology for analyzing and engaging with religious diversity. The course introduces fundamental concepts of Islam and the role that religious ideas and institutions play in Muslim communities around the world. Its main concern is to develop an understanding of the manner in which diverse notions of religious and political authority have influenced Muslim societies politically, socially and culturally. Through specific case studies of countries such as Saudi Arabia, Iran, Turkey, Egypt, Pakistan, and Afghanistan, the course considers the role played by ideologies such as jihad, colonialism, nationalism, secularism, and globalization in shaping the ways in which Muslims interpret and practice their faith today. The course briefly considers the contemporary situation of Muslim minorities in Europe and the United States.

Course Notes: Offered jointly with the Divinity School as 3628.

Class Notes: This course is offering two sessions to accommodate students in
differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

General Education 1136

Power and Civilization: China (142451)

Peter K. Bol

William Kirby

2020 Fall (4 Credits)  Schedule:  R 1030 AM - 1145 AM

Instructor Permissions:  None  Enrollment Cap:  n/a

In China today we see a new country built on the bedrock of an ancient civilization. China's re-emergence as a global economic and political model has deep roots. From Rome to the Romanovs, from Byzantium to the Ottomans, on to the global empires of the West, all the great multiethnic empires of the world have come and gone, while a unitary, multi-national, Chinese empire has endured. The ancient Chinese ideal of a single, unified civilized world has had consequences. It was, and still is, a grand vision: all peoples unified under a single ruler and an integrated social order that finds a place for every person in security and harmony. It created the first centralized bureaucratic state; it institutionalized meritocracy; its economy became the world's greatest market; its philosophies provided models of humane governance; its inventions spread across the globe. And yet in practice it has also been a story of conflict and control, of warring states and competing peoples. We will discuss how the choices China has made in the past bear on the challenges it faces today, when a modern "China model," with ancient roots, competes with the United States for global leadership.

Class Notes:  You are expected to attend the weekly plenary session as well as a TF-led section that meets live via Zoom. Section assignments will be determined after the enrollment deadline.

The Challenge of Human Induced Climate Change: Transitioning to a Post Fossil Fuel Future (120031)

Michael McElroy

2021 Spring (4 Credits)  Schedule:  TR 1200 PM - 0115 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

Human induced climate change has the potential to alter the function of natural ecosystems and the lives of people on a global scale. The prospect lies not in the distant future but is imminent. Our choice is either to act immediately to change the nature of our global energy system (abandon our dependence on fossil fuels) or accept the consequences (included among which are increased incidence of violent storms, fires, floods and droughts, changes in the spatial distribution and properties of critical ecosystems, and rising sea level). The course will be designed to provide students with an understanding of relevant physical, technical and social factors including an historical perspective. In the latter half of the course, the plan will be to engage students in an interactive dialogue on possible responses recognizing explicitly differences in motivations for different constituencies - for developed as distinct from developing economies for example. We plan to explore options for a zero carbon future energy system including the challenges involved in implementing the necessary transition. If we fail to abandon our dependence on fossil fuels - and the time scale over which we must do so to realize even the minimal objectives outlined in the recent Paris climate
accord is as brief as a couple of decades or even less – might we need to explore possibilities for geoengineering, for purposeful intervention in the global climate system? Arguments for and against such options will be discussed and debated. We will expect students to be actively involved in exploring, researching and debating responses to any and all of these interrelated issues.

Course Notes: Students who have taken Science A-52 may not take this course for credit.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Recommended Prep: Students are expected to have a background of high school algebra and trigonometry.

### General Education 1143

Dark Satanic Mills: How the Factory Made Our World (215897)

**Victor Seow**

2021 Spring (4 Credits)  

**Schedule:** TR 0130 PM - 0245 PM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 60  

From spam to smart phones, much of the stuff we consume in our daily lives are factory-made. In the process of producing for our endless needs and wants, the factory has mobilized and motivated some of the latest advances in science and technology, defined and redefined the nature of work, and, through its polluting presence, pushed against the limits of our planetary boundaries. As such, it is implicated in nothing less than the making and unmaking of our modern world. This course examines the rise and transformation of the factory in global history, from cotton spinning mills in eighteenth-century England to robotics manufacturing plants in China today. Along the way, we will explore how innovations such as electrification, the assembly line, and computer numerical control shaped and were shaped by the dynamics between labor and management and by other forces of production.

**Class Notes:** You are expected to attend class synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

**Class Notes:** This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out 11:59 p.m. that day. Visit the Spring 2021 Gen Ed web page for
Global Japanese Cinema introduces some of the masterworks from the rich history of Japanese cinema as a way of exploring the global language of film. Participants will learn how to analyze moving images and the ways they influence us – a basic media literacy that we all need for life in a media-saturated society. Additionally we will learn how culture, in this case moving images, flows across the globe and transforms its meaning in site-specific ways. We will see how Japanese cinema's use of slow motion entered the American gangster film, or how samurai films helped create the Italian "Spaghetti Westerns", and many other examples. How do moving images constantly nudge us into a specific worldview, and how does the global circulation of these media subtly shift those nudges in unexpected ways? What does it mean that we nonetheless share a common media memory despite living in very different parts of the world? Join the course and explore how moving image culture functions in a networked, media saturated world!

Course Notes: Japanese language skills are not required.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

General Education 1148

Moctezuma's Mexico Then and Now: The Past, the Present and Pandemics in North America (112754)

William Fash
David L. Carrasco

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

This course provides students with the opportunity to explore how the study of pre-Hispanic and Colonial Mexican and Latina/o cultures provide vital context for understanding today's changing world. The emphasis is on the mythical and social origins, glory days and political collapse of the Aztec Empire and Maya civilizations as a pivot to the study of the sexual, religious and racial interactions of the Great Encounter between Mesoamerica, Africa, Europe, and the independent nations of Mexico and the United States. The study of the archaeology, artistic media, cosmovision, capital cities, human sacrifice and the religious devotions of ancient Mesoamerica illuminate the Day of the Dead and Virgin of Guadalupe phenomena today. Hands-on work with objects at the Peabody Museum aids in examining new concepts of race, nation and the persistence of Moctezuma's Mexico in Latino identities in the Mexico-US Borderlands. One of the biggest student/museum events at Harvard is the Day of the Dead celebrations at the Peabody Museum, which provides the opportunity for students to work directly with the materiality of the longue
duree of Mexico’s storied history and evocative worldview. The museum objects and sections exercises provide the students with ways to integrate their classroom work to the collections and public program of the museum, plus experience community both locally and across cultural boundaries and physical borders. This course empowers our students to evaluate the ways the U.S. is changing and struggling to define itself in relation to Latin America and especially the migration of peoples, ideas, arts, music, food from and through Mexico.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Shaye Cohen

2021 Spring (4 Credits)  Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None  Enrollment Cap: n/a

The Hebrew Scriptures, what Christians call the “Old Testament” and Jews call the “Bible,” are the basis of both Judaism and Christianity, and stand behind many debates in our contemporary culture wars. In this course we shall survey how this work of literature, through interpretation and re-interpretation, spawned and spawns a wide variety of truths. Implicit themes: What is truth? How do we know it when we see it? Can a text written long ago contain truths for contemporary society?

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

"War is the only proper school for surgeons," the Ancient Greek physician, Hippocrates, is quoted to have said. This saying has been used to show how medicine and war have been thought for millennia to shape each. Medicine has played a major role in situations of political conflict, ever since human societies engaged in war and started elaborating "just war doctrines," that determine how belligerent parties should conduct war, as an attempt to "civilize" war and mitigate its scourges.

Through an investigation of case studies from the modern and contemporary world, this course will examine the role played by medicine in situations of political conflict, as well as the role played by war and humanitarian crises in the history of medical thought and practice. It will explore how medical knowledge and expertise have been deployed in situations of political violence or tumult and will ponder some of the ethical dilemmas faced by medical professionals in those contexts. Covering cases ranging from surgery in the American Civil War to the provision of medical care in the Syrian refugee crisis, some of the themes discussed will include biomedical ethics in armed conflict, torture, trauma, contagion, and medical innovation in conflict contexts.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

The First Folio of Shakespeare's plays was published in 1623, seven years after the playwright's death. A memorial poem by Ben Jonson, included in the book, described Shakespeare, famously, as "not of an age, but for all time." This course will argue that the works of Shakespeare—like all great works of literature—are both "of an age" and "for all time."

What we often call "timelessness" in literature and art is in fact more accurately described as multiple timeliness: the way a work can speak to its moment, whether the moment is that of its conception, its production, or its reception. The plays of Shakespeare, whether they are comedies, histories, tragedies, or romances, have their lives in at least three time periods: the time and place in which they are written (Shakespeare's England during the reigns of Queen Elizabeth and King James), the time and place in which
they are set (medieval Scotland in Macbeth, ancient Rome in Julius Caesar), and the time and place in which they are produced, seen, or read ("now," whether that means nineteenth century England, twenty-first century Cambridge MA, or global Shakespeare today).

Over the centuries since the plays were written, Shakespeare's plays have almost uncannily connected with developments in social and political history and in human character. It is not an exaggeration to say that in some cases Shakespearean characters, scenes, and phrases, have influenced the way subsequent ages have thought about people and politics, and even how they have acted, or reacted, to historical events. Like the eyes in a portrait that are described as following the viewer around the room, the plays of Shakespeare seem always to be trained upon the audience, no matter what the time or place.

This course will discuss Shakespeare’s multiple timeliness and the effect of “timelessness” that is generated by it—and, by extension and analogy (including some analogies within the plays) the way "timeliness" and "timelessness" intersect in the production and consumption of works of art.

Modern Art and Modernity (108950)

Ewa Lajer-Burcharth
Benjamin Buchloh
Maria Gough

2021 Spring (4 Credits)

Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor
Enrollment Cap: 90

What makes art modern? What role has modern art played in the constitution of the modern subject? This course traces art's transformation from tool of aristocratic and ecclesiastical elites into instrument of broad public instruction and civic debate on controversial topics. Spanning roughly three centuries, from the 1730s to the 1980s, the course traces the emergence of art's broader social resonance and responsibility, and the belief in its transformative power, which remains a defining aspect of much modernist and avant-garde art produced across Europe and the Americas.

Anchored by a significant date, each lecture explores the social, political, cultural, and technological conditions of a specific historical moment through the lens of a major artistic event. This enables a demonstration of the ways in which advanced forms of artistic practice have played a fundamental role in the formation of modern culture and society by creating and preserving a space for critical reflection and debate. A wide range of media will be considered, from the traditional fine arts of painting, sculpture, and print-making to photography, photomontage, video, installation, and performance art.

The primary laboratory for our first-hand examination of works of art is the Harvard Art Museums. Our ultimate objective is to establish the relevance of modern art and visual culture—to reveal their potential, in other words—as an indispensable basis for your own engagement and debate with our present historical moment. To this end, we will help you develop and deploy visual and historical literacies, skills that are fundamental to your navigation of the visual sphere today. Such competencies will empower you to make sense of the increasingly visual world in which we live, and, thereby, enable you to play a role in safeguarding for future generations art’s capacity to create a space for human imagination and critical reflection.
Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out no later than 11:59 p.m. that day. Visit the Spring 2021 Gen Ed webpage for more information and step-by-step instructions.

General Education 1158

Water and the Environment (213406)

Kaighin McColl

2021 Spring (4 Credits) Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 50

What do landslides in Brazil, droughts in California, mass migration in Syria and the collapse of Mayan civilization all have in common? Water. This course introduces students to the terrestrial water cycle: how it works, how humans manipulate it, and how it manipulates us. Students will learn about the major components of the terrestrial water cycle, including precipitation, evapotranspiration, runoff and streamflow, and saturated and unsaturated subsurface flow. We will also learn about the causes and consequences of natural hazards associated with the water cycle -- including floods, landslides and droughts -- and examine several case studies, with a focus on human impacts. The course will consider how the water cycle has contributed to the demise of past civilizations, and explore implications for modern society in a warming world.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 19, 2021. The Gen Ed lottery will run Wednesday, January 20, 2021, with approvals and denials sent out no later than 11:59 p.m. that day. Visit the Spring 2021 Gen Ed webpage for more information and step-by-step instructions.
General Education 1159
American Capitalism (125496)
Sven Beckert
2021 Spring (4 Credits)

Schedule: TR 1200 PM - 0115 PM
Instructor Permissions: None
Enrollment Cap: n/a

How did capitalism emerge, expand and transform daily life in North America over the past 500 years? In this course, students will gain an in-depth understanding of how North America turned from a minor outpost of the Atlantic economy into the powerhouse of the world economy, how Americans built a capitalist economy and how that capitalism, in turn, changed every aspect of their lives. In the process, they will come to understand how contemporary capitalism is the result of centuries of human engagement, struggle, and aspirations. Topics range from the structure of Native-American economies to the economic consequences of the Civil War; from the impact of capitalism on gender relations to the changing structures of American businesses; and from the position of the United States in the world economy to the role of the government in channeling economic development. Boston merchants and Georgia sharecroppers, enslaved cotton growers and reforming statesmen, workers at the Ford assembly line and Silicon Valley entrepreneurs will all appear in the story. The course will put particular emphasis on the global context of American economic development and situate it deeply in political and social changes. Ultimately, students will gain an understanding of how the contemporary capitalism that so powerfully shapes all of our lives has emerged over the course of several centuries, and how the tools to understand the history of American capitalism can be applied to understanding our contemporary situation. Assignments in particular will encourage students to think about contemporary problems from historical perspectives.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

Requirements: Anti-req: Cannot be taken for credit if HS B-49 already complete

Additional Course Attributes:
What's a hero? What's a superhero? Who gets to be one, and who decides? Why are superheroes so popular now? What do their stories tell us—casual viewers and devoted readers, fans and non-fans and aspiring writers-- about how power works, about its social, emotional, material and economic dimensions, and about how we represent power in art? This course looks at superheroes, famous and infamous, old and new, in comics, on TV, in movies and novels and poems, as ways to answer questions about how power operates in our society and in others: power and violence, power and persuasion, power and social cohesion, power and disability, power and the sources of the self. You'll read great and not-so-great superhero and superhero-adjacent stories from Gilgamesh to Wolverine, Wonder Woman to Ms. Marvel by way of John Milton. You'll learn how to see the shape of a story, how to consider form style, technique in comics and other media. You'll learn how to look at markets, at states and at the law, at fan communities and fan cultures, at the kinds of power stories and characters exercise in the real world. You'll discover thinkers from politics, psychology, literary studies, and religion, among them Hannah Arendt, Max Weber, and Rosmarie Garland-Thomson, with something to say about power. You might even create some superheroes yourself. This course will show you not just how to read a set of very complicated, often underrated, influential modern stories, but how to think about power in public, in fiction, and in everyday life: who decides how others live, who decides what's normal, who gets to make, and who gets to break, the rules.

Class Notes: This course is offering two sessions to accommodate students in differing time zones, so it appears in the catalog twice. Please register for the one pair of lecture times that you will attend synchronously. Each week, you will be expected to attend synchronously these lecture sessions and a TF-led section that will be scheduled after enrollment.

General Education 1166

Pluralism: Case Studies in American Diversity (118775)

Diana Eck

2020 Fall (4 Credits) Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: Instructor Enrollment Cap: 50

Who do we mean when we say "we?" How does a society deal with religious, ethical, and cultural diversity? What challenges do we face as people of different communities encounter one another in cities and public institutions, schools and businesses, neighborhoods and families? These are urgent questions in many nations today, but in this course we focus on the United States. We explore, discuss, and analyze the changing multi-cultural and multi-religious landscape of America with an eye to the growing Muslim, Buddhist, Hindu, and Sikh communities in the most recent period of post-1965 immigration. In what contexts do these and other minority communities encounter America's secularity, its commitment to religious freedom, and its long-dominant Christian and Jewish communities? Our approach will be through the study and in-class discussion of case-studies enabling you to enter into some of the controversies and dilemmas that confront schools, universities, town councils, zoning boards, and places of work. You will be...
challenged to take the perspective of mayors and concerned citizens, teachers and executives, religious and civic leaders—all confronting the choices and changes of a dynamic society. You will inevitably consider your own perspective on the issues we engage. You will gain a deeper understanding of the religious complexity of America and a new sense of the challenges confronting "we the people."

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1167

Climate Crossroads (215873)

James Engell
James Anderson

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 75

What one thing is changing everything in your lifetime—and for generations to come? It's changing what you eat; it's changing buildings you live in; and it's changing politics, the arts, and finance. The change is accelerating. This course reveals fundamental alterations that climate disruption is bringing to multiple human activities and natural phenomena.

The course represents a crossroads in two senses. First, it's a crossroads of disciplines. Climate change affects science, society, culture, government policy, biodiversity, and environmental justice. To understand it is inherently interdisciplinary and requires standing at the crossroads of several approaches. Second, humanity itself is at a new crossroads. Because global climate is shifting rapidly, this prompts new views of humans in geologic time, as well as new thinking in economics, law, finance, and science.

Climate change isn't just "global warming." It's an alteration of conditions on Earth to which all creatures and societies are adjusting. What is the science of climate change? Why can't understanding and dealing with climate change be confined to science?

Through materials and assignments that address quantitative understanding and qualitative judgment, you'
Il learn why it's unwise to seal the interrelated issues of climate change in separate disciplines; conversely, why it's necessary to use separate disciplines to acquire the knowledge and applications needed to formulate policy and actions. You'll learn about climate adaptation (adjusting to changing climate), mitigation (reducing the speed and severity of climate change), and resilience (e.g., recovering from extreme weather events). You'll discover how careers in many different areas increasingly involve thinking about climate.

Class Notes: This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Friday, August 21. The Gen Ed lottery will run Monday, August 24, with approvals and denials sent out 11:59 p.m. that day. Visit the Fall 2020 Gen Ed web page for more information and step-by-step instructions.

General Education 1169

What Is the Good China Story? (216288)

David Wang  
Wai-pee Li

2020 Fall (4 Credits)  
Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: None  
Enrollment Cap: n/a

The course takes as its point of departure President Xi Jinping's call in 2013 to “tell the good China story,” and in 2020 to “tell the good China story of combating coronavirus.” What is the good China story? Is this the story China should tell about itself to the world? Is this about cultural self-perception, understanding the world, cross-cultural communication, or simple propaganda? More importantly, how can we tell China stories from perspectives outside of China?

What seems beyond dispute is the power of stories to bring China to the world and the world to China. In exploring the "fictional turn" of contemporary Chinese cultural politics as it relates to the world, we will also trace its genealogy to earlier historical moments. Stories matter in China, not only in our times but also throughout history.

Narrative fiction is one of the most effective ways to engage with the Chinese past and the Chinese present. Instead of presenting China as a monolithic civilization, this course uses stories to understand "the world of China" and "China in the world" from ideological, ethnic, cultural, and geo-political perspectives. The course highlights the variety and vitality of stories from both modern and pre-modern periods. In genres...
ranging from religious allegory to science fiction, from moral fable to fantastic romance, from philosophical anecdote to political satire, Chinese stories have enlightened, intrigued, puzzled, and scandalized readers, reflecting and constructing ever-changing worldviews.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

**General Education 1170**

**Confronting COVID-19: Science, History, Policy (216286)**

*Allan Brandt*

*Ingrid Katz*

2020 Fall (4 Credits)  

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: 500

We are living in a world radically reshaped by the ongoing COVID-19 pandemic. This course will investigate the wide range of questions raised by the pandemic, its impact and significance. We will also examine how diseases raise fundamental issues for science, policy, and society. In addition to assessing our scientific and medical knowledge about COVID-19, the course will utilize strategies from history, the humanities, and the social sciences to illuminate central policy and political considerations for addressing the epidemic in the U.S. and across the globe. The course will bring experts from a wide array of fields to offer approaches for understanding essential issues raised by the pandemic, including: the science of the virus; medical and public health responses; as well as its impact on economies, society, and culture. We will also broadly consider how epidemics reveal existing social structures such as fundamental health disparities and social inequalities. Among the questions we will explore are: how do we balance basic freedoms and social restrictions as we face critical new threats to human health; and how do we think about risk and vulnerability in the face of uncertainty from a both a personal and political viewpoint? As this epidemic unfolds in real time, you will have an opportunity to integrate interdisciplinary perspectives for understanding epidemic disease and how it shapes and reflects powerful social forces and global systems.

Class Notes: You are expected to attend live lecture synchronously twice weekly at the times listed above. You are also expected to attend a weekly TF-led synchronous section meeting that will be based on your preferences and scheduled after the enrollment deadline.

General Education 1171

Justice: Ethics in an Age of Pandemic and Racial Reckoning (216258)

Michael Sandel

2020 Fall (4 Credits) Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: 600

What is a just society? What do we owe one another as citizens? What is a good life? These questions, long debated by philosophers, arise with special urgency at a time of pandemic and racial reckoning.

The course explores these questions by considering how philosophers have tried to answer them, and by debating contemporary issues—in politics and everyday life—that prompt us to ask: What's the right thing to do? Topics include controversies about equality and inequality, individual rights and the common good, the role of government and markets, and competing conceptions of identity and community. Cases include ethical questions arising from the pandemic and recent debates about racial justice.

Class Notes: Justice is a University Course, which means that students from all Harvard schools are able to enroll. Enrollment is limited to 750. Students who submit a petition to enroll by August 21 will have priority.

Class Notes: Class meetings integrate video materials with live discussion—sometimes with the class as a whole, sometimes in small breakout sessions. Due to the participatory nature of the course, students are expected to attend all class meetings. Those unable to attend in the morning are welcome to attend the evening version of the course (M and W, 7:30-8:45pm). This is not a recorded version of the morning class, but a live, participatory session covering the same material and led by Dr. Sergio Imparato. All students will also have a weekly, small group discussion section.

General Education 1172

Poetry in America: Writing America 1620-1850 (125187)

Elisa New

2020 Fall (4 Credits) Schedule: TBD

Instructor Permissions: None Enrollment Cap: n/a

This General Education course will contemplate art's formative role in the development of civilizations by
allowing students to trace the gradual development of America's self-conception through the lens of its poetry.

"[P]oetry was all written before time was," wrote Ralph Waldo Emerson in his essay "The Poet." When Emerson wrote these words in 1844, nearly 75 years after the Revolution, he feared America had not yet found its "seers," "sayers," and "namers"--its poets. But Emerson's quest for "the poet" in fact applied to all those makers--essayists, orators, painters, architects, composers--whose creativity gives a culture its characteristic look and sound, its special vernacular and values. It was, in Emerson's conception, the poet's--the artist's--integrity on which civilizations depend: a culture's attitude to its citizens and its non-citizens; the use or misuse of its natural resources; the treatment of its laborers; the standards of its schools; the meanings it assigned marriage, death, masculinity, femininity; its ideas of the spiritual, the beautiful, the entertaining--all these would be, Emerson believed, encoded in its art. What a nation's poets wrote was, finally, what that nation would become.

Students in Writing America will read, discuss, and debate poems written for these high civilizational stakes, and they'll explore the diverse functions poetry played in a wide variety of print venues (from newspapers and women's magazines, to funeral programs, to farmers' almanacs). The syllabus covers major poets from the colonial period through 1850 (including Bradstreet, Taylor, Wigglesworth, Wheatley, Freneau, Poe, Emerson, Longfellow); through these poets, students will be able to follow the emerging role of the "author" and "the arts" within American culture. But much of their study will be focused on poetry whose aims were not purely, or even primarily, literary. Beginning with the first book published in North America (The Bay Psalm Book, printed in our very own Harvard Square), they'll read jeremiads and funeral elegies sanctioning transfers of political power, as well as political ditties of the 1770's urging patriots to give up imported luxuries like tea and silk. They'll read selections from partisan satires and epics of the Revolution, mock-epics celebrating indigenous foods like cornmeal mush, and poetry celebrating the beauties--and exploitable resources--of the American landscape. They'll pay close attention to how the demonization--and romanticization--of indigenous peoples in popular verse rendered native Americans figuratively extinct, even while poetry enabled some African Americans and women to achieve not only visibility, but celebrity. Writing in America students will come to understand how poetry helped Americans embrace the virtues of labor and middle class life, and how it supported emerging ideals of literacy and cultivated, and fed, robust mass cultural appetites. Throughout the semester, students will connect poetry's relationship to music, oratory, painting, statecraft, homiletics, and other expressive genres, considering throughout the role art plays not only in reflecting but in shaping distinctive cultures.

Class Notes: The course has been designed for remote asynchronous learning, and all of its lectures and discussions are filmed documentary style around Harvard and at numerous historic sites in Cambridge (The First Church, Mt. Auburn Cemetery, the Longfellow Historic Site), Boston (King's Chapel), Concord (The Old Manse), Cape Cod (Corn Hill in Truro, Truro Historical Society, Highland House Museum), and elsewhere. The course's asynchronous design allows students to watch lectures on their own time, and then to apply and demonstrate knowledge via written discussions and other online assessments. These activities, in turn, furnish the materials for more personal, synchronous Zoom sessions, which will take place 2-4 hours weekly with times based upon enrollees' preferences. The course also includes numerous guest interpreters such as Vice President Al Gore, Glenda Carpio, Michael Pollan, Jonathan Walton, Lawrence Buell, and the late Mayor Tom Menino. All lecture videos are richly illustrated with archival materials from Harvard and beyond.

Numbers in Policy & Society (217835)

Sheila Jasanoff
L Mahadevan
Keith Raffel
Sam Evans

2021 Spring (4 Credits) Schedule: MW 0300 PM - 0415 PM
Instructor Permissions: None Enrollment Cap: n/a

The ability to critically assess numbers, data and models and hold to account those with the power to generate them is a vital capability for every 21st century citizen. This course will give you an increased understanding of why some important ethical and political perspectives fail to enter into the design of the scientific and technical systems that permeate our societies.

Quantitative reasoning helps us make sense of a rapidly changing social, technical, and scientific landscape. We will introduce you to concepts and methods you can use to understand the complex relationship between quantification and its social contexts, and to turn those insights into good policy. You will learn how to use data, quantitative methods, and modeling to inform decisions concerning the governance of areas such as social networking, climate change, genome editing, and pandemic control. You will discover how topics like uncertainty, probability, and risk are embedded within prior understandings of equality, fairness, and democracy. You will develop an ability to ask when, where, why, and how attempts to fit quantitative reasoning to those understandings become problematic. You will expand your skills for bringing democratic values to bear on the ways we measure the costs, risks, benefits, and impacts of technological change.

Beginning German (113802)
Lisa Parkes
2020 Fall (4 Credits) Schedule: MTWR 0900 AM - 1000 AM
Instructor Permissions: Instructor Enrollment Cap: 12
An introduction to German language and culture for students with no knowledge of the language. Students develop basic communication competencies (spoken and written), with an emphasis on interpersonal communication. Instruction is supplemented by a variety of texts, including poetry, songs, and visual media. The first half of this course may not be taken as a half course for credit toward the AB degree; there are no exceptions to this rule.

Course Notes: May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students must complete both terms of this course (parts A and B) in order to receive credit.

German  10A Section: 3
Beginning German (113802)
Lisa Parkes
2020 Fall (4 Credits)  Schedule:  MTWR 0900 AM - 1000 AM
Instructor Permissions:  None  Enrollment Cap:  n/a

An introduction to German language and culture for students with no knowledge of the language. Students develop basic communication competencies (spoken and written), with an emphasis on interpersonal communication. Instruction is supplemented by a variety of texts, including poetry, songs, and visual media. The first half of this course may not be taken as a half course for credit toward the AB degree; there are no exceptions to this rule.

Course Notes:  May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students must complete both terms of this course (parts A and B) in order to receive credit.

2020 Fall (8 Credits)

Schedule: F 1200 PM - 0200 PM
           MTWR 1200 PM - 0115 PM

Instructor Permissions: Instructor
Enrollment Cap: 12

A complete first-year course in one term for students with little or no knowledge of German. Provides an introduction to language and culture of the German-speaking countries. Students develop basic communication competencies (spoken and written), and will be able to understand and use high-frequency vocabulary and basic grammatical structures. Instruction is supplemented by a variety of texts, including poetry, songs, and visual media.

Course Notes: May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students must complete both terms of this course (parts A and B) in order to receive credit.

Advanced Grammar and Reading (122031)

*Peter Burgard*

2020 Fall (4 Credits)

**Schedule:** TR 0130 PM - 0245 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 18

Advanced language instruction through systematic study of the rules of grammar, their nuances, and their exceptions. Application of this knowledge through the meticulous reading and parsing of selections from sophisticated texts (Goethe, Kant, Novalis, Kleist, Heine, Nietzsche, Freud, Mann, Kafka) prepares students for any courses, internships, or work requiring advanced German reading skills.

**Class Notes:** Conducted in German. Not open to auditors. Pass/Fail option available.

The 2018 course evaluation scores published here, in my.harvard, are NOT evaluations of Professor Burgard, as he did not teach the course in 2018. Professor Burgard's Fall 2019 evaluations were as follows: Course 4.2, Instructor 4.5, Recommend 4.4.

**Recommended Prep:** Prerequisite: German 20B (Intermediate German) or the equivalent.

Advanced Conversation and Composition: Berlin Stories (120838)
Lisa Parkes
2021 Spring (4 Credits) Schedule: R 1200 PM - 0115 PM
T 1115 AM - 1230 PM
Instructor Permissions: None Enrollment Cap: n/a
This course is designed to further students' spoken and written German at the advanced level. Students will analyze and practice the stylistic and rhetorical features of various written and spoken genres. By focusing on aspects of contemporary society in the German-speaking countries, students will broaden and refine their vocabulary and idiom, become sensitized to different registers, as well as hone points of grammar.
Course Notes: Conducted in German.
Recommended Prep: German 61, equivalent preparation, or permission of the instructor.

German  63 Section: 1
Germany and Europe: Heimat, Exile, Return (160494)
Nadine Schwakopf
2021 Spring (4 Credits) Schedule: WF 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a
This course discusses 20th and 21st Century German culture and poetics in dialogue and dispute with its European neighbors. Particular emphasis will be put on the effect of history on contemporary political, cultural and historical issues. How did the rest of Europe react to the German unification? How does Germany relate to its "Gastarbeiter" today? This course is designed to provide students with the ability to gain insights into how personal and collective identity is constructed and problematized through art and culture. In this interdisciplinary course we will work with a variety of written genre (poetry, short stories, plays, essays, journalistic non-fiction), as well as visual art, architecture, and film. We will take a cultural studies approach to understanding how to read effectively and interpret textual and visual materials. Conducted in German.

German 101

German Literature, Culture, and Society (159603)

Nadine Schwakopf

2020 Fall (4 Credits)  Schedule:  TBD

Instructor Permissions:  None  Enrollment Cap:  n/a

This course examines the major social-political trends and tensions that have informed literature and culture in the German-speaking countries. Students will develop the language skills to discuss, analyze, and interpret a variety of texts and cultural phenomena from the 18th to the 21st centuries, with special attention to social theory and political critique. Our readings and discussions are organized around pairs of thinkers who address the same issues from a different time, place, angle, or genre. Further emphasis is placed on the history of ideas and how it contributes to current issues and debates. Paired readings may include Kant and Kleist, Freud and Kafka, Benjamin and Brecht, Böll and Celan, Seghers and Wolf.

Course Notes:  Readings and discussion in German.

German 102

German Literature, Art, and Thought (159710)

Nadine Schwakopf

Nicole Suetterlin

2021 Spring (4 Credits)  Schedule:  WF 0300 PM - 0415 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

This course explores the major trends and tensions that have informed German literature, art and thought from the 18th to the 21st centuries. In addition to developing the language skills to discuss, analyze and interpret literature, students will explore the rich cultural tradition in the German-speaking countries and its continued relevance for the world. Topics include: Enlightenment; Age of Goethe; Third Reich; GDR surveillance; Cold War; German reunification; remembering the Holocaust; rise of right-wing populism (AfD); ecological revolution. Figures include: Lessing, Goethe, Schiller, Wagner, Nietzsche, Freud, Einstein, Brecht, Celan, Dürrenmatt, Wolf, Draesner, Horn.

Course Notes:  Readings and discussions in German.

German 119A Section: 1

Great Works, Short Texts: German Poetry (216056)

Peter Burgard

2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

Close reading of poems by Klopstock, Goethe, Hölderlin, Brentano, Eichendorff, Droste-Hülshoff, Heine, Mörike, Hofmannsthal, George, Rilke, Trakl, Lasker-Schüler, Brecht, Benn, Eich, Bachmann, Enzensberger, Celan, Jandi, Kirsch, Brinkmann, and Kling. While the course focuses entirely on the close reading of outstanding texts in the German literary tradition, ancillary reading situates these texts in the history of German culture.

Course Notes: Readings in German, discussions in English.

Topics in Music from 1800 to the Present: Proseminar (133362)

Alexander Rehding
Peter Gordon

2021 Spring (4 Credits) Schedule: W 0945 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

Adorno and Music. The philosopher, composer, and sociologist Theodor W. Adorno counts as one of the most important musical thinkers of the twentieth century. While the range of musical figures he approved of was extraordinarily focused (going barely beyond Beethoven, Mahler, Wagner, and Schoenberg), he created a central role for music in his philosophy. The very abstraction and remoteness of absolute music, he argued, allowed it to offer critical insights on the state of modern society. In this seminar we will discuss key texts by Adorno and his circle, and work through a number of key musical works in his orbit. No discussion of Adorno would be complete without consideration of his controversial views on jazz and sound media. A background in music may be advantageous but is not a requirement.

Course Notes: This course is equivalent to History 1934 and Music 193r. Credit may
be earned for only one of these courses.

German 143

German History: A User's Guide (203214)

Alison Frank Johnson

2020 Fall (4 Credits) Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None Enrollment Cap: n/a

German History loomed like a specter over the twentieth century. In the twenty-first century, Americans have been debating the relevance and legitimacy of comparisons between German history and our contemporary world. How useful is German history for understanding our current moment? How might our present day concerns distort what we see in the past? This course will examine the history of Germans in Europe and elsewhere, starting with the revolutions of 1848 and ending with the separation of Austria, West Germany, and East Germany following the Second World War. Themes will be war, insurrection, and terrorism, revolution and counter-revolution, gender and sexuality, reform, violence, anti-semitism, racial thinking and racism, and migration.
German 144 Section: 1

Freud and Psychoanalysis (216353)

Benjamin Morgan

2020 Fall (4 Credits) Schedule: R 1200 PM - 0200 PM

Instructor Permissions: None Enrollment Cap: n/a

This course will be equally accessible to students in German, comparative literature, history and literature, philosophy, religious studies, psychology and history of science (all texts will be available in translation). The course will give you a grounding in the early history of psychoanalysis; will investigate the relations between psychoanalysis and literature; and will assess the contribution of this tradition of thought to the intellectual life of the twenty-first century. The main readings will be taken from key texts by William James, Sigmund Freud, Carl Gustav Jung and Melanie Klein. We will explore the conceptual tools that the thinkers brought to bear on the affective life of human beings, and will investigate their implications and their continued relevance. How do different models of the human mind shape the way we relate to ourselves and others? To what degree can we access, understand and cultivate our unconscious affective life? The relation between psychoanalysis and literary texts will be explored through texts by Arthur Schnitzler, Thomas Mann and Toni Morrison. The critical engagement with founding texts of psychoanalysis and analytic psychology will also allow you to develop a nuanced assessment of recent re-deployments of the psychoanalytic tradition such as Jonathan Lear and Julia Kristeva. It will also allow you to eevaluate challenges to Freudian constructions of the unconscious by cognitive scientists and philosophers such as Hugo Mercier & Dan Sperber (2017), and Nick Chater (2018).

The mid-term paper will consist in a short exploration of a topic of your choice related to the readings. This topic will be further explored in your final paper.

German 150 Section: 1

Under Surveillance: Media, Security, and the Loss of Privacy (216322)

Eric Rentschler

2020 Fall (4 Credits) Schedule: T 1245 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a
With a camera positioned at the entrance to the director's factory, Louis Lumière's famous early film of 1895, La Sortie de l’usine Lumière à Lyon, captured workers as they left for the day. Today, surveillance practices have infiltrated daily lives around the globe, from the ubiquitous cameras on city streets and public spaces to tracking systems that monitor, store, and monetize even our most intimate activities. In this class we will probe and problematize the modern history of surveillance technologies and monitoring practices, from the first manifestations of police photography to CCTV, drones, racial profiling, GPS technology, and user security on social media and digital platforms. To this end we will look at exemplary features such as The Conversation (1974), Strange Days (1995), Cache (2005), Red Road (2006), The Lives of Others (2006), and Snowden (2016), documentaries like 13th (2016), The Creepy Line (2018), and The Great Hack (2019) as well as selected videos and tv programs. We will also consider the analytical and theoretical perspectives of, among others, Michel Foucault, Jean Baudrillard, Wolfgang Ernst, Gilles Deleuze, Harun Farocki, Shoshana Zuboff, Catherine Zimmer, Lev Manovich, Mark Andrejevic, Thomas Levin, Patricia Pisters, and Christian Parenti.

Course Notes: This course is equivalent to AFVS 184E. Credit may be earned for German 150 or for AFVS 184E, but not both.

German  179 Section: 1

Austrian History in Literature (216327)

Alison Frank Johnson

Nadine Schwakopf

2021 Spring (4 Credits) Schedule: T 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This course uses Austrian literature to think through some of the most pressing questions of modern European (and, specifically, Austrian) history. We will read some of the greatest novels and novellas in modern German-speaking literature as we learn about the Habsburg monarchy, turn-of-the-century Vienna, the First and Second World Wars, the expulsion of Austrian Jewry, and postwar mythmaking. Important themes include: women's role in society and in the family; the rise of nationalism as a social and political force and the viability of multinational empires; sex and sexuality; justice, mercy, and retribution; what Austria is and what it means to be Austrian; anti-Semitism, Zionism, and European Jewry; cultural, political, and violent forms of social protest; the transformative power of war. Open to undergraduate and graduate students, with the permission of the instructor.

Course Notes: This course is equivalent to History 1919. Credit may be earned for History 1919 or German 179, but not both.

German 200 Section: 1
Middle High German (114072)

Benjamin Morgan

2020 Fall (4 Credits)       Schedule:       F 1200 PM - 0200 PM
Instructor Permissions: None          Enrollment Cap: n/a

This graduate course will give you a sound reading knowledge of Middle High German, as well as exploring aspects of grammar and historical linguistics by working with literary examples, including (but not limited to) the Nibelungenlied.

Course Notes: Open to any graduate students who wish to learn Middle High German for their research.

Recommended Prep: A reading knowledge of German.

German 260 Section: 1
Writing the Body in the Posthuman Age (216389)

Nicole Suetterlin

2021 Spring (4 Credits)       Schedule:       W 1200 PM - 0245 PM
Instructor Permissions: None          Enrollment Cap: n/a

Genetic engineering, artificial intelligence, smart surveillance – recent scientific and technological advancements have reconfigured our understanding of the human body and its environment in unprecedented ways. The molecular revolution in the life sciences has turned the body into a software that can be coded, recoded and rewritten. Meanwhile, the digital revolution has allowed algorithms to take an increasing hold over people’s online selves. Developments such as these constitute what a broad range of cross-disciplinary researchers in the so-called posthumanities have termed the "posthuman predicament."

The current Sars-CoV-2 pandemic has but exacerbated the challenges we face in the posthuman age, increasing the need for defining the boundaries of the human body, both molecular and digital, and the power structures that govern it in the 21st century. How can literature and the arts help us address these challenges? This course explores how contemporary literature as well as literary and cultural theory construct the body, define the self, and critique biopolitical powers in the posthuman age. Reading materials include German authors such as S. Berg, D. Grünbein, and J. Zeh, Anglo-American authors such as K. Ishiguro and N. Okorafor, and cultural theorists such as B. Latour, J. Habermas, D. Haraway, and N.K. Hayles.

Course Notes: Discussions in English, readings in English and German. Proficiency
in German is not required for this course: English-language alternatives will be provided for texts where English translations are not available. Open to undergraduates with permission of instructor.

German 264 Section: 1

The Frankfurt School in the 21st Century (216352)

Benjamin Morgan

2021 Spring (4 Credits) Schedule: R 1245 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

This course will be equally accessible to students in German, comparative literature, history and literature, philosophy, religious studies, psychology and history of science (all texts will be available in translation).

What conceptual tools can help us understand current social trends or the roles played by literature, mass culture and philosophy in today's society? We will start with Rahel Jaeggi’s recent 'Critique of Forms of Life' (2014, trans. 2018). Where earlier Frankfurt School theorists such as Horkheimer, Adorno or Habermas hoped to ground their critique of society in something (reason, art, an idealized communication) that in some sense lies beyond or before everyday practices, Jaeggi takes up the mantle of Frankfurt-School-style critical theory but proposes a model that derives its evaluative norms from inside the very forms of life under analysis. The course will put Jaeggi’s thought in historical context, showing the origins of key aspects of her approach in earlier Frankfurt School thinkers, as well as productive lines of thought explored by the earlier generations that she has chosen not to develop further. You will read major essays by authors from the first generation: Adorno, Benjamin, Horkheimer. An extract from Habermas’s ‘Structural Transformation of the Public Sphere’ will give you a sense of subsequent developments. The excerpts will be contextualized by comparisons with influential contemporaries: John Dewey, Erich Auerbach and Hannah Arendt. By the end of the course you will have an understanding of the foundational model of critical theory initiated by the Frankfurt School, as well as a nuanced sense of how their ideas might serve an analysis of our 21st-century present.

The mid-term paper will consist in a short exploration of a topic of your choice related to the readings. This topic will be further explored in your final paper.

Questions of Theory (205260)
Nicole Sueterlin
Doris Sommer
2020 Fall (4 Credits) Schedule: T 1200 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

To explore key literary, cultural and critical theories, we pose questions through readings of classic and contemporary theorists, from Aristotle to Kant, Schiller, Arendt, Barthes, Foucault, Glissant, Ortiz, Kittler, and Butler, among others. Their approaches include aesthetics, (post)structuralism, (post)colonialism, media theory, gender theory, ecocriticism. Each seminar addresses a core reading and a cluster of variations. Weekly writing assignments will formulate a question that addresses the core texts to prepare for in-class discussions and interpretive activities.

Course Notes: Conducted in English. This course is also offered as Romance Studies 201 and German 291. Credit may be earned for Romance Studies 201 or German 291, but not both.

Subject: Swedish

Swedish 10A
Beginning Swedish Language and Literature (121412)
Agnes Broome
2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a
A basic course focusing on listening, speaking, reading, and writing skills. During fall term, pronunciation and listening comprehension will be emphasized, as well as regular writing assignments. Literary, film, music and other cultural texts will be introduced relatively early on. By semester's end, students will have achieved a basic literacy in everyday Swedish.

Course Notes: Not open to auditors.

Beginning Swedish Language and Literature (126648)

*Agnes Broome*

2021 Spring (4 Credits)  

Schedule: TBD  

Instructor Permissions: None  

Enrollment Cap: n/a  

Continuation of the basic course focusing on a basic mastery of listening, speaking, reading, and writing skills. During spring term, the emphasis is on more advanced conversation and an exploration of Sweden's culture and civilization through selected texts and video. By semester's end, students will be able to carry on conversations in everyday Swedish, read news articles, and write letters and produce substantial creative work.

Course Notes: Not open to auditors.

Intermediate Swedish: Childhood in Swedish Literature and Culture (112472)

*Agnes Broome*

2020 Fall (4 Credits)  

Schedule: TBD  

Instructor Permissions: Instructor  

Enrollment Cap: 12  

Sweden and Swedish Finland have produced some of the most translated and beloved works of children's fiction in the world. In this intermediate Swedish language course, we will review the essentials of Swedish grammar and vocabulary as we explore some of these classic works of children's fiction, film, and comic books and the aspects of Swedish culture they illuminate. The final project for this class involves producing your own work of children's fiction or film.
Swedish 20B Section: 1

Intermediate Swedish (203488)

Agnes Broome

2021 Spring (4 Credits)  Schedule: TBD
Instructor Permissions: None  Enrollment Cap: n/a

Continuation of Swedish 20a. Focuses on enhancing students' proficiency in all four skill areas with special emphasis on speaking/discussion and the control of different discourse registers. Extensive vocabulary-building exercises, a thorough grammar review, and an introduction to various Swedish cultural topics and current affairs through the use of literary and non-literary texts, multimedia resources, and the news.

Course Notes: Conducted in Swedish. Prerequisite: Swedish 20a or equivalent.

Scandinavian 55 Section: 1

One Hundred Years of Scandinavian Cinema (159715)

Agnes Broome

2021 Spring (4 Credits)  Schedule: R 1200 PM - 0115 PM  T 1200 PM - 0200 PM
Instructor Permissions: None  Enrollment Cap: n/a

This course explores Scandinavian cinema from the pioneers of the silent era to the globally successful hit
films of the present day. Students will trace the development of Scandinavian cinema through the films of directors such as Viktor Sjöström, Carl Th. Dreyer, Lars von Trier, Ingmar Bergman and Lukas Moodysson and discover the profound influence the region’s films have had, and continue to have, on filmmaking in America and the world.

Course Notes: Conducted in English.

Special Reading Programs and Research Problems for Advanced Students (131310)
Subject: Germanic Philology

Germanic Philology 200 Section: 1

History of the German Language (156291)

Benjamin Morgan

2021 Spring (4 Credits)  Schedule: F 1200 PM - 0200 PM
Instructor Permissions: None  Enrollment Cap: n/a

This graduate class will introduce you to key ideas in historical linguistics, as well as helping you develop a reading knowledge of Old High German and of different styles, registers and dialects of Middle High German. We will work closely with a range of texts from an Old High German heroic lay, the 'Hildebrandlied', a probably eighth-century lay recorded in a late ninth century manuscript, to the religious writings of Mechthild von Magdeburg and Meister Eckhart in the thirteenth and fourteenth centuries.

The mid-term exam will consist in a short commentary on an Old High German text. The final exam will be a short commentary on a Middle High German text.
Germanic Philology 280
Approaches to Foreign Language Pedagogy (205603)

Lisa Parkes

2020 Fall (4 Credits) Schedule: W 1245 PM - 0244 PM

Instructor Permissions: None Enrollment Cap: n/a

A practical and theoretical introduction to foreign language instruction. Emphasis on historical and current theories of second language acquisition and their implications for the methods of teaching foreign language, culture, and literature.

Germanic Philology 300
Special Reading Programs and Research Problems for Advanced Students (108357)

Did you know that one of the strongest indicators of a healthy society is the health of its teeth? Everyone has teeth, but most people in the world don’t have access to affordable dental care. This discussion-based course assesses current global health policies and approaches for addressing pressing health challenges despite resource constraints and severe political neglect. It aims for students to be competent in incorporating the global burden of oral diseases into foundational concepts of global health and world development. These include how oral diseases are associated with globalization, poverty, infectious and non-communicable diseases, maternal and child health, mental health, nutrition, tobacco, alcohol, urban and rural infrastructures, climate change, and the environment. This course demonstrates how complete health and an end to global poverty are not possible without including oral health in the global health and development agenda.

Course Notes: Students who complete GHHP 30 may apply to participate in an experiential learning opportunity in San Vito, Costa Rica over spring break. Since slots are limited, there will be a lottery.

Class Notes: Students are expected to attend one class lecture per week, on Mondays from 10-11:15 am or Fridays 1:30-2:45 pm.

Global Health & Health Policy  50
The Quality of Health Care in America (114957)
Anupam Jena
2021 Spring (4 Credits) Schedule: TR 0300 PM - 0415 PM
Instructor Permissions: Instructor Enrollment Cap: 42
Offers information and experiences regarding the most important issues and challenges in health care quality. Overview of the dimensions of quality of care, including outcomes, overuse, underuse, variation in practice patterns, errors and threats to patient safety, service flaws, and forms of waste. Each session focuses on one specific issue, exploring patterns of performance, data sources, costs, causes, and remedies. Explores desirable properties of health care systems that perform at high levels in many dimensions of quality.
Global Health & Health Policy 70

Global Response to Disasters and Refugee Crises (161268)

Stephanie Kayden
Michael VanRooyen

2021 Spring (4 Credits) Schedule: R 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 24

Climate change, urbanization, and conflict mean that global disasters are on the rise. How should the world respond when disasters force people from their homes? How can we better help the world's refugees? This course examines the past, present, and future of the international humanitarian response system. We will explore how Doctors Without Borders, the United Nations, the Red Cross, and other aid agencies came to be and how global response standards, international humanitarian law, and new technologies are shaping worldwide disaster relief.

Through interactive discussions and case studies, students will learn how aid workers interact with governments, militaries, and civil society to provide refugee aid. At the end of the course, students can choose to live the refugee experience during a large-scale, weekend outdoor simulated humanitarian response training program together with other students and professional aid workers from around the world.

Course Notes: Lotteried course, enrollment limited to 24.

Class Notes: Students must be able to enroll in one of the following sections to join the course: TBA

Global Health & Health Policy   99

Research in Global Health and Health Policy (123102)

David Cutler

2021 Spring (4 Credits)  
Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor  
Enrollment Cap: n/a
Global health and health policy are interdisciplinary fields that apply the theories and methods of statistics, sociology, political science, economics, management, decision science, and philosophy to the study of population health and health care. Research from these fields influences policymaking in a variety of settings. For example, the Patient Protection and Affordable Care Act (ACA) drew upon health policy research to develop programs for improving access and quality of care in the United States. Similarly, global health research guides international institutions, such as the World Health Organization, in determining health guidelines for all countries. Global health and health policy research can also inform practices inside hospitals, initiate programs for diseases like HIV, and regulate the food and drug industries. This course introduces the fundamentals of research design and methods in global health and health policy and assists students in developing research projects and crafting policy recommendations that can impact health care systems and public health.

Course Notes: This course fulfills the research requirement of the Secondary Field in Global Health and Health Policy, and enrollment is ordinarily limited to seniors in the GHHP Secondary Field. Underclass GHHP students may petition to take the course if all other Secondary Field requirements have been met. GHHP 99 is primarily taught by graduate students in the PhD in Health Policy program. It may not be taken pass/fail.

Government 10
Foundations of Political Theory (124414)

Danielle Allen

2021 Spring (4 Credits) Schedule: MW 1030 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

This course investigates the central problems of political theory that concern the justification of democracy. Is democratic rule the uniquely just form of collective decision-making? What political institutions best express the democratic values of equality, freedom, deliberation, and participation? What are the moral responsibilities of citizens - whose representatives exercise political power in their name? Is democracy a human right? How do themes of race and globalization intersect with democratic theory?

Readings integrate contemporary work in political philosophy from thinkers ranging from Chris Lebron to Karuna Mantena with canonical thinkers, including Plato, Aristotle, Rousseau, W.E.B. DuBois, John Rawls, Robert Nozick, Judith Shklar, and Charles Mills. Sections will be structured with thematic focus areas, and students will be asked to rank choices: options will include federalism and equality; civic agency; and race and democracy.

Class Notes: theory_subfield

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded.

Government 20
Foundations of Comparative Politics (117853)

Steven Levitsky

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: None Enrollment Cap: n/a

Provides an introduction to key concepts and theoretical approaches in comparative politics. Major themes include the causes of democratization, economic development, ethnic conflict, and social revolutions; as well as the role of the state, political institutions, and civil society. Examines and critically evaluates different theoretical approaches to politics including modernization, Marxist, cultural, institutionalist, and
leadership-centered approaches. Compares cases from Africa, Asia, Europe, Middle East and Latin America to provide students with grounding in the basic tools of comparative analysis.

Class Notes: comparative_subfield

Class Notes: This course will be accessible to students in all time zones. It will be a flipped class with asynchronous recorded lectures and synchronous meetings with Professor Levitsky on either Tuesdays at 7:30pm or Wednesdays at 12pm. There will also be weekly TF-led discussion sections.

American Government: A New Perspective (111813)

Paul Peterson

2020 Fall (4 Credits) Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

Provides an overview of contemporary American politics. It analyses the way in which recent changes in elections and media coverage have helped shape key aspects of American government, including the courts, Congress, and the Presidency, the workings of interest groups and political parties, and, also, the making of public policy. Permanent political campaigns have altered governmental institutions and processes. The course explains how and why.

Class Notes: american_subfield

Class Notes: This course will be accessible to students in all time zones. It will be a flipped class with asynchronous lectures (prerecorded lecture videos) and two synchronous classes each week at Mon/Wed at 1:30 PM. Additional synchronous classes for international students will be scheduled after registration. There will also be weekly TF-led discussion sections.

Data (115859)

David Kane
Kosuke Imai

This course, an introduction to data science, will teach you how to think with data, how to gather information from a variety of sources, how to import that information into a project, how to tidy and transform the variables and observations, how to visualize, how to model relationships, how to assess uncertainty, and how to communicate your findings. Each student will complete a final project, the first entry in their professional portfolio. Our main focus is data associated with political science, but we will also use examples from education, public health, sports, finance, climate and other. (Previous course number: Gov 1005).

**Class Notes:**
Gov 50 corresponds to old course number Gov 1005 (Data)

**Class Notes:**
This course will be accessible to students in most time zones. It will be a synchronous flipped class with Dr. Kane. Students will attend class at either Tues/Thurs 7:30AM or Tues/Thurs 12PM. There will also be weekly TF-led discussion sections and study halls.

Data (115859)

*Suzanna Linn*

2021 Spring (4 Credits)  
**Schedule:** TR 1200 PM - 0115 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course, an introduction to quantitative political science, will teach you how to answer questions with data, how to develop questions suited to empirical research, construct hypotheses, conduct descriptive analysis using statistical summaries and data visualizations, how to model relationships, how to assess uncertainty, and how to communicate your findings. Exercises both in and out of class will require students to engage with and apply various social science concepts, and to undertake quantitative analyses of political and policy-relevant data. Each student will complete a final project.

**Class Notes:** This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. There will also be TF-led discussion sections.

Data Analysis and Politics (123443)

Matthew Blackwell

2020 Fall (4 Credits) Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None Enrollment Cap: n/a

How can we measure racial discrimination in job hiring? What is the best way to predict election outcomes? What factors drive the onset of civil wars? The goal of this course is to give you the ability to understand, explain, and perform research on the most pressing social and political issues with a special focus on data analysis and causal reasoning. You will be able to read and understand the methodology of most academic articles in the social sciences while also learning the core ideas and tools of data science used across many industries.

Course Notes: This course must be taken for letter grade.

Class Notes: Gov 51 corresponds to old course number Gov 50 (Political Science Research Methods).

Class Notes: This course will be accessible to students in all time zones. It will be a flipped class with asynchronous lectures (prerecorded lecture videos) and synchronous classes with Professor Blackwell. Synchronous sessions for international students will be scheduled after registration. There will also be weekly TF-led discussion sections and study halls.

Models (211173)
Jefferson Gill
2021 Spring (4 Credits) Schedule: W 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

This course covers statistical models useful for investigating political and social phenomena. We will address the theory and principles behind these methods, their applications, and their limitations. The course will be useful for those undertaking a quantitative thesis or wanting to have data science modeling skills for other applications. Specific models to be studied include the standard linear regression model in detail, and Generalized Linear Model forms such as logit, probit, log-linear (Poisson), Gamma, ordered choice, multinomial, tobit, and more. In addition Bayesian estimation, Monte Carlo simulation, multilevel, and nonparametric models will be covered.

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. There will also be TF-led discussion sections.

Gov 52 corresponds to old course number Gov 1006 (Models).

Recommended Prep: Gov 50 and statistics at the level of Gov 51, or permission of the instructor.

Research Practice in Qualitative Methods (108287)
George Soroka
2021 Spring (4 Credits) Schedule: T 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

With the goal of preparing students to undertake original research, this course introduces students to basic principles and tools of qualitative research in the social sciences. Focus is on comparative research design and the principal tools of qualitative research. Topics examined include the pitfalls of selection bias, the logic of causal inference, measurement and conceptualization, and the potential of mixed methods.
Research techniques covered are process tracing, analytic narratives, natural experiments, archival research, interviews, and ethnography.

Class Notes: This course will be accessible to students in all time zones. It will be a flipped class with asynchronous recorded lectures and synchronous meetings with Professor Soroka on Tuesdays 3-5:45pm. There will also be TF-led discussion sections.

Topics and Resources in Political Theory (108285)

*Michael Rosen*

2021 Spring (4 Credits) **Schedule:** F 0945 AM - 1145 AM

**Instructor Permissions:** Instructor **Enrollment Cap:** n/a

This course introduces students to the most important debates in contemporary English-language political theory, centered on questions of justice, equality and rights. We then turn to topics that reflect the individual interests of students who enroll. The course is designed to help participants to make the transition from being critical readers of political thought to being independent contributors to debate. It will be especially useful for those considering writing a thesis in political theory.

Southeast Asia in World Politics (117994)

*George Soroka*

2020 Fall (4 Credits) **Schedule:** W 0345 PM - 0545 PM

**Instructor Permissions:** Instructor **Enrollment Cap:** 12

This course examines the politics—historical and contemporary—of Southeast Asia to address recurring themes in political science.
If you've ever wondered, "What is national identity and where does it come from?", "How can I spot a populist in the wild?", "Why do democracies (or dictatorships) die?", "Was colonialism profitable?", "What is it like to be stuck between the great powers?", "Where did all the Communists go?", "Can multiethnic/multi-religious democracy succeed?" or simply, "What's going on over there?", this course has a lot to offer you.

People who take courses like this are well-positioned to win grants for research, study, or work in Southeast Asia.

Our ultimate focus will be on contemporary politics, but we will devote considerable time to understanding how historical experiences shape what we see today. We will cover the entire region, but devote the most attention to Indonesia, the Philippines, Burma, Malaysia, Thailand, and Vietnam.

Class Notes: Introductory undergraduate seminar intended for first-year students and sophomores.

Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Breaking the Glass Ceiling: The Politics of Women in Leadership (111734)

*George Soroka*

2020 Fall (4 Credits)  
**Schedule:** R 0300 PM - 0545 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

Why is there underrepresentation of women in leadership? Who becomes a leader and why? What makes effective leaders? Do women "lead differently" than their male counterparts? Do quotas or other diversity policies work? These questions will motivate this interactive seminar as we examine research and case studies about female leaders of all types — from those running for office to those serving in high levels of government to those working as grassroots organizers.

Class Notes: Introductory undergraduate seminar intended for first-year students and sophomores.

Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

National identity represents an unsolved puzzle for social scientists. Great theorists claim that national identities originated in the modern era, yet peoples around the world feel that their own national identities are deeply rooted and ancient. In some places, national identities are violently contested; in others, they are unquestioned facts of life.

In this small seminar, students explore theories from comparative politics, sociology, and social psychology about how people form beliefs about national identity and about how those beliefs drive politics and even violence. Students also, by closely examining real cases and primary sources, become intimately familiar with how people in a chosen part of the world think about nationality, and use that knowledge to interrogate the existing scholarship. We will pay heavy attention to Europe and Eurasia but will also visit East, South, and Southeast Asia, Africa, and Latin America. The course is especially pertinent for students new to comparative politics and to the small seminar format; freshmen and sophomores should feel comfortable in this course.

Class Notes: Introductory undergraduate seminar intended for first-year students and sophomores.

Class Notes: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Technology Science Practicum (207920)

*Latanya Sweeney*

2021 Spring (4 Credits)  

**Schedule:** F 0945 AM - 1145 AM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** n/a

This practicum is a capstone to the Technology Science Program, designed to give students the opportunity to conduct original research and write a publication-ready research paper. In consultation with the instructor, students select a concrete technology-society conflict to address, produce autonomous research to analyze it, and provide a set of actionable recommendations or produce appropriate technology to solve it. Throughout the semester, students receive feedback both from their peers and the instructor to aid the development of their projects. Class meetings include the development of writing schedules, discussions focused on framing, analysis, methodology, and peer-review of student projects. Emphasis is placed on issue spotting, academic story-telling and research framing for maximum impact. The course culminates with a formal presentation of the students’ projects and papers.

Class Notes: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students’ time zones and course schedules.
Government 93C

Public Policy Practicum (214596)

Alexander Gard-Murray

2020 Fall (4 Credits)  Schedule:  TBD

Instructor Permissions:  Instructor  Enrollment Cap:  12

This course provides students an opportunity to do policy research. Students will read academic research on policy and the politics of policy making, and then do their own research for a policy proposal commissioned by a real client, such as a legislator or an NGO. Each student will write a research paper on a topic related to the group project. This research will also contribute to a single, integrated report and oral presentation for the client.

Class Notes: Please note that there are two versions of this course being run simultaneously: This is Section 1, which covers Environmental Policy and is taught by Dr. Alexander Gard-Murray. The project this semester has been commissioned by the Natural Resources Defense Council to contribute to its Energy Efficiency for All project.

Section 2 can be found on another Canvas page (also listed as GOV 93C). These are separate courses with separate admissions. Section 2 covers Tech Policy and is taught by Dr. Jennifer Halen. The project this semester has been commissioned by the Center for Data Innovation and will focus on policy issues related to the development and use of virtual reality and augmented reality technologies.

Government 93CJ

Criminal Justice Policy Practicum: Opportunities Beyond Bars (217866)

Jennifer Halen

2021 Spring (4 Credits)  Schedule:  T 0300 PM - 0545 PM
This course provides students with the opportunity to do participatory, community-based policy research. The course will have three major components. Students will (1) learn about the policy-making process and how to do academic research on policy, (2) engage in public service research on juvenile justice and prison education, and (3) explore ways that remote technologies, especially virtual reality, can be used to provide incarcerated youth with more robust and consistent educational opportunities. The course will culminate with students using their experiences to create a single, integrated policy report on applications of VR in juvenile detention centers.

Class Notes: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Enrollment for Gov 93cj is limited. Please submit your application here: https://forms.gle/pjAapqqN4skaBC488.

#AbolishPolice: The Politics of Public Safety in the Age of Social Media (216449)

Jennifer Halen

2021 Spring (4 Credits)

Schedule: F 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

Recent examples of police brutality have ignited unforeseen momentum for police and prison abolition. Online activism has helped to fuel this unprecedented moment, sparking heated debates about equitable public safety. We'll discuss these debates as well as questions like: what would police abolition look like in practice? How does #AbolishPolice relate to parallel/complementary movements like #DefundPolice, #AbolishIce, #BlackLivesMatter, and others? And how do online campaigns affect the speed, intensity, and content of social movements? Topics will also include the intellectual roots and history of the carceral abolition movement, activist tactics and technologies, and institutional design and change.

Class Notes: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

Government  94CP

Political Economy of the Environment (207736)

Alexander Gard-Murray

2021 Spring (4 Credits)  Schedule:  W 0345 PM - 0545 PM

Instructor Permissions:  Instructor  Enrollment Cap:  16

This course will apply the tools of political economy to the study of environmental policymaking, both in the United States and around the world. How are different interests represented in the creation and implementation of environmental policy? What makes some countries more active on environmental issues? When do businesses choose to support environmental action? Why do some kinds of environmental problems seem easier to solve than others? We will study these questions with a range of contemporary and historical case studies, drawing on both the academic literature and accounts from activists, lobbyists, and policymakers.
Suppose a society achieved truly equal opportunity, so that people could rise as far as their talents and hard work would take them. Would this be a just society? Would those on top deserve their success? To what extent is American society a meritocracy? Do universities promote opportunity or reproduce privilege? The seminar will explore these and other questions related to equality, mobility, and the American dream.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

Mapping Social and Environmental Space (123501)

Jill Kelly

2021 Spring (4 Credits) Schedule: F 1200 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 16

This seminar will use mapping as a methodological technique to examine social and environmental issues. Students will be expected to use mapping software to examine spatial data for a location and topic of their choice for their final paper. Weekly discussions will be conducted in class on various mapping related topics. References will range from books like "How to lie with Maps" to current journal articles examining the use of GIS in social science.

Class Notes: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

The Authoritarian Turn in Central and Eastern Europe: What Can Be Done About It? (217644)

Grzegorz Ekiert

2021 Spring (4 Credits) Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 16

Provides overview of contemporary politics in Central and Eastern Europe with the focus on threats to liberal democracy in the region. Students will develop group research projects to devise strategies of defending liberal democracy and preventing the authoritarian takeover.
This research seminar examines the impacts of globalization on attempts to address key social, political, and environmental problems, including climate change, focusing in particular on the roles played by multinational corporations. Topics include: international institutions and agreements and how these affect regulatory standards set by governments; the potential (and limits) of corporate responsibility and sustainability initiatives; the effectiveness of activist campaigns, including consumer boycotts; the impacts of voluntary certification and labelling schemes, such as Fair Trade, and; the prospects for social enterprise and purposeful business.
Government 94EM

Crime, responsibility, and the law (213657)

Gabriel Katsh

2021 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

Schedule:  
F 0300 PM - 0545 PM

One of the central questions of any political system is how to respond to those who violate the legally enforced norms of behavior that make up the criminal law. In this seminar, we will consider the philosophical justifications that have been given for the operation of the criminal justice system and, in particular, for the practice of punishing offenders. We will focus on the contrasting ideologies of retributivism and consequentialism and how those systems address moral principles such as responsibility, agency, blame, and desert as well as more practical concerns such as deterrence and public safety. Readings will be drawn from a wide range of sources, primarily political theory and law, but also the philosophy of mind, sociology, history, and neuroscience.

Class Notes:  
This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes:  
Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link:

The Politics and Ethics of Medical Care (109731)

Gabriel Katsh

2020 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 16

Schedule:  
R 0300 PM - 0545 PM
This course is an introduction to medical ethics and the ways in which political theory can inform our understanding of the moral and political dimensions of medical care. Using case studies as a launching point, we will explore ideas about autonomy, paternalism, beneficence, and distributive justice, and their application to issues such as informed consent, medical privacy, and the right to refuse care. The Fall 2020 iteration of the course will focus in particular on ethical and policy dilemmas that have arisen in the context of the coronavirus pandemic, including questions about the distribution of scarce resources, the health effects of inequality, and balancing the needs of public health with concerns about individual liberty. Readings include classics of moral and political philosophy, writings by contemporary medical ethicists, Supreme Court decisions, and some empirical and historical studies.

Class Notes: Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Politics of Climate Change (207733)

Alexander Gard-Murray

2020 Fall (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

This course will explore the political problems involved in mitigating and adapting to global climate change. We will draw on both the empirical and normative political literatures, as well as climate science and economics, to approach key questions about climate politics. What do we owe to the future and to people elsewhere? What are the costs of different policy options, and how should they be distributed? How have different governments responded, and what factors shape their responses? What role do international treaties, social movements, and public opinion play? And what can or should be done to change our current trajectory?
**Government 94GO**

Politics of Religion in Liberal Democracies: America and the European Union (108915)

*George Soroka*

2020 Fall (4 Credits)  
**Schedule:** R 0945 AM - 1145 AM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 16

This course examines the various ways, normative and practical, in which politics interact with religion in the U.S. and select EU-member countries. Structuring it are three main tasks: to examine the utility of secularization theory in explaining changes on the political landscape; to compare and contrast American and European experiences with religion in the public sphere; and to consider the political implications of increasing religious/ideological pluralism within these societies.

**Class Notes:**  
Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Transitional Justice and the Politics of Truth Commissions (207734)

*Gloria Ayee*
Scholars, policymakers, and political leaders have long debated appropriate responses to severe human rights violations that occur during periods of conflict, war, and genocide. This course introduces students to interdisciplinary studies in transitional justice and post-conflict reconciliation by focusing on the work of truth and reconciliation commissions. Students will examine key concepts and theoretical perspectives that are central to the field of transitional justice. Drawing on cases such as South Africa, Chile, Peru, and Canada, the course will critically examine how truth commissions are used to provide accountability for human rights abuses carried out by the state.

Class Notes: Course Format: Synchronous Seminar.
Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: [https://undergrad.gov.harvard.edu/gov-94-seminars](https://undergrad.gov.harvard.edu/gov-94-seminars).

The Success and Failure of Protest Movements (216174)

Sarah Hummel

2021 Spring (4 Credits) Schedule: F 0300 PM - 0500 PM

Instructor Permissions: Instructor Enrollment Cap: 16

This class encourages students to think critically about when and why protest movements succeed. Drawing on classic and contemporary research, it examines three interrelated questions (1) why do individuals join protest? (2) how can activists best organize protests? (3) how do governments respond to protest?

Class Notes: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: [https://undergrad.gov.harvard.edu/gov-94-seminars](https://undergrad.gov.harvard.edu/gov-94-seminars).

Democracy in Practice in the Global South (216772)
Julie Weaver
2021 Spring (4 Credits) Schedule: W 0945 AM - 1145 AM
Instructor Permissions: Instructor Enrollment Cap: 16

This seminar explores how democracies operate on the ground in low- and middle-income countries today. What is the reality of how democracy works in practice versus how it is conceived and designed? What are developing countries' major democratic challenges and successes? How does a country's income level impact, and
in turn is impacted by, democratic participation? Main themes to be covered include overarching issues like representation, institutions and state strength, as well as more specific areas of democratic practice such as participatory democracy, civil society, corruption, and managing diversity.

Class Notes: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

Since the end of the Cold War, identity-based conflict has been on the rise. Many countries in Africa, South and Southeast Asia, the Middle East and the Former Soviet Union have witnessed wars and conflict and riots that are ostensibly waged for ethnic or religious reasons. Even if they are not the root cause of these conflicts, such identities often become politically salient as a result of political violence targeting ethnic or religious "others" and, once activated, exhibit remarkable stickiness in social and political life. When intergroup tensions have ratcheted up, is it possible to reduce their importance? Can a shared civic identity be constructed in the wake of violence waged in the name of ethnicity or religion? This course aims to explore these questions through an exploration of relevant social science literature and in-depth analyses of case studies of conflict and conflict resolution.

Class Notes: Course Format: Synchronous Seminar. The rest of student interaction time will be spent in section, peer group activities, and office hours.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

The Politics of Land, Resources, and Colonialism in North America (217630)

Katrine Mazer
This course examines the colonial basis of the continental political economy of the United States and Canada, which has long been understood as the United States' main resource hinterland. It offers students a range of analytical tools through which to understand contemporary contestation over land and resources in both countries. Drawing on writings by political scientists, geographers, anthropologists, and historians, the course moves between theories of nature and settler colonialism; Indigenous perspectives that transcend and exceed Canada and the United States; and specific historical geographies of colonialism, extraction, and contestation. While the course is centered on the structures of power that reproduce the extractive economy, students will also engage with themes of resistance and resurgence throughout.

Class Notes: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

Global Cities in East Asia (216184)

Nara Dillon

2021 Spring (4 Credits) Schedule: T 0900 AM - 1145 AM

Instructor Permissions: Instructor Enrollment Cap: 16

This seminar examines urbanization and globalization in East Asia. We will first focus on the history and geography of globalization. The second part of the course turns to theoretical debates about contemporary globalization and a range of
controversies surrounding global cities. Why are some cities more "global" than others? Is globalization increasing inequality in urban society? Is globalization making cities more similar to each other in urban planning and architecture? We will focus on several East Asian global cities, including Tokyo, Beijing, Bangkok, and Manila, among others.

Class Notes: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

The Politics of Nuclear Weapons (203474)

Stephen Rosen

2021 Spring (4 Credits) Schedule: R 1245 PM - 0245 PM

Instructor Permissions: Instructor Enrollment Cap: 16

Is the theory of nuclear deterrence wrong? Nuclear weapons and the political behavior associated with them are very complex, with large variations over time and space, and these variations may have significant consequences. This course is designed to give the interested student an introduction to the physical reality of nuclear weapons and the history of their use.

Class Notes: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link:
Government  94OA

Inequality and American Democracy (125211)

Theda Skocpol

2021 Spring (4 Credits)  Schedule:  T 0600 PM - 0800 PM

Instructor Permissions:  Instructor  Enrollment Cap:  16

The "rights revolutions" of the 1960s and 1970s removed barriers to full citizenship for African Americans, women, and other formerly marginalized groups. But inequalities of wealth and income have grown since the 1970s. How do changing social and economic inequalities influence American democracy? This seminar explores empirical research and normative debates about political participation, about government responsiveness to citizen preferences, and about the impact of public policies on social opportunity and citizen participation.

This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

Government  94OF

Law and Politics in Multicultural Democracies (128009)

Ofrit Liviatan
Examines the role of law in the governance of cultural diversity drawing on examples from the USA, Western Europe, India, Northern Ireland, and Israel. Central themes at the intersection of law and politics will be explored, including: the impact of courts on rights protections, law's function as a venue of conflict resolution, and courts' relationship with other political institutions. Specific attention will be given to contemporary controversies such as religious symbols and abortion.

Revolution and Politics in Contemporary Iran (109733)

Payam Mohseni

Iran is increasingly a significant power in the Middle East and a salient country to global affairs. Accordingly, this course examines the intricacies of Iranian politics since the 1979 revolution. It explores a broad range of topics including the causes of the Iranian revolution; the political implications of the Islamic regime's institutional architecture; the competitive factional dynamics within the ruling elite; Iranian foreign policy, Iran-US relations, and nuclear negotiations; and Shia political ideology.

Class Notes: Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.
Government 94RG

A Revolt against Globalization? How Political Economies Change (205265)

Peter Hall

2020 Fall (4 Credits)  

Schedule: W 0600 PM - 0845 PM

Instructor Permissions: Instructor  

Enrollment Cap: 15

What drives the social and economic policies of the developed democracies? Is the current wave of populism a revolt against globalization? This course explores changes in the growth strategies pursued by the OECD countries since 1945 and the developments in electoral and producer group politics that drive them across different varieties of capitalism, including contemporary debates about the crises of capitalism and democracy.

Class Notes: Course Format: Synchronous Seminar.  

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu/gov-94-seminars.

Government 94RM

John Rawls (216470)

Michael Rosen

2020 Fall (4 Credits)  

Schedule: F 0945 AM - 1145 AM

Instructor Permissions: Instructor  

Enrollment Cap: 10

John Rawls's thought is immensely original and challenging, but it can also be hard to grasp. Rawls wrote extensively and his presentation of his ideas changed in significant ways over the course of his long career. This class sets itself the simple goal of reading all of Rawls's main writings without the distraction of secondary debates. The hope is that, at the end, we will each be able to come to our own evaluation of the most influential political philosopher of the twentieth century.
Course Format: Synchronous Seminar.

Schedule: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Class Notes: Students will be admitted to Gov 94 seminars through a departmental organized lottery. For more information, please visit the following link: https://undergrad.gov.harvard.edu.gov-94-seminars.

The Politics of Economic Inequality (216213)

*Thomas Remington*

2021 Spring (4 Credits)  
**Schedule:**  T 1245 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 16  
**This seminar investigates the political factors contributing to rising economic inequality in the United States, other developed democracies, transition countries, and globally. The first half will focus primarily on the United States and the second half will examine inequality in comparative and global perspective. We will review the major theories of inequality and examine the consequences of economic inequality for political equality, social mobility, and the differential impact of the COVID-19 pandemic. Throughout, we will relate political to economic factors that drive economic inequality, identifying commonalities and differences across countries.**

**Class Notes:** This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

**Class Notes:** Students will be admitted to Gov 94 seminars through a departmental
Global Ethnic Politics is an undergraduate course that focuses on the social and political implications of ethnic identities in different parts of the world. The course provides a comparative, global analysis of race and ethnicity, and is designed to help students understand the history, dynamics, and salience of ethnic inequality and political cleavage. Issues under consideration include definitions of race and ethnicity, colonization, nationhood, the politics and political history of indigenous peoples, the history and persistence of White supremacy, multiculturalism, legacies of slavery, ethnic political mobilization, panethnicity, diasporas and transnationalism, migration, ethnic cleansing and genocide, and contemporary racial stratification.

Undergraduate seminar. Enrollment by lottery. Please see Gov Dept undergraduate website for details.

Comparative Political Development (216212)
Yuhua Wang
2021 Spring (4 Credits) Schedule: M 0600 PM - 0845 PM
Instructor Permissions: Instructor Enrollment Cap: 16

This course examines the historical development of different political institutions in the world. Why did modern nation states and representative governments emerge in Europe? What was the path of political development in other parts of Eurasia, such as China and the Middle East? How did different political institutions influence economic development in the long term? We explore these big questions drawing materials from political science, history, sociology, anthropology, and economic history. A major course objective is to understand how the roots of political development in different countries connect with their politics and economies today.

Class Notes: This course is open to students in all time zones. After registration day, the course will be scheduled based on the enrolled students' time zones and course schedules.

Data Science for Politics (217785)

Benjamin Schneer

2021 Spring (4 Credits)

Instructor: Benjamin Schneer
Instructor Permissions: None
Enrollment Cap: n/a
Schedule: M 1200 PM - 0115 PM

Decision-making in politics is now more informed by data than ever before. Data analysis guides voter targeting by campaigns, predictions about election outcomes, and critical policy decisions made by government officials – to name just a few important areas touched by the revolution in the availability and use of data. This course covers key areas of politics transformed in recent years by data science, and it introduces fundamental tools of data science through applications to politics. Planned topics include campaigns and get out the vote, predicting election outcomes, redistricting and gerrymandering, and analyzing opinions expressed offline and online. The course takes a problem-driven approach, covering background and academic literature on each topic, learning a relevant data science tool or method, and then applying it to real-world data. A primary goal of the course is to give students an opportunity to develop data analysis skills relevant for working in politics, including writing and implementing code in R; through applications students will gain experience with data wrangling/cleaning/formatting, record linkage, regression, prediction, visualization, surveys and unstructured data.

Class Notes: Gov 1003 is jointly offered with HKS as DPI 610.
Suggested prerequisites: An understanding of intro-level statistics and probability theory and some exposure to programming in R or another language. (e.g. Gov 50, Stat 104, etc.)

Big Data (217629)

David Kane

2021 Spring (4 Credits) Schedule: TR 0730 AM - 0845 AM

Instructor Permissions: None Enrollment Cap: n/a

Everyone talks about big data. Few know how to deal with it. This course will teach you how to work with data of all sizes. How much money is donated to political campaigns? What characteristics are associated with voting Republican? Has the connection between income and ideology changed over time? We need data, often big data, to answer these questions. This course, an introduction to the tools needed for data science, will teach you how to think with data, how to gather information from a variety of sources, how to import that information into a project, how to tidy and transform the variables and observations, how to visualize, how to model relationships, and how to communicate your findings.

Class Notes: This course will be accessible to students in most time zones. It will be a synchronous flipped class with Dr. Kane. Students can choose to attend class on either Tues/Thurs 7:30AM-8:45AM or Tues/Thurs 3PM-4:15PM. There will also be weekly TF-led discussion sections and study halls.

This course will survey the theory and application of airborne and satellite remote sensing, primarily as a tool for spatial social science. Students will learn the basics of electromagnetic radiation, reflection and absorption, satellite and sensor technology, and digital image analysis, with a focus on data acquisition and preparation. Students will learn the use of software for image processing and analysis, the fundamentals of raster GIS, and the use of a scriptable online platform for quick remote processing. Applications will have a social focus, including urbanization and development, infrastructure, settlement morphology, change detection, and interactions between the human and natural environments.

Available for undergraduate and graduate students.

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. Additional interactive sessions for international students will be scheduled after registration.

Government 1022
Community Based Survey Research Practicum (216451)
Chase Harrison
2021 Spring (4 Credits) Schedule: M 1245 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a

Surveys are used by a variety of community and government organizations to gather information and answer policy questions. This practicum will provide students with the opportunity to develop their knowledge of survey research by designing and conducting an original survey for an actual client based in the community. Students will learn how to listen to, understand, and evaluate organizational needs and goals, how to translate those goals into an effective survey research design, how to develop, design, and pilot a survey to provide actionable data to improve social processes or answer useful questions.

Class Notes: This course will be accessible to students in all time zones. It will be a
Recommended Prep: Prerequisite: GOV 1010, or an introductory course in social science research methodology, or previous experience working with surveys or survey data.

Government 1023
Conservatism and its Critics (216332)

*Eric Nelson*

2021 Spring (4 Credits)  
Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None  
Enrollment Cap: n/a

What is conservatism? Is it merely a temperament or sensibility? Or is it a coherent approach to political theory and practice? Should conservatives defend free markets? Must they reject the discourse of natural rights? Can a liberal be conservative? Can a socialist? This course will explore such questions and others like them through a close reading of conservative writers and their critics. We will begin with the rise of conservatism as a political force in the wake of the French Revolution and follow its fortunes across the next two centuries, in works of political theory as well as literature. Authors will include Edmund Burke, Mary Wollstonecraft, Samuel Taylor Coleridge, Ford Madox Ford, Friedrich Hayek, Michael Oakshott, Robert Nozick, and Tom Stoppard. We will be interested throughout in asking what, if anything, is conservative about the Conservative Movement in contemporary American politics.

Class Notes: theory_subfield

Class Notes: Every effort will be made to ensure that this course is accessible to students in all time zones. It will be a traditional lecture course that will be recorded. Feminist Political Thought (207714)

Katrina Forrester

2020 Fall (4 Credits)  Schedule:  TR 0130 PM - 0245 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

What is feminism? What is patriarchy? What and who is a woman? How does gender relate to sexuality, and to class and race? Should housework be waged, should sex be for sale, and should feminists trust the state? This course is an introduction to feminist political thought since the mid-twentieth century. It explores the key arguments that have preoccupied radical, socialist and liberal feminists, and how debates about equality, work, and identity matter today.

Class Notes:  theory_subfield

Class Notes:  This course will be accessible to students in all time zones. It will be a flexible live lecture. To accommodate students in different time zones, an additional section will be scheduled after enrollment. There will also be weekly TF-led discussion sections.

Government 1033

Educational Justice (204038)

Jacob Fay

2021 Spring (4 Credits)  Schedule:  W 0130 PM - 0330 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Educators and educational policy makers regularly face challenging ethical decisions. For example, what should be done about a student with diagnosed emotional issues who frequently disrupts class, but who benefits from being mainstreamed? Should teachers resist grade inflation even if it helps their students in the college and labor market? Is it just to expand a charter school that achieves outstanding academic outcomes at the cost of high attrition rates? When school closure or teacher evaluation policies disproportionately impact low-income communities of color, is that in itself evidence of an injustice that must be addressed? These kinds of questions are often addressed as technocratic challenges of leadership, legal compliance, or accountability. This course, by contrast, addresses the ethical dimensions of educational practice and policy, with justice as our primary focus. We will engage with philosophical, theoretical, and empirical readings from a wide variety of disciplines. We will also grapple with case studies of dilemmas of educational justice from classrooms, schools, districts, and organizations in the United States and abroad. Our goals will be to deepen our own understandings of educational justice, to engage with others about complex ethical judgments across multiple lines of difference, and to learn how to enhance educators’ and policymakers’ capacities to make ethical decisions under challenging conditions.

Course Notes:  Undergraduates permitted upon application to instructor. Offered at HGSE as A-203.
Government 1046

The Political Theory of Brexit (216377)

Richard Tuck

2020 Fall (4 Credits)  
**Schedule:** T 1200 PM - 0245 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 24

The arguments about Brexit in the UK raised many fundamental questions about political theory. This course is an opportunity to look at the theoretical arguments on both sides; some of the participants in the debates will be guests of the class.

**Class Notes:** theory_subfield

This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. Additional interactive sessions for international students will be scheduled after registration. There will also be weekly TF-led discussion sections.

Ethics & Public Policy (216471)

*Eric Beerbohm*

2021 Spring (4 Credits)  
**Schedule:** M 1245 PM - 0245 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 45

Policymaking shapes the contour and content of our life choices. Political leaders can constrain our options without our knowledge, attach strings to policy benefits, and manipulate us in diverse ways. Lawmaking and campaigning, then, seem to demand heightened moral scrutiny. This course explores whether there are special vulnerabilities that arise democratic settings. Does our ideal of the citizenship make us uniquely susceptible to certain forms of manipulation, from nudging to gaslighting? How can citizens inoculate themselves from the manipulative practices that democracy sustains?

**Class Notes:** theory_subfield

This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. There will also be weekly TF-led discussion sections.

Ancient and Medieval Political Philosophy (114754)

*Eric Nelson*

2020 Fall (4 Credits)  
**Schedule:** TR 1200 PM - 0115 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course aims to introduce students to central texts in the history of Western political thought, from Greek and Roman antiquity to the rise of Christendom.
Government 1061
The History of Modern Political Philosophy (115014)
Richard Tuck
2021 Spring (4 Credits) Schedule: TR 1200 PM - 0115 PM
Instructor Permissions: None Enrollment Cap: n/a
Political philosophy from Machiavelli to Nietzsche, with attention to the rise and complex history of the idea of modernity.

Government 1092
Progressive Alternatives: Institutional Reconstruction Today (125860)
Roberto Mangabeira Unger
2021 Spring (4 Credits) Schedule: T 0100 PM - 0300 PM
Instructor Permissions: None Enrollment Cap: n/a
An exploration of the past and future agenda of progressives, whether self-described as liberals or as leftists. What should they propose, now that they no longer believe in the usefulness of governmental direction of the economy or in the sufficiency of redistributive social programs? A basic concern is the relation of programmatic thought to the understanding of change and constraint.
In the recent historical period, progressives have sought to humanize the established order rather than to reimagine and remake it. Here the main focus is on institutional or structural change in the market system and in democratic politics. Among the themes to be discussed are the nature and future of the knowledge economy, the status of free labor vis-à-vis capital, the relation of finance to production, the making of a high-energy democracy that no longer needs crisis to make change possible, and the education required by such economic and political alternatives. A central theme throughout is the content and implications of the idea of freedom.

The course will draw on many disciplines and consider examples from many settings. It will try to develop ways of thinking as well as proposals for change.

Extended take-home examination.

Civil Resistance: How It Works (217384)

Erica Chenoweth

2020 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 5

Civil resistance is the application of unarmed civilian power using nonviolent methods such as protests, strikes, boycotts, demonstrations, without using or threatening physical harm against the opponent. The use of civil resistance has been increasing around the world in recent decades in places as diverse as Sudan, Algeria, Russia, Serbia, Spain, Egypt, Iran, Maldives, the Niger Delta, the West Bank, Thailand, Myanmar, and the United States, among others. Because civil resistance can have profound effects, it is essential to understand the causes, dynamics, outcomes, and consequences of civil resistance campaigns. Such questions also have clear practical implications for those seeking to use, support, or assist such movements – as well as those who would seek to undermine them.

This course serves as a primer on the topic of civil resistance, introducing students to the primary explanations for how and why civil resistance works, as well as the practical implications of empirical research on the topic for observers, activists, and policymakers alike. The five primary goals of the course are to: (1) present leading explanations, concepts, approaches, and discourses for understanding civil
Civil resistance is the application of unarmed civilian power using nonviolent methods such as protests, strikes, boycotts, demonstrations, without using or threatening physical harm against the opponent. The Making of Modern Politics (114770)

*Peter Hall*

2021 Spring (4 Credits)  Schedule: TR 1030 AM - 1145 AM  
Instructor Permissions: None  Enrollment Cap: n/a

How are democracies created and why do they collapse? What causes revolution? What were the
consequences of the industrial revolution? What roles do ideas, institutions and interests play in processes of political change? This course examines the long-term historical developments behind the creation of modern politics. Focusing on Britain, France, Germany and Italy from the 1600s to the 2000s, it explores the lessons Europe offers for the development of democracy.

Class Notes: comparative_subfield

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. There will also be weekly TF-led discussion sections.

Negotiating Post-Soviet Conflict: The Geopolitics of Eastern Europe and the Caucasus (212603)

*Arvid Bell*

2021 Spring (4 Credits)  

**Schedule:** M 0300 PM - 0545 PM  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

This undergraduate course will use case studies and virtual immersive negotiation simulations to explore the dynamics underpinning hot spots in the post-Soviet space with a focus on Georgia, Eastern Ukraine and US-Russia relations. Students will not only gain a deeper understanding of current political events in Eurasia, but they will also improve their individual negotiation and conflict management skills.

Class Notes: comparative_subfield

Class Notes: This course includes six Monday sessions in addition to three extended Saturday sessions that feature immersive negotiation exercises. Students are expected to attend all nine course sessions for synchronous learning. Monday sessions (3pm-4:45pm): 1/25, 2/8, 2/22, 3/15, 3/29, and 4/12. Saturday sessions: 2/20, 10am-2:30pm; 3/13, 10am-5:30pm; 4/10, 10am-6:30pm.

Politics in Brazil (109554)

Frances Hagopian

2020 Fall (4 Credits)  Schedule:  MW 0300 PM - 0415 PM
Instructor Permissions: None  Enrollment Cap:  n/a

Interactive course introduces students to contemporary politics and policy in Latin America’s largest country. Examines the colonial origins of inequality and truncated democracy, twentieth century authoritarianism and democratization, the design of political institutions, and such contemporary policy challenges as health, security, and the environment. Emphasis is on how the mobilization of civil society, stronger political parties, and innovative social policies deepened citizen participation, reduced inequality, and advanced social inclusion, and how recent political polarization and economic crisis weaken political representation and threaten democracy. Course culminates in a present-day policy exercise that includes partnering with University of São Paulo students.

Class Notes:  comparative_subfield

Class Notes:  This course will be accessible to students in all time zones. It will be a flexible live lecture. To accommodate students in different time zones, an additional interactive session will be scheduled after enrollment. There will also be weekly TF-led discussion sections and meetings with students in our "sister" course on Brazilian politics at the University of Sao Paolo.

Comparative Politics in Latin America (146761)

Steven Levitsky

2021 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions: None  Enrollment Cap:  n/a

Examines dynamics of political and economic changes in modern Latin America, focusing on Argentina, Brazil, Chile, Cuba, Mexico and Venezuela. Topics include the rise of populism and import-substituting industrialization, revolutions and revolutionary movements, the causes and consequences of military rule, the politics of economic reform, democratic transitions, and democratic consolidation. The course analyzes
these phenomena from a variety of different theoretical perspectives, including cultural, dependency, institutionalist, and leadership-centered approaches.

Course Notes: Course is open to graduate students with instructor permission.

Class Notes: comparative_subfield

Class Notes: This course will be accessible to students in all time zones. It will be a flipped class with asynchronous recorded lectures and non-mandatory, but strongly encouraged attendance to synchronous sessions on Tuesdays and Wednesdays 7:30PM-8:45PM. There will also be weekly TF-led discussion sections.

Requirements: Course open to Undergraduate Students Only

Women in US Politics (216204)
Sparsha Saha

2021 Spring (4 Credits) Schedule: TR 0300 PM - 0415 PM
Instructor Permissions: None Enrollment Cap: n/a

This course examines the causes and consequences of gender inequality in politics, the workforce, and the household. We will draw on theory and literature from political science and other disciplines to learn about cutting edge research in the field, focusing on the United States (with some application to other advanced democracies). What explains why women have not yet achieved equal political representation? How did gender play a role in the 2016 U.S. presidential election campaign and beyond? Why should we care about gender parity? What has been implemented to correct gender disparity in politics? Why do women make less money than men? Why do women still do more of the work at home despite becoming more equal in education and professional life? How can we change hearts and minds? How does gender intersect with race and class and sexual orientation? What can people who identify as men (particularly white men) do? How are sexism, racism, and speciesism all connected? What is going on with gender in academia, and why do you have so few tenured female professors, particularly in fields like Government and STEM?

This is a Mindich engaged course, so we will have outside speakers, including politicians, activists, and academics. Outside of class events will be recorded.

Course Notes: american_subfield

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. Additional interactive sessions for international students will be scheduled after registration. There will also be weekly TF-led discussion sections.

Race, Film, and American Politics (211313)

Gloria Ayee

2021 Spring (4 Credits) Schedule: W 0600 PM - 0845 PM

Instructor Permissions: Instructor Enrollment Cap: 30

Race, Film, and American Politics is a course that examines the multifaceted ways in which racial and ethnic identity has been represented in American film. Drawing on political science, sociology, anthropology, and film and media studies, we will assess the ways in which the mainstream media in the United States — focusing primarily on the Hollywood film industry — has portrayed different population groups and shaped our understanding of what it means to be American. The course will address issues of social stratification, and consider the intersection of identity and politics by analyzing historical shifts in cinematic representation in the United States.

Class Notes: american_subfield

Class Notes: This course will be accessible to students in all time zones. It will be a flexible live lecture that will be recorded. There will also be weekly TF-led discussion sections.

Election Analytics (216268)

Ryan Enos

2020 Fall (4 Credits) Schedule: M 0300 PM - 0415 PM

Instructor Permissions: None Enrollment Cap: n/a

This data-driven course seeks to understand how elections are won in the United States. We will study research on campaigns and voting behavior and examine data from the current and past elections to understand what will happen in 2020 and future elections. Students will learn data analysis skills and will work on a data-oriented final project with an opportunity to participate in the next iteration of the Harvard Political Analytics Conference. Before enrolling students should have completed Gov 50 or an equivalent course.

Class Notes: american_subfield

Class Notes: This course will be accessible to students in most time zones. It will be a flipped class with asynchronous lectures (prerecorded lecture videos) and a synchronous class with Professor Enos each week at either Mon 3 pm or Wed at 9 am. There will also be weekly TF-led discussion sections.

How Leaders Translate Public Opinion into Public Policy (213624)

Benjamin Schneer

2021 Spring (4 Credits) Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Instructor Enrollment Cap: 25

Government officials both shape and respond to the policy preferences of the electorate. Understanding this dynamic process is critical for policymakers as well as for informed observers of politics, and it illuminates a number of questions with practical applications: How would public policies change if everyone voted? What mechanisms might compel government officials to be more responsive to the wishes of their constituents? How representative is representative democracy anyway? In answering questions such as these, this course covers topics including how citizens form opinions, the role of traditional and social media as a source of information (and misinformation), the place of elections and electoral institutions in a representative democracy, and how alternative forms of political action such as the petition and the initiative process may influence policymaking. This course offers students interested in a career in politics or policymaking an opportunity to examine what matters when decision makers are translating public opinion into public policy.

Course Notes: Offered jointly with the Kennedy School as DPI-308

Class Notes: Also offered by HKS as DPI 308.

Tech Science: From Democracy to Technocracy and Back (207711)

Latanya Sweeney

2021 Spring (4 Credits) Schedule: TR 0600 PM - 0715 PM

Instructor Permissions: Instructor Enrollment Cap: 30
We live in a new kind of technocracy—a society in which technology design dictates the rules that govern daily life. In the race to construct the latest gadget, app and online service, winning depends on rapid uptake and business success. Losing are social norms and democratic values. This course uses case studies to understand issues, introduces a formal framework to model and reason about technology-society conflicts and then demonstrates the power of scientific experimentation and ability to exploit paradigm shifts as means to a victorious future where society reaps the benefits of technological innovations without sacrificing critical values.

Class Notes: american_subfield

American Presidential Elections (216335)

Jon Rogowski

2020 Fall (4 Credits) Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None Enrollment Cap: n/a

This course studies presidential elections in historical and contemporary perspective. It examines the development of presidential nominating procedures, the effectiveness of presidential campaigns, and the structural and individual-level factors that shape election outcomes, and links these topics to the 2020 presidential election. The course concludes by discussing the implications of presidential elections for American democracy and considering proposals for reform.

Politics of the American Presidency (205108)
Jon Rogowski
2021 Spring (4 Credits) Schedule: TR 0130 PM - 0245 PM
Instructor Permissions: None Enrollment Cap: n/a
This course surveys the politics of the American presidency in a system where power is distributed across branches of government. From this institutional perspective, the course uses historical and contemporary examples to engage the following questions: What is presidential power and what are its implications for American democracy? When do presidents succeed — and why do they fail? How do presidents manage relations with Congress, the courts, the bureaucracy, and the public? How do presidents make decisions about war and peace? Through answering these questions, the course illuminates the factors that shape the behavior of the world's most powerful political leader.

Controlling the World's Most Dangerous Weapons (147213)

Matthew Bunn
William Tobey

2020 Fall (4 Credits)  
Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor  
Enrollment Cap: 5

Preventing nuclear war is one of the truly existential challenges facing the human species -- but the danger is rising, as tensions among nuclear powers increase, nuclear agreements are challenged, and new technologies and arms competitions create new uncertainties. From Iran to North Korea, from U.S.-Russian and U.S.-Chinese nuclear competition to Syria's deadly chemical assaults, decisions about nuclear, chemical, and biological weapons can make the difference between war or peace and between safety or grave danger for people around the world. This course will give students an understanding of these weapons and the global efforts to prevent their use and control their spread. The course covers policy tools from treaties and diplomacy to sanctions and war. This year, particular attention will be paid to emerging great-power competition and its implications for deterrence and arms control. Students will learn to use an integrated, risk-informed approach to assessing policy options when difficult choices need to be made in the face of large uncertainties. This will help prepare students for careers dealing with choices about these deadly weapons.

Class Notes: Also offered by HKS as IGA 232.

Behavioral Insights and Public Policy: Nudging for Good (204958)

Michael Hiscox

2021 Spring (4 Credits)  Schedule:  MW 0130 PM - 0245 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Behavioral economics focuses on the ways in which our individual actions, rather than resulting from rational self-interested decisions, reflect a variety of biases, habits, emotions, and considerations about others. Many governments have created behavioral insights teams to apply these insights to rethink traditional approaches to policy. We will examine recent research and applications in areas including healthcare, crime, discrimination, retirement savings, consumer credit, environmental conservation, welfare, employment, education, taxation, and foreign aid.

Central Asia in Global Politics (207984)

Nargis Kassenova

2021 Spring (4 Credits)  
Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: None  
Enrollment Cap: n/a

The course is designed as an in-depth study of the place of Central Asia in Eurasian and global politics, and the policies of key external actors, such as Russia, the United States, China, the European Union, Turkey, Iran, Japan, South Korea and India, toward the region. Students are familiarized with the ways Central Asia has been contextualized both in scholarly sources and media. We will dwell on the changing geopolitical dynamics of the region and analyze how developments there are intertwined with bigger contexts and stories, ranging from non-proliferation and small statehood to authoritarian consolidation and transnational corruption. We will define similarities and differences in the foreign policies of Central Asian states and discuss the future prospects of the region.

Class Notes: IR_subfield

Class Notes: This course will be accessible to students in most time zones. Students can choose to attend a synchronous session with Dr. Kassenova on either Tues/Thurs 9am-10:15am or Tues/Thurs 12pm-1:15pm. There will also be weekly TF-led discussion sections.

Graham Allison

David Sanger

2020 Fall (4 Credits) Schedule: M 0430 PM - 0715 PM

Instructor Permissions: Instructor Enrollment Cap: 23

Using a series of case studies from the front page, and from the most urgent and important issues on the U. S. national security agenda, this course will engage students in grappling with the hardest American national security challenges of the decade ahead. Issues range from Russiagate and the economic and military rise of China to Iran, Syria and the continuing war on terrorism. Assignments require strategic thinking: analyzing dynamics of issues and developing strategies in a government whose deliberations are discombobulated by leaks, reports about internal differences among policymakers, and press analyses. Students will learn to devise strategies and write Strategic Options Memos as participants in the policymaking process. Strategic Options Memos combine careful analysis and strategic imagination, on the one hand, with the necessity to communicate to major constituencies in order to sustain public support, on the other. A major subtheme of the course explores coping with a world where a pervasive press makes secrecy more often the exception than the rule. In each case, there will be exploration of how media coverage affects decision making, with an examination of leaks about Russia's cyber intervention in the 2016 election, WikiLeaks, and the Snowden case as well as the revelations about drones and secret, American-led cyberattacks, and other examples of the publication of classified information.

Course Notes: Offered jointly with the Kennedy School as IGA-211.

Quantitative Social Science Methods I (124780)

Gary King

2020 Fall (4 Credits)  Schedule:  M 1200 PM - 0200 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

This class introduces students to quantitative methods and how they are applied to political science research. It has two overarching goals. First, we focus on the theory of statistical inference - using facts you know to learn about facts you don't know - so that you can truly understand a wide range of methods we introduce, feel comfortable using them in your research, digest new ones invented after class ends, implement them, apply them to your data, interpret the results, and explain them to others. Second, students learn how to publish novel substantive contributions in a scholarly journal. A substantial portion of those in this class publish a revised version of their class paper as their first scholarly journal article. Please see http://j.mp/G2001 for details.

Class Notes:  Students enrolled in this course are expected to attend one session on Monday from 12 to 2pm and one additional 75-minute section on Thursday at either 7:30AM or 1:30PM. Lecture videos and recordings of the class meetings will be available online.

Government 2002
Quantitative Social Science Methods II (111530)

Matthew Blackwell

2021 Spring (4 Credits)  Schedule:  MW 1030 AM - 1145 AM
Instructor Permissions:  None  Enrollment Cap:  n/a

This course provides a rigorous foundation necessary for quantitative research in the social sciences. After reviewing the basic probability theory, we offer a systematic introduction to the linear model and its variants -- the workhorse models for social scientists. We cover the classic linear regression model, least squares estimation and projection, fixed and random effects models, principal components analysis, instrumental variables, flexible regression models, and regularization for high dimensional data. In covering these topics, we deepen our knowledge of fundamental concepts in statistical inference while also demonstrating how these methods are applied in political science.

Recommended Prep:  Basic probability and statistical inference, familiarity with R.

Requirements:  Prerequisite: Gov 2001 or the permission of the instructor.

Research Design in Political Science: Qualitative and Mixed Methods (207717)

*Melani Cammett*

*Frances Hagopian*
This course introduces students to multi-method research design and the basic principles and tools of qualitative research in the social sciences. Topics examined include the logic of causal inference, measurement and conceptualization, choosing cases, natural experiments, the potential uses of mixed methods, and research ethics. Research techniques covered are process tracing, archival research, interviews, and ethnography. Students will also have the opportunity to workshop their early-stage research. The application of multi-methods research designs is emphasized throughout the course.

Philosophy, Genealogy, History (216640)

*Michael Rosen*
In what sense, if at all, does Philosophy depend essentially upon its history? We approach this question in three phases. First, we compare the engagement with history found in the philosophical work of Hegel and Heidegger. Next, we address the meta-philosophical question itself through the work of figures like Bernard Williams, Michael Rosen, and Eileen O'Neill, among others. Finally, we explore the particular engagement with history manifest in the genealogical method, especially as it has been pursued recently by feminist philosophers such as Rahel Jaeggi, Sally Haslanger, and Amia Srinivasan.

Course Notes: The course enrollment will be capped at 20 with priority for Gov and Philosophy G1s and G2s.

Class Notes: Also offered by the Philosophy Department as PHIL 238.

Course Format: Synchronous traditional seminar.

Political Thought in Context: The English Revolution (123245)

Eric Nelson

This course aims to introduce students to the most prominent methodological approaches to the history of political thought, using the English Revolution as a case study. We will survey the remarkable range of political responses to the constitutional crisis of 1640 to 1660, from theories of divine right to the arguments of the Levellers. Readings will include Robert Filmer, James Harrington, Thomas Hobbes, John Milton, Henry Parker, and Algernon Sidney, as well as debates in the secondary literature about how to read and understand each of these authors.

Requirements: Course open to Doctoral Students Only

The Political Thought of Max Weber (124374)

Richard Tuck

2021 Spring (4 Credits)  Schedule:  M 0900 AM - 1145 AM
Instructor Permissions:  None  Enrollment Cap:  n/a

This course is intended to read the principal works of Max Weber in the light of the recent interpretative literature which treats him as a political theorist and an economist rather than a sociologist. It is organised loosely on chronological lines, so that we can understand the development of his thought.

Requirements:  Course open to Doctoral Students Only

Government 2098

After Pandemic: political philosophy, political economy, and public policy for a new social compact (216190)

Danielle Allen

2020 Fall (4 Credits)  Schedule: R 0900 AM - 1145 AM

Instructor Permissions: None  Enrollment Cap: n/a

The COVID-19 pandemic has delivered a shock to the nations of the world and the global political economy. In the U.S. the experience of the pandemic has been defined by failures of governance, leadership, and technocratic expertise and by the stark exposure of underlying health inequities, and the broad social vulnerability for individuals and the polity generally that flows from inequity. The centrality of care to our economy and social-well being has also been brought to the fore, made absence by the sudden disappearance of structures like schools that have come to develop so much of the care and services of the social safety net in the U.S. While much innovation in political philosophy, political economy, and public policy has been in development for the last decade, since the global financial crisis, the pandemic presents an occasion for harvesting the fruits of that work with the goal of articulating the foundations of a new social compact. This course will explore intersecting contributions in the domains of political philosophy, political economy and public policy that: (1) articulate goals for a 21st century vision of justice as tightly linked to democracy; (2) search out policy mechanisms that maximize the use of free exchange to align public and private goods thereby delivering material security, widely shared prosperity, negative positive, and social rights protection, and social equality; and (3) foster collective experimentation with the formal rules of contemporary polities toward those ends.

The course will spend the first three weeks on Danielle Allen's forthcoming book, *Justice by Means of Democracy*, chapters from Glen Weyl and Eric Posner's book and 2 papers by Weyl, *Radical Markets*, and Marc Stears forthcoming book, *Out of the Ordinary*. The subsequent weeks will focus on specific policy innovations, including writings such as the following:

1. Audrey Tang on "civic media"
2. Beth Noveck on participatory digital democracy
3. Colin Mayer and/or Michelle Meagher on the future of the corporation
4. Matt Prewitt on data cooperatives
5. Vitalik Buterin or Zoë Hitzig on crowd-funding/matching
6. Fiona Scott Morton on controlling corporate power
7. Joel Rogers and Joe Lambke on urbanism
8. Nicole Immorlica and/or Kaliya Young on identity systems
9. Sam Hammond on social insurance and welfare
10. Branko Milanovic and/or Maggie Peters on migration and trade

Class Notes:  Course Format: Synchronous traditional seminar.

Politics of Development (207715)
Melani Cammett
2020 Fall (4 Credits)
Schedule: T 1200 PM - 0200 PM
Instructor Permissions: None
Enrollment Cap: n/a

This graduate seminar centers on big questions related to why development occurs in some places or times and not others and adopts a broad understanding of development, focusing on both economic and social development. Topics include but are not limited to states and markets, the origins and effects of the "developmental state" and state capacity, regime type and development, the influence of historical legacies, the role of elites and citizens in driving development, welfare regime variation in developing countries, ethnoreligious diversity and development, the relationship between development and conflict, and the relationship between the scholarly study of development and development policy and practice. The course opens with foundational approaches and quickly moves into key contemporary debates, with readings that use a broad array of methods and approaches.

Political Economy of Development (207722)

Pia Raffler

2020 Fall (4 Credits)  Schedule: M 0300 PM - 0500 PM

Instructor Permissions: None  Enrollment Cap: n/a

This graduate seminar provides an overview of the research frontier on political accountability and governance in developing countries, including democracies, electoral autocracies, and authoritarian regimes. Topics include democratization and democratic erosion, voting behavior, clientelism, accountability, the bureaucracy, and the role of foreign aid. While including some foundational readings, the syllabus puts emphasis on recent work. Readings primarily draw from comparative politics, political economy, and development economics. In addition to theory and empirics, the course focusses on the nuts and bolts of collecting qualitative and quantitative primary data. Parts of this seminar are hands-on, and students are expected to have a background in causal inference and statistical programming. Students will replicate and extend the data analysis of a recent study, write a peer review of an academic article, and write a research proposal or pre-analysis plan.

Class Notes: Course Format: Synchronous traditional seminar.

Government 2148
Civil Society, West and East (114710)
Susan Pharr
Grzegorz Ekiert

2020 Fall (4 Credits) Schedule: W 0300 PM - 0545 PM
Instructor Permissions: None Enrollment Cap: n/a

Focusing in particular on European and Asian settings, the seminar examines debates over what civil society is, notions of public space and social capital, and the role of civil society in political transitions.

Class Notes: Course Format: Gov 2148 meets Wed, 3-5 p.m. It is Synchronous. The course is a seminar with extensive participation and interaction. In addition, in some sessions there is a Spotlight on Themes module with a presentation by one of the professors or other leading expert. The course includes group project activities/presentations. We welcome advanced undergraduates, and have a special undergraduate-friendly Requirement Option. In the past, Susan Pharr has offered Gov 94gs, "Globalization and Civil Society"; but this course will no longer be offered in the future, so undergraduates interested in the rise (and fall?) of civil society across the globe should consider taking Gov 2148. This is the last time Gov 2148 will be offered, so this is your last chance to take it!

Class Notes: Introductory session will be held on 8/19 from 3 to 3:30pm followed by Prof. Pharr’s office hours from 3:30 to 4pm.

Government 2453
Practical and Theoretical Regulation of Voting (124427)

Stephen Ansolabehere
James Snyder

2020 Fall (4 Credits) Schedule: W 0300 PM - 0545 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

The course will focus on points of contact between legal scholarship on voting rights and election law and the political science literature on redistricting, voting behavior, and elections. Emphasis will be placed on how observed data can be, and should be, used as evidence.

Class Notes: Course Format: Synchronous traditional seminar.

Class Notes: Gov 2453 is jointly offered with the Harvard Law School as HLS 2622.

Requirements: Course open to Doctoral Students Only

Government 2464
Presidency and the Executive Branch (205126)

Jon Rogowski

2021 Spring (4 Credits) Schedule: R 0945 AM - 1145 AM
Instructor Permissions: None Enrollment Cap: n/a

The primary goal of the course is to help graduate students develop active research agendas in the study of American political institutions with a particular focus on the executive branch. The course will familiarize students with major theoretical perspectives on the presidency and the executive branch and evaluate empirical approaches to their study. We will identify opportunities for theoretical innovation and refinement, explore new and/or alternative methodologies for studying the presidency, and develop research agendas that advance substantive knowledge about American political institutions.

The Political Economy of the School (112949)

Paul Peterson

2020 Fall (4 Credits)  

Schedule:  
TR 0130 PM - 0245 PM

Instructor Permissions:  
Department  

Enrollment Cap: 9

Identifies political and economic influences on education policy, expenditure levels, and governance. Examines classic and recent studies of selected school policies (class size, charters, vouchers, accountability, school organization, etc.), giving particular attention to research design and methodological issues as well as to theories and interpretations of institutions and processes.

Course Notes:  
Jointly offered with HKS as SUP 448. Permission of instructor required for all undergraduates.

Recommended Prep:  
Background in statistics expected.

Requirements:  
Course open to Doctoral Students Only

Field Experiments for Policy and Program Evaluation (205110)

Michael Hiscox

2021 Spring (4 Credits)  Schedule: T 1200 PM - 0245 PM
Instructor Permissions: None  Enrollment Cap: n/a

The aim of the course is to provide students with training in how to design and implement randomized controlled trials to test causal models and evaluate policies and programs based on those models. We will discuss working with government and non-government partners, ethics, sampling, blocking, statistical power, online platforms, and communicating findings. Examples will be drawn from research on political campaigns, business programs, economic development, public health, education, employment, welfare, taxation, discrimination, and criminal justice.

Approaches to the Study of Politics (127060)

*Jeffry Frieden*
Graduate Seminar designed to introduce research questions and frontiers across political science.

Course Notes: Restricted to first year Government graduate students - no exceptions

Class Notes: Course Format: Synchronous traditional workshop.

Government 3002
Teaching and Communicating Political Science (143023)

Thom Wall

2020 Fall (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

This is a required course for Government PhD students who are teaching in the department for the first time (typically G3s). The course meeting five times in the fall semester. Between meetings, you will have the chance to apply what you learn through peer observation, having your section videotaped, and watching your section with the Departmental Teaching Fellow. The ultimate goal of this course is to help you to become a good teacher and an effective speaker.

Course Notes: Limited to and required of all first time teaching fellows in Government.

Graduate School of Arts and Sciences

Subject: Graduate School of Arts and Sciences

Graduate School of Arts and Sc 299

Introduction to Graduate School: Skills and Practices for Scholarly Success (213514)

Robin Bernstein

2020 Fall (4 Credits)

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

The course trains graduate students in the humanities and social sciences in fundamental skills that lead to scholarly success. Students learn to read journal articles swiftly and with high comprehension and retention, to write clear and persuasive prose, to teach effectively, and to identify and apply for grants. The course also leads students through a process by which they orient themselves to the major journals, scholarly organizations, and conferences in their respective disciplines. During the semester, each student produces a series of documents of direct, practical value: a polished academic C.V., a Harvard Scholar website, an Individual Development Plan, and a syllabus, among others.

Course Notes: Course is only open to doctoral students in the Social Sciences and Arts and Humanities.

Requirements: GSAS Students Only
